CONGRESSIONAL RECORD:

CONTAINING

THE PROCEEDINGS AND DEBATES

OF THE

SIXTY-THIRD CONGRESS, FIRST SESSION.

VOLUME L.

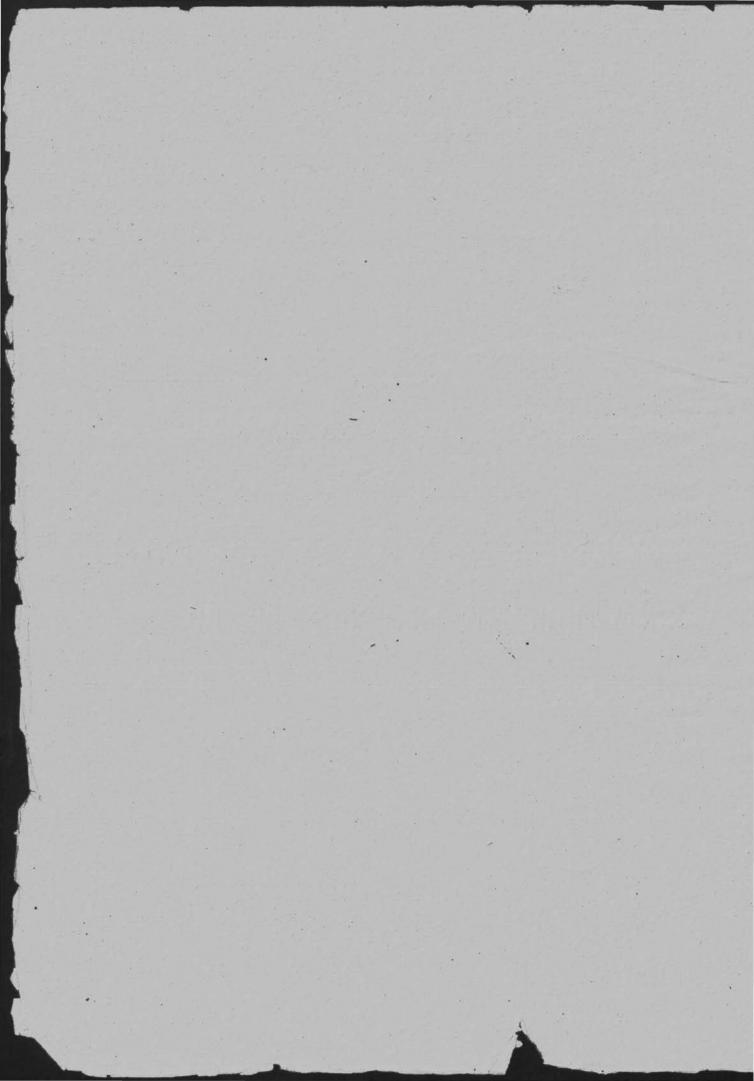

WASHINGTON

D. OF D. JAN 8 /914

VOLUME L, PART IV.

CONGRESSIONAL RECORD,

SIXTY-THIRD CONGRESS, FIRST SESSION.

SENATE.

Monday, August 4. 1913.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of the proceedings of Saturday last was read and

PETITIONS AND MEMORIALS.

Mr. WEEKS presented resolutions adopted by the Ancient Order of Hibernians of Plymouth County, Mass., remonstrating against the repeal of the clause in the Panama Canal law exempting American coastwise vessels from the payment of tolls, which were referred to the Committee on Interoceanic Canals.

He also presented a memorial of the New York Zoological Society, remonstrating against the adoption of the proposed amendment to the clause in the pending tariff bill relating to the importation of aigrettes, and so forth, which was ordered

to lie on the table.

Mr. CLAPP (for Mr. POINDEXTER) presented a resolution adopted by the Chamber of Commerce of Montesano, Wash., favoring an appropriation for the fortification of Grays Harbor, Wash., which was referred to the Committee on Commerce.

He also (for Mr. Poindexter) presented a resolution adopted by the Commercial Club of Ritzville, Wash., favoring an appropriation for the improvement of the Columbia and Snake Rivers, Wash., which was referred to the Committee on

REVISION OF THE PATENT LAWS (S. DOC. NO. 151).

Mr. BRANDEGEE. Mr. President, I have here a petition, including resolutions adopted by the Inventors' Guild, held at New York City, May 28, 1913, in relation to a revision of the patent laws of the United States, which I think is an exceedingly important matter, and I will ask that the petition be printed in the RECORD and referred to the Committee on

There being no objection, the petition was referred to the Committee on Patents and ordered to be printed in the RECORD, as follows:

Resolutions adopted at a meeting of the Inventors' Guild, held at New York City, May 28, 1913.

Whereas the advanced position of the United States among the nations of the world as regards manufacturing and inventive progress has been primarily due to the farsighted provision in the United States Constitution under which improvement by invention was stimulated by granting letters patent for limited times.

Whereas the fact that certain trusts and large corporate manufacturers have been accused of using patents improperly, both offensively and defensively, to aid them in effectually stifling competition, has resulted in the introduction of bills before Congress intended to regulate such abuses by making radical changes in the United States patent system.

late such abuses by making radical changes in the United States patent system.

Whereas the hearings on the Oldfield bill (H. R. 23417) in the spring of 1912 demonstrated that there were marked differences of individual opinion among inventors, legislators, manufacturers, and patent lawyers as to the changes in our patent system which would be desirable to subserve the best interests of the United States.

Whereas there is now pending before the Sixty-third Congress in the House of Representatives a bill (H. R. 1700) introduced by Mr. OLDFIELD, Representative from Arkansas, which provides for radical changes in the United States patent system fraught with the most serious consequences to the people of the United States, and especially to independent and competitive manufacturers and inventors. Whereas the intention of the United States Constitution to stimulate the publication of valuable inventive thought by granting and securing an exclusive right to the inventor who first publishes his invention through the agency of a patent of the United States seems to have been lost sight of in said Oldfield bill (H. R. 1700), and said proposed law would tend to reduce instead of tending to increase the creation and publication of inventions valuable to the people of the United States.

Whereas President Wilson has recently given warning to the people of the United States of the importance of these questions in the following language:

"Do you know, have you had occasion to learn, that there is no

the United States of the importance of these questions in the following language:

"Do you know, have you had occasion to learn, that there is no hospitality for invention nowadays? * * *
"I am not saying that all invention has been stopped by the growth of trusts, but I think it is perfectly clear that invention in many fields has been discouraged; that inventors have been prevented from reaping the full fruits of their ingenuity and industry; and that mankind has been deprived of many comforts and conveniences as well as the opportunity of buying at lower prices. * * *
"One of the reforms waiting to be undertaken is a revision of our patent laws." ("The New Freedom," in World's Work, June, 1913.) Whereas the Inventors' Guild, composed exclusively of independent inventors, petitioned President Taft on November 24, 1911, for his aid in securing the appointment of a patents commission to investigate and report upon the subject of possible improvement of the patent system for the benefit of the United States.

Whereas the various chambers of commerce in the principal cities of the United States are fairly representative of all the interests concerned in this matter, including manufacturers, inventors, and the people generally: Be it

Resolved, That the Inventors' Guild does hereby invite each of the

Resolved, That the Inventors' Guild does hereby invite each of the chambers of commerce, and similar representative organizations throughout the United States, to aid the Guild in its efforts to se-

cure the appointment of a patents commission by urging the Congress of the United States that they provide for such a commission made up of unbiased, independent, nonpartisan men of such national standing as will command the respect and confidence of the whole country, and chosen from different walks of life, and serving without pay. Said commission to hold public hearings, and otherwise, as may appear to them best, to make a thorough and careful study of the American patent situation, and to prepare and submit a comprehensive report and recommendations to Congress for such changes as may, as the result of their study, appear to them expedient, whether in the Patent Office, in the method of court procedure, or in the organic patent law, and to submit recommendations as to the legislation they would propose for effecting such changes. And the guild further requests the several chambers of commerce to urge the Congress that they make ample provision for the expenses of such a commission, and that they hold in abeyance all proposed legislation affecting the patent system, in whatsoever way, until such time as the said commission shall have had ample opportunity to hold the said hearings and make the said study and report; and be if

*Resolved**, That the Inventors' Guild does hereby urge the several chambers of commerce, and similar representative organizations throughout the United States, to pass resolutions addressed to President Wilson, and use such other proper influence to the end that he lend his assistance in securing the appointment of the said patents commission for the purposes herein indicated; and a copy of them, together with a copy of the resolutions be printed, and a copy of them, together with a copy of the resolutions passed by the Inventors' Guild November 24, 1911, addressed to President Taft, and together with a copy of the resolutions passed by the Inventors' Guild November 24, 1911, addressed to President Taft, and together with a copy of the resolutions of the Inventors' Guild dated May 31,

Resolution adopted at a meeting of the Inventors' Guild, held at New York May 31, 1912.

York May 31, 1912.

Whereas the Inventors' Guild, composed exclusively of independent and experienced inventor-patentees, in November, 1911, petitioned President Taft to recommend to Congress that appropriate action be taken by him to secure the appointment of a commission, or its equivalent, which commission should consider the patent system of the United States with the object of accomplishing needed reforms in the Patent Office and in the courts which hear and decide patent causes; and Whereas President Taft upon May 10, 1912, sent a special message to Congress requesting authority to appoint a commission to investigate and report upon such reforms, if any, as may be needed in connection with the United States patent system:

with the United States patent system:

Resolved, That the Inventors' Guild does hereby by unanimous vote give expression to its unqualified indorsement of the policy of President Taft looking to the appointment of a commission to thoroughly investigate this intricate and important subject before the passage of legislation. And the Inventors' Guild respectfully makes the suggestion that such a commission should be one upon which there should be representatives of all important interests affected by the patent system, such as the general public, the inventors, the manufacturers, the courts, and the patent lawyers; and that the general public should have the greatest number of representatives upon the commission, inasmuch as modifications in the patent laws and court procedure should be made only in order to promote the general welfare of the United States, regardless of the interests of special classes, such as inventors, manufacturers, court officials, patent lawyers, etc.

Resolved, That a copy of this resolution and of the resolution which the Inventors' Guild addressed to the President upon November 24, 1911, be sent to every Member of Congress.

Attest :

THOMAS ROBINS, Secretary,

Resolution adopted at a meeting of the Inventors' Guild held at New York City November 24, 1911.

To the Hon. William H. Taft, President of the United States:

York City November 24, 1911.

To the Hon. William H. Taft, President of the United States:

Whereas, the Constitution of the United States provides:

"The Congress shall have power to promote the progress of science and useful arts by securing for limited times to inventors the exclusive right to their respective discoveries"; and
Whereas this constitutional provision was intended to obtain for the benefit of the Nation the publication of every new and useful invention in such full, clear, concise, and exact terms as to enable any person skilled in the art or science to which it pertains to make, construct, compound, or use the invention after the limited time for which the exclusive right is secured to the inventor by patent, and thereby to secure for the Nation the great benefit which all experience shows results to a nation from publishing inventions, in contradistinction to following a policy which would tend to encourage trade secrets, monopoly, and trade combinations, which minimize the value of inventions to the Nation; and
Whereas a patent is in effect a contract between the Government and the inventor by which the Government, in consideration of the right to publish the invention for the benefit of the Nation, agrees that in return for his satisfactory disclosures of his new and useful invention under reasonable conditions, to be determined by the Government, it will secure the inventor for a limited time in the exclusive right to his new and useful invention; and
Whereas an inventor, after having performed his part of the contract by having made proper disclosure of a new and useful invention to the United States Government officials, is frequently subjected to unreasonable delay, expense, and injustice before obtaining his patent; and after having obtained his patent is not equitably secured in his exclusive right as the Constitution intended that he should be secured in return for his disclosure in good faith of his new and useful invention, and as a consequence of this unfair treatment of inventor-

Whereas the United States patent system has been evolved to its present condition without proper consideration of the rights of the Nation and of the inventors, who are the two real parties at interest, but, on the contrary, has been developed to its present condition almost entirely as the result of suggestions from persons who do not occupy the position of one of the parties to the contract which every patent represents, and who do not suffer damage from the delays, complications, injustice, and expense characteristic of the United States patent system and the United States courts which hear patent causes, said damage being borne principally, but indirectly, by the Nation, and to a lesser degree, but directly, by the Inventor-patentees, said damage being borne principally, but indirectly, by the Nation, and to a lesser degree, but directly, by the Inventor-patentees, and by their very nature are opposed to new processes and new products originated by independent inventors, and hence tend to restrain competition in the development and sale of patents and patent rights, and consequently tend to discourage independent inventive thought to the great detriment of the Nation and with injustice to inventors whom the Constitution especially intended to encourage and protect in their rights; and

Whereas under existing methods of trying patent causes an inventor-patentee of average means could not, at his own expense, carry to a conclusion an average patent litigation against a wealthy opponent, and therefore a few wealthy concerns usually acquire nearly all important patents in their field to the great damage of the Nation because of the restraint of competition and because of the resulting tendency of such inventors to seek protection for their inventions by trade secrets or else to cease inventive work; and

Whereas efficient protection by patent of new and useful inventions would offer to the average American manufacturer one of the best methods of meeting foreign competition and would, in addition, with resulting

INVENTORS' GUILD, By RALPH D. MERSHON, President.

Attest:

THOMAS ROBINS, Secretary.

Mr. BRANDEGEE. At the same time I ask to have printed as a public document a report of the committee of the Patent Law Association of Chicago, Ill., in relation to the same matter.

The VICE PRESIDENT. Is there objection? The Chair

hears none, and it is so ordered.

THE TARIFF-COTTON MANUFACTURES.

Mr. LIPPITT. Mr. President, I should like to give notice that on Wednesday next, at the close of the morning busines I will make a few remarks upon the textile schedules in the pending tariff bill, and with special reference to Schedule I.

PERSONATION OF MEMBERS OF CONGRESS,

Mr. CUMMINS. On behalf of the Committee on the Judiciary, I report favorably with amendments the bill (S. 2674) to define certain crimes and to provide punishment therefor, and I submit a report (No. 97) thereon. I ask that the bill be reprinted, showing in italics the amendments as proposed by the com-

I desire to say at this time that at the very first opportunity, whenever it will not unduly interfere with the consideration of the tariff bill, I intend to ask unanimous consent for the consideration of the bill. It is to provide punishment for certain acts which ought to be offenses against the law of the United States, but which are not, the necessity for which has been developed in the investigation carried on by the lobby investigating committee. I believe I can say it will meet with the general approval of all Senators. I do not intend to ask for the consideration of the bill at this moment, but I shall ask for its consideration presently.

Mr. PENROSE. I understand that the Senator has reported

the bill this morning?

Mr. CUMMINS. I have.

Mr. PENROSE. I am very glad to know that the bill has been reported out of the committee and that it is the intention of the Senator from Iowa to push its consideration.

Mr. CUMMINS. I ask to have the bill reprinted with the proposed amendments, which are not substantial, in italics. The VICE PRESIDENT. That is always done. The bill

will be placed on the calendar.

BILL INTRODUCED.

A bill was introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McLEAN:

A bill (S. 2881) granting an increase of pension to Francis G. Newton (with accompanying paper); to the Committee on Pensions.

AMENDMENT TO THE TARIFF BILL.

Mr. CUMMINS. I submit a proposed amendment to House bill 3321 by way of a substitute for what is known as the metal schedule of the proposed tariff law, Schedule C. I ask that it be printed and lie on the table.

The VICE PRESIDENT. That action will be taken.

ULYSSES GORDON.

Mr. SMITH of Arizona submitted the following resolution (S. Res. 150), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay, out of the contingent fund of the Senate, to Ulysses Gordon, son of Anderson Gordon, late a hostler in the employ of the Senate, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, the said sum to be considered as including funeral expenses and all other allowances.

PROPOSED AID IN THE MOVEMENT OF CROPS.

Mr. TILLMAN. Mr. President, I send to the desk two letters which I ask to have read and inserted in the Record.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested. The Secretary read as follows:

Newberry, S. C., August 2, 1913.

Senator B. R. TILLMAN, Washington, D. C.

Senator B. R. Tillman,

Washington, D. C.

Dear Senators Tillman: I noticed your interview in the paper on the currency question, and I certainly wish to commend your position. I wonder if you have any idea how tight money matters are here in this State? Do you know that it is not possible to sell farm produce in any quantity for cash? Oats have been sold in this town by the farmers for as low as 45 cents, and few could be sold at that price, simply because the merchants did not have the money to buy with. The Standard Warehouse Co. for the first time in its history has demanded that money borrowed on cotton be paid, thus causing the farmers and merchants of this community to unload 2,000 bales of cotton when there was no demand for it. Do you know that the cotton mills are trying to buy cotton on credit, claiming that they have no money to finance their business? A party in this town who held 1,500 bales of cotton tried mills all over the country to secure a buyer. One firm offered to take the entire lot, provided it would be sold to him on 30 days' time; the largest offer he had besides that was for 100 bales, several of the mills stating that they could use more, but could not secure the money to finance such a large purchase. A leading meat dealer in another town sold a car of meat in this town and later had to have it held up for a few days, as he did not have the money with which to handle the car. This will give you at least some idea of conditions in this State, Unless something is done, and that right now, we are going to be up against a proposition the like that this country never saw before. I notice that you speak of issuing clearing-house certificates as they did several years ago. I am advised by one of our business men that T. B. Stackhouse, of Columbia, told him that under the Aldrich currency act that clearing-house certificates could no longer be issued. It might be well for you to investigate this matter, for if this could be done it would tend to relieve matters somewhat.

Yours, cordially,

PARKER COTTON MILLS Co., Greenville, S. C., August 2, 1918.

Hon. B. R. TILLMAN, United States Senate, Washington, D. C.

Hon. B. R. Tillman,

United States Senate, Washington, D. C.

My Dear Senators: I have read with interest your reported interview upon the question of relief in the present financial stringency through deposit on the part of the Government of funds to enable the crop to be moved without too great sacrifice in price.

I congratulate you upon the published statement of Secretary McAdoo that he would make such deposits.

This conclusion has doubtless been due to the pursuasive argument of yourself and others. In my judgment such a course on the part of the Secretary of the Treasury is both justified and necessary. Unless the Government comes to the relief at this time of southern and western banks, particularly southern, there must be very serious hesitation on the part of any buyers of agricultural commodities, in purchasing, and correspondingly a sacrifice on the part of producers in selling.

Whether the course of the banks in reserve cities is dictated by a desire to embarrass the administration, as claimed by some, or whether, through extreme caution, these banks have determined to bring about a general liquidation and reduction of credits, the effect is the same, viz, that a condition of financial stress has been brought about, which in my judgment is unjustifiable, under the circumstances.

Personally I do not believe that the policy of the banks is generally being dictated from antagonism to the present administration. I do believe, however, that there is no justification for the extreme timidity now being displayed by them. The effect, however, is the same, viz, a financial stringency has been brought about which does not to me seem to be the result of existing conditions throughout the country, which on the whole would be prosperous, if it were not for financial conditions.

With personal regards, and again expressing my appreciation of your efforts, which I believe will result in much good,

Yours, very truly,

PARKER COTTON MILLS Co., LEWIS W. PARKER, President.

THE TARIFF.

The VICE PRESIDENT. The morning business is closed. Mr. SIMMONS. I ask unanimous consent that the Senate proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. STONE. I understand that the senior Senator from Montana [Mr. Myers] has given notice of his purpose to address the Senate to-day, but before he begins I will, with his permis-

Mr. GALLINGER. Mr. President, I trust there will be order in the Chamber. The Senator is not heard here.

The VICE PRESIDENT rapped with his gavel.

Mr. STONE. I will repeat, that I understand the senior Senator from Montana [Mr. Myers] is scheduled to address the Senate to-day on the tariff bill. Before he does so, if he should conclude to proceed and before the bill is entered upon in due course, I desire, with the permission of the Senate, to put into the Record some matter that I think very pertinent at this time in view of what has been so frequently said by our friends on the opposite side of the Chamber and of what they have put into the Record in the way of letters, excerpts from newspapers, and so forth.

On Saturday, during the absence of the distinguished senior Senator from Pennsylvania [Mr. Penrose], I put into the Record a dispatch from Altoona-I took it to be an Associated Press dispatch—which I clipped from one of the newspapers containing it, showing that each day during the month of July eleven hundred and eighty-five more loaded freight cars had passed through, going and coming, than had passed the same point dur-ing the previous July, and that that was a record-breaking shipment, being a thousand cars a day more than had ever passed that point in any July. The Senator was not here, and I simply call attention now in his presence to what I did on Saturday.

Mr. PENROSE. Mr. President, will the Senator answer a

question?

Mr. STONE.

Mr. PENROSE. I should like to ask the Senator from Missouri whether he knows the character of that freight, and whether a large part of it was not carrying goods in bond to be dumped on the American market as soon as this bill passes?

I have no information-Mr. STONE.

Mr. PENROSE. That is partly my information. Mr. STONE. I have no information, as a matter of course, as to the character of the freight, nor has the Senatof from

Pennsylvania.

Mr. PENROSE. No; only current reports of the enormous amount of goods and commodities that are in bond, concerning which we hope to have information if the Secretary of the Treasury sees fit to answer the resolution of the Senator from Utah [Mr. SUTHERLAND].

Mr. STONE. I should not think, Mr. President, that any great amount of that kind of freight would be passing through

Altoona during the month of July.

Mr. PENROSE. The last time I was in Pittsburgh I was informed-and I do not vouch for the accuracy of this statement-that commodities imported to the extent of millions of dollars' worth were there in bond.

Mr. OLIVER. Mr. President-

The VICE PRESIDENT. Does the Senator from Missouri yield to the junior Senator from Pennsylvania?

Mr. STONE. Well, I will hear the other Senator from Penn-

Mr. OLIVER. I would suggest to the Senator from Missouri that if what he says is true it ought to show a condition of prosperity existing in this country at the present time which would be well not to interfere with.

Mr. STONE. Mr. President, I am answering the charge, oft repeated on the other side, that we are interfering with it, and that by reason of the interference business disturbances are now occurring all over the country; and that we are now not only fronting but are practically in the very midst of a great business depression.

Mr. President, of course I do not know what kind of freight was inclosed in cars passing over the Pennsylvania Railroad east and west, nor does either of the Senators from Pennsylvania know any more about that than I. I can assume, as I do assume-I do not assert, for I can not assert without knowledge-but I can assume with good reason that it was the ordinary freight that is carried to and fro by this railroad in some form of American merchandise.

Mr. PENROSE. Will the Senator permit me? Mr. STONE. Yes.

Mr. PENROSE. Does the Senator from Missouri think that the pending tariff bill is calculated to greatly increase that traffic on the railroads?

Mr. STONE. I do not think it is calculated to reduce that

Mr. PENROSE. And if the Senator will-

Mr. STONE. And I do not think, speaking with candor as to my own opinion, that the pending tariff bill will so affect the industrial conditions of the country as to increase that traffic, but it will not discourage or decrease it. I think the tendency will be to better conditions.

Mr. PENROSE. If the Senator desires to pursue that line of inquiry, which I had not intended to press, I will furnish him with all the statistics he wants about the present industrial conditions. I have just returned to Washington. I happen to have in my hand here a letter which came in my mail from a very responsible citizen of Union County, Pa., a former Member of Congress, in which the writer says:

ber of Congress, in which the writer says:

The Halfpenny Woolen Factory, of this place, which has been in continuous operation for many years, was closed down last week, with 200 hands out of employment. The manager advises us that he has no idea when they would ever start if the Underwood bill is passed, as they could not meet European competition.

As another indication of the trend of business affairs I inclose a memorandum from one of the largest advertising agencies in the United States, which speaks for itself. These people handle the Pinkham contracts and other important advertising. They were asked for an advance of rates on account of the increased circulation of a certain paper, and this is the reply:

"The price and conditions of the inclosed Pinkham contract are exactly the same as the last.

"Owing to the depression in the general business conditions of the country, we feel that we are fortunate to be able to send a continuation of this advertising to such papers as accept an exact renewal."

It is very unfortunate that this business depression deprives

It is very unfortunate that this business depression deprives the American people of the circulation of this valuable vege-

table compound; or at least curtails it.

Mr. STONE. Mr. President, it has been suggested to me by my friend from Kentucky on my right [Mr. James] to inquire of the Senator from Pennsylvania if he can give us any advertising news about Peruna. I hope the information the Senator now has is more precise than that upon which he based some of his former statements.

Mr. PENROSE. My information is entirely accurate, Mr. President, as have all my statements been substantially accu-

Mr. STONE. Mr. President, we all recall what the Senator said three or four days ago about the closing down of the Sharples Cream Separator Co., at Chester, a short distance from Philadelphia. I desire to add a little to what I have already

put into the RECORD on that subject.

The Senator from Pennsylvania stated last week that he had accurate information to the effect that the Sharples Cream Separator Co. had closed down and was moving its entire business to Hamburg, Germany; that, except for the dumb, silent structures, which a few months ago were full of the music of industry, there was not a vestige left in Pennsylvania of that great industry; and that hundreds of people previously employed there had been thrown out of work. A day or two after that I called attention to a very strong disclaimer by the president, or some one of the chief officers, of that corporation, most emphatically denying the accuracy of the information upon which the Senator predicated his statement, and saying that their corporation was in full blast; that it was carrying on its business now; that it intended to carry it on; and that they had no thought of suspending it. So the Senator was evidently mistaken, although positive in his assertion. produce a little additional testimony on that subject. I have here a statement clipped from the West Chester (Pa.) Star of Friday, July 25, 1913, which I wish to read. It is as follows:

[From the West Chester (Pa.) Star, Friday, July 25, 1913.] SHARPLES HAS BUSY SUMMER-UNPRECEDENTED MID-YEAR SEASON KEEPS LOCAL INDUSTRY ACTIVE-TO LENGTHEN DAYS.

LOCAL INDUSTRY ACTIVE—TO LENGTHEN DAYS.

The Sharples Separator Co., which operates a large factory in this borough, has not been so busy at this time of the year as it is now for many years. The orders, so it was learned from an authoritative source last evening, were never so heavy following July 1 as they are this year.

The present unusually busy season at the Sharples works will probably continue for months, judging from the present outlook. This summer will be a record one for the local industry.

This is from the very town where that industry is located. Remember, that is one of the establishments which the Senator from Pennsylvania stated had been closed.

Mr. PENROSE. Mr. President

Mr. STONE. Just wait a moment. Here is another clipping, headed "Plant will stay in West Chester." This is from the Daily Local News, of West Chester, of July 31, 1913, and is as follows:

Employees of the Sharples Separator Works, of West Chester, were surprised to read in the Philadelphia papers this morning an item as follows:

"The Sharples Cream Separator concern, located near Philadelphia, has within a week completed the absolute transfer of its plant to Ham-

burg, Germany, and no longer is there a vestige of it left in the State of Pennsylvania. This concern employed many persons."

That is a quotation from the speech of the Senator from Pennsylvania, made a day or two before.

Inquiry at the business office of the company during the morning elicits a statement from the officials that there is no truth in the article; that the works will not be moved, and nothing of the kind had been contemplated, which is real and good news.

Now, if the Senator from Pennsylvania desires to interrupt me, I shall be glad to hear him.

Mr. PENROSE. Mr. President, I think the Senator from Missouri is straining a great deal at trifles and at phraseology which might have been uttered in the heat of debate. My statement as to conditions regarding this industry was substantially I quote from the Philadelphia Ledger of Saturday accurate. last as follows:

For the last 10 years the Sharples Co. has been operating a factory near Hamburg. It also has a plant at Toronto. The German factory, Mr. Sharples said, supplies the European market and the one at Toronto takes care of the Canadian trade. He pointed out that it is cheaper to make separators and milkers in those countries, especially in Germany, owing to cheap labor there. The removal of the tariff on such articles would permit German and French manufacturers to send a cream separator to be sold in this country for \$14 in competition with similar machines now being offered at from \$25 to \$55, he explained.

I have a telegram here from Mr. Sharples, the president of the Sharples Separator Co., addressed to Hon. Thomas S. BUTLER, a Representative from the West Chester district, and it is dated Alexandria Bay, August 2:

ALEXANDRIA BAY, N. Y., August 2, 1913.

Hon. Thos. S. Butler, West Chester, Pa.:

West Chester, Pa.:

The Sharples Separator Co. has established at Hamburg, Germany, a complete modern plant for the manufacture of cream separators. Our present West Chester plant is the most complete cream separator manufactory in the world. In justice to our customers we must produce our separators where they can be produced to the best advantage. If the tariff on separators is removed, either wages in America must come down or the foreign-built machine be imported. As wages in Germany are much lower and labor is the chief expense in producing a separator, we have prepared for this emergency.

The Sharples Separator Co.

THE SHARPLES SEPARATOR CO., P. M. SHARPLES, President.

Now, if the Senator from Missouri can derive any consolation from the fact that this institution at West Chester may be here for a few weeks longer, and that the period of its departure was slightly incorrectly stated by me, I am willing to concede to him all the consolation he can get; but, as a matter of fact, here is a telegram from the president of the company, stating that if the pending Democratic tariff bill passes with cream separators on the free list he is prepared for the result.

Mr. STONE. Mr. President, all of us are flooded with letters and telegrams of that general character about practically every item in this bill, that if we pass the bill as it is now pending in the Senate this industry and that industry is going to suffer unless wages are reduced, and so on and so forth. That has been the argument on the other side in all the speeches that have been delivered here, and Senators have read such telegrams and letters as that just presented; they have burdened the RECORD with them, hoping to excite public opinion and influence legislation, but the Senator from Pennsylvania, going beyond the field of legitimate disputation, has attempted to emphasize his arguments and those of his colleagues by assuring the Senate that already, in advance of the passage of this bill, a crash had come and that industries were falling all over the land. To prove the existence of this industrial catastrophe he referred us to this particular enterprise as having already closed its doors and moved its business from this country to a foreign country. But, notwithstanding the Senator's former statement and his statement to-day, the Sharples Co. remains and is crowded with business.

Mr. PENROSE. The Senator from Missouri repeats the statement with great unction, but it is not unusual in obituary notices to make a mistake in the date of the funeral. [Laughter.]

Mr. STONE. Yes; but it is a little unfortunate to preach the funeral of a man when he is in the full vigor of life.

Mr. PENROSE. No; moribund, Mr. President.

Mr. STONE. And confessedly better off than he has ever been before.

Mr. PENROSE. The Senator has queer ideas of vitality.

Mr. STONE. I have pretty clear ideas on that subject.

Mr. PENROSE. I said "queer ideas." Mr. STONE. Oh, "queer ideas." Then, the Senator thinks that it is queer to say that it is a strange thing to preach a healthy man's funeral, even when he is healthier than he ever

was before. I rather think the Senator has queer ideas.

Mr. PENROSE. Here is a statement, Mr. President, of the president of the company, who states that, if this bill passes, his works will practically be out of business in the United

States, and that cream separators will be brought from Germany, and then very likely the large, over-laden traffic through Altoona will consist of trains of indeterminate length leaded with German cream separators.

Mr. STONE. The president of this company who sent that telegram contradicting the statement of fact made by the Senator last week regarding his business may now endeavor to help him out in his effort to keep the tariff on his product as it now is. That is what we might expect. They all do it.

Mr. PENROSE. I do not desire to pursue this discussion with the Senator. I will merely state that this telegram which hold in my hand was sent to the Representative from the district without my knowledge and without my request, and was sent over to me this morning by the Representative or his secretary. It was not addressed to me at all.

Mr. STONE. But the Representative sends it to the Senator. can quite well understand.

Mr. PENROSE. He sends it over to me, the Representative having a desire to clear up a situation in which there appeared to be some trivial conflict as to statements of detail.

Mr. STONE. Oh, "trivial," the Senator calls it.
Mr. PENROSE. I do say it is trivial whether a concern
moves out this week or next month.
Mr. STONE. Oh! And does the Senator think it is going to

move out next month when the West Chester newspapers print the fact as coming from the office of this corporation present is an unusually busy season at these works, and judging from the present outlook this summer will be a record one for this industry"? Two of these newspapers printed at West Chester give these statements out on the authority of the officers of this corporation.

Mr. PENROSE. I do not know anything about these newspapers, but I suspect they must be Democratic papers, the editors of which are candidates for the office of postmaster. [Laughter.] The concern will not be run by glowing newspaper reports.

Mr. STONE. No; and it will not be destroyed by doleful statements made by Senators on the floor of this Chamber. I will now leave this Sharples incident where it is.

Mr. President, I have a letter here from Mr. R. K. Bogan-I do not know the gentleman-of Scitico, Conn., which I desire to put in the RECORD. He says:

Hon. William J. Stone, United States Senate, Washington, D. C.

Hon. William J. Stone,

United States Senate, Washington, D. C.

Dear Sir: In his recent tariff speech Senator McLean, of this State, is reported to have blamed upon the Democratic Party policy the straits in which two large woolen concerns are said to find themselves. If the Senator is consistent, he should then give credit to the same cause for the prosperity other concerns in this State now enjoy. In the last session of the Congress which preceded the presidential election letters were read and afterwards printed in the Congressional Record, bearing upon the wool situation. Among the letters there was one from the president of the Somerville Manufacturing Co., of Somerville, Conn. The president of that company, George E. Keeney, one of the old-time Republican leaders of the State, was so opposed to any change in Schedule K that he threatened the night before election to close down his millis if his employees helped in any way to bring about a Democratic victory. To-day the Somerville Manufacturing Co. is so rushed with orders that part of the season the mills have been running night and day. Even now they would run the same way, only the help are not anxious to be exhausted filling the orders. Five miles away, in Thompsonville, there is the plant of the Hartford Carpet Co. It is said that this company has orders on hand to keep the whole plant busy for the next 12 months. The superintendent says that if the tariff is settled at once it will not affect the business of the carpet people in the least.

The point is: If two mills suffer, and the fault is traced back to Democratic tariff legislation, why should not the prosperity of all the other successful companies be attributed to the same factor?

Sincerely, yours,

I put this in as a note of optimism from the old State of Connecticut by way of contrast with the gloomy note of pessimism sounded here the other day by the junior Senator from that State [Mr. McLean].
Mr. McLEAN. Mr. President

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Connecticut?

Mr. STONE. With pleasure. Mr. McLEAN. Mr. President, on Wednesday last I called the attention of the Senate to the promises made by the author of this bill, the chairman of the Committee on Ways and Means of the House, to the people of Connecticut in October last, some two weeks before the election. I then called the attention of the Senate to the fact that this promise, which was made and reiterated by the author of this bill, had been repudiated since the election by the Committee on Ways and Means of the House

and by the Committee on Finance of the Senate.

Mr. STONE. I beg the Senator's pardon, but I can not yield for a repetition of the speech the Senator made last week, and

to which this letter refers.

Mr. McLEAN. I am not at all surprised. Mr. STONE. I desire to confine myself at this time to the submission of proofs that the country is not on the verge of

Mr. McLEAN. I will come to that, if the Senator will pardon me.

Mr. STONE. I will be glad to have the Senator come to

Mr. McLEAN. I will wait until the Senator finishes if he desires. I was simply giving the Senate the real cause, as it seemed to me at the time, for the agitation on the part of the senior Senator from Missouri. I have waited until now to see if this admitted, undisputed contradiction in the revision of the tariff was of consequence enough to call for any comment upon the other side of the Chamber. The author of the bill clearly stated over and over again that if the Democratic Party were retained in power the tariff should be revised upon the cost-ofproduction theory. There is no question about that; but the Senator from Missouri, very adroitly as it seemed to me at the time, tried to divert the scent from the fox to the aniseed bag. I prefer to follow the fox. I did state then that there were two woolen mills in Connecticut that were in trouble, and I quoted from the president of one of the companies as to the cause, which was the impending revision of the tariff. I understand the Senator from Missouri has found no fault with the accuracy of my statement in that regard.

It may be true that there are some industries in Connecticut that will not be destroyed by this tariff. I hope so. I have said nothing to the contrary. I know that the Hartford Carpet Works has been a very prosperous concern and that their business for a long time has been successful. Perhaps it may be

able to meet the foreign competition. I hope so.

I did not state the other day what I might have stated with regard to all the high-class cassimere producers in Connecticut. If my information is correct, they are all working four days in the week; but not being absolutely certain of it, and having heard from only one manufacturer, I hesitated to make the statement.

I want to call the attention of the Senate again to the statement made by the author of this bill to the people of Con-

Mr. STONE. Mr. President, with all due respect, the Senator can do that in his own time. I can not yield for a general speech which would be, in a measure, but a repetition. The Senator wishes to call attention again to what he has already said.

Mr. McLEAN. Then I will not repeat it. We ing that that is the key to the situation in Connecticut. We ing that that is the key to the situation in Connecticut. We Mr. McLEAN. Then I will not repeat it. I will close by say were promised a revision of the tariff based upon the difference in the cost of production at home and abroad. That theory has been rejected here. I want to say to the Senator from Missouri that the tariff question will never be settled right upon any such basis as that now proposed.

Mr. STONE. Mr. President—
Mr. McLEAN. If no Member of this body considers the incident of sufficient consequence to reply to it—

Mr. STONE. Mr. President, I decline to yield further for a general speech on the tariff injected into what I am endeavoring to lay before the Senate. The Senator has made that speech, and he is merely repeating some excerpts from it.

My object in introducing the letter I presented was to put the statement of a citizen of the Senator's State into the Record, that it might stand there in contrast with what the Senator had said about industrial depression in Connecticut. The letter shows that in the neighborhood of this correspondent the mills of Connecticut are not only in full blast, but they are working overtime; they have orders to fill that will occupy them for

Mr. McLEAN. Mr. President, I believe the Senator mentioned an establishment owned by Mr. George Keeney. Did I under-

stand him correctly?

Mr. STONE. Yes; the Somerville Manufacturing Co., the president of which is George E. Keeney, a Republican leader of that State, who, just before the last election, according to this communication, gave notice to his employees that if the Democrats were successful and Democratic policies were to be inaugurated he would close down his mills. Now they say he has more work to do than he can do and that he can not fill his orders except by working overtime.

Mr. McLEAN. I will state to the Senator from Missouri that not more than three weeks ago, I think, when I was in Hartford, Mr. Keeney told me that the mills had never been busier than they then were; but he said, "If this bill passes, I

can not tell what will happen."

Mr. STONE. Well, we will see what happens after the bill passes; we know what is happening now. I have not any doubt whatever that after the bill passes Mr. Keeney's works will go on just the same, probably with an increased demand upon their productive capacity.

Mr. OLIVER. Will the Senator allow me to ask him a

question?

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. STONE. Certainly. Mr. OLIVER. I simply wish to ask the Senator from Missouri whether this busy plant in Connecticut is now operating under the proposed bill or under the present tariff law?

Mr. STONE. That is an idle question. Of course the pro-

posed bill has not been passed. The Payne-Aldrich bill will be in operation until the proposed bill is passed. But the contention that has been made and passed from one lip to another on the other side is that already, because of the prospect of the passage of this bill, the industries of the country are on the downward road to ruin. The question of the Senator from Pennsylvania would seem to indicate that the other side is getting ready to shift its position.

Mr. McLEAN. The Senator can

The Senator can not fairly attribute any

such statement to me.

Mr. SIMMONS. I hope the Senator will permit me to call his attention to the fact that it has been claimed here that before the Wilson bill passed, in anticipation of its passage, we had a panic.

Mr. STONE. And they are trying to create one in anticipation of the passage of this bill, but they will not succeed.

Mr. McLEAN. I desire it to be perfectly clear that Mr. Keeney did not tell me that he expected to close his mills. He only expressed an uncertainty as to what would happen. hoped to keep his mills running at full time, and I hope he

Mr. STONE. Mr. President, if I may be permitted to proceed, I should like to do so.

Mr. GALLINGER. Mr. President-

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from New Hampshire?

Mr. STONE. I always yield to the Senator from New Hamp-

Mr. GALLINGER. The Senator is always courteous

I have been a good deal puzzled, and I am particularly puzzled now, over the declaration the Senator has just made that when this bill passes not only will American mills continue to produce as much as they do now, but they will produce more. Pray tell me what good your bill is going to do them.

Mr. STONE. The good we expect is that there will be a greater consumption in the country, and that the mills, in sharp competition, will have a greater market to supply.

Mr. GALLINGER. So that we will make more goods here,

and also import more?

Mr. STONE. In addition to that, I think that outside of our domestic market this policy of greater freedom of trade will gratify and meet the growing expectation and demand of the manufacturing interests of this country for opportunity to ex-

ploit their industries in other lands.

Mr. GALLINGER. Of course the Senator from Missouri knows that the consumption of the American people to-day is over 95 per cent of all our production, and it is the marvel of the world. We are consuming per capita twice what countries consume that have laws somewhat similar to the one the Senator is advocating. I am afraid we will overfeed our people.

Mr. STONE. That is a strange expression. Heretofore the

Senator has said he was afraid we would underfeed them.

Mr. GALLINGER. I am.

Now he is afraid we will overfeed them. Mr. STONE.

Mr. GALLINGER. I mean if the Senator's theories are cor-I do not think they are. I think we will be compelled to underfeed them. That is my individual opinion.

Mr. STONE. The Senator has just said he is afraid we

may overfeed them.

Mr. GALLINGER. If the Senator's views should prove to be correct-I have no idea they will-I think we will overfeed

Mr. STONE. I am not at all alarmed about overfeeding or underfeeding

The Senator from Colorado [Mr. THOMAS] wishes to interrupt me to read something which he says is pertinent at this

Mr. THOMAS. Mr. President, I think an extract which I have here from the last issue of the Saturday Evening Post, of Philadelphia, bears to some extent upon the suggestions just made by the Senator from New Hampshire.

I read from the Saturday Evening Post of August 2 an article entitled "The lesson of our exports":

article entitled "The lesson of our exports":

The Dingley Tariff Act was passed 16 years ago this summer, and the Payne-Aldrich Act changed it very little. Since that time our exports have risen from one billion dollars to two and a half billions; but exports of foodstuffs, whether crude or wholly or partly prepared for use, have actually decreased. Of manufactures, excluding wholly or partly manufactured foodstuffs, we exported three hundred and ten million dollars' worth 16 years ago, but in the fiscal year just closed we exported decidedly more than a billion dollars' worth. In the first year of the Dingley law foodstuffs amounted almost to one-half of our total exports. Last year they amounted to less than one-fifth. In 1897 manufactures were but little over one-quarter of total exports; they are now almost one-half. In exports of manufactures since 1900 the United States has gained 110 per cent, Germany 87 per cent, France 71 per cent, Great Britain 69 per cent. All the other countries pay much lower wages than we do, yet in relative gains we decidedly beat any of them. Our exports of manufactures to Europe have almost doubled in eight years. We are selling the countries of North and South America practically three times as much manufactures as we did eight years ago.

These immense gains in exports of manufactures have been made under wide-open competition with every other country. We pay higher wages, meet all comers on an even footing, and pay the freight besides. In view of which the cry that a reduction of duties from the present 40 per cent level to about 30 per cent will ruin manufacturing in this country seems excessively absurd.

I may add that the Washington Post stated yesterday morn-

I may add that the Washington Post stated yesterday morning that the increase of our exports to South America last year over the previous year was \$10,000,000.

Mr. McLEAN. Mr. President-The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Connecticut?

Mr. STONE. I do. Mr. McLEAN. The Senator does not claim that this very prosperous condition of affairs in the past has been due to the Underwood bill, does he?

Mr. THOMAS. Is the question directed to me?
Mr. McLEAN. Yes. The Senator does not claim that the figures he has read, indicating the tremendous prosperity of the country, can be attributed to the anticipation of the passage

of the Underwood bill?

Mr. THOMAS. The prosperity has taken place in spite of the burdens of the Payne-Aldrich law. In my judgment it will be largely increased under the coming law.

Mr. McLEAN. I have no doubt there will be a change. Mr. STONE. Moreover, Mr. President, it must not be forgotten that our exports go into markets where they are obliged to compete on equal terms with the products of all the world; and yet, in the face of that, these enormous increases in exports

Mr. THOMAS. Mr. President—
The VICE PRESIDENT. Does the Senator from Missouri further yield to the Senator from Colorado?

Mr. STONE. I do.
Mr. THOMAS. In this connection, if the Senator from Missouri will permit me, I will read another clipping from the same periodical, the Saturday Evening Post, of June 21, entitled "Tariff and trade":

According to the elaborate investigation made by the London Board of Trade three years ago, wages for skilled labor in the United States are 130 per cent higher than in England; and in the Canadian market England gets a tariff preference amounting to 33½ per cent. Any high protectionist who is true to the basic protectionist dogma that ability to compete depends upon the wage scale will tell you that under those conditions the United States can not possibly compete with England for Canada's trade. But the United States does compete, and with signal success

for Canada's trade. But the United States does compete, and with signal success.

Eliminating all those items in which we have a decided natural advantage over England, including breadstuffs, meat, mineral substances, and manufactures of wood, and taking only articles as to which England is fairly on all fours with us, a Scotch investigator finds that our sales to Canada have increased 280 per cent in 10 years, while England's sales have increased only 138 per cent.

Of iron and steel manufactures, books and printed matter, boots and shoes, electric apparatus, brass manufactures, and like articles, which England, paying less than half our wages, should theoretically make much cheaper than we can, we sold Canada last year more than a hundred million dollars' worth, while England sold only \$16,000,000 worth. On the other hand, England can take our cotton, make it into cloth, and beat us selling the cloth to Canada; and of textiles, as a whole, England sells Canada four times as much as we do.

The tariff has nothing to do with it. The wage scale has comparatively little to do with it. Ability to compete—that is, to make goods cheaply—depends upon the efficiency of the labor. Where our labor is most efficient, as in machinery, agricultural implements, and so on, we beat England in spite of a much higher wage scale. Where English labor is most efficient she beats us.

Mr. STONE. Mr. President, continuing to place before the Senate and put into the RECORD some testimony of a cheering and optimistic kind, as against the doleful cries that are uttered on the other side, I have in my hand a statement on general business conditions issued by the Mechanics-American National Bank of St. Louis, of date August 1. I wish to read an extract from it, and, if it were not so long, I would ask to have the whole of it printed in the RECORD.

The part I read is as follows: Sentiment in this section is cheerful-

That is, in the Mississippi Valley section, with St. Louis as the center

the center—
There is no undue pessimism here. On the contrary, the tendency is to look for better times before the year is over, with more comfortable money-market conditions and greater courage about the future. Enactment of the new tariff law has been very largely discounted, so far as it is possible to discount in advance such a change in the Government's fiscal policy. People in this territory are not talking of hard times as a result of the tariff. On the contrary, the feeling of many is that there will be definite improvement and a betterment in general trade following the release of orders that are now being held up pending the adoption of the reduced schedules. In the same way there is a well-defined belief that if the leaders in Congress formulate a workable currency law and are able to pass it at this session there will be a favorable response in general business conditions almost immediately. The view is held in this section that the bill now before Congress has a number of excellent features and it may be possible for the leaders to whip it into shape to eliminate some of the objectionable provisions. Amendments already agreed to have met several of the objections raised.

People in They People in this territory are not worrying very much about the future. They are making the best of present opportunities and are looking forward to increased activity in all lines of business later on in the year. If the crops turn out well there is every reason to expect that the prediction of much better times will be fulfilled. It must be remembered that notwithstanding its immense manufacturing interests the United States is still largely an agricultural country, in which there can not be any lasting prosperity unless the farming communities are fairly prosperous. The indications are that they will continue to enjoy a fair degree of prosperity for some time to come.

Mr. STONE. Now, that is a circular letter issued by one of the large national banks of my State, showing the business conditions and business sentiment prevailing in that great, opulent, and progressive section of the country

Mr. McLEAN. Evidently the bank which the Senator men-tions is not in the recent alleged conspiracy to reduce the price

of United States bonds.

Mr. STONE. I think not; in fact, I am sure it was not, but I think there are others banks that were.

Mr. SIMMONS. Mr. President-

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from North Carolina?

Mr. STONE. Yes.

Mr. SIMMONS. In this connection, if the Senator will permit me, I should like to send to the desk and have read an extract from the Wall Street Journal of August 2.

The VICE PRESIDENT. Without objection the Secretary

will read as requested.

Mr. WARREN. If the Senator will allow me, before that is read, I want to express my pleasure to hear from the correspondent of the Senator that he hopes the farmers will continue to be prosperous for a time at least. It is very encouraging to have that much confidence expressed by some one, though this sanguine correspondent does not himself appear to be a farmer.

Mr. STONE. That is the language of a circular letter issued by a national bank and distributed to its customers and the public. As to the expression that "prosperity is assured for some time at least," why, what else could any man say, for no living man, except maybe one of your Republican prophets of will say determine what is absolutely going to bannen in the evil, can determine what is absolutely going to happen in the future? Of course, Senators on the other side know-absolutely know-that the devil will be to pay in a short while if this bill future? passes; but nobody else knows it or even suspects it.
Mr. WARREN. And you are evidently somewhat afraid of

it yourself over on that side.

Mr. STONE. I have not the least fear of it. I am not "some-

what" or in any degree afraid of it.

Mr. WARREN. Because the Senator takes the opinions of various men as against facts. What I would rather hear is the starting of new enterprises, the bald fact that capital has been invested in this, that, or the other business. To me the closing of a factory or the opening of a new one is a fact more effective than some one's or anyone's opinion.

Mr. MARTINE of New Jersey. I can give the Senator some

facts right here if he wants facts.

Mr. STONE. In a moment. Let us first have read the paper sent to the desk by the Senator from North Carolina.

The PRESIDING OFFICER (Mr. Sheppard in the chair).

The paper sent to the desk by the Senator from North Carolina will be read, without objection.

The Secretary read as follows:

DRY GOODS TRADE BETTER—SHIPMENTS OF MERCHANDISE DURING JULY SHOWED CONSIDERABLE INCREASE OVER LAST YEAR.

[From the Wall Street Journal, Aug. 2.]

Marshall Field & Co. say: "Shipments of dry goods and kindred lines during July showed a substantial increase over a year ago,

Numerous requests have been received from near-by States to ship, from Angust 1 to 15, goods originally for shipment September 1.

"Cash receipts for the week show a gain in comparison with last year. Buyers coming in from the Southwest on fall market trips and representatives in the house who take care of visiting merchants from the far West have been exceedingly busy during the past week.

"Consideration of lines in anticipation of spring requirements is somewhat curtailed because of tariff and currency legislation, but this is a matter of adjusting costs rather than an evident lack of readiness on the part of retailers to consider future business.

"The present trade tendencies in dry goods lines suggest sound underlying conditions, but the immediate settlement of pending legislation is necessary if we are to have the volume of spring 1914 business that conditions warrant."

The John V. Farwell Co. reports sales and collections still showing very good increase over last year. Merchants from the Southwest and the far West report general conditions very favorable for good fall

Mr. JAMES. If the Senator from Missouri will yield for a moment

Mr. STONE. I yield.

Mr. JAMES. The Senator from Pennsylvania [Mr. Penrose] sent to the desk and had read a clipping from a newspaper, which concludes as follows:

The removal of the tariff on such articles-

Speaking of the Sharples cream separator-

would permit German and French manufacturers to send a cream separator to be sold in this country for \$14 in competition with similar machines now being offered at from \$25 to \$55.

I wonder if the Senator from Pennsylvania could tell us whether or not, in his judgment, that statement is true.

Mr. PENROSE. As I understand it, the statement is an interwith one of the Sharples people. The extract is from the Philadelphia Ledger. I do not know anything about the business. The paper is one of the most reliable in Philadelphia.

Mr. JAMES. I merely wanted to say that if that interview is authentic and comes from the Sharples Manufacturing Co. that manufactures these cream separators, then we have it that a separator for \$14 could be furnished to the farmers of our country, who are now and have been forced to pay from \$25 to \$55 for the same character of separator. In my judgment this is the strongest argument which has been or can be presented in this Chamber for placing cream separators upon the free list.

Mr. PENROSE. That may all be, Mr. President, and the Senator is justified in taking that view. It simply means, however, that the American farmer will be taking the product of a German mill instead of an American mill.

Mr. JAMES. It will simply mean that the tariff has enabled the manufacturers of cream separators to charge the American farmer from \$25 to \$55 for a cream separator which in an open market they could buy for \$14, and placing them upon the free

list will give them this opportunity.

Mr. STONE. Mr. President—

Mr. PENROSE. One word, if the Senator will permit me.

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. STONE. Yes.

Mr. PENROSE. The Senator is going on the assumption that the American consumer would get this article for that price. Experience shows that after the American competition is extinguished the price is raised and the American consumer squeezed.

Mr. JAMES. Oh, that is the old argument

Mr. PENROSE. It is the old argument.

Mr. JAMES. We have heard often about the foreigner extinguishing competition in this country. But this article that the Senator himself presented states that cream separators would be sold here for \$14, for which our farmers are now forced to pay from \$25 to \$55, or from two to four times the The American manufacturer is about as good at foreign price. extinguishing competition and squeezing the consumer as any foreign manufacturer of whom I have ever had any observation and knowledge, and if this statement which the Senator presented is true, here is a shining example of it.

Mr. STONE. Now, Mr. President, I hold in my hand the New York Sun, of August 3, 1913, which contains a résumé of industrial conditions throughout the country gathered by its correspondents. No one will assert, for no one could assert, that the Sun is predisposed to the Democratic Party. It has been one of the most potential journalistic agents in this country against the Democratic Party, for it is one of the greatest and most influential papers printed in the United States. This great journal, unfriendly to this administration and to the Democratic Party, introduces its résumé in this language:

Bank presidents, railway presidents, manufacturers, and merchants in widely separated sections of the country present through the col-umns of the Sun to-day a comprehensive review of existing business

conditions and a forecast of the fall and winter seasons now ap-

conditions and a forecast of the fall and winter seasons now approaching.

Those who here record their deliberate judgment regarding the economic and industrial situation of the United States include not only financial authorities of unquestioned reputation and those operating nation-wide industries, but men at the head of factories supplying articles of individual household use, as well as department stores and other retail establishments which come in direct contact with consumers day after day, week in and week out.

Examination of this presentment of conditions as they actually exist indicates that some sections of the country are more buoyant than others; that certain lines of business are more active than others and consequently more confident.

In this national broadside of business judgment two things stand out with luminous distinctness:

In this hational broadsade of business judgment that with luminous distinctness:

First, Business men all over the land demand that their Representatives and their Senators at Washington settle the vexing questions of tariff and currency, so as to permit an early return of general prosperity. Also is heard the demand that Government officials cease persecuting the railways and allow them to conduct the transportation of freight and passengers on sound business principles.

Mr. President, I am going to ask to print this review in the RECORD for the edification and, I hope, for the good of my friends on the other side, so that they may not unduly delay the passage of these great measures of revenue reform and currency reform.

Mr. OLIVER. Mr. President-The PRESIDING OFFICER. Is there objection to the in-

corporation of the entire article in the RECORD?

Mr. BRANDEGEE. Mr. President

Mr. STONE. I first am going to read part of it, but I will ask that the whole of it be inserted.

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. STONE, Yes.

Mr. OLIVER. Mr. President, in reply to the last statement made by the Senator from Missouri, in which he referred to the Senators on this side endeavoring to delay the passage of the pending bill, I want to call attention to the fact that an hour and a quarter of to-day's session has been taken up by him and his associates on that side reading newspaper articles and deliberately delaying the passage of the bill, without one word from this side except what was called forth by his remarks.

Mr. STONE. Mr. President, what I am saying is somewhat upon the theory that those whom I love I chasten. I hope that after reading and hearing these reports from the country they may be more guarded in conduct and be better disposed in the

future than they have been in the past.

Mr. BRANDEGEE. Mr. President—

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Connecticut?

Mr. STONE. I will yield.

Mr. BRANDEGEE. I did not rise to ask the Senator to yield, but the Chair asked if there was any objection to the insertion in the RECORD of the matter.

The PRESIDING OFFICER. The Chair understood the Senator from Missouri to state that he would ask to have the article printed in the RECORD.

Mr. BRANDEGEE. If he has not done so, I was laboring under a misapprehension.

Mr. STONE. I said I would ask to have it inserted. The PRESIDING OFFICER. The Senator from Missouri said he would make the request.

Mr. BRANDEGEE. I understood the Chair to ask if there was any objection, whereupon I rose to inquire what was the nature of the article.

Mr. JAMES. I hope that the Senator from Connecticut does not desire to let it be known that he intends to object, for the Senator himself asked all sorts of rights this morning, to insert various arguments and to have printed various documents. I should not think he would want to object to the Senator from Missouri having printed that article in the RECORD.

Mr. BRANDEGEE. I note the hope expressed by the junior Senator from Kentucky. I will disclose my intention and exercise my right under the rules of the Senate whenever the

proper time may arrive, Mr. President.

inserted in the Record, by unanimous consent, a petition addressed to Congress on a matter of pending legislation. I have not asked to insert interviews with various manufacturers the extent of which I am ignorant of, and after the matter has been submitted to the Senate I will decide whether I shall object or not.

The PRESIDING OFFICER. The Senator from Missouri will proceed.

Mr. STONE. Continuing the reading of the prefatory intro-duction of the Sun to its review of business conditions, the following appears:

Second The business men of the United States, both great and small, who voice their opinions in the following columns, are absolutely convinced that basic conditions of the country are sound; that unsettled conditions here or there are temporary.

Now, Mr. President, I will read several extracts from this review. First, is this heading:

The Middle States hopeful. Business men in New York City are optimistic.

Then follows a statement of numerous prominent business men in New York City—bankers, merchants, and others. For example, here is a statement of Samuel J. Bloomingdale, of Bloomingdale Bros., who said:

The half year just ended has shown a marked increase in business over preceding like periods, and surprisingly so in view of the unfavorable predictions generally made at the beginning of the year.

Mr. PENROSE. What business is the gentleman in? The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Pennsylvania?

Mr. STONE, I do.

Mr. PENROSE, I should like to know what business the

gentleman is in?

Mr. STONE. He is a merchant in New York City.

Mr. STONE. He is a merchant in New York of Mr. PENROSE. Is he an importer?
Mr. STONE. He is a merchant.
Mr. PENROSE. He is an importing merchant?

Mr. MARTINE of New Jersey. I can say to the Senator that he both imports and manufactures as well.

Mr. PENROSE. And looks forward to a debauch of importa-tions under the pending bill.

Mr. MARTINE of New Jersey. I will say that he controls one of the large retail establishments in the city of New York.
Mr. PENROSE. It is a good importer's article.
Mr. MARTINE of New Jersey. I trust the Senator will not

leave the Chamber. I want to read to him some medicine from his own Commonwealth.

Mr. PENROSE. I will be back when the Senator takes the floor.

Mr. STONE. Mr. Bloomingdale is certified to by the New York Sun as one of the leading business men and merchants of that I have no personal acquaintance with him.

We have backed up this belief by not curtailing in any way our advance purchases for the fall and winter, both in the local and foreign markets, undeterred by the adjustment which the new tariff may occasion and with the confidence that the several economic problems now before the country will meet with a satisfactory if not an ideal solution.

ELECTRICAL INDUSTRY SOUND.

T. A. Osborne, vice president of the Westinghouse Electric & Manufacturing Co., said:

"Business throughout the country is being offered in generous volume, somewhat less, however, than during the previous six months. The outlook for the autumn in the electrical industry is good.

"The industrial applications of electricity are increasing and the trade in this class of work is especially heavy. Large power-station material is quiet, there being a general inclination on the part of public utilities at the present time to not make commitments for large extensions.

tensions.

"Altogether there is no evidence of any unusual conditions existing in the electrical trade, but every evidence of sound and normal growth." Greenhut-Siegel Cooper Co. made this statement:

"From the standpoint of retailers we have every reason to look forward in the most optimistic manner to the coming fall and winter

"Writing at this time, in the midst of what is commonly recognized as the dullest month in the year, we would say that business has exceeded our anticipations.

"In these days of strenuous competition to equal last year's business affords a sense of gratification; in our own case we have considerably exceeded it.

"Figures can not lie, and consequently we feel ourselves justified in taking the optimistic view aforementioned.

"It is of course regrettable that tariff conditions are unsettled, but we have become hardened to this state of affairs, which always arises with a change of Government. Once adjusted we are convinced that matters will regulate themselves satisfactorily.

"All in all we see very little reason for pessimistic utterances such as have been voiced within the past months. We look forward to the forthcoming season with pleasant anticipations."

S. H. Ditchett, editor of the Dry Goods Economist, who is in a position to know the conditions in his line, says:

One of the strongest points in the situation within the dry-goods trade is the absence of any oversupply of goods, either with manufacturers or with distributors, while in some lines there is a decided

trade is the absence of any turers or with distributors, while in some lines there is exarcity.

Moreover the undercurrent of conditions throughout the country is extremely favorable to the distribution of luxuries as well as of necessities, for the bountiful harvests, accompanied by high prices, will increase the spending power of the people. There is reason to expect, moreover, that shortly after the opening of the fall season for retailers the new tariff rates will become definitely known. Then the conservatism in buying, now dictated by uncertainty as to prices, will be removed.

Here is a statement from Daniel Willard, president of the Baltimore & Ohio Railroad Co., as follows:

BUCKHANNON, W. VA.,

Upon the whole I think present business conditions and the future outlook are favorable rather than otherwise, DANIEL WILLARD,

President Baltimore & Ohio Railroad.

Stanley A. Wise, of William Wood & Co., says: The prospect for next fall's trade, however, is especially good.

That is some of the testimony coming from New York City. Now, just a little from Chicago. What I will now read is from John G. Shedd, president of Marshall Field & Co.:

CHICAGO, August 2.

Fundamental conditions in the dry-goods business are sound. Conservative operating on the part of retailers during the last year or more finds them at the present time with stocks in good shape and obligations well liquidated. Business booked for fall delivery during the first six months of 1913 exceeds that of corresponding half year in 1912. Crop conditions on the whole present a hopeful aspect, although there are a few weak spots. Orders in anticipation of spring 1914 requirements are somewhat curtailed owing to the delayed tariff and currency legislation.

THE DELAYED TARIFF AND CURRENCY LEGISLATION!

An early settlement is necessary if we are to have the volume of trade which underlying conditions warrant.

JOHN G. SHEDD, President of Marshall Field & Co.

Here is a statement from the Quaker Gats Co., which says:

CHICAGO, August 2.

As to the general condition of our business, which includes our full line of cereal products, flour, etc., we beg to say that the present volume compares favorably with that of any previous year in the history of our company, and the outlook at present is that the business for some months to come will be larger in volume and in tonnage than that of any previous year.

THE QUAKER OATS CO.

Then here are some statements from St. Louis business men:

Jackson Johnson, president of the International Shoe Co.:

"I believe business will be good, but not as much so if money scarcity did not keep persons from buying the necessaries of life. Business this fall should surpass that of last fall. When the currency bill is passed things should be brighter."

H. W. Peters, vice president of the International Shoe Co., says:

Everything indicates excellent business conditions in the fall.

E. W. Stix, secretary of the Rice-Stix Dry Goods Co., one of the largest jobbing establishments of the Central West, says:

The outlook is entirely satisfactory. Our advance orders are much larger than last year. We never entered a season with everything looking so well. The eastern depression has not affected the dry-goods business. We are enlarging our sales force for increased orders.

And so on with others. From Louisville I find this statement coming from the Stewart Dry Goods Co.:

LOUISVILLE, August 2.

Notwithstanding the present extremely torrid weather with highest temperatures ever recorded for July, we are making substantial gains each day and week.

This gratifying condition has prevailed throughout the entire year, and in anticipation of a large and early autumn business, the outlook for which at present is most encouraging, we are sending out buyers to the domestic and foreign markets with instructions to buy liberally. We are purveyors to the entire South and West, with local territory covering southern Indiana, Illinois, Kentucky, and Tennessee.

THE STEWART DRY GOODS CO.

Here is a statement from C. E. Schaff, the president of the Missouri, Kansas & Texas Railway Co., of the same optimistic kind, concluding as follows:

Early settlement by Congress of the tariff and currency questions would be helpful. We have prepared to handle a very heavy traffic which is expected this fall.

C. E. SCHAFF, President Missouri, Kansas & Texas Railway.

Note the appeal for an early settlement of the tariff and currency questions.

Here is a statement from Topeka, Kans., from J. R. Mulvane, president of the Bank of Topeka, who says:

TOPEKA, KANS., August 2. Everybody is employed and conditions are good. We have been servative for the past two years. Early crops are good and prices are fair. Late crops are to be made.

We expect a reasonable fall trade. Our merchants have their business well in hand.

J. R. MULVANE, President Bank of Topeka.

There are like statements here covering the entire country from Denver, Minneapolis, St. Paul, and other great centers of commerce and distribution. A number of these I have marked and had intended to read, but I believe I will not read any more of them. This review, carefully gathered by one of the great newspapers of the country by its own correspondents and printed in a journal that is not friendly to this Democratic administration or to the Democratic Party, but which has sought, I have no doubt, to give a fair exposition of the industrial conditions now prevailing throughout the United States, I wish to put into the Record—the whole story as printed—so that it may stand there alongside of other things of like kind which have been put into the Record as a rebuke to the doleful and pessimistic prophecies that Senators on the other side of the Chamber are afflicting our ears with from day to day.
The PRESIDING OFFICER, Is there objection?

Mr. BRANDEGEE. Mr. President, I want to say to the Senator from Missouri that I have not had the slightest intention of objecting to the request that he has just made; but I did want him to outline the extent of the article, which I had not seen, although I am usually a reader of the journal to which he refers. I have not the slightest objection to the prophecies of these gentlemen going into the RECORD. I did not intend, however, in advance, to be foreclosed or in any way wheedled out of the right to object.

Mr. STONE. I have indicated the general trend of the article. Now, Mr. President, I ask unanimous consent to print the Mr. STONE. entire statement beginning on the last column of the first page of the paper I send to the desk, and covering all the matter

relating to the subject.

Mr. GALLINGER. Mr. President, I trust no objection will be made. This marvelous prosperity began under a Republican administration and has continued under a Republican tariff law, and I think it is a tribute to the Republican Party rather than otherwise. Let it go into the RECORD.

The PRESIDING OFFICER. Is there objection to the re-

quest of the Senator from Missouri [Mr. STONE] that the matter referred to by him be printed in the RECORD? The Chair hears none, and that order is made.

The matter referred to is as follows:

[From the New York Sun, of August 3, 1913.]

BUSINESS ON A SOUND BASIS—LEADING MEN OF COUNTRY REVIEW CONDITIONS FOR THE SUN—PALL BOOM PREDICTED—MERCHANTS DEMAND SETTLEMENT OF VEXING TARIFF QUESTIONS—PLENTS OF WORK FOR ALL—MORE LATITUDE FOR RAILEOADS URGED—CURRENCY PROBLEM IS DISCUSSED.

Bank presidents, railway presidents, manufacturers, and merchants in widely separated sections of the country, present through the columns of The Sun to-day a comprehensive review of existing business conditions, and a forecast of the fall and winter seasons now approaching. Those who here record their deliberate judgment regarding the economic and industrial situation of the United States, include not only financial authorities of unquestioned reputation, and those operating Nation-wide industries, but men at the head of factories supplying articles of individual household use, as well as department stores and other retail establishments which come in direct contact with consumers day after day, week in and week out.

Examination of this presentment of conditions as they actually exist indicates that some sections of the country are more buoyant than others; that certain lines of business are more active than others, and consequently more confident.

In this national broadside of business judgment, two things stand out with luminous distinctness:

First. Business men all over the land demand that their Representa-

In this national broadside of business judgment, two things stand out with luminous distinctness:

First. Business men all over the land demand that their Representatives and Senators at Washington settle the vexing questions of tariff and currency so as to permit an early return of general prosperity. Also is heard the demand that Government officials cease persecuting the railways, and allow them to conduct the transportation of freight and passengers on sound business principles.

Second. The business men of the United States, both great and smaller, who voice their opinions in the following columns, are absolutely convinced that basic conditions of the country are sound; that unsettled conditions here or there are temporary.

Between the lines of these matter-of-fact statements may be read the unquestioned belief that a long-continued slowing up of general business is impossible in a country with a population of more than 90,000,000, who are accustomed to abundant food, adequate shelter, excellent clothing, the best of fuel, and who must have steady employment wherewith to purchase such necessaries as well as to provide innumerable comforts, luxuries, amusements, and educational facilities which the American people possess to an extent never approached by any other nation in history.

The business men's statements are grouped geographically so that conditions prevailing in one section of the country or another may be readily ascertained.

readily ascertained.

1.—BANKERS AND BUSINESS MEN EXPECT INCREASED TRADE. MIDDLE STATES HOPEFUL-BANKERS

Business men in New York City are optimistic. J. S. Alexander, president of the Bank of Commerce, said:

"Relative to inquiry as to how we view present business conditions in the United States and the outlook for the ensuing months of the year, we would say that in some lines of business close to the maximum volume still is being done; in other lines moderate recessions are noted, and in others, particularly those most largely affected by proposed fariff changes, very material curtailment is in evidence.

"Underlying conditions are good, the buying power of our people is great, as it is possible to obtain steady employment at good wages, and on the whole a large volume of business is being done with reasonable profit. It is surprising that this is so at a time when changes in our tariff laws are imminent, when the defects of our currency system are being discussed and new currency legislation is in contemplation, and when money requirements are fully equal to the supply.

"Although further recessions in business may be looked for as a result of close money markets and necessary adjustments to new conditions we reasonably may expect, in the absence of general labor troubles, a continuance of business activity, which after the settlement of pending questions should increase rather than diminish.

"As to money, the temporary requirements of our transportation interests have been heavy, due to their inability to sell bonds at fair rates, and other corporations, manufacturers, and merchants have been large borrowers, but these demands have all been for legitimate business purposes. A result, however, has been a scarcity of money, and this situation has been aggravated by our heavy shipments of gold on European account, aggregating upward of \$68,000,000 since the beginning of the year.

"Various factors in the foreign situation have adversely affected our money markets, as financial conditions in Europe are even less favorable than with us. Affairs in Europe now are apparently working in the direction of improvement,

can not be looked for during the balance of the year we believe that adequate funds will be available for the current requirements of legitimate business enterprises.

"It is to be bound that the

"It is to be hoped that the present promise of not less than average crops may be fulfilled."

BIGGER TRADE THAN EVER.

BIGGER TRADE THAN EVER.

Samuel J. Bloomingdale, of Bloomingdale Bros., said:

"The half year just ended has shown a marked increase in business over preceding like periods, and surprisingly so in view of the unfavorable predictions generally made at the beginning of the year.

"Not alone has this advance been made by departments supplying the so-called necessities, but also the articles of luxury included in our manifold lines have shown a commendable increase.

"Regarding the autumn business, not being manufacturers or jobbers, we have no advance orders to indicate our business expectations; but guided by the usual ratio prevailing between the early and latter parts of the year, we look forward to a good volume of fall business.

"We have backed up this belief by not curtailing in any way our advance purchases for the fall and winter, both in the local and foreign markets, undeterred by the adjustment which the new tariff may occasion and with the confidence that the several economic problems now before the country will meet with a satisfactory if not an ideal solution."

ELECTRICAL INDUSTRY SOUND.

A. Osborne, vice president of the Westinghouse Electric & Manu-

T. A. Osborne, vice president of the Westinghouse Electric & Manufacturing Co., said:

"Business throughout the country is being offered in generous volume, somewhat less, however, than during the previous six months. The outlook for the autumn in the electrical industry is good.

"The industrial applications of electricity are increasing, and the trade in this class of work is especially heavy. Large power-station material is quiet, there being a general inclination on the part of public utilities at the present time to not make commitments for large extensions.

"Altogether there is no evidence of any unusual conditions existing in the electrical trade, but every evidence of sound and normal growth."

Greenhut-Siegel Cooper Co. made this statement: "From the standpoint of retailers, we have every reason to look forward in the most optimistic manner to the coming fall and winter

"Writing at this time, in the midst of what is commonly recognized as the dullest month in the year, we would say that business has exceeded our anticipations.

"In these days of strenuous competition to equal last year's business affords a sense of gratification; in our own case we have considerably exceeded it.

"Figures can not lie, and consequently we feel ourselves justified in taking the optimistic view aforementioned.

"It is, of course, regrettable that tariff conditions are unsettled, but we have become hardened to this state of affairs, which always arises with a change of government. Once adjusted, we are convinced that matters will regulate themselves satisfactorlly.

"All in all we see very little reason for pessimistic utterances such as have been voiced within the past months. We look forward to the forthcoming season with pleasant anticipations."

DRY-GOODS TRADE.

S. H. Ditchett, editor of the Dry Goods Economist, is in a position to know of conditions in his line. He said:
"One of the strongest points in the situation within the dry goods trade is the absence of any oversupply of goods, either with manufacturers or with distributors, while in some lines there is a decided

turers or with distributors,
"Moreover, the undercurrent of conditions throughout the country is
extremely favorable to the distribution of luxuries as well as of necessities, for the bountiful harvests, accompanied by high prices, will increase the spending power of the people. There is reason to expect,
moreover, that shortly after the opening of the fall season for retailers
the new tariff rates will become definitely known. Then the conservatism in buying, now dictated by uncertainty as to prices, will be
removed.

removed.

"European manufacturers are well supplied with orders and have developed wide outlets for their products. Any increase in importations such as would seriously affect the American market is regarded as improbable."

CONDITIONS INDISPUTABLY GOOD.

C. A. Whelan, president of the United Cigar Stores Co., said: "We find the business outlook from our standpoint in no respect discouraging, despite what we know to be an apprehensive sentiment in those branches of trade which will be directly affected by tariff

changes.

"Our business is transacted in over 800 retail cigar stores operated in 180 different cities, covering the country at large. We feel that holding this close relationship to the buying public our hand is on the pulse of things, and we are maintaining normal increases so satisfactorily practically everywhere that we can not do otherwise than indulge an optimistic spirit.

"So far we have neither had a loss of volume in business—as we base it on healthy growth from month to month—nor observed a diminution in the amount of individual sales.

"We would say therefore that conditions are indisputably good, far better than seemed likely a few months ago, when Congress began its work of tariff revision."

JAMES J. HILL OPTIMISTIC.

James J. Hill, of the Northern Pacific, who is in New York, was, as usual, optimistic. He said:
"I do not look for any unusual conditions in money for the fall. The crop prospect for the Northwest is excellent. The banks there are in a good position."

PRESIDENT WILLARD'S VIEW.

BUCKHANNON, W. Va., August 2.

Upon the whole, I think present business conditions and the future outlook are favorable rather than otherwise.

DANIEL WILLARD,
President Baltimore & Ohio Railroad,

MAIL-ORDER SALES GROWING.

BUFFALO, N. Y., August 2.

We are experiencing at our headquarters at Buffalo, our branches in Chicago and Peoria, and in New York, Philadelphia, and Boston an increasing volume of sales over last year's.

In this factory-to-family nation-wide mail-order business of nearly 40 years' standing we have observed no adverse conditions or indications, and in this city labor is well employed generally and building activity is considerable.

PHOTOGRAPHIC BUSINESS.

ROCHESTER, N. Y., August 2.

Present conditions in the photographic business are showing an increased trade in all lines of materials. This may not indicate, however, an improvement in general business conditions, because of the fact that improvements in the photographic art have been so rapid in the past few years that the increasing photographic business may be in spite of and not on account of general conditions.

EASTMAN KODAK CO.

HURT BY TARIFF AGITATION.

TRENTON, August 2.

The business situation in our line, which covers a full line of sanitary pottery, including porcelain bathtubs, and so forth, and which is governed entirely by the building conditions throughout the country, is very quiet.

At the present time building reports in almost every city indicate that business is below normal, and naturally we are more or less affected by it. A large majority of the big operations in the country, such as new hotels and office buildings, have been temporarily held up on account of tariff agitation and the tight money market, as they have not been able to secure loans to proceed with work of this character.

We cover the entire United States. We do not look for any greater demand during the balance of this year for the goods which we manufacture.

TRENTON POTTERIES Co.

BUSINESS CONDITIONS FAIR.

PHILADELPHIA, August 2.

Business conditions in our large manufacturing territory appear to be fair. Complaints are exceptional. However, there are evidences that general financial conditions are abnormal. Borrowing at banks by large business interests is persistent. With practically no market for the millions of commercial paper in brokers' hands, banks are called upon to supply the deficit in working capital.

This is in some cases required because the business is good, but in many others because it is halting. Manufactured stock is being carried, employment of labor must be continued, bonds and new issues of stock are generally unsalable, and the future is all unknown.

Serious doubts as to the outcome of legislation affecting finance and trade, lack of confidence in inexperienced factious political leaders in Washington, and the near-at-hand requirements for the moving of our crops all combine to effect a strain upon the money market.

However, with the exercise of prudence and conservatism on the part of all borrowers, adjusting their business to prevailing conditions, no great trouble need be anticipated.

Francis B. Reeves.

FRANCIS B. REEVES.

President of the Girard National Bank.

LOCOMOTIVE WORKS BUSY.

PHILADELPHIA, August 2.

Business conditions are gratifying. Notwithstanding financial fluctuations and heat conditions, we consider the business prospects for fall excellent. Our interests embrace the entire country.

BALDWIN LOCOMOTIVE CO. WORKS.

PHILADELPHIA VIEWFOINT.

In Philadelphia opinion is divided among manufacturers and jobbers as to the outlook for the fall trade. Some of them expressed themselves to the Sun as follows:

C. J. Milne, of the firm of C. J. Milne & Sons:

"Our employees are all on full time, and the volume of business for the month of July greatly exceeded that of the previous month. We have many orders that we can not take care of. There has been a boom and we are looking for a record-breaking year, notwithstanding the trouble incident to the change in tariff."

Joseph Scatchard, of Joseph Scatchard & Sons (Inc.), manufac-

Joseph Scatchard, of Joseph Scatchard & Sons (Alce), master turers of yarns:

"Labor trouble, which is threatening some of our customers, is responsible for the juli in business just at this time. Then, too, this is the dull season of the year, but we are anticipating big business in the fall. The tariff has had no effect on us yet, and we will have to wait to get definite results. Prices, so far as we know, will remain the same, but the low duty on raw wool may reduce the cost of yarn."

TARIFF A BITTER DOSE.

Mr. McDonald, of William P. McMaster & Co.:

"New lines of goods, which are usually opened up the latter part of June, creating new business, have failed to materialize this year. I believe when the tariff question is settled it will mean better business. It is like taking a dose of medicine. It is a bitter dose, but later has beneficial effects. I have enough faith to think this country can compete with any foreign country in its manufactured articles."

Joseph D. Swoyer, manufacturer of yarns:

"Although this is the dull season of the year, business is exceptionally good. We are working our full force and we do not have a pound of manufactured goods in stock. The demand is enormous and we have more orders than we can fill. Because of the low duty on raw wool, in all probability the prices of the manufactured goods will be reduced. We have no reason to complain, and anticipate having one of the best years in the history of our business."

T. J. Porter, of the firm of T. J. Porter & Sons. representatives of some of the largest textile manufacturers in Great Britain:

"The new tariff has practically closed up business for the time being. Hundreds of thousands of dollars' worth of orders are being held up in bond by the manufacturers.

"As far as the future is concerned the business outlook is very bright. Reports from our salesmen in the West say business conditions are good owing to the satisfactory condition of the crops. When the tariff is settled there is no doubt but that the reduction on raw material will benefit the consumer. Under the new conditions the manufacturer will be able to put his goods on the market at a reduced price and still be able to make a fair profit."

TRADE CONDITIONS LOOK GOOD.

George C. Jump, representative of the Providence Worsted Mills:

"Every indication points to splendid fall business. There is more of an incentive to good business now than there was a month ago and the mills are in excellent shape to clean up and get rid of all stock. I do not think there is a mill in the country that can not hold its own with foreign competition, especially in the moderate price goods."

Robert H. Jenkins, jobber:

"Business is more active now than it was two weeks ago. I should not be surprised to see great improvement this fall, despite the new tariff which will go into effect soon. The weather has been to blame for the lull in business up to this time and there is every reason to believe it will be up to normal in a short time."

H. M. Remington, importer of cotton yarns:
"While it is rather dull now, in my judgment business will greatly increase in volume in a few weeks, and I look for one of the biggest years I have ever had. The new tariff schedule, I believe, will prove a boon to business."

Stanley A. Wise, of William Wood & Co.: "The prospects for next fall's trade, however, are especially good."

MILLS ON DOUBLE TIME.

PITTSBURGH, August 2.

Actual conditions as we see them are good and our business so far this year is many thousands ahead of last year. We look forward to a good autumn business also.

The mills and factories of this district are busy and running double time. As we are large importers of silks, laces, lingerie, etc., we would feel much better if the new tariff were settled.

Our active retail merchandising covers all western Pennsylvania and the States of West Virginia, Ohio, and Indiana, and our business covering these districts is growing rapidly. Pittsburgh and all western Pennsylvania is enjoying good business, mercantile and manufacturing.

Boggs & Buhl. Boggs & Buhl

INCREASE IN NEW ENGLAND—FIRST SIX MONTHS OF 1913 BETTER THAN SAME PERIOD IN 1912.

BOSTON, August 2.

The first six months of 1913 just ended show very substantial general increases in our business. July has been unusually active. We are optimistic about fall and winter business and are making preparations accordingly.

R. H. WHITE & Co., Department Store.

OPTIMISM FELT IN BOSTON.

BOSTON, August 2.

In Boston and New England, as a general rule, business and financial circles are more or less unsettled as a result of tariff uncertainties. In some quarters a hopeful view is taken of the coming half of the year, while in others it is impossible to get an expression of feeling. Naturally, this being the leading textile center of the country, the woolen and cotton manufacturers are the persons more or less interested in the doings at Washington.

In banking circles there is an optimistic feeling, though it is a fact at the present time that buying is small and that money is tight. However, leading bankers look for a freer movement of money before long and a subsequent improvement in the general conditions. Greater hope is entertained for the year 1914 than is held out for the remainder of this present year, but at the same time nothing to worry over is felt.

Leading dry-goods houses and wholesalers are optimistic and report good business at the present time, with indications of good business in the future.

The shoe business continues good and should continue so, the manufacturers and jobbers report. Factories are running almost at full time, and on the whole the section is moving along in excellent fashion.

TARIFF UNCERTAINTY.

The one important feature, however, is the tariff uncertainty. Were that matter to be adjusted immediately, there is no question but what local business men and manufacturers would report excellent business and prospects for the future. The following are — few expressions:

Franklin W. Hobbs, president of the Arlington Mills at Lawrence:

"If the tariff were a settled matter, I would be only too glad to discuss the outlook with you. However, as matters now are I can not look ahead with any degree of certainty. If the wool schedule were to be enacted and put into effect September 1, with the duties off the first of next year, I have not any doubt but what business would be excellent.

"If, however, the bill does not go into effect until December 1 and the duties come off January 1, I can not see much hope for our success. When the last tariff was adjusted we had several months in which to do business before the duties went off and were successful. Foreign manufacturers can not get their goods ready within three or four months, while we have our product practically ready and can dispose of it at a fair profit if given the time.

"The raw wool is almost down to a free-wool basis, yet buyers will not make purchases until such time as the schedule is finally adjusted. Our lightweight goods are offered at a price which is almost on a free-wool basis. The orders we are filling are for quick use, and the business is holding up pretty well. About the future I do not care to talk."

DRY-GOODS TRADE OUTLOOK.

DRY-GOODS TRADE OUTLOOK.

W. C. Brady, senior member of the Wilson, Larabee Co., wholesale dry goods:

"Our business is good, and I look for a good fall business, but I know it would be much better if the tariff matter were to be settled. At present we have in bond a large amount of merchandise which we dare not take out and place on the market now, for the enactment of the tariff measure would probably result in our being forced to sell at a loss. Our western man, B. T. Marks, has just come in from Nebraska. Iowa, and other States and reports a most optimistic condition. I look for a prosperous season for all. The mills are working, and I do not think they will be forced to curtail."

NO REASON FOR SLACK SEASON.

James J. Phelan, a member of the firm of Hornblower & Weeks,

James J. Phelan, a member of the firm of Hornblower & Weeks, banking house:

"I can not see why the fall season will be slack," he said, "for present indications are that it will be good. Crop reports are favorable; there will be at least an average crop of all descriptions; money should move a trifle more freely; and with the tariff out of the way and a currency bill passed I look for a good season. The currency bill, while not what we would like to have, will be at least favorable, and with such conditions prevailing the year 1914 should be good."

VIEWS IN MIDDLE WEST-GOOD BUSINESS LOOKED FOR IF CROPS ARE BOUNTIFUL.

Merchants and other big men of the Middle West in their views expressed to the Sun by telegraph tell of a fight against rather adverse conditions that affect their sections. They see favorable signs of good business when tariff and other big questions are settled for good. The crops are a big feature in their forecasts.

BIG RAILEOAD EXPENSES.

CHICAGO, ILL., August 2.

The Atchison company has just finished a year of the largest gross earnings in its history, most of the increase, however, being eaten up in expenses. The present year depends still on crops which are not yet made. Wheat is short, corn is suffering from heat and drought, cotton still looks well, but is not out of danger. Country buying is conservative, and there are some evidences of recession in business.

I think the country is fairly reconciled to the tariff revision and the income tax, but dissatisfied with the proposed currency bill, and very much afraid of complications with Mexico.

Railroads are doing the best they can under adverse conditions, but are not getting a fair show by the governing bodies and are subject to constant persecution.

President of the Atchison, Topeka, & Sante Fe System.

CURRENCY BILL A FEATURE,

CHICAGO, ILL., August 2.

CHICAGO, ILL., August 2.

Notwithstanding the agitation in Washington over the tariff and eurrency legislation, trouble in the Balkan States, and the unsettled feeling in Mexico, general business conditions are fairly satisfactory, although there are evidences of a slowing down. The strong demand for money continues and will probably do so for the rest of the year.

The hot, dry weather in central Illinois, western Kansas and Nebraska, and a portion of Indiana has caused some uneasiness, but general crop conditions over the country are favorable. If any new currency bill should pass, along the lines indicated at present, it would have a continued depressing effect upon the business of the country, but I doubt if any financial bill passes at this session.

Ennest A. Hamill.

President of the Corn Exchange National Bank.

DELIVERY AHEAD OF LAST YEAR.

DELIVERY AHEAD OF LAST YEAR.

CHICAGO, ILL., August 2.

Fundamental conditions in the dry-goods business are sound. Conservative operating on the part of retailers during the last year or more finds them at the present time with stocks in good shape and obligations well liquidated. Business booked for fall delivery during the first six months of 1913 exceeds that of corresponding half year in 1912. Crop conditions on the whole present a hopeful aspect, although there are a few weak spots. Orders in anticipation of spring, 1914, requirements are somewhat curtailed owing to the delayed tariff and currency legislation. An early settlement is necessary if we are to have the volume of trade which underlying conditions warrant.

JOHN G. SHEDD,

President of Marshall Field & Co.

NO COMPLAINT HERE.

Present business conditions are very satisfactory, with substantial gains over last year. The fall outlook is promising throughout the United States for our business, which is general merchandising by mail.

MONTGOMERY, WARD & CO.

LARGER BUSINESS EXPECTED.

CHICAGO, ILL., August 2.

As to the general condition of our business, which includes our full line of cereal products, flour, etc., we beg to say that the present volume compares favorably with that of any previous year in the history of our company, and the outlook at present is that the business for some months to come will be larger in volume and in tonnage than that of any previous year.

THE QUAKER OATS CO.

WHAT CHICAGO MEN SAY.

The representative of The Sun here called upon a number of prominent merchants. As a whole they regard the outlook for fall business as favorable. They spoke as follows:

A. C. Bartlett, of Hibbard, Spencer, Bartlett & Co.:

"The pessimism of the East has not found its way so far west as Chicago. Business has been good during the past seven months—better than in 1912—and there are no clouds in the sky, except those hovering over Washington. A change in the prospective crop situation might

lead to a curtailment of business, but there seems little apprehension upon the part of our Western people that such a change will occur.

"Changes in tariff are less menacing to business than they were formerly. The American people have, in a measure, outgrown the fear of what may but seldom does happen. Manufacturers and merchants do not go out of business or consumers case to consume because there are fractional changes in the tariff and proportional changes in the prices of the various commodities and products of the country which are affected by the tariff.

"If Congress will give us a currency law which will meet the requirements of the country and no unforeseen disaster occurs, we shall undoubtedly have a satisfactory business throughout the year."

FALL BUSINESS NORMAL.

C. S. Pirie, of Carson. Pirie, Scott & Co.:

"In regard to the outlook for fall business, we see no reason why it should not be at least normal, and many conditions indicate that it is quite possible it may be considerably better.

"Our orders taken for fall compare favorably with last year, and we think spot business will be good, because merchants in general are not carrying any surplus of merchandise.

"Collections continue good, and, as far as the monetary situation is concerned, we are inclined to think that business people in general are getting more and more away from the influence of Washington and Wall Street, and, while some people think there are clouds visible in these directions, we can not believe that they are serious."

GOOD HARVESTS IN SIGHT.

B. A. Eckhart, of B. A. Eckhart Milling Co.:

"Present conditions indicate we are going to have a highly satisfactory crop in every one of the agricultural products. The spring wheat crop is good, and the corn is fair. The condition of dairy products is good, and they are plentiful. The cotton crop offers unusually bright prospects.

"Merchants are fairly well stocked, but continue to place large orders. From the large and growing export business in sight, I believe a flow of gold will be turned toward America this fall. From present indications there is no ground for apprehension; fall business will equal in practically every line that of last year's, and it may surpass."

ST. LOUIS SHOULD SURPASS LAST FALL

Jackson Johnson, president of the International Shoe Co.:
"I believe business will be good, but not as much so if money scarcity did not keep persons from buying the necessaries of life, Business this fall should surpass that of last fall. When the currency bill is passed things should be brighter."

A FEW OPTIMISTIC MEN.

H. W. Peters, vice president of the International Shoe Co.: "Everything indicates excellent business conditions in the fall."

E. W. Stix, secretary of the Rice-Stix Dry Goods Co.:

"The outlook is entirely satisfactory. Our advance orders are much larger than last year. We never entered a season with everything looking so well. The eastern depression has not affected the dry goods business. We are enlarging our sales force for increased orders."

Melville Wilkinson, president of the Scruggs-Vandervoort-Barney Dry

Goods Co.:

"I am very much pleased with the outlook for the fall in the retail dry-goods business. We feel the tariff is practically settled, and with exceptional crops and a negligible money shortage we are preparing for a greater business than last year."

Sidney M. Schoenberg, secretary-treasurer of the Famous & Barr Co.; "We are getting ready for one of the largest seasons on record. We expect increased purchases and have experienced no difficulty with a money shortage."

MONEY IS INDIANA'S NEED.

For some time there has been a strong demand for commercial loans, taxing the available resources of the banks to supply the same. In consequence bank reserves have been low. This has been true not only of city banks but also of country banks, which have called freely on their city correspondents for rediscounts.

There has been some let-up recently, and many of the loans have been repaid since the wheat crop began to move. The wheat crop in this State is an excellent one both as to quality and quantity. The hot and dry weather has materially shortened the hay and oats crop. Corn, however, promises an excellent yield, and the outlook was never better except in a few sections, where the severe hot weather has had a tendency to wither the corn.

Cattle and hogs are bringing fine prices. In every way the farmer appears prosperous, with an excellent outlook.

General business is good, except some complaint as to slow collections. Manufacturers are complaining as to the scarcity of labor.

While money is sufficient for ordinary business needs and short-time loans, there appears to be a chortage of funds for long-time investments and where the money is to be used for betterments or real-estate improvements. On the whole, conditions and outlook for fall business are good.

Indianapolis National Bank.

INDIANAPOLIS NATIONAL BANK.

GAINS MADE IN LOUISVILLE,

LOUISVILLE, August 2.

Notwithstanding the present extremely torrid weather, with highest temperatures ever recorded for July, we are making substantial gains each day and week.

This gratifying condition has prevailed throughout the entire year, and in anticipation of a large and early autumn business, the outlook for which at present is most encouraging, we are sending out buyers to the domestic and foreign markets with instructions to buy liberally.

We are purveyors to the entire South and West, with local territory covering southern Indiana, Illinois, Kentucky, and Tennessee.

THE STEWART DRY GOODS CO.

GOOD CROP OUTLOOK.

Sr. Louis, July 31.

Business conditions along the lines of the Missouri, Kansas & Texas Railway system, operating 3,817 miles in States of Missouri, Kansas, Oklahoma, and Texas, are at this date satisfactory. The gross earnings of southwestern roads are showing substantial increases.

The outlook for next fall is promising; although there has been great damage to corn in Oklahoma, crop conditions in the Southwest generally are unusually satisfactory. Indications point to production of very large cotton crop in Texas and Oklahoma.

Banking and commercial conditions are excellent. Early settlement by Congress of the tariff and currency questions would be helpful. We have prepared to handle a very heavy traffic, which is expected this fall,

C. E. SCHAFF,

President of the Missouri, Kansas & Texas Railways.

HARD ON THE RAILROADS.

CHICAGO, July 31.

Along the Chicago & Alton Railroad, in Illinois and Missouri, general business conditions are good, notwithstanding a partial fallure of the oats crop and only a fair average yield of farm products. Corn, wheat, and hay promise good returns, yet in certain lines of industry hesitancy is felt in regard to the future and business undertakings are postponed pending further developments.

In railroad matters the controlling influences are the fear of aggressive State legislation, induced by the recent decisions of the Supreme Court in rate matters and uncertainty as to outcome of the arbitration of labor disputes in the East. In the event of action adverse to the railroad situation in either instance the effect would be still further unsettling, but in event of radical action in both instances the ultimate result will prove disastrous to the general business conditions throughout the country.

Business interests appear to be either discounting probable results or holding aloof pending some definite indication. General prosperity being so dependent upon the prosperity of the main industry, namely, transportation, the results of railroad operation are naturally accepted as an index to the general situation, and properly so.

But as long as the railroads are compelled to employ hand-to-mouth methods and depend upon day to day offerings to shape the policy of management, it is oute clear that conditions of general thrift in business affairs will be impossible.

President of the Chicage & Alton Railroad.

B. A. Worthington,
President of the Chicago & Alton Railroad.

WEST AND NORTHWEST—BUSINESS FUTURE DEPENDS ON SUCCESS OF CROPS.

OMAHA, NEBR., August 2.

We have a large wheat and small grain crop. Our corn crop of large acreage has sustained some damage from drought, probably 20 per cent.

If we should have an average yield of corn we believe we will have a fairly good business year if Congress does not interfere. Jobbers are buying lightly, fearing tariff revision.

Money is close, banks lending sparingly, fearing currency legislation. The main features of the curency bill as proposed are most objectionable to all business interests. The largest national banks in this State will not retain their charters if the bill is made law.

We need currency legislation that will improve conditions and not give the country a backset.

F. H. Davis,

F. H. DAVIS, Vice President First National Bank.

KANSAS TRADE WELL IN HAND.

TOPEKA, KANS., August 2.

Everybody is employed and conditions are good. We have been conservative for the past two years. Early crops are good and prices are fair. Late crops are to be made.

We expect a reasonable fall trade. Our merchants have their business well in hand.

J. R. MULVANE, President Bank of Topeka.

PROSPERITY SEEMS ASSURED.

MINNEAPOLIS, August 2.

We deal directly with consumers in Minnesota, the Dakotas, and Montana. Our present business is running 20 per cent ahead of the best year we have ever had.

Collections are satisfactory and crop prospects are wonderfully fine, which means prosperity for this section for at least another year. There is little speculation in land, merchandise, or securities. The demand for labor is greater than the supply, and everything is as fit as a fiddle so far as the Northwest is concerned.

W. I. Harris

W. L. HARRIS,
President of the New England Furniture & Carpet Co.

GRAND TRUNK'S LARGE BUSINESS.

Present business conditions throughout the country contiguous to the Grand Trunk Railroad from Chicago to the Atlantic seaboard are very favorable, as evidenced by the largest volume of business ever handled in history of the company
Reports from all sources would seem to indicate that these conditions will prevail throughout the season, with prospects of an increased volume of traffic this fall on account of favorable crop conditions in the Canadian Northwest.

E. J. CHAMBERLAIN, President Grand Trunk Railroad.

COLORADO AND THE TARIFF.

DENVER, COLO., August 2.

Crops in this State are abundant and we are anticipating good prices so that the current year should produce a considerable revenue for our farmers and fruit growers as well as cattle raisers.

The disturbing situation, however, is the impending tariff, the reductions in which will affect practically every industry in the State, and we are so misrepresented in Washington that our congressional delegation appears to be in favor of this measure.

I regret that these facts must be related, but believe that intrinsi-cally the State of Colorado is one of the most promising and prosperous in the Union, provided its industries may have a fair share of protec-

A. V. HUNTER, President First National Bank of Denver,

BUSINESS GOOD IN ST. PAUL.

ST. PAUL, MINN., August 2.

The senson is sufficiently advanced to assure a normal crop in the Northwestern States. Business conditions are good, but will be much improved with easier money when tariff legislation is finally disposed of. I am inclined to regard general conditions equally as good and business prospects about on last year's plane.

President Great Northern Railway.

GOOD CROPS IN THE SOUTH—RETURN OF PROSFERITY IS PREDICTED BY BANKERS THERE.

NEW ORLEANS, August 2.

This being an agricultural section, prevailing conditions must be considered with due regard to various staple crops. In territory tributary to New Orleans the section engaged in raising cetton has for several years been at severe disadvantage on account of the ravages of the boll weevil, and has passed through a period of deep depression and discouragement. There was slight improvement last year, and the present season promises a very large yield of cotton and a return of the prosperous conditions that prevailed before the appearance of the boll weevil.

weevil.

The corn crop throughout this territory is larger than has been grown for many years, and the yield per acre exceeds that grown on the best lands in Illinois and Iowa. Louisiana alone will probably have more than 50,000,000 bushels in excess of its own requirements. The rice crop premises an abundant yield, and conditions throughout the territory in which that staple is grown are exceedingly prosperous, with considerable advance in the values of farm lands.

The sugar section has promise of a very large yield, the final outcome depending upon weather conditions during the remainder of the season.

Owing to adverse tariff legislation it is unlikely that farmers will obtain a price for their sugar cane that will pay for the expense of growing it. This section, therefore, is under heavy depression at this time, and the outlook for the future is extremely uncertain. Complete readjustment of agricultural conditions and possibly of credits will have to be made.

Sol Wexler, Vice President Whitney Central National Bank

PROSPERITY NOW IN TEXAS.

HOUSTON, TEX., August 2.

Business conditions in Texas are sound and healthy. Crop prospects are brighter than for many years. Industrial and commercial enterprises are prosperous. Immigration to our State continues to settle our former vacant lands. Our cities and towns enjoy steady and sub-

our former vacant lands. Our cities and towns enjoy steady and substantial growth.

Farmers have raised sufficient corn and small grain for home consumption, and the railroads will soon be taxed to their utmost to move the enormous cotton crop and other traffic.

As usual, at this time of the year, money is somewhat stringent, but the movement of cotton will soon relieve this feature of the situation, and we see nothing to prevent a large and satisfactory fall business in all lines throughout the State.

S. F. Carter

S. F. CARTER, President Lumberman's National Bank,

THE PACIFIC COAST-GENERAL BUSINESS CONDITIONS GOOD-HARD TO BORROW MONEY.

SACRAMENTO, CAL., August 2.

Sacramento, Cal., August 2.

General business conditions in the territory served by the lines I represent and through which I am now traveling are apparently good, but do not show the activity anticipated. This is accounted for by the conservative attitude of commercial interests and also by the inability to finance public utilities and industrial projects.

The disposition of the tariff, the currency bill, and other pending legislation would no doubt relieve the situation, since other conditions do not appear to warrant a depression in business.

On the Iron Mountain Raiiroad, serving Missouri, Arkansas, Louisiana, and Texas, the prospects for a revival of business in the fall are good. The movement of lumber traffic from the Southwest is increasing. The cotton crop, the principal agricultural industry, promises a large yield, affecting favorably all lines of business on the Missouri Pacific, serving Missouri, Kansas, Oklahoma, and Nebraska.

While reports indicate some damage to crops the prospect for fall business is considered favorable.

On the Denver & Rio Grande, traversing Colorado and Utah, the prospects for fall business, we feel, may conservatively be said to be good. The crops, including fruits, promise a good yield, with an extended interest in the live-stock industry.

B. F. Bush.

President Denver & Rio Grande Railroad.

President Denver & Rio Grande Railroad and Missouri Pacific System.

ALONG THE SOUTHERN PACIFIC.

SAN FRANCISCO, August 2.

SAN FRANCISCO, August 2.

Speaking for the territory west of El Paso, Tex., Ogden. Utah, and Portland, Oreg., covering the Pacific system of the Southern Pacific Railroad, or, say, 6,500 miles of railroad, conditions at this time are fairly satisfactory. Business men are getting good prices and the outlook for the season, generally speaking, is up to the average.

WILLIAM SPROULE,

President Southern Pacific Co.

BANKS LOANED UP.

PORTLAND, OREG., July 31.

In most lines of business in this section conditions are fair to good; volume of business for first six months of this year large as last year, if not larger. Collections are slow and money scarce. Banks generally

are well loaned up. Borrowing for speculative purposes is not countenanced and borrowers can obtain accommodations only when regular customers of a bank. Crop prospects are excellent and harvesting is proceeding rapidly. We anticipate some difficulty in financing the harvesting of the crop, but once marketed look for good business generally and an easing of money rates by the end of the year, provided there are no heavy failures or financial disturbances in the East.

FIRST NATIONAL BANK.

FAIR CROPS AND GOOD PRICES.

SAN FRANCISCO, August 2.

The business conditions in our part of the country are far better than might be expected, considering the uncertainty of the tariff and currency reforms. We are having fair crops and good prices, and the banks here have money enough to look after the legitimate needs of their customers. The deposits in the banks are keeping up well.

President the Crocker National Bank, of San Francisco.

IN SOUTHERN CALIFORNIA.

LOS ANGELES, CAL., August 2.

Los Angeles, Cal., August 2.

Business so far this year has been very good; much better than was expected. The prospects for a good fall business are very satisfactory. There is a great amount of building going on in this city, which ranks fourth in the United States for increase in new buildings. There are very few unemployed.

Merchants are operating cautiously, awaiting the final announcement on the tariff question. Leading bankers inform us that money for the movement of crops is plentiful in spite of the financial stringency in the East. In fact, they state there is now plenty of money available for property demands.

We believe the aforementioned conditions apply generally to Los Angeles and southern California.

Broadway Department Store.

BROADWAY DEPARTMENT STORE.

SEES TRADE BOOM AHEAD.

SAN FRANCISCO, August 2.

Present conditions are quiet and dull. Most businesses here show no gain nor loss, with the number of failures relatively few. Retail merchants of northern and central California are optimistic, however, as to the fall and future, feeling that the turning point is about past. All will heave a sigh of relief at the conclusion of the present interminable tariff situation, believing that it is largely responsible for present conditions. We consider that we are in the dawn of one of the greatest booms this section of the country has ever known.

B. F. SCHLESINGER,

President California Retail Dry Goods Association.

Mr. GALLINGER. Mr. President, it has interested me to have the Senator from Missouri [Mr. STONE] for the second time call attention to the fact that certain lamentations have been uttered on this side of the Chamber concerning the probable effect of the proposed tariff legislation. I recall the fact very distinctly that when we were engaged in trying to pass the last tariff bill the immobile and attractive features of the Senator from Missouri were frequently turned to us on this side of the Chamber, and he indulged in lamentations day by day to such an extent that I took the liberty of reading a part of a chapter from the Lamentations of Jeremiah for the purpose of helping the Senator out.

Mr. President, I do not understand that, as a rule, Republicans are complaining of present conditions, although there are clouds on the business horizon. On the contrary, as I said a moment ago, the matter which the Senator from Missouri has placed in the RECORD is a tribute to the Republican Party. setting forth, as it does, prosperity under a Republican tariff law. I recall seeing once a picture of a very interesting statue labeled "Patience on a monument smiling at grief," and I venture the suggestion that after the present proposed tariff legislation has become an accomplished fact and its effect has been felt we might well expect to see the effigy of the dis-tinguished Senator from Missouri on a monument labeled "The prophet of prosperity smiling at disaster," because I believe in my heart of hearts that that is what is to overtake the country if this tariff bill becomes a law, as it probably

The Senator from Missouri quoted from Marshall Field & Co., a house which is a very large importer of foreign goods, to the effect that there has been a considerable increase in the business of that house. That is very likely so; and I do not question the fact that other houses have given the testimony that the Senator has placed in the RECORD. But I observe day by day that notwithstanding this claim of prosperity on the part of importing houses in the country the revenues of the Government are falling below the expenditures and that we are threatened with a very serious decrease of revenues unless something is done to check the present trend of affairs.

It is to me very interesting to have our Democratic friends testify so eloquently to business conditions under the existing Republican tariff law. We have been accustomed to hearing the Democratic Party, in season and out of season, clamoring for an increase in our foreign trade. But the fact is that our foreign commerce has increased under Republican policies to such an extent that it excites the admiration of the learned Senator from Colorado [Mr. THOMAS], and he puts in the RECORD the fact that our foreign commerce has increased to an extent such

as could hardly have been dreamed of a few years ago. That, again, is an instructive testimonial to the prosperity that has come to the country under the administration of the Republican

Everybody knows that the country was phenomenally prosperous under the last administration; but even the distinguished Senator from Missouri can not with any degree of certainty prophesy what the condition will be under the proposed law. We have yet to test that by actual experience. As I said the other day, if it shall prove that the new tariff law shall give prosperity to the country, it will justify the Democratic Party in every contention it has engaged in during all these years, and it will prove conclusively that the Republican Party has been wrong on economic questions all through its history.

I do not expect, however, that history will fail to repeat itself. I do not expect that a tariff law such as this will fail to bring upon the country substantially the same result that the last tariff law of the Democratic Party did. For that reason, without joining the army of those who are lamenting the present situation, because I do not think it deserves lamentations on our part, I am looking forward to a condition of things in the near future that will be a tribute to the views the Republican Party has held and that will once again prove that the Democratic policy of a tariff for revenue only is a snare and a delusion to the American people.

It is instructive to put in the RECORD the views of merchants, as well as editorials from leading newspapers of the country, because to a certain extent they reflect public sentiment. It has not been my habit to do that. In all my service here I believe I have not placed in the RECORD more than one extract from a newspaper. But I chance to have in my possession an editorial from a recent issue of the Washington Post, a paper that never has been charged with Republican affiliations, which I think may well be placed in the RECORD in connection with the newspaper extracts that have been placed there by the Senator from Missouri [Mr. STONE] and other Senators on that side of the Chamber.

The Washington Post said:

The Washington Post said:

While the Senate yielded everywhere to protests from foreigners against the severities imposed on them by the House, it piled up the hardships on the American farmers and manufacturers prodigiously, put a prohibitory tax on luxury imports, and enlarged the scope of the direct income feature, saddling on the American taxpayer the financial results of the Senate concessions to the foreigner. Are the people not to be told why such favors—gratuities, all of them—are lavished on the foreigner without a sou of compensatory advantage? Everything is being primed for a foreign invasion on a scale trade history furnishes no parallel for, but the reason of state or of economy for taking such a step is hidden from us. This is the weakest point in the Democratic armor.

The defection on sugar and wool may force minor concessions as regards those articles, but the only means of heading off the bill from going through practically as reported to the Senate would be to challenge its supporters, day in and day out, to justify its un-American conception and execution from agate to zinc. Put it before the people with telling emphasis and untiring diligence that a collective congress of the foreign world could hardly do more toward knocking the props from under what we have built up than is being done by the American Congress without rhyme or reason, without offering a plea in defense or extenuation, and who could doubt the result?

Mr. President, that is a contribution that I think is worthy of

Mr. President, that is a contribution that I think is worthy of serious consideration. It has seemed to me, as I have read this bill over and over again, that we are surrendering the American market to the other countries of the world. Inasmuch as this is the best market in the world, and inasmuch as our people consume per capita infinitely more than any other people on the face of the earth, it is my earnest wish and desire that we, as patriotic American Senators, shall see to it that as large a proportion as possible of our own market is saved to our own people, and that foreign nations shall not be given the advantages that I find are given to them in the bill now under consideration.

But the bill is to pass. The flat has gone forth. The Democratic caucus has so decided. We must, as well as we can, face the result, whatever it may be. It will not profit us, at this stage in the proceedings, to waste much time in direful prophecies as to what will happen, or in tributes to what is occurring to-day under a Republican tariff law. Let us go along in an orderly way, discussing the items as they come before us, giving careful consideration to the various schedules of the bill. The bill is to be passed by Democratic votes and approved by a Democratic President, after which it will be tested in the crucible of public opinion, as the Wilson-Gorman tariff law was tested 20 years ago, and rejected by the voters of the

country.

Mr. WILLIAMS. Mr. President, I hope the Senate will excuse me for telling a little incident of which I am reminded by the present conduct of the Republican Party

was once standing on Jefferson Street, in Yazoo City, near old John Brumfield's office. Just across the way was a mule,

and on the mule was a little nigger. The mule was at one time throwing up his hind heels, and the next time he was throwing up his fore heels, and the next time he was putting all his four feet together and humping his back, and the little darky was managing to stay on by gluing his bare heels to the mule's sides and his arms around his neck. Old John Brumfield said: "John, I wish you would look at that mule. He don't know a thing about pleading. Evidently he never studied pleading." I said: "John, I can't imagine what con-I said: "John, I can't imagine what connection there is between that mule's conduct and the science of legal pleading." "Why," he said, "you are stupider than I thought. Don't you see that the mule is demurring, when he ought to go to the country?

If you Republicans are as certain as you pretend to be that this bill is going to play havoc with everything and everybody and arouse the disgust of the people and the country, why do you not quit demurring and let us go to the country? We are

The quicker the better.

Mr. GALLINGER. Mr. President, that is precisely what we inquired of our Democratic friends four years ago, but they kept us here in debate over two months. We have been debating this bill less than three weeks. We propose to continue to demur until the people of the country understand our precise Then the people of the country can render the verdict with more intelligence than they could if it were altogether decided on the basis of Democratic arguments. We are endeavoring to enlighten the people on questions of great public concern.

Mr. MYERS. Mr. President, I will make some observations upon the pending tariff bill, House bill No. 3321, especially

upon the free-raw-wool clause thereof.

Amidst the hue and cry that we have heard in this Chamber about discrimination in this bill against the West, I wish to have heard one western State which feels self-reliant and is not complaining about discrimination. This discrimination against home interests, of which we hear so much, when translated into plain English, in my opinion, often means: "We are not getting our share of the graft; we are being overlooked in the distribution of the plunder." That is not my principle, and, if I mistake not, it is not the principle of a majority of the

people of my State.

There has been some criticism of this measure by solicitous friends of the West on account of the free-raw-wool provision in it. It is by many considered doubtful, from an equitable economic standpoint, if raw material should often bear a tariff Any tariff duty imposed upon a raw product almost invariably makes the cost of the raw product greater to the manufacturer. He in turn will ask not only for as great or a greater degree of duty upon his finished product as that given to the raw product, but, in addition thereto, he will ask for a compensatory duty that will recoup, or more than recoup, him for the increased price he will claim to have been required to pay for the raw product, and he invariably gets it. Thus the poor consumer is thrice taxed by the tariff when he pays for the finished product.

Wool is raw material. Its production requires but little labor. It requires no great factories filled with intricate and delicate machinery, operated by the application of steam or electrical power, and requiring labor of skilled artisans and mechanicians trained in the technical pursuit of turning out a finished product. Sunshine, rain, atmosphere, and grass—things not owned exclusively by the individual, but the common heritage and privilege of all—do the greater part in the work of its production; and in the West the grasses have grown mostly on public lands; but little labor is required and that of the most ordinary and unskilled character. Once the original investment is made it requires very little capital to carry on the business; no expensive machinery has to be kept in repair; no trained corps of skilled workers has to be kept on the pay roll; nature does the most of it after the original investment is made. Therefore wool is amongst the rawest of raw materials. I ask, in order that justice may be attained in this matter—justice to all, not to a few—is woolgrowing a proper industry to be granted further protection? Do the woolgrowers need protection? Does the Government need the revenue to be derived therefrom? Would a continuation of duty on raw wool be justifiable?

In the past the most frequent plausible argument advanced for protection has been that in favor of the protection of infant industries, and even here a discriminating mind would require that distinctions be made. The argument generally made is that it may be advantageous to encourage by legislation a branch of industry which might be profitably carried on; which is therefore sure to be carried on eventually, but the rise of which is prevented for the time being by artificial or accidental

Even if there be any merit in the argument from a causes. protective standpoint, it must lie in the assumption that the causes which prevent the rise of the industry and render protection necessary are not permanent-not such as would permanently prevent, under a state of freedom, the growth of the industry, but are causes which are new and artificial and which are sure to be overcome in the end, but which may be more quickly overcome by the stimulus of temporary protection. The mere fact that an industry is young in years does not supply the condition under which protection would be justified by this argument. If not naturally calculated, in the course of time, by its own merits to become self-sustaining and profitable, even this plausible argument would not apply to it. Any industry which, after having had heavy and long-continued protection, is unable to stand alone and supply its country with products, at least as cheaply as they can be obtained elsewhere, not only is entitled to no further protection, but proves by its own career that it was never entitled to any protection.

There had always been sheep in this country from the first settlement of the colonies. The colonies had always had some sheep and always had produced for home use and even for exportation at times from one colony to another some wool. When wool manufacturing began to assume proportions in this country and the need of wool therefor was apparent and the supply was found to be inadequate, in 1802, a large flock of merino sheep was imported from Spain, followed in 1809 and 1810 by larger importations thereof from the same country. first tariff duty was put on raw wool. It was a duty of 15 per At the same time there was levicd on woolen goods a tariff of 25 per cent ad valorem, to be reduced after three years to 20 per cent, but the reduction was never made. If enacted to stimulate the production of wool in this country to the extent of furnishing its own wool supply, this protection was a failure, for importations of wool and woolen goods increased. The duties

simply taxed the consumer.

From that time to the present day raw wool has been a protected product in this country, except for four years from 1857 to 1861, when it was free in part, all raw wool worth less than 20 cents per pound being admitted free, and except the three years from 1894 to 1897, when it was on the free list. During the greater part of all that time wool has been especially favored by high tariff duties. Practically all of the time since 1816 it has been a favored product, carefully pampered, fostered, and protected by the Government at the expense of the masses of the people. In 1824 woolen manufacturers sought and obtained an increase of the duty on woolen manufactures and at the same time, as a companion piece of favoritism, the duty on raw wool was increased to 30 per cent. In 1828 further increases of both duties were made as a part of the "tariff of abominations" of that year, wool being given a specific duty of 4 cents a pound and an increased ad valorem rate, which in two years reached 50 per cent. Even this stiff increase did not answer any legitimate purpose, nor any purpose at all, except to further tax the masses of the people, and importations increased. The stiff rates of duty obtained by woolgrowers and woolen manufacturers constituted a factor in making the law unpopular and an abomination to the people.

In 1833 and again in 1834 the tariff was revised, and slight reductions were made in tariff duties on wool and woolen goods. In 1837 the country suffered a panic, and wool suffered along with other products. The price of wool, which had ranged very high, fell sharply that year. In 1846 the tariff was again revised, and the duty on low grades of wool was considerably

increased, and the price of wool increased.

Then comes the tariff revision of 1857, by which all wool valued at 20 cents a pound or less was put on the free list and · wool worth more than 20 cents a pound was given a duty of 24 per cent ad valorem, a very great reduction from the protection wool had theretofore enjoyed. This was partial free trade for wool and a tremendous reduction of duty upon the whole. Likewise the duties on woolen manufactures were greatly reduced, resulting in greatly increased importations. The reduction of 1857 was followed by an increased use of wool and by a decreased use of substitutes for wool. Importa-tions of wool increased, and the price was lowered some, but not to the point of causing woolgrowing to be unprofitable. Woolgrowing continued and flourished, the only noticeable difference being that prices of wool and woolen goods were lower to the people.

During that period of practical free trade the wool industry thrived and was carried on at a reasonable profit. A few years before, when wool was high and the actual protection afforded was the greatest, the flocks in the East were cut in half, and a little later there was a decline in the West. This proves that, while a protective tariff increases the price of a product to the consumer, it does not always stimulate the industry and cause it to grow. In the case of wool numerous involved conditions exercised control. The dairying business and other businesses became more profitable; cotton, a cheaper product, was used as a substitute for the more costly wool; land in some parts of the East became too valuable for sheep grazing, and various other economical conditions operated to offset the protection given by the tariff. The consumer, though, paid a higher price,

without any compensatory benefit to the country.

Then came the Civil War period, with its extraordinary demand for woolen clothing and blankets, accompanied by a scarcity, almost entire absence, of cotton, and high prices for everything. Prices soared, wool along with the rest. was revised in 1861 and tariff rates, materially raised. By the Morrill Act of 1861 specific duties on wool were substituted for ad valorem rates, and a duty as high as 9 cents per pound was put upon some grades of wool. The duties on woolen goods were increased accordingly. An ad valorem rate of 25 per cent was levied on them and, in addition, a specific duty of 12 cents per pound of cloth. This specific duty was intended to compensate the manufacturers for the duty on wool, while the

ad valorem rate was to give them their protection.

In this act is found the first attempt to apply the principle of a scientifically adjusted compensatory duty to the manufacturer to offset the duty on raw wool, a nefarious principle which has been maintained ever since when there was a duty on wool, a principle which is the bane of the consumer and which makes the woolen manufacturer join hands with the woolgrower, in order to extort from the Government protection for both, because the manufacturer knows that under this principle he will be compensated for the increased cost to him of wool and given his own measure of protection besides. The complexity of its working is commonly used to obtain more protection for the manufacturer than he would get if there were no duty on raw wool and he were enabled to buy raw wool at a cheaper price. One way in which this is brought about is that it is generally figured that it takes from 3½ to 4 pounds of raw wool to make a pound of finished cloth, which is an exaggeration. It does not take so much as either quantity, and it gives the manufacturer a meed of gratuitous protection for which there is no reason nor warrant. It is an imposition-a graft. There are other tricks of the trade in this complex compensatory scheme. The manufacturer has never relaxed the avidity with which he grasped and welcomed the application of that insidious principle.

In 1864, owing to the cost of the war and the need of revenue, a still further increase of rates of duty on wool and woolen goods was made, the very lowest grade of imported wool being taxed 3 cents a pound; other grades, 6 cents a pound; and others, 12 cents per pound plus 10 per cent ad valorem. Over half of the imports paid 6 cents a pound, nor was the duty offset by an internal-revenue tax, as were many duties during the war. It applied to the grades of wool most widely grown in the country and meant a real and substantial net increase in the protection which the woolgrower obtained. It proved to be the be-ginning of an era of greater protection than the grower had ever known. There was also a considerable increase in the duties on manufactured products. Most of this was sought to be justified as compensation for the higher duties on the raw material. This act raised all duties greatly and indiscriminately. The average rate on dutiable commodities under the act of 1862 was 37½ per cent. The act of 1864 raised the aver-

age to 47.06 per cent.

During the first three years of the war importations of wool and woolen manufactures decreased from what they had been before the war, owing, doubtless, in large part, to the segregation of the South. During the last year of the war the increase of importations was about 80 per cent as compared with the preceding three years, and the duties paid were 53 per cent

of the value.

At the outbreak of the Civil War the average rate of duty on all dutiable articles was 19 per cent, amply adequate to defray the expenses of the Government economically administered. During the war the necessity for greater revenue arose. The Government had to have money with which to prosecute the war. For long periods of time during that frightful fratricidal struggle the expenses of the Government were as much as a million dollars a day. Enormous revenues had to be raised, and in large part the Government resorted to increase of tariff duties along with internal-revenue taxation. In return for the revenue the Government granted special privilege in the way of pretection to favored classes, mostly to manufacturing industries; but raw wool came in for its share, lugging along that inseparable concomitant—compensatory duty to the manufacturer—in order to enable the specially favored manufacturer

to wax fatter and richer at the expense of the consumer; and to this day the manufacturer has had, and he has now, the lion's share of the protection on wool. He understands how to get that. The compensatory scheme gives it to him.

It was understood and promised at the time, that the increases of tariff duties made during the war were only war taxes, for war purposes, in an emergency, and that they would be reduced as soon as the war should end; but after the war the protected interests were in no mood to surrender the advantage they had gained. They besieged Congress with lobbyists and they trafficked and traded amongst themselves to help one another in enabling each to keep possession of the advantage he had secured from the country by means of the merciless emergency occasioned by war. They robbed each other and then evened

things by all robbing the public.

In 1867 the tariff was again revised and more concessions were granted to woolgrowers and woolen manufacturers. this industry, as with all others, the necessary increase of tariff duties during the war, made in order to prosecute the war between the States, had only whetted the appetites of special interests. Having obtained a taste of special privilege, it proved to them like the taste of blood to the wild beast-it only whetted the appetite for more and strengthened the arm of special interests to enforce their demands. Prior to the Civil War protection, as such, had hardly been known in this country and scarcely anybody dared to advocate it. Such tariff duties as we had were almost uniformly for revenue purposes only, in order to raise the necessary revenue required to conduct the Government, or such as were timidly granted to encourage infant industries. Only twice before the war were tariff laws having within them any distinct and avowed element of protection enacted, and they proved so unpopular that they were speedily abolished or reduced in response to the demands of an indignant public. Our tariff duties were looked upon in the main as only the means of providing revenue.

In December, 1865, at Syracuse, N. Y., the woolen manufacturers and woolgrowers held a convention and came to terms, under which they agreed to make a united assault upon Congress, not only to keep what protection they had, but for greater protection, and to agree upon rates of compensatory duty to the manufacturer. After planning and scheming and some bicker-ing and dissention they agreed on what they wanted and pledged their sacred honor to stand by each other in their raids on the pockets of the people. Then and there began their offensive and defensive alliance, which has been kept up to this day, which has made Schedule K the keystone to the protection arch, the corner stone of the protection temple, and which has made Schedule K indefensible and odious to the people.

The tariff law of 1867 resulted in increased rather than lowered duties. In 1883 the tariff was again revised and the rates on raw wool were slightly reduced, approximately about 2 cents per pound. The rates on woolen manufactures were not perceptibly altered. The protection accorded raw wool and woolen manufactures continued high enough to cause a great deal of consumption of cotton, a cheap product, instead of wool, a higher priced product. Between 1870 and 1890 the consumption of cotton rose from 4,000,000 pounds to 160,000,000 pounds. The number of sheep in the country slightly declined. In 1880 the census returned, in round numbers, 42,000,000 sheep and in 1890 returned 41,000,000. In 1884 the wool clip was 337,500,000 pounds; in 1890 it was 309,000,000 pounds.

In 1890 the McKinley tariff law was enacted, under which the woolgrower secured virtually a restoration to the higher duties of 1867. The duty on clothing wool went up to 11 cents per pound, on combing wool from 10 to 12 cents. Woolen manu-

factures were raised accordingly.

We are now up to the panic of 1893 and free wool in 1894, of which we hear so much. Practically ever since 1816 wool had been protected. Sometimes the tariff duty was raised; at other times slightly lowered; but practically always wool had been a favored industry and had enjoyed protection at the hands of the Government. Beginning in 1816 protection was first accorded to it as an infant industry in the hope of making it furnish a domestic supply adequate for all of our uses, building up an industry that would furnish all the wool used in this country. Protection had been lavished upon it to that end, and with what result? Sometimes the price was higher, at other times lower; and the supply was never adequate for home consump-tion. Importations of wool and woolen cloths varied, but they kept on steadily year after year; sometimes more, sometimes less, but always a steady flow. In all the advances and back-sets that wool had during this extended period who can say that the protection accorded it was of any benefit to this country or its people as a whole?

The tariff duty had undoubtedly kept the price higher than it would have been otherwise. There was no compensatory benefit to the country, such as building up a great industry capable of supplying all the wool used in this country. There was no benefit to the country at large. What good resulted to the woolgrowers, except the extra dollars that went into their pockets for the time being? Their business was not put upon a stable basis.

We now approach the bogie of free wool in 1894. I know that with our Republican friends the panic of 1893 has supplanted the bloody shirt. For years and years the bloody shirt was frantically waved, until it became timeworn and threadbare and no longer frightened people into giving the Republican Party an extended lease of power. I know that for years it was shouted and dinned in the ears of the frightened populace that the Confederate brigadier was in the saddle. The old Union soldiers were advised to vote as they shot. One might have expected to see the Confederate flag floating over the Dome of the Capitol; the negroes put back into slavery. The old bloody shirt was worked overtime. It was the stock political argument, the beginning and the end of the appeal to the people. Underneath its dripping folds steadily the work went on of increasing the tariff duties and piling up the burdens of taxation on the people. The people listened in dumb terror and did not realize the additional burdens being placed on their backs. The panic of 1893 has taken the place of the poor old bloody shirt. The shirt was waved and flaunted until not even the shreds remained, and something else had to be taken up in its place. Now the people are to be frightened and terrorized by the ghost of 1893. It is stalked out every time there is danger of the Democrats getting into power and every time a downward revision of the tariff is undertaken. Gaunt and gloomy starvation is paraded before the awestricken people. Soup houses are pictured dolefully on the stage by calamity artists.

The ghost of 1893 is the bogie of the hour; but the panic of 1893 came more than a year before the enactment into law of the Wilson bill of 1894, with free wool in it. What caused it is a matter of wide differences of opinion and of endless discussion. Of one thing we may be certain—that it was not caused by any tariff legislation of the Democratic Party, because no tariff law was enacted for more than a year afterwards. With some plausibility it is ascribed by some to unwise tampering with our monetary laws. Others ascribe it to the preceding era of great prosperity and accompanying inflation of values, overbooming, speculation, and extravagance. Like the black panic of 1873 it was one of those periodical financial and commercial depressions which come around with the cycles of time, to remind us that for good times there must be bad times, and which are brought around by a combination of causes, making it difficult to show any one particular cause, but which have ever been recurrent in the history of this and other civilized countries. Wool began to decline in price long before 1894.

The low level in the price of wool which was reached in 1885 continued with little change until 1891. Then the downward movement was renewed and took a decided plunge in the spring of 1893. With the outbreak of the panic of that year came a sudden drop, wool falling as much as 10 cents a pound in the course of a year. Wool was down to a low ebb long before the Wilson bill, with its free-wool provision, was enacted in August, 1894. The final enactment of that bill had little effect upon the price of wool. The price of wool fluctuated around the low level of 1893 during the entire period of financial and commercial depression, which continued about four years until 1897. During that time all prices were low. A period of depression prevailed over the entire country, and wool only participated in the general depression and downward tendency. During that time the world's wool supply gradually and steadily increased from 2,121,000,000 pounds in 1891 to 2,304,000,000 pounds in 1897, which was one cause of the continued low price of wool in this country.

In the United States sheep suffered in accordance with the depression of other industries, but not more so than some others. There was some falling off in the number of sheep in the United States at large, but it all occurred in the Eastern and Southern and Mississippi Valley Sates, where land had increased greatly in value since the war; where the population was becoming more dense; where pasturage was becoming scarcer; and where there was a diversification of interests, so that if one did not pay well, another might be tried. In 1897, at the end of the period of industrial depression, there were in the United States 34,700,000 head of sheep. In that year a protective duty was restored to wool. It did not, however, revive the industry in the older sections of the country, for there were in 1905, after eight years of as high protective duties as the industry had ever known, fewer sheep in the New Eng-

land, Middle Atlantic, North Central, and Southern States than at any time throughout the period when prices in the world's market were at the lowest level in years and wool was imported free of duty. Yet during those eight years farming in those sections was not on the decline. The production and price of nearly every farm product increased, but the number of sheep, on the other hand, steadily decreased.

In the far West, even during the industrial depression from 1894 to 1897, sheep held their own. In 1894 in the Rocky Mountain and Pacific Coast States and Territories there were 18,600,000 head of sheep, and in 1898 there were 19,300,000 head.

In the Rocky Mountain States, the chief woolgrowing section of the country, an advance took place even during that period of financial depression. Beginning with April 1, 1894, and ending April 1, 1897, there was a gain in the number of sheep in Idaho every year, and in Montana, Arizona, Nevada, Wyoming, and Colorado every year but one. All of those States and the one Territory mentioned ended the period of combined industrial depression and free wool with more sheep than they had at the beginning, a fact which can not but cause one to raise the question as to the necessity of the protective tariff for the woolgrowers of that section, the prime woolgrowing section of the country.

tion of the country.

In 1897 the duty on raw wool was restored, and ever since then wool and woolen goods have been highly protected articles, so much so that Schedule K has become scandalous. The restored duties on wool necessarily brought in their train the old system of high compensatory duties on woolens, the rich field of exploitation in which the woolen manufacturer revels, rejoices, and holds high carnival, while the people are fleeced. Again we find the bewildering combination of ad valorem duties for protection and specific duties to compensate for the increased cost of the raw material.

We now face the proposition of free raw wool. The woolgrowing industry has enjoyed a high and careful degree of protection for practically all of 97 years, 90 years out of the last
97 years. It is no longer an infant industry. For nearly 100
years it has been carefully nurtured by the Government at the
expense of the people. No change has been made during the
long period of protection which has enabled this country either
to produce all of its own wool or to obtain it at home as cheaply
as by importation. Even under nearly a century of protection
many qualities of wool can not be produced to advantage in the
United States, while others can not be grown at all. During all
of this era of protection the tax on the people has been heavy.
Protection has caused billions of dollars to be paid by the
masses of the people to the woolgrowers.

We should remember, too, that a tariff tax on an article like wool, which is produced at home, is not like a tariff tax on tea and coffee, which are not produced here. Every dollar of the tariff tax paid by the consumer on tea and coffee goes into the Treasury of the United States and is used for the purpose of defraying the expenses of the Government which gives to the taxpayer protection and security; and thus the taxpayer, through the benefits of government and organized society; through protection of person, life, property, home, and family, gets back, in a measure, the tax he has paid on his tea and coffee; but it should be remembered that every dollar of tax which the consumer pays on wool grown in this country or woolen goods manufactured in this country goes into private It should be remembered that six-sevenths money which a protective tariff costs goes into the pockets of individuals. Of every seven dollars which a protective tariff costs the people of this country only one dollar goes into the Treasury of the United States and six dollars go into the pockets of the privileged class which enjoys the benefits of protec-Thus six-sevenths of the benefits of protection at the expense of the common people accrue to the privileged class and only one-seventh goes to the Government.

Even after all of this protection, nearly a century of coddling and nursing, the wool-growing business in the United States is a decadent business. Not only does it not hold its own, but it is positively on the decline. In 1900 there were in the United States 61,503,713 head of sheep; in 1910 there were only 52,447,861 head, and the number is still declining year by year. Importations of wool, however, are vastly increasing. Our woolen manufacturers are importing two-fifths of their consumption. In 1900 there were imported into this country 155,920,455 pounds of all classes of wool. In 1910 the total importation of all classes of wool amounted to 263,928,232 pounds. The production of wool in this country, however, is less now than it once was. If the business under a high degree of protection not only does not hold its own but is on the down grade, are we longer to stimulate it, at the expense of rifling the pock-

ets of the hard-working masses, in a vain effort to keep it up? A business which can not hold its own under a high protective tariff should be thrown upon its own resources.

I do not believe that free raw wool would stop the growing of wool in this country nor put the woolgrowers out of business nor extinguish the industry. We have the land, the soil, the climate, the rain, the water, the sunshine, and we ought to be able to compete with the world in growing wool. The United States, with the exception of dark and tyrannical Russia, is the only civilized country in the world which maintains or ever has maintained a duty on raw wool. There is no reason why it should continue to do so. Wool has become a necessity of life, and I believe in putting on the free list the necessities of life, so as to put them within the reach of the great masses of our toiling and struggling people. The masses of the people are entitled to have necessities of life on the free list.

Every man, woman, and child in the United States, especially in the northern part of our country, where the winters are rigorous, is entitled to wear woolen clothes. There wool is not only one of the comforts but it is one of the necessities of life. Every man who works; every tradesman, artisan, mechanic, miner, professional man, farmer, laborer; every woman, every child is entitled to wear woolen clothes in the winter season for protection from the rigors of the season; from the cold blasts of the winter's storm and the penetrating chill of the wintry winds and the dampness of the foggy weather; from the rain and sleet and snow. All of them are entitled to sleep under woolen blankets and to have woolen carpets on the floor to protect them from deadly pneumonia, coughs, colds, and all forms of sickness which impair the working efficiency of people, depreciate their earning capacity, and entail heavy expenses in the way of doctors' bills, and even take away the wage earner, the breadwinner, or some other member of the family and leave the family crippled and bereaved. The time has passed in this country when the comforts of life may be confined to the favored We should legislate and conduct our Government for the benefit of humanity; the protection, welfare, comfort, life, health, existence of all human beings, rich and poor, high and low. We are all human beings and all are entitled to wear and use wool. If it can not be produced in sufficient quantities or cheaply enough here, let us get more of it from abroad.

Undoubtedly a tariff tax on wool must normally cause the price of all wool that is imported to rise to the full extent of the duty. Moreover, the duty presumably causes the wool grown at home, of the same grades as that imported, to rise in price to the full extent of the tax. It is clear that if foreign wool be imported a rise in the price of domestic wool must take place, since wool would not be imported unless the price here were higher than the price abroad.

If wool can be grown abroad more cheaply than in this country, then a tariff duty must increase the cost of imported wool to us and necessarily increase, to some extent, the cost of home-If wool can not be grown abroad more cheaply than here, then the tariff does no good to the woolgrower of this country and should be removed as a snare and delusion.

However, it does cause wool to cost us more, and, the wool supply of the world always being short, it has caused a great many people in this country, and in the northern section of our country, too, to use cotton, shoddy, mungo, waste, and mixed goods, instead of wool, when they ought to have been using pure woolen goods; and often when they pay for pure woolen goods they get the mixed, adulterated, fraudulent goods. The pro-tection on wool has driven many people away from the use of wool and has caused many people to pay for and think they were getting wool when they were not. It has caused manufacturers to deceive the people, to put waste and shoddy and mungo and cotton into cloth and sell it for woolen goods when the goods were not woolen goods. In this way the imposition and fraud practiced on the American people have been enormous.

Free raw wool should cause a vastly increased use of wool. People who can not now afford to wear wool would then buy it and wear it. If free raw wool would reduce the price of wool, the people have been paying a bounty for it for nearly 100 years and are entitled to relief. If it would not reduce the price of wool, then no harm could come from putting it on the free list. In any event, if put on the free list, it would stand on its own merits and be governed in the regulation of the price thereof by honest and natural laws of production and consumption, supply and demand, and not by an artificial stimulant.

There is one benefit from free raw wool that is absolutely certain and can not be gainsaid by anyone. The woolen manufacturers of this country have reveled ever since 1861 under enormously high protective duties and many of them have

but they have worked to the uttermost the compensatory duty, on the ground that raw wool is protected and the cost thereof to them is thereby increased. They have demanded and received a compensatory duty in addition to their own act property of the This compensatory duty is one of the greatest evils of the woolen trade. It starts with the manufacturer, who has the compensatory duty in addition to their own net protection. benefit of the compensatory duty, and goes on through the channels of trade to the wholesaler, the retailer, and the tailor, each of whom must be compensated in turn, and the consumer pays the penalty in the end. Thus the ordinary cloth in a man's woolen suit pays a protective duty of 55 per cent ad valorem and a further compensatory duty of 44 cents per pound. It is manifest that free raw wool would at least remove this compensatory duty. If the price of raw wool should not fall a particle on account of being on the free list, the consumer would at least be rid of this compensatory tax, which begins with the manufacturer and goes down the line, through the channels of trade, to the consumer. He would at least benefit to that extent, and in the aggregate that means vast sums of money each year. Because of this compensatory duty, the total payments at our customhouses last year on the better classes of cloths amounted to 94 per cent of their value; on the cheaper classes, 150 per cent of their value.

The natural laws of production and consumption, supply and demand, would cause wool to be grown in this country. not enough wool grown in the world to supply the need of and the demand for wool. The world's supply of wool would only give to each person in the temperate zones of the world, exclusive of all tropical and semitropical sections where wool is not needed, a very light and scant suit of woolen outer clothing once in three and one-half years, if the entire wool supply of the world were devoted to that purpose and none thereof were made into underclothing, hats, blankets, or carpets. We all know that a suit of woolen clothes, if worn steadily, will not last more than a year. So there is a scarcity of wool in the world, and as long as that scarcity exists there will be a demand for wool, and it will be grown in this country and grown at a reasonable profit, and that is all to which any woolgrower is entitled. Does anyone think that, with that scarcity of wool in the world, the people of this country will quit growing wool? Why should they quit growing it and let all the wool that we need be shipped in from other countries that do grow it? Suppose it can be purchased more cheaply in South America and Australasia than here and all of our supply should be brought from those countries; then that much less would go from those countries to northern Europe, Siberia, Canada, and other parts of the world where they have to have woolen clothes, and our wool would find a market in those places. Our wool is bound to flow somewhere and be consumed somewhere, so long as there is a scarcity of wool in the world, and what difference does it make to us whether our woolgrowers sell their wool in this country or in some other country? The price of wool naturally will reach a world level as long as there is a demand for wool and a scarcity of wool all over the world. It is just like the waters of the world; they seek a common level. If the price of wool in this country is to be dammed up and bolstered up by artificial and restraining means, the people must pay the price; but why should they pay it? If some profit by it, many lose.

If this country can not compete with the world in woolgrowing after nearly a century of protection, then it had better go out of the business; but I claim that it can. Manifestly, all countries can not produce any particular product at precisely the same cost, but that does not keep the section where the cost is higher from producing it. The fact that wheat is more profitable in California than in New England does not keep it from being grown in New England. The fact that cotton may be produced for less in Mississippi than in Oklahoma does not keep it from being grown in Oklahoma. Such result will not be the case so long as there is a demand for all of those products produced and a need for all thereof. People will have what they need, and they will pay the price necessary to get it. If there needs to be wool grown in this country, it will be grown here and will bring a price that will justify the growing of it.

The cry that labor is higher in this country and that we must keep up the wages of our laborers can have but scant application to woolgrowing. There is comparatively little labor connected with woolgrowing. The land, the grass, the rain, the sunshine, and the Almighty do the most of it. The sheep ranch does not require a large number of employees and a great pay roll. On the plains of the West one sheep herder and a couple of shepherd dogs generally can take care of two or three thousand sheep. In the old and thickly settled States sheep are kept by farmers, as a side product for both mutton and wool, in become millionaires and American lords. During all of that small numbers, and require no herding at all. They simply run time they have not only enjoyed protection of their products in the pasture of the farmer. When it comes to sheep shearing,

machines are now in use for that purpose, and but little hand

labor is required.

Commercial woolgrowing on a large scale on the plains of the far West is rapidly becoming a thing of the past. Wool will always be grown there, but in a few years more it will be grown there as it is grown in the old and thickly settled States of the East. Many farmers will have small flocks of sheep which they will keep as a by-product for mutton and wool. Sheep will be kept more for mutton than for wool. Already more than one-half of the profits from sheep in the United States come from sales of sheep for mutton; less than half from sales of wool. Thus wool is now a by-product of sheep.

The farmer's sheep will be only one of his diversified prod-ucts. He will not be wholly dependent upon them. The sheep will graze on the waste lands not fit to put to crop, and in the gulches, and on the mountain sides, and will live on grass and herbs that would be wasted otherwise. In my own State the man with the hoe, with the plow-the homesteader, the farmeris rapidly restricting the large sheepman. Montana is settling up with a population of sturdy farmers who cultivate the lands and get more profit from the crops on 1 acre of land than the large sheepman derived from 10 acres by running sheep on them. The State is thus acquiring more population, producing more products, growing more crops, bringing in more revenue, supporting more people, feeding more mouths, and making more business than ever before. Montana has become the seventh wheat-growing State of the Union.

At the annual meeting last spring of the Montana Woolgrowers' Association the president of the association in his annual address predicted that it would be the last meeting of the asso-I read an article clipped from one of the daily papers

of the State:

MILES CITY, MONT., April 14.

"Encroachment of the homesteader and the farmer on the free stock ranges of Montana is driving the sheep-raising industry out of this State was the statement made by President Hammond, of the Montana Woolgrowers' Association, which opened its twenty-seventh annual session here to-day. Mr. Hammond, in his address to the association, predicted that this would be the last session of that organization."

Of course, there will always be sheep in Montana; there will always be wool produced there. Montana is one of the best sections of this country for the growing of wool, and can grow it as cheaply as any section of the United States. It is the principal woolgrowing State in the Union, having more sheep than any

The sheepmen, themselves, in Montana are divided on free raw wool and the effect it will have on prices. Hon. William Lindsay, one of the leading Republicans of Montana, at present United States marshal for the district of Montana, who has been one of the most extensive woolgrowers in Montana, has no fear of free wool. The following interview by him was published all over the State last spring. I read it:

BUTTE, April 12.

"Wool prices have been on a free-wool basis for the last three years, even though we have had a tariff, and for this reason I do not believe prices are going to drop when the tariff is removed," said United States Marshal Lindsay to-day.

Mr. Lindsay, who is one of the largest woolgrowers in the State, continued:

Mr. Lindsay, who is one of the largest woolgrowers in the State, continued:

"The condition of the trade, the condition of the wool clip, and the decreased number of sheep in the country all make me believe we will not have any cheaper wool than what it has been for three years. The wool lofts in the East are empty, the manufacturing plants are pretty well employed, and there is absolutely no reason why prices should go lower even with free wool.

"It should not be forgotten that everyone looked for cheaper raw hides when the tariff was removed. Instead, the price of hides advanced and so did the price of shoes."

From a Montana paper which reached me this morning I have clipped another statement by the same gentleman, Hon. William Lindsay, who is looked upon by many in Montana as a leading authority on the wool industry and the wool question. I read his latest utterance:

HELENA, July 30.

Eastern wool buyers have hammered the price of wool below what it should be on a free-wool basis, in the opinion of United States Marshal William Lindsay, who returned from eastern Montana last night. He looks for the market to recover later in the season about 2 cents. "The average price of wool in Montana this year was from 16 to 17 cents, about 4 cents less than the average last year," said Mr. Lindsay. "The certainty of the passage of the free-wool bill enabled the buyers to hammer the price down that much, but in my judgment this is below a free-wool basis, and I look to see much of the wool that has been consigned east bring from 18 to 20 cents."

Hon. J. M. Darroch, one of the most extensive woolgrowers of the State, sees no dire results in free wool. Last spring he was quoted in all of the newspapers of the State as follows:

LIVINGSTON, Man 25.

State Senator J. M. Darroch was in town to-day from his ranch and reports a most successful lambing season. He is one of the largest sheep

raisers in the State and is for free wool. Speaking of the tariff, the senator said:

"With the policies inaugurated by the Democracy being carried out, I predict that in two years the woolgrower will be receiving a higher price for his product than ever before. However, I shall be glad when the Democratic administration completes its proposed revision and a permanent basis is reached as relates to the wool-growing industry.

"During the 12 years that I have been engaged in the sheep business we have annually had this question of tariff to contend with, the continuous agitation on the subject being made the most of by the eastern wool houses. If, however, a final and permanent adjustment of the tariff can be secured, we will then be able to figure out just where we are at."

I have received a number of letters from prominent woolgrowers of Montana, who advocate free raw wool and say they are ready for it and not afraid of it. I quote from one letter written to me by a prominent woolgrower of Montana, who is known all over the State:

known all over the State;

"I know the sentiment of the people of this State pretty well, and I know that they are in favor of and are in fact demanding that our Representatives in Congress should carry out our party pledges and relieve the people from paying tribute to a few sheepmen and sugarbeet men in this State and the eastern manufacturers and the great trusts throughout the country.

"The people of this State are overwhelmingly in favor of free wool and free sugar. There are probably 300 or 400 men in this State who are woolgrowers. On the other hand, there are about 450,000 other people who are not interested in the wool business who are opposed to a wool tariff, and they are opposed to any law which forces them to pay tribute to a few sheepmen or sugar-beet men for no other purpose than to enrich a few at the expense of the many.

"The principles of our party have always been that laws should be passed which are beneficial to the masses; that is, which benefit many people instead of enriching a few."

Another woolman in Montana recently wrote me.

Another woolman in Montana recently wrote me:

"I own sheep and I am a woolgrower. I have been a woolman for many years, but I am a Democrat before I am a woolman. I do not put my own interests first and foremost. I believe some regard should be paid to the welfare of the country and to principle. The people of this country are expecting the Democratic Party to give them free wool and sugar, and I want to see this Congress and our President do it. I do not believe that free wool will put the woolmen out of business. I am willing to take my chances."

Thus some of Montana's woolgrowers think free raw wool will not reduce the price of wool; others think it will, but think it ought to be reduced. The people do not know which is correct, but only ask for the free wool. One thing is certain: with free raw wool the man who buys woolen clothes will not have to pay the manufacturer's compensatory duty; he will save that.

Mr. SMOOT. Mr. President-

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Utah?

Mr. MYERS. With pleasure.

Mr. SMOOT. I may have misunderstood the Senator, but I will ask him the question: Did I understand the Senator to say that the reason he was in favor of free raw wool was because it was a necessity?

Mr. MYERS. That is one of my reasons. Mr. SMOOT. Does the Senator know of a man, woman, or child that eats raw wool or wears raw wool?

Mr. MYERS. No; I do not.

Mr. SMOOT. Then, Mr. President, the Senator ought to have stated that clothing being a necessity, he is in favor of free clothing and free cloth, rather than free wool; but the Senator is not going to vote for that. He is going to vote to put on the free list a product that is raised in his State, and he is going to vote for a duty on cloth, which the people are compelled to wear. That is the position of the Senator.

Mr. MYERS. A duty reduced about 66 per cent, on an

average, I understand.

Mr. SMOOT. All the duty on the product of raw wool is removed. There is no percentage at all retained. It is all removed

I will say to the Senator from Utah that I can not see that the fact that people can not eat wool keeps it from being raw material, or keeps it from being a necessity of life. Neither do people eat wheat; neither do they eat pig iron; but those things are necessities to existence under the civilization of our day.

Mr. President, people can eat wheat, as far as Mr. SMOOT.

that is concerned, but-

Mr. MYERS. In the raw state? They may in Utah, but they

do not in Montana. [Laughter.]

Mr. SMOOT. No; they do in Montana. But be that as it may, I wanted to call the Senator's attention to the inconsistency of his position. He said that the reason he believed in free raw wool was because it is a necessity. I state now that free raw wool as such is not a necessity, but clothing made from raw wool is a necessity and the Senator is not going to vote for free clothing. That is the position in which the Senator will find himself before the people of his State.

Mr. MYERS. That is only one of many things about which the Senator from Utah and I conscientiously differ. I must say with all due deference to the Senator from Utah that I consider it a compliment for him to say that he considers my position inconsistent, because if it were consistent from his standpoint I should be fearful of the Democracy of it.

It was the statement that was inconsistent. As far as the Senator's position is concerned, of course I recognize the fact that he has a perfect right to take any position, and that he is perfectly honest in that position.

the question involved at all.

Mr. SIMMONS. Mr. President-

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from North Carolina?

Mr. MYERS. With pleasure. Mr. SIMMONS. I will ask the Senator from Utah if he did not vote for free hides?

Mr. SMOOT. No, Mr. President; I did not vote for free

Mr. SIMMONS. I will ask the Senator if his party did not

put hides on the free list?

Mr. SMOOT. No, Mr. President. If the Senator will examine the vote by which hides were put upon the free list, I think he will find that a majority of the votes were votes cast by Demo-

Mr. SIMMONS. I ask the Senator if a majority of the Senators on the Republican side did not vote for free hides?

Mr. SMOOT. No; a majority of the Senators on the Republican side voted against free hides.

Mr. SIMMONS. How was the final vote on the bill? Mr. SMOOT. The final vote on the passage of the bill?

Mr. SIMMONS.

Mr. SIMMONS. Yes. Mr. SMOOT. Oh, there was a great majority of Republicans

voting for the final passage of the bill.

Mr. SIMMONS. Does the Senator say a majority of the Republicans voted against free hides?

Mr. SMOOT. I do.

Mr. SIMMONS. I think the Senator is mistaken.

Mr. SMOOT. Very well. I do not say so positively, Mr. President. I have not looked it up lately; but, as I remember, a majority of the Republican Party voted against free hides.

Mr. SIMMONS. I am just as confident that a majority voted for free hides.

Mr. WARREN. The item placing a duty on hides went through the Senate with a very large majority. It went out in conference

Mr. SIMMONS. How did it get into the bill if it went out

in conference?

Mr. WARREN. We put a duty on hides in the Senate. It was left out in the House.

Mr. SIMMONS. Are not hides on the free list now?

Mr. WARREN. Hides were finally put on the free list in the conference of the House and Senate; but the Senate put the item in the bill.

At the time hides were put on the free list Mr. SIMMONS. did not the Republican Party have a majority in both branches of Congress and did we not have a Republican President?

Mr. WARREN. Yes; but that does not show that they voted as a party for free hides. It simply shows that just enough of

them voted with the Democrats to put hides on the free list; that is all

Mr. SIMMONS. Did not the Republicans have a majority in the conference committee by which the item putting hides on the free list was retained in the bill?

Mr. WARREN. It was not that way. Mr. SIMMONS. How did it happen, if the Democrats were in the minority in both the House and the Senate, that they were in the majority in the conference committee?

Mr. WARREN. As I explained before, so far as the Republicans were concerned, just enough of the Republican Members of the Senate voted with the Democrats to put hides finally on That is the way the item got there.

Mr. SIMMONS. Does the Senator now deny that a majority

of the Republicans in the Senate voted for free hides? Mr. SMOOT. I have the vote on free hides now, and I am glad to call it to the Senator's attention and give him the names of those that voted fo: and against the provision. Then he can see just who they were.

Mr. SIMMONS. Just give us the number.

Mr. SMOOT. The number was, yeas 26, nays 48, not voting 18. Those who voted yea were: Messrs. Bacon, Bailey, Bristow, Chamberlain, Clapp, Clay, Crawford, Culberson, Cummins, Daniel, Davis, Fletcher, Gore, Johnston of Alabama, La Follette, McLaurin, Martin, Money, Overman, Owen, Shively, Simmons, overwhelming majority of the Democrats of Montana in favor

Smith of Maryland, Stone, Taliaferro, and Tillman. Those are

the 26 who voted "yea."

The 48 who voted "nay" were: Messrs. Aldrich, Beveridge, Borah, Bradley, Brandegee, Brown, Bulkeley, Burkett, Burnham, Burrows, Burton, Carter, Clark of Wyoming, Crane, Cullom, Curtis, Dick, Dillingham, Dixon, Dolliver, du Pont, Elkins, Flint, Frye, Gallinger, Gamble, Hale, Heyburn, Johnson of North Dakota, Jones, Lodge, Lorimer, McCumber, McEnery, Nelson, Nixon, Oliver, Page, Penrose, Piles, Root, Scott, Smith of Michigan, Smoot, Sutherland, Warner, Warren, and Wetmore.

Mr. SIMMONS. Then what does the Senator say about the

House? That was Republican, was it not?

Mr. SMOOT. I have not here the vote in the House.

Mr. SIMMONS. I understand the Senator is now making the point that the minority could control the matter in the Senate. What does he say about the House? Did the minority control it in the House? If not, how did the item get into the bill?

Mr. SMOOT. The Senator from Wyoming [Mr. WARREN]

told the Senator how it got into the bill; and more than likely it is the same way some other things will get into this bill that

the Democrats are going to vote for finally.

Mr. SIMMONS. Then how did it pass, if there was a Republican majority in both Houses, and a Republican majority the conference committee? The bill passed the House and the Senate, and was agreed upon by the conference committee, and was signed by a Republican President, and yet the Senator says the Republican Party has not responsibility for it. that happen?

Mr. SMOOT. Mr. President, the Senator knows very well that in conferences changes are made, and under our rules we can not vote specifically upon the individual items of a conference report. When the bill passed it was passed as a whole, and when it was signed by the President of the United States it had to be signed as a whole or not signed at all. The Senator

knows that

Mr. SIMMONS. I thought everybody knew that. Yet the fact remains that the bill was passed in both branches, which were both Republican, and was signed by a Republican President.

Mr. SMOOT. Yes; and a good many of the items, such as lumber, for instance, the Senator from North Carolina helped

us to pass.

Mr. WARREN. The item of retaining a duty on hides finally failed of enactment because we did not, in those days, have the kind of party caucus that dragoons men against their will and wish and good judgment into voting with their party. That is why it finally failed.

Mr. MYERS. Mr. President, I will now claim the floor again and proceed. I will digress long enough to say, in regard to the remark of the Senator from Utah about woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures being still on the dutiable list, that I think woolen manufactures are the still of the st factures are like a drug fiend—they have been heavily protected so long that if the "dope" be withdrawn all at once they will I do not believe raw wool is in that position, howcollapse. ever. It has not secured as much of the benefit of protection

as the manufactures of wool have.

Mr. SMOOT. So it is the mercy shown by the Senator to a drug fiend that compels him to vote for a duty upon woolen

Mr. MYERS. We have no desire to see any legitimate industry collapse if we think putting it on the free list would make it collapse. I do not believe it would make raw wool collapse.

Mr. SMOOT. Then, why does the Senator say that woolen manufacture is a legitimate business, and in almost the same breath compare it to a drug fiend?

Mr. MYERS. Solely by way of illustration; that is all. There are woolmen in other States, I learn, who have the same opinion of the effect of free raw wool on the price of wool as some of the Montana woolmen whom I have quoted. I read an item which appeared in a Colorado morning paper on the 18th day of last month:

COKEVILLE, WYO., July 18. "Local sheepmen who declined early offers of 12 and 13 cents per pound for their wool are now selling the clips at from 15½ to 16% cents. The clips of Rathbun Bros. and F. J. Downey brought 15½ cents; Salmon Bros., 15% cents; Bermion Bros., 16% cents; N. P. Nelson, George Murdock, Fred Stoffers, and Fred Roberts, 16% cents."

The wool buyers seem to have undertaken the same program in Wyoming that the Hon. William Lindsay charges they under-

took and partially carried out in Montana.

The woolmen are not by any means unanimous in demanding a continuation of the protective tariff on wool or in declaring it necessary. As for the people, for one woolgrowing State and the leading one, I confidently assert that not only are an of free wool, but that a majority of all of the people of Montana, of all political parties, are in favor of free wool. I have received hundreds of letters and telegrams from people of all political parties in Montana, declaring in favor of free wool. I have received such letters from Democrats, Progressives, and Republicans. A prominent Democrat in one of the principal counties of Montana writes:

"I am quite sure that there are not as many as one-tenth of 1 per cent of the people in this county who favor anything but free wool."

That is only a sample of a great many such letters received. The people of Montana are not wailing about being discriminated against by the free-wool clause of the pending tariff bill. There are 500,000 people in Montana. I do not believe that there are more than 1,000 men in the State who are commercially engaged in the woolgrowing business. I do not believe there are that many. Some put the number at 500; others put it at 300. To be more than liberal, I will allow 1,000. I do not believe that their families and employees, together with the woolgrowers, all told amount to as many as 5,000 people; but I will put the estimate at that liberal figure. That leaves in Montana 495,000 people who are not interested in woolgrowing. Let no one deceive himself into believing that these 495,000 people in Montana, who do not grow wool, nor any considerable portion of them, are moaning, groaning, bewailing, and shedding tears of agonizing grief because in these times of high cost of living they are to be denied the precious privilege, so dear to their hearts, of being further taxed, on top of the burdens of taxation under which they are already struggling, for the benefit of a mere handful of sheepmen who long have been favored by the Government at the expense of the people. Do not believe for a minute that these people who do not grow wool are clamoring for the privilege of an increase in taxation for the benefit of a few woolgrowers. They are not up in arms, giving expression in angry tones to their indignation because the priceless, inherent, constitutional privilege of being further taxed for a few woolgrowers is about to be ruthlessly taken away from them by the brutal and unfeeling Democratic Party.

Go amongst the railroad men-the engineers, brakemen, conductors, yardmen, section men-of Montana; go amongst the farmers, merchants, miners, tradesmen, artisans, mechanics, professional men of Montana, and you will not find them tearing their hair and rending their clothes in a frantic effort to continue to be taxed for the benefit of the woolgrowers. Take, for instance, the miners of Butte, the smelter men of Anaconda and Great Falls, in my State, who get \$3.50 a day for their hard, unwholesome labor, out of which daily wage of \$3.50 they have to pay rent-or taxes and repairs if so fortunate as to own their little homes-out of which they have to buy shoes for themselves, their wives, and little ones; out of which they have to buy underclothing and outer garments, hats, bedclothes, furnishings, and food; out of which they have to pay doctor bills, arug bills, dental bills, and undertakers' bills when death ruthlessly invades family circles; who are entitled to wear woolen clothes in order to protect their bodies, their health, and their physical well-being and keep them strong for work in that rigorous climate; who are entitled to supply their children with woolen clothes to protect their little bodies from cold and exposure and illness as they go to school or do the family errands; who are entitled to sleep under woolen blankets, for warmth, comfort, and health: do you think those men are clamoring, in these times of high cost of living, for the sweet privilege of paying a further tax out of their little wage earnings of \$3.50 a day in order that woolgrowers may lay up still further profits? Do you hear the echo of their agonizing groans because they are to be denied this precious privilege, one of the sweetest of life, that of paying out money to enrich the favored few? Do you hear their indignant denunciations of the traitorous Democratic Party, which is robbing them of one of the sweetest pleasures of their lives?

Do not believe for a second that the laboring men, farmers, merchants, mechanics, artisans, tradesmen of Montana or of this country are raising a cry about being denied the precious privilege of paying a bounty to the woolgrowers and the woolen manufacturers, the latter of whom revel in their millions and live in luxury in their palaces, for which the people have paid out of their hard-earned dollars.

Mr. GALLINGER. Mr. President—
The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from New Hampshire?

Mr. MYERS. With pleasure.

Mr. GALLINGER. As I remember, under the so-called Wilson-Gorman bill wool was on the free list, and manufactures of wool were made dutiable at about 48 per cent ad valorem. Under this bill wool is on the free list, and I think the ad valorem on manufactures of wool is about 35 per cent. Does

the Senator recall the fact that under the former bill the woolen industry went to the bad, and has the Senator any information that leads him to the conclusion that the laboring people got the woolen product much cheaper than they had been getting it?

Mr. MYERS. I think the Senator from New Hampshire must have been out of the Chamber when I reviewed the panic of 1893, which supplanted the bloody shirt in the Republican Party.

Mr. GALLINGER. If the Senator has discussed it already I will not ask him to make an answer now. I will look over his speech.

Mr. MYERS. I went over that subject. I simply said, in brief, that there was a depression all over the country at that

Mr. GALLINGER. There was.

Mr. MYERS. And wool suffered no less and no more than any other industry

Mr. GALLINGER. The importations of woolen goods increased about 300 per cent, I believe, under a 48 per cent ad valorem duty, and now it is proposed to reduce the duty to 35

per cent. What will happen to us under a law of that kind?
Mr. MYERS. There was general business depression during
the years from 1893 to 1897, not only in the United States but all over the world; and the woolen industry was not the only one that suffered.

Mr. GALLINGER. It did not seem to depress the importa-

tions of woolen goods.

Mr. SMOOT. And, Mr. President, it did not depress the woolen business in England. I can show the Senator statements by the hundreds showing that the woolen industry in England, in the years 1895 and 1896, was more prosperous than at any previous time in the history of the country.

Mr. MYERS. England is a free-trade country, is it not? There is no duty on wool or woolen manufactures there, is

there?

Mr. SMOOT. No: there is no duty.

Mr. MYERS.

And yet they were prosperous. But the Senator gave as a reason why the Mr. SMOOT woolen business of this country went to the bad that there was a depression all over the world, whereas the years 1895 and 1896, in the woolen industry, in Huddersfield, England, and the manufacturing districts of England, were the most prosperous years in all the history of the country.

Mr. MARTINE of New Jersey. That was under a free-trade

régime, was it not?

Mr. SMOOT. They have been under a free-trade régime ever since, and before that they were under a free-trade régime. The fact of the matter is that they manufactured woolen goods for the American market. It is exactly as the Senator from New Hampshire [Mr. Gallinger] has said; the importations of woolen goods into this country increased over 300 per cent. No matter how poor the people were, or what the cause of the hard times was, what I have said is the absolute truth.

Mr. MYERS. Mr. President, the people here must have been

fairly well off during that time, because they had to make money to buy these goods. England did not give them away.

Mr. SMOOT. While the importations from England increased 300 per cent, the decrease of goods made here was many times more in dollars and cents.

Mr. MYERS. I am very glad to have the contribution of the Senator from Utah to arguments in favor of free trade in wool and woolen goods by citing England, a free-trade country, as a most prosperous country where that industry flourishes. glad to have the information.

I am not against the woolgrowers. I have no denunciation for them. I do not wish to destroy their business. They have my good will. They are estimable gentlemen, and many of them in my State are my friends, but I do want them to stand on the same plane as other people in my State. I do not want them to continue to enjoy special privileges at the expense of the masses of the people. I do not believe it is just to tax the 195,000 people of Montana, who do not grow wool but who use it, for the benefit of the 5,000 who are interested in the industry of woolgrowing, either as owners or members of their families or as

employees. I see no justice in that. Mr. SMOOT. Mr. President—

The VICE PRESIDENT. Does the Senator from Montana again yield to the Senator from Utah?

Mr. MYERS. With pleasure.

Mr. SMOOT. The Senator says he does not believe in taxing the 495,000 people of his State who do not raise wool in order to benefit the 5,000 engaged in raising wool. I will ask the Senator how many people in his State are engaged in the manufacture of woolen goods?

Mr. MYERS. I do not know of any.

Mr. SMOOT. I will say to the Senator that there are none that I know of.

None; that is correct; and we have none to Mr. MYERS. protect. We have been protecting those of other States.

Mr. SMOOT. The Senator stands upon the floor and says he is not willing to tax the 495,000 people of his State who do not raise wool to benefit the 5,000 in his State who do raise wool; but he will immediately vote to tax the clothing of the 500,000 people of his State when there is not a single, solitary institution in his State that is making clothing or woolen cloth.

Mr. MYERS. That, of course, is virtually the question that I have been expecting, as to why I favor free raw wool and shall vote for a duty, a very much reduced duty, on woolen clothes. I will not go extensively into that. I might have to make as long a speech as I have prepared on free raw wool.

I will simply say, in a nutshell, that, as is known to everybody, we can not abolish all tariff revenues in this country unless we would raise the whole revenue by an income tax on wealth, and that would be class legislation and undemocratic. I do not believe in putting taxation wholly on any one class of people.

As I understand from the Senators on the Finance Committee, the duty on woolen manufactures has been reduced about 66 per cent. Here is another thing that we meet. As the Senator from Utah knows a great deal better than I do, the production of cloth takes more employment, more machinery, more investment, a larger pay roll, and more handling through the different grades of manufacture than does raw wool. Therefore there is some plausibility in the theory that the manufactured product should still have some degree of duty when raw wool goes on the free list.

That is about all I care to say on that point at this time. Heretofore some of Montana's Members of Congress have continually reported to their constituents that they had to vote for protection on this, that, and the other article, on nearly everything that is produced, in order to get protection on wool. Everything, every interest, every man's pocketbook, was sacrificed for wool. The 495,000 people of Montana who do not grow wool are tired of being made a football for the wishes and interests of the few woolgrowers. The people of Montana are tired of being bandied about from pillar to post, from taxation to extortion, for the sake of the wool industry. They have heard enough of that and they are weary of it. I simply stand They have on the good old Jeffersonian Democratic doctrine of "The greatest good to the greatest number." It is good enough for me and it ought to be good enough for anybody. It certainly ought to be good enough for the people. It is the fundamental principle of Democracy. It is the fundamental principle of a republican form of Government. It is the handmaid of that other Democratic principle, "The rule of the people," and that is the meaning of the word Democrat, derived from two Greek words meaning "the people rule." Democracy means the rule of the people; but unless the laws are made for the greatest good to the greatest number, it is not the people who rule, but the privileged classes.

The people of this country rebelled from Great Britain on account of special privileges. The colonists severed their relations with Great Britain on account of class privileges. The colonies declared their independence on account of special privileges given to favorites, at the expense of the many by the royal ruling powers of Great Britain. Unjust taxation and royal ruling powers of Great Britain. Unjust taxation and royal prerogatives, at the expense of the burdened colonists, brought on the Revolutionary War and established the independence of this country, the government of which is based on the trio of fundamental maxims: "The greatest good to the greatest number," "The rule of the people," "Equal rights to all and special privileges to none." If we are to have a royal class of people in this country who are to be considered. class of people in this country, who are to have special favors, for whose benefit the masses are to be taxed, who are to have privileges not enjoyed by all, then we have gained nothing by establishing this Government, and we have not achieved our We might as well be under the royal rule of independence. England as to be under the royal rule of protected interests in

In legislating I believe in giving some consideration to the masses of the struggling, toiling common people; the men who earn their daily bread by the sweat of their faces; the people who are struggling ander the heat and burden of the day; the people who pay the taxes of the country and contribute the revenue with which to support the Government; the people who are the mainstay of the country in times of peace and in times of war; the people who pay the taxes during times of peace and do the fighting during times of war. I believe in doing some legislating for the poor man who finds it hard to buy shoes, clothing, and food for his little ones; who finds it hard to give

his children an education; who finds it hard to buy his wife a nice Sunday dress; who finds it hard to pay doctor's, druggist's, and undertaker's bills: for the men who work the mines, smelters, railroads, factories, shops, and farms; the men who conduct the farms and stores of the country; the men who build the city houses of mortar and brick; the men who pave the streets and construct the improvements of the country. are not becoming rich through special privilege. We can not do without them. They have not had the consideration to which they are entitled. They are the ones who will be benefited by free raw wool.

History, I believe, proves that the woolgrowing industry is not a proper industry for any degree of protection. It is not an infant industry. The long protection it has received has not answered the purpose that advocates of protection for infant industries claim as legitimate ground for protection. it need protection? Woolgrowers are divided on that point. believe the history of the country and a survey of the world's wool supply, showing an excess of demand over supply, show that it does not. Do we need the revenue? Fortunately, we will hereafter have an adequate income-tax law by which the accumulators of great wealth, the Morgans and the Rockefellers and men of that class, will pay their just and due propor-

tion of taxes, which they have never done.

Those who have accumulated swollen fortunes by virtue of favoritism in legislation and who have been the recipients of special favors at the hands of the Government will now be required to pay in proportion to their means and thus relieve us of putting the preponderance of taxation on those least able to bear it. We can well dispense with the revenue we have heretofore received from the tariff on raw wool. Undoubtedly the Democratic House of Representatives of the Sixty-second Congress would have passed a measure putting wool on the free list had it not been we could not then dispense with the revenue. That condition no longer exists. Then, is a tariff duty on raw wool any longer justifiable? According to my way of thinking it is not, from any viewpoint; certainly not on the plea of protecting an infant industry; not on the ground that it needs protection; not on the ground that we need revenue; not on any Shall we protect sheep or people? For nearly 100 years sheep and their product have been protected and they are decreasing in number. I believe in giving some protection to the toiling masses of the people in the struggle of life.

The bill we are about to enact into law will be one of the greatest triumphs of the Democratic Party in its long and unending fight for the masses of the people against class distinction, for the rule of the people, for the greatest good to the greatest number, for equal rights to all and special privileges to none; it will be a triumph of the present administration and a vindication of the confidence placed in it by the people of this country, and it will declare in tones that will reverberate from Maine to California, from Washington to Florida, that the people do rule, that the spirit of seventy-six is not dead and can

never die so long as Democracy lives.

Mr. WARREN. Mr. President, I have listened with great interest to the very able free-wool speech of the Senator from Montana. I have observed carefully his argument in favor of taxing the 500,000 people of Montana to afford protection through a so-called revenue tariff for the wool manufacturers of the East rather than to give some limited protection in a revenue tariff to some of his own Montana citizens engaged in woolgrowing.

I was not present in the Senate on Friday or Saturday when, I am informed, a very able wool speech was made by the junior Senator from Montana [Mr. WALSH]. I hope to see it soon in print. I have read only what the newspapers contained about I observe in the newspaper report that that Senator took the ground that with free wool we would have better clothing, and he spoke very contemptuously of shoddy and other adulterants. I notice the same vein in the speech of the senior Senator

I am not going to take the time now; I shall perhaps have a few remarks to make at some later date upon this subject, but in the meantime I should like to put a question to the Senator from Montana to answer now or at some future time. In what way do they expect to help the wearers of clothing to obtain better clothing and not be subjected to the cheats and frauds of shoddy when they take off the tariff on shoddy and make it free?—this in the light of the fact that when they before made wool free and shoddy free in the Wilson-Gorman bill the shoddy imports increased 1,700 per cent and the shoddy cheap clothing which then flooded this country was a curse and a sorrow, and one of the scandals of that period that we shall always remember.

Now, it is proposed to make wool free so that we shall not of necessity be subjected to shoddy, and yet it is proposed to also

make shoddy free, so that the rags of pauper Europe can be gathered out of the gutters from the North to the South Pole and clear around the world and all dumped into this country

Mr. MYERS. Mr. President, I will answer in part at this time by saying that I expect to guard against that by having enacted by Congress a pure-fabrics bill which I have introduced, and which is now before the Committee on Interstate Commerce, and in the passage of which I hope to have the earnest aid and support of the distinguished Senator from Wyoming. I believe it will do the woolgrowers of this country more good than any tariff they have ever had.

Mr. WARREN. It would have been right, then, it seems to me, to have placed that provision in this same bill in which we have made wool free.

Mr. MYERS. It is not a revenue-raising bill; it is not a measure for revenue purposes; but I hope to have it passed later, with the aid of the Senator from Wyoming.

Mr. GALLINGER. If the Senator will give me his attention for a moment, does he not think that it is rather inconsistent to put an impure fabric on the free list and then legislate

Mr. MYERS. I will say to the Senator from New Hampshire. I hope to have his aid in passing the bill, because I think that all good, honest men of all political parties ought to favor it. It does not legislate against shoddy and impure It requires that all manufactures of cloth shall be labeled so as to show the composition of them, and let the man pay his money and buy what he pleases.

Mr. WARREN. I will remind the Senator that while I believe he is making his observation in the light of a promise and not of a threat, and while I believe he now expects to carry it out, he may change his mind as he has heretofore done about wool matters. We are now here with the fact before us that the Democratic Party once gave us free shoddy and overran the country with it to its great harm. They now undertake to do it again, and all we have so far is the intimation of the Senator from Montana, whose views as he knows change upon wool matters, that hereafter we may have a pure-cloth bill.

Mr. MARTINE of New Jersey. Mr. President— Mr. MYERS. Just a minute, if the Senator please. I should like to ask the Senator from Wyoming to state when my views about a tariff duty on wool ever changed. I think he is under a misapprehension on that point.

Mr. WARREN. I will simply refer the Senator to his own speech made in this body some year or two ago.

Mr. MYERS. I should be very glad to have the Senator from Wyoming read that speech. I do not believe he ever read it, judging from his comments on it.

Mr. WARREN. I had the great honor of reading it, and I

will take the still greater honor of putting it in parallel columns, possibly—in my mind at least—with the Senator's speech of to-day or some portion of it.

Mr. MYERS. I am very willing to have that done.

Mr. WARREN. I know the Senator would be pleased to

Mr. MYERS. I will be very glad to be thus honored, yield to the Senator from New Jersey.

Mr. MARTINE of New Jersey. Mr. President, the Senator from Wyoming asked what good the people are to get from this measure. I wish to state that quite recently I had a conversation with a member of the great clothing firm of this country, known as the Stein-Bloch Co. In conversation with this gentleman as to the operation of the tariff, he said to me, "I fear you will be mistaken in a very radical reduction in the cost of clothing. But," said he, "you will get infinitely better clothing than you do now. Our clothing of the day for the average mor tal is very largely laid with shoddy. A free-wool clause will give the people better clothing; it will last longer, and in that way it will be cheaper.'

Mr. GALLINGER. Mr. President— Mr. MARTINE of New Jersey. I recall full well that for years the shoddy mills in this country under the beneficent system of tariff protection have thriven beyond compare, and men have made fabulous fortunes grinding out the shoddy; and in the absence of a fitting fiber shoddy has been worked in until the workingman's coat tails were loaded down with it around the bottom, and it was a common thing for the ordinary wearer to find sagged the bottom of his coat, and between the stitching and the body of the coat there was a lot of miserable shoddy found upon investigation. Cutting apart the seam, this would be found distributed. This was under the Republican golden idol of protection.

and produce good cloth, let us have the privilege of getting a commodity which is necessary for the health and well-being of mortal man from some other clime; whether it comes from Eng-

land or Scotland, I do not care. I think more of humanity than I do of the shoddy mill, wherever it is.

Mr. GALLINGER. I should like to ask the Senator from New Jersey before he takes his seat if he is not aware of the fact that England is recognized as the home of shoddy; that more shoddy is produced in England than we have ever—

Mr. MARTINE of New Jersey. Mr. President, I say—Mr. GALLINGER. Let me finish the sentence. The Senator is always interesting, but I want to finish the question. I want to ask him if he does not know that England produces very much more shoddy than has ever been produced in the United States.

Mr. MARTINE of New Jersey. I say, be that as it may, whether England has free shoddy or not, I do not mean to make this a free-shoddy country if I can help it.

Mr. GALLINGER. But in this bill you and your party put shoddy on the free list and open your markets to free shoddy;

and yet you are going to have pure woolen clothes.

Mr. MARTINE of New Jersey. I realize the point the Sen-I say simply I would have free the commodities ator makes. that are much more general, and I am willing to trust the people of America. If they can have side by side free shoddy and free wool they will take free wool; but under the system of the McKinley Act and the Dingley and Payne Acts, which we have been laboring under for years, it is a physical impossibility for the average mortal to get clothing enough without being compelled to pay the iniquity of a high-tariff charge.

I know in my own neighborhood and in my State a firm has amassed wealth almost beyond comparison by weaving into a fabric- a cheap mass, and that has been sent out among the people, and the workingmen and the average fellow citizens

have unwittingly bought that commodity.

I say, if the Senator from New Hampshire, broad hearted. generous, and humane as he is, would allow the pulsations of his own generous heart to wish, he would, for the sake of humanity, say that the people should have cheap and good clothes, and he would not retain the present duty.

Mr. GALLINGER. My generous heart would go out in rhythmic cadence with that of the Senator from New Jersey, if I believed his bill would accomplish that result. The Senator from Montana has told us that there is not wool enough in the world to give the people of the world a suit of woolen clothes

once in three years, I think he said.

Mr. MYERS. Mr. President—

Mr. MARTINE of New Jersey. That is a statistical fact.

Mr. GALLINGER. Yet the Senator from New Jersey is going to clothe in woolen garments men, women, and children and allow England and other European countries to send in

their shoddy. Mr. MARTINE of New Jersey. The statement the Senator makes is a statistical fact. I do not believe there is wool enough in the world to clothe all God's humanity; but so far as I am concerned, my vote shall be in the direction which, according to the best of my judgment, shall tend to aid them in that most laudable object. I believe this measure will tend in that direction. I do not contend that this tariff measure is perfect. I do not know that it is possible in the lines of human thought and human reason and human intellect to ever get a tariff bill or any other bill that is perfect. But I do know as I live that mankind can not be made rich and happy by taxation. I believe the day has come when intelligent mankind have opened their eyes to the fact that tariff is a tax. Our friends on the other side have changed their tune. Oh, Lord, how long and how often I heard you plead on the stump and hustings, telling the men of our land not to be disturbed about the story of the Democrats and the tariff; you do not pay the tax anyhow, but the foreigner pays it on the other side. You men have grown wise and the American people have grown wise. They can not be fed on that sort of gruel any longer.

Mr. GALLINGER. I think that if the Senator and his party succeed in destroying the woolen industry in the United States, giving it altogether into the hands of foreigners, he may be compelled to pay the tax to the foreigner, who will fix the price to suit his own fancy.

Mr. MARTINE of New Jersey. I am quite willing to trust to the judgment and the wisdom of the American people. They have declared in loud tones and in unmistakable terms in favor of a change of your system. It has been tried to its finest, and it has proved, as I said the other day, an apple of Sodom, fair without and foul within.

I hope for better days, when men may wear a pure all-wool garment. In Heaven's name, if we in America can not raise of the voters of the United States.

Mr. MARTINE of New Jersey. I know how you try to argue that, but if you gentlemen on the other side of this Chamber can get any comfort out of that sort of an analysis of election figures, in Heaven's name keep on.

Mr. MYERS. Mr. President, I have the floor, and I wish to

make just

Mr. WARREN. I understood that I had the floor. Of course I have no quarrel with the Senator about it, but I wish to finish the statement which was broken in upon.

Mr. MYERS. I thought the Senator said he wished to ask me a question before I took my seat. If he asked the question before I took my seat, I must have the floor.

Mr. WARREN. It was a question that could be responded to

by the Senator or by his colleague at any time.

Mr. MYERS. Then will the Senator yield to me a minute? Mr. WARREN. I will after finishing this statement. After so eloquent a speech against shoddy and so much help as I have received from the Senator from New Jersey I want to make just one statement. I respect his authority, from some clothing man with a foreign name, of course; but here are the facts-

Mr. MARTINE of New Jersey. I want to say—
Mr. WARREN. One moment, until I finish. These are the

Free wool was in existence for some three or four years under the Wilson-Gorman bill, and wool ranged from 4 to 7 cents lower in price in the hands of the raisers of wool than ever before or since. I think no one will contradict that; certainly none will who is informed. Now, with that cheap wool, cheaper than it had ever been before in the life of the United States, with shoddy on the free list, the importation of shoddy increased seventeen times over-seventeen hundred per centand the American wearers of clothes were defrauded accord-Now, that is the plain statement of the case.

Mr. MARTINE of New Jersey. I only want to state with reference to the firm I quoted-the firm of Stein-Bloch & Co .-

as being a firm of some foreign name-

Mr. WARREN. And most respectable, undoubtedly; but they

are foreign men.

Mr. MARTINE of New Jersey. Stein-Bloch & Co. German firm. My mother, thank God, was a German. Stein-Bloch & Co. are a proud of it. I say Stein-Bloch & Co. are the foremost clothingmanufacturing company in this land and the goods they turn out stand second to none.

Mr. WARREN. Are they compelled to handle shoddy at all? Mr. MARTINE of New Jersey. I will not say what they are compelled to do by the Republican system, but the fortunate

Mr. WARREN. I am asking, Will they be compelled to do

under the Democratic system what they did before?

Mr. MARTINE of New Jersey. We will not cross that bridge until we get to it. We have tried your plan, however, and are

quite willing to try the other.

Mr. President, I am quite well acquainted with the firm of Stein-Bloch Co. When I was manufacturing woolen goods I sold goods to the Stein-Bloch Co. I would suggest to the Senator, however, the next time he has an interview with either Mr. Stein or with Mr. Bloch, to say to them that it is not necessary for them to buy shoddy goods, and also to suggest to them that the worsted goods that are made to-day, which are the popular goods in this country, do not contain shoddy, because it is impossible to mix wool and shoddy and run it through a comb; but in carded woolen cloth it is possible to mix shoddy with wool.

I want to say to the Senator that I have sold the Stein-Bloch Co. thousands and thousands of yards of tricots, at from 90 cents to \$1 a yard. It takes 32 yards to make a suit of clothes. I was satisfied if I could make 5 cents a yard on that cloth; or, in other words, on every suit of clothes 163 cents. The next time the Senator meets Mr. Stein I wish he would ask him if, in manufacturing a suit of clothes, he only received as profit 163 cents. I am sure he will tell the Senator frankly that he

would not be satisfied with any such profit.

I want to say also to the Senator from New Jersey that, so far as the mixing of shoddy into woolen goods in this country is concerned, we are perfect infants as compared with the English and German manufacturers. We have not learned the first lesson; we know very little about it. As all the world knows, the mills of Batley, England, make goods which are sold all over the world and called woolen goods which do not contain 10 per cent of unworked pure wool.

Mr. MARTINE of New Jersey. Well, Mr. President, I am

not advocating the mixture of shoddy.

Mr. SMOOT. I say to the Senator from New Jersey that under the pending bill this class of goods will come into this country just the same as they did under the Wilson law, and you can not keep them out. If Mr. Stein and Mr. Bloch or any

other clothing manufacturer in this country wants to serve the good people of this country with good clothing, they can get the cloth; they can buy it if they pay the necessary price; but my experience has been that each year the manufacturer of clothing in this country demands of the manufacturers of cloth a price lower and lower, and the only way their demands could be complied with was to use a different sort of stock. It ill becomes a clothing manufacturer in this country to try to taunt the manufacturer of cloth with the statement that clothes manufactured in this country contain shoddy. They are compelled to produce that character of goods or they would not get orders from the clothing manufacturers.

Mr. MARTINE of New Jersey. Let me remark, Mr. President, that I did not say that the Stein-Bloch Co. stated anything in regard to mixing any shoddy particularly; but they stated with reference to the cost, as I distinctly stated, I think, "Your party may be mistaken on the matter of reducing the cost of clothing, but the people will get an infinitely better gar-

ment in consequence.

I am not advocating England's methods. If England works in shoddy ingeniously and successfully, that is her fortune. All I know is that I do not want it for the American people. I realize that the great masses of people, given their choice of shoddy or of pure wool, will take the pure wool, and I want to facilitate them in having that which is best for them and which, in the main, will be the cheapest.

Mr. SMOOT. Mr. President, the clothing manufacturers met

the other day

Mr. STONE. May I ask the Senator a question?

Mr. SMOOT. In a moment. The clothing manufacturers had a convention the other day, and the object of that convention seemed to be to give notice in advance to the American people that whether or not the duty is taken entirely off of wool the American people must not expect that clothing is going to be much cheaper. What does that mean? It means, Mr. President, that no matter what the rate of duty has been upon wool, if it is taken off the clothing made from the wool will be the same. The amount of duty or duty removed is to be absorbed and divided amongst the men who handle the product from the wool to the manufactured article.

Mr. STONE. May I make a suggestion to the Senator from

Utah?

Mr. SMOOT. Certainly.

Mr. STONE. The next schedule is the metal schedule; and it seems to me that we might discuss the wool question when we get to Schedule K.

Mr. SMOOT. Yes, Mr. President, I think we will. Mr. STONE. I respectfully urge Senators to postpone their eloquence and heated remarks on the wool schedule from this time on in this general running debate, until we have disposed of the metal schedule and reached the woolen schedule.

Mr. SMOOT. I want to say to the Senator-Mr. MYERS. Mr. President—

The VICE PRESIDENT. Does the Senator from Utah yield

to the Senator from Montana?

Mr. SMOOT. In just a moment I will take my seat. I want to say to the Senator from Missouri [Mr. STONE] that this discussion arose in the Senate to-day by the senior Senator from Montana [Mr. Myers] speaking upon wool and manufactures of wool.

Mr. STONE. But that was a general speech.

Mr. SMOOT. I am perfectly aware that the Senator made a general speech; but after his speech was delivered, he and the Senator from Wyoming [Mr. Warren] got into a colloquy. Then the Senator from New Jersey [Mr. Martine] took a hand, and I merely was answering the Senator from New Jersey. I want to congratulate the Senator from Missouri for calling attention to the matter, because I myself think that we ought to go on with the metal schedule. The point which the Senator from Missouri has made is well taken.

Mr. STONE. The speech made this morning by the Senator from Montana [Mr. Myers] was in accordance with what has been going on in the delivery of speeches of a general character. He was questioned by the Senator from Wyoming [Mr. WAR-BEN], and out of that has grown this running discussion, which, it seems to me, we might well dispense with, and proceed in

regular order.

Mr. MYERS. Mr. President, about half an hour ago I was asked a question by the Senator from Wyoming [Mr. WARREN], which I have not yet had an opportunity to answer, and I wish now to answer that Senator.

The Senator from Wyoming is honestly and unintentionally mistaken about the character of some remarks that I made in this Chamber two years ago, in the summer of 1911. In that speech I did not advocate any duty on wool. That speech was one of personal explanation of a vote of mine. The bill for the

revision of the duties in the woolen schedule had reached this body from the other House, and the Senator from Oklahoma [Mr. Gore] had made a motion for the almost immediate consideration of it, without any hearings being had upon it. I was the only Democrat in this body who voted against that motion. Some days or weeks later I made some remarks explaining why I had cast my vote as I did. I said in explanation that I cast my vote as I did because, after my election to the Senate, I had promised some of the woolgrowers of Montana that I would oppose taking up the wool schedule for consideration and revision until after the report of the Tariff Board had been made. I went on at great length in those remarks to state that I did not promise anyone how I would eventually vote when the bill was before the Senate on its merits and on its final passage; that I might vote for free wool if I saw fit, or that I might vote for some slight duty on wool; that I had not promised nor committed myself to anyone or even to myself as to how I would vote when the bill might be up for revision. As I have said, I had promised some of the woolgrowers of Montana that I would not favor taking up that schedule for revision until they could have the light of the Tariff Board upon it, which they said they wanted, and which they claimed was essential. I had made a promise, and I considered my promise as good as my bond; in fact, better. I would have resigned from this body before I would have violated that promise. I said in the course of those remarks that I held myself open and free to vote for free wool if I should so desire when the time should come or to vote for a duty on wool as I might decide. I stated that I had not been a student of the wool schedule; that I knew but little about it, and that we ought to have more time in which to obtain additional light on the That was true. I have not been a student of it to any great extent, but I certainly have studied the subject more since then so as to form my opinions and to come to my conclusion as to whether or not there ought to be a duty on

I know the Senator from Wyoming was mistaken-not intentionally, of course—in stating that my remarks on that occasion That is would indicate that I had advocated a duty on wool. not correct at all. I am perfectly willing to have the two speeches printed in parallel columns side by side.

The Senator from Wyoming said that I had One thing more. spoken of something in connection with the manufacture of wool

contemptuously.

Mr. WARREN. No; Mr. President-

Mr. MYERS. I did not intend to speak of anybody or any element or any factor in connection with the subject contemptuously. I have no contempt for any legitimate industry in this country, or for the people engaged in it. I simply wanted to state the reasons for my action. I made an argument to the best of my ability, and no contemptuousness for anything or anybody was intended. If the Senator will read that speech, as he has promised that he will, I think he will revise his ideas.

That is all I care to say.

Mr. WARREN. Mr. President, I think my friend from Montana [Mr. Myers] knows that I would not willingly misquote

Mr. MYERS. I know that. I said it was wholly unintentional.

Mr. WARREN. I spoke of the fact that he might change his mind and expressed the thought that he had done so.

Mr. MYERS. No; I have not done so. Mr. WARREN. The Senator has just said that at that time he did not understand the matter as he does now; and it is quite possible after the close of this tariff debate that his desire to have free wool will have vanished or faded out, in view of the party allegiance which will perhaps be demanded of him.

The Senator's former speech and present one will be in the RECORD, and I want most heartly to invite every Senator and everyone who has access to the RECORD to read both of them. They will agree with me that the Senator is a most sincere man; they will agree with me, I think, that he is subject, as we all are-and perhaps it is to our credit-to changes of

The Senator misunderstood me if he thought that I accused That was him of speaking contemptuously of manufacturers.

not my idea at all.
Mr. MYERS. Oh, yes; the Senator used that word, although, of course, it was unintentional.

Mr. WARREN. I referred to shoddy and such material, and

the Record will show what I did say.

Mr. MYERS. Certainly. Just one word more, and then I Mr. MYERS. Certainly. Just one word more, and then I will take my seat. I should be very glad and should feel very highly flattered if every Senator would read both of the speeches I have made on this subject; but, unfortunately, I do not be-

lieve they will. If, however, they should, they will find that I have never experienced any change of opinion or of attitude and have not changed now. I feel highly flattered, however, that the Senator from Wyoming has so much confidence in my sincerity. patriotism, and integrity as to think that I may possibly make a change hereafter. If I am convinced, then I will change, but not otherwise.

So far as party regularity is concerned, I have advocated free raw wool and free sugar in this bill from the beginning of this

session of Congress.

Mr. WALSH. Mr. President, it is not my intention to prolong this debate, but inasmuch as something said by the distinguished Senator from Wyoming [Mr. Warren] seemed in the nature of a challenge to myself, I simply desire to say that at the proper time, when the wool schedule is before the Senate for consideration, or when we reach that part of the free-list subdivision of the bill which deals with the subject of the importation of wool waste, rags, and shoddy, I shall beg the indulgence of the Senate to submit my views with respect to the matter. I content myself now with saying, however, that I do not agree with the distinguished Senator from Wyoming that the way to prevent our people from being compelled to wear shoddy clothes

is to put a duty upon the importation of shoddy and rags.

Mr. GALLINGER. Mr. President, I hasten to join with the distinguished Senator from Missouri [Mr. Stone] in his expressed wish that we should proceed to the consideration of the metal schedule. The truth is that since the speech delivered by the Senator from Missouri on that schedule this morning, occupying an hour and a quarter, we have been traveling far afield of the subjects embraced in that schedule, and we ought

now to take up the schedule. [Laughter.]

Mr. STONE. I ask that the reading of the bill be proceeded with

The VICE PRESIDENT. The Secretary will resume the reading.

The Secretary resumed the reading of the bill, on page 29,

line 10, Schedule C, metals and manufactures of.

The next amendment of the Committee on Finance was, on page 29, line 11, after the numerals "104," to strike out "Iron in pigs, iron kentledge, spiegeleisen, wrought and cast scrap iron and scrap steel, 8 per cent ad valorem; but nothing shall be deemed scrap iron or scrap steel except second-hand or waste or refuse iron or steel fit only to be remanufactured; ferro-manganese, chrome," and to insert "Chrome"; and in line 20, after the word "steel," to insert "not otherwise specially pro-vided for," so as to make the paragraph read:

104. Chrome or chromium metal, ferrochrome or ferrochromium, ferromolybdenum, ferrophosphorus, ferrotitanium, ferrotungsten, ferrovanadium, molybdenum, titanium, tantaium, tungsten or wolfram metal, and ferrosilicon, and other alloys used in the manufacture of steel, not otherwise specially provided for, 15 per cent ad valorem.

Mr. CUMMINS. Mr. President, I do not rise for the purpose of discussing this amendment, but to have, if possible, an understanding with the Senator in charge of the schedule or with Senators upon the other side of the Chamber, with regard to an amendment which I submitted this morning. I submitted this morning a substitute for the entire Schedule C. do not want to present it at this time, and I hope the Senate may pass through the schedule and act upon the amendments reported by the committee and any other amendments that may be offered to the particular paragraphs, leaving me at liberty, after the schedule has been gone over in that way, to offer the substitute which I have proposed. Will that be agreeable to the Senator in charge of the schedule?

Mr. STONE. Mr. President, we have no objection to the suggestion of the Senator from Iowa. We will proceed with the schedule as it is, and after we have gone through it, if he desires to offer a substitute for the whole schedule, I think that is within his rights. At all events, there is no objection on this side to that course. I think it proper to say, however, that we must reserve the right, in the interest of expedition, to proceed in such a parliamentary way as we think proper

and advisable.

Mr. CUMMINS. Mr. President, that is the reason I rose to make the inquiry. After we have passed through the schedule as it is here before us and agree or disagree to the amendments reported by the committee, and any other amendments that may be proposed to individual paragraphs, I am not sure that my amendment, which is in the nature of a substitute and which does change in some degree some and probably all of the paragraphs in Schedule C, would be in order, but I thought it would probably in the end save time if I were permitted to proceed along that line.

I do not intend to consume very much of the time of the Senate in a debate upon my substitute. It is practically the substitute I offered a year ago, and I then discussed and considered it at considerable length. I shall refer very largely in the course of the observations I shall make in connection with my amendment to the speech I made a year ago, but, of course, if I can not have that understanding I must offer the

amendment at this moment.
Mr. STONE. Mr. Presid Mr. STONE. Mr. President, the Senator offered his substitute this morning, and it will not be available for examination before to-morrow morning. Of course I have not seen it, nor has any other Senator on this side, so far as I am advised, and I presume very few, if any, on the other side have had an opportunity to examine it. I do not know just how it conforms in the manner of its arrangement with the schedule as it appears in this bill. If it is paragraphed in substantially the same way. I should think it would be preferable if the Senator would offer the first paragraph of his substitute as an amendment to the first paragraph of the schedule as reported by the Finance Committee, and so on, so that when we are through we will have covered all the paragraphs in his substitute. However, if the Senator prefers the other course, it seems to me that he would have the parliamentary right when we have finished the schedule on this reading to offer his amendment by way of a substitute for the entire schedule, and we could take a vote upon that.

I will say to the Senator that no point of order, so far as I am concerned—and I will undertake to speak for the committee and, I hope, for this side of the Senate-that no point of order, if one would lie, will be made against the right of the Sen-

ator to offer his substitute.

Mr. CUMMINS. I am not sure about that. If the substitute which I intend to propose were arranged as the schedule before the Senate is arranged, I could very easily accept the suggestion made by the Senator from Missouri; but it is not so arranged. I do not group the subjects in the schedule in the same manner as the Finance Committee has grouped them; and I am sure that it would be found much better and in the end would save much time if I could be assured that there would be no point of order made against offering the substitute after we have passed through the schedule as it is.

Mr. STONE. I think it fair to say to the Senator that we shall reserve the right, after a reasonable debate on the substitute as a whole, to move to lay it on the table and take a

vote upon it in that way.

Why would it not be a little more regular, as a matter of procedure, for the Senator to offer his substitute to the entire schedule now, debate it at reasonable length, and then take a vote upon it as to whether the Senate is disposed to accept it as a substitute for the schedule as presented by the committee, instead of waiting until we have gone through the entire schedule, with such incidental debate as is certain to follow on the different paragraphs? I suggest to the Senator that he offer his substitute in advance, so that we can act upon it in the beginning of the consideration of this schedule.

Mr. GALLINGER. Mr. President, will the Senator from Iowa permit me a moment?

Mr. CUMMINS. I yield to the Senator. Mr. GALLINGER. The suggestion of the Senator from Missouri is perhaps a proper one, except that we do not know how many amendments we will make to the Senate bill before we get through considering this schedule; and hence the Senator might be disposed not to offer his substitute after we have amended the schedule as reported by the Committee on Finance.

Mr. CUMMINS. The Senator from New Hampshire makes a suggestion which the experience of the Senate in the last few days hardly warrants; but I can see a good deal of objection to pursuing the plan suggested by the Senator from Missouri. have a substitute to offer. If it is debated, it must be debated as a whole; and in debating it we will consider, in a sense, every paragraph of this schedule. I thought the Senator from Missouri would prefer to go forward with the committee amendments, or any other amendments that may be offered on the floor, and in that way perfect the schedule as reported by the committee.

Mr. STONE. I am not very particular, Mr. President.

Mr. CUMMINS. And then consider whether there should be

a substitute offered as a whole.

Mr. STONE. If the Senator will pardon me, I am not particular whether he takes one course or the other. If he prefers the course that he has outlined, then let us proceed with the bill.

Mr. CUMMINS. Very well; I do prefer that.

Mr. BRANDEGEE. Mr. President, I should like to know whether unanimous consent has been given that the Senator

from Iowa may offer his substitute?

Mr. CUMMINS. I have not asked unanimous consent, and I do not think I shall do so. I rely entirely upon the general honor of the arrangement, because if I am not permitted to

offer the amendment as in Committee of the Whole, I will do so when the bill reaches the Senate; and, therefore, there would be no object, it seems to me, in receding from the general understanding.

Mr. STONE. Very well; let the reading be proceeded with. The VICE PRESIDENT. The Chair would like to know a little something, too. It may save the Chair from embarrass-

ment in the future.

The Chair has been under the impression that where the committee made amendments, before any substitute would be in order the committee amendments must either be agreed to or rejected, so that the Senate would know what the proposed substitute was intended to supplant. If the Chair is in error about that he would like to be advised.

Mr. CUMMINS. Whether that is parliamentary law or not, it is very good sense. That is the reason I believe we ought to go forward with the bill and perfect it from the standpoint of the committee, and then determine whether a substitute for

this schedule should or should not be adopted.

Mr. STONE. Whatever may be said as to the absolute accuracy of the Chair's view, as expressed-and there is undoubtedly a great deal of force in it; probably the Chair is entirely correct—there is no need, so far as I can see, of consuming time in discussion, for the reason that the Senator from Iowa himself prefers that the suggestion of the Chair be followed, and we can go on with the bill as it is.

The VICE PRESIDENT. The question, then, is on agreeing

to the amendment of the committee.

Mr. LA FOLLETTE. Mr. President, I rise to inquire of the Senator from Iowa whether he has perfected his substitute for this schedule, and whether it has been printed?

Mr. CUMMINS. It has not been printed. I offered it this

morning. It may already be in the hands of the Secretary.

Mr. LA FOLLETTE. It has been presented already?

Mr. CUMMINS. It has been presented, and is to be printed to-day.

Mr. LA FOLLETTE. So that Senators will have an opportunity to see copies of it very soon?

Mr. CUMMINS. Very soon.

Mr. OLIVER. Mr. President, I wish to say a few words about this first paragraph, but before proceeding with my remarks I should like to ask a question of the Senator who is in charge of this part of the bill.

I notice that the bill as it came from the House provided for very small duty upon pig iron and a number of other articles of iron and steel contained in paragraphs 104 and 105. The Senate committee has seen fit to strike out the provision for those duties, and to put these articles on the free list. It has followed that action with what I suppose it considered corresponding reductions on other articles of more advanced state of manufacture. I should like to have the committee inform the Senate as to the reasons for this action.

Mr. THOMAS. Does the Senator mean with reference to the reductions that were made in the succeeding paragraphs?

Mr. OLIVER. I refer to the placing of pig iron, scrap iron, slabs, blooms, and billets upon the free list, and the reductions in the ad valorem rates on other articles more advanced in manufacture.

Mr. THOMAS. The purpose of the committee was to place upon the free list the articles which are stricken out in the bill, because, generally speaking, in our opinion they form the raw material of the industry and because the difference in the cost of production of the items in paragraphs 104, 105, and 112 is comparatively slight.

Mr. OLIVER. I will ask the Senator if he has any figures at hand bearing upon the difference in cost of production?

Mr. THOMAS. Not directly. As I am informed, the cost of conversion of iron in pigs into iron in slabs, and so forth, is about 61 cents a ton. The labor cost, as reported by the Bureau of Corporations-

Mr. OLIVER. The Senator does not mean to say that the labor cost is the only cost of converting pig iron into billets and slabs?

Mr. THOMAS. The labor cost involved in the conversion of iron in pigs into iron in slabs, billets, and so forth-

Mr. OLIVER. The Senator did not understand my question. I remarked that I presume the Senator does not contend that the labor cost is everything that is included.

Mr. THOMAS. Not at all. Mr. OLIVER. Has the Senator any figures showing the

actual cost of this conversion at home and abroad?

Mr. THOMAS. The actual cost is greater, but none of these items are imported, in consequence of which we can and do produce them here and command the market. As a consequence, we concluded to place them upon the free list, following the general plan of placing raw materials, as far as possible, upon the free list.

The reductions to which the Senator calls attention were made-or, at least, we attempted to make them-by reducing proportionately the rates fixed by the House to make allowance for placing the raw materials upon the free list. It may be, as the Senator says, that in doing that we have not been entirely equitable in their distribution.

Mr. OLIVER. The Senator does not answer the question I asked. He says he based it upon the fact that the difference in the cost of production at home and abroad is so slight. I ask

the Senator upon what he bases that statement?

Mr. THOMAS. I made the statement that as between pig iron and the conversion of pig iron into slabs the labor cost was slight. That was my statement, and also that there are practically no importations of these items. I have not attempted to make any statement of the difference in the cost of produc-tion at home and abroad. If that is the question the Senator asked me, I did not understand it.

Mr. OLIVER. I understood the Senator to say that the committee made these changes because they discovered that there was but little difference between the cost of production

here and the cost of production abroad.

Mr. THOMAS. I said nothing of the sort.

Mr. OLIVER. Then I beg the Senator's pardon, because I

certainly so understood him.

Mr. THOMAS. I may possibly have said so, but I do not think the record will show that I did. What I attempted to do, at least, was to state the labor cost of the conversion of pig iron into blooms and bars and billets here, not abroad.

Mr. OLIVER. Mr. President, the Senator has given us such information as he has, which, I must confess, is very little, with regard to the conversion of pig iron into billets. I should like to have some statement of the basis upon which he placed

pig iron itself upon the free list.

Mr. THOMAS. We placed it upon the free list because it is the raw material of the iron and steel industry; because practically none of it is imported; because it belongs there as the raw material of the industry.

In the Stanley committee hearings Mr. Carnegie said:

My honest opinion is that this country can make steel as cheap, and I really believe that it can make it a shade cheaper, than any foreign country. At all events, I am prepared to say that we can make it as cheap here as it can be made in any country in the world.

Mr. BARTLETT. Then there would be no necessity for a tariff in order to equalize the cost of production in this country and abroad, so as to protect the manufacturers of iron and steel in this country?

Mr. CARNEGIE. Not the slightest.

Again, Mr. Carnegie said:

In my opinion, you legislators should not bother yourselves about steel. It is no infant industry; it is a giant. America leads the world. America makes quite as much steel as the whole of the world, and when I began it did not make a ton. I have seen the whole thing. We were in at the beginning.

I suppose the Senator is familiar with the celebrated letter of Mr. Schwab which preceded the organization of the United States Steel Corporation, in which he declared that he could make steel at \$11 a ton, and sell it not only in the markets of the world, but right at the home of steel production in Great

Yes, Mr. President; I am familiar with that letter. It was written by Mr. Schwab at a time when the newly discovered ore of the Lake Superior region was just coming into the market; when people were almost disposed to throw away ore that ran less than from 60 to 65 per cent of iron; and when Mr. Schwab enthusiastically supposed that with Mr. Carnegie's backing he could make steel cheaper than any other establishment in the world. The investigations that have been made since that time have shown that that idea was entirely fallacious and that even at that time, when I know from my own experience in the business that steel could be made cheaper than it ever had been before or ever has been since, we could not make it as cheaply as foreign countries. I think before I sit down I will prove conclusively that we can not now produce it anything like as cheaply as some European countries, and that if there is any effort to equalize conditions there should be a protective duty on it. If not, following out the doctrine that is advocated by our friends on the other side of the Chamber, there should be at least some duty placed on it for purposes of

Mr. THOMAS. Mr. President, will the Senator yield to me a moment further?

Mr. OLIVER. I yield.

Mr. THOMAS. I want to add to what the Senator has said that Mr. Schwab wrote that letter and made that statement as an inducement for the investment of capital in the organization which followed, the United States Steel Corporation, to the end that it should appear how cheaply steel could be manufactured in this country

Mr. OLIVER. I wish to ask the Senator from Colorado whether he has the date of that letter?

Mr. THOMAS. I have it here in newspaper form. The date

appears to have been May 15, 1899.

Mr. OLIVER. Yes; that was my impression. It was May 15, The United States Steel Corporation was not thought of in 1899, and it was not organized until two years later.

Mr. THOMAS. No, Mr. President; but very shortly after this letter was written an option was taken by Moore Bros. upon the same constituent elements that afterwards entered into that organization, for which option a million dollars was paid and forfeited upon the basis of it.

Mr. OLIVER. Yes; it was forfeited.
Mr. THOMAS. And this letter, written to Mr. Frick, was used by the Moores for the purpose of inducing the enlistment of capital for the organization of the concern at that time.

Mr. OLIVER. It may possibly be that the letter was written for the purpose of inducing the Moores to put into it the million dollars which they afterwards forfeited.

Mr. THOMAS. It was in part for that.

Mr. OLIVER. Mr. President, I wish to say a few words with regard to paragraph 104, treating particularly of pig iron. In dealing with this schedule it is not my purpose to say with regard to any part of it one word more than is absolutely necessary. I shall try to point out the glaring defects and inconsistencies in some of the paragraphs. I shall not even go to the extent of offering any amendments to it, or of asking votes upon it, except with regard to a few paragraphs in which the injustice is so serious and betrays so great a want of information upon the subject that I think I can induce the committee to accede to my views and allow the changes I propose.

As has been said by the Senator from Colorado [Mr. Thomas]. pig iron is the basis of all iron and steel. Iron and steel in all the varied forms of manufacture are, as we all know, of paramount importance to the great State in which I live, and which I have the honor in part to represent. Therefore anything which militates against the prosperity of this industry is something which I, as a Senator representing the people of that State, feel bound to resist and to have remedied if it is at all

possible.

I have not much hope of remedy under existing conditions, Mr. President, because I feel sure that the standpatters on the other side of the Chamber are going to stand up for the instru-ment which they have prepared without regard to consequences.

It is hardly necessary for me to say that pig iron is the prod-uct of an establishment known as a blast furnace. To erect and equip a modern blast furnace, with all of its equipment, costs to-day in the neighborhood of a million dollars. But there are still running all over the country many furnaces smaller in product than those which would be built to-day, but still able, with the assistance of a fair protective tariff, to manufacture pig iron for the market and live.

In Pennsylvania there are 170 of these furnaces. number, there are 47 which are owned and operated by the United States Steel Corporation and its subsidiary companies. This shows just about the proportion of steel that is made in Pennsylvania by the United States Steel Corporation and by

independent companies.

In Maryland there are 4 blast furnaces, none of which are owned by the Steel Corporation. In Virginia there are 23, not one of which is owned by the Steel Corporation. In West Virginia there are 4. Out of the 4 I think 2 are owned by the Steel Corporation, but I am not certain. In Kentucky there are 7, all independent furnaces. In Tennessee there are 18, some independent, and some owned by the Tennessee Coal & Iron Co. In Georgia there are 2; in Alabama 46; in Ohio 55; in Indiana 18; in Illinois 26; in Michigan 2; in Wisconsin 7; in Minnesota 1; in Missouri 1; in Colorado 6. All of the latter blast furnaces are independent, except some of those in Alabama and Tennessee.

Pig iron is the foundation for the iron and steel business, the raw material for the entire industry. Its manufacture has grown in the United States from 53,000 tons in 1810 to 29,-727,137 tons in 1913. The industry has increased at all times when we have had a protective tariff, and has fallen down when the tariff was taken off.

The wages paid in blast furnaces in this country to the principal operatives, as compared with those paid in England, are as follows:

For the furnace keeper: United States wages, \$2.90 a day;

English wages, \$1.82 a day.

Top fillers: United States wages, \$2.55; English wages, \$1.27.

Cinder men: United States wages, \$2.30 a day; English

Bottom fillers: United States wages, \$2.30; English wages,

Laborers: United States wages, \$1.75; English wages, 91 cents. Blast-engine men: United States wages, \$2.90; English wages,

Mr. STONE. Mr. President, just at this point I should like to interpose a statement which I have taken from the somewhat exhaustive report of Mr. Herbert Knox Smith, the head of the Bureau of Corporations of the Department of Commerce and Labor, on the general subject of wages. I do not know where the Senator gets his information, but what I wish to put in is about three lines.

Mr. OLIVER. Mr. President, I am perfectly willing to yield to the Senator to enable him to ask me any question which I am able to answer; but I do not think I can yield for the purpose of having him put into the RECORD, with my remarks, any extended statement. He can follow what I have to say with

Mr. STONE. No, Mr. President, I do not wish to put in any

extended statement.

Mr. OLIVER. If I yield at all, I will yield later. Mr. STONE. If the Senator please, it will not amount to

more than three or four lines.

Mr. OLIVER. I wish to say that the report of Mr. Smith, with which I am familiar, deals entirely with the larger furnaces and the larger manufacturers. It points, as nearly everybody points in discussing the steel tariff, to the United States Steel Corporation and the greater manufacturers who do business upon the same lines.

Mr. STONE. Do I understand the Senator to decline to

yield?

Mr. OLIVER. I think I must decline to yield, Mr. President. Mr. STONE. Very well. Mr. OLIVER. Mr. President, I hesitate to say this, but from what I know of the business of these merchant furnaces I am firmly convinced that they can not live under free trade in pig iron and that it will drive them out of business. greater manufacturers making tonnage steel and pouring out of each blast furnace an output running up to four and five hundred tons a day, melting the iron and not allowing it to cool, but running it into the steel plants and having it, without cooling, converted into steel ingots, I believe they can struggle against this proposed free-trade bill. I do not, however, believe the independent manufacturers can live under it. They will be the ones that will have to suffer.

I am firmly convinced that if the United States Steel Corporation never had been organized, but if the cost of making steel were just exactly the same as it is to-day, the framers of the bill never would have put in it the duties that it now contains. But in aiming at the Steel Corporation and the greater aggregations their shots will go past the mark, and will slaughter the smaller independent manufacturers.

With regard to the independent manufacturers, I shall have something to say later on when we come to the paragraphs dealing with their varied products.

Now, Mr. President, there is another way of looking at this All tariff bills and all arguments upon this subject have always looked at and dealt with foreign countries by name. When we referred to the foreign manufacturers we named the English, the German, or the Belgian. But there is another competitor coming to the front that, looking to the future, is more to be feared than all others.

Mr. President, this Nation, wisely as I think, has enacted laws to prevent the immigration, in competition with our labor and with all white labor, of the representatives of an alien civiliza-tion from the Far East. But to my mind it is important now to look and see whether the products of those races are to be admitted free to our markets in competition with the products of

our own labor.

I have a friend who a little more than a year ago visited China, and while there he went to visit a steel works at Han-

yang, and this is what he says about it:

yang, and this is what he says about it:

That a lowering of the tariff on iron and steel would be a serious menace to American manufacturers and workmen is well established; that the peril from China is real and already has begun to be felt on the Pacific coast is presented by W. H. Donner, president of the Union Improvement Co. and formerly president of the Union Steel Co.

Mr. Donner, less than a year ago, during the course of a world's tour, visited at Hanyang. China, a modern steel plant in full operation and exporting steel rails and pig iron to Japan and some of the latter product to the Pacific coast of the United States. Mr. Donner declared yesterday that if the steel industry in China is properly developed the Chinese steel manufacturers will be enabled to deliver finished product to the eastern coast of the United States upon the completion of the Panama Canal. Panama Canal,

"They have enormous deposits of iron ore," he said, "very much higher in iron than the ore we now use, and running from 62 to 65 per cent in ore. This ore is almost free from sulphur and is low in phosphorus. They have an abundance of excellent coking coal, which can be mined at very low cost, because they have the cheapest labor in the world. To one who has never visited China this may appear as an exaggeration, but it is a fact. I believe it is possible to produce pig iron and finished steel more cheaply in China than in any other country in the world."

Mr. Donner declared that laborers in Hankow, which is just across the river from Hanyang, near the steel works, receive 10 cents, gold standard, for a 12-hour day; skilled laborers, such as brickleyer, carpenters, and machinists, receive 30 cents gold for the same 12-hour period of labor. They feed and clothe themselves and save a little.

MINEES RECEIVE 7 CENTS A DAY.

MINERS RECEIVE 7 CENTS A DAY.

The Chinese coal miner is paid 7 cents for a day of 12 hours; in addition he receives his food from his employer, but this consists only of about 1 cent's worth of rice and meal. Coal at the pit's mouth in China is sold at 35 cents a ton.

The coal is transported from the mine to the river or railroad by coolies, the lowest class of Chinese labor. The coolie is paid 1 cent for carrying on his back a 400-pound load of coal in some instances a distance of more than a mile from the mine to the export station. These coolies work only every other week.

According to Mr. Donner it costs a Chinese workman about 90 cents a month to live.

Mr. Donner happened to have a kodak with him and took some snapshots of these works, and I have some enlarged copies of them. I have three of them here [exhibiting]. They show a blast furnace and steel plant of the most modern construction, evidently planned by either European or American engineers, with electric cranes, railroads running right into the plant, and everything of the very best type of construction.

I have been informed that most, if not all, of the pig iron now used on the Pacific coast comes from this plant. With the development of this and other like plants in China, and the opening of the Panama Canal, I do not hesitate to say that pig iron and steel can be delivered upon our Atlantic coast cheaper than it can be made in any plant in the United States, even in

the much talked of plants in Alabama.

Mr. BRANDEGEE. Does the Senator happen to know what nation furnished the capital for the steel plant in China?

Mr. OLIVER. I can not state that. I do not know.
Mr. CUMMINS. Mr. President, I do not intend to delay the
Senate for more than a moment. I believe that pig iron can be made in the United States as cheaply as it can be made anywhere else, as a general proposition. Nevertheless, there are certain parts of the United States that can take a limited amount of foreign pig iron under the present duty. If you draw a line 50 miles or 55 miles west of Philadelphia and will consult the cost of making pig iron west of that line and the cost of transportation from abroad, it will be observed at once that it would be impossible for England, Germany, Belgium, or France to import any pig iron into the territory west of that line.

I examined that subject with a great deal of care last year.

The cost of what is known as Bessemer pig in England is about \$14 a ton. In the United States it is about \$14 a ton. One of the queer things is that last year we had a small importation of pig iron into the United States, and the value per ton of the iron so imported was, as I remember it, a little more than \$15 per ton. I do not know just why this is so.

Mr. PENROSE. On account of the duty?

Mr. CUMMINS. This is without duty. The value is given without duty in the handbook now before us. Notwithstanding these facts, and I intend to develop them a little more fully when I come to present my substitute, it is clear to me that there is a difference between the cost of production in the easternmost territory of the United States and England or France or Germany. They can make pig iron a little more cheaply in those foreign countries than it can be made in the eastern part of the United States.

Mr. PENROSE. Will the Senator permit me?

Mr. CUMMINS. I yield to the Senator.

Has the Senator from Iowa any figures Mr. PENROSE. showing the cost of manufacture in Germany, France, or Eng-

Mr. CUMMINS. I have. I have the most abundant figures. Mr. PENROSE. I am interested to know what the Senator's idea is as to the cost of manufacture in Germany.

Mr. CUMMINS. It is about \$13 a ton. It is \$13.50 per ton for what we know as Bessemer pig. I had all those figures last year and presented them in most elaborate tables. I had the result of the examination of Mr. Pepper, of the Treasury Department, and other agents of that department. I will put them before the Senate again when I come to present my substitute.

Resuming what I was about to say, I believe that the eastern part of the United States can not produce pig iron quite as cheaply as it can be produced in England, Germany, France, or Belgium, and the freight rate from the points at which the pig iron can be produced in this country most cheaply to the Atlantic coast imposes a great burden upon that traffic. I believe, therefore, now, as I believed last year, that there ought to be a duty of \$1 per ton upon pig iron, not only because of the difference in the cost of the production of pig iron in the only territory into which imports could possibly come, but because I believe that there ought to be in every tariff law some reasonable protection against what is known as dumping. There is no such provision in this proposed law now, although I believe there was when it came from the House.

When Europe is prosperous, when everything is at high tide there, there is not much pig iron made for export to the United States or anywhere else. She consumes practically all the pig iron that she produces, for a very obvious reason-greater profit can be made by converting pig iron into the forms for ultimate use than by selling it and sending it away in the form of pig. As I remember it, England did not produce last year more than 200,000 tons of pig iron in excess of her own demand; possibly less than that; certainly less rather than more. But if the business of Europe becomes stagnant and she can not use the pig iron that she is naturally capable of producing, then it may come to this country under unfair and unnatural conditions.

I think there ought to be a duty of about \$1 a ton on pig iron. The duty in the bill as it came from the House is 8 per Now, 8 per cent on the value of the pig iron that was actually imported into the United States last year is, in my

opinion, too high a duty.

Mr. OLIVER. Mr. President—

Mr. CUMMINS. It would be a duty of about \$1.20 or \$1.25 a ton.

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Pennsylvania?

Mr. CUMMINS. I do.

Mr. OLIVER. I would suggest to the Senator that the average price for the twenty-five thousand and odd tons that were imported last year evidently points to a considerable part of that as pig iron of special analysis, which would command a higher price, because the Senator certainly knows, and I well know, that if any pig iron is imported into the United States it will be pig iron the value of which at the point of export will be very considerably less than \$15 a ton.

Mr. CUMMINS. I think the Senator from Pennsylvania is right in assuming that the pig iron imported last year was of some special quality; otherwise it would not have commanded any such price. The price of ordinary pig iron in the Middleborough district, England, last year varied from about \$11.50 a ton, I think, to about \$14 per ton. I can not remember the price figures, although I have them and will produce them later.

But however that may be, it is impossible, of course, to compare one furnace in the United States with one furnace in England, or France, or Germany. You must take the entire trade or business and establish some fair and reasonable average in order that there shall be a comparison that will be of any value to use.

I make these suggestions simply because I do not believe that pig iron should be upon the free list at this time, although I would not be candid if I were not to say that throughout the major part of the United States pig iron, no matter what the wages are, is produced at substantially the same cost for which

it is produced abroad.

I do not think very much pig iron was imported into the United States from China last year. There may have been a That is a problem of the future. If China is able to produce pig iron for the world as efficiently per man employed as it is produced in the United and in England or France or Germany, then it is obvious that we can not compete with her. I do not have any such fear as that. I do not believe that China, for a great many years to come at least, will be a serious competitor in the business with the United States. If she is, then I for one will be willing to take such measures to protect our own people against an invasion of that sort as the time and the condition demand.

Mr. SMITH of Michigan. Mr. President, I simply want to make one observation regarding the question of free iron ore. I do not believe in it at all, and I think it is most unwise to put

such a provision in the bill.

The other day I was riding on the train with a gentleman who is manager of the Pennsylvania Steel Co.'s iron-ore plant in Cuba. He told me that they have a quality of ore there which, with very little treatment, would be as good as the ore on Lake Superior or on the Mesabi Range.

Mr. SIMMONS. Mr. President, we have not reached that; it

is on the free list.

Mr. SMITH of Michigan. I know it.

Mr. SIMMONS. The paragraph we have under considera-

Mr. SMITH of Michigan. This is where it ought to be under

Mr. SIMMONS. Of course, I am not objecting to the Senator's discussion of it.

Mr. SMITH of Michigan. I think it ought to go right in here, and there ought to be a duty on it; and I was stating one This man said that by treating this of the reasons why. Cuban ore at very little expense they could make it answer every purpose that the ores on the Mesabi Range or on Lake Superior, answer. I asked him how much ore they have now in sight in Cuba and he told me they have 600,000,000 tons, and that they are developing more iron all the time.

Now, Mr. President, a party that has talked so much and so often about taking the tariff to a revenue basis, which deliberately presents the Pennsylvania Steel Co. with a customs duty that would otherwise have gone to the Treasury of the United States, seems to me to be a trifle reckless. We have a duty now of 15 cents a ton, and the 20 per cent reduction to Cuba, growing out of the reciprocity treaty, would reduce it to about 12

The 600,000,000 tons, if used during the life of the Democratic Party, would yield a revenue to the Government of over \$70,-000,000. I do not think you will last that long in authority; and I hope you will not last long enough for this bill to get into full operation, because the shorter your party's duration the less the country will suffer; but I do not understand how you could give to the Pennsylvania Steel Co., and to Mr. Schwab, of the Bethlehem Co., who owns deposits on the coast of Cuba, this paltry charge which they have not asked should be removed and which they had no expectation would be yielded. I venture the assertion that the Committee on Finance has not a single communication from any person in the world asking that this duty be taken off iron ore; yet your haste to do it would almost indicate that you proposed to supply the public table with a product of that kind. Over \$70,000,000 of revenue which would have come into the country from the 600,000,000 tons of iron ore without any objection upon the part of the owner of the ore has been sacrificed, with no prospect whatever that the consumer will get the benefit of your reduction.

If you have abandoned all expectation or hope of putting the country on a revenue basis, if you are going squarely to free trade, as I think many members of your party expect to doand some of them have long cherished the hope that no barriers would exist on our coast against the productions or the manufactures of other lands—then, of course, we may as well make up our minds that that is to be your course, and our fate will be the fate that follows such unwisdom; but who on the other side of the Chamber can give an excuse for giving to the Pennsylvania Steel Co. what would naturally and easily flow into the Treasury of the United States without burden to anyone? They can put their ore in Baltimore for less than it costs to ship a ton from Lake Superior to the seacoast, but there is no prospect whatever that the price of the manufactured article will be reduced. Who is to gain by this reckless indifference toward the revenues of the Government? If it were not your intention to find this revenue in some way not heretofore customary in the management of the Government you would never dream of foregoing an opportunity to collect so easily from some one willing to pay it the revenue that would be derived from this very small duty upon the iron ore of Cuba.

Mr. THOMAS. Mr. President, we are not concerned at present, as was remarked by the Senator from North Carolina [Mr. SIMMONS], with the question of iron ore. I may say, however, that the revenue derivable from iron ore, either from Cuba or elsewhere, under the present law has not very materially swelled the revenues of the Government since 1909.

Mr. SMITH of Michigan. Oh, if the Senator will pardon me, I did not say that that was now the situation. I said that they had just got to work down there; that they are just opening their mines at a time when your party has come into power.

Mr. THOMAS. It is rather remarkable that they were so late in opening the enormous deposits down there when, I suppose, it has been possible to do so ever since Cuba achieved her independence.

Mr. OLIVER. Mr. President, I think I can explain the

matter, if the Senator from Colorado will allow me.

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Pennsylvania?

Mr. THOMAS. Certainly.

Mr. OLIVER. The Pennsylvania Steel Co. and the Beth-lehem Steel Co. have been mining ore in Cuba for a great many years and bringing ore up from there, but I think the deposits to which the Senator from Michigan [Mr. SMITH] refers are of another class of ore, of which immense deposits have been found of late years in other parts of Cuba. I know, in fact, that that is the case, because persons whom I know have been interested in developing some of those deposits. It is an entirely different kind of ore from that which is now being brought up from Cuba. It gives great promise of being found in enormous quantities, but it has to be roasted and subjected

to other treatment before it is fit for use.

Mr. THOMAS. Mr. President, I am informed by the Senator from Mississippi [Mr. Williams] that this hobgoblin of cheap iron ore from Cuba was a very prominent feature in the discussion during the debates upon the Wilson tariff bill in 1894. To my mind, the remarkable thing about Cuba is the formidable character of its resources which seem to threaten the industries of this country so tremendously just at present, that I am amazed that, instead of allowing her to achieve her independence as such, we did not annex her because of the fact that her resources are so superior, so much more accessible and obtain-

able than those of our own country.

I shall detain the Senate but a very short time, Mr. President, in referring to some of the arguments and statements of the junior Senator from Pennsylvania [Mr. OLIVER]. A discussion of wages and a comparison of them is, of course, always appropriate in tariff discussions, and statistics are available to any man who cares to avail himself of them. I do not at present intend to go into that subject at all, beyond saying that, if I cared to do so, the reports of the Pittsburgh survey and of investigations made at the request of certain shareholders of the United States Steel Corporation, together with the Government investigations, would disclose a wage situation quite as favorable to what is contended for on this side of the Chamber as any statements which have been made upon that subject as arguments in the opposite direction.

We are content with stating a few general facts, the most prominent of which is that the monetary value of the pig iron production of this country last year was somewhere in the neighborhood of \$385,000,000, the tonnage being about as given by the Senator from Pennsylvania; with an import into this country that is practically negligible, consisting, I think, of less than 200,000 tons, giving neither revenue nor the possibility or prospect of revenue, and relating to a basic element in a great

manufacturing department of the Nation's industries.

We believe-whether we believe so rightly or wrongly will, of course, be developed by the experiences of the Nation under this bill if enacted into law, but nevertheless we believe—that so far as possible the basic material entering into manufactures should be as cheap as possible to the manufacturers. It was upon that principle that these articles were, in the judgment of the Committee on Finance, to be free listed, and at the same time the duties upon those other elements or articles appearing in Schedule C should be lowered a reasonable per cent below the rates carried by the House bill.

Something has been said, Mr. concerning the President, menace of China and of the possibilities of that ancient Kingdom and new Republic in the matter of pig iron and iron and steel manufactures. It is true that some years ago a very large

iron and steel establishment was constructed in China, and has since, subject to the various disturbances which have taken place over there, been generally operated quite satisfactorily. A most interesting article concerning that institution appeared sometime ago, I think in the Review of Reviews, and Senators, if their curiosity or interest is excited, can very easily inform

themselves by an examination of that review as to the nature, extent, and capacity of this large institution.

It is true, Mr. President, that there are large natural deposits of iron in China, and that some day they will become available. is true, as stated by the Senator from Pennsylvania-that is, it is true in part—that there have been some importations of pig iron from China to the Pacific coast. I do not think, however, there have been any recent ones. I think they took place some four or five years ago; but the difficulty, Mr. President. if it is a difficulty, presented by those importations and by the possible competition of China, is one which arose out of and therefore must be solved, if a solution is necessary, by other considerations than that of the tariff, unless the tariff wall is to be raised so high as to be absolutely prohibitive.

As is well known there is now, and has been for the last 15 or 16 years, a dislocation of exchanges between our country, European countries, and the Orient, consequent upon our different money systems, they using an entirely different metal, although nominally upon a gold basis and subject, of course, to the fluctuations of exchange, which are always favorable to those countries as against us; in other words, the difference in price between the gold we use and the silver which they use operates as a bounty upon exports from those countries, and

always will, in consquence of which they can sell in gold-using countries, take the consideration received and exchange it for the money used in their countries, thus deriving an enormous profit therefrom. To illustrate, wheat raised in the Argentine Republic upon a silver basis may be shipped to Great Britain and sold upon a gold basis, but, with prices stationary and unaffected by the dislocation of exchanges, the amount of Argentine money which can be secured by the consideration received for the cargo of wheat is so much greater that competition with it becomes extremely difficult, or may become so, while the profit is, of course, merely a matter of calculation.

I am not going to hark back to the silver question, Mr.

President, but I simply want to emphasize the fact that until there is a regulation and fixity of exchange-and that is the fundamental question—between Asiatic and European producing countries and America until by some sort of international convention or agreement there is a fixity of exchange, the possible menace of competition may become extremely serious not now, but at a time when capital is attracted to a sufficient degree and labor conditions have become satisfactorily adjusted.

Mr. Thomas B. Reed, former Speaker of the House of Rep-

resentatives, in June, 1894, said:

We recognize that falling silver, by lowering the eastern exchanges, favors our competitors in Asia who sell similar produce—wheat, cotton, and other staples—in the markets of Europe.

And former Senator Teller, referring to the same subject, used this language some years afterwards:

Five gold dollars (or 1 sovereign) used to purchase 3 taels only, and 3 taels then paid the wages for one day of 25 Chinese mill hands; while to-day 5 gold dollars buy 8 taels, and 8 taels pay a day's wage to not 25 but 60 Chinese mill hands; such is the nature of the protest against cheapened silver which sums up our silver philosophy.

More recently this subject attracted the attention of Mr. James J. Hill, whose name, of course, is familiar to all Senators in the Chamber, and with whom I make no doubt a majority of them are personally acquainted. In January, 1910, he made this comment upon that situation:

As soon as capital is supplied to develop her native resources, she will furnish her own raw materials for manufacture, buying them in her own markets on the silver basis and selling them abroad on the gold basis. This will enable her, as long as her own people are content to accept these low silver prices for material and labor, to cut our prices in two. Bar silver sells at about 52 cents per ounce in New York. On this basis the silver in a dollar is worth about 45 cents. The Chinese manufacturer who can pay his workmen their low wage with silver worth its face, and sell his product for gold that is convertible into silver at twice its face, has an advantage which we can not ignore or escape.

This, then, is not a question of tariff; it is a great problem of exchanges, and always will be, unless and until we do the impossible thing-the erection of a prohibitory, instead of a so-called Chinese wall, between this Government and Asiatic Governments-or else, until we shall have recognized the importance of this great problem and the menace which it involves whenever capital shall, perhaps, in the distant future, enlist itself in aid of the development of the resources beyond the seas and agree upon some fixity of exchange whereby the world can do its business upon an accepted basis. As it is now, all trade with that country is very largely a gamble, because of the constant fluctuations between their kind of money and our kind of money.

Fortunately, however, there is no prospect of any immediate realization of Mr. Hill's apprehensions, for capital has not enlisted, the country is not settled, and the employment and the promise of capital in other directions is far greater than any temptation that those countries at present can offer. Therefore I do not believe this possible competition is at present of any serious consequence, however serious it may be at some time when the industry is organized. We should, however, pay attention to this dislocation of exchanges and meet it, as

should have done long ago.

Mr. OLIVER. Mr. President, the Senator from Colorado alluded to the importation of iron ore from Cuba as a negligible quantity. He may not have used that expression, but that is the way in which he wished it to be looked at.

Mr. THOMAS. I spoke of it, I think, as a negligible quantity.

tity.

Mr. OLIVER. The Senator did speak of it in that way? Mr. THOMAS. I think I referred to the importation of iron ore as a negligible quantity up to this time. I used some expression of that sort.

Mr. OLIVER. Last year there were imported into this country a little over 2,000,000 tons of iron ore.

Mr. THOMAS. What was the home production?
Mr. OLIVER. The home production was about 40,000,000 tons. There is one-twentieth of the entire output of the United States provided for from abroad. From other countries than Cuba, principally from Spain, there were imported 732,949 tons

of iron ore, on which there were collected duties amounting to \$109,942. From Cuba there were imported 1,281,000 tons.

I know something about quantities, and that is a very, very large quantity of ore. Under our Cuban treaty there was collected on that ore only 12 cents a ton, amounting to \$158,824.16.

Mr. THOMAS. Let me ask the Senator if a good deal of that ore, or some of it, was not iron ore that carried some other metallic contents, and was brought to this country for the other metallic contents?

Mr. OLIVER. No; I think not, Mr. President. If iron ore is imported for the other metallic contents, the customhouse sees to it that it is not imported as iron ore, but that the other more valuable metallic contents are the ones upon which duties are levied.

Mr. THOMAS. Let me ask the Senator if it was not a class of iron ore that was imported for certain specific purposes—in other words, not coming into competition with, but supplementary to, our home production?

Mr. OLIVER. So far as the Cuban ore is concerned, I can say that that is not the case at all. It is imported because the Maryland Steel Co., which is a branch of the Pennsylvania Steel Co., and has its plant located at Baltimore, and the Bethlehem Steel Co., get a very large part of their supply of ore from Cuba, where they own the mines; and they are now preparing to bring it all from that source.

Mr. SMITH of Michigan. Mr. President, will the Senator from Colorado permit me?

Mr. THOMAS. Certainly. Mr. SMITH of Michigan. Even the Wilson bill, which I mentioned last several months ago, but which it is necessary now to mention in order to show the extreme to which you are going, carried a duty of 40 cents a ton on iron ore. We collected, I think, more revenue this year from the ore duty than the Senator from Pennsylvania has stated. My information is that last year we collected about \$262,000 of revenue. That revenue, if remitted, will go into the pockets of the Pennsylvania Steel Co., which is the Pennsylvania Railroad Co., one of the most gigantic railroad systems of the United States. The Chief of the Bureau of Corporations stated last year that the Pennsylvania Steel Co. was owned by the Pennsylvania Railroad Co. Yet you propose to remit \$262,000 a year now, on the basis of present importations, with the prospect of ultimately importing 600,000,000 tons of ore under your bill free, if it should remain the law of the land and the steel company should continue to ship its ore already in sight to the American market.

Mr. THOMAS. Mr. President, I had occasion about a month ago to say that the Wilson bill was about the most complete caricature of a tariff reform bill that was ever passed by the

American Congress.

Mr. SMITH of Michigan. That is what Mr. Cleveland said about it.

Mr. THOMAS. Yes; and for once Mr. Cleveland was right.
Mr. SMITH of Michigan. But Mr. Bryan did not say that
about it. He said is was the best bill that had ever been put

forth by his party.

Mr. THOMAS. Then for once Mr. Bryan was mistaken.

Mr. SMITH of Michigan. Yes; but he said it several times,

so that evidently he was mistaken several times.

Mr. THOMAS. The Wilson bill was a protectionist bill in disguise. It was converted into such a bill by the United States Senate. One of the few good things that the then President of

the United States did was to withhold his signature from it.

Mr. SMITH of Michigan. Oh, no; the thing he ought to have done was to have vetoed it and saved the country from disaster.
Mr. THOMAS. I quite agree with the Senator; but not, per-

haps, for the reason the Senator has in mind as the basis of the agreement.

Mr. SMITH of Michigan. He ought to have vetoed it, because he denominated it a piece of perfidy and dishonor.

Mr. THOMAS. Yes.

Mr. SMITH of Michigan. If it was a piece of perfidy and diskonor, he ought to have vetoed it.

Mr. THOMAS. Certainly. Mr. SMITH of Michigan. I am not saying this to criticize the late President Cleveland, because I admired him, but the Democratic Party was responsible for that bill, as it was in full control of the Government.

Mr. THOMAS. I quite agree with the Senator, Mr. President, that the bill should have been vetoed; but I am also willing to give the President credit for refusing to sign it. It was a bill which involved party perfidy and national dishonor from the basis of the Democratic position; but we do not propose, if we can help it, to have this bill involve those elements.

Mr. SMITH of Michigan. I should like to ask the Senator from Colorado whether he maintained, with his usual vigor and ability, the righteousness of that legislation at the time?

Mr. THOMAS. Does the Senator refer to the Wilson bill?

Mr. SMITH of Michigan. Yes.

Mr. THOMAS. On the contrary, I felt after the bill came to the Senate and was mangled here and was sent back to the House that it should have been rejected by the House as well as by the Senate.

Mr. SMITH of Michigan. Everybody felt that way after it

came here.

Mr. THOMAS. I felt that way. The Senator has asked for

my individual opinion.

Mr. SMITH of Michigan. The whole country felt that way about it. But after Mr. Wilson, the author of the bill, was carried out of the House of Representatives upon the shoulders of Mr. Bryan and his fellow Democrats there was great glee in the camp of the Democratic Party because they had at last got rid of the McKinley bill and had enacted in its place some-

thing that really was in harmony with Democratic pretensions.

Mr. THOMAS. The bill was a fair bill when it left the
House, I think. I do not think it was as good a bill as this

one; but that is neither here nor there.

The Department of Commerce and Labor report of imported merchandise entered during the year ending June 30, 1912, gives the following as the importations of iron ore:

Chromate of iron, or chromic ore, 47,007 tons.
Iron ore, including manganiferous iron ore, and dross or residuum from burnt pyrites, 732,949 tons.
Ditto, reciprocity treaty with Cuba (15 cents per ton, less 20 per cent), 1,281,868 tons of ore.

That is to say, iron ore containing material making it specifically desirable, just as I supposed.

Mr. OLIVER. Mr. President, where does the Senator find

that characterization?

Mr. THOMAS. I am reading from page 32 of a document entitled "Department of Commerce and Labor. Imported merchandise entered for consumption in the United States and duties collected thereon for 1912.

Mr. OLIVER. Does it state that it is imported because it

contains ingredients making it desirable-

Mr. THOMAS. This is the department's statement, and this includes manganiferous iron ore.

Mr. SMOOT. Will the Senator read the designation again?
Mr. THOMAS. Yes; I will read the paragraph again. It
is entitled "Iron in ore."

Mr. OLIVER. I only referred to the phrase which the Sena-

tor used, "containing other ingredients.

Mr. THOMAS. The Senator from Utah [Mr. Smoot] has asked me to read it again.

Mr. OLIVER. Very well. Mr. THOMAS (reading)-

Chromate of iron or chromic ore (tons, free), 47,907.
Iron ore, including manganiferous iron ore, and dross or residuum from burnt pyrites (tons, 15 cents a ton), \$732,949.44.
Duty under reciprocity treaty with Cuba (15 cents, less 20 per cent), \$1,281,868.

Mr. SMOOT. What I was interested in knowing was on what theory the Senator says that is a better iron ore.

Mr. THOMAS. I did not say it was a better iron ore. I did not intend to say that. I said it was a different iron ore, but containing other metallic elements.

Mr. SMOOT. There is nothing there that would ever be smelted for any other product than iron. All that that ore is

used for is just the same thing that our ore in this country is used for; that is to say, making pig iron.

Mr. THOMAS. So the Senator says; but if this iron ore includes maganiferous iron ore, I know of no reason why it should not be imported into this country and used for the manganese which it contains. I very well remember that some years ago a very warm friend of mine, afterwards a Republican Member of Congress, came to Washington and used his best efforts to secure the enactment of a duty upon manganese iron ore in this country, because of the importation from the Island of Cuba of iron ores containing manganese, thus supplying the market with foreign manganese, and I have no doubt this is the class of ore to which his efforts were at that time directed.

Mr. OLIVER. Mr. President, there could not be that quantity of so-called manganiferous iron ore used in this country

in a year.

Mr. THOMAS. The Senator perhaps did not notice the language. The language is, "iron ore, including manganiferous iron ore."

Mr. OLIVER. I understand. A small percentage of the imported iron ore is no doubt manganiferous iron ore, imported by the only manufacturer of ferromanganese in the country, the United States Steel Corporation, which the House bill made such a terrific effort to protect, for the purpose of making ferromanganese. The quantity, as compared with the total quantity of 2,000,000 tons, would be insignificant, and none of that would come from Cuba.

Mr. WILLIAMS. Mr. President, I should like to ask the Senator from Pennsylvania a question for my own information. Was not a good deal of the ore which was brought over here

Spanish and Swedish ore?

Mr. OLIVER. A great deal of it, I think, was Spanish. I am without accurate information on the subject, however. They do bring over a considerable quantity of Spanish and African ore, but not much from Sweden.

Mr. WILLIAMS. Are not the Spanish and the Swedish ores used mainly to supplement our ores instead of as a substitute

for them?

Mr. OLIVER. I rather think not.

Mr. WILLIAMS. That has been my information for a long

Mr. OLIVER. The reason that Spanish ores, and in fact all of these imported ores, are brought in is for the purpose of having them used by furnaces near the seacoast, that can get them at a cheaper rate than they can obtain by having them transported from Lake Superior. Of course, the bringing of ore from Lake Superior to eastern Pennsylvania involves very long and very expensive hauls, and as a consequence some of these furnaces use imported ores. I think it will be found that most of these ores are imported for that purpose. Some little part of them may be brought in for their chemical composition, but not to any considerable extent.

The VICE PRESIDENT. The question is on agreeing to the

amendment proposed by the committee.

The amendment was agreed to.

The reading of the bill was resumed, beginning with para-

graph 105, page 29.

Mr. OLIVER. Mr. President, it is now nearly 6 o'clock, and Mr. OLIVER. Mr. Fresident, it is now hearly 6 o'clock, and I have considerable to say on the coming paragraph. I suggest to the Senator in charge of the bill that perhaps it would be inadvisable to go further this evening.

Mr. SIMMONS. Mr. President, if the Senator from Pennsylvania does not desire to occupy the five minutes remaining, I shall not object to the bill being laid aside for to-day.

Mr. OLIVER. I do not think we could get through with this paragraph within a reasonable time.

paragraph within a reasonable time.

Mr. SIMMONS. It would take the Senator more than five minutes, would it, to finish his remarks?

Mr. OLIVER Oh, yes.
Mr. SIMMONS. Then, with the consent of the Senator in charge of this part of the bill. I suggest that the bill go over for the day. I do not think it is necessary to put the motion. If the Chair thinks it is necessary, I ask that it go over for the day.

The VICE PRESIDENT. Is there any objection? The Chair

hears none.

Mr. WARREN. I desire to give notice that on Thursday next, after the routine morning business, I shall address the Senate on the tariff bill, especially with reference to agricultural products.

EXECUTIVE SESSION.

Mr. BACON. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 1 hour and 10 minutes spent in executive session the doors were reopened, and (at 7 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, August 5, 1913, at 12 o'clock meridian.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 4, 1913. ASSISTANT TO THE ATTORNEY GENERAL.

George Carroll Todd to be assistant to the Attorney General. UNITED STATES MARSHAL.

B. A. Enloe, jr., to be United States marshal for the eastern district of Oklahoma.

UNITED STATES ATTORNEYS.

Robert P. Stewart to be United States attorney for the district of South Dakota.

Francis M, Wilson to be United States attorney, western district of Missouri.

SENATE.

Tuesday, August 5, 1913.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved.

BUST OF WILLIAM PITT, LORD CHATHAM (S. DOC. NO. 150).

The VICE PRESIDENT. The Chair lays before the Senate communication from the President of the United States, which will be read.

The Secretary read as follows:

THE WHITE HOUSE, Washington, August 4, 1913.

Hon. THOMAS R. MARSHALL, The Vice President.

The Vice President.

My Dear Mr. Vice President: I take pleasure in transmitting herewith a copy of a letter recently received from Lady Paget, speaking for a number of American ladies now living in England, in which they express the desire to join in presenting to the United States, in connection with the approaching Anglo-American peace centenary, a bust of William Pitt, Lord Chatham, the friend and champion of America, to be placed in the White House. I venture to suggest that inasmuch as the gift must be received through me as President, but can not be accepted without the permission of Congress, the Houses graciously grant their permission.

Cordially and sincerely, yours,

Wooddow Wilson.

The VICE PRESIDENT. The communication and the accom-

The VICE PRESIDENT. The communication and the accom-

panying paper will be printed and referred to the Committee on Foreign Relations.

ESTATE OF ADAM L. BOSE, DECEASED (S. DOC. NO. 140).

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Chief Justice of the United States Court of Claims, which will be read.

The Secretary read as follows:

CHAMBERS UNITED STATES COURT OF CLAIMS, Washington, D. C., August 4, 1913.

The honorable the President of the Senate, Washington, D. C.

Sir: I am informed that an examination of the findings in the eighthour navy-yard cases, so called, reveals the fact that findings in favor of the estate of Adam L. Rose, deceased (No. 13, 727-132, Cong.), have twice been certified to Congress, first on March 14, 1910 (S. Doc. 432, 61st Cong., 2d sess.), and again on January 31, 1911 (S. Doc. 801, 61st Cong., 3d sess.).

I have, therefore, the honor to request you to order a return of the former findings, above referred to, to wit, those covered by Senate Document 432, Sixty-first Congress, second session, to the Court of Claims for correction.

Respectfully,

EDWARD K. CAMPBELL,

Chief Justice.

EDWARD K. CAMPBELL, Chief Justice.

The VICE PRESIDENT. The Chair assumes that this matter is in the hands of the Committee on Appropriations. So the communication will be referred to the Committee on Appropriations.

TOBACCO STATISTICS (S. DOC. NO. 152).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Treasury, transmitting, in response to a resolution of the 10th ultimo, a statement showing the names and addresses of the 10 largest manufacturers of tobacco and snuff, the number of pounds manufactured and the amount of internal-revenue tax paid by each, etc., together with similar information with respect to cigars weighing more than 3 pounds per thousand and cigars weighing not more than 3 pounds per thousand, etc., which, with the accompanying paper, was, on motion of Mr. Hitchcock, ordered to lie on the table and to be printed.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by A. C. Johnson, assistant enrolling clerk, announced that the Speaker of the House had signed the enrolled bill (H. R. 6383) to amend section 19 of an act entitled "An act to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of public buildings; to authorize the purchase of sites for public buildings; and for other purposes," approved March 4, 1913, and it was there-upon signed by the Vice President.

PETITIONS AND MEMORIALS.

The VICE PRESIDENT. The Chair lays before the Senate a memorial from Philip L. Schell, of New York, with reference to Schedule K of the tariff bill, which embraces the views suggested by the Senator from Connecticut [Mr. Brandegee] with reference to the time of the taking effect of Schedule K. Unless some Senator desires to have the memorial read it will not be

read but simply referred to the Committee on Finance.

Mr. HITCHCOCK. I present a belated petition which I did
not receive until to-day, signed by 199 citizens of Nebraska,
praying for the adoption of an amendment to the Constitution

granting the right of suffrage to women. I ask that the petition be referred to the Committee on Woman Suffrage.

The VICE PRESIDENT. The petition will be referred to the Committee on Woman Suffrage.

EASEMENTS IN RECLAMATION PROJECTS.

Mr. JONES, from the Committee on Irrigation and Reclamation of Arid Lands, to which was referred the bill (S. 1355) relating to easements in connection with reclamation projects, reported it without amendment and submitted a report (No. 98) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH of Michigan:

A bill (S. 2882) to remove the charge of desertion from the record of Charles M. Clark (with accompanying paper); to the Committee on Military Affairs.

By Mr. BANKHEAD (by request):

A bill (S. 2883) to authorize and more specifically define the laws authorizing and granting permission to use and occupy Government lands, and for other purposes; to the Committee on

Mr. CHILTON. For my colleague, who is necessarily absent from the Senate, I introduce three bills, and ask that they be

appropriately referred.

By Mr. CHILTON (for Mr. Goff):

A bill (S. 2884) granting an increase of pension to George A. Greenlee;

A bill (S. 2885) granting an increase of pension to John P. Fetty (with accompanying papers); and

bill (S. 2886) granting an increase of pension to David Klingensmith (with accompanying papers); to the Committee on Pensions.

By Mr. McLEAN: A bill (S. 2887) granting an increase of pension to Caroline M. Hull (with accompanying papers); to the Committee on Pensions.

By Mr. MARTINE of New Jersey:

A bill (S. 2888) granting an increase of pension to Sarah Frances Barriger (with accompanying papers); to the Committee on Pensions.

By Mr. POMERENE:

A joint resolution (S. J. Res. 62) to authorize the reinstatement of Adolph Unger as a cadet in the United States Military Academy; to the Committee on Military Affairs.

AMENDMENT TO THE TARIFF BILL.

Mr. BURTON submitted an amendment intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

GOVERNMENT 2 PER CENT BONDS.

Mr. SMITH of Michigan submitted the following resolution (S. Res. 151), which was read:

(S. Res. 151), which was read:
Whereas William G. McAdoo, Secretary of the Treasury, has charged that the leading banks and bankers of New York City have entered into a conspiracy to depress the value of the Government 2 per cent bonds held as collateral by the Treasury for Government deposits and used as the basis for the issue of national bank notes, and for the further purpose of preventing the passage of currency legislation at the present extraordinary session of Congress; and Whereas some of said New York bankers have denied such charge of a conspiracy and have declared their desire to offer proof that such charge is not true: Therefore be it

Resolved, That the Committee on Banking and Currency of the Senate, or any subcommittee thereof, be directed to invite the said William G. McAdoo, Secretary of the Treasury, before such committee for the purpose of allowing him to present proof of his said charge and allegations as to such conspiracy, and that said committee or subcommittee be instructed to immediately make an investigation into such charges and into said denials as made by said New York bankers.

Mr. SMITH of Michigan I request that the resolution lie

Mr. SMITH of Michigan. I request that the resolution lie on the table.

The VICE PRESIDENT. The resolution will lie on the table.

INVESTIGATION BY FINANCE COMMITTEE.

Mr. FLETCHER. There is on the table calendar a resolution (S. Res. 88) submitted by the senior Senator from Pennsylvania [Mr. Penrose] relative to the printing of 2,000 copies of the amendment offered by him to the motion of the Senator from North Carolina [Mr. SIMMONS] relative to H. R. 3321, the tariff bill. I ask that the resolution be taken from the calendar and postponed indefinitely.

The VICE PRESIDENT. Without objection, the resolution

will be postponed indefinitely.

THE PANAMA CANAL (S. DOC. NO. 146).

Mr. O'GORMAN. Mr. President, a few days ago the President transmitted to the Senate a report of the Commission on Fine Arts containing certain recommendations regarding the artistic structure of the Panama Canal. I ask unanimous consent that the report, including the maps and illustrations, be printed as a public document.

The VICE PRESIDENT. Is there objection? The Chair

hears none, and the order is entered.

DOCUMENT ON WOMAN SUFFRAGE (S. DOC. NO. 155).

Mr. CHAMBERLAIN. Mr. President, I renew my request of a few days ago to have printed as a public document extracts from the RECORD with reference to the presentation of petitions for woman suffrage.

The VICE PRESIDENT. Is there objection at the present time? Mr. FLETCHER. I did not understand the request, Mr.

President.

The VICE PRESIDENT. It is a request to print as a public document extracts from the RECORD, being the addresses made by the several Senators at the time of the presentation of the petitions on woman suffrage on Thursday of last week.

I have no objection to urge to the request. Mr. FLETCHER. However, I would like to suggest to the Senator from Oregon that he have his request referred with the proposed document to the Committee on Printing. That would be the regular to the Committee on Printing. That would be the regular course. I do not believe there will be any opposition to favorable action on the request. The trouble is in a matter of this kind coming up as it does a precedent is likely to be set that will be found to be very objectionable in the future. The regular course in such matters is to refer them to the committee having charge of printing.

I believe it will be found that that practice is better than to have the order made in this way. It gives an opportunity to arrange the matter and ascertain the cost and other facts in

connection with the printing.

I would prefer, if the Senator can see his way clear to do so, to have him modify his request and ask that it and the proposed document be referred to the Committee on Printing.

Mr. CHAMBERLAIN. If it will hasten the matter any I will ask to have it referred, but it was up before the Senate the other day and there did not seem to be much objection to it, and the corrections which seemed necessary have been made in the document. However, I will request that the matter be referred to the Committee on Printing.

The VICE PRESIDENT. The Chair understands the Sena-

tor from Oregon to ask that the matter shall be referred to the

Committee on Printing

Mr. CHAMBERLAIN. Yes, sir.

The VICE PRESIDENT. The request and the proposed document will be referred to the Committee on Printing for action.

IRON TRADE WITH CHINA.

Mr. OLIVER. Mr. President, in the few remarks I made yesterday with reference to the proposition of the Committee on Finance to place pig iron upon the free list I referred to the competition with China in pig iron and some of the forms of steel. I have here an article which appeared a little more than a week ago in the Christian Science Monitor, a very ably conducted journal, published at Boston, Mass., on that subject, which bears out in every way what I said. I ask that it be read. It is very short.

The VICE PRESIDENT. Is there objection?

Mr. JAMES. We could not hear the Senator from Pennsylvania as to what the request is. I thought the Senator from Missouri [Mr. Stone] was listening, but he himself seems not to have heard it.

Mr. OLIVER. My request is that an article published in the Christian Science Monitor be read. It is with reference to the development of the iron and steel industry in China. It is a short article.

Mr. JAMES. It is not on Christian Science, however, but it is on the steel situation?

Mr. OLIVER. It is on the steel situation, from the Christian Science Monitor.

The VICE PRESIDENT. There being no objection, the article will be read.

The article was read and ordered to lie on the table, as

IRON TRADE WITH CHINA TO BOOM IF TARIFF IS PASSED—UNDERWOOD BILL CUTS \$2.50 A TON OFF ORIENTAL PRODUCT, PROMISING GREAT DEVELOPMENT OF BUSINESS ALREADY PROFITABLE—TO STIMULATE MINING.

One immediate effect of the Underwood tariff bill, if ultimately passed as amended by the Senate Fimance Committee, will be to stimulate the iron and iron-ore trade between China and the United States. This is a trade that has been discovered and opened up only in the last few

years. Certain interests on the Pacific coast have already developed a paying business bringing both iron ore and pig iron from China to Puget Sound smelters and mills, and the trade-awaited only a little encouragement from the Government to make it increase rapidly.

The existing tariff on iron ore is but 15 cents a ton, while the tariff on pig iron is \$2.50 a ton. The Underwood bill as it passed the House put iron ore on the free list, but retained an 8 per cent ad valorem duty on pig iron and similar products. In the context of the public of the public

Mr. MARTINE of New Jersey. Mr. President, I hesitate to burden the Record unnecessarily with matters, but there is a proverb that one story is good until the other side is told. Since the distinguished Senator from Pennsylvania [Mr. Penrose] made most disparaging and doleful statements and stories regarding his Commonwealth and the iron industry some one in that State was stirred up to send me a letter. I desired to present it a day or two ago, but in the absence of the Senator I felt that it would not be courteous, and hence I deferred it.

On the edge of this letter is pinned a little printed slip, which

SAYS:

PENROSE SAYS 1,000 MEN ARE IDLE HERE.

United States Senator Penrose has made a discovery regarding industrial conditions in Lebanon County. He declared on the floor of the Senate at Washington that 1,000 men in this county alone are out of work just now, due to trade stagnation and uneasiness regarding possible depression under the new tariff bill.

Senator Penrose has not favored Lebanon with a visit for years, and where he got his vision of a thousand men in this county out of work because of trade depression is hard to guess, local folk say.

ME JAMES E MARTINE

Mr. James E. Martine, United States Senator, New Jersey.

DEAR SIR: I noticed newspaper stories of a "sharp discussion" between yourself and Senator Penrose, of Pennsylvania, regarding the industrial situation in Pennsylvania. The esteemed senior Senator from Pennsylvania hasn't been in Lebanon for some years, as far as the public knows, and when he talks about 1,000 men idle in this county because of trade stagnation he isn't informed as to the situation.

the public knows, and when he talks about 1,000 here are county because of trade stagnation he isn't informed as to the situation.

Two of the blast furnaces in this county are out of blast for reasons not connected in any way with the tariff and not because of any depression in the iron trade. Any Lebanon man in the iron business could explain the reasons. Three others are idle for relining, and the employees are at work making repairs, hence few or no men lost employment there, and prospects are that at least two of the three will go into blast as soon as the bricklayers and mechanics can complete their work.

Three others are in blast. This makes eight stacks, all we have in this county. The Keystone furnace, in Reading, Pa., shut down recently for relining, is to go into blast very soon.

H. H. Light, a local rolling-mill operator, has just put into operation a plant with over 200 men at Schuylkill Haven, and bought another mill, near Baltimore, Md., to put into operation very soon and to employ 500 men. All the rolling mills in Lebanon are in operation except for occasional shutdowns of a few hours now and then because of the hot wave.

The American Iron & Steel Co., employing over 3,000 men here and in Reading, about 2,300 or more of that number in this city and suburbs, is building an addition to roll steel, as shown by the following newspaper clipping from the Harrisburg Patriot:

PROGRESS ON NEW LEBANON STEEL PLANT.

" LEBANON, July 30.

"Lebanon, July 30.

"The American Iron & Steel Manufacturing Co., of this city, who recently decided to build a new \$1,000,000 modern steel plant, is going right ahead in carrying out the plans for the big new plant here. Hundreds of additional men will be given employment in the steel works. The American Bridge Co., of Pittsburgh, has been commissioned to proceed with the erection of about 2,400 tons of steel for an openhearth plant. The new works will be equipped with four 50-ton openhearth furnaces; blooming and billet mills will also be provided for. At present the local company is not a producer of its steel, and has been purchasing its requirements in the open market."

I am pasting up some more clippings to show how the iron and steel business and incidentally the silk business, which is always slack—

I will say for the benefit of other Senators-as, of course, the Senator from Pennsylvania well knows—that in Allentown, Pa., known as the Silk City, silk is a great industry when business troubles are in sight, are "depressed."

The writer of the letter inserts the following newspaper clippings:

BESSEMER MILL HAS A RECORD—EVERY DEPARTMENT OF PENNSYLVANIA STEEL PLANT RUNNING FULL BLAST—FEAR SLUMP NO LONGER.

STEELTON, July 19.

STEELTON, July 19.

The fear of a slump in activities at the local plant of the Pennsylvania Steel Co. of a few weeks ago has disappeared, and the entire plant during the past week has again taken its stride with every department running to its capacity. The only department now idle is the Lochiel blast furnace, and the opinion prevails that this will not be again started unless its product is urgently needed.

The week ending to-day has been the biggest, so far as the production of steel with the duplex system is concerned, in the history of the plant, and the Bessemer mill will have a record output for the week. Another big run this week was made at the billet mill, which worked on tie and splice plates, and the foundries, open hearths, rail mill, and, in fact, every mill is now booming.

PUDDLERS ACCEPT ADVANCE ON WAGES.

PUDDLERS ACCEPT ADVANCE ON WAGES.

Employees of the Reading Iron Co., which has 3,000 men on its pay roll, last night accepted the offer of the management to advance the puddling rate from \$4.75 per ton to \$5, with a further advance when trade conditions warrant. The men also decided to organize and become affiliated with the American Federation of Labor.

The writer of the letter then continues:

Here in Lebanon the Lebanon Stove Works, idle for some time, will start its plant again in two weeks, and the Lebanon Silk Co., rushed with orders, will start a branch factory in East Lebanon in a very shart time.

shart time.

Congressman Kreider, of this district, who has four factories in this listrict, is building a big addition to his factory at Annville, to employ many more men and women.

I regret to say that I can not give you my name. I am working for a Republican who believes as firmly in protection as he does in the New Testament—maybe more—and this review of the situation, as taken from Harrisburg, Lebanon, and Reading papers, in the heart of the pig-iron and steel district, is written without consultation with him. I wish you success, and believe that you represent the people of New Jersey as they should be represented.

Mr. PENROSE. Will the Senator allow me to interrupt him? The VICE PRESIDENT Does the Senator from New Jersey

The VICE PRESIDENT. Does the Senator from New Jersey yield to the Senator from Pennsylvania?

Mr. MARTINE of New Jersey. Yes.

Mr. PENROSE. Of course I shall absolutely refuse to reply

to an anonymous communication. I deem it unworthy of the consideration of the Senate.

Mr. MARTINE of New Jersey. I realize that weakness, but still it is entirely within the province of the Senator from Pennsylvania to do as he may choose with reference to it.

Mr. PENROSE. I deem it a frivolous consumption of the time of the Senate to submit an anonymous communication to this body

Mr. MARTINE of New Jersey. Possibly; but what has the Senator from Pennsylvania to say with reference to the printed slips that are quoted from newspapers in Lebanon County and in Reading?

Mr. PENROSE. The printed slips come from Democratic newspapers in the city of Harrisburg and largely refer to industries in adjoining counties. My remarks applied to the county of Lebanon. I stand emphatically on them and defy successful contradiction.

Mr. MARTINE of New Jersey. Here is a statement from Lebanon

Mr. PENROSE. The Senator's cause is indeed weak when he reads anonymous communications to the Senate of the United Mr. MARTINE of New Jersey. You quoted no authority with reference to your printed slips. Here is one from a Lebanon paper, in which it is stated-

Mr. PENROSE. I quoted my own authority.

Mr. MARTINE of New Jersey. Here is a printed slip, which says "Penrose has not favored Lebanon with a visit for years" and that he knows nothing about the situation. I realize that being anonymous is a weakness of the letter, but the posi-

Mr. PENROSE. I am glad the Senator has some ray of intelligence to realize in his remarks the weakness of his position, Mr. MARTINE of New Jersey. There is no Senator who will

attempt to say that this statement is false.

Mr. PENROSE. I say it is unworthy of discussion when we are all anxious to pass this bill as promptly as possible.

Mr. MARTINE of New Jersey. I know you are very anxious, but you are quite as anxious to portray your picture of doleful sadness throughout the length and breadth of this country. No one rose then to criticize the Senator's authority; but now, let me say with reference to your colleague and neighbor [Mr. OLIVER], who delivered a long diatribe on the question of ore, iron, and steel, that I hold in my hand a paper that is akin-Mr. OLIVER. Mr. President-

The VICE PRESIDENT. Does the Senator from New Jersey yield to the Senator from Pennsylvania?

Mr. MARTINE of New Jersey. Certainly,
Mr. OLIVER. Will the Senator from New Jersey please give

the definition of the word he has just used?

Mr. MARTINE of New Jersey. Well, I would not presume so much on the lack of intelligence of the Senator from Pennsylvania as to attempt a definition. Here I hold in my hand a paper that is akin to a leaflet from the Bible for the average Republican. It is a clipping from the New York Tribune of yesterday, and it goes on to say, referring to the steel report
Mr. LIPPITT. Mr. President—

The VICE PRESIDENT. Does the Senator from New Jersey yield to the Senator from Rhode Island?

Mr. MARTINE of New Jersey. Certainly.
Mr. LIPPITT. I have seen some intimations that lead me to think that that leaflet has been torn out of the Republican bible. I do not know that we should like to accept that authority.

Mr. MARTINE of New Jersey. Well, you stood by it, and it stood by you. It stated a good many things that I did not think could be attributed decently to a book that might be called the Bible, but for 40 years it was gospel to you; you fattened on it, supped from it, fed from it as a babe would suckle at the breast of its mother, and now because it begins to tell the truth in the light of this generation you begin to hesitate.

The New York Tribune of yesterday, just at the time when the doleful tale from Pennsylvania in regard to steel conditions was being told by the Senator from Pennsylvania, had this to

say:

The significance of this report-

Referring to the steel report-

is appreciated when considered in the usually accepted light that the prosperity or adversity of the Steel Corporation gives an index to actual trade conditions throughout the country.

The Iron Trade Review says that heavy buying of pig iron in leading iron centers has brought great encouragement to the entire trade and furnishes strong evidence that prosperity will be enjoyed throughout the remainder of the year.

I realized the force of the suggestion advanced by the distinguished and lovable Senator from New Hampshire [Mr. GAL-LINGER] when he said that the present prosperity came under Republican domination, as we are living under a Republican tariff law. So we are; but the Senator knows and everybody else knows that money and finance are like water; they will float and change at the least disturbance; and, so, in the light of statements which Senators have made as to disturbed conditions, we might imagine that the business world would be disturbed; but, on the contrary, all the evidence is that it is not disturbed. Now, I say, in heaven's name cease your doleful prophecies; be of good cheer and good heart. We are as much interested in this great country as you can possibly be; we are not going to shut the doors to the trade possibilities of Penn-Even your Sharples creamery plant will go on; we will open new doors and new avenues, and with a reasonable tariff I think I can see your Sharples separators trying to find a market with the hope of separating and dividing the Milky Way in the heavens above.

Mr. OLIVER. Mr. President, I know that great latitude is allowed the Senator from New Jersey, but I do not see by what authority he connected my name with the article in the New York Tribune from which he has quoted, or with any discussion that has been had on the subject of depression in business

consequent upon the introduction of the pending tariff measure, because from first to last, in what little I have spoken on the subject I defy the Senator from New Jersey, or any other Senator, to point to a single word I have said on the subject of depression.

My position, Mr. President, is that this legislation will lead to depression; but I have studiously refrained from talking about conditions as they exist to-day, either in the steel or any other So I feel disposed to resent the introduction of my name by the Senator from New Jersey and his making me the

text for any remarks upon the subject.

Mr. MARTINE of New Jersey. Mr. President, I had no thought of doing anything that might be deemed as unkind or

in the least discourteous.

Mr. OLIVER. The Senator can say anything unkind that he

pleases so long as it is true.

Mr. MARTINE of New Jersey. Great God, I have not an unkind thought in my heart, and would not express it if I had. I want, however, to ask the Senator in all fairness-perhaps my eyes and vision were wrong; perhaps my ears failed to carry to my brain the correct sound of the voice-did we not yesterday evening hear the Senator from Pennsylvania make reference to the steel and iron interests, either in the form of a

document or by oral statement?

Mr. OLIVER. Of course, Mr. President, I did—

Mr. MARTINE of New Jersey. That was my text.

Mr. OLIVER. But I did not allude to any present depression in the steel or iron business, as the Senator said I did.

Mr. MARTINE of New Jersey. The Senator did not speak in any glowing terms of its future or its hopes in the near-by.

Mr. OLIVER. Because I realized what was going to happen from the interference of such measures as are proposed under

the leadership of the Senator from New Jersey.

Mr. MARTINE of New Jersey. The Senator dignifies, magnifles, and compliments me too much. I am not a leader at all; I am an humble citizen in the party. I only said that, as I understood the Senator's remarks, he did not refer to apples or potatoes; but he referred distinctly and directly to steel, and I felt that when the New York Tribune floated in and its financial column was so rich and full of contradictions, it was only fit and reasonable and proper that, in a decorous and dignified way, I might confront him with his own doctrine and feed him with his own medicine, so to speak.

PROPOSED CURRENCY LEGISLATION.

Mr. HITCHCOCK. Mr. President, I have here a resolution adopted by the Democratic county central committee of Sarpy County, Nebr., which I should like to have read at the desk.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

The Secretary read as follows:

Whereas President Wilson has wisely recommended to Congress the immediate passage of a currency measure carefully designed to protect the people and honest business of the country against the possibility of the money stringency now and always threatened by the powerful capitalistic combinations whenever just remedial legislation seems probable or possible; and

Whereas it is imperative that the administration at this time receive the loyal support of all Democratic Members of the House and Senate in its great battle against greed and privilege, and for the common people: Therefore be it

people: Therefore be it

Resolved by the Democratic county central committee of Sarpy County, Nebr., That all Democratic representatives in Congress be, and hereby are, called upon and earnestly requested to loyally and patriotically give unqualified support to the great administration measures now pending before Congress relative to tariff and currency, and to defer until some future session of Congress the offering of amendments or criticism likely to delay, obstruct, or defeat the passage of either measure; be it further

Resolved, That copies of this resolution be immediately transmitted to our representatives in Congress, Hon. Gilbert M. Hitchcock and Hon. C. C. Lobeck.

Adopted July 19, 1913.

B. J. Melia, Chairman.

B. J. MELIA, Chairman,

W. D. Schaal, Secretary, Springfield, Nebr.

Mr. HITCHCOCK. Mr. President, I should like the opportunity of saying a few words upon this resolution, for the reason that it is pretty well known here, as well as in my State, that I am strongly opposed to any comprehensive currency legislation during the present session. I think this question is too difficult and too delicate for Congress to undertake to pass upon hurriedly in the closing days of an extra session called for another purpose. I am in entire sympathy with the idea that some reformation of our banking and currency laws is desirable, but I have no idea that any emergency exists which will excuse Congress in railroading through a revolutionary measure such as has been introduced by my friend from Oklahoma [Mr. Owen].

The delicacy and the difficulty of this great question demand

more than ordinary discussion and more than ordinary study.

I am very sure that I have not had the necessary time to give to it, and I believe I echo the sentiment of most Senators in this Chamber in saying that they have not had the necessary time to give to this new bill during the present session. only possible reason for yielding unqualified support to this measure is upon the theory that we are or may be confronted by an emergency; we are urged to hurry upon the theory that as the result of tariff legislation, or because of some possible conspiracy of great money interests, the business world may be We are advised that this bill should be railroaded through Congress in order to protect the people of the country from the evils that might come.

But, Mr. President, it is easy to see, by a mere reading of the bill, that it is not and can not be an emergency measure, for the reason that it proposes a permanent revolution in our banking and currency system, and also for the reason that it will take at least a year to organize the new reserve banks

according to the terms proposed in the bill.

Mr. President, the Senate is in the midst of a tariff discus-The country has made up its mind upon the tariff and announced it by an election. Congress has about made up the bill for the new tariff. The country is ready for it. I believe the country is not only ready for it, but anxious to have it over and have Congress adjourn and go home and allow the business world to adjust itself to the new tariff conditions. The country has not, however, made up its mind on the banking and currency bill. This revolutionary measure, which has many features that commend themselves to me, is not even understood by Congress as yet, and the country, even the bankers, have not approached an understanding of its provisions or probable effects.

Mr. CRAWFORD. Mr. President-

The VICE PRESIDENT. Does the Senator from Nebraska yield to the Senator from South Dakota?

Mr. HITCHCOCK. I do. Mr. CRAWFORD. With With the emergency currency law in force which is now upon the statute books, under which the Secretary of the Treasury has announced that if necessary he will issue \$500,000,000 in currency, and in view of the fact that he has proposed to place money in the Southwest upon security other than United States bonds, does the Senator think it is possible for a situation to arise during the next three or four months in which there would be a currency famine in the United States?

Mr. HITCHCOCK. I do not, Mr. President. I believe that the courageous and intelligent administration now in power at Washington can use the Vreeland Act to relieve any condition which may arise. Personally I should be in favor of an extension of the Vreeland Act. I should be in favor of a simple amendment to it which would liberalize it to some extent and make it easier for the banks to secure currency under it. But even if that were not done, I think the present form of the law efficient. I am sure the proposed measure can not possibly be looked upon as an immediate relief. Anyone who studies it

will readily come to the same conclusion. Those who think we can pass it one week and that on the following week the country will have \$500,000,000 of additional

currency with easy credit are woefully mistaken.

Suppose the impossible should happen and this bill should be passed October 1. Would that immediately bring the millenium in the business world? On the contrary, we would then enter upon a period of reorganization in the banking world, and we

would be in it for a year.

For instance, the bill provides that within 90 days after it is passed the country shall be divided into 12 districts and each of the 7,000 banks placed in its own particular district for operation. Ninety days are allowed in the bill for this undertaking. Provision is made for hearings to settle controversies as to the boundaries of districts. Twelve cities must be selected. Anyone knows that there will be great contention all over the country for the opportunity to be one of those cities.

Anyone knows that the struggles will be very intense and the controversy will be very considerable. The author of the bill has not overestimated the time required when he has provided 90 days for the division of the country into 12 districts, with one of the 12 cities at the head of each district.

Thus three months will have elapsed without any measure of relief. Then it is provided that the banks must subscribe stock or leave the national banking system. How long do the advo-cates of the bill think it will require for enough banks to sub-scribe stock to establish 12 of these associations, no one of

which shall have less than \$5,000,000 capital?

The bill gives to the banks a whole year in which to reach a decision as to whether or not they will enter the new system. I am confident a longer time would be necessary; but suppose,

at the very best, enough banks should enter the new system in three months to organize every district in the country, six months would then have elapsed. What is the next step?

The next step is that each district must elect six directors, three others being chosen here at Washington. It would take at least a month for the 7,000 banks to hold these elections, and it is quite likely that a single election will not be sufficient. The bill provides for a second election if in the first election the directors do not receive a majority of the votes-so that another month might be required. But let us assume that only one election is needed.

Then, after that, the directors will naturally meet and organize in each district. It is not overstating the case to say that it will require two months for the directors to organize, to find offices, to secure vaults, to elect officers of these associations, to engage clerks, and to put their forces in working order. They could then receive from the subscribing banks the 10 per cent of their capital which they are required to subscribe.

When they have done that they will have offices without any money with which to operate except the capital subscribed by The banks are given two additional months in which to pay in the 3 per cent of their deposits. When that is accomplished, the 12 associations will be ready for operation.

All these proceedings will require altogether 11 months, as I figure it up. That is the very shortest time possible. Therefore for practically a year the country would not have the benefit of the new bill and would be dependent upon the measures and

the means that now exist.

Meanwhile, the 11 months that will have been absorbed in this preparation and this organization will be months of uproar and disturbance in the banking world, months of contention in almost every bank between stockholders as to whether or not they shall go into the system and between the directors in every bank. It is safe to say that this disturbance in the banking world is not likely to prove of benefit to the commercial and manufacturing world. The withdrawal of hundreds of millions of money from existing banks to furnish capital and deposits for the new would compel existing banks to reduce loans and credits, and the new reserve banks could not immediately relieve the situation.

Do advocates of the currency bill in its present form think they can cure any possible disorder that may arise in the commercial and manufacturing world from the passage of the tariff bill by producing disorder and uncertainty in the banking world? They remind me very much of the thought embraced

in the childish rhyme:

There was a man in our town, And he was wondrous wise, He jamped into a bramble bush And scratched out both his eyes. Now, when he found his eyes were out, With all his might and main He jumped into another bush And scratched them in again.

Do advocates of the passage of this measure at this session as an emergency proposition think that after unsettling business, as must naturally result from a new tariff bill, they can, by unsettling banking conditions, improve those unsettled busi-

ness conditions?

No, Mr. President; I am strongly opposed to the plan to vote upon a revolutionary change in our banking and currency system at this session under whip and spur. I believe our banking and currency system needs reform; but, after all, it is reasonably good. During the 50 years or more that we have had it this Nation has advanced from a low rank among the nations of the world until now it stands at the very head in banking power in the world, possessing practically one-half of all the banking power of the civilized world. It has not been by accident. The system needs reform, but it is not entirely

bad nor critically dangerous.

Mr. President, I renew my decision declining to take the suggestion of my friends in Sarpy County, and I reaffirm my opinion that it would be a great mistake for the Senate, at this session, to pass a revolutionary banking and currency measure in haste and without proper study. I say that, although many of the features of the bill commend themselves to me, I want more time, however, to consider such a serious proposition. I think the Senate wants more time and will not act hurriedly. I am sure we shall be benefited by allowing the country to consider and criticize this bill during the few months we are in recess. We can then return here in December, refreshed by our rest, and ready to take up this great question upon its merits.

Mr. OWEN. Mr. President, I am not surprised at the resolution of the citizens of Nebraska favoring action at this session on the banking and currency bill, but I confess I am greatly surprised at the attitude of the Senator from Nebraska [Mr. Hirchcock]. To the request of his constituents for action at this special session, as strongly urged by President Woodrow Wilson in his message upon the subject of banking and currency, he responds with a vigorous negative, without giving

any adequate reason that justifies his position.

The Senator speaks of this bill as a "revolutionary" measure. He himself introduced, at this very session, a bill to establish regional reserve banks of like character. Yet his bill was not revolutionary, nor was it novel. The bill which has been proposed by me and offered to the Senate, No. 2639, to which reference is made, does not contain any new principles of banking. They are old, as old as the hills; old in stability; old in the experience of the most learned and civilized men upon the globe. They are principles which are found in the Double. globe. They are principles which are found in the Bank of England, which provides the mobilization of the reserves of the other banks of England in its own vaults, and keeps its assets liquid for the purpose of serving commerce and industry by immediate loans whenever necessary—but not conducted as a money-making bank. The Bank of England has the right to issue legal-tender notes, current throughout the British Empire as legal tender. The Bank of England can enlarge the volume of those notes. By virtue of its great stability, by virtue of its high character, by virtue of its control by public opinion in mobilizing these reserves, and creating some elasticity of currency by raising the rate and thus bringing gold to London-which is the only free gold market in the world-the Bank of England has illustrated and demonstrated the wisdom of the principles of this bill, S. 2639, which is derisively termed by the Senator from Nebraska a "revolutionary" bill.

Mr. HITCHCOCK. Mr. President, I hope my friend from Oklahoma will withdraw or modify that language. I have not referred to the bill in derision at all. I said the bill was

revolutionary. I am not sure but that we need a revolution, but I do not think we want it now as an emergency measure

without time to consider and discuss it.

Mr. OWEN. The Senator from Oklahoma will not withdraw his designation of the epithet "revolutionary" used by the Sena-

tor as derisive.

I happened to receive this morning, Mr. President, a letter from one of the great men of this Nation, learned in economics and learned in finance, a student of finance, Prof. Charles J. Bullock, professor of economics of Harvard University, earnestly approving the principles of this bill. What does he say about this bill? That it is revolutionary? No, sir. That it is unwise and unfit for present consideration? No, sir. That because it can not be put into force for one year, therefore we shall not consider it at all? No, sir. He does not say that. Here is what he says

Mr. SMITH of Georgia. Mr. President—
The VICE PRESIDENT. Does the Senator from Oklahoma

yield to the Senator from Georgia?

Mr. OWEN. I yield to the Senator from Georgia.
Mr. SMITH of Georgia. I dislike to interrupt the Senator from Oklahoma, but I do not think the time of the Senate should now be taken up with the discussion of the financial question. I think we should give our exclusive time to the tariff bill, and press it on to a vote. I think we should each avoid—
Mr. OWEN. Mr. President, I decline to yield further to the

Senator from Georgia.

Mr. SMITH of Georgia. Then, Mr. President, I make the point of order that the Senator from Oklahoma is out of order, and can not proceed except by unanimous consent; and I withhold my consent from the further discussion of this subject.

Mr. OWEN. I understood that I had the unanimous consent of the Senate when I began; if I had not, then the point of

order is well taken.

The VICE PRESIDENT. The Chair is compelled to rule, if the regular order is called for, that the regular order is the introduction of bills and joint resolutions.

Mr. OWEN. I give notice to the Senate that I will proceed with my answer to the Senator from Nebraska immediately after the morning hour at the first available opportunity.

Mr. BRANDEGEE and other Senators. Regular order

The VICE PRESIDENT. The petition presented by the Senator from Nebraska will be referred to the Committee on Banking and Currency. The regular order is the introduction of ing and Currency. The bills and joint resolutions.

[Routine business was transacted, which appears earlier in the proceedings.]

THE TARIFF.

Mr. STONE, I ask unanimous consent that the unfinished business may now be laid before the Senate and proceeded with. The VICE PRESIDENT. The Senator from Missouri asks

unanimous consent that the Senate proceed to the consideration of H. R. 3321.

There being no objection, the Senate, as in Committee of tha Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. President, I ask that we proceed with the reading of

paragraph 105.

Mr. SIMMONS. Will the Senator yield to me?

Mr. STONE. Certainly. Mr. SIMMONS. Mr. President, I did not care to interfere with the way in which we have taken up the morning hour to-day, because no notice had been given, but it was my purpose before the Senate adjourns to-day, and I had as well do it now as later, to say that my understanding is that no debate is in order during the morning hour with regard to petitions, memorials, bills, or resolutions that may be introduced without unanimous consent; and that from now on, with a view to facilitating the consideration of the tariff bill, which is the measure before the Senate and which is the subject that this session of Congress was called to deal with, I shall object, if some other Senator does not, to any debate except by unanimous consent during the morning hour upon matters that are brought to the attention of the Senate which do not come up regularly for discussion during that hour under the rules.

Mr. GALLINGER. Mr. President, without venturing an opinion as to whether or not the Senator will be able to carry out his program, I simply want to say that it is a gratification to me to know that the morning hour has as a rule been consumed by Senators on the other side, and not by Republican

Senators

Mr. SIMMONS. Mr. President, I think that remark is rather gratuitous. I think that the morning hour has been consumed by both sides of the Chamber, not more I think by this side than by the other side. Possibly this morning more of the time has been consumed by this than by the other side, but we have all fallen into the habit here, and ordinarily it is not a bad habit, of discussing by unanimous consent various and sundry matters that are not properly before the body for discussion.

I do not mean to say that I will carry that rule to an extreme length, but I do mean to say that I will invoke it in every proper and legitimate way with a view to curtailing these discussions which take up practically all the morning hour.

Mr. STONE. I have been informed that the Senator from Delaware [Mr. SAULSBURY] desires to address himself somewhat in a general way for a short while on the bill before we proceed to the next paragraph.

Mr. SAULSBURY. Mr. President, I shall not attempt to re-

view the arguments of the gentlemen on the other side of this Chamber. The impatience of the business men of the country with the necessary delay in passing this bill forbids the waste of time which would be necessarily consumed in doing so.

One of those learned Senators has solemnly assured us that the passage of this bill will "place this great Republic at the mercy," whatever that may mean, "of other nations for some of the very necessaries of life, such as sugar, wool, meat, and flour." Take that statement, Mr. President, as a sample of many statements of Republican Senators we might, if we would, review or answer. Is it wise or necessary to answer a multitude of statements of this character? We believe that the industry, intelligence, and energy of our farmers, our business men, our workmen, not inferior to those of other nations, will provide all these things as cheaply in America as anywhere. Beet sugar we will continue to produce under any tariff bill, and should we not we will hardly be said to be at the mercy of Cuba, whose markets are near to us and can not be controlled by a foreign

We do not believe that fewer sheep will bear wool in this country or that because we put honest woolen blankets or real woolen garments over or on our people to protect them from the cold, we will put them at the mercy of other nations.

Because, so far as we can by this bill, we loosen up the grip of the Meat Trust on the stomachs of our people, we do not believe that we will place them at the mercy of other nations; nor do we believe that by taking the duty off flour or wheat or potatoes, used solely heretofore to begulle and deceive our farmers, will we destroy the fertility of our fields, the industry of our farmers, or the output of our millers.

Two-thirds the life of a generation, Mr. President, has passed since the people last commanded Congress to reform the tariff. Their direction was disregarded, their hopes made vain, and other seemingly more important issues pressed for settlement or prevented a clear issue being raised. Only after these 20 long years of tariff spoliation, that command for tariff reform being unmistakably repeated, are we in sight of a compliance therewith in accordance with the reiterated pledges of Demo-

cratic platforms.

I greatly regret, Mr. President, that there has been an effort on the part of some Senators to give a somewhat sectional bias to this debate and a sectional color to this bill by contrast of the West and the East. Certainly no one can accuse the people of the State I represent, or their representatives, of being influenced by tariff benefits to support this bill. The statistics, so far as submitted by Republican Senators, indeed, seem to show that Delaware can get no advantage from this bill. The distinguished senior Senator from Iowa shows by his figures, made from a protectionist standpoint, that my State just comes out with an even balance sheet of what he terms advantage and disadvantage, and I am glad that this is so. I do not believe, however, that any fair criticism can show that this bill has in it any sectional favoritism or will work to the disadvantage of any portion of the Union.

Delawareans are not seeking favors, privileges, or unequal opportunities under the form of law, and neither ask nor expect nor would justify me in asking such for them. They have so suffered from the political debauchery promoted by the beneficiaries of tariff-protected and monopolistic interests that their hopes of clean government rest solely in preventing a continuance of the advantages to be derived by certain interests through tariff favoritism whereby campaign contributions to secure votes in this body may become less attractive investments.

Mr. President, the deplorable political conditions in some of the States of the Union, with which we are more or less familiar, can clearly be traced back to the persistent efforts of protected manufacturers to secure votes in this great legislative body for their business benefit. Year after year, by political contributions, they resented the presence here of the distinguished men who represented Delaware, and finally succeeded for years in supplanting them, not, I fancy, to the benefit of the country or to the improvement of this body.

Many States have learned that the pursuit of votes for tariff measures by the favored interests does not tend to increase the patriotism or honesty of the electorate or to uphold the old

standards of their representatives.

We Democrats, Mr. President, feel that our greater duty is to preserve our country's institutions, rather than gratify our local manufacturers. No more insidious attack can be made upon popular government than one which, under the working of unequal laws, separates our people into hostile classes, classes of those who have not and can not get, and those who have and can take more; who actually impose on the weaker class, as consumers, the burden of taxation to support an unequal government under which all must live, while the more able, the stronger class financially, not only refuse to contribute their fair share, proportioned to their means and property, but insist upon their vested right, as they have come to regard it, to make greater accumulations.

This tariff bill may not be perfect; no work of human hand or brain or both can be expected to fulfill that condition, but no unprejudiced man will doubt it is an honest attempt to reach better conditions and improve the opportunity for free, unhampered business effort in this country. In the effort to improve these conditions, naturally our committees have been embarrassed. Some lines of industry have been hothoused to such an extent that to expose them immediately to the free and natural air of competition might cause them to shrivel up and die, but we may confidently say that no tariff bill within the lifetime of any of us has been constructed with so great a common effort of the people's representatives in both branches of Congress to effect the greatest good for the common weal. No special interests, no association of manufacturers or privileged beneficiaries, have written a section, a clause, or a word, as we believe, in this great bill. If we can credit even a fraction of the testimony never contradicted, whole schedules have been written into previous bills by such beneficiaries, their associations, and representatives.

Until tariff excesses could not fail to produce profound conviction in all, many of our Democratic leaders, even of national stature, had not been able to "find" themselves. Political conditions in the last decade changed too fast for them. They did not fully appreciate that the insidious forms of modern privilege made honest government difficult and equal government impossible. American industrial selfishness, which at first did not scruple to beg for special favors in tariff legislation, encouraged and applauded for more than a generation, had so increased, had so blinded the eyes and perverted the minds of tariff beneficiaries, that it grew strong enough, chiefly through political contributions, to demand these favors as a right, and became so

rich and powerful as not to hesitate to keep them by corruption. These conditions had to be practically met and reformed.

The income-tax provision of this bill, Mr. President, will go far toward removing the settled belief in the minds of many of our fellow citizens that money can rule this land, and while paying no proportionate part of the expense of government can, at its will, rule, tax, and debase manhood.

The distinct effort to lessen the cost of living by reducing duties on or free-listing the actual necessaries of life will confirm our people in the belief that manhood and womanhood and childhood shall not hereafter bear burdens from which property has heretofore been unfortunately and improperly exempt.

Protection and socialism are twin evil and ill-omened birds, hatched in the nest of business and political vultures, preying upon our political life and befouling its wholesomeness. principle, if we should call it such, is the progenitor of boththe right and consequently the duty of the Government to meddle with the distribution and employment of capital. Individual initiative, natural selection of occupation, unhampered free will in the choice of a field of one's business energy are interfered with, and the State offers rewards and puts up barriers to direct these in unnatural channels. If you attempt the regulation, the encouragement, and the distribution of capital in general business, wages, the other element of production, must be regulated, must be nationally organized, and we must have not only the minimum but maximum wages, and individualism in business must be eliminated. To be logical, all industry must be nationalized.

This statement, Mr. President, will not be concurred in by the gentlemen on the other side of this Chamber, but there is the best of Republican authority for thus linking together protection and socialism. In his recent Boston speech, the educated and highly cultured gentleman, president of a great college, who received all the Republican votes in the last electoral college for Vice President of the United States, declared:

We can not both guarantee a reasonable profit through tariff legislation and keep a straight face when we attack socialism.

And in that connection spoke of what he called "the unhappy guaranty of profit promulgated in 1908" in the Republican plat-

form of that year.

Our political opponents, Mr. President, seem to have been singularly blind to the political signs of the times with respect to their tariff policy. Replaced in power in all branches of the Federal Government in 1896 by the votes of those Democrats who left us at that election from, as they believed, pure and patriotic motives, disregarding the great opportunity given them to rehabilitate their party, the first act of the victorious Republicans was to coin into cash through a tariff bill the patriotism, no matter whether real or fancied, of the Democratic tariff reformers who had made their success possible, and put this cash into the pockets of the protected, privileged business interests in return for political contributions.

Never was a great political opportunity more greatly neglected, and when, drunk with power, reckless, and unrecognizing public opinion, the subsequent declarations of Republican platforms were given forth and Republican Presidents and Congresses, unheeding all danger signals of popular disapproval, rushed at all times to the support of privileged and overprotected wealth, the ultimate result should have seemed unmis-

takable.

Time and again during this debate Senators on the other side have seemed to show absolute inability to appreciate our position or to understand that we should consider it proper to lay a tariff duty solely for revenue and which could not benefit any special producers or manufacturers. We have seemed at times to be speaking to each other across this Chamber in different languages; and yet it should not be so.

Senator Dolliver in 1909, in this Chamber, said:

I warn these men who are among those responsible for the policy of the Republican Party that if they desire an agitation in the United States, to begin the day the bill passes and to be carried on until these wrongs and injuries are rectified, there is no shorter course to that end than that which has been pursued by them in the Payne-Aldrich bill.

These were the words of one of the greatest of modern Republican Senators, soon thereafter to be called before that great Court where the actions and motives of men receive their last, just judgment.

Mr. President, we know that the efforts of that great man in the last months of his useful life to lessen the abuses and human hardship produced by high-tariff laws in this country, which he loved, did not weigh against him in that final judgment. We Democrats, Mr. President, have in this bill, following the declaration of the Baltimore platform, in effect, adopted the very course he desired his own party to pursue. I commend his words to those of his party who yet remain in this Chamber:

It is our special duty-

Said he-

to take up those schedules which represent the largest investments of protected capital and at least take out of them the rates that are now everywhere known to be extravagant and unnecessary, which rise so far above the level of our real industrial needs as to bring the policy of protection into ridicule without doing anybody any sort of good.

This Senator in 1909 still thought himself a Republican. What he would think if here himself to-day we can only surmise. We know from the results of the elections of 1910 and 1912 that

he was a political prophet.

What happened to this Senator as a result of his earnest efforts to lead his party into honest ways and out from the arid business wastes, made unproductive by the selfishness of protected industries, was only a few days ago ably and clearly stated by his successor in this body. To humiliate and discredit him at home, his friends were struck at in their business, a place on the Finance Committee, though earned by him, was denied; the money changers were strong enough to drive honest preachers from the temple.

The natural and practical tendency and result of the socalled principle of protection had been worked out to its logical conclusion—its legitimate end was reached. I make no charge that all the manufacturers of this country are of one type, nor do I deny that they have among them a fair proportion of good citizens and patriotic men, but we all know that saints and archangels have not been directing the tariff-protected industries of America. The cupidity of every ordinary human being engaged in almost every industry in the country had been aroused, the unnatural appetite whetted during the long years of tariff abuses had become gluttonous, and the "fostered" infants of the protective tariff became Frankensteins, who wrote their wishes in our laws when their business interests were affected.

When an individual ceases to react to the facts of life, we adjudge him insane. So, when political parties and their leaders, instead of facing the present and finding a way to cope with it, turn their backs on it, doggedly hold to wrong ideas of government, even implore the past to return, they are drawing near to their extinction, provided, always, that there exist in their country other men who have the future in their hearts.

As supporters of the old order, doubtless most of the Republicans were sincere. So, I have no doubt, are still some of the old "standpatters." They believe themselves unselfish and patriotic, but they have a fatal weakness—they believe in classes and not in men, in symbols and party phrases and not in facts. This is a blight which almost invariably overtakes society at the point of dissolution. Fortunately for our country, it only overtook one of our great political parties. Republican tenacity was not fortitude, it was merely the quality of the leech and the barnacle.

If the Democratic Party fails to understand and rightly interpret the feelings, the hopes, the expectations, the aspirations of the American people, it has no political future. It is easy to chill the boundless enthusiasm and render futile the blossoming hopes of our party and our people. We can thrash over again old political straw, but we will get no wheat. One can not be surprised at the resentment evinced by our opponents against the President of the United States because he has shown the courage and ability to successfully lead our party. At Baltimore we might have nominated a less heroic candidate and would have met defeat as usual. It would only have convinced the country that as a modern political engine the Democratic Party was worn out and obsolete.

We seized the opportunity and selected a candidate who was his own platform and could stand on ours, one who had the well-earned confidence of the whole people, who had "made good" in every relation in life and in every official position to which the people had commissioned him, who had become a popular ideal, whose proved ability had justified the people's confidence, who appealed to their highest hopes and to their imagination, and whose success meant to them the continuance of popular government in this country along clean, wholesome, unbossed, and uncontrolled lines, and our victory was assured.

Our candidate occupied this position. The wise leaders of our party advised his nomination, the people wanted it, and if the object of nominating a President was to elect him, how foolish it would have been to first block the wishes of the voters, to defeat their hopes by manipulation, intrigues, and chicane, and then expect them to give their support, which had to be undivided and hearty, to some one selected at a secret conference of representatives of predatory, tariff-fed, or

public-service business who manage to control most of the political bosses.

We escaped such dangers. The voters of our great organization—indeed, of all parties—recognized our sincerity. They gave us control of all the branches of the Federal Government, and we were at once called together in Congress to formulate

and pass this bill.

No one contends that all wisdom is embodied in it. not go far enough for some of us; it goes too far for others. But on it we are agreed, and it will pass this Senate; and the voters of the country, and the honest business men of the country, who seek no special privileges, will ratify and applaud our work. The only weakness of our political position is a practical one, that the benefits of the changes will be so evenly and fairly distributed they may not be recognized at once, as were the special privileges conferred on the protected interests. Our course meets opposition, fierce and unrelenting opposition, one could expect it would not. Dire predictions are indulged in by our Republican friends. We have done nothing that is right, or at least done nothing in the right way. Well, we could expect nothing better than such predictions from some of our opponents; but suppose these dire disasters so glibly predicted by Republican Senators do not happen. One says they may not happen at once, may not come for years. Another says that mills are closing and soup kettles being hung over the fires of public wrath and disappointment. We may be sure that whenever business trouble shall come, whatever its cause, all of it, even from business incapacity, will be attributed to Democratic misdeeds. Standpatters say that tariff reform may not produce panics and disaster this year or next year, but in the distant future sometime, somewhere, a panic will come, and then and there such distress will be attributed to Democracy.

Pardon our incapacity if we refuse to believe any longer in these selfish tales of ghosts and goblins, in the withcraft of dishonest or possibly purchased and corrupt legislation by which prosperity, according to Republican speakers, has been produced. The tales of how good it is to create a plutocracy made strong and great, through special privilege, do not now appeal to us or to our constituents. The pleas for protecting American labor by creating rich manufacturing corporations, which then obtain the cheap foreign labor to compete with our American workmen and try to buy off and corrupt the leaders of their labor unions, when addressed to laboring men, either from the stump or from this Hall, now fall on deaf ears. To show his sense of humor, the laboring man grins his lack of appreciation

and votes the Democratic ticket.

Great interests have never failed of able advocates, and some honest men are nearly always found among them. Enriched and intrenched privilege fights hard and long for its own perpetuation. It has always fought hardest and is still fighting hard in this Chamber through the champions of high protection, whose personal honesty and belief, however, it is not my intention to impugn, but it is fighting a losing fight.

The people of the country are aware they have now in both branches of Congress a majority of men representing them, coming practically from every section, from States from coast to coast, whose hope and thought is not of self, not of party, not even of State, but of a continent-wide country, peopled by fellow men, whose common burdens are to be lightened, whose business efforts are to be unfettered, whose chance of life in peace and comfort is to be bettered, whose hopes and aspirations are to be listened to and heeded, whose children and grandchildren—yes, and great-grandchildren—can offer praise and their devout thanks that at a crisis in popular government, when things looked dark for the future, a man was found, and with enough other men to uphold his efforts, who did not fail or falter when leading his countrymen back to the simpler, higher ideals of life and government and away from the false gods of the dollar chaser, created by special privilege, which we will now only preserve in political museums to the lasting dishonor of the Republican Party and its repealed tariff laws.

Mr. OWEN obtained the floor.

Mr. WARREN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. Hughes in the chair), The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Chilton	Gronna	Kern La Follette Lane Lea Lewis Lippitt Martine, N. J.
Bacon	Clapp	Hollis	
Borah	Clarke, Ark.	Hughes	
Bristow	Crawford	James	
Bryan	Dillingham	Johnson, Me.	
Burton	Fall	Jones	
Catron	Fletcher	Kenyon	

Smith, Ariz. Smith, S. C. Smoot Stone Sutherland Tillman Myers Oliver Owen Page Ransdell Robinson Saulsbury Shafroth Townsend Vardaman Warren Weeks Wiliams Sheppard Sherman Penrose Thomas Thompson Thornton Perkins Pittman Pomerene Works Simmons

Mr. THORNTON. I desire to announce that the junior Senator from Alabama [Mr. Johnston] is unavoidably absent from the Chamber. I ask that this announcement stand for the day. Mr. CLAPP. My colleague [Mr. Nelson] is necessarily ab-

sent from the Chamber on business connected with the Senate. I make this announcement for the day.

Mr. STONE. My colleague, the junior Senator from Missouri

[Mr. Reed], is absent on business of the Senate.

Mr. SHEPPARD. My colleague, the senior Senator from Texas [Mr. Culberson], is unavoidably absent. He is paired with the senior Senator from Delaware [Mr. DU PONT]. I will let this announcement stand for the day.

Mr. JAMES. I desire to announce the absence of my col-

league, the senior Senator from Kentucky [Mr. Bradley], on

account of illness.

Mr. GRONNA. I wish to announce that my colleague [Mr. McCumber] is necessarily absent on account of illness in his family. He is paired with the senior Senator from Nevada [Mr. NEWLANDS]. I will let this announcement stand for the day.

Mr. SIMMONS. My colleague [Mr. Overman] is detained from the Senate on business of the Senate.

Mr. MYERS. I announce that my colleague [Mr. Walsh] is absent from the Chamber on account of public business.

Mr. WARREN. I wish to announce the absence of my colleague [Mr. Clark of Wyoming], who is unavoidably detained on public business.

The PRESIDING OFFICER. Sixty Senators have answered

to their names. A quorum is present.

Mr. OWEN. Mr. President, when interrupted by the rules of the morning hour in my reply to the Senator from Nebraska, who denounced the banking and currency bill submitted by me as revolutionary, and so forth, denied the petition of the Democrats of Nebraska praying him to support the Democratic President in the policy of passing banking and currency legislation at this session, I was pointing out the fact that the principles of the bill were older than the Senator from Nebraska; they were well understood in Europe and America; that they had been thoroughly established by long experience as sound and wise and were indorsed by the most learned scholars. Mr. President, this morning I received a letter from Prof. Charles J. Bullock, professor of economics in Harvard University, one of the most learned men in the United States, indorsing these well-recognized principles as set forth in this bill, which I think is of sufficient importance to be read to the Senate. The letter relates to the banking and currency bill introduced by me-S. 2639. It is as follows:

WASHINGTON, D. C., August 4, 1913.

Senator Robert L. Owen, United States Scnate, Washington, D. C.

Senator Robert L. Owen,

United States Scnate, Washington, D. C.

My Dear Sir.: I was very glad to have had the opportunity last week of discussing with you the general plan of the proposed currency law, and wish to say to you that the more I have studied the plan the more It commends itself to me.

In the first place, the idea of establishing regional reserve banks and placing them under the control of a Federal board seems to be extremely good. This secures as much centralization as it is possible and I think deslrable to secure at the present time. A central bank is out of the question; clearing houses do not seem to be good agencies to utilize for this purpose; and the only solution seems to be the establishment of regional reserve banks.

In the second place, the bill provides very wisely and I believe effectually for the mobilization of the banking reserves of the United States, thereby introducing some degree of unity, and therefore a very desirable provision for emergencies, into our hitherto decentralized banking system.

In the third place, the bill will make our currency system more elastic, and will do this in a way that ought to satisfy all schools of currency reform. It seems clear that under this bill currency can not be issued except in response to the legitimate demands of business, and at the same time such issue is under the control of the Federal Government, but in such a manner as to avoid all the dangers which many of us believe attend the issue of money directly by the Government. In the fourth place, the bill ought to widen and greatly increase the market for first-class mercantile paper, thereby making our banks more serviceable to the commerce and industries of the country and less likely to be drawn into speculation in securities.

Yours, sincerely,

Charles J. Bullock,

Professor of Economics, Harvard University.

CHARLES J. BULLOCK, Professor of Economics, Harvard University.

I have read the letter to the Senate because it is one of many commendations by the greatest scholars of the country of the principles of the bill submitted by me (S. 2639); and, with the consent of the Senate, I ask to place in the RECORD a statement of the Bank of England, a statement of the Bank of France, of the Bank of Belgium, of the Bank of the Netherlands, and of the Bank of Germany,

all of which act as great reserve banks, intended to provide accommodations to commerce and industry at all times. Not merely sometimes, not merely when money is easy, but when money is tight, when there is a panic on, the Bank of England always accommodates the commerce and industries of the English people. The Bank of France never fails to do so, and the Bank of Germany never fails to do so; but in this country, with our scattered reserves, with no institution charged with the responsibility of caring for the reserves, with the actual reserves forbidden to be loaned at all, with no institution charged with the duty of protecting the commerce and industry of the country by furnishing accommodation on properly qualified classes of paper at all times, we are in constant jeopardywe are in danger of financial and commercial stringency at any

This is not a new matter. I point to these illustrations and I ask permission to put in the Record a table of interest charges made by these great Government banks—for they are Government banks. The Bank of England is controlled by public sentiment, and there is not a banker or broker or a bill discounter on the governing board of the Bank of England. The Bank of Germany is controlled by the Government of Germany, which appoints every member of the curatorium, a supervising board, and appoints every member of the directorium, the managing board of the Reichsbank, which is the Imperial reserve bank of the Empire. In like manner the Bank of France is absolutely managed by the managers appointed by the President of France. He appoints the governor of the Bank of France, he appoints the subgovernor, and he appoints the 188 managers of the Bank of France.

It will be clearly seen by these tables that these reserve banks hold their assets in gold, notes, and liquid paper at all times, so as to make these reserves loanable at all times for

the exigencies of commerce.

It will be seen by the interest tables submitted that they are used as Government banks to loan these funds at low rates and at constant rates, with rare exceptions, when commercial credits are seriously impaired.

Mr. BORAH. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Idaho?

Mr. OWEN. I yield to the Senator from Idaho. Mr. BORAH. The Senator says that the Bank of England has no banker upon the board of directors. What is the business of the several men who are upon the board of directors of the Bank of England?

Mr. OWEN. Merchants, business men, and men engaged in commerce, manufactures, and industry. There are upon the board of the Bank of England some men who possibly might be called bankers, but as a matter of fact they are men who are engaged in the discount-acceptance business, as the "residuary legatees," if I might use the metaphor, of mercantile houses who have fallen heir to the handling of that kind of business. Bankers, bill brokers, or bill discounters are not permitted on the board. That statement I make upon the authority of the governor of the Bank of England.

Mr. CRAWFORD. Mr. President-

The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from South Dakota?

Mr. OWEN. I yield to the Senator from South Dakota. Mr. CRAWFORD. It is a fact, is it not, that the directors of

the Bank of England are elected by the stockholders of that bank? Mr. OWEN. Yes; but only a part of the stockholders vote. The rule of voting is that no stockholder is permitted to vote who does not have £500 of stock, and in that case he is allowed to have only one vote, even if he has £50,000 of stock. So that it introduces the personal equation, and the Bank of England is, in fact, controlled by public sentiment.

Mr. CRAWFORD. The Senator is correct in his statement about the qualifications of stockholders who vote for directors as to the amounts which they must hold. But it is true, nevertheless, is it not, that the directors are elected by the men who

own stock in the bank?

Mr. OWEN. To the extent and in the manner I have described

Mr. CRAWFORD. I will ask the distinguished Senator if there is not a very marked difference between that system and one which depends for its capital upon the subscribers of stock, and yet takes away from those subscribers-from the men or institutions which furnish the capital—the right to elect the managers and directors who control the institution which they

are compelled by law to capitalize with their own private funds?

Mr. OWEN. Answering the Senator, the member banks of
the Federal reserve system elect six of nine directors, three of them in the public interest, however; and therefore do to that

extent control the Federal reserve bank under the supervision of the Federal reserve board; but, further, I will state that the Bank of England does to that extent disfranchise every stockholder who has not £500 of stock and does disqualify a stockholder who has more than £500 of stock, except that it allows

him one vote, and one vote only.

Mr. CRAWFORD. The Senator is right about that, in that one is not an elector until he has this minimum amount of stock. But that is an act of the institution itself and not an act of an outsider owning no stock or financial interest in it, to wit, the

Government,

Mr. OWEN. It is true with regard to the Bank of England that it is controlled by public sentiment; but it is a law in Germany and it is a law in France, and that is why I gave all three instances—to show that even when the stock was owned by private stockholders the Government of Germany controls the Bank of Germany from top to bottom; and in France, where the stockholders are private persons, the Government, nevertheless, appoints the managers of the Bank of France.

Mr. CRAWFORD. I do not wish the Senator to understand that my attitude is not that I do not desire efficient legislation; but I say what I do in order that the Senator may realize some of the difficulties of the situation. For instance, in the State I represent there are no large banks which could use these large reserve banks, but they are compelled to furnish a sub-

stantial part of the capital.

Mr. OWEN. Answering the Senator, as far as I am concerned I should be willing to leave the subscription to the stock permissible and not have it compulsory, letting the public

subscribe to the stock.

Mr. CRAWFORD. The Senator is very reasonable in showing a disposition to make that concession; but how are these people to know that a bill is to be changed which, as it is drawn and presented and as it is being advocated, compels these people to furnish this money and takes the control out of their hands?

Mr. OWEN. I will answer the Senator by saying that I only rose to give a few brief reasons to show that this was not a "revolutionary" bill; that it was following out the principles which have been proved by experience to be essential and necessary to the welfare and stability of commerce and industry in the German Empire, in France, in Holland, in Belgium, and in England, and therefore that the principles were worthy of full This bill is subject to amendment, as any bill is, and we should all try to make it perfect, not sit still week after week, doing no work to perfect it. I have been giving it all my time day and night, and other Senators, I hope, will help and not turn aside, refusing to study the bill.

I rose only to say that I believe the time for action has come. The mere fact that it will take a year to consider, work out, and put in operation this plan, if it should take so long-I do not think it would take so long-is all the more reason why we should not delay the consideration of the principles of the bill.

Five years ago we established the National Monetary Commission, in 1908, just after the panic of 1907, which was a national cataclysm, an overwhelming national catastrophe. Almost every bank in the United States suspended cash payment. It made the United States ridiculous in the eyes of the world. For five years the National Monetary Commission studied this problem and made constant reports to Congress and to the country in a series of volumes, which were given the widest publicity. For five years the country has been considering the remedy for the terrible conditions which arose in 1907, recognizing the so-called Vreeland-Aldrich bill as purely a temporary and seriously inadequate bill.

And after the National Monetary Commission had gathered together information upon this problem from the ends of the world and had carried on a nation-wide propaganda, they offered the country a bill for its acceptance. Their bill recognized the great principles of "mobilizing the reserves," "providing elastic currency," and a "free discount market for quick com-mercial paper," but it was fatally defective in giving control of the system to the banks of the country, in violation of the principles of the very banking systems of England, France, and Germany, explanations of which they had submitted to the people

of the United States.

The bill was further seriously defective in providing that the banks should issue the currency instead of providing that the United States should issue the currency instead of providing that the United States should issue the currency. The Aldrich bill, in effect, provided for putting the currency in the hands of private persons. The present bill, Senate 2639, includes the well-ascertained, sound principles of "mobilizing the reserves," making them loanable; of "providing elastic currency," and a "free market for qualified short-time commercial paper," but it avoids the mistake of the Aldrich bill by putting the United States in charge of the system itself and giving the United States the

control and right to issue the currency required by the national

commerce, according to the Democratic national platform.

The principles of the bill submitted to the Senate, S. have all been worked out in actual practice in England and have been found wise and efficient. The statement of the Senator from Nebraska that this proposed measure is "revolutionary" has no justification. The bill merely adopts principles well ascertained and demonstrated by long experience to be of vital importance and of the highest efficiency. The Senator from Nebraska himself introduced at the beginning of this extra session a bill providing for regional reserve banks, and the fact that his constituents appealed to him to support the Democratic administration in a policy proposed by President Woodrow Wilson in a special message to this Congress, delivered by him in person to the Senate and to the House in joint assembly. seems to be a natural petition for the citizens of Nebraska to make. The Senator has denied their respectful petition and

has given his reasons. And what are his reasons?

First, That the bill is revolutionary (but the country knows

better).

Second. That it would take a year to put the bill in operation, and therefore he is not willing to consider the bill until next winter, when it will take a year to pass it, if the Senator from Nebraska can find those who sympathize with him in a do-noth-

ing policy.

Third. He suggests that the proposal of this bill, instead of protecting the country from panic, would promote panic, and he gives no reason to justify any such position. The suggestion

is arbitrary and unreasonable.

Under the bill the Federal reserve banks would be in opera-tion in six months' time; the bill would immediately put into the use of the commercial world one hundred and fifty millions of current United States public funds; would keep the current collection of revenue available for the national commerce as an additional national reserve; would mobilize the reserves of the Nation and make loanable funds which are now locked up in a strong box as reserves, the law forbidding such reserves to be loaned to the commercial public. The bill proposes that the reserves of the country shall be loanable to the business and commercial interests; the bill provides for the issue of absolutely sound currency in whatever quantity is sufficient to meet the demands of commerce; and the bill, following the precedents of all Europe, is contemptuously described by the Senator from Nebraska as "revolutionary," and the arbitrary suggestion is made by him that it will produce panic instead of preventing panic.

I deem it my duty, as chairman of the Committee on Banking and Currency, trusted by my associates with a study of this question, to defend the bill against the attacks of the Senator from Nebraska. As a Democrat, elected on the Democratic platform, I feel bound to respect the policy laid down by the party itself and by Woodrow Wilson, the President of the United States and the chosen elected head of the Democratic Party, and more especially so when the thing he asks has been long studied, is well understood, and is of the most urgent importance to the commerce and industry of the United States.

Only by united action can the Democracy deliver the country from the control of the selfish special interests of the country, and I deplore any lack of party harmony and spirit of coopera-

tion and party unity.

I do not say the bill is the last word of human wisdom. regret to detain the Senate. I am going to take my seat in just one moment. I only wanted to say this much because I did think that after the President of the United States had inperson addressed both Houses of Congress in joint action assembled, urging that action should be taken, that request by the administrative branch of the Government ought to receive reasonable respect and a reasonable effort made to comply regardless of private convenience. I want to make as much progress as possible by considering it, not claiming that the proposed draft may not be wisely amended. I think it can be amended in some particulars, and I hope it shall be amended advantageously

Mr. SHAFROTH. Mr. President, may I ask the Senator a

Mr. OWEN. I yield to the Senator from Colorado

Mr. SHAFROTH. Is it not a fact that in addition to the qualification of £500 invested in stock for a director of the Bank of England it is also necessary that he should hold twenty times the amount of his subscription in stock in the mercantile business of the Empire? Mr. OWEN. It is.

Mr. SHAFROTH. And is it not a fact also that there is not a single banker upon the board of directors of the Bank of

Mr. OWEN. That is true.

Mr. FLETCHER. May I interrupt the Senator for just a moment?

Mr. OWEN. I yield to the Senator from Florida.

Mr. FLETCHER. I do not want to delay getting to the tariff bill at all; but while this subject is up I should like to suggest to the Senator that the proposition involved in the pending gest to the senator that the proposition involved in the pending bill is primarily a proposition to promote and increase the facilities of commercial banks. In other words, the pending bill is mainly a banking bill and not so much a currency bill. As the Senator has indicated, I think, by his remarks, it is especially suitable for the needs of commerce and industry.

Mr. OWEN. The Senator is right.

Mr. FLETCHER. I wish to suggest to the Senator that some measure suitable to meet the requirements of agriculture ought to be considered at an early day.

Mr. OWEN. I agree with the Senator, and such a measure

is being diligently considered now.

Mr. FLETCHER. The thought in my mind is that we can not supply the needs of agriculture; we can not meet the requirements of the farmers of the country, the men engaged in the great industry which provides a larger producing class than any other industry of the country, by any system of com-

mercial banking; and that in all likelihood we shall have to devise a plan or system separate and distinct from commercial banking and adapt it to the needs of our agricultural interests. I want to commend to the Senator the thorough consideration of that question, because from what study I have given it and from what thought I have bestowed upon it, I am about to reach the conclusion that we shall need to provide a separate and distinct system for financing our agricultural interests.

Mr. OWEN. Mr. President, in answer to the Senator from Florida I will say that the agricultural credit system is a matter of vast importance to the agricultural industry of the country, but it involves investment securities; it involves long-time loans which are not quick assets, which are not quickly convertible. It is a system peculiar to itself, which will have to be worked out. The matter has already received a large degree of attention, and is now in process of solution. There will be presented by the 1st of December a completed bill that will suit the needs of the country.

Mr. President, I now submit various statements of the lead-

ing great reserve banks of Europe, showing the liquid character of their reserve assets. The securities are all quickly convertible into money, and thus are available and made mobile for the

accommodation of commerce and industry.

		England.

It will thus be observed that the note issues are covered by

62.7 per cent gold.

The public and private deposits are covered in the banking department by 38.3 per cent of notes and coin, nearly all such reserve being in notes, which, measured by actual gold, would make a gold reserve of only about 25 per cent against the deposits.

It will be observed under the tables of interest rates that this

narrow margin has been supplemented by frequent changes of the rate of interest to attract gold from other countries when English commerce requires gold, and it would also appear that in 1847, 1857, and 1867 the Bank of England was permitted to issue legal-tender notes against commercial paper in times of panic in order to extend needed loans, restore confidence, and safeguard the commerce and industry of England.

Imperial Bank of Germany. BALANCE SHEET, DECEMBER 31, 1908. [Marks converted as 20 = £1.]

LIABILITIES.	
Capital and reserve	£12, 458, 581 98, 771, 474 33, 244, 291 25, 167 720, 072 1, 537, 287

in coin against notes, the coin including both gold and silver, however, and carries 75 per cent of coin against notes and de-posits. Its authorized issue of notes is 5,800,000,000 francs, or

This table shows that the Bank of France carries 88 per cent | \$175,000,000 margin of notes, besides the quick assets which it constantly carries, just as the Bank of England does.

The need for large cash reserves in France is due to the fact that the check system (currency) against deposits is not £232,000,000, which leaves a margin of over £35,000,000, or developed in France as in England and in the United States.

> Bank of the Netherlands. BALANCE SHEET, MARCH 31, 1909, [Guilders converted as 12-£1.]

It will thus be seen that these great banks holding the national reserves have been able to furnish commerce with a very low rate of discount for nearly all the time and only occasionally have been compelled to raise the rate to a high

These low rates illustrate the enormous value of these great banks to European commerce and the urgent necessity for action by the United States along similar lines.

Mr. STONE. Mr. President, I hope we can now go on with

the tariff bill. Mr. MYERS.

Mr. MYERS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Oklahoma yield to the Senator from Montana?

I have yielded the floor, Mr. President. Will the Senator from Missouri yield to me for Mr. OWEN.

Mr. MYERS. just a moment?

Mr. STONE. I have not taken the floor. I have simply made a request.

Mr. MYERS. Then I desire to take the floor, Mr. President. The PRESIDING OFFICER. The Senator from Montana is recognized

Mr. MYERS. I simply want to say that I heartily concur with the Senator from Oklahoma [Mr. Owen] to the extent that I believe we ought to have banking and currency legislation at this session of Congress. I am not prepared to say whether or not we ought to have the exact bill that has been introduced. do not know enough about the bill, and I do not know enough about banking and currency; but I expect to learn more about the subject and about the bill before the session advances much

I believe we ought to have some legislation on the subject at this session. I believe the people of this country are expecting it and demanding it. The bankers may not be demanding it, but I believe the people of the country are. I know that a great many of the people of Montana, at any rate, expect it

One of the leading bankers of Montana has expressed himself to me and to the President in my presence as believing that we

ought to have it now, at this session of Congress, without any further delay.

I believe that if a man is sick he ought to have medicine now, not next December. There are only two questions involved. The first is, Do we need banking and currency legislation at all? If we do not need it then we ought to dispose of the subject, and not have this or any other bill now or at any other time, but simply be done with it. If we do need it, we need it right now, and now is the time.

I simply want to add my view in support of what the Senator from Oklahoma has so ably said, that we ought to have such legislation at this session. The people expect it, and if they do not get it we shall hear from them.

Mr. STONE. Mr. President, I desire to say to Senators, and particularly to Senators on this side, not by way of criticism-I

have no right to criticize, nor, perhaps, to complain—
Mr. WARREN. Mr. President, we can not hear what the Senator says. I know it is worthy of being heard, and we hope we may hear it.

Mr. STONE. I was saying that I hope we will have as little discussion as possible on extraneous subjects during the consideration of this bill and while it is before the Senate. We have spent an hour or more this morning in discussing the currency question, and I regret to say that that time has been consumed wholly on this side of the Chamber. I hope Senators, and par-ticularly Senators on this side, will aid the Committee on Finance in pressing on the tariff measure as far as we can, and that discussion, so far as there is any, will be confined to that measure, or at least will have some direct reference to it.

I understood from what the Senator from Pennsylvania [Mr. OLIVER] said yesterday that he desired to make some observations on paragraph 105.

Mr. OLIVER. I should like to have the paragraph read, and then I shall have a very few words to say on it. I shall occupy only a very little time.

The Secretary read paragraph 105, on page 29.

The next amendment of the Committee on Finance was, in paragraph 105, page 29, to strike out all of lines 22 and 23 and part of line 24 and insert in lieu thereof the word "muck"; and, on page 30, line 1, after the word "iron," to insert "and all iron"; and, in line 2, after the word "section," to strike out "8" and insert "5," so as to make the paragraph read:

105. Muck bars, bar iron, square iron, rolled or hammered, round iron, in coils or rods, bars or shapes of rolled or hammered iron, and all iron not specially provided for in this section, 5 per cent ad valorem.

Mr. OLIVER. Mr. President, while I am not in favor of the first amendment proposed by the committee, striking out the first three lines of the paragraph, which means putting slabs, blooms, loops, and other forms of iron on the free list-and I think the committee ought not to insist upon that amendment-I shall, upon consideration, include in the amendment I propose to offer that part as well as the one providing for the reduction in duty.

I therefore ask the Senate to disagree to the amendments proposed by the committee, and instead of "5 per cent ad valorem" I move to substitute "10 per cent ad valorem."

I will briefly state my reasons for this change, and, if the committee can not see their way clear to agree to it at this time, I shall ask that the paragraph be passed, in order that they may have time to consider it.

The duties proposed in this paragraph, both in the House bill and still more in the amendment proposed by the Senate committee, are arrived at, I think, entirely without adequate knowledge upon the part of the Ways and Means Committee of the House and the Finance Committee of the Senate of the subject under consideration.

You will notice that all these iron articles it is proposed to bring in, first, by the House at 8 per cent; and, secondly, by the Senate committee at 5 per cent ad valorem.

Turning to paragraph 112 it is found that on steel bars, amongst other articles, it is proposed to impose a duty, first, by the House of 10 per cent ad valorem, which is reduced by the Senate committee to 8 per cent.

Mr. President, I want to explain to the committee and to the Senate the difference between iron bars and iron generally, and what is generally known as merchant steel, which is treated of in paragraph 112. When the Underwood bill was under consideration a little over a year ago, in some remarks I made upon it I explained this difference, and I will read now a part

of what I said then:
"Thirty years ago, before it was supplanted by soft steel made by the Bessemer and open-hearth processes, bar iron was the basis of iron manufacture the world over. It should not be confounded with bar steel; it is a different article, made in a are in need of banking and currency legislation, and that we different way, and used largely for different purposes. Steel

is made by melting the pig iron and casting it into ingots, while iron is made by reducing it to only a semimolten state, squeezing out the impurities, rolling it into a flat bar called muck bar, which is then allowed to cool, sheared up into small pieces, reheated, and rerolled into what is known commercially as bar iron. Steel is granular in its texture, while iron is fibrous."

I will say here that if you break a bar of steel it will break off short and will show crystals in the fracture. If you break a bar of iron, which it is very hard to do, it will be full of

slivers, like a piece of wood. To resume:

In its process of manufacture iron is made to-day in precisely the same manner as it was 50 years ago. The labor is all hand labor. Machinery has not supplanted it as it has in the manufacture of soft steel, and the wages paid for such labor in this country are uniformly just about double those paid in Europe. As an example, we find from Mr. Pepper's report that the maximum weekly wages at Dusseldorf for puddlers is \$13.68. In this country puddlers are paid by the ton, and the present wage scale of the Amalgamated Association of Iron and Steel Workers calls for the payment of "—I will read the present rates instead of those that prevailed then. Payment on bar iron, on the basis of 1 cent per pound, \$5.25 per to 1. I talked this morning with a gentleman who was formerly president of the Amalgamated Association of Iron and Steel Workers, and he tells me that the wages paid now in the mills under the control of the Amalgamated Association are \$7 per ton. puddling.

"The product of a puddling furnace is 2,800 pounds, or 12 gross tons, per working day. The puddler's wages would therefore amount to \$6.72 per day."

It would now amount to something over \$8 per day.

Mr. THOMAS. Mr. President—
Mr. OLIVER. I yield.
Mr. THOMAS. May I inquire of the Senator from PennsylMr. THOMAS. May I inquire of the Amalgamated Association of vania how many mills employ the Amalgamated Association of

Iron and Steel Workers now?

Mr. OLIVER. Nearly all the mills west of the mountains. I am coming to that later on. The mills east of the mountains are not controlled by it. I may as well state here that the mills in eastern Pennsylvania and New Jersey and in that district call for a wage scale of \$5 a ton for puddlers. The larger wages are those that prevail in the West.

"Out of this, under the workingmen's scale, he pays to a helper one-third plus 5 per cent of his own two-thirds. Figuring the day's wages on this basis"—that is, \$5.25 a ton for puddling—"the puddler in the United States would receive \$4.25 per day, while the man who performs the same work at Dusseldorf receives \$13.68 per week." That means a difference between the two countries of \$1.97 per day.

It will be noted that in this country the puddler's helper receives \$2.47 per day, or 19 cents more than the daily wage of the German puddler."

Mr. James Lord, an iron manufacturer of eastern Pennsylvania, testified as follows before the Finance Committee of the Senate last year. He said:

I am representing to-day, in company with 8 gentlemen who have come from different parts of the East, 25 rolling mills that manufacture bar iron east of the Allegheny Mountains and that stretch from Knoxville, Tenn, to Portland, Me. These companies sell their products for the most part east of the mountains and largely to the Atlantic coast and Gulf points. Consequently this bill, if passed, would put the burden of foreign competition largely on these eastern mills, because the freight from our different mills to coast points is just about equivalent to the freight from European competing points. For instance, our freight to New York would be 10 cents, while practically the same rate could be obtained from Liverpool or from Antwerp.

Mr. President, the existing law levies upon bar iron and similar products a duty of three-tenths of a cent a pound, or \$6 per net ton and \$6.72 per gross ton. It is now proposed to reduce this to 5 per cent ad valorem, which I would say upon the average would be about \$1.25 per ton, taking the price at

which the foreign manufacturer can supply it.

Iron to-day is a specialty, where 30 years ago it was the aple. Steel is now the staple and iron is nothing but a specialty. It is made in small plants owned by individualsby the old-style ironmaster. Neither the United States Steel Corporation, the Cambria Iron Co., the Pennsylvania Steel Co., or Jones & Laughlin, nor any of the great steel manufacturers of the country to-day manufactures a single ton of this article. It is the product of hand labor as against the machinemade article to-day known as steel. In the work of making steel heat and machinery are the two great elements, and man is only an incident. In the work of making iron it is hand-work from the time the pig iron is put into the puddling furnace until, after two processes, the bars leave the rolling mill.

As showing the increased cost of making this article, I re-

ceived a letter about a week ago in reply to a letter of my own

asking for the price of this article. The writer says that the present market price for steel bars is \$1.40 per hundred pounds in Pittsburgh, the market price for iron bars is \$1.70 per hundred pounds, or a difference of \$6 a ton between the two articles.

The difference in value I think rather less than measures the difference in cost. The difference in cost is altogether made up in labor, because the other elements entering into the cost of the manufacture of those articles are the same. The pig iron is possibly the same in both cases, and the amount of it required is approximately the same. So all the difference is made up in labor.

I do not believe, Mr. President, that either committee intended to be unjust to the men who work in these mills or to the men who own them, as compared with the great manufacturers who make steel. The duties imposed upon iron are therefore entirely inadequate, and this comes with all the more force because the market for most of the iron that is made is found in the eastern part of the country, which naturally is more open to foreign competition than the West.

I am speaking now, Mr. President, more in behalf of the men engaged in business and in labor east of the Allegheny Mountains than of those west, where my home is, because in the district in which I live the manufacture of iron is rather a small quantity, as it has been supplanted almost entirely by steel. That is not the case in the East. I therefore urge the committee to rectify the mistake which has been made and to yield to my proposition to amend this paragraph.

I do not know that I have anything further to say. I am appealing to the good sense and the good faith of the committee, and I believe if they fairly and carefully consider the matter they will be disposed to comply with my request and to allow

the adoption of my amendment.

Mr. SIMMONS. Mr. President, the raw materials out of which iron is made are produced as cheaply here as anywhere in the world. The raw materials of iron are iron ore, coal, coke, and limestone. I think it will hardly be gainsaid that we have as fine deposits of these materials, and they are as near by nature assembled as in any part of the globe. Under the present law there is a duty upon coke and upon limestone and upon iron ore. The pending bill places all those products upon the free list.

Pig iron can be produced as cheaply here as anywhere in the world. For the general statement that there is no necessity for a duty upon that product we have only to refer to the statements made under oath by the great captains of the iron and steel industry in the various investigations which have been had in recent years.

The Senator from Pennsylvania yesterday made some inquiry as to whether the Finance Committee had any knowledge as to the cost of producing pig iron abroad as compared with the cost of its production in this country. Without entering into an elaborate argument upon that subject, I want to refer the Senator first to the report of Mr. Pepper, who was sent by the Department of Commerce and Labor to Europe a few years ago for the purpose of making an investigation into the cost of producing pig iron abroad. Then I wish to refer the Senator—

Mr. OLIVER. I will ask the Senator which one of the

Pepper reports it is?

Mr. SIMMONS. I can not now state to the Senator which one. I refer to the one in which he stated the cost of producing pig iron in Germany, England, and France. I have not the report before me; but in that statement Mr. Pepper said in Germany the average lowest cost is \$12.85 per ton; the average highest cost is \$13.65 per ton; the total average cost in Germany is \$13.25 per ton. In England, Mr. Pepper reported that the average lowest cost was \$9.92 per ton; the average highest cost, \$13.45 per ton; the total average cost, \$11.69 per ton.

I hold in my hand the report of the Commissioner of Corpo-

rations on the steel industry giving-

Mr. OLIVER. Mr. President-

The VICE PRESIDENT. Does the Senator from North Carolina yield to the Senator from Pennsylvania?

Mr. SIMMONS. I do.

Mr. OLIVER. I do not think that the Senator from North Carolina ought to bring in the report upon the steel industry as being an element at all in this discussion, because I am not talking about steel; I am talking about iron.

Mr. SIMMONS. I am talking about iron and steel. The Senator has been comparing the two paragraphs which deal

with steel bars and iron bars.

Mr. OLIVER. Then I should like to have the Senator, if he will, justify the placing of a higher duty on bar steel than on bar iron

Mr. SIMMONS. I am going to justify it-

Mr. OLIVER, I think he will have a hard time in doing it, Mr. SIMMONS. If the Senator will be patient enough to hear me. I have not reached that stage of the argument. In the report of the Commissioner of Corporations on the steel industry, made January 22, 1912, he gives the cost of Bessemer and basic pig iron in this country. He finds that the average—the book cost—of all companies is \$12.90 per ton; excluding transfer profits, \$11.34 per ton. That the book cost of the large companies is \$12.89; excluding transfer profits, \$11.11 per ton. Small companies, book cost, \$14.12 a ton; and excluding transfer profits, \$14.03 per ton.

So it will be seen, Mr. President, that according to these two reports, one made by an agent of the department, who visited England, Germany, and France to escertain the cost of produc-ing pig iron over there, and the other made by the Commis-sioner of Corporations with reference to the cost of the same product here, the cost here is lower than it is abroad. In the hearings before the Committee on Ways and Means the statement was made by a number of witnesses that at the present time pig iron is produced more cheaply in this country than it

is in England.

Mr. OLIVER. Mr. President, I thought we disposed of that. Mr. SIMMONS. But the Senator must remember that pig iron is the raw material out of which iron and steel bars are made, and the cost of pig iron here and abroad is very material in determining the question of the proper duty on these derivative products.

I am not going to detain the Senate by referring to the statement of the Senator with reference to the danger from Asiatic competition, but at the proper time, before we get through with the consideration of the schedule, I shall take that up for purposes of discussion, and I think I will be able to show the Senator that there is absolutely no danger from that source.

But, Mr. President, let me get to the question to which I was leading; that is, the one raised by the Senator from Pennsyl-We have pig iron manufactured as cheaply here as anywhere else in the world. These paragraphs, namely, 105 and 112, deal with a product of pig iron advanced only one step beyond the raw material. Every element constituting the raw materials out of which iron and steel bars mentioned in these paragraphs are produced are to-day under the present law on the dutiable list, and every one of them-coke, coal, iron ore, and pig iron-will be on the free list if this bill becomes law. repeat, bar iron and steel are just one step advanced in the process of manufacture from pig iron, out of which they are made. The labor cost of conversion in that step in the process of manufacture is negligible. I am not able at this minute to state the exact labor cost of converting pig into iron bars, but I have the figures as to conversion cost of billets.

Mr. OLIVER. I can enlighten the Senator upon that if he

wishes me to do so.

Mr. SIMMONS. The Senator may have that information. have not the exact figures. The labor cost of converting pig into bars of iron is greater than that of converting it into steel bars, but it is not great in either case, and constitutes relatively a small part of the total cost of either.

Now, Mr. President, the average book cost per ton of Bessemer

Mr. OLIVER. Mr. President, I do not think the Senator ought to talk about Bessemer billets. We are talking about iron

Mr. SIMMONS. Yes; and I am going to talk about iron bars when I get through talking about steel bars.

Mr. OLIVER. I hope the Senator will get to it after a while. He is very slow in coming to it.

Mr. SIMMONS. The Senator discussed together paragraphs 105 and 112 and compared the costs of bar iron with that of steel bars and contended that the cost of manufacturing steel bar is less than the cost of manufacturing iron bar, and I can not answer his argument without discussing the cost of each.

Mr. OLIVER. It is just about one-third.

Mr. SIMMONS. The Senator may be correct about that. have not, as I said, the figures showing the cost for converting pig into iron bars, but I have for converting it into steel billets, and the Senator says the latter cost is about one-third of the former. Let me read what the report of the Commissioner of Corporations says as to the labor cost of converting pig iron into steel billets. The total cost of producing a ton at the furnace of billet ingots is \$14.28. The labor cost of conversion from the pig into the billet is 55 cents a ton.

Mr. OLIVER. Mr. President-

The VICE PRESIDENT. Does the Senator from North Carolina yield to the Senator from Pennsylvania?

Mr. SIMMONS. I do.

Mr. OLIVER. Do I understand the Senator says that the labor cost of converting pig iron into ingots is 55 cents a ton?

Mr. SIMMONS. That is what I same of the Colliver. Then, Mr. President-That is what I said.

Mr. SIMMONS. It is 55 cents, excluding transfer profits.

That is also the book cost as is given in this report.

Mr. OLIVER. Mr. President, if the Senator will allow me. I will tell him what is the labor cost of the conversion of pig iron into muck bars, which corresponds exactly in iron to the cost of converting pig iron into steel. That is a part of the labor The wages paid to one man with his helper alone for puddling-that is, for working at the furnace-is \$5 in the eastern district and \$7 in the western district. Now, that movement in iron is precisely the same as the movement of pig iron into ingots is in steel.

Mr. SIMMONS. Oh, the Senator knows that in these plants more is paid some one laborer a day than the total cost of converting a ton of pig iron into a ton of billets, ingots, and so forth. That sort of statement proves nothing. In every table given in this report as to the conversion cost of billets, whether made by the Steel Corporation or independent corporations, or by the large or small companies, the labor cost of conversion is

less than a dollar a ton.

Mr. OLIVER. Mr. President, how can the Senator stand in his place in the Senate and make such an assertion as that in the face of the uncontroverted statement that every person has made? I can not understand how the Senator can deceive-I will not characterize it.

Mr. SIMMONS. If the Senator will take this report and

study it, he will find that my statement is correct.

Mr. OLIVER. The Senator has not a single table there that relates to iron. It all relates to steel.

Mr. SIMMONS. That is true, and I say now that the average labor cost runs around from 52 to 55 cents in steel.

Mr. OLIVER. In steel. Mr. SIMMONS. And assuming that the cost of iron bar is, as the Senator said, over twice that.

Mr. OLIVER. It is not twice; it is four or five times.

Mr. SIMMONS. Not the labor cost. The Senator said a little while ago the proportion was as 1 to 3.

Mr. CUMMINS. Mr. President—

The VICE PRESIDENT. Does the Senator from North Carolina yield to the Senator from Iowa?

Mr. SIMMONS. Yes.
Mr. CUMMINS. May I ask the Senator from Pennsylvania whether the iron bars to which he has referred are not what are ordinarily known as merchant bars?

Mr. OLIVER. What they call merchant bars are usually

Mr. CUMMINS. I had the honor to make some investigation of this matter last year, and in what I now say I have referred to iron bars. Although I have not gone through my speech carefully to be certain, if I am right about that, the cost of reducing or making merchant bar iron from large iron

Mr. OLIVER. Mr. President, I will say to the Senator from Iowa that if the word billets is used it has no reference to iron. There is nothing known in the trade as an iron billet.

Mr. CUMMINS. I understand that, but I am assuming that there can be a comparison instituted here that will be of help. From my investigation last year, the labor cost was \$3.06 per ton for converting steel billets into steel bars. That was the entire labor cost in performing that operation.

Mr. OLIVER. I think that is correct.
Mr. SIMMONS. That included all the intermediate labor cost; I mean the labor cost in the various processes of production from the raw material. Mr. CUMMINS. It included the labor cost of converting

the billet into the bar.

Mr. OLIVER. Mr. President, I will say, for the information of the Senator from Iowa [Mr. CUMMINS] and also of the Senator from North Carolina [Mr. SIMMONS], that the figures I have here give the total cost, including labor and all other costs, except waste, of converting billets into steel bars at \$4.50 a ton. So I presume that the Senator's figures for labor cost are substantially correct, but from the same source I received the information that for converting muck barswhich in iron correspond to the billet in steel-into iron bars, the cost is \$11.75 a ton.

Mr. SIMMONS. What cost? Mr. OLIVER. The total cost.

Mr. CUMMINS. I was about to say, assuming that it cost \$5 or \$6 a ton for conversion, it would be a little difficult to maintain a very high duty simply on account of the difference between the cost of producing it here and abroad.

While I am on my feet I may say that I recognize that it does cost more to convert pig iron into bar iron than it does to convert pig iron into bar steel.

Mr. SIMMONS. Undoubtedly.

Mr. CUMMINS. But the present law attaches the same or a higher duty to bar steel than it does to bar iron.

Mr. SIMMONS. That is true; a higher ad valorem.

Mr. CUMMINS. A higher specific duty. Mr. SIMMONS. That is the present law.

Mr. CUMMINS. The duty under the present law on bar iron is \$6 per ton, or three-tenths of a cent a pound.

Mr. SIMMONS. I was just about to call the attention of

the Senator from Pennsylvania to that.

Mr. CUMMINS. The duty on bar steel begins with steel that is worth not more than three-fourths of a cent a pound. There is none of that, practically speaking. When it reaches steel that is worth \$26 a ton the duty is then exactly the same as it is upon bar iron, namely, \$6 a ton. When you get above \$26 a ton—and practically all or, anyway, a very large part of bar steel is worth more than \$26 a ton—the duty on bar steel then becomes higher under the present law than it is upon bar iron.

Mr. SIMMONS. That is true.

Mr. OLIVER. Mr. President, if the Senator from North Carolina [Mr. Simmons] will indulge me for a moment, I think I can explain that. The reason of that is that steel is a generic term which includes everything that is produced from iron ore by the process of melting. On the other hand, iron is never reduced to a molten state, but is produced by reducing the pig iron first to a semimolten state, working it in that shape first by hand, and then by passing it through rolls. The advancing duties in paragraph 112 are because that paragraph includes not only what is known as soft steel, which is to-day used almost universally as a substitute for iron and is low-carbon or low-grade steel, but also the higher type of tool steel, which sometimes runs up in value as high as from 30 to 40 cents a pound. For that reason the average ad valorem is considerably

Mr. CUMMINS. Mr. President, I am not speaking about ad valorem duties. The duties under the present law are specific duties, and they run in this way:

All of the above

And "above" includes these bars-

valued at three-fourths of 1 cent per pound or less, seven-fortieths of 1 cent per pound; valued above three-fourths of 1 cent and not above 1.3 cents per pound—

And that makes a maximum of \$26 a tonthree-tenths of 1 cent per pound-

Or \$6 a ton, which is the duty on bar iron-

valued above 1.8 cents and not above 2.2 cents per pound, six-tenths of

1 cent per pound.

That would be \$12 a ton. So the duty on ordinary bar iron under the present law is as high or higher than the duty upon bar steel. I simply call that to the attention of the Senator from Pennsylvania, not because it is significant in the present argument, for I think he is right in saying that the duty on bar iron probably should be a little higher than the duty on bar steel, but in order to preserve the record as it ought to be, namely, that those who have heretofore framed our tariff bills have imposed quite as high a duty on bar steel, if not higher, than upon bar iron.

Mr. OLIVER. I think, Mr. President, that the Senator from Iowa will find that bar steel, which corresponds in quality and is subject to the same uses as bar iron, will come in at a lower

Mr. CUMMINS. Does the Senator from Pennsylvania say that there is any considerable quantity of bar steel made that is

worth less than \$30 per ton?

Mr. OLIVER. Yes; there is a very considerable part that is

worth less than \$30 a ton.

Mr. CUMMINS. There is very little of it, as I remember. It must go below \$26 a ton in order to be lower than the duty on bar iron.

Mr. SIMMONS. I want to ask the Senator from Pennsylvania if it is not the fact that, because steel can be made so much cheaper than bar iron, steel is displacing bar iron, and that there is but little bar iron now made

Mr. OLIVER. That is certainly true, Mr. President. Mr. SIMMONS. It is certainly true.

Mr. OLIVER. There are still some purposes for which iron is used, and there always will be. Iron is more workable, to use that expression, than is steel; it is easier welded. Then another very important item is, that it is less subject to cor-

rosion or rust, on account of its fibrous structure, from the action of acids than is steel. Therefore a certain amount of it always will be made; it is made for special purposes. the only thing that justifies its manufacture to-day. fact-and I call this to the attention of the Senator from North Carolina [Mr. SIMMONS]-the mere fact that it is made in units of 2,800 pounds, which is the ordinary weight of a puddler's heat, while steel is made in the latest giant open-hearth furnaces in units of a hundred tons, shows how of necessity it must be very much more expensive to make, and I would think that after considering the matter and also considering the fact, as I have stated before, that its manufacture is confined very largely to the Atlantic seaboard, extending down into Tennessee, the committee ought to treat this industry with a fair degree of generosity.

Mr. SIMMONS. I want to ask the Senator from Pennsylvania if he disputes the proposition asserted by the Senator from Iowa [Mr. CUMMINS] that, under the present law, the duty is higher upon the steel products that are mentioned in paragraph 112 than they are upon the iron products mentioned in

paragraph 105?

Mr. OLIVER. I think, Mr. President, that a careful examination of the two paragraphs would show that bar steel of a corresponding quality under the present law is admitted at a lower rate of duty than is bar iron.

Mr. SIMMONS. The Senator says "a lower rate of duty." Is

it not nearly twice as high? Is not the duty on steel under

the present law nearly twice as high?

Mr. OLIVER. The Senator evidently misunderstands me. I say that bar steel of a similar quality would come in at a lower rate of duty than bar iron, because bar iron is subject to a specific duty of six-tenths of a cent per pound, while bar steel comes in at from three-tenths of a cent a pound up; and bar steel under \$26 a ton would come in, as I understood the Senator to say-I have not the figures before me

Mr. CUMMINS. Bar steel valued at three-fourths of a cent per pound or less would come in at the rate of seven-fortieths of 1 cent per pound, which is \$3.50 a ton; and bar steel valued at above three-fourths of a cent and not above 1.3 cents comes in at one and three-tenths of a cent a pound, or \$6 a ton, which is the same as the bar iron.

Mr. OLIVER. No; bar iron is three-tenths of a cent. Mr. CUMMINS. Bar iron is three-tenths of a cent, or \$6

Mr. OLIVER. Then bar steel corresponding in quality would be in that second bracket, which would bring it in at seven-

fortieths of a cent per pound, or \$3.50 per ton.

Mr. SIMMONS. I notice in the comparative tables that we have here, taking all the products in paragraph 105, the average ad valorem equivalent under the present law of the products mentioned in that paragraph is 11.94 per cent, while the average ad valorem equivalent for products mentioned in paragraph 112 is 21.98 per cent. I concede that that is not an accurate guide, because there are a great many products in each of these paragraphs outside of the one which we are now discussing

Mr. CUMMINS. Mr. President, lest I might at some future time be thought inconsistent, I will say that I do not agree with the Senator from Pennsylvania [Mr. OLIVER] that the merchant bar steel will come into the United States at a valuation of \$26 per ton or less. It costs in this country to make merchant bar steel more than \$28 a ton; and I do not believe it costs very much more to make it here than it does to make it abroad. I therefore do not believe that the foreign price of merchant bar steel is as low as \$26 per ton, although I have no positive information on that point. So I think the duty upon which merchant bar steel would come into the United States would be higher than the duty upon which merchant bar iron would come into the United States.

Mr. OLIVER. I should like to ask the Senator from Iowa where he gets his information that it costs more than \$28 a ton to make bar steel? I have a letter here saying that it is freely offered on the Pittsburgh market at this time at \$28 a ton, which would show that if that is the cost of it they are

selling it at cost.

I take it from the tables I used a year ago. Mr. CUMMINS. They were made up by the Department of Commerce and Labor, Bureau of Corporations, from the average of five years, 1902 to The raw material entering into a ton of raw merchant bar steel cost \$21.40; the cost of labor was \$3.06; other operating expenses, \$2.28; so that the labor and other operating charges totaled \$5.34, making the mill cost \$26.75, which, with certain overhead charges, amounting to \$1.37, makes a total cost of \$28.12. It may be that since the examination was made the cost has been reduced. I can not answer about that.

Mr. OLIVER. I am speaking of the selling price. The selling price to-day is \$28.

Mr. CUMMINS. Then, if the selling price is \$28—

Mr. OLIVER. The Senator's figures may refer to gross tons. I am dealing here with net tons.

Mr. SIMMONS. What does the Senator from Pennsylvania insist is the present price of steel bars?

Mr. OLIVER. One dollar and forty cents a hundred in Pittsburgh. I received that information within a week. The price of bar iron is \$1.70 a hundred, showing a difference in the market price of the two commodities of \$6 a ton.

Mr. SIMMONS. Is the Senator giving the cost and not the

selling price?

Mr. OLIVER. I am giving the selling price.

Mr. SIMMONS. I am asking what is the cost price per ton

of steel bars?

I have not the figures of the cost of steel bars. Mr. OLIVER. Mr. SIMMONS. I will state to the Senator that I have had that matter investigated this morning by the expert of the Treasury Department, who assisted the committee in preparing the statistics given in the handbook we are all using, and he advised me that the import price was a cent a pound, or \$20 a

Mr. OLIVER. A cent a pound for what?

Mr. SIMMONS. For steel bars. I am trying to get what the

cost price here is.

Mr. OLIVER. I would want that verified, Mr. President, because I rather think that is very low, even for imported steel bars; but, if that is the case, it would bring the duty on steel bars under the existing law down to seven-fortieths of 1 cent per pound, or \$3.50 a ton.

Mr. SIMMONS. What does the Senator say is the cost of

producing iron bars?

Mr. OLIVER. The cost of producing wrought-iron bars from the pig iron to the bar, I would estimate at not less than \$20 a

Mr. SIMMONS. Is the Senator referring to wrought-iron I understood him to say they cost twice as much as steel bars.

Mr. OLIVER.

Mr. SIMMONS. I understood the Senator to say that steel

Mr. OLIVER. Oh, no; I said that the cost of reducing a ton of pig iron to steel bars would be not to exceed, in my opinion, \$10 or \$11 a ton. The cost of converting a ton of pig iron into

iron bars would be not less than \$20 a ton.

Mr. SIMMONS. What the Senator is complaining of now is that in our amendments we do the same thing which the present law does. The present law, though it is based upon a specific rate, carries a lower duty upon iron bars, which the Senator says is the more valuable product, and a higher duty upon steel bars, which he says is a less valuable product, and the Senator is complaining that we have done the same thing in the amendments to these two paragraphs.

Mr. President, the Senator overlooks the fact that the present law, which carries a higher rate upon the lower product, provides a specific duty. The bill and the amendment which we propose adopt the ad valorem rate, so that the value of the

product will determine the amount of the duty.

The Senator says that iron bars are worth twice as much as steel bars; yet we have a duty of 5 per cent on iron bars and a

duty of 8 per cent on steel bars.

Mr. OLIVER. Mr. President, I do not want the Senator to misquote me. I did not say that iron bars were worth twice as much as steel bars. I said that the cost of converting pig iron into iron bars was twice as much as converting it into

steel bars; and I stand by that statement.

Mr. SIMMONS. How much more does the Senator say that iron bars are worth than steel bars? My information is—and it is taken from public documents—that the price of wroughtiron bars per pound is 2.9 cents, and that the price of steel bars is I cent per pound. Whether that is correct, I can not say from my own knowledge. I can only say that the expert who prepared this book, the man who has been helping us in all these calculations, gave that to me as a statement obtained from official documents.

Mr. OLIVER. If the Senator is relying upon such statements

as that, I pity him.

Mr. SIMMONS. That refers not to the price here, but to the

import price.

Mr. OLIVER. Oh, I am referring to the articles as they are

made here Mr. SIMMONS. Mr. President, the Senator must remember

that we have to take the import price for the purpose of deter-

mining whether a duty is correct or not correct when we compare the duty upon one product with the duty upon another product. What I am going to suggest to the Senator is this: I have had this calculation made this morning upon the hypothesis-and I think the hypothesis is based upon the facts, because it is taken from an official document—that wrought-iron bars are worth, import price, 2.9 cents per pound, and that steel bars are worth, import price, 1 cent per pound. Five per cent on bar iron on that valuation when reduced to a specific rate would be fourteen one-hundredths of a cent. And 8 per cent on the invoice price on bar steel on a valuation of 1 cent a pound reduced to a specific rate would be eight one-hundredths of a cent; so that the duty which we have placed, substituting the ad valorem for the specific carried in the bill, does impose a higher rate per pound upon bar iron than it does upon bar steel, and from the Senator's own standpoint he has no ground for complaint as to the relative rates on these two products.

Mr. OLIVER. Mr. President, I have no exception to take to

the figures presented by the Senator; but knowing what I do about the iron and steel industry, I will state that the price which he gives for iron bars of 2.9 cents per pound, as the average import price, shows conclusively that those bars were of some special nature. They were undoubtedly high-priced Swedish bars, imported probably for the purpose of being used in the manufacture of what is known as high-speed steel. They were not the ordinary merchant bars, because if merchant bars can be sold, as they are, at 1.70 cents in this country, nobody would import those same bars at 2.9 cents a pound, can not understand how the price of steel bars can be 1 cent a pound, because it seems an extraordinarily low price; and if it is to prevail it will make some of our steel manufacturers very sick.

Mr. SIMMONS. I will refer the Senator to the book here, which states that 10,000 tons of it were imported at 1 cent a pound-just the figures I have given.

Mr. OLIVER. I have no doubt the Senator has quoted cor-

rectly. I do not deny that that is correct

Mr. SIMMONS. The Senator says that these figures with reference to the invoice price of imports of bar iron must refer to some unusual, extraordinary, or freakish importation. Mr. President, I have noticed that, whenever the import prices are such as do not suit the logic of Senators on the other side, we are met with that same statement, that they must refer to some extraordinary importation.

Mr. OLIVER. I should like the Senator to explain to me and to the Senate whether he or any other reasonable man would pay 2.9 cents for a foreign article when he can buy the

same article here at 12 cents or less?

Mr. STONE. What is the question, Mr. President? The VICE PRESIDENT. The question is on agreeing to the

first amendment reported by the committee, in section 105.

Mr. OLIVER. Do I understand that the question is simply

on the first amendment?

The VICE PRESIDENT. Yes. The ruling of the Chair has been heretofore, and it seems to have been accepted by the Senate, that the committee has a right to perfect the text of the bill. The purpose of the motion made by the Senator from Pennsylvania, as the Chair understands, would be fully accomplished by refusing to agree to the amendment of the com-

Mr. OLIVER. Well, I withdraw my amendment, Mr. President.

Mr. STONE. As I understand, the motion of the Senator from Pennsylvania was to strike out "5," in line 2, page 30, and insert "10."

Mr. OLIVER. I will withdraw my amendment and simply ask for a yea-and-nay vote upon the rate. Let the other amendments of the committee be adopted.

The VICE PRESIDENT. The question is on agreeing to the first amendment of the committee, which the Secretary will

The Secretary. In paragraph 105, page 30, line 1, after the words "hammered iron," it is proposed to insert "and all iron." The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 105, page 30, line 2, after the word "section," to strike out "8" and insert "5," so as to read, "5 per cent ad valorem."

Mr. OLIVER. On that I call for the yeas and nays.

The VICE PRESIDENT. The Senator from Pennsylvania calls for the yeas and nays. Is there a second?

Mr. STONE. Just a moment. Do I understand the Senator from Pennsylvania to move to amend the amendment?

The VICE PRESIDENT. No; the Senator from Pennsyl-

vania has withdrawn his amendment.

Mr. OLIVER. I will simply ask the Senator in charge of this schedule of the bill if he will not pass this amendment over and give the question of the rates some consideration and come back to it again? I really think that the committee will decide finally, after considering the matter, to change the rate.

Mr. STONE. Mr. President, if there is no question here but

one of rate

Mr. OLIVER. That is all.
Mr. STONE. I do not see any need of passing it over. I

would rather dispose of it, as it has been fully discussed.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee in paragraph 105, page 30, line 2, to strike out "8" and insert "5," on which the Senator from Pennsylvania [Mr. OLIVEE] has demanded the yeas and navs.

The yeas and nays were ordered, and the Secretary proceeded

to call the roll.

Mr. JAMES (when Mr. BRADLEY's name was called). sire to announce that my colleague [Mr. Bradley] is detained from the Chamber by reason of illness. He has a general pair with the junior Senator from Indiana [Mr. KERN]. I will let

this announcement stand for the day.

Mr. GALLINGER (when Mr. BURLEIGH's name was called). The junior Senator from Maine [Mr. BURLEIGH] is at his home in Maine, having recovered sufficiently to be removed to his home town. He is paired for the day with the junior Senator from Virginia [Mr. Swanson].

Mr. FLETCHER (when his name was called). I have pair with the junior Senator from Wyoming [Mr. WARREN]. I have a

do not see him present, and therefore I withhold my vote. If he were present, I should vote "yea."

Mr. KERN (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. Bradley], and I will therefore withhold my vote, unless it should become necessary to make a quorum.

Mr. SAULSBURY (when his name was called). Has the junior Senator from Rhode Island [Mr. Colt] voted? The VICE PRESIDENT. He has not.

I have a general pair with that Senator, Mr. SAULSBURY.

and therefore withhold my vote.

Mr. SMITH of Georgia (when his name was called). I have a general pair with the senior Senator from Massachusetts [Mr. LODGE]. I transfer that pair to the senior Senator from Virginia [Mr. Martin] and will vote. I vote "yea."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. Root]. I transfer that pair to the junior Senator from Oklahoma [Mr. Gore] and will vote. I vote "yea."

The roll call was concluded. Mr. GRONNA. I desire to announce that my colleague [Mr. McCumber] is absent on account of illness in his family. He is paired with the senior Senator from Nevada [Mr. Newlands]. I wish this announcement to stand for the day.

Mr. KERN. I transfer my pair with the senior Senator from Kentucky [Mr. Bradley] to the junior Senator from Alabama [Mr. Johnston] and will vote. I vote "yea."

Mr. BANKHEAD. I have a general pair with the junior Senator from West Virginia [Mr. Gorf]. I transfer that pair to the senior Senator from Maryland [Mr. Smith] and will vote. I vote "yea."

Mr. SAULSBURY. I transfer my pair with the junior Senator from Rhode Island [Mr. Colt] to the junior Senator from Arkansas [Mr. Robinson] and will vote. I vote "yea."

Mr. THORNTON. I desire to announce the unavoidable absence of the junior Senator from Alabama [Mr. Johnston]. I

ask that this announcement may stand for the day.

Mr. SMOOT. I desire to state that the junior Senator from Wisconsin [Mr. Stephenson] and the senior Senator from Delaware [Mr. Du Pont] are unavoidably detained from the Senate. I will allow this announcement to stand for the day. The result was announced-yeas 51, nays 22, as follows:

	YE	AS-51.	
shurst acon nakhead orah iyan samberlain silton arke, Ark. awford etcher oonna itchcock ollis	Hughes James Johnson, Me. Jones Kenyon Kern La Follette Lane Lea Lewis Martine, N. J. So the amendment of the committee was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 106, page 30, line 8, after the word "manufactured," to strike out "12" and insert "10," so as to make the paragraph read:

106. Beams, girders, joists, angles, channels, car-truck channels, TT, columns and posts or parts or sections of columns and posts, deck and bulb beams, sashes, frames, and building forms, together with all other structural shapes of iron or steel, whether plain, punched, or fitted for use, or whether assembled or manufactured, 10 per cent ad

Mr. TOWNSEND. Mr. President, I do not care to detain the Senate even for a vote on an amendment which I shall suggest to this paragraph, because I know how entirely useless it would be; but I do wish to call attention to the item of steel sashes and frames. That item is taken out of the basket clause of the The House reduced the duty, which is now about present tariff. 45 per cent, to 12 per cent, and the Senate reduces it still further, to 10 per cent.

This article was not used at all in the United States until the construction of the Singer Building in the city of New York. Since then it has been used to a considerable extent. At the beginning all of it was imported into the United States.

Mr. STONE. Mr. President, if the Senator will pardon me, unless he prefers to go on and complete his statement, it may be that he would be willing, in the interest of expedition, to accept the suggestion I am about to make with reference to sashes and frames. In view of very urgent representations recently made to the committee respecting the matter the Senator has mentioned-sashes and frames-we are entirely willing to pass that paragraph for the present, pending further consideration.

Mr. TOWNSEND. I am perfectly content to have that course adopted. I am simply anxious to have a change made. I am very glad indeed to postpone it if the committee will consider

it further

riz. a. C.

Mr. STONE. Of course I do not know that a change will be made, but it will be taken under consideration.

Mr. TOWNSEND. I shall be very glad to discuss it later, then. Mr. CUMMINS. I was giving my attention to something else. I should like to know from the Senator from Michigan what change he proposes. I should like to be advised in regard to it.

Mr. TOWNSEND. The proposition I was going to suggest to the committee with reference to sashes and sash frames was that the duty provided in the bill is altogether too low, and I was going to ask that it be raised. But the Senator from Missouri [Mr. Stone] suggests that the committee will consider that matter, with a possibility of making some change, and therefore he has asked to have the consideration of the paragraph postponed, in which suggestion I am very glad to acquiesce.

The VICE PRESIDENT. Paragraph 106 will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 107, page 30, line 16, after the word "otherwise," to strike out "15" and insert "12," so as to make the paragraph

107. Boiler or other plate iron or steel, and strips of iron or steel, not specially provided for in this section; sheets of iron or steel, common or black, of whatever dimensions, whether plain, corrugated, or crimped, including crucible plate steel and saw plates, cut or sheared to shape or otherwise, or unsheared, and skelp iron or steel, whether sheared or rolled in grooves, or otherwise, 12 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 108, page 30, line 21, after the word "section," to strike out "15" and insert "12," so as to make the paragraph read:

108. Iron or steel anchors or parts thereof; forgings of iron or steel, or of combined iron and steel, but not machined, tooled, or otherwise advanced in condition by any process or operation subsequent to the forging process, not specially provided for in this section, 12 per cent ad valorem; antifriction balls, ball bearings, and roller bearings, of iron or steel or other metal, finished or unfinished, and parts thereof, 35 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 109, page 31, line 2, after the word "section," to insert "and barrel hoops of iron or steel," and in line 3, before the words "per centum," to strike out "12" and insert "10," so as to make the paragraph read:

109. Hoop, band, or scroll iron or steel not otherwise provided for in this section, and barrel hoops of iron or steel, 10 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 111, page 31, line 23, after the word "tin," to strike out "20 per cent ad valorem" and insert "and"; and in line 26, after the word "process," to strike out "20" and insert "15," so as to make the paragraph read:

"15," so as to make the paragraph read:

111. All iron or steel sheets, plates, or strips, and all hoop, band, or scroll iron or steel, when galvanized or coated with zinc, spelter, or other metals, or any alloy of those metals; sheets or plates composed of iron, steel, copper, nickel, or other metal with layers of other metal or metals imposed thereon by forging, hammering, rolling, or welding; sheets of iron or steel, polished, planished, or glanced, by whatever name designated, including such as have been pickled or cleaned by acid, or by any other material or process, or which are cold rolled, smoothed only, not polished, and such as are cold hammered, blued, brightened, tempered, or polished by any process to such perfected only; and sheets or plates of iron or steel, or taggers iron or steel, coated with tin or lead, or with a mixture of which these metals or either of them is a component part, by the dipping or any other process, and commercially known as tin plates, terneplates, and taggers tin, and tin plates coated with metals, and metal sheets decorated in colors or coated with nickel or other metals by dipping, printing, stencling, or other process, 15 per cent ad valorem.

The amendment was agreed to.

The amendment was agreed to

The next amendment was agreed to.

The next amendment was, in paragraph 112, page 32, line 1, after the word "steel," to strike out "ingots, cogged ingots, blooms and slabs, die blocks or blanks, billets and"; and in line 13, before the words "per cent," to strike out "10" and insert "8"; and in line 22, after the word "than," to strike out "No. 6 wire gauge," and insert "twenty one-hundredths of 1 inch in diameter"; and on page 33, line 5, after the word "alloys," to strike out "15" and insert "12," so as to make the paragraph read; paragraph read:

paragraph read:

112. Steel bars, and tapered or beveled bars; mill shafting; pressed, sheared, or stamped shapes, not advanced in value or condition by any process or operation subsequent to the process of stamping; hammer molds or swaged steel; gun-barrel molds not in bars; all descriptions and shapes of dry sand, loam, or iron molded steel castings, sheets, and plates; all the foregoing, if made by the Ressemer, Siemens Martin, open hearth, or similar processes, not containing alloys, such as nickel, cobait, vanadium, chromium, tungsten or wolfram, molybdenum, titaulum, iridium, uranium, tantalum, boron, and similar alloys, 8 per cent ad valorem; steel ingots; cogged ingots, blooms and slabs, die blocks or blanks; billets and bars and tapered or beveled bars; pressed, sheared, or stamped shapes not advanced in value or condition by any process or operation subsequent to the process of stamping; hammer molds or swaged steel; gun-barrel molds not in bars; alloys used as substitutes for steel in the manufacture of tools; all descriptions and shapes of dry sand, loam, or iron molded castings, sheets, and plates; rolled wire rods in coils or bars not smaller than twenty one-hundredths of 1 inch in diameter, and steel not specially provided for in this section, all the foregoing when made by the crucible, electric, or cementation process, either with or without alloys, and finished by rolling, hammering, or otherwise, and all steels by whatever process made, containing alloys such as nickel, cobalt, vanadium, chromium, tungsten, wolfram, molybdenum, titanium, iridium, uranium, tantalum, boron, and similar alloys, 12 per cent ad valorem.

Mr. OLIVER. Mr. President it was my intention to make

Mr. OLIVER. Mr. President, it was my intention to make an appeal to the committee at least to restore the rate of 15 per cent on alloy steel, or what is known to the trade as highspeed tool steel. This steel was unknown, to this country at least, until about 1901. It is used for tools, and with the same quantity of steel it is possible to produce from five to ten times the amount of work that formerly was produced with ordinary or even high-class tool steel.

In the existing tariff law it carries a duty of 20 per cent. Notwithstanding that duty, there are very large quantities of it imported to-day. The process is one involving an enormous amount of labor and skill. The men employed in the industry are necessarily men of skill and intelligence. I am assured, and I have no doubt it is the case, that the production of this kind of steel in this country will be next to impossible if this tariff bill goes into force, because the imports to-day are a very large proportion of the entire amount that is used.

As I say, I had expected to appeal to the good sense of the committee to induce them, if possible, at least to retain the very moderate duty of 15 per cent ad valorem on this kind of steel. But after my experience with paragraph 105, relating to bar iron, I have made up my mind that the committee intends to stand pat on this bill; and I despair of making any impression whatever upon them, no matter how strong may be the arguments that are produced. I therefore leave it with the Senate to vote on it as it stands.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment of the Committee on Finance was, in paragraph 113, page 33, line 7, after the word "shavings," to strike out "20" and insert "15," so as to make the paragraph read:

113. Steel wool or steel shavings, 15 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 114, page 33, line 9, after the word "sand," to insert "by whatever name known," and in line 10, after the word "abrasives," to strike out "30" and insert "25," so as to make the paragraph read:

114. Grit, shot, and sand, by whatever name known, made of iron or steel, that can be used as abrasives, 25 per cent ad valorem.

The amendment was agreed to.

The amendment was agreed to.

The next amendment was, in paragraph 115, page 33, line 18, after the word "hammering," to insert "not specially provided for in this section"; and in line 20, after the word "than," to strike out "No. 6 wire gauge" and insert "twenty one-hundredths of 1 inch in diameter"; and in line 22, after the word "classed," to strike out "and dutiable"; so as to make the paragraph read:

115. Rivet, screw, fence, nail, and other iron or steel wire rods, whether round, oval, or square, or in any other shape, and flat rods up to 6 inches in width ready to be drawn or rolled into wire or strips, alt the foregoing in coils or otherwise, including wire rods and iron or steel bars, cold rolled, cold drawn, cold hammered, or polished in any way in addition to the ordinary process of hot rolling or hammering, not specially provided for in this section, 10 per cent ad valorem: Provided, That all round iron or steel rods smaller than twenty one-hundredths of 1 inch in diameter shall be classed as wire.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was to strike out paragraph 121, in the following words:

121. Finished automobiles and automobile bodies, 45 per cent ad valorem; automobile chassis, 30 per cent ad valorem; finished parts of automobiles, not including tires, 20 per cent ad valorem.

And to insert in lieu thereof the following:

121. Finished automobiles, valued at \$1,500 or over, and automobile bodies, 45 per cent ad valorem; finished automobiles valued at less than \$1,500 and more than \$1,000, 30 per cent ad valorem; finished automobiles valued at \$1,000 or less, 15 per cent ad valorem; automobile chassis and finished parts of automobiles, not including tires, 30 per cent ad valorem.

Mr. SMITH of Michigan. Mr. President, I simply desire to call the attention of the members of the Finance Committee to a remonstrance which was filed in this Chamber a few weeks ago, signed by every employee in the automobile industry in the city of Detroit, against this proposed reduction. I will not dwell upon it. It has evidently had no weight with the committee, and what I may say will have no weight with the committee. Our success in modeling the bill along the lines of practical utility and American interests has failed, and for one I feel quite discouraged over the outlook.

But I desire to remind my friends upon the other side that the employees in this industry believe themselves to be vitally affected by the changes proposed, do not relish what you are about to give them, and will resent it when the opportunity

presents itself.

Mr. CUMMINS. Mr. President, I have not been quite able to understand the reasons for arranging the paragraph in the way in which we find it. It is easy to see that it is the apparent purpose of the committee to allow high-priced automobiles to come in at 45 per cent, medium-priced automobiles at 30 per cent, and low-priced automobiles at 15 per cent. There is a little mockery about it, however, it being perfectly well known that Europe can not send any cheap automobiles into the United States, and that in fact we send more automobiles of that kind

abroad than they manufacture, all told, I think, in Europe.

But, however that may be, I should like to know from some one who can speak for the committee, whether it is expected that in order to take advantage of these graded rates of duty it is necessary that the machines shall come into the United States as a whole, set up ready for work. Of course, every one who knows anything about the business knows that in order to transport the machines properly and safely over a long distance, at any rate, they ought to be knocked down and transported in It looks to me as though we were imposing upon the importer of cheap machines the necessity of sending in the machines fully set up and thereby incurring a very much higher freight rate in order to obtain the advantage of the lower rate of duty

You have put a duty of 30 per cent upon the finished parts of automobiles. It goes without saying that there will never be

an automobile brought in paying a duty of 45 per cent. A man would be crazy to bring in a finished automobile, paying 45 per cent for it, when by taking the wheels off and the body off he

could bring them all in at 30 per cent.

I can not understand just why the committee has made up the paragraph in this way. I think the duty is very much higher than necessary, anyhow. I am now speaking of the 45 per cent duty. I think it perfectly absurd to put a duty of 45 per cent upon automobiles of any kind when there is not that difference in the cost of production. When the people of America want to buy high-priced automobiles, especially of foreign manufacture, they consult only their taste or their pride, and it does not make any difference how much they may be called upon to pay for

But I should like to know why a duty of 45 per cent is attached to automobiles finished and then a duty of 30 per cent upon the finished parts of those same automobiles. like to know why when an automobile that costs not more than \$1,500 is allowed to come in at 15 per cent you do not allow the finished parts of that automobile to come in at 15 per cent also, in order that if there are any who buy these low-priced automobiles abroad they can take advantage of the low rate which is here proposed to be put upon the machine.

It may be that there is some reason for all this that I have not been able to ascertain in reading the paragraph, and if there

is I will be very glad to hear it.

Mr. THOMAS. Mr. President, under the present law all automobiles, motor cycles, and bicycles, and finished parts of them, are dutiable at 45 per cent. There were imported in 1912 under that law 872 machines. They were high-priced machines evidently, because their total value is \$1,899,000, thus indicating that it is only the very expensive machines that are brought into the country under that duty.

Mr. CUMMINS. But I ask the Senator from Colorado

whether he does not know or does not believe that all those machines that were imported, whether high-priced or low-priced,

came in knocked down?

Mr. THOMAS. No; I do not know that.

I believe if the Senator will examine, unless Mr. CUMMINS. some tourist brought in his machine after having used it in Europe, he will not find that a single machine came into the United States set up ready for use.

Mr. THOMAS. I assume, Mr. President, that if a machine comes over here, whether it comes here put together or knocked

down, it is a machine just the same.

Mr. CUMMINS. But these are parts, and they are to come

in at 30 per cent.

Mr. THOMAS. They are parts, of course, but if A buys a machine in Paris and takes it to pieces and ships it to this country he is shipping an automobile and not finished parts thereof in the sense in which that expression was used in the present law or in which it is used in the proposed law, unless he brings it in different vessels, and I would not imagine that that would be done.

Mr. CUMMINS. I have been told, Mr. President, that ninetenths of the importations of the last year are of chassis alone, and that very few automobiles have been imported with the bodies. It is customary in many cases to put the bodies upon the machines in this country, because we make metal bodies and they do not make them abroad to any great extent.

Mr. THOMAS. I have personally, Mr. President, no information as to that, but it is evident, as I was about to say when the Senator asked his question, that under the present law it is only the very high-priced machines that have been imported. Without knowing definitely about it, I suppose those machines were brought over here by gentlemen who prefer machines of a foreign make, notwithstanding the fact that they could get just as good and just as serviceable and just as attractive-appearing machines of American make as can be imported from abroad. The automobile of that sort, whether made here or whether made abroad, ought to fall, if it does not fall, under the class of luxuries. They are the machines that are used by people who can afford them for pleasure as well as for business purposes, but they are nevertheless not indispensable to the average individual, or to any individual, so far as that is concerned.

Mr. SMOOT. Mr. President—

The VICE PRESIDENT. Does the Senator from Colorado

yield to the Senator from Utah?

Mr. THOMAS. With pleasure.

Mr. SMOOT. I called attention to what I consider to be an inconsistent arrangement of this paragraph in the speech that I delivered in the Senate on July 21 and 22. I at that time made this statement

"It is ridiculous to put a duty of 45 per cent on automobiles valued at \$1,500 or more, and then to admit at 30 per cent chassis and finished parts. The bodies of automobiles are too bulky, and subject to damage in shipping, and too expensive to ship by reason of their bulk in proportion to their value. Hence European manufacturers, as a rule, do not make the bodies, and as long as they can send chassis into this country at 30 per cent, the 45 per cent duty on any kind of an automobile would be of no value as a protection to American manufacturers. One of the Democratic members of the Ways and Means Committee of the House said that 'the automobile chassis is practically the finished car, with the exception of the body and the tires.

That is the truth. There is no question that more than ninetenths of all the automobiles shipped from abroad are only shipped here with the running gear, or chassis, and the body is made in this country. While it is provided here that finished automobiles at a value above \$1,500 shall carry a duty of 45 per cent in the future, if this bill passes there will be no such shipments to this country as long as the chassis can be shipped here at a duty of 30 per cent.

at a duty of 30 per cent.

Mr. THOMAS. Mr. President, I do not believe that a machine which simply lacks the body can be shipped over here as a finished part of the machine. But whether it can or not, the only effect of this would be to bring it in here at a 30 per cent

rate.

Mr. SMOOT. That is true, but then why—
Mr. THOMAS. The only effect of that would be to reduce

the revenue to the Government.

Mr. SMOOT. Why try to make it appear to the country that because they are a luxury, as automobiles, I suppose, should be classed, though at a value of \$1,500, shall carry 45 per cent, when in reality there would be no such shipment?

would pay 30 per cent instead of 45 per cent.

Mr. THOMAS. In many instances people go abroad and take their automobiles with them. Accidents occur, in consequence of which finished parts are required and they must be had. One of the things which the committee had in view was to meet that situation, so that the parts of machines which might be essential as a result of accident or other unforeseen occurrence might be provided for. But I do not see any calamity that will be involved if that machine should all be taken apart and a portion of it shipped in one vessel and a portion in another vessel and brought into this country at 30 per cent. per cent is a very good duty, and so far as the automobile business requiring any protection goes, it does not require any whatsoever. An enormous amount of the machines that are manufactured in this country are exported. The export business in this line of industry is not only large, but it is growing larger every day. If I am correctly informed, one great establishment in the city of Detroit has its cars scattered all over the face of Germany at present, to say nothing of its invasion of other markets.

Now, we kept the duty at 45 per cent upon the high-class automobile upon the theory that it is a luxury, as it is a luxury, and while there are no other sort of cars imported here Mr. WILLIAMS. It is a fad to get a French automobile.

Mr. THOMAS. Of course it is a fad to get a French automo-While there are no low-priced cars imported here at present, it may be that under the lower duty there will be competition in that particular class of the automobile industry. But whether so or not, an opportunity is given by the provision for competition in the more useful and the cheaper cars that are now used so generally.

Mr. CUMMINS. Mr. President, I simply want to say that my objection to this paragraph in its present form is that substantially everything will come in at 30 per cent. This rate is not too low, but the suggestion of 45 per cent, in my opinion, is a mere glittering pretense, and the suggestion of anything coming in at 15 per cent may also be a pretense, because ir order to take advantage of 15 per cent it must come in wholly set up. The freight rate upon such an automobile shipped in that way, although I do not speak of that with certainty, will largely overcome the advantage that is sought to be given to the poorer people by the reduction of the rate to 15 per cent.

Why not put on a duty that will amply protect it? I think that 20 per cent is ample upon all kinds of automobiles. You will then get more duty or about the same duty that you will get under the present law; you will deceive nobody; everything will be open and candid and fair, and every man can under-

stand it.

Mr. THOMAS. May I ask the Senator what rate of duty he provides for automobiles in his proposed substitute for SchedMr. CUMMINS. The substitute that I have proposed reads

Automobiles, bicycles, and motor cycles, and finished parts of any of the foregoing, not including tires, 25 per cent ad valorem.

That is high enough.

Mr. THOMAS. That is 5 per cent higher than the Senator thinks is a proper duty upon that product.

Mr. CUMMINS. It is 5 per cent lower than the duties that are proposed in this bill.

Mr. THOMAS. I understood the Senator to say just now that he thought 20 per cent was ample.

Mr. CUMMINS. If I so said, I did not speak accurately, because I meant 25 per cent.

Mr. WILLIAMS. Mr. President-

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Mississippi?

Mr. THOMAS. With pleasure. Mr. WILLIAMS. The Senator from Iowa has just said that keeping 45 per cent upon automobiles worth over \$1,500 is a mere pretense, from which I infer that he believes none of them would be imported. The world is run a great deal by fad and fancy and fashlon, three very strong "f's."

Mr. CUMMINS. If the Senator—
Mr. WILLIAMS. Wait just a moment. There is another
"f." There are a lot of fools in this country that will have
only fancy makes of automobiles. They can get better automo-

blies here, but they will not have them.

I find that in 1905 two million and a quarter dollars' worth, in round numbers, of these automobiles were imported, and the unit of value was \$3,500 aplece; and that in 1910 two and three-quarter million dollars' worth, in round numbers, were imported, and the unit of value upon the average was two thousand one hundred and fifty-two dollars and some cents apiece. Last year it was a million and three-quarters, with a unit of value of two thousand one hundred and seventy-eight dollars and some cents. In other words, this shows from the very unit of value of the imported automobiles that only the very highest priced automobiles were being imported at all.

Now, we believe that they were being imported merely because certain fashionable people wanted them and would have them, and in some cases because American tourists abroad bought them and brought them back with them. We did not think, therefore, that there would be a diminution of the revenue derived from the importation of automobiles by leaving the duty upon the highest priced ones at 45 per cent, whereas we thought that when we got down to the lowest priced, which hitherto evidently have not been imported at all, possibly if we reduced the duty on some of them to 30 per cent and on others to 15 per cent, some of them might be imported and we

might add to the revenue.

Mr. CUMMINS. Mr. President—

Mr. WILLIAMS. I am rather of the opinion that the 30 per cent and the 15 per cent tax upon the lower priced automobiles will be prohibitive, because there is no fashion that demands them, no fancy that demands them, but the other automobiles will come in.

Now, the Senator asks why we put a duty of 30 per cent upon chassis while we put a duty of only 15 per cent upon the lowest priced automobiles in the classification.

Mr. CUMMINS. Before the Senator from Mississippi passes

that, let me say

Mr. WILLIAMS. Let me finish the sentence. I understood the Senator himself to say—or was it the Senator from Utah [Mr. Smoot]?—that nearly all the importations came over in the shape of chassis.

Mr. SMOOT. Mr. President, there is no question about it. If the Senator will look it up he will find that is the case, and that the chassis

Mr. WILLIAMS. I am not disputing the fact; I am merely

asking if my hearing was correct.

Now, the Senator from Utah states what I understand is the fact, that a majority of them do come over in chassis now. That being the case, we concluded that if we taxed the chassis and finished parts, and, by the way, many of the finished parts are interchangeable, we would get the revenue of 30 per cent, because the rate hitherto had not been prohibitive of the chassis. So we will still get some revenue from that. Now, if we put the duty on the chassis down to 15 per cent, they could bring in chassis for a high-priced automobile at the lower duty and lose us that much revenue.

Whether this reasoning be sound or not, it was the reasoning, and whether the reasoning be based on actual facts or not, they are facts, as I understand them and the inference from them.

Mr. CUMMINS. Mr. President, I am not objecting from the standpoint of my friends on the other side of the Chamber, but

a 45 per cent duty, I think, is very much more than necessary

Mr. WILLIAMS. Not for the higher priced auto.
Mr. CUMMINS. For protection. I do not think we need any such duty in order to protect the business in this country.

Mr. WILLIAMS. It was not levied for protection. Mr. CUMMINS. What I said was that you would not have any importations at 45 per cent, because it is easy to knock down the vehicle abroad. They are all knocked down; they are not brought in here on wheels and as finished automobiles. You are therefore saying to the country we are going to tax high-priced automobiles at 45 per cent, whereas, as a matter of fact, you are taxing them at 30 per cent, because they will come in at 30 per cent. I think that is too high.

Mr. WILLIAMS. Such of them as do come in knocked down

will be 30 per cent.

Mr. CUMMINS. That is, all.

Mr. WILLIAMS. If the Senator thinks that no finished automobiles came into this country, the import reports in 1910 and

1912 will undeceive him. They did come in.

Mr. CUMMINS. The Senator from Mississippi possibly forgets that under the present law there is no distinction or difference between finished automobiles and parts of automobiles. They all come in at the same rate of duty. There is no classification there that will distinguish those that came in on wheels

from those that came in knocked down.

Mr. WILLIAMS. I beg the Senator's pardon. If the Senator thinks that the import reports do not classify these things differently, he is mistaken. Of parts of automobiles, the imports reported last year were \$299,000, while automobiles were imported to the value of \$1,899,000. That is under the head of parts of automobiles. Whether under the head of parts of automobiles, chassis are included, I can not say, but I should think that they would be included under that head in making up the summary of the imports rather than under the heading of

Now, the total value of automobiles and finished parts both

put together imported last year was \$2,199,567.

Mr. CUMMINS. All I know about it is that it is customary to knock the vehicle down before you transport it. I have been told by those who import automobiles that the number imported as a whole is negligible; that there have been substantially none, and I have proceeded upon that hypothesis.

Mr. WILLIAMS. I can tell the Senator why the authorities kept the classification separate. Under the Payne-Aldrich law automobiles, bicycles, and motor cycles, and finished parts of any of the foregoing, were separately denominated, although they were all taxed at the same percentage. Evidently, however it happened, the Government did attempt to keep them separate and they are reported separately. Under one heading automobiles are reported, under another heading parts of automobiles are reported, and under another heading the total of the two is summed up.

Mr. SMOOT and Mr. THOMAS addressed the Chair.

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Utah?

Mr. THOMAS. I have in theory had the floor, I think, for the last half hour. I shall yield to the Senator from Utah.

Mr. SMOOT. Mr. President, in the past there was no necessity whatever for shipping automobiles in parts into this country. Under this bill, of course, purchasers will ship them in finished parts, and no importer will pay more than 30 per cent

on an automobile under this bill.

There is, however, another inconsistency in the bill. The duty on finished automobiles valued at \$1,000 or less is 15 per cent ad valorem; valued at over \$1,500, 45 per cent ad valorem. order to save freight charges, which would be heavy if shipped in the form of a finished automobile, the shipper of high-priced machines would remove the wheels or ship in parts of the machine. Under this bill, on finished parts a duty of 30 per cent is imposed. Of the cheap automobiles, on which the framers of this bill seem to have been trying to make the people of the country believe that only a duty of 15 per cent is being assessed, there are no importations, and if the parts of such a machine is imported they will carry a duty of 30 per cent.

Mr. THOMAS. Then the Senator from Utah is of the opinion that a man who buys a high-priced machine will take it to pieces and bring it over here at 30 per cent, and a man who

buys a low-priced machine will do the same thing?

Mr. SMOOT. No; I say if he were compelled to import any part of the machine, while the machine as a whole would pay a duty of 15 per cent any finished part of it would pay 30 per cent.

Mr. THOMAS. If that should result, I would agree with the Senator from Utah that this was a ridiculous provision.

Mr. SMOOT. Does the Senator say that anybody would ship a high-priced automobile into this country complete, and pay a duty of 45 per cent, when under this bill, by taking the wheels off and shipping it in parts, he might get the machine through with the payment of a 30 per cent duty?

Mr. THOMAS. Certainly, I believe the purchaser of one of these machines would do just that thing; but I do not believe anybody who had a machine bearing a 15 per cent duty would be foolish enough to take the wheels off in order to enable him

to get a 30 per cent duty.

Mr. SMOOT. Nobody has ever suggested such a thing.

Mr. THOMAS. Then I misunderstood the Senator.

Mr. SMOOT. I said if the purchaser of an automobile shipped a machine in complete the duty would be 15 per cent, while if he shipped it in parts to be here reassembled the duty

would be 30 per cent.
Mr. THOMAS. That is correct.
Mr. SMOOT. That is what I intended to say.

Mr. THOMAS. Any single part; but that is a very different thing from the collective portions of a machine which are brought in together for the purpose of being reassembled.

That is the machine.

Mr. SMOOT. In the past I said, Mr. President, there was no necessity for the purchaser of an automobile shipping a part of a machine if he were buying it, because the rate upon the parts of the machine and the rate upon the finished machine were exactly the same-45 per cent ad valorem.

Mr. HUGHES. Will the Senator from Colorado yield to me?

Mr. THOMAS. Certainly.

The Senator from Utah [Mr. Smoot] knows, Mr. HUGHES. does he not, that the supposititious case that he put has been Passed upon by the Treasury Department at the port of New York and that an automobile with the wheels or other parts missing is regarded as an automobile?

Mr. SMOOT. The Senator from Utah does not know that, and he thinks that the Senator from New Jersey can not find a

decision to that effect.

Mr. HUGHES. I know that that has been the unbroken prac-

tice at the port of New York.

Mr. SMOOT. If that is the case, a chassis is a machine—Mr. HUGHES. I did not say that a chassis was a machine. The Senator from Utah instanced the case of an automobile with wheels which had been taken off. I say that that is not a finished part; it is a collection of finished parts, which is to all intents an automobile, and would so be construed under this language.

Mr. SMOOT. I only spoke of that in connection with the knocking down of an automobile. Of course, I could have named the parts specifically in the way that the machine would I do not think the machine would be shipped be shipped. merely with the wheels off. I only mentioned that by way of illustration. I meant, of course, that if the machine were shipped in a knocked-down state it would come in at a 30 per cent duty

Mr. WILLIAMS. Oh, no. If the whole automobile came along, whether it was "knocked down" or knocked up, it would pay the duty of a machine, and if a part of it came in the part

would be taxed.

Mr. SMOOT. And they will always come in in parts if this ll passes. There is no doubt about that.

bill passes.

Mr. HUGHES. I want to call the Senator's attention to the fact that I think he is hasty in assuming that automobiles will always come in in parts.

The VICE PRESIDENT. The Chair would suggest, in the interest of the reporters, that there should be some observance of parliamentary methods in the procedure of the Senate.

Mr. HUGHES. I will say that one of the most essential stages in the construction of the automobile is the assembling; and I think the Senator is mistaken if he assumes that the manufacturers of high-priced automobiles are going to send them over in parts and have them assembled here by mechanics who do not know anything about them. As a rule that class of automobiles is assembled on the other side and tuned up to

the proper pitch before they are shipped.

the proper pitch before they are shipped.

Mr. SMOOT. Certainly; that is what they have been doing in the past, and that is what they will be doing in the future under this bill. They will not have to knock them down, because you provide here a 30 per cent duty for the chassis, and that is all they will ship, for that is a complete machine outside of the body. The Senator knows that over 90 per cent of the new foreign machines shipped into this country now are shipped

Mr. HUGHES. I do not know anything of the kind. My

information is to the contrary.

Mr. SMOOT. My information is that over 90 per cent of the

machines are imported without bodies.

Mr. HUGHES. I think I have seen the various kinds of automobiles that the Treasury reports cover—they are not very numerous-and it seems to me I have seen them many afternoons on Fifth Avenue, in the city of New York. All of those foreign machines had foreign bodies, and all of them were shipped into this country complete. I do not know whether under the law an American citizen who has been abroad can bring an automobile back with him or not.

Mr. JAMES. He can if he pays the tariff on it.

Mr. HUGHES. But it seems to me that there is a great disparity between the Treasury figures and the number of foreign automobiles that a man can observe upon the streets of a city

like New York, for instance.

Mr. JAMES. It was stated by the expert we had before the committee when this schedule was under consideration that a great many wealthy Americans who toured the Old World purchased their automobiles and brought them back-the body as well as the chassis and every other part of the automobile— and this rate of 45 per cent was fixed in the bill in order that that character of machines should pay the 45 per cent duty.

Mr. TOWNSEND. Mr. President, I very much prefer the Senate provision to the one in the House bill. I do not, however, agree with Senators who have said that the automobile is

purely a fad. It might have been such at one time, but the automobile to-day is a necessity.

Mr. WILLIAMS. I used the word "fad," but if the Senator from Michigan understood me to say that the automobile was a fad he made a mistake. I said that the high-priced automobiles that were bought by rich, fashionable people and brought back by the American tourist from Europe were a fad and a fashion and that they could obtain a better machine for less money in America. That is what I said-not that all automobiles were fads.

Mr. TOWNSEND. I was just going to reach that point. I do not suppose the Senator will deny it, now that he has repeated it. The Senator did use the expression that there are "certain fools" who prefer the high-priced foreign-made ma-

chines to the better machines made here at home.

I agree, Mr. President, that in this the Senator displays good judgment. His criticism of Americans who buy high-priced cars abroad applies not only to those who purchase automobiles but also to those who purchase other things that are made in foreign countries when equally good or better things of domestic production can be obtained at home. I am glad that in one production can be obtained at home. I am glad that in one article, at least, the committee is content to put a duty that will protect the home product. I think a man is foolish; I think he is not a good American—that is, from my standpoint, I mean; I am not impeaching or trying to impeach men who entertain honest convictions of a different kind—but from my standpoint he is not the best American who believes in purchasing or permitting the purchase of anything abroad that can be reasonably produced and purchased at home be reasonably produced and purchased at home.

I am in favor of the Senate provision as against the one in the House bill, although I believe it has already been developed in the discussion of this item that it is subject to various constructions and that the people will be deceived by it. They are not going to get what the committee suggests. It is not what it appears to be. I think that the duty ought to be higher on the parts of automobiles than that provided in this section. The parts of an automobile valued at \$1,500 or more should bear the same rate of duty as the completed car, and the same is true as to the other priced machines. I admit that now there are none of the lower-priced automobiles imported, and I doubt if there will be many imported under the pending measure when it becomes a law, because we are making more of such automobiles in this country than are made anywhere else in the world. We are making in Michigan two-thirds of all the automobiles that are made in the United States, and a large proportion of those are made in Detroit. The price has been going down until, I think, we are making the best article for the money that can be made in the world. It is a great industry; it is not a fad; it is not something that can be done away with, because the automobile has come to stay. It is the place of the horse—and it is a mercy that it is so. It is taking automobile is necessary to the progress of the age in which we live. I want to see this industry thrive, and I commend those Democratic Senators for admitting the unquestioned fact that we are making better automobiles in the United States than are made abroad, and that it is well to retain a duty of 45 per

cent on imported cars.
Mr. WILLIAMS. Mr. President, what I said was that buying foreign automobiles at extravagant prices was a fashion and a

fad, and I did, in the heat of debate, say that fools bought them. A man is not a fool simply because he is fashionable. The Senator from Michigan can not fasten upon me the utterance that automobiles are fads. On the contrary, we have attempted here to reduce the tax on the lower-priced automobiles which hitherto have been made in this country and none of which hitherto have been imported into this country at all.

Mr. TOWNSEND. And does the Senator expect that any will be imported under the provisions of the bill as reported?

Mr. WILLIAMS. We thought that perhaps some few of them might be. The difference between the Senator and me is this: I hesitate to use the word "fool," yet I did use the word "fool" in describing anybody who would go abroad merely to be fashin describing anybody who would go abroad interest to be tash-ionable and, to comply with a fad, buy a higher-priced inferior article rather than to buy a cheaper-priced superior article at home, while the Senator seems to think that anybody who will buy from abroad a better article at a less prace is a fool. That is a proposition to which I do not subscribe. I do not subscribe to the idea that it is not patriotic to buy an article made in Germany or an article made in England, provided I can get an article of better quality at the same price or of the same quality at a less price. It is very far from being either unpatriotic or foolish.

I have never seen, for the life of me, any sense in the idea that seems to get into some men's heads that one nation trades with another. A man in one country trades with another man in another country, or two men in the same country trade with one another: but the patriotism that expresses itself in terms of commercialism is to me a very contemptible thing. It seems to me that trade is one thing and patriotism is another, and that every human being has a right to buy what he needs and what he wants of the best quality at the cheapest price possible; that every interference with that is an interference with the laws of trade; and that patriotism has no more to do with it than has religion or Christian Science or anything else that is

totally disconnected from it. Whether by this provision we are going to make automobiles of the cheaper variety cheaper to the people of the United States I confess I do not know; but if when the automobile trade is at its very best, the American producer of an automobile can hold his price up near the tariff-fixed level, then, undoubtedly, he will have to reduce it in order to prevent Every one of you on the other side admits that no duty at all is necessary for protection, and we on this side admit that we do not fix these duties for protection, but that we fix them with the hope of getting revenue.

Mr. BRANDEGEE obtained the floor. TOWNSEND. Mr. President-

Mr. BRANDEGEE. I yield to the Senator, if he desires.

Mr. TOWNSEND. I merely want to correct one statement made by the Senator from Mississippi. I have not admitted that the automobile industry needs no protection. I think, so far as chassis are concerned, in many kinds of automobiles we do need protection. I think the records will disclose that the prices our manufacturers are paying are so much greater than the prices paid for similar work abroad that we need protection. If we are to continue the American wage and conditions of

living, the cost here and abroad should be equalized.

Mr. President, there has been no charge, I take it, made to the committee or to anybody else that there has been any combination or any attempt at combination on the part of automobile makers in the United States. I will not assume to say how many factories there are now in the State of Michigan, but I do say that there is the strongest possible competition amongst They are working in many instances at about as low a figure in the cost of production as it is possible for them to work and get any return on their investment, and Congress can not afford, especially at this time, when enterprise is at least frightened, to wantonly injure this great industry. Not all the automobile factories, by any manner of means, are making large money. I know it to be a fact that many of them are running very close, so far as receipts and expenditures are concerned, and the severe competition which has been going on throughout the United States has been all the protection the people needed to insure them against extortionate prices on the part of the manufacturers.

So I have stated that so far as the higher-priced automobile is concerned I think 45 per cent is a reasonable protective duty. I think it is perfectly proper that that rate should be imposed; and while I am better satisfied with the other duties provided by the committee than I am with those in the bill as it came from the House, still I am not pleased by what seems to me to be the hypocrisy displayed in this provision. I think it would be better to have the language clear, so that there could be no misunderstanding, and manufacturers and im-

porters would know exactly what the duty is to be upon these articles. It may be wise to classify machines according to price, but economy of administration and wisdom of purpose would dictate that unassembled parts of automobiles should be subject to the same rate of duty as is the completed car.

I shall, however, vote for the committee amendment.

Mr. WILLIAMS. Mr. President, if the Senator from Connecticut [Mr. Brandegee] will pardon me for a moment, I understood that there was a pretty strong consensus of opinion on the other side of the Chamber that automobiles did not need protection. I ought to have remembered at the time, however, that the Senator from Michigan [Mr. Townsend] had not added his voice to that of the others to that effect; but I want to call the Senator's attention to the fact that last year we exported \$21,500,000 worth of automobiles, and the Senator from Delaware [Mr. Saulsbury] has just dropped me a note in which he tells me that the Ford Automobile Co.—I am not certain where the Ford Automobile Co. is located, but I think—
Mr. TOWNSEND. It is located in Detroit, and it is the

largest automobile factory in the world.

Mr. WILLIAMS. I was about to say that I thought it was located at Detroit. That company is now selling at from \$750 to \$900 a machine which is just about as good a machine as can be made.

Mr. TOWNSEND. They are selling some of them as low as

Mr. WILLIAMS. I did not know they had the price down as low as that; but I knew they had it down to \$750. Even at this price and in spite of the sharp competition, it was recently reported in the newspapers that the Ford Co. divided \$10,000,000 profits in dividends. That rather tends to support the position I took a moment ago, to the effect that this industry does not need protection; but it does not prove that they may not reduce their prices still lower if we reduce the duty, because it is possible that that might enable others to import into our country a machine which, while it could not compete at all at a reasonable price, would make the domestic manufacturer reduce his price to a point at which it would be impossible for the foreigner to export his articles to America.

I think a concern which can declare a \$10,000,000 dividend has not been driven to the wall by sharp home competition. The machine which they make is a machine which the farmers, contractors, lawyers, doctors, and the masses of the people who use automobiles at all use. We have tried to reduce the duty on them, while we have kept the duty upon the fad machines. The fashionable man who wants that sort of a machine is going to buy it, no matter what it costs; he is going to buy it with the French body and everything else; and the idea that he is going to knock it down into all of its different parts and ship each one as a separate part, with a separate freight rate in

detail upon each part, strikes me as absurd.

Mr. BRANDEGEE. Mr. President, I have here a communication from the Locomobile Co. of America, in which the president of the company states:

dent of the company states;

We are very much disturbed over the prospect of the tariff bill passing the Senate with a duty of 30 per cent on chassis and 20 per cent on parts, and I am sending you by separate mail a brief gotten up by some 27 automobile manufacturers, which gives our position in the matter.

The Locomobile Co. of America employs in Bridgeport some 2,000 hands, and last year our pay roll was approximately a million and a half dollars. In view of the situation on the tariff, we have cut our product for the next year one-third, which means the cutting of our pay roll practically half a million dollars, and will put some five or six hundred men out of work.

There is no doubt that some of the cheap cars (like Ford, for instance, where the labor item in a car is very small) can compete with anybody in the world; but we are of the opinion the automobile manufacturers whose labor in the manufacture of their car is high, such as ours, are going to have trouble from serious foreign competition if the bill becomes a law as it passed the House.

I wrote him in reply that the bill had not been reported by

I wrote him in reply that the bill had not been reported by the Senate committee exactly as it passed the House and advised him what the Senate committee had recommended regarding the duty on automobiles. He then replied to me as

The substitute paragraph on automobiles that you quoted in your letter should read that "Finished automobiles and chassis, valued at \$1,500 or over," etc. All chassis over \$1,500 should come in at 45 per cent duty, not at 30 per cent.

I myself fail to see why the chassis of an automobile valued at over \$1,500 should not bear the same rate of duty, or, at least, as high a rate of duty, as the finished automobile. of an automobile contains the intricate mechanical work, and, in my view of it, there is nothing lacking to complete the automobile except putting the body on the chassis, which any carriage or coach maker can do.

If it be in order, I will now offer an amendment to the committee amendment; and if it be not in order now I will offer it at the proper time. I move to strike out, in line 5, on page 36, the last two words, to wit, "automobile chassis" and the comma and the first word in line 6, the word "and," and to insert, after the second word of the first line on that page, to wit, after the word "automobiles," the two words "and chassis," so that it will read:

Finished automobiles and chassis, valued at \$1,500 or over.

Mr. THOMAS. I will suggest to the Senator, with his permission, that unless the amendment went further there would

be no provision for chassis valued at less than \$1,500.

Mr. BRANDEGEE. Very well, Mr. President; if the committee should desire to make a change in that respect, of course it could report an amendment. Not knowing what the views of the committee may be on chassis valued under \$1,500, I should not like to offer an amendment for them. I simply desire now to offer the amendment I have suggested, and, in view of the suggestion of the Senator from Colorado, if the amendment should meet the judgment of the Senate I will prepare another to meet the point raised by him.

I simply wish to state—not to multiply words about it, but simply to make the point of principle clear-that it seems to me the real work, the fine mechanical work upon an automobile is done upon the chassis and the machinery part of it, and not upon the upper works or the body of it. I think that complicated work should bear a duty as high as the duty paid on the

completed automobile.

Mr. STONE. Mr. President, I think this paragraph has been sufficiently debated. Does the Senator from Connecticut offer an amendment to it?

Mr. BRANDEGEE. Yes; I have stated the amendment. I

will offer it now.

Mr. STONE. It is offered, as I understand, as an amendment

to the amendment of the committee?
Mr. BRANDEGEE. It is offered as an amendment to the

committee amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Connecticut to the amendment reported by the committee.

Mr. TOWNSEND. Mr. President, I want to say a word in reference to the statement made by the senior Senator from Mississippi [Mr. WILLIAMS]. I contend that the statement he has made with reference to the Ford automobile shows that, through competition in the United States, the price of that par-ticular automobile has been going down. The Ford Automobile Co., in my judgment, needs no protection. It is perhaps the largest manufacturing concern of automobiles in the world. I will not attempt to state accurately just what their production is, but I know it was reported that during several months of this year that company shipped out an automobile every minute. It manufactures automobiles on a large scale.

One of the things—it does not apply so much here, but it calls to my attention the fact—one of the things I am most complaining about in this bill is that nearly everything is aimed at the large concerns. That idea is in mind in connection with the Steel Trust, for instance, and the large automobile factory that is exceedingly prosperous; but in striking at them we hit

the smaller concerns a fatal blow.

Take, for instance, the question of steel wire, which we are We strike a blow at the large concerns which soon to reach. have been making steel wire, but at the same time our statutes are such that we prevent or prohibit one company from buying up the smaller concern. We prohibit the large wire company from buying up smaller plants throughout the United States, and yet by this bill we actually drive those smaller factories out of business and give the field to the larger concerns, a field which they attempted to get by purchase, but which our statutes forbade them doing. Under the bill now pending we encourage

So in the case of this large concern, the Ford Automobile Co., it does not need protection. It has the field; it is manufacturing its cars at a small profit per unit, per single car, and by turning them out at the rate of a car a minute, at a very little profit per car, it of course can continue in business, but the policy of this Government is-and certainly the Democratic Party has professed-to prevent monopoly and encourage competition. This bill is the best friend monopoly could desire.

Mr. STONE. I hope we may have a vote now, Mr. President. The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Connecticut [Mr. Brandegee] to

the amendment reported by the committee.

Mr. BRANDEGEE. Mr. President, if I may do so, to meet the suggestion of the Senator from Colorado [Mr. Thomas], I will ask to modify my proposed amendment by inserting after the word "autemobiles," in line 3, page 36, the words "and chassis."

Mr. GALLINGER. Let the amendment to the amendment be stated

The VICE PRESIDENT. The Secretary will state the amendment to the amendment.

Mr. BRANDEGEE. If I may be pardoned for making the suggestion, let the paragraph be read as it would appear if the amendment to the amendment were agreed to.

Mr. SMITH of Michigan. Mr. President, I should like to ask the Senator from Missouri a question. Suppose the chassis of an automobile comes in one ship and the body in another,

under what rate will they enter our port?

Mr. STONE. The Senator asks a question which I do not

know whether I can answer or not. I will do the best I can.
I take it that if a machine from France should be dismantled and shipped in one vessel it would be charged at the rate of the whole machine, as if it had come in without being knocked down. If some parts of it came in a separate vessel, I take it they would pay the rate of the parts, unless it were shown that there was a fraudulent scheme planned out to evade the duties imposed by our laws

Mr. SMITH of Michigan. There is nothing in the present law that will enable the customs officers to assemble these parts

at the port of entry.

Mr. STONE. I think we have a sufficient administrative force to keep fairly good track of frauds, or attempted frauds, on the customs. Moreover, I very seriously question whether any man who was importing a machine from abroad would go to the trouble and expense and delay incident to separating a machine and shipping it into the United States in different vessels.

Mr. SMITH of Michigan. Suppose he were a sales agent? Mr. STONE. If he were a sales agent, receiving here for sale on the market in this country machines made abroad and putting them into his warehouse, my opinion is that the customs officials could very easily discover that he was separating these machines into parts and shipping them in that form to evade the legitimate duty imposed upon them, and he would find great difficulty in maintaining that business policy.

Mr. SMITH of Michigan. Is it the intention and plan of the Finance Committee, of which the distinguished Senator from Missouri is an influential member, to afford ample protection

to the automobile industry of America?

Mr. STONE. The purpose of the Finance Committee has already been stated. It is not intended to be a protective duty,

Mr. SMITH of Michigan. Is it intended to be a duty of 45

Mr. STONE. A duty of 45 per cent is imposed upon highclass machines; and I believe machines of that kind, high-class, fancy-made French machines, that are purchased by very rich

Mr. JAMES. As a luxury. Mr. STONE. Yes; as suggested, as a luxury—for they are a luxury—I believe the purchasers of such machines care very little about the additional expense imposed by the custom duties. They want these machines, and they will have them, no matter what they cost. If we should put the duty at a great deal higher rate than we have prescribed in this bill, I do not believe it would decrease the importations to the extent of a single machine.

Mr. SMITH of Michigan. Mr. President, I do not wish to annoy the Senator from Missouri by my questions.

Mr. STONE. The Senator does not annoy me.

Mr. SMITH of Michigan. I am very anxious that this industry should be protected, as every other labor-employing industry needs protection against cheaper foreign labor. I believe it needs protection. I would protect it, because I want to protect the wage earner who makes the machines here against competition from abroad. In that respect I feel that even the Ford establishment, with its tremendous output, is entitled to come under that law with its hundreds of thousands of workmen, notwithstanding large profits to the employers. is for those workmen that I would have this duty definitely understood. Other countries have their tariffs against American automobiles. Canada has a tariff, I think, equal to our own, against American automobiles. The Ford Co. have been obliged to go into Canada and establish factories there, employing hundreds of men, in order to get the Canadian market free of tariff. We ought not to make it easy for foreign-made machines to get over here in unfair competition with the men who make these machines in the United States. much concerned about the men who own the factories, but the men who make the machines. I do not believe that under the language of this bill they will receive the protection which apparently they will expect to receive. I believe the duty has been reduced in practical operation to 30 per cent, and I am

Mr. STONE. I understand the Senator's position fully. ask a vote on the amendment offered by the Senator from Connecticut.

Mr. CUMMINS. Mr. President, before the vote is taken I

desire to say a further word.

When I first objected to the paragraph, I assumed that it did not clearly express the intent of the committee. I thought the committee really intended to reduce the duty, and to reduce it efficiently. I attributed what I believed to be its fault to inattention or want of skill in reducing the intent of the committee to writing. But the debate has shown that the committee really intends to leave a duty of 45 per cent upon automobiles valued at more than \$1,500, and the committee believes that all the automobiles which come into the United States and are worth more than that will come in here in such a form as to require the payment of 45 per cent ad valorem. If the committee believes that, it has suddenly become more wedded to the doctrine of high protection than are some of the Senators on this side.

I thought it was a poor way of suggesting that high-priced automobiles ought to pay a higher duty than low-priced automobiles, but that the committee knew that, after all, the duty paid would be 30 per cent. But inasmuch as you are now contending that you are about to levy a duty of 45 per cent upon these automobiles, whether they come in as parts or whether they come in as a whole, your attitude is vastly less defensible

than it was originally.

I do not believe a single one of you can justify a 45 per cent duty upon an automobile, it does not make any difference whether it is to be used by a rich man or a poor man. It certainly is not true that because an enterprise turns out a commodity that is used only by those who are reasonably well off, you must therefore pass beyond the wildest dream of protection in order to tax the article that is thus manufactured by such an enterprise. It can not be justified. I will, for the argument, surrender my view, although I still entertain it, to the assertion of the Senator from Mississippi, and assume that all these automobiles will come in at 45 per cent, instead of at 30 per cent, as I believe to be the truth.

What kind of a duty is 45 per cent upon such automobiles? I do not care whether you call it protection or not. You may disguise it as a "competitive duty." That reminds me that we might as well take up, presently, the kind of tariff law that is now before us. Before it was begun in the House of Representatives the distinguished Speaker, in describing the character of law that would be passed, said he understood it was the mission of the Democratic Party to substitute for the present law a "competitive tariff." So far as I know, that was the first time the word "competitive" was ever used in connection with a tariff law; at least it so impressed me. I did not know what the Speaker meant by a "competitive tariff" from anything that ever had been said or written in the literature of the subject.

Mr. SMITH of Michigan. May I interrupt the Senator? The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Michigan?

Mr. CUMMINS. I yield, although I hope to be permitted to go forward as rapidly as possible.

Mr. SMITH of Michigan. I rise only for the purpose of throwing a little light upon the situation. It will take only a second to do it.

I can tell the Senator what the Speaker meant. He meant what he said when the last tariff bill of the Democratic Party was passed, when he said:

We are told that the day of miracles is past, but we are also informed that "while the lamp holds out to burn, the vilest sinner may return"; and I am so thoroughly convinced of both the wisdom and the righteousness of free trade that I would not be at all surprised to see the gentleman from Maine [Mr. Reed], the gentleman from Pennsylvania [Mr. Dalzell], and the gentleman from Michigan [Mr. Burrows], the pillars of wisdom, strength, and beauty in the temple of protection, running races with each other to catch the eye of the Democratic Speaker of the Fifty-fourth Congress to introduce an out-and-out free-trade measure.

That was his view on that bill, and I have no doubt it is his view on this bill, if you get under the surface of the utterances. I was quoting from the Hon. CHAMP CLARK, Speaker of

the House of Representatives.

Mr. CUMMINS. Mr. President, as highly as I usually value the advice of my friend from Michigan, I can not believe that he is qualified to interpret the remarks of the Speaker of the House on this subject. I, at least, do not understand a competi-tive tariff to be the kind of tariff to which my friend from

ously, Mr. President. I am afraid my friend from Michigan thought I was perpetrating a joke, but I am not. Mr. SMITH of Michigan. Oh, no.

Mr. CUMMINS. I am trying to find out what kind of tariff we ought to make here. I referred to the address of the Speaker of the House because he then, for the first time in the whole history of tariff discussion and tariff legislation, described in set terms a tariff as a "competitive tariff." Very shortly after that time the equally distinguished chairman of the Ways and Means Committee of the House, in speaking of the tariff about to be constructed by the Democratic Party, used practically the same expression, and defined the tariff about to be made as a "competitive tariff."

Mr. SUTHERLAND.

Mr. SUTHERLAND. Mr. President—
The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Utah?

Mr. CUMMINS. I do.

Mr. SUTHERLAND. Does not the Senator from Iowa think the Speaker meant by "competitive tariff" a tarff under which the foreign manufacturers and producers would compete among themselves for the American market?

Mr. CUMMINS. Mr. President, I do not think the distinguished chairman of the Ways and Means Committee had that

condition in mind; but I pursue the inquiry:

I was again led to reflect upon the meaning of the word "competitive" as applied to a tariff law. It became lost in the volume of discussion that ensued, and I did not again hear it until it was used by the chairman of the Finance Committee of the Senate. From everything that had taken place I became convinced that we were not to have a "competitive tariff," but we were to have some other sort of tariff; that there was some other standard and some other guide to be adopted by our Democratic friends. But observing this discussion very closely I heard the other day the very able Senator from North Carolina [Mr. Simmons] say with regard to a particular duty, concerning which some one asked him a question, that it was a proper duty, because it was a "competitive rate." He said it was a "competitive rate." I emphasize that, because I think the time has come in the consideration of this bill when on both sides of the Chamber we may very properly and very instructively and very profitably devote a few minutes' consideration to the meaning of the phrase "competitive tariff." I myself believe in a competitive tariff, and I am a protectionist; and I should like some Democratic Senator to explain how we can determine what is a competitive rate of duty without inquiring as to the cost of production here and abroad.

Disregarding these rather jocular suggestions from my friends upon this side of the Chamber, I assume that what was meant by "competitive tariff" in this pre-session discussion was that there should be attached to competitive articles—that is, things which we make in this country and which are also made abroad and offered in our markets-such a duty as would enable our producers to enter our own markets and there compete with their foreign rivals. That means that in order to enter our markets and offer his wares for sale to his own people a domestic producer must get cost for what he offers and must also get a fair profit for what he offers, for if he could not be reasonably assured of a fair profit he would not enter the business at all and he would not offer his commodities for sale in his own market.

Therefore, if you mean anything at all by a competitive rate of duty, you mean such a duty as will enable our producer to manufacture or create or raise, as the case may be, the domestic products and meet in our own markets his foreign rival at least upon even terms, assuming that the foreign manufacturer or producer will enter our markets expecting to sell his commodities here at cost and with a fair profit to him, or otherwise he would not manufacture and attempt to enter the markets of the United States.

If you mean anything at all by a competitive rate of duty, that is what you must mean. Tell me—not just now, because I shall not ask you to tell me now, but at some time before this debate is over-how you can determine what is a competitive rate of duty without giving some attention to the conditions upon which that competition must exist, if it exists at all?

It must be assumed that traders, manufacturers, and producers when they do business expect to reap a fair profit. They will not produce or create unless they can. I want simply at this time, because I shall take up this matter again, to emphasize the idea that your own great leaders—leaders of the House of Representatives who very largely formulated this bill, and who had a right to formulate it, because by the Constitution Michigan has just referred. I am discussing the matter seri- bills of this character are given to the House of Representatives in the first instance—have declared that they wanted to make a competitive tariff.

The answer that I want you to give to the country, as well as to this side of the Chamber, is whether you are attempting to make a competitive tariff; and if you are, how you can accomplish it without some inquiry into the cost of production here and abroad, so as to be able to determine upon what conditions, or at what price, an American producer can enter his own markets and sell his wares there at a fair return for the labor and capital which may have been employed in producing the articles.

With that prelude, I come back to automobiles.

Tell me whether you think it requires a 45 per cent duty upon automobiles worth more than \$1,500 to enable our manufacturers to enter our markets and sell them in fair competition with their rivals in other countries. And if you do not believe it requires a duty of 45 per cent, how do you justify yourselves before your country and your fellow men under the doctrine which the distinguished leaders of your party have announced?

I do not agree with all of my friends upon this side of the Chamber about duties. Some of them think 45 per cent is necessary. I do not, and therefore I shall not be comper cent. The bill as it is proposed to be amended by the comperced by the amendment offered I do not, and therefore I shall vote against 45 mittee is made a great deal worse by the amendment offered by the Senator from Connecticut [Mr. Brandegee]. According to that amendment, not only is the finished automobile to be taxed 45 per cent, but the chassis also is to be taxed at that rate if it belongs to an automobile costing more than \$1,500. Therefore I shall vote against the amendment offered by the Senator from Connecticut, because I think it adds to an unnecessary duty imposed by the Finance Committee another un-necessary duty sought to be imposed by a Senator upon this side of the Chamber. They seem, however, to be in harmony upon one thing, and that is that a 45 per cent duty upon automobiles costing more than \$1,500 is necessary in order to create a competitive condition in the markets of the United States.

Mr. WILLIAMS. Mr. President, I am not going to take the

time of the Senate more than about four minutes, but the Senator from Iowa has been so insistent upon having somebody tell him what is meant by the phrase "a competitive tariff," that I thought I would undertake it.

The phrase itself is an awkward one, but I think everybody can understand it. It is a tariff which shall secure competition between domestic and foreign manufacturers. That is what it means—a tariff which, by securing competition, shall prevent the exploitation of the American people by the home producer, and shall prevent the monopoly of the American market, under the shield of tariff taxation, by trusts which are formed to control the American market.

The Senator wants to know how we are going to get any in-formation as to what tariff will bring about that condition, without inquiring or knowing something about the cost of production. Not only the cost of production, but the condition of trade between the countries, has to be inquired into; the exports in one direction, and the imports in the other direction; and above all things, the prices in one country and in

the other.

Now, you can not learn the cost of production; and the Senator from Iowa ought to have found that out by this time. The idea of saying that a blanket costs so much to produce in America, and so much in France, and so much in England, is absurd. The utmost you can do is to find the average cost of production if you have all the information possible in the one country, and in the other, and in the other.

Two men making blankets upon the opposite side of the street from one another will have different costs of produc-tion. One man succeeding another in the management of a factory will have a different cost of production, because of the difference of efficiency of management, efficiency of organization, efficiency of drill and discipline of labor, efficiency in buying the raw material and efficiency in putting upon the market the

finished product.

The outward and visible sign which covers the cost of production with a margin, as a rule, of profit is the price. The price is the question, not the cost of production, because the price can be ascertained through a series of years, so that you will know it is a profitable price in each place, whereas the cost of production varies not only from place to place but from day to day, from week to week, and from man to man, and the character of labor from a different character of labor in the same State and in the same country

I have attempted the best I could in short meter to describe what is meant by the competitive tariff.
Mr. CUMMINS. Mr. President——

Mr. STONE. Mr. President, I think the filibuster which the Senator from Iowa started has run far enough.

Mr. WILLIAMS. I have yielded the floor.

Mr. CUMMINS. I desire to ask a question of the Senator from Mississippi. It will be a brief one.

Mr. STONE (to Mr. CUMMINS). Proceed.

Mr. CUMMINS. I think the Senator from Mississippi has given a very candid, fair, understandable reply to my question formerly propounded. I desire to go one step further, how-Suppose that we take a commodity like steel rails. is simple in its construction, and I use it only for illustration, not because of any fact connected with it. Suppose you knew that an English manufacturer of steel rails or one from France or Germany could make steel rails and put them down in our market at \$20 per ton. Suppose you knew that there was no American manufacturer who could make steel rails and put them down in the same market for less than \$24 a ton. then, would the Senator from Mississippi do with regard to a duty on steel rails in order to create the competitive condition which he has so well described?

Mr. WILLIAMS. Mr. President, I might know what the Senator supposes that I know concerning one manufacturer in England and concerning one other manufacturer in America. I could not know what he expects me to know concerning the production of steel rails in America and in England, except by taking an average which was below that of the highest cost of production and far above that of the lowest.

It strikes me, therefore, that it is better to take a far more infallible guide than my mere calculation, with the aid of experts, who frequently know less even than Senators, for the purpose of arriving at a thing which, after I was through with it, would not give me any information except as to one man or factory in one place and another man or factory in another.

Therefore you take the English price of steel rails and the American price of steel rails, without the English price of steel rails with the existing tariff added, with the freight rate, the American price of steel rails in the market in the same port of entry, and compare those two things to arrive at a reduction of the tariff rate or the increase of the tariff rate, which in the former case would enable the foreign producer to compete or in the latter case would enable the domestic producer to compete. There is no mystery about the phrase "the competitive tariff." petitive tariff." There is no mystery about the phrase "competitive rate." It is true the tariff itself is not competitive, but what is meant by it is a rate of tariff taxation which shall produce a competitive condition.

Mr. CUMMINS. Mr. President—
Mr. WILLIAMS. I hope the Senator will pardon me just a minute. Senators should get it out of their heads—the Tariff Board ought to have taught us that, with all its money, all its experts, everything in the world, what could it give us except

a lot of averages that amounted to nothing.

We came to a condition to consider the question as to whether we made paper cheaper here than in Canada. The Senator will remember that they got an absurd average after a while. The average meant nothing. Well-equipped mills, properly situated, were producing paper at a great deal less, and badly equipped mills, improperly managed and improperly situated, were producing paper at a great deal more. The same sort of thing applied in Canada. You could not even get the names of the manufacturers so that Senators could judge why it was that the cost of production thus averaged up by addition and division varied so far from one another in the same State, in the same county, and across the border in the same country, and in the same Province.

The Senator asks me to make an answer to a question predicated upon my knowing something which neither he nor I can

There is no way to learn it.

Mr. CUMMINS. If I understand the Senator from Mississippi correctly, his rule will result in a much higher rate of duty than the rule which I have heretofore recognized. As I understand him now, he looks at the foreign price of the article. He looks at the domestic price of the article. I assume that he considers what it costs to make the two articles meet in our market, and he then is willing to put a duty on the domestic article that will measure the difference between the foreign price and the domestic price.

Mr. WILLIAMS. Oh, no.

Mr. CUMMINS. I ask him if he thinks this tariff is made on that principle?

Mr. WILLIAMS. Not if the price could possibly be exploited under too high a duty.

Mr. CUMMINS. How does the Senator know whether the price is made by exploitation or not, without going into the cost of production?

Mr. WILLIAMS. I will tell you how I will do it. Take the instance the Senator was talking about. Here is a concern, for

example, that sells in the American market at an exploited price, protected behind the shield of a tariff enabling it to combine or to have a gentlemen's understanding. with that exploited domestic price. But when I find that same concern selling steel rails to Siberia or to South Africa, or barbed wire to the Cape Colonies or to the Argentine, or plows to the Argentine or even around to Chile and to South Africa, I take a foreign price.

Mr. TOWNSEND rose.

Mr. STONE. Mr. President, the next paragraph relates to bicycles and motor cycles. I think this discussion might be continued on that paragraph.

Mr. TOWNSEND. I hope the Senator will yield just a moment. I have a word to say on this subject, if the Senator will permit, before we pass to the next paragraph.

Mr. JAMES. There is an amendment offered by the Senator from Connecticut [Mr. Brandegee] that ought to be disposed of.

Mr. TOWNSEND. I realize that.

Mr. STONE. I appeal to the Senator from Michigan, my friend, a very fair man in all things. It does seem to me, and it must seem to him, that this paragraph has been more than abundantly discussed. Unless the Senator has a desire to delay the consideration of the paragraph, which he has a right to do, I beg him to allow us to proceed.

Mr. TOWNSEND. I submit the Senator has no right even to suggest that I want to delay the bill. I have not manifested any disposition to delay the consideration and determination of this measure. I wanted to say something on this question, and

the Senator can not prevent me from saying it.

Mr. STONE. I can not, I am sorry to say.

Mr. TOWNSEND. Mr. President, I desire to state that I have absolutely no sympathy with the notion of fixing a tariff according to prices. That charge it is a state of the stat have absolutely no sympathy with the hotton of fixing a tariff according to prices. That shows the difference between the Senator from Mississippi and myself, so far as our views on the tariff are concerned. He thinks that prices here and abroad should be given weight in fixing tariff rates, while I believe that cost of production should be the basis.

It is possible to get at an approximate understanding of the average cost of production. I think that according to the best evidence I have been able to obtain the difference in the cost of producing cars here and abroad, including chassis, of course, and especially high-priced cars, is at least 45 per cent. But I can understand from a letter which has been presented to me and which was presented to the Finance Committee, and which I have no doubt was submitted to the Committee on Ways and Means of the House, why this duty was originally fixed at 20 per cent.

I desire to read the translation of a letter written in German by a Berlin automobile company, which I will afterwards submit to the Secretary to be printed in the Record. The translation handed to me is as follows:

[Translation.]

By the present pending tariff revision, which should bring an improved increase of certain duty tariff provisions, we beg, in behalf of the German automobile industry, a reduction of the unusually high

the German automobile industry, a reduction of the unusually income duty.

While in the United States an income duty of 45 per cent of value is charged, Germany asks only 1.5 to 5 per cent of the American autos entered in Germany.

Speaking from the standpoint of a just equalization, the American automobile industry would need no such high income duty on account of her enormous production, and thereby low prices in her own country need scarcely fear a competition worthy of mention.

At least to provide a somewhat equal duty tariff between Germany and America for the automobile trade, we ask that the duty should not exceed 20 per cent for motor cars and the like.

Mr. President, it occurs to me, not only from this but from other evidence that has been submitted here, that Senators and Representatives who in secret caucus have framed this bill have been more influenced by the arguments which have been presented by the foreign manufacturers than they have by the arguments which have been presented by our own people.

So I say that I can understand why the duty was fixed at 20 per cent. It is exactly what this German automobile factory

asked for.

I send the letter to the Secretary's desk.

The letter in the original, submitted by Mr. Townsend, is as follows:

(Betrifft Amerikanische Zolltarifrevision.)

Verein Deutscher Motorfahrzeug-Industrieller, Berlin, Berlin W., 22. Februar, 1913.

FINANCE COMMITTEE, Washington Senat:

Bei der bevorstehenden Tarifrevision, welche eine erhebliche Ermässigung bestimmter zolltarifarischer Positionen bringen soll, bitten wir namens der deutschen Automobil-Industrie eine Herabsetzung des überaus hohen Eingangszolles befürworten zu wollen.
Wihrend in den Vereinigten Staaten ein Eingangszoll von 45 Prozent des Wertes erhoben wird, erhebt Deutschland nur einen Eingangszoll

von 1.5 bis 5 Prozent auf in Deutschland eingeführte amerikanische Automobile.

Abgesehen aber von dem Standpunkt eines gerechten Ausgleichs, braucht die amerikanische Automobil-Industrie einen so hohen Eingangszoll um so weniger, als sie infolge ihrer Riesenproduktion und den dadurch bedingten billigen Preisen im eigenen Lande eine nennenswerte Konkurrenz der deutschen Automobile kaum zu befürchten braucht. Um wenigstens, wenn auch nur annähernd, eine gleichartige zolltarifarische Position für Deutschland und Amerika in Bezug auf den Automobilhandel zu schaffen, beantragen wir, keinen höheren Eingangszoll wie 20 Prozent auf Motorwagen und deren Teile festzulegen.

Dr. Sperling,

Der Generalsekretär.

Mr. STONE. I am unwilling to believe that the Senator from Michigan himself believes the statement he has just made in the heat of debate. It is impossible for me to attribute to him such sentiment as he has expressed as a deliberate expression of his

I now ask for a vote on the amendment to the amendment.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Connecticut [Mr. Brandegee] to the amendment of the committee.

SEVERAL SENATORS. Let it be read.

Mr. BRANDEGEE. The Secretary was to interline, in line 4, the same words.

The VICE PRESIDENT. The Secretary will read the paragraph as it would stand if the amendment of the Senator from Connecticut to the amendment of the committee were adopted.

The Secretary. The Senator from Connecticut [Mr. Bran-DEGFE] offers an amendment to the amendment of the committee, on page 36, lines 1, 3, and 4, where the word "automobiles" occurs insert the words "and chassis"; and, in lines 5 and 6, strike out the words "automobile chassis, and," so that if amended the paragraph will read:

121. Finished automobiles and chassis, valued at \$1,500 or over, and automobile bodies, 45 per cent ad valorem; finished automobiles and chassis, valued at less than \$1,500 and more than \$1,000, 30 per cent ad valorem; finished automobiles and chassis, valued at \$1,000 or less, 15 per cent ad valorem; finished parts of automobiles, not including tires, 30 per cent ad valorem.

The VICE PRESIDENT. The question is on the adoption of the amendment offered by the Senator from Connecticut to the amendment of the committee.

Mr. BRANDEGEE. I should like to have the yeas and mays on the amendment to the amendment.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. JAMES (when Mr. Bradley's name was called). sire to announce that my colleague [Mr. Bradley] is detained from the Senate by illness. He has a general pair with the Senator from Indiana [Mr. Kern].

Mr. PAGE (when Mr. DILLINGHAM's name was called). My colleague [Mr. DILLINGHAM] is necessarily absent from the Chamber. He is paired with the Senator from Tennessee [Mr. SHIELDS L. I make this announcement for the afternoon.

Mr. JACKSON (when his name was called). I have a general pair with the senior Senator from West Virginia [Mr.

CHILTON]. As he is not present, I withhold my vote.

Mr. KERN (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. Bradley]. I transfer that pair to the Senator from Alabama [Mr. Johnston] and vote. I vote "nay."

Mr. SMITH of Georgia (when his name was called). I have

a pair with the senior Senator from Massachusetts [Mr. Lodge], and for the present I withhold my vote.

Mr. THOMAS (when his name was called). I transfer my general pair with the senior Senator from New York [Mr. Root] to the Senator from Oklahoma [Mr. Gore] and vote "nay."

The roll call was concluded.

Mr. JONES. I desire to announce that my colleague [Mr. Poindexter] is necessarily absent on important business.

Mr. MARTIN of Virginia. My colleague [Mr. Swanson] is unavoidably absent from the city. He is paired with the junior Senator from Maine [Mr. Burleigh].

Mr. CHILTON. I will transfer my pair with the junior Senator from Maryland [Mr. Jackson] to the Senator from Nevada [Mr. Pittman] and vote. I vote "nay."

Mr. BANKHEAD. I transfer my pair with the junior Senator from West Virginia [Mr. Goff] to the senior Senator from Maryland [Mr. SMITH] and vote "nay."

Mr. SMITH of Georgia. I transfer my pair to the senior Senator from Nebraska [Mr. Hitchcock] and vote. I vote

nav.

Mr. SUTHERLAND (after having voted in the affirmative). I observe that the Senator from Arkansas [Mr. Clarke] has not voted. I have a pair with that Senator, which I transfer to the Senator from Rhode Island [Mr. LIPPITT] and allow my vote to stand.

Mr. BRYAN. My colleague [Mr. Fletcher] is necessarily absent. He has a general pair with the junior Senator from Wyoming [Mr. WARREN].

The result was announced—yeas 21, nays 47, as follows:

YEAS-21.

Brandegee Gallinger Oliver Page Penrose Perkins Smith, Mich. Kenyon La Follette McLean Nelson Catron Clapp Clark, Wyo. Colt Norris Smoot

Sutherland

NAYS-47.

Smith, Ga. Smith, S. C. Sterling Stone Thomas Ashurst Bacon Bankhead Owen James Pomerene Ransdell Reed Robinson Johnson, Me. Bristow Kern Bryan Chamberlain Chilton Lane Lea Lewis Saulsbury Thompson Shafroth Sheppard Sherman Thornton Tillman Vardaman Walsh Martin, Va. Martine, N. J. Myers O'Gorman Crawford Cummins Gronna Hollis Shively Simmons Smith, Ariz. Williams Hughes Overman

NOT VOTING-28.

Johnston, Ala. Lippitt Lodge McCumber Newlands Pittman Poindexter Root Shields Smith, Md. du Pont Borah Bradley Fall Fletcher Goff Brady Stephenson Swanson Warren Works Burleigh Clarke, Ark. Culberson Dillingham Gore Hitchcock Jackson

So Mr. Brandegee's amendment to the amendment of the committee was rejected.

Mr. STONE. I now ask that a vote be taken on the amendment of the committee.

The VICE PRESIDENT. The question recurs on the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 122, page 36, line 8, after the word "Bicycles," to strike out "25 per cent ad valorem"; and, in line 9, before the words "per cent," to strike out "40" and insert "25," so as to make the paragraph read:

 $122.\ \mathrm{Bicycles},\ \mathrm{motor}$ cycles, and finished parts thereof, not including tires, $25\ \mathrm{per}$ cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 125, page 36, line 21, after the numerals "125," to insert "Nuts or nut blanks, and

washers, 5 per cent ad valorem."
Mr. SMOOT. Mr. President, I wonder whether the Senator having in charge this schedule wanted to include all kinds of washers at 5 per cent, as this paragraph provides.

It is so stated in the bill.

Mr. THOMAS. It is so stated in the bill. Mr. SMOOT. Then I wish to call the Senator's attention to the fact that washers are made from a great many substances other than metal. Washers are made of rubber; they are made of leather, of fibers of different kinds, and of other substances. As the paragraph now reads all nuts and washers of all descriptions will come in at 5 per cent. Did the committee intend that should be the case? If not, I think that the bill ought to be changed in that regard.

Mr. THOMAS. This is the metal schedule, Mr. President. There is no importation anyway to amount to anything, even if the language should be construed to include the various kinds

of washers to which the Senator from Utah refers.

Mr. SMOOT. In former bills it has always been specifically stated "metal washers" or "washers of iron or steel." This, of course, refers to all kinds of washers, which have been provided for in other paragraphs under the present law and all other laws. Under this provision rubber washers, fiber washers, leather washers, lead washers, or any other kind of washers may come in at 5 per cent ad valorem.

Does the Senator from Utah propose to offer Mr. STONE.

an amendment?

No; I do not. I wanted to know whether it Mr. SMOOT. was the intention of the committee to have all washers of every

kind included in the paragraph.

Mr. WILLIAMS. This is the metal schedule.

It does not make a particle of difference Mr. SMOOT. whether it is the metal schedule or whether it is any other schedule. The language is "washers"; and it does not say that they shall be of steel or of iron or of any other material. I simply call attention to the fact that the way this paragraph of the bill reads, anybody who desires to import any kind of washers or anything in the shape of a washer or that is called a washer can bring them into this country at 5 per cent ad valorem.

Mr. WILLIAMS. That is satisfactory to us.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 125, page 36, line 22, before the words "of iron," to strike out "Bolts" and to insert "bolts"; in line 24, after the word "blanks," to insert "10 per cent ad valorem" and to strike out "nuts or nut blanks, and washers, 15 per cent ad valorem"; and in line 26, before the words "per cent," to strike out "35" and insert "25," so as to make the paragraph read:

125. Nuts or nut blanks, and washers, 5 per cent ad valorem; bolts of iron or steel, with or without threads or nuts, or bolt blanks, finished hinges or hinge blanks, 10 per cent ad valorem; spiral nut locks and lock washers, whether of iron or steel, 25 per cent ad valorem.

The amendment was agreed to.

Mr. SMOOT. Mr. President, I wish to ask that the next paragraph, paragraph 126, providing for card clothing, and so forth, go over, for the reason that the Senator from Massachusetts [Mr. Lodge] is interested in the paragraph and desires to say something upon it. He will be here to-morrow. He is willing to have the paragraph taken up just as soon as he reaches the city.

Mr. THOMAS. That will be satisfactory.
The VICE PRESIDENT. Paragraph 126 will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 127, page 37, line 9, to strike out "Cast-iron pipe of every description, 12 per cent ad valorem; cast-iron," and to insert the word "Cast-iron," so as to make the paragraph read:

127. Cast-iron andirons, plates, stove plates, sadirons, tailor's irons, hatter's irons, and castings and vessels wholly of cast iron, including all castings of iron or cast-iron plates which have been chiseled, drilled, machined, or otherwise advanced in condition by processes or operations subsequent to the casting process but not made up into articles or finished machine parts; castings of malleable iron not specially provided for in this section; cast hollow ware, coated, glazed, or tinned, 10 per cent ad valorem.

Mr. CUMMINS. Mr. President, I do not intend to present my views upon that amendment at this time. It will be found in my amendment or substitute-

Mr. SIMMONS. Mr. President-

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from North Carolina?

Mr. CUMMINS. I do. Mr. SIMMONS. I desire to suggest to the Senator from Iowa that the Senator from Arkansas [Mr. Clarke] is very much interested in that amendment, and inasmuch as he is not in the Chamber I suggest that it go over until to-morrow.

Mr. CUMMINS. I am perfectly willing. I simply wanted to express my dissent to the proposed amendment. I will be very

glad to take it up at any time.

The VICE PRESIDENT. Paragraph 127 will be passed over. Mr. SMOOT. Did the Senator from North Carolina ask that the paragraph go over until to-morrow?

Mr. SIMMONS. Yes

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 128, page 37, line 21, after the words "ad valorem," to insert "sprocket and machine chains, 25 per cent ad valorem," so as to make the paragraph read:

128. Chain or chains of all kinds, made of iron or steel, not specially provided for in this section, 20 per cent ad valorem; sprocket and machine chains, 25 per cent ad valorem.

The amendment was agreed to.

The Secretary read paragraph 129, as follows:

The Secretary read paragraph 129, as follows:

129. Lap-welded, butt-welded, scamed, or jointed iron or steel tubes, pipes, flues, or stays; cylindrical or tubular tanks or vessels, for holding gas, liquids, or other material, whether full or empty; flexible metal tubing or hose, not specially provided for in this section, whether covered with wire or other material, or otherwise, including any appliances or attachments affixed thereto; welded cylindrical furnaces, tubes or flues made from plate metal, and corrugated, ribbed, or otherwise reenforced against collapsing pressure, and all other iron or steel tubes, finished, not specially provided for in this section, 20 per cent ad valorem.

Mr. CUMMINS. Mr. President, while I will not discuss the matter at this time because a preceding section has been passed over, I simply want Senators to notice that while cast-iron pipe is put on the free list, steel pipe is taxed 20 per cent.

The reading of the bill was resumed, and paragraph 130 was read, as follows:

130. Penknives, pocketknives, clasp knives, pruning knives, budding knives, erasers, manicure knives, and all knives by whatever name known, including such as are denominatively mentioned in this section, which have folding or other than fixed blades or attachments, and razors, all the foregoing, whether assembled but not fully finished or finished; valued at not more than \$1 per dozen, 35 per cent ad valorem;

valued at more than \$1 per dozen, 55 per cent ad valorem: Provided, That blades, handles, or other parts of any of the foregoing knives, razors, or erasers shall be dutiable at not less than the rate herein imposed upon the knives, razors, and erasers, of which they are parts. Scissors and shears, and blades for the same, finished or unfinished, 30 per cent ad valorem: Provided further, That all articles specified in this paragraph shall, when imported, have the name of the maker or purchaser and beneath the same the name of the country of origin die-sunk conspicuously and indelibly on the blade, shank, or tang of at least one or, if practicable, each and every blade thereof.

Mr. GALLINGER. This, Mr. President, is a very important industry. The manufacturers of pocketknives filed an interest-ing brief with the committee, arguing that the proposed duty would be very damaging to the industry in this country. It will be observed by reference to the handbook that last year there were over 12,000,000 of these knives imported into the United States, which seems to be a very fair proportion of the knives used. It occurs to me that an industry of this kind ought to be very liberally encouraged, and that we ought not to reduce the existing duties to a point that would seriously injure the domestic production and greatly increase the importation of knives from Germany, Great Britain, and France made in competition with those of American manufacture.

Mr. President, I have little hope that any effort any Senator may make on this side of the Chamber will result in amending this bill in any important particular. I was somewhat en-couraged the other day when, in response to a suggestion made by the Senator from Utah [Mr. Smoot], the other side agreed to amend the bill by striking out the words "porch and window," which showed that the bill could be amended without submitting it to the Democratic caucus; but our experience since then is not encouraging. We have presented a great many instances where the argument has been overwhelmingly in favor of increasing the duty over that allowed by the Senate committee, but without avail. This is one instance where very clearly there ought to be an increased duty.

I propose, Mr. President, to submit an amendment, which is a compromise between the existing rates and the rates reported in the Senate committee bill, in the hope that it may be

adopted, but with a feeling of great fear upon my part that it may not be agreed to. However that may be, I offer the amendment which I send to the desk as a substitute for the paragraph just read.

The VICE PRESIDENT. The amendment will be stated.

The Secretary. It is proposed to strike out the paragraph as printed and in lieu thereof to insert:

as printed and in lieu thereof to insert:

130. Penknives, pocketknives, clasp knives, pruning knives, budding knives, erasers, manicure knives, and all other knives by whatever name known, including such as are denominatively mentioned in this section which have folding or other than fixed blades or attachments, all the foregoing, whether assembled but not fully finished or finished, valued at not more than 50 cents per dozen, 35 per cent ad valorem; valued at more than 50 cents per dozen, 35 per cent ad valorem; valued at more than 50 cents per dozen and not exceeding \$1 per dozen, 50 per cent ad valorem; valued at more than \$1 per dozen, 65 per cent ad valorem; and in addition thereto on all pearl-handled knives of the foregoing valued at more than \$1.50 per dozen, 10 per cent ad valorem: Provided, That blades, handles, or other parts of any of the foregoing knives or erasers shall be dutiable at not less than the rate herein imposed upon the knives and erasers of which they are parts; razors, whether assembled but not fully finished or finished, valued at nore than \$1 per dozen, 35 per cent ad valorem; valued at more than \$1 per dozen, 55 per cent ad valorem: Provided further, That blades, handles, or other parts of any of the foregoing razors shall be dutiable at not less than the rate herein imposed upon the razors of which they are parts. Scissors and shears and blades for the same, finished or uninished, 30 per cent ad valorem: Provided further, That all articles specified in this paragraph shall, when imported, have the name of the maker or purchaser, and beneath the same the name of the country of origin, die-sunk conspicuously and indelibly on the blade, shank, or tang of at least one or, if practicable, each and every blade thereof.

Mr. GALLINGER. Mr. President, I will say that I am not

Mr. GALLINGER. Mr. President, I will say that I am not going to ask for the yeas and nays on this amendment, but on the provision relating to other classes of cutlery, concerning which I shall desire to be heard briefly, I will ask for the yeas and nays. I am willing that this should now be put to a vote. VICE PRESIDENT. The question is on the amendment

offered by the Senator from New Hampshire.

The amendment was rejected.

Mr. BURTON. Mr. President, I ask that the two or three lines relating to scissors and shears be passed over.

Mr. BRANDEGEE. Mr. President, I ask that the paragraph be passed over.

Mr. STONE. Do the Senators who have asked to have this paragraph or a part of it passed over desire to have it passed over until to-morrow or until a later date? We have now passed over two, possibly three, paragraphs of this schedule to be taken up to-morrow. Would it be satisfactory to the Senator from Connecticut and the Senator from Ohio to pass

over this paragraph until to-morrow?

Mr. BRANDEGEE. Well, Mr. President, I had assumed that the customary way was to pass it over as other paragraphs have been passed over, and after the first reading of the bill has been finished that we would return and take up the paragraphs in the order in which they had been passed over. In the case of most of the paragraphs passed over no definite day has been fixed for their consideration. We have already to-day passed over several paragraphs, in one instance at least, with what is equivalent to unanimous consent to take it up tomorrow.

Mr. STONE. I simply asked if it would be satisfactory to the Senator to pass it over and dispose of it to-morrow?

Mr. BRANDEGEE. I could not answer the Senator categorically by saying "yes" or "no," but I will say what the situation is. The situation is that there are half a dozen different amendments to be offered to this paragraph, changing both the classification and the rates of duty. I have half a dozen representations upon the subject myself.

Mr. STONE. What is the wish of the Senator?

Mr. BRANDEGEE, I had supposed the amendment of the Senator from Ohio [Mr. Burton] would be offered and acted upon to-day. If it had been, it would have obviated the necessity of two of the amendments I have.

Mr. STONE. Will it be satisfactory to the Senator from

Ohio to dispose of the amendment to-morrow?

Mr. BURTON. It will be entirely satisfactory to me to dispose of that in regard to scissors and shears to-morrow.

Mr. STONE. Then can the Senator from Connecticut dispose of his amendment?

Mr. BRANDEGEE. I think so, Mr. President; but if not, I will ask to have it passed over further.

Mr. STONE. And with that understanding. Very well. Mr. STONE. Then we will pass it over until to-morrow,

The reading of the bill was resumed, as follows:

The reading of the bill was resumed, as follows:

131. Sword blades, and swords and side arms, irrespective of quality or use, in part of metal, 30 per cent ad valorem.

132. Table, butchers', carving, cooks', hunting, kitchen, bread, butter, vegetable, fruit, cheese, carpenters' bench, curriers', drawing, farriers', fleshing, hay, tanners', plumbers', painters', palette, artists', and shoe knives, forks and steels, finished or unfinished, without handles, 25 per cent ad valorem; with handles, 30 per cent ad valorem: Provided, That all the articles specified in this paragraph, when imported, shall have the name of the maker or purchaser, and beneath the same the name of the country of origin indelibly stamped or branded thereon in a place that shall not be covered thereafter.

Mr. GALLINGER. Mr. President, that paragraph very seriously affects a good many small manufacturing establishments in the country, especially in the section of the country from which I come.

We imported last year, of the various kinds of cutlery denominated in this paragraph, 2,355,278 pieces, showing during that year there were almost two million and a half of these knives imported from foreign countries.

Mr. STONE. What was the value?

Mr. GALLINGER. The value was \$247,531.

There is very sharp competition to-day in the American market, particularly between Germany and the United States, in the matter of cutlery. There is a cutlery establishment in New Hampshire, at the head of which is ex-Gov. Goodell, of my State, who, by hard work, economy, and industry, has built up a beautiful town, where the operatives are happy and contented, living in their own houses to a large extent, and being paid liberal wages.

The competition that Gov. Goodell has found in this industry has been of the keenest possible kind. He has succeeded in keeping his factory going, but is very fearful about what will happen if this bill becomes a law.

It seems to me the figures I have given show sufficiently large importations of an article the American manufacturers of which are in sharp competition with those of foreign countries. I feel sure that if the duty is reduced as radically as it is proposed to reduce it in the bill under consideration it will prove very detrimental, if not disastrous, to this industry, which is giving employment to skilled labor at high wages, and in that way furnishing homes for the people who are engaged in the manufacture of cutlery of the kinds enumerated in the paragraph.

I have received from Gov. Goodell a letter, bearing date May

27, which I will read. It is as follows

ANTRIM, N. H., U. S. A., May 27, 1913.

Hon. J. H. GALLINGER, Washington, D. C.

DEAR SIR: I think the tariff bill now before the Senate is a very unjust one for the table-cutlery business.

We can make some of the very cheapest sorts, where the labor is very small and the stock is the main thing, and compete with foreign manufacturers.

Shari and the stock is the stock of the stock of the stock of facturers.

We buy our metals and our handle woods at exactly the same price as our English and German friends buy them. There is no duty on them at alk.

We buy our steel at about the same price that they buy it. When the duty on steel is taken off we can buy it at exactly the same price, I

The actual cost of steel will not be over one-half cent per pound less than it is now. When we come to the matter of fine goods, with a large amount of labor, the new tariff will be absolutely ruinous. Poor people will buy cheap goods no less than now, while rich people will buy line ivory, celluloid, and rubber goods cheaper.

The carvers, which are supposed to be purchased by people of means, will be made almost exclusively on the other side.

The fine ivory, celluloid, rubber handle, and silver table knives will also be made abroad, because a large share of the cost is in the labor; and we certainly can not compete with German labor, and we are not competing successfully now, as this letter which I inclose clearly shows.

The table-cutlery business has become, on account of foreign competition, exceedingly unprofitable already, and if we have to stand any reduction in the duties we shall have to be counted out except for very cheap goods, which people of small means buy.

I sincerely hope that some influence can be brought about to prevent such a calamity.

such a calamity. Truly, yours, D. H. GOODELL.

In this letter Gov. Goodell incloses another letter, which I want to read. It is as follows:

THE FORQUIGNON MANUFACTURING Co., Denver, Colo., February 3, 1912.

GOODELL Co., Antrim, N. H.

GENTLEMEN: I have just accepted a proposition from Graef & Schmidt to handle the Henckel line exclusively, and will therefore be unable to continue with you. I am sorry in many ways, for I certainly appreciate the many courtesies you have extended to me from time to time, but they made it so strong I find it to my interest to

am leaving in a few days, but will dispose of your samples at

your request. Yours, very truly,

E. E. TURBUSH.

Mr. Turbush represented the Goodell Co. in Denver, Colo., for a great many years, selling a very large amount of the product of Gov. Goodell's factory. But it will be seen that notwithstanding the existing tariff rates a German house offered him so much greater inducements that he notified Gov. Goodell that he must relinquish his agency and accept the agency from the German manufacturing establishment. This indicates very clearly that the American manufacturers of these classes of cutlery have had a very hard time to compete with the foreigner under the existing rates of duty, the competition being sharp and the profits very small. I have heard from other cuttery establishments throughout New England making similar representations, and stating that they hoped there might be given to this industry some relief beyond the rates that are provided in the bill as it came from the committee of the Senate.

Mr. President, inasmuch as the industry is very hard pressed under the existing law, and as it must necessarily suffer very severe consequences if the large cut that is made in the bill as it is now before us shall become a law, I propose to offer as a substitute for the provision we are now considering the rates that are named in the so-called Payne-Aldrich law. mit that as a substitute upon which, at the proper time, I shall ask for the yeas and nays.

The VICE PRESIDENT. The amendment submitted by the Senator from New Hampshire will be stated.

The Secretary. It is proposed to strike out paragraph 132 and to insert in lieu thereof the following:

and to insert in lieu thereof the following:

132. Table, butchers', carving, cooks', hunting, kitchen, bread, butter, vegetable, fruit, cheese, carpenters' bench, curriers', drawing, farriers', fleshing, hay, tanners', plumbers', palnters', palette, artists', and shoe knives, forks and steels, finished or unfinished; if imported with handles of mother-of-pearl, shell, ivory, silver, nickled silver, or other metal than iron or steel, 14 cents each; with handles of deerhorn, 10 cents each; with handles of hard rubber, solid bone, celluloid, or any pyroxy-lin material, 4 cents each; with handles of any other material than those above mentioned, 1 cent each, and in addition, on all the above articles, 15 per cent ad valorem; any of the knives, forks, or steels, enumerated in this paragraph, if imported without handles, 40 per cent ad valorem: Provided, That none of the above-named articles shall pay a less rate of duty than 40 per cent ad valorem: Provided. That all the articles specified in this paragraph when imported shall have the name of the maker or purchaser and beneath the same the name of the country of origin indelibly stamped or branded thereon in a place that shall not be covered thereafter.

Mr. CALLINGER. Junon that I ask for the yeas and navs.

Mr. GALLINGER. Upon that I ask for the yeas and nays. The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. BANKHEAD (when his name was called). my pair with the junior Senator from West Virginia [Mr. Goff] to the senior Senator from Maryland [Mr. Smith] and will vote. I vote "nay."

Mr. JAMES (when Mr. Bradley's name was called). again announce the absence of my colleague, the senior Senator from Kentucky [Mr. Bradley], on account of illness. He is paired with the junior Senator from Indiana [Mr. Kern].

Mr. CHILTON (when his name was called). I again an-

nounce my pair with the junior Senator from Maryland [Mr. Jackson], and withhold my vote.

Mr. BRYAN (when Mr. Fletcher's name was called). again announce the necessary absence of my colleague [Mr.]

FLETCHER]. He is paired with the junior Senator from Wyoming [Mr. WARREN]

Mr. KERN (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. Bradley]. I transfer that pair to the junior Senator from Alabama [Mr. Johnston] and will vote. I vote "nay."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from California [Mr. Per-If he were present, I should vote "nay."

Mr. JONES (when Mr. Poindexter's name was called). I desire to announce that my colleague is necessarily absent.

Mr. THOMAS (when his name was called). I again announce the transfer of my pair with the senior Senator from New York [Mr. Root] to the junior Senator from Oklahoma [Mr. Gore] and will vote. I vote "nay.'

The roll call was concluded.

Mr. CHILTON. I transfer my pair with the junior Senator from Maryland [Mr. Jackson] to the junior Senator from

Nevada [Mr. PITTMAN] and will vote. I vote "nay."

Mr. CLARK of Wyoming. My colleague [Mr. WARREN] is unavoidably absent. He is paired with the senior Senator from Florida [Mr. FLETCHER].

Mr. SMITH of Georgia. I transfer my pair with the senior Senator from Massachusetts [Mr. Lodge] to the senior Senator from Nebraska [Mr. HITCHCOCK] and will vote. I vote "nay.

Mr. GALLINGER. I announce the unavoidable absence of the junior Senator from Maine [Mr. Burleigh]. He is paired with the junior Senator from Virginia [Mr. Swanson].

The result was announced-yeas 17, nays 45, as follows:

YEAS-17.

Brandegee Burton Catron Clarke, Wyo.	Gallinger Jones McLean Nelson Oliver	Page Penrose Sherman Smith, Mich. Smoot	Townsend Weeks
	NA	YS-45.	
Ashurst Bacon Bankhead Bristow Bryan Chamberlain Chilton Cummins Gronna Hollis Hughes James	Johnson, Me. Kenyon Kern La Follette Lane Lea Lewis Martin, Va. Myers Norris O'Gorman Owen	Pomerene Ransdell Reed Robinson Saulsbury Shafroth Sheppard Shively Simmons Smith, Ariz. Smith, Ga. Smith, S.C.	Sterling Stone Thomas Thompson Thornton Tillman Vardaman Walsh Williams
	NOT VOTING-34.		
Borah Bradley Brady Burleigh Clapp Clarke, Ark, Crawford Culberson Dillingham	du Pont Fall Fletcher Goff Gore Hitchcock Jackson Johnston, Ala. Lippitt	Lodge McCumber Martine, N. J. Newlands Overman Perkins Pittman Poindexter Root	Shields Smith, Md. Stepheuson Sutherland Swanson Warren Works

So Mr. Gallinger's amendment was rejected.

Mr. STONE. I desire to state that the committee would ask to lay the bill aside for the remainder of the day and resume its consideration to-morrow.

The VICE PRESIDENT. Is there objection? The Chair hears none.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 53 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 55 minutes p. m.) the Senate adjourned until to-morrow, Wednesday, August 6, 1913, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate August 5, 1913. MINISTER.

Paul S. Reinsch, of Wisconsin, to be envoy extraordinary and minister plenipotentiary of the United States of America to China, vice William James Calhoun, resigned.

ASSAYER OF MINT.

Frank E. Wheeler, of Colorado, to be assayer of the mint of the United States at Denver, Colo., in place of Arthur R. Hodgson, superseded.

SUPERINTENDENT OF MINT.

Thomas Annear, of Colorado, to be superintendent of the mint of the United States at Denver, Colo., in place of Frank M. Downer, superseded.

COLLECTOR OF INTERNAL REVENUE.

Josiah W. Bailey, of North Carolina, to be collector of internal revenue for the fourth district of North Carolina in place of Wheeler Martin, superseded.

ASSISTANT APPRAISERS OF MERCHANDISE.

Joseph Knox Fornance, of Pennsylvania, to be assistant appraiser of merchandise in the district of Philadelphia, in the State of Pennsylvania, in place of H. Morgan Ruth, resigned. Harry Nichols, of Pennsylvania, to be assistant appraiser of merchandise in the district of Philadelphia, in the State of

Pennsylvania, in place of Michael J. Brown, resigned.

UNITED STATES ATTORNEY.

William G. Barnhart, of West Virginia, to be United States attorney for the southern district of West Virginia, vice Harold A. Ritz, whose term has expired.

RECEIVER OF PUBLIC MONEYS.

Thomas E. Owen, of Folsom, N. Mex., to be receiver of public moneys at Clayton, N. Mex., vice Manuel Martinez, removed.

REGISTER OF LAND OFFICE.

Paz Valverde, of Clayton, N. Mex., to be register of the land office at Clayton, vice Charles L. Hunt, removed.

PROMOTIONS IN THE ARMY.

INFANTRY ARM.

First Lieut. George A. Herbst, Fourteenth Infantry, to be captain from May 27, 1913, vice Capt. Bernard Sharp, Third Infantry, retired from active service May 26, 1913.

First Lieut. Philip J. Lauber, Second Infantry, to be captain from May 29, 1913, vice Capt. Thomas F. Schley, unassigned,

promoted.

First Lieut. Thomas M. Hunter, Sixth Infantry, to be captain from June 27, 1913, vice Capt. Albert C. Dalton, Twenty-ninth Infantry, promoted.

First Lieut. Gad Morgan, Thirteenth Infantry, to be captain from June 28, 1913, vice Capt. William T. Patten, unassigned, retired from active service June 27, 1913.

Second Lieut. Barton K. Yount, unassigned, to be first lieutenant from May 27, 1913, vice First Lieut. George A. Herbst, Fourteenth Infantry, promoted.

Second Lieut. Denham B. Crafton, unassigned, to be first lieutenant from May 29, 1913, vice First Lieut. Philip J. Lauber, Second Infantry, promoted.

Second Infantry, promoted.
Second Lieut. William E. Selbie, unassigned, to be first lieutenant from May 29, 1913, vice First Lieut. James H. Van Horn, Eleventh Infantry, detailed in the Signal Corps on that date.

Second Lieut. John L. Jenkins, Ninth Infantry, to be first lieutenant from May 30, 1913, vice First Lieut. Guy E. Manning, Twelfth Infantry, retired from active service May 29, 1913. Second Lieut. Charles H. White, unassigned, to be first lieu-

tenant from July 2, 1913, vice First Lieut. Edward H. Teall, Twenty-sixth Infantry, resigned July 1, 1913.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 5, 1913. UNITED STATES ATTORNEY.

Summers Burkhart to be United States attorney for the district of New Mexico.

PROMOTION IN THE REVENUE-CUTTER SERVICE.

Third Lieut. of Engineers Francis Ellery Fitch to be second lieutenant of engineers.

POSTMASTERS.

CALIFORNIA.

Thomas Fox, Sacramento.

C. G. Mudd, Powell.

REJECTION.

Executive nomination rejected by the Senate August 5, 1913. POSTMASTER.

Malcolm R. Merrill, Wheatland, Wyo.

HOUSE OF REPRESENTATIVES.

Tuesday, August 5, 1913.

The House met at 12 o'clock noon. The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:
O Thou who hast ever been our refuge and our strength, God our heavenly Father, we commend our souls to Thee and all our concerns to Thy care this day. Inspire us, we beseech Thee, with broad and comprehensive views of life, and quicken our conscience to do Thy will, that at its close we may be able to ask Thy blessing on all our acts and lie down to peaceful sleep in the full consciousness of duty well done. In the spirit of the Lord Jesus Christ. Amen. The Journal of the proceedings of Friday, August 1, 1913, was

read and approved.

COMMITTEE ON EDUCATION.

Mr. HUGHES of Georgia. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The SPEAKER. The gentleman from Georgia asks unanimous consent for the present consideration of the resolution

which the Clerk will report. The Clerk read as follows:

House resolution 223.

Resolved. That the Committee on Education is authorized to have such printing and binding done as is necessary for the discharge of the work of said committee during the Sixty-third Congress.

The SPEAKER. Is there objection?
Mr. MURDOCK. Mr. Speaker, reserving the right to object, has the Committee on Education usually had this privilege?

Mr. HUGHES of Georgia. I do not know; I can not answer the question. The gentleman from South Carolina, previously chairman of the committee, says it has had that privilege.

The SPEAKER. Is there objection? [After a pause.] Chair hears none.

The question was taken, and the resolution was agreed to.

LEAVE OF ABSENCE.

By unanimous consent, Mr. MILLER was granted leave of absence indefinitely on account of a journey to the Philippine Islands in the interest of public business.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House of Representatives was requested:

S. 2433. An act providing for the free importation of articles intended for foreign buildings and exhibits at the Panama-Pacific International Exposition and for the protection of foreign exhibitors; and

S. 1243. An act directing the issuance of patent to John Russell.

The message also announced that the Senate had passed

without amendment bill of the following title: H. R. 6383. An act to amend section 19 of an act entitled "An act to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of public buildings; to authorize the purchase of sites for public buildings; and for other purposes," approved March 4, 1913.

SENATE BILLS REFERRED.

Under clause 2 of Rule XXIV, Senate bills of the following titles were taken from the Speaker's table and referred to their appropriate committees, as indicated below:

S. 2433. An act providing for the free importation of articles intended for foreign buildings and exhibits at the Panama-Pacific International Exposition and for the protection of foreign exhibitors; to the Committee on Ways and Means.

S. 1243. An act directing the issuance of patent to John Russell; to the Committee on the Public Lands.

ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title; when the Speaker signed the same

H. R. 6383. An act to amend section 19 of an act entitled "An act to increase the limit of cost of certain public buildings; to authorize the enlargement, extension, remodeling, or improvement of certain public buildings; to authorize the erection and completion of public buildings; to authorize the purchase of sites for public buildings; and for other purposes," approved March 4, 1913.

THE RECORD.

Mr. MONDELL. Mr. Speaker-

The SPEAKER. For what purpose does the gentleman rise? Mr. MONDELL. To ask unanimous consent to correct the RECORD.

The SPEAKER. The gentleman will state his correction.
Mr. MONDELL. Mr. Speaker, on page 3005 of the Record of Friday, August 1, there was read a telegram received by the gentleman from Alabama [Mr. Heflin], as follows:

PITTSBURGH, PA., July 30, 1913.

Hon. J. Thomas Heflin.

House of Representatives, Washington, D. C.:

The Western Pennsylvania Association Opposed to Woman Suffrage extend hearty thanks and congratulations to you for your opposition to movement to give vote to women and trust you will continue in your opposition until the movement is defeated.

Mrs. James H. Reed, Chairman.

After the reading of this message there was loud and prolonged applause on the Democratic side, which does not appear in the RECORD. I ask unanimous consent that the RECORD may be corrected by having the words "Loud and prolonged applause on the Democratic side" appear after the telegram.

The SPEAKER. What does the RECORD show about "Loud

and continued applause"?

Mr. MONDELL. It does not show anything; but Members will remember there was loud applause, confined entirely to the Democratic side, and none whatever on the Republican side.

Will the gentleman yield?

Mr. MONDELL. If the gentleman will allow me to finish my statement. There was no applause whatever on the side occu-

pied by the Progressives and the Republicans. Mr. RAKER. Mr. Speaker, I want to correct the gentleman. When the statement from Secretary Daniels was read then applause came following that telegram or that letter and not from the others. That is the situation.

Mr. MONDELL. Now, Mr. Speaker, there may have been applause following the telegram from Secretary Daniels. I do not say but that there was. I was paying but little attention to that matter, but I was paying close attention to the reading of the telegram sent to the desk by the gentleman from Alabama [Mr. Heflin]. At the close of the reading of that telegram there was loud and prolonged applause, confined entirely to the Democratic side of the aisle, and the Record is not a true record of what occurred in that it does not indicate that fact.

Mr. MURDOCK. Does not the gentleman also recollect along with this loud and prolonged applause that there was laughter?

Mr. MONDELL. Oh, yes. Mr. MURDOCK. Mr. Speaker, I think that ought to be included.

Mr. MONDELL. And "general hilarity on the Democratic side.

Mr. HARDWICK. Mr. Speaker, I reserve the right to object. The SPEAKER. The gentleman from Georgia [Mr. Hard-WICK] reserves the right to object.

Mr. HARDWICK. I want to say this, Mr. Speaker, to the gentleman from Wyoming, that I do not think the Congres-SIONAL RECORD ought to show those things at all. [Applause.] It ought not to show applause one way or another. It involves us in just such controversies as this, and they are likely often

to occur. In my judgment the Record ought to show only what is actually said in debate. [Applause.]

Mr. MONDELL. But the gentleman knows that it is the practice to indicate applause.

Mr. HARDWICK. I know; but I shall object The SPEAKER. Does the gentleman object? I know; but I shall object to it this time.

Mr. HARDWICK. I do. The SPEAKER. Objection is made.

TRANSFER OF 2 PER CENT BONDS.

Mr. LEVY. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk

The SPEAKER. The gentleman from New York [Mr. Levy] asks unanimous consent for the present consideration of a resolution which the Clerk will report.
The Clerk read as follows:

House resolution 220.

Resolved, That the Secretary of the Treasury be, and he is hereby, requested, if not incompatible with the public interests, to furnish the House of Representatives at his earliest convenience with a copy of the transfer list of registered 2 per cent bonds by national banks since July 1, 1913.

Mr. COX. Mr. Speaker, I reserve the right to object.

The SPEAKER. The gentleman from Indiana [Mr. Cox] reserves the right to object.

Mr. LEVY. Mr. Speaker, the people of the United States hold the Secretary of the Treasury in high esteem, well knowing that his acts are prompted by the highest patriotism, and the statement recently made by him "that the banks of New York were in combination to depress the price of 2 per cent bonds" is very unfortunate, and no doubt was prompted by misinformation. There is not a scintilla of doubt or question but that the national banks of the State of New York have in good faith been aiding to sustain the price of twos ever since the agitation

for the new currency law

The national banks of New York act as the agents of other national banks throughout the United States, and New York City is the market in which all of these bonds are bought and sold. The New York banks have been swamped with requests from their corresponding banks throughout the country ever since the agitation for new currency legislation as to how to protect themselves with their outstanding 2 per cent bonds. The New York banks have urged the holding of these bonds, feeling confident that the Government of the United States in honor bound would be compelled to protect them at par. The banks of the Northwest and the South have been the principal sellers of the 2 per cent bonds, although not to a very large extent when compared with the amount outstanding, which is approximately \$720,000,000. The national banks of the State of New York sold very few 2 per cent bonds.

Mr. MANN. Mr. Speaker, reserving the right to object, I would like to ask the gentleman why this resolution ought not to follow the ordinary method and be referred first to the com-

mittee to be reported upon?

Mr. LEVY. Because there have been statements that national banks in the city of New York have combined for the purpose of depressing the value of those bonds. There is not a scintilla of foundation for it. The banks have tried their best to maintain the value of the bonds.

Mr. FOSTER. Mr. Speaker, I object.

Mr. LEVY. Does the gentleman reserve the right to object?

Mr. FOSTER. No; I object.
The SPEAKER. Objection is made, and the resolution will have to go to the box.

Mr. SLOAN rose.

The SPEAKER. The gentleman from Nebraska.

ADJOURNMENT UNTIL FRIDAY.

Mr. UNDERWOOD. If the gentleman will withhold for a moment, Mr. Speaker, I desire to ask unanimous consent that when the House adjourns to-day it adjourn to meet on Friday

The SPEAKER. The gentleman from Alabama [Mr. Underwood] asks unanimous consent that when the House adjourns to-day it adjourn to meet on Friday next. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

ORDER OF BUSINESS.

Mr. MANN. Mr. Speaker, I ask unanimous consent that when the House meets on Friday, after the reading of the Jour-nal and other informal business, the gentleman from Oklahoma [Mr. Morgan] be permitted to address the House for 30 minutes.

Mr. FERRIS. Reserving the right to object, Mr. Speaker——

The SPEAKER. The gentleman from Oklahoma [Mr. Fer-Bis] reserves the right to object.

Mr. FERRIS. I do that, Mr. Speaker, for the purpose solely of stating that the Committee on Public Lands has a bill which in the judgment of the eatire committee is an emergency matter, and the committee was almost, I think, unanimous in the opinion that we should take it up and try to get it out of the way before the currency bill came in, the committee having unanimously reported it and the caucus having unanimously agreed that it should be taken up.

In conversation with the gentleman from Illinois [Mr. MANN] a few moments ago, he was under the impression that we should not bring it up until more Members got back, so that everybody could have a chance to be heard. Personally, I may say that no one wants to get into any controversy about it, because it is an emergency matter and ought to be disposed of at this session.

Mr. MANN. Mr. Speaker, so far as I know and am at present informed, I am inclined to favor the bill that the gentleman refers to-the Hetch Hetchy bill, so called. Yet we have been running along for weeks, and the Members have been told that they might remain away from attendance on the House. As I understand, there will be a Democratic caucus on the 11th of August, which will naturally call back most of the Democratic Members, and it was my expectation to ask the Republican Members to be back by at least the middle of the month.

Mr. FERRIS. It seems to me, Mr. Speaker, that matters of this sort, in view of the fact that the membership will soon be full, ought not to be taken up until Members have been notified

Mr. UNDERWOOD. Mr. Speaker, if the gentleman will allow me, there is no objection to any gentleman on either side of the House making a speech about matters of interest to himself, and possibly to the country, providing it does not interfere with the public business; but if there is business before the House or the House concludes it is time to take up business, I do not think these speeches by unanimous consent should interfere with it; and I ask the gentleman from Illinois [Mr. Mann] to modify his request so that the gentleman may have his half hour to speak on next Friday, provided it does not interfere with the public business.

Mr. MANN. Mr. Speaker, it would be six of one and half a dozen of the other. If the Hetch Hetchy bill comes up on Friday, the gentleman from Oklahoma [Mr. Morgan] can take the floor for an hour, and nobody can get him off. I would be quite willing

Mr. UNDERWOOD. I think that is the better practice.

Mr. MANN. I agree with the gentleman about it.
Mr. MONDELL. If the gentleman will yield, I was unavoidably out of the Chamber for a moment, and did not hear

Mr. MANN. The request which I made was that the gentleman from Oklahoma [Mr. Morgan] be permitted to address the House for 30 minutes, and I will add to that, not to interfere with the public business.

Mr. MONDELL. What was the request of the gentleman from Oklahoma [Mr. Ferris]?

Mr. FERRIS. I did not make any request. I reserved the right to object.

Mr. THOMAS. Mr. Speaker, reserving the right to object, I wish to inquire upon what subject the gentleman from Oklahoma [Mr. Morgan] expects to enlighten the House? I want to know about that.

Mr. MANN. In order that the gentleman from Kentucky may have the pleasure of being present and gaining some enlightenment, I will say that I think the gentleman from Oklahoma will probably enlighten the gentleman on the tariff and other political matters.

Mr. THOMAS. If he can do that, I have no more to say.

Mr. FERRIS. Mr. Speaker, if the Chair will indulge me a moment further on my reservation, of course I have no objection to a speech by my colleague [Mr. Morgan]. I shall be glad to hear him myself. I do want, if I can, to arrange to get some definite time set for the consideration of our bill, and after a conversation with Floor Leader Underwood this morning, I had hoped we could bring it up on Friday of this week, so we could dispose of it and get it out of the way of the currency bill. I should like to ask Floor Leader Underwood if he thinks we could get consideration for this bill about the 15th, in accordance with the suggestion of the gentleman from Illinois

[Mr. MANN]? Mr. UNDERWOOD. Of course, I can not tell. I think if the committee are ready to report the currency bill, it ought

to have the right of way.
Mr. FERRIS. Undoubtedly.

Mr. UNDERWOOD. If conditions are favorable, you can take it up, and if not, let it go over. I think we can dispose of that question by bringing it up then.

Mr. MURDOCK. Why does not the gentleman bring it up

on Friday, when the half hour the gentleman from Oklahoma [Mr. Morgan] wants can be arranged? I should like to say that there seems to be a growing practice in the House of asking unanimous consent on one day in relation to business on a subsequent day. Why not ask the unanimous consent on the day when the business is to be transacted?

Mr. MANN. When gentlemen have to bring papers into the House, and there is no other business to be transacted, I can readily see how it may be an advantage to a gentleman to obtain unanimous consent on a previous day. Of course that is the only reason.

Mr. MURDOCK. Is it understood that the speech to be made by the gentleman from Oklahoma will not interfere with actual legislation?

Mr. MANN. I have so stated.

Mr. FERRIS. Mr. Speaker, the speech of the gentleman from Oklahoma [Mr. Morgan] is not the thing that is burdening my mind at all, and I am satisfied it is not the thing that

is burdening the gentleman from Illinois.

Mr. MANN. Nothing is burdening my mind. [Laughter.]

Mr. FERRIS. As usual. [Laughter.] There is something in the suggestion of the gentleman from Illinois about waiting until Members get back; but I want to impress upon the mind of the gentleman from Illinois that if he does force us to go of the gentleman from Illinois that if he does force us to go over until the 15th, or rather cause us to go over until that time, and if the currency bill comes in then, followed by the tariff bill, the probability is we shall be crowded out.

Mr. MANN. I said to the gentleman privately, and I am willing to say it publicly—although I do not think it will add anything to the efficacy of the statement—that so far as I am concerned I am willing to cooperate with the gentleman in bringing before the House the bill he refers to at as early a date as possible after the Members are back. I think myself there will be no opposition to the Hetch Hetchy bill, and yet, of course, I do not know.

Mr. FERRIS. On what day of the week does the 15th come?

Mr. MANN. On Friday.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that Friday, the 15th, be set apart as the day on which the committee may call up the Hetch Hetchy bill, with the proviso that if the currency bill is ready we stand aside until it is out of

the way. That is in fairness to the gentleman.

Mr. MONDELL. I reserve the right to object.

Mr. FERRIS. Mr. Speaker, I will withdraw my objection to the request of the gentleman from Illinois.

Mr. UNDERWOOD. Mr. Speaker, I do not think there will be anything on Friday.

Mr. MANN. I added to the request, not to interfere with public business

The SPEAKER. The gentleman from Illinois asks unanimous consent that next Friday the gentleman from Oklahoma [Mr. Morgan] shall have the privilege of addressing the House for 30 minutes, at such time as will not interfere with the

transaction of public business. Is there objection?

Mr. MURDOCK. Reserving the right to object, I would like to ask the gentleman from Illinois in case that consent is granted and I have an application for time next Friday, does the gentleman think that I will have any difficulty in getting an extension of that half hour granted to the gentleman from Oklahoma?

Mr. MANN. I do not think the gentleman from Kansas will have any difficulty in getting four hours if he wants.

Mr. MURDOCK. I do not wish to talk for four hours, but this is the trouble with the practice of asking unanimous consent for time on a previous day.

Mr. MANN. What is the trouble about it? It is an advantage. Mr. MURDOCK. It seems to me that it would be better and more regular to ask for consent on the day that it is desired to talk rather than to ask it now.

Mr. MANN. I think it is fair, if the House is not to be busy, for gentlemen to know that he has the permission to address the House on that day.

Mr. THOMAS. Mr. Speaker, in order that I may enlighten-

The SPEAKER. If the gentleman from Kentucky will wait a moment, the gentleman from Oklahoma made a request for unanimous consent.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent that Friday, the 15th, be set apart as the day on which to consider the Hetch Hetchy bill, provided the currency bill is not ready to proceed with; and if it is, that the Hetch Hetchy bill be laid

The SPEAKER. Is there objection to the request of the gentleman from Illinois that the gentleman from Oklahoma [Mr. Morgan] may have one-half hour on Friday next, not to interfere with other business? [After a pause.] The Chair hears none. Now the gentleman from Oklahoma [Mr. Ferris] asks that Friday, the 15th, be set apart for consideration of the bill known as the Hetch Hetchy bill, not to interfere with the currency bill if the currency bill is reported.

Mr. MANN. I would suggest to the gentleman from Oklahoma that he make his request, that on Friday, the 15th, the Hetch Hetchy bill shall be made a continuing order until dis-posed of, so that if the House adjourns without disposing of it

on Friday it will be the continuing order.

The SPEAKER. The gentleman modifies his request so that it will be a continuing order, beginning on Friday, not to interfere with the currency bill.

Mr. MONDELL. Mr. Speaker, reserving the right to object, would like to know what the intention—

Mr. THOMAS. Mr. Speaker, in order that I may enlighten

Mr. MONDELL. Reserving the right to object, I would like to know what the intention of the gentleman from Oklahoma is in regard to allowing sufficient debate and discussion.

Mr. THOMAS. Mr. Speaker, I supposed that I had the floor. The SPEAKER. No; the Chair supposed that the gentleman from Kentucky was reserving the right to object. The gentleman from Kentucky has not the floor.

Mr. THOMAS. I suppose the gentleman from Wyoming has the floor.

The SPEAKER. After the request of the gentleman from Oklahoma is disposed of, the Chair will recognize the gentleman from Kentucky.

Mr. MONDELL. Mr. Speaker, I have introduced this morning a bill which I expect to offer as a substitute for the Hetch Hetchy bill, and I think there will be a demand for considerable time for discussion of that measure on this side at least, as it involves a number of important principles. I trust the gentleman from Oklahoma has no disposition to limit the time for debate, and I want to be assured that abundant opportunity will be given for discussion of the bill before I agree to the request for unanimous consent.

Mr. FERRIS. There is no disposition on the part of the committee, or anybody, for undue haste, or to hurry the matter

along and cut anybody out.

Mr. MONDELL. I have no disposition to prolong the discussion or defeat the measure; I simply want an opportunity for full discussion.

Mr. FERRIS. The gentleman from Wyoming, who has long been a member of the committee, and the chairman of the committee knows that the committee is willing to give everybody an opportunity to be heard, and give it the same full consideration in the House as it had in the committee.

Mr. MURDOCK. Then, if I understand the gentleman from

Oklahoma, he does not intend to conclude this matter in one

Mr. FERRIS. Probably not.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma [Mr. Ferris]?

There was no objection.

Mr. THOMAS. Mr. Speaker, I wish to apologize to the Speaker for interrupting as I did a little while ago. pose that the gentleman from Wyoming had the floor; he generally does. [Laughter.]

Mr. MONDELL. The gentleman from Wyoming sometimes has the floor, when the gentleman from Kentucky does not

Mr. THOMAS. Yes; the gentleman from Kentucky seldom has the floor, and when the gentleman from Kentucky does not have the floor the gentleman from Wyoming either has it or tries to get it, one of the two. [Laughter.] Mr. Speaker, I wish to ask unanimous consent that on Friday next, in order to enlighten the darkened intellect of the gentleman from Illinois [Mr. Mann] [laughter] as to some things which have never been dreamed of in his philosophy, I may have 30 minutes in which to address this House. [Laughter.]

The SPEAKER. The gentleman from Kentucky asks unanimous consent that on next Friday, following the speech of the gentleman from Oklahoma [Mr. Morgan], he shall have 30 minutes in which to address the House.

Mr. MANN. I think the gentleman ought to have 45 minutes, at least, if he is going to give us any information.

Mr. THOMAS. Mr. Speaker, I accept the amendment; you may put it an hour if you like. [Laughter.]

Mr. MANN. It will take an hour for the gentleman to give

any information

Mr. UNDERWOOD. Mr. Speaker, reserving the right to object, I desire to ask the gentleman from Kentucky to amend his request, as there may be two bills which will come up on Friday from the Committee on Foreign Affairs. I ask that he make his request not to interfere with public business.

The SPEAKER. The gentleman from Kentucky asks manimous consent that, following the speech of the gentleman from Oklahoma [Mr. Morgan], he shall have 45 minutes in which to address this House, not to interfere with the public business. Is

there objection? [After a pause.] The Chair hears none.

Mr. RAKER. Mr. Speaker, some two weeks ago House
Document No. 54 was printed. At the time it was stated to the
gentleman from Illinois that the report would not be inserted in the hearings of the Hetch Hetchy bill, which has not been done, but they are practically exhausted, and we desire that a copy of that report may be had by each Member of the Heuse; and therefore I ask unanimous consent that there be printed 500 copies of House Document No. 54, the Army engineers report.

Mr. MANN. Well, reserving the right to object, if there ever was a useless document printed it is that of the Army engineers' report. As for giving a copy to each Member of the House—each member of the Army engineers can not understand it, much less others, and I am sure no one in the House could, except the honorable gentleman from California, who has other information, and hence may be able to understand some little of the Hetch Hetchy document. It is just a waste of public money to be printed.

Mr. RAKER. It is a matter that has been discussed by the committee, and they have all asked about it and desire to know what it is

Mr. MANN. The gentleman ought not to leave them in ignorance. I read that report from one end to the other, and it is the only document I ever read from which I could absolutely extract no information whatever. [Laughter.]

The SPEAKER. The gentleman from California [Mr. Raker] asks unanimous consent that 500 additional copies of House Document 54 be printed, leaving out the engineers' report. Is there objection?

Mr. FOSTER. I object, Mr. Speaker.

The SPEAKER. The gentleman from Illinois objects.

Mr. SLOAN. Mr. Speaker, I desire to ask that I may be permitted to print a letter from the Hon, J. H. Rushton, of Nebraska, in the RECORD.

The SPEAKER. The gentleman from Nebraska [Mr. Sloan] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

Mr. FOSTER. Mr. Speaker, reserving the right to object, I would like to know upon what subject it is.

Mr. SLOAN. The subject is the attitude of the commercial classes of Europe toward pending tariff legislation, he having been Briton-born, became an American citizen, inbued at the same time with American ideals of commerce. He is one of the largest manufacturers in our State of Nebraska products, and I think his communication would be of interest to every Member of this House.

Mr. FOSTER. Is he a member of the National Association of Manufacturers?

Mr. SLOAN. I do not know whether he is or not. I do not know whether that would make any difference. He is an honorable man and an able one-

Mr. FOSTER. That organization seems to be in the limelight at this time

Mr. SLOAN. And the information he would give would, I think, be of value to the gentleman from Illinois.

Mr. MURDOCK. Mr. Speaker, is this a letter or a document? Mr. SLOAN. It is a letter, written to me. I trust that fact will not impair its value.

Mr. FOSTER. Will the gentleman give us the name of the manufacturer?

Mr. SLOAN. The writer is the Hon. J. H. Rushton.

Mr. BURNETT. What is his nationality?

Mr. SLOAN. He is an American citizen, but was born in England; but, unlike a lot of people who were born and still live here, he has not become British on policies of commerce, [Laughter on the Republican side.]

The SPEAKER. Is there objection?

There was no objection.

Following is the letter referred to:

EUSTON HOTEL, London, N. W., July 16, 1913.

Hon. Chas. H. Sloam.

House of Representatives, Washington, D. C.

Friend Sloam: There are some general facts that appeal to me here and I think will appeal to you. This city is one of commerce. The British Empire is a nation of commerce. All the commercial people according to their interests are watching the progress of the Democratic tariff bill and hoping for its speedy

passage.

To illustrate: If the bill passes with the free-meat clause, Australian mutton is ready to come in and compete with the mutton from west of the Missouri River.

The Australian and Argentine beef is looking for the bill to pass so it can come in and compete with the farmers of the Mississippi and Missouri Valleys.

The Russian and Italian eggs as well as China eggs are ready to come across the seas as soon as "Dr. Wilson," as they call him here, signs the bill.

Australian and Siberian butter dealers are ready to cond their

come across the seas as soon as "Dr. Wilson," as they call him here, signs the bill.

Australian and Siberian butter dealers are ready to send their surplus goods to us and meet the butter in our markets made from cream produced in the dairy section of the United States.

Russian and Chinese poultry will be able to come into our markets and get a portion of the trade and dominate our markets.

From these countries producing the articles named—on cheap land—there will come a flood of food.

From these countries where labor is cheap these foods will come in large amounts.

How will the farmers, laborers, and business men of the great producing sections of our country feel about having their \$100-an-acre land put in competition with the \$1 to \$10 land in these countries? How will the well-paid labor of this country enjoy coming into actual practical, not theoretical, competition with the cheap labor of these countries named?

the well-paid labor of this country enjoy coming into actual practical, not theoretical, competition with the cheap labor of these countries named?

We pay women \$1.50 to \$2 per day to pick chickens. In Russla. working from 4 a. m. until 7 p. m., the Russian peasant women get 24 cents per day.

All these lines named remind me of a horse race, every horse is on the bit waiting for the starter to give the word.

So all these named lines are simply waiting for President (Dr.) Wilson to sign this act, and then there will be a rush for our markets (the best markets on earth) and the question is how will it affect our producers, our laborers, our lands, our business communities, and our general prosperity? I leave this to your own conclusion. The eyes of the commercial world are on America and hoping that she will make this misstep and give them a chance. The cost of living in Europe and all over the world will rise. The cost of production will also rise.

In our country the producer will suffer first and then the consumer will suffer second, and our boasted high standard of living will be lowered.

The bill, if it becomes law, will benefit the peasants of Russia and Italy, the cattle and sheep raisers of Australia and Argentina and Uruguay, the Chinaman; but to the extent that they are benefited our own people will suffer.

Is this Congress an American Congress or Russian or Italian or Australian or South American?

By its acts we shall know and become enlightened. It would do the advocates of free meats and reduced duties good to visit the Smithfield Market in London and see things before they vote.

THE CURRENCY.

Mr. RAGSDALE. Mr. Speaker, I ask unanimous consent to be permitted on Friday to address this House for one hour on the currency bill, now being considered, not to interfere with the transaction of public business.

The SPEAKER. The gentleman from South Carolina [Mr.

The SPEAKER. The gentleman from boundary, fol-RAGSDALE] asks unanimous consent that on next Friday, following the speech of the gentleman from Kentucky [Mr. Thomas] and the speech of the gentleman from Oklahoma [Mr. Morgan], he be allowed to address the House for one hour on the subject of the currency bill.

Mr. BURNETT. Mr. Speaker, a parliamentary inquiry.

The gentleman will state it. The SPEAKER.

Mr. BURNETT. Do the Members have to be here when these speeches are delivered?

The SPEAKER. That is not a parliamentary inquiry.
Mr. RAGSDALE. If it would keep some Members from the places they intend to be in, Mr. Speaker, it might be well for them to be required to be here. [Laughter.]

The SPEAKER. Is there objection?
Mr. UNDERWOOD. I understand, Mr. Speaker, that the gentleman coupled with his request the statement that the speech would not interfere with the transaction of public

Mr. RAGSDALE. Yes. I said that. The SPEAKER. Is there objection? There was no objection.

WARREN F. DANIELL.

Mr. REED. Mr. Speaker, I desire to ask unanimous consent to have read by the Clerk and inserted in the RECORD a copy of an editorial.

Mr. MANN. I object, Mr. Speaker. I do not know what it We can not commence that practice.

The SPEAKER. The gentleman from Illinois [Mr. MANN]

Mr. REED. Mr. Speaker, will the gentleman permit me to state the text of the editorial?

Mr. MANN. I object to the gentleman stating what it is. Mr. MURDOCK. The gentleman objects to the editorial, but does not know the subject matter. Is that the proposition?

Mr. MANN. I object to the practice of having read by the Clerk editorials from newspapers, of which there are thou-

sands of good ones every day.

The SPEAKER. The gentleman from Illinois objects, and

does not need to give any reason why he objects.

Mr. REED. Mr. Speaker, I ask unanimous consent to insert in the RECORD an editorial on an ex-Member of this House, the late Warren F. Daniell.

The SPEAKER. The gentleman from New Hampshire [Mr. Reed] asks unanimous consent to insert in the Record an edi-Is there objection? torial.

Mr. MANN. Mr. Speaker, I withdraw my objection in view

of what the gentleman states.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none. The Clerk will read.

The Clerk read as follows:

WARREN F. DANIELL.

Warren F. Daniell, who died at his home in Franklin Wednesday, rounded out a long, useful, and well-spent life and left a circle of friends as wide as the broad range of his acquaintance. Whether from temperament or wise choice, or both, he made his life worth living without worrying over much about it. He was a successful business man, capable of close application, but he did not permit his business to gain mastery over him. He never became a slave to a desire for great wealth, and, free from personal political ambition, lived a life of cheerful activity and contentment, carrying the buoyant spirit of youth into his latest years. Fond of a good horse, he gratified his taste at the same time that he encouraged the breeding of good horses. His model farm and exceptionally fine herd of cattle were for many years an example and an incentive to his neighbors, and, indeed, to farmers in all sections of the State. He even made himself an expert in poultry and contributed greatly to the introduction of the best strains and to the general encouragement and improvement of an industry which is rapidly gaining in importance in New Hampshire.

He was singularly free from ambition. He might easily in Civil War times have held a military commission, but he chose to go with a regiment as a civilian, contributing unostensibly to the comfort of the soldiers. When the village, to the prosperity and growth of which he had contributed, became a city he might have been its mayor, but declined. He might have had the nomination of his party for governor, and in all probability would have been elected, but positively refused. As a matter of party loyalty he consented to run for Congress, and was elected, but would not consider a second term.

Living his life in his own cheerful, wholesome way, he was hale and hearty at an age when most men are feeble of body and broken in spirit. Unaffectedly democratic, kindly and benevolent without ostentation, it could be said of him, as of a certain Greek in the olden time, that he built his house

EXTENSION OF REMARKS.

Mr. LEVY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from New York [Mr. Levy]

asks unanimous consent to extend his remarks in the RECORD.

Mr. MURDOCK. Mr. Speaker, inasmuch as the practice is growing up of asking each gentleman what he is going to extend about, I will ask the gentleman from New York what he is going to speak of?

Mr. LEVY. I wanted to do that a moment ago. It is in relation to those 2 per cent bonds and to banking.

The SPEAKER. Is there objection?

Mr. WINGO. I object, Mr. Speaker, Mr. MANN. Reserving the right to object-

The SPEAKER. The gentleman from Arkansas [Mr. Wingo] objects.

Mr. BRYAN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting an article written by the Hon. Albert J. Beveridge along the line of the remarks to be made by the gentleman from Oklahoma [Mr. Morgan]; that is, on the tariff and other kindred and allied subjects involving the state of the Union.

Mr. LOBECK. I object, Mr. Speaker, until we hear what the gentleman from Oklahoma [Mr. Morgan] states. Then we can find out.

The SPEAKER. The gentleman from Nebraska [Mr. Lo-BECK] objects.

Mr. BRYAN. Mr. Speaker, will not the gentleman— The SPEAKER. The gentleman from Nebraska objects, and does not need to give any reason for objecting.

Mr. LEVY. Mr. Speaker, did anyone object to my printing

remarks in the Record.

The SPEAKER. The gentleman from Arkansas [Mr. Wingo] objected to the request of the gentleman from New York.

PARCEL POST.

Mr. KINDEL. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER. The gentleman from Colorado [Mr. KINDEL]

rises to a question of personal privilege.

Mr. KINDEL. Since becoming a Member of the House I have labored industriously along the lines of transportationThe SPEAKER. The gentleman from Colorado will state

his question of privilege.

Mr. KINDEL. The Assistant Postmaster General, in remarks made in the Denver Express on July 31, said that Congressman Kindel's plans were entirely too radical; that Post-master General Burleson stated that "we might ultimately reach the point Mr. KINDEL advises, but we do not want to cripple the service by trying to do too much at once. We are going to increase the weight limit of packages accepted from 11 to 20 pounds, and packages over 11 pounds will be carried only in the 150-mile zone."

Mr. MANN. I respectfully suggest that the gentleman has not stated a question of personal privilege. If the gentleman desires to address the House, I have no objection.

The SPEAKER. The gentleman has not stated any question

of personal privilege.

Mr. KINDEL. I supposed that was the way to get the floor on a matter of this kind. I am inexperienced in parliamentary matters, as gentlemen know.

Mr. MANN. How long does the gentleman desire to address

the House?

Mr. KINDEL. Perhaps 30 minutes.

Mr. MANN. I ask unanimous consent that the gentleman have leave to address the House for 30 minutes.

The SPEAKER. The gentleman from Illinois [Mr. MANN] asks unanimous consent that the gentleman from Colorado have

Is there objection? 30 minutes.

Mr. MURDOCK. Reserving the right to object, I should like to know the philosophy and the practice concerning unanimous consent. At the beginning of to-day's proceedings the gentleman from Illinois [Mr. MANN] asked unanimous consent that the gentleman from Oklahoma [Mr. Morgan] might address the House on a future day. Following that the gentleman from Kentucky [Mr. Thomas] made a similar request. Then there followed requests to print several things in the RECORD, but when the gentleman from Washington [Mr. BRYAN] asked unanimous consent to print in the RECORD something which is apropos and political, dealing with public questions, there was objection. I have no objection to the gentleman from Colorado proceeding for 30 minutes, but I think there will have to be some give and take on the proposition of unanimous consent.

Mr. MANN. Mr. Speaker, I think the gentleman from Kan-

sas is hardly fair in his statement.

Mr. MURDOCK. I have no objection to the gentleman from

Colorado addressing the House.

Mr. MANN. I feel quite sure that gentlemen in the House belonging to the party of which the gentleman from Kansas is at the head have printed more matter under leave to print, in proportion, than either of the other parties.

Mr. MURDOCK. I doubt that; but I do not think that enters

into the equation.

Mr. MANN. That enters into the question as to whether

the House is endeavoring to discriminate.

Mr. MURDOCK. The House, as a matter of fact, was playing favors this afternoon in the matter of granting unanimous consent.

Mr. MANN. Oh, well-

Mr. MANN. On, well—
Mr. MURDOCK. I have no objection.
The SPEAKER. The Chair will state again that when a request is made for unanimous consent any gentleman in the House has the absolute and inherent right to object without giving any reason whatever for it.

Mr. THOMAS. Mr. Speaker—
The SPEAKER. Is there objection?
Mr. THOMAS. Reserving the right to object, may I inquire of the Chair for what purpose and upon what subject the gentleman from Colorado wishes to speak?

The SPEAKER. The information of the Chair is—
Mr. THOMAS. I inquire of the gentleman from Colorado.
The SPEAKER. The gentleman from Kentucky, reserving the right to object, asks the gentleman from Colorado what he is going to speak about.

Mr. KINDEL. The parcel post, and my activities along lines contrary to those I have been charged with.

Mr. THOMAS. Mr. Speaker, I ask unanimous consent that the gentleman be allowed four hours in which to discuss that question.

Mr. KINDEL. Mr. Speaker, I do not know that I will take quite four hours, but I will quite likely take three.

Mr. MANN. I ask the gentleman from Kentucky to withdraw his request.

Mr. THOMAS. Anything that the gentleman from Illinois asks.

The SPEAKER. Is there objection to the gentleman from Colorado addressing the House for 30 minutes?

Mr. WINGO. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. LEVY] may have permission to extend his remarks in the RECORD. I misunderstood his request.

Mr. MURDOCK. Mr. Speaker, I object. Mr. KINDEL. Mr. Speaker, I quote the following article

from the Cheyenne Leader:

CONGRESS FIGHTS BURLESON'S ORDER TO REDUCE RATES.

WASHINGTON, July 22.

Concerted opposition has developed in Congress to Postmaster General Burleson's order reducing parcel-post rates and increasing the maximum size of packages to be handled in the service. The order was issued Sunday, to become effective August 15, and to-day the Senate Post Office Committee requested Mr. Burleson to appear before the committee next Thursday with an explanation for the authority of his action.

The committee is expected to undertake to have withdrawn before August 15 any authority he may claim to make changes in rates. It was contended in the committee that the changes would entail an enormous loss to the Government, and some of the members complained strenuously that the Post Office Department had failed to furnish Congress with data concerning the operation of the parcel post.

It is claimed that the Postmaster General has no authority to make the contemplated changes, and there is expected to be some bitter debating on this subject.

Accompanying that was a letter written by A. De Armon, as follows:

CHAMBERLIN METAL WEATHER STRIP Co., Cheyenne, Wyo., July 23, 1913.

Hon, GEORGE J. KINDEL, Washington, D. C.

Hon. George J. Kindel, Washington, D. C.

Dear Sir: Referring to the inclosed clipping, you will remember that when the parcel-post bill was passed, the Postmaster General was given the power to make certain changes to suit conditions. Among the changes he was authorized to make were the reduction of rates and increase in weight of packages up to 100 pounds.

As you are familiar with freight and express rates, we are taking this matter up with you also, as the Congressman from this State is longer on making grand-stand plays than he is at serving the people who sent him to Washington. Incidentally, the aforesaid people will undoubtedly get his Angorina the next trip

You know how we all have been sandbagged and robbed by the express companies, so if you can do anything to aid the Postmaster General in putting this ruling into effect your efforts will surely be appreciated.

General in putting this runing into effect you be preciated.

It would look like the express companies have some lobby in Washington as well as the other "infant industries," and it is the sincerest wish of the writer, as well as thousands of others who have been their prey for lo these many years, that they will get all that is coming to them.

It has been demonstrated that the parcel post is a paying proposition, and there should be no objection to this change.

Very truly,

A. DE ARMON.

Another letter by the editor of the Ranch and Range is as

DENVER, Colo., July 30, 1913.

Hon, George Kindel, M. C., Washington, D. C.

Washington, D. C.

Dear Mr. Kindel: I notice there is an effort being made on the part of representatives of the express companies to nullify the "administrative-powers" clause in the parcel-post law so that the new ruling by Postmaster General Burleson, materially increasing the efficiency of the parcel-post act and making it of much greater service to the farmers, would be made inoperative.

You are familiar with the fact that the parcel-post law became such at the urgent demand of the National Grange, composed of nearly a million enterprising farmers, and it is to relieve these burden bearers of our Nation that this and similar acts for their protection have been enacted.

In behalf of the Colorado State Grange and Farmers' Union, of which Ranch and Range is the official organ, and of which I am managing editor, and in behalf of 50,000 other farmers in the State of Colorado, I appeal to you to protect the interests of the farmers of our Nation by using your offices to defeat any efforts on the part of the "tools" of the express companies, which for decades have been recognized among the "special-privileged classes" in restricting the authority of the Postmaster General, thus forcing the Government to become a party with the express companies in a "hold-up game," which for decades has so effectively contributed to the making of millionaires of the favored few and paupers of the farmers.

Thanking you in advance in anticipation of your favorable efforts in behalf of the farmers, I remain,

Very truly, yours,

My reply to Mr. Groves, of the Ranch and Range, was as

My reply to Mr. Groves, of the Ranch and Range, was as

AUGUST 4, 1913.

Mr. H. S. GROVES, Denver, Colo.

DEAR MR. GROVES: I have your letter of July 30, relating to existing controversy between Congress and the Postmaster General over the

ng controversy between Congress and the Postmaster General over the parcel post.

As you are aware, I have been an open and ardent advocate of the parcel post for a great many years. I advocated its adoption when it was not nearly so popular in Colorado as it is to-day.

I am still a friend of the parcel post. I have advocated increase in the weight limit, reduction of rates, and rearrangement of zones continuously and zealously since I came to Washington. Perhaps you will recall that I proposed a scheme for such a revision after my election to Congress and some time before I came to Washington.

But I am opposed to the butchering of the parcel post now being practiced by Postmaster General Burleson. I have not hesitated to express my opposition publicly and privately; and I am sure the people of Colorado, who have known me in my fight of 21 years against the express companies, know my opposition is not due to friendliness to those bloodsucking parasites.

I have opposed the changes suggested by the Postmaster General because they tend to discredit the parcel post. In my opinion, they will retard rather than aid the proper development of transportation

by parcel post; and if I thought Postmasters General in the future would be as poorly qualified as is Postmaster General Burleson to cope with the problems of parcel post, I should favor taking from that official authority to make changes in rates, zones, and weight limits and lodging it again in Congress. But I am confident that Burleson will not remain in office very long and that there will never be another so poorly fitted for the job as he.

Now, let us look at the possible effects of the changes proposed by Mr. Burleson. He would increase the weight limit to 20 pounds for local, first, and second zones, or over a distance of 150 miles from the sending office. He would decrease the rates radically in this territory, but would leave rates and the weight limit for the remainder of the country unchanged.

I have insisted from the beginning that the changes should be extended all over the country, or that they should be made on a principle that could be extended to the entire country when sufficient development in the parcel-post business had been reached to justify the extension. But I contend that the changes he is making will retard the development of the parcel post, for the very reason that they can never be extended to the other zones.

His rate for the local zone is 5 cents for the first pound and 1 cent for each additional 2 pounds or fraction thereof. For the second and third zones his rate is 5 cents for the first pound and 1 cent for each additional 2 pounds or fraction thereof. For the second and third zones his rate is 5 cents for the first pound and 1 cent for each pound or fraction thereof.

This makes a rate of 24 cents on 20 pounds for a distance of 150 miles. Twenty pounds could not be shipped 151 miles except in two packages. The rate would be \$1.04. This is a penalty of 80 cents for crossing an imaginary line.

I should not object seriously to this discrepancy if I thought it was to be only temporary. But I am convinced from the investigation I have made that the rates made for the 150-mile

rate from Denver to Gienwood Springs is \$1.37 for 100 pounds, first class.

I have always contended and still contend that the freight rate is too high. But the railroads contend that they have a hard time keeping out of the bankruptcy courts under those rates, carrying the business by slow and comparatively inexpensive freight-train service. If must be understood that the railroads deliver none of their freight, simply holding it at the freight office until it is called for.

Now, the Pestmaster General proposes that five 20-pound packages shall be carried from Denver to Gienwood Springs, by passenger train instead of freight, and each package delivered to a separate address for \$1.20, or 17 cents cheaper than the same weight can be carried in a single package by freight and held in the office at Glenwood Springs until it is called for. Does it appear to you that the Government can do that sort of business except at a loss?

Now, the rate on 100 pounds by freight to Grand Junction from Denver is \$1.40, only 3 cents more than to Glenwood Springs. Conditions for carrying and delivery are the same. Let us see about the parcelpost rate.

for carrying and delivery are the same. Let us see about the parcerpost rate.

Grand Junction falls outside the 150-mile radius from Denver; hence the maximum weight limit would be 11 pounds and the present rates would apply. The same 100 pounds which would cost \$1.20 to Glenwood Springs, carried in 5 packages, would have to go in 10 packages to Grand Junction and would cost \$5.20. It costs 3 cents more to ship 100 pounds of freight to Grand Junction than to ship it to Glenwood Springs. It costs \$4 more to ship 100 pounds by parcel post.

Now, I have opposed the alterations proposed by the Postmaster General for no other reason than that they are unsclentific and indefensible from any standpoint. I am confident they will retard rather than hasten the proper development of the parcel post. I did not wuit until his plans had been publicly announced, but wrote to him and to the Interstate Commerce Commission at least a month before any public announcement was made, pointing out the danger of such unrelated changes.

changes.

The Postmaster General first proposed to make the rate of 5 cents for the first pound and 1 cent for each additional 2 pounds apply over the entire 150-mile territory. It was because of my objections that he finally proposed a different rate for the territory outside of local delivery. But I am confident his rates for the second zone are too low, will result in a big deficit to the department, and will thus be a hard blow to the parcel post.

Sincerely, yours,

MILDDOCK Will the gentlemen yield?

Will the gentleman yield? Mr. MURDOCK.

Mr. KINDEL. Yes. Mr. MURDOCK. I realize the study that the gentleman has given to this question perhaps more than any other gentleman present. But he says that the new rates in the first two zones are too low. Is it not a fact that the present rates in the first two zones are so high that the express rates undercut them and get the business? Does the gentleman, in that connection, believe there is any considerable parcel-post business between Washington and Baltimore? Is it not a fact that most of the small parcels go to the express companies for the reason I have stated?

Mr. KINDEL. I am thoroughly in accord with the reductions in the local and first zones, but I am opposed to the postage-stamp rates for the first and second zones. This makes the rate the same for all distances, outside of local delivery, for a distance of 150 miles from the sending office. The rate is 24 cents for 20 pounds for both the 50-mile and the 150-mile zones.

Mr. MURDOCK. The gentleman's objection is to the destruction of the zones and the widening out of the lines which make

the two zones.

Mr. MONDELL. Mr. Speaker, when it is convenient I would like to ask the gentleman a question.

Mr. KINDEL. The gentleman can ask it now.

Mr. MONDELL. The gentleman referred to his interview with the Postmaster General and gave me the impression that he disagreed with the Postmaster General.

Mr. KINDEL. I did.

Mr. MONDELL. I had understood that the Postmaster General had stated in the hearing before the Senate committee, when called upon to explain these changes, that he had con-ferred with the gentleman from Maryland [Mr. Lewis] and the gentleman from Colorado [Mr. Kindel], and I assume that he meant to say or meant to infer that both gentlemen agreed with him.

Mr. KINDEL. I am glad the gentleman from Wyoming has asked the question. I was invited by the Postmaster General to confer with four underling \$2,500 clerks and Mr. Lewis. Mr. Lewis had a proposition to make and, in fact, published it in his brief, in which he proposed to have a rate of one-half a cent a pound for each hundred miles. I pointed out at once what would happen, that the rate would be like a skyrocket; it would be so high, and it would come down like a stick. Mr. Lewis had made comparisons of rates in Europe and his proposed rate on 132-pound packages. He did not tell the whole truth, that that rate was made on 46 miles in Europe and his on 100 miles. In other words, it was a ratio of 30 to 18. When they made the report I told the Postmaster General. The say "we." Who is "we"? I had nothing to do with the report and I could not agree to it. I had proposed another rate that was automatic that you could use-the poundage multiplied by the zone and add 3, and you will get the rate.

Mr. MONDELL. Then I am correct in my understanding of what was said by the Postmaster General to the effect that he had conferred with the gentleman from Colorado and that the

gentleman from Colorado agreed with him?

Mr. KINDEL. I had not agreed with him. I heard that statement was made, but I was away at Panama at the time.

Mr. MONDELL. My impression was that the gentleman from Colorado was in full accord ith what was done.

Mr. KEATING. The gentleman from Colorado is not responsible for any inferences the gentleman from Wyoming may have drawn of what the Postmaster General said.

Mr. KINDEL. I want to thank the gentleman from Wyoming for having brought this question up, and if there is any misun-

derstanding about it I want to correct it.

Mr. MONDELL. Now, Mr. Speaker, will the gentleman yield to me for a moment?

Mr. KEATING. Just a second, I beg of my colleague from Colorado. The point I want to make is this: You are arguing now that your understanding of what the Postmaster General said placed you in a false light before the Senate committee, and claim that he had an agreement with you?

Mr. KINDEL. No; I can not say that. I do not know any-

thing about that.

Mr. MONDELL. Mr. Speaker, will the gentleman yield? The SPEAKER. Does the gentleman from Colorado yield to the gentleman from Wyoming?

Mr. KINDEL. Yes.

Mr. MONDELL. I do not think the gentleman from Colorado [Mr. KINDEL] needs to have his colleague defend and protect him on the floor of the House. In perfect good faith, in order that I might understand the gentleman's position, I asked him with regard to the statement made by the Postmaster General. It happened that I was in the committee room of the Committee on Post Offices and Post Roads of the Senate when the Postmaster General was before that committee, and the understanding I had—and I readily admit I have not the brilliant understanding possessed by the gentleman from Colorado [Mr. Keating]—was that the gentleman from Colorado [Mr. Kin-DEL] agreed with these rates, and I was somewhat surprised; and in order that the matter might be cleared up, not only so far as my understanding of the case is concerned, but so that others also might understand it, in good faith I asked the gentleman to make his position clear. I now ask the gentleman from Colorado [Mr. KINDEL] if it is true that the statement made by the Postmaster General as reported in the newspapers led to the conclusion that he agreed with the Postmaster General?

Mr. KINDEL. I did not agree with him.
Mr. KEATING. One moment.
Mr. KINDEL. This ought not to come out of my time.
Mr. KEATING. I will ask for an extension of the gentleman's time if he will yield to me for a moment.
Mr. KINDEL. Very well.

Mr. KEATING. As I understand the statement of the gentleman from Wyoming, he was present when the Postmaster General made the statement. Mr. Kindel at that time was in Panama. He has not seen the statement of the Postmaster General. Mr. Mondell heard the statement, and now Mr. Mon-DELL comes to Mr. KINDEL, who did not hear and did not read the statement, and asks Mr. KINDEL to tell him, Mr. MONDELL, what the Postmaster General said at the hearing where Mr. MONDELL was present.

Mr. KINDEL. I do not understand it so. The gentleman heard the statement that I had agreed with Mr. Burleson.

did not agree with him and his committee.

Mr. KEATING. There is no question of the gentleman's position.

Mr. MURDOCK. Mr. Speaker, will the gentleman yield to

The SPEAKER. Does the gentleman from Colorado yield to the gentleman from Kansas?

Mr. KINDEL. Yes.

Mr. MURDOCK. Who constituted this conference of which the gentleman speaks?

Mr. KINDEL. Four \$2,500 clerks, and they control the destiny of the biggest business organization on earth, the United States Post Office.

Mr. MURDOCK. Was not the Postmaster General present, and Mr. Lewis?

Mr. KINDEL. Mr. Lewis was there only once or twice. There were only those four clerks, and only when they had a report to make was Mr. Burleson called in.

Now, to further clear your minds on what I thought of the matter, I will read my letter to Mr. Burleson of June 18, 1913. It is as follows:

JUNE 18, 1913.

Hon. Albert S. Burleson,

Postmaster General, Washington, D. C.

My Dear Mr. Burleson: About four months ago you assumed the duties of the office of Postmaster General. In assuming those duties you were aware that the biggest and most important problem confronting the department had to do with the improvement, extension, and administration of the newly created parcel post.

Hence it is fair for the public to believe, as I am convinced it does believe, that you in accepting your appointment did it with full realization of your duty to the people in improving and extending the parcel post. You were a Member of the House of Representatives when Congress enacted the parcel-post law, placing upon the Post Office Department the responsibility for making the parcel post an efficient and economical instrument for general parcel transportation.

As a citizen of the State of Colorado I am deeply interested in the perfection of the parcel post. All the people of Colorado are deeply and vitally interested in it. As the representative of those people in Congress I have a special and added interest in seeing that my constituents get what they are entitled to have in the way of parcel-post improvements.

Honce as a citizen of the State of Colorado and as the Representative of the State of Colorado and as the Representation.

stituents get what they are entitled to have in the way of parcel-post improvements.

Hence, as a citizen of the State of Colorado, and as the Representative in Congress from the first district of Colorado, I write to ask what you, as the people's servant, to whom has been delegated the task of improving the parcel post, have done toward perfecting the parcel post. Are the people to expect that you will do without delay the work they have delegated to you, rather than play petty politics in the Post Office Department?

I presume you admit that the parcel post as at present in effect

Office Department?

I presume you admit that the parcel post as at present in effect is unscientific, illogical, and in general very far from what it should be. Everybody who knows anything about the matter admits that, and I presume you know it as a matter of common report. Therefore you must know that the department is expected to make some improvements.

ments.
So far as I can learn you propose to make no changes except in what are now the local, first, and second zones. I have learned from the assistants and clerks in your department, to whom you have delegated this important work, that it is proposed to consolidate the local, first, and second zones into a new first zone. In this I understand it is planned to increase the weight limit to 20 pounds and to fix a rate of one-half of 1 cent per pound, plus 5 cents. I understand that the present rates and zones beyond the 150-mile radius are to remain in effect.

I hope that my information is incorrect. But if it is I desire to

the present rates and zones beyond the 150-mile radius are to remain in effect.

I hope that my information is incorrect. But if it is I desire to protest against the brutal butchering of an already deformed agent of the people. In behalf of the people I appeal to you lest you further emasculate the people's parcel post. I beg that you do not burden the Post Office Department by putting into effect grossly unremunerative parcel-post rates within narrow limits, while leaving the rates almost prohibitory beyond these limits. I plead that you do not make the parcel post the tool of the express companies, for making their expensive deliveries in the 150-mile zone at prices far less than they can afford to do the work themselves.

If the changes mentioned above are made, the rate on 20 pounds for 150 miles would be 15 cents. For 160 miles 20 pounds could not be carried by parcel post except in two packages. For two 10-pound packages the rate would be \$1.04. Hence to put the suggested rates into effect without further change in the system would mean an increase of 89 cents in the rate on 20 pounds for crossing an imaginary line.

I hope to see changes made in the parcel-post system at once. But I would like to see improvements made. I can see no reason why alterations should be made with reference only to the local zone. I can not see why the rates in the other zones, which all who know anything about transportation admit are too high, should remain the same. I think you will admit that the present system of zones is not based upon any good reason. But I am unable to see why it should be changed in such a way as to produce a system which will be even more unreasonable.

I have protested to your committee against the ounce rate under the present system. A patron of the parcel post must pay the same rate

for a package weighing 17 ounces as on one weighing 2 pounds. I have proposed that the present ounce rate should apply to all fractions of a pound until the pound rate is reached, when the pound rate should apply.

But I understand from your committee of employees of the department that these ounce rates are to remain unchanged. I understand, also, that you do not contemplate a change in the foolish regulation under which seed, if to be planted, takes one rate, while it takes another and very different rate if it is to be eaten. In fact, I understand that you propose to make no changes except to try the rates suggested in the 150-mile zone, "just to see what will happen."

Where I spoke of the 15-cent rate, that was the first proposition. Now they have raised it to 24 cents.

I demonstrated my position to Mr. Ryan, of the Interstate Commerce Commission, who had a package weighing 41 pounds. Commerce Commission, who had a package weighing 4½ pounds. He said, "Mr. Kindel, here are some of your parcel-post rates." I said to him, "What is it?" He said, "They wanted to charge me 44 cents to take that package to Chevy Chase. It weighs 4½ pounds." I said, "What is in it?" He said, "Grass seed." I said, "You should have said 'birdseed." I took it down to the Post Office Department and entered it, and the clerk said, "This is for Chevy Chase, grass seed?" "No;" I said, "it is birdseed." He said, "I recognize the pass being entered here only a few moments ago." I said "Perbays." ing entered here only a few moments ago." I said, "Perhaps." He put on a 10-cent stamp instead of 44 cents, simply on my saying that it was birdseed, and the American people stand for [Laughter.]

Mr. MANN. Will the gentleman yield?
Mr. KINDEL. Yes, sir.
Mr. MANN. Before the parcel-post law was enacted the same package could have been taken to the post office, and if you said "grass seed" it would have been considerably lower than if you said "bird seed."

Mr. KINDEL. Yes; I will show the reverse of that.
Mr. MANN. That was the case before the parcel-post law Mr. MANN. That was the case before the parcel-post law was enacted. The parcel-post law did not make any change in the rate of postage on third-class matter.

Mr. KINDEL. I will show you how that works. Seed, under section 7 of the post-office act, was 8 cents a pound flat; but, for instance, if you take chestnuts—if they are fresh it is presumed you are going to plant them; if they are roasted they bear another rate, as it is presumed you can do nothing but eat them. If you take them, say, in Denver and ship by a rural route—if they are raw they pay 88 cents for 11 pounds, but if you roast them they are only 15. If you ship to Maine from Denver then it is 88 cents if they are raw and \$1.32 if they are roasted, because they become edible then and subject to the merchandise rate.

Mr. MANN. Does not the gentleman admit changes like that frequently occur? For instance, the gentleman comes to Washington and applies for board; nothing being known he is given one rate. He comes and says he is a Member of Congress and the rate is quadrupled.

Mr. KINDEL. Well, the Government is not presumed to do that kind of a business.

Mr. LOBECK. He is a roasted chestnut. Mr. KINDEL. I said in conclusion:

I am surprised that a \$300,000,000 business of the Government should be run on such a plan. I am surprised that the head of this big business enterprise should turn the work over to his assistants and clerks, while he is engaged largely in playing politics.

I trust you will do me the honor to reply to this letter, as the matter is one in which I and the people of Colorado are vitally interested.

Sincerely, yours,

GEO. J. KINDEL.

These four clerks, not one could run a corner grocery for me, and yet they are the ones who brought about this change in the parcel post that is agreed to by the Interstate Commerce Commission, to the detriment of everybody and to the shame of the Interstate Commerce Commission. Under the proposed rates you can make four shipments and beat the through rate something unheard of in any sort of transportation. I have here drawn a map

Mr. MURDOCK. Will the gentleman on his map show a concrete example of just how the four local rates are less than the through rate?

Mr. KINDEL. Yes. I have taken Chattanooga, the home of our chairman of the Committee on the Post Office and Post Roads, to Washington, D. C. Washington is in the fourth zone from Chattanooga. The through rate would be on 20 pounds \$1.24. In four shipments, at 24 cents each, it is 96 cents. You can save 28 cents by reshipping four times. I never heard of

such a thing. It is a shameful proposition.

Mr. MURDOCK. Mr. Speaker, the gentleman says he never heard of such a proposition. I want to say to the gentleman I think he has.

Mr. KINDEL. Not quite as bad as that. Mr. MURDOCK. I have paid fare from Chicago to Washington by local fare from point to point and come through cheaper from Chicago to Washington than by buying a through

Mr. KINDEL. Well, you may have done so. I can see how that could be. If you go to the Canal Zone and travel on the Government railroad you will probably have to pay 5 cents a mile. If perchance you are a tin soldier or a wooden sailor, or a friend of either, you get a pass. It is the one railroad owned and controlled by the Government which is run in violation of

every principle of transportation and law. Under our parcel-post system, with the amendments proposed by the Postmaster General, the rate on 20 packages, weighing respectively from 1 pound up to 20 pounds each, would be \$2. The combined weight of these packages would be 210 pounds. In the second, or 150-mile, zone the rate would be but 90 cents more, or \$2.90. In the third zone, from 150-to 300 miles, the rate on these 20 packages, or their equivalent, would be \$10.90. Here you have one-fourth the rate for one-half the distance. Here you have one-fourth the large commercial centers to distant job-you can ship from the large commercial centers to distant job-bing centers by express and distribute by parcel post, making the Government perform the expensive delivery work. press companies will certainly make a rider of the post office, to the disadvantage of the parcel post.

I hoped that somebody else would bring this out. There happened to be only three propositions before this committee as to new rates, namely, the Postal Progress League, of New York, had three zones—1 cent per pound for the first zone, 2 cents for the second zone, and 3 cents for the third zone. The third zone was 600 miles. I asked, Why a 3-cent rate from New York to San Francisco on parcel post? The freight rate is \$3.70 per 100 pounds. You would be turning over freight to the post office, and vice versa.

Mr. BATHRICK. Will the gentleman yield for a question?

Mr. KINDEL. Yes.

Mr. BATHRICK. Have the express companies worked out a plan relative to rates from point to point more in relation to each other as to distance than this plan shows?

Mr. KINDEL. Yes. I know of no place where you can re-nip. There used to be, but it is not true to-day that you can reship several times, which means the sum of the locals being less than the through rate.

Mr. BATHRICK. Do you think the large experience of the express companies in working out these rates furnishes a basis upon which we could calculate to better advantage than we have now?

Mr. KINDEL. There is no question about it. I will show

Pounds.	Local zone.	First zone, 50 miles.	Second zone, 50 to 150 miles.	Third zone, 150 to 300 miles.	Fourth zone, 300 to 500 miles.	Fifth zone, 500 to 800 miles.	Sixth zone, 800 to 1,200 miles.	Seventh zone, 1,200 to 1,700 miles.	Eighth zone, 1,700 to 2,300 miles.	Ninth zone, 2,300 miles and over.

GEORGE J. KINDEL'S copyrighted graduate of parcel post rates and zones, which he presents to the people of the United States.

[The system admits of extension to any weight.]

The rate is found by multiplying the pounds by the zone and adding 3, the overhead charge, except in the local zone, where the rate is found by dividing the weight in pounds by 2 and adding 3. Thus the rate on 10 pounds in the local zone is $10 \div 2 = 5 + 3 = 8$. Fractions are disregarded. The rate on 10 pounds to the eighth zone is 10×8=80+3=83. If it is found

necessary to reduce rates, cut off the highest rate zone and spread the remainder.

The following table shows the parcel-post rates as they will be made up after the changes proposed by the Postmaster General become effective. The discrepancies between the rates in the second and third zones should be noted, as well as the discrepancies that would exist on larger weights if they were permitted under the system beyond the second zone:

Pounds.	Local zone.	First zone.	Second zone.	Third zone.	Fourth zone.	Fifth zone.	Sixth zone.	Seventh zone.	Eighth zone.

The SPEAKER. The time of the gentleman has expired. Mr. KEATING. I ask unanimous consent that the gentleman be permitted to conclude his remarks.

Mr. STEPHENS of California. That he have 15 minutes

The SPEAKER. The gentleman from Colorado [Mr. Keat-ING] asks unanimous consent that the gentleman from Colorado [Mr. KINDEL] be permitted to conclude his remarks.

Mr. MANN. I think it would be better to fix some definite time.

Some one suggested 15 minutes. Mr. STEENERSON. Make it half an hour.

Mr. MURDOCK. I ask unanimous consent to modify the request so that the gentleman be permitted to continue for 30 minutes.

The SPEAKER. The gentleman from Kansas [Mr. Mur-DOCK] asks to modify the request of the gentleman from Colorado [Mr. Keating] and that the gentleman from Colorado

[Mr. Kindel] have 30 minutes. Is there objection?

Mr. MANN. Reserving the right to object, may I get the attention of the gentleman from Alabama? Is there any other business coming up before the House this afternoon?

Mr. UNDERWOOD. None that I know of.
Mr. MANN. Would the gentleman be willing to ask unanimous consent now that at the conclusion of the remarks of the gentleman from Colorado the House stand adjourned?

Mr. UNDERWOOD. I will.

Mr. MANN. If we give him 30 minutes?

Mr. UNDERWOOD. If that is satisfactory to the gentleman. Mr. Speaker, I ask unanimous consent that at the end of 30 minutes

Mr. MANN. At the conclusion of the gentleman's remarks. His time might be extended.

Mr. UNDERWOOD. That at the conclusion of the remarks

of the gentleman from Colorado the House stand adjourned.

The SPEAKER. Before the Chair puts that, there are two gentlemen here who asked unanimous consent to print remarks in the RECORD, who got knocked out on objections, and the objectors are now willing to let them in.

Mr. MURDOCK. Mr. Speaker, in that connection I withdraw the objection I made to the extension of the remarks of the gentleman from New York [Mr. Levy].

The SPEAKER. Is there objection to the gentleman from

New York [Mr. LEVY] extending his remarks?

Mr. MANN. Reserving the right to object, Mr. Speaker, I have no objection to the gentleman from New York extending his remarks upon the currency question, but I do not wish the gentleman from New York, or any other gentleman presenting a request for unanimous consent, to have that request objected to and then get leave to extend, and inject a long speech at that place in the RECORD, as though it were made to the House at that time.

The SPEAKER. All these "leave-to-print" speeches ought

to be printed at the end of the RECORD. There has been an agreement of that kind. The Chair will ask that all these

leave-to-print speeches be printed at the end of the RECORD. Is there objection?

There was no objection.

The SPEAKER, The gentleman from Washington [Mr. BRYAN] asks unanimous consent to extend his remarks in the RECORD, and the gentleman from Nebraska [Mr. LOBECK], who objected, withdraws his objection. Is there objection?

There was no obection.

The SPEAKER. Is there objection to the request of the gentleman from Alabama [Mr. UNDERWOOD] that when the gentleman from Colorado [Mr. KINDEL] concludes his remarks the House shall stand adjourned?

There was no objection.

Mr. BATHRICK. Did I understand the gentleman rightly, that he was going to give us an example of express company rates, showing a better relation from point to point, in the

matter of distance and rates?

Mr. KINDEL. I will say that the Interstate Commerce Commission only yesterday published a rate book based on zones. I have not had the time to study it. I believe it will take a Philadelphia lawyer to understand it. It is a book an inch and a half thick. The most surprising thing to me is its complication. Parcel post or any transportation scheme ought to be simple as well as efficient.

Mr. MURDOCK. Has the gentleman seen the report of the

Interstate Commerce Commission?

Mr. KINDEL. Yes.
Mr. MURDOCK. I understand it is a block system.
Mr. KINDEL. It is.
Mr. MURDOCK. As I understand, that is the gentleman's system in a way.

Mr. KINDEL. No; I have got the zone system applied by

multiplication.

Mr. MURDOCK. I would like to hear the gentleman's plan, because I thought the Interstate Commerce Commission had

adopted the plan of the gentleman.

Mr. KINDEL. Well, say the gentleman lives in the sixth zone from here. He wants to ship 10 pounds. Under my system the rate is calculated thus: Ten times 6 plus 3, which would be 63 cents for the rate. Two pounds would be 2 times 6, 12, plus 3, 15. You say why add 3? Because in the hearing before the committee it was determined that 3 cents was the overhead charge, and therefore in the sixth zone you multiply the zone by the pound and add 3 for the rate. I would like to see something like that adopted.

Mr. MURDOCK. You include the zone in the multiplication

in order to add the question of the factor of distance?

Mr. KINDEL. Yes.
Mr. MURDOCK. If I understand, you take the weight, the distance, and multiply them together and add 3 cents for over-

head charges?

Mr. KINDEL. Yes; and if 3 cents is not sufficient for overhead charges you can add 5, but you will always have an automatic rate. If Congress should decide that the rates were too high, all you would have to do would be to cut out the last

zone and spread the remaining zones.

Mr. BATHRICK. Is not there another element besides weight and distance, namely, that of size? Is that taken into

ronsideration in your plan?

Mr. KINDEL. That is a matter of regulation. They have Increased the weight from 11 to 20 pounds, and there is no provision for increasing the size. That is another thing that I find fault with.

Mr. ANDERSON. Has the gentleman made an investigation looking to determining whether the rates published are suffi-

cient under the present mail contract?

Mr. KINDEL. If the gentleman means the new rates published by the Postmaster General for the first and second zones, I am convinced that they will result in loss to the Government.

Mr. ANDERSON. If the gentleman has time, I would like

to have him make a demonstration on that proposition.

Mr. KINDEL. I will say that I challenge any man to tell me what is the exact cost of transportation. You may guess at it, and the best guess is about 8 cents a pound on the average package in distance. Coming up from Panama I discovered that we could ship-in fact, I had shipped to me a package, and the rate was 12 cents a pound. It did not reach me in time and had to be sent back, and coming back it was 16 cents a pound. The idea of an American possession being denied a parcel post, a possession consisting of five or six thousand people. They pay 16 cents a pound to points between. Mr. Burleson puts in a rate of 150 miles for 24 cents, and they pay for parcel post between stations 16 cents a pound, or 20 pounds would be \$3.20, where we pay 24 cents under the new order.

Mr. STEENERSON. But we are not in control of the postal

service in Panama.

Mr. KINDEL. It is not under the control of Panama. can ship parcels up here. Every Republic as far as Cape Horn can ship to the United States for 12 cents a pound, except the Canal Zone; if it is in Panama you can ship for 12 cents, but in Ancon and Cristobal you pay 16. They tell me the reason was that the steamship and railroad company owned by the United States would not carry it at the same rate as foreign ships. They charge 40 cents per pound for letters and 8 cents for parcels, while foreign ships charge 35 and 4. The Canal Zone people have no representative, and it is our business to see that they are put on a plane with the rest of us. I have taken the matter up with the President, but I have not heard from it.

Mr. MANN. Will the gentleman yield?

Mr. KINDEL. Certainly.
Mr. MANN. The gentleman knows that that is wholly within the control of the President of the United States.

Mr. KINDEL. Yes; and that is the reason I took it up with

the President, but he has not answered me. Mr. MANN. Probably he is relying on the officials of the Canal Zone. The gentleman knows that it was found advisable

to keep the postal service in the Canal Zone separate from that of the United States for many good reasons.

Mr. KINDEL. I do not know what the reasons were. Mr. MANN. It would take the whole of the gentleman's

half hour to enumerate them. Mr. KINDEL. The citizens of the zone are complaining that

they are not allowed the privileges that we enjoy in the United States.

The Canal Zone post office puts its money in the Riggs Bank, in Washington, and gets 3 per cent; but the citizens down there are not getting any interest on their money while deposited in the postal savings bank.

Mr. MANN. But they are getting one and one-half times the

pay that they could get here.

Mr. HARDY. Mr. Speaker, will the gentleman yield?

Mr. KINDEL. Yes.

Mr. HARDY. I will ask the gentleman to give us the benefit of a discussion of his plan. We want his plan, rather than these little details.

Mr. KINDEL. I shall seek leave to insert my plan in the RECORD, a table which Members can read at their leisure. Gentlemen may ask me any question, and I shall be glad to answer, so far as I can. By the plan which I propose you may determine the rate easily, having the weight of the package and the points between which it is to be shipped, without consulting the table.

Mr. STEENERSON. Mr. Speaker, I would like to ask the gentleman to explain what his proposed rates are, so that we can understand them. I have not yet understood the gen-

tleman.

Mr. KINDEL. I am taking the Postmaster General's rates on the local zone and on the first zone, but I have leveled them out, so as to make them reasonable and fair. What is the basis of the gentleman's Mr. STEENERSON.

calculations?

Mr. KINDEL. I told you I multiplied the pounds by the zone and add 3. On the average the rate is one-sixth less than the present rates. For instance, you want 20 pounds; you want to ship a package from here to San Francisco or Salt Lake. It is the eighth zone. Multiply twenty by eight. This gives \$1.60; then add 3, overhead charge, and you have \$1.63, which would be the rate.

Mr. HARDY. The gentleman's proposition is 1 cent per zone

per pound?

Mr. KINDEL.

Mr. STEENERSON. One cent per zone per pound?

Mr. KINDEL. Yes, sir; and 3 cents in addition.

Mr. BATHRICK. For the overhead rate?

Yes. Mr. KINDEL.

Mr. STEENERSON. That would be 11 cents a pound for the

Mr. KINDEL. Yes; 11 cents for the first pound, but it would be 8 cents for every other pound added to it. The second would be 19 cents; the third would be 27 cents.

Mr. BATHRICK. How does the gentleman's rate compare with the rate in force now?

Mr. KINDEL. One-sixth less on the average.

Mr. BARTON. Applying that to the present business done by the parcel post, may I inquire what would be the net result? How would they compare as to the receipts from that departMr. KINDEL. It would make a very profitable and en-

couraging business.

Mr. BARTON. Would the receipts be as great under the

gentleman's plan as at present?

Mr. KINDEL. They would be greater. At present the rate is prohibitive. Under the parcel post the express companies get the fat, and we get the lean.

The SPEAKER. The Chair will admonish Members to refrain from interrupting the gentleman without first addressing

the Chair.

Mr. KEATING. Mr. Speaker, will the gentleman yield?

The SPEAKER. Does the gentleman from Colorado yield to his colleague?

Mr. KINDEL. With pleasure. Mr. KEATING. Suppose we take as an illustration a 20pound package. Could my colleague give us the rate under his rule to carry that package from Washington to Baltimore, and from Washington to Pittsburgh, and then give us the rate on that package under Mr. Burleson's arrangement? I see that gentlemen around me are anxious to see how that would work out.

Mr. KINDEL. I have given you a concrete example here Chattanooga with Washington. The through rate is \$1.22. The Burleson rate would make it 96 cents, or a saving of 26 cents by reason of having the package shipped four times between Chattanooga and Washington.

Mr. STEENERSON. Is that 20 pounds? Mr. COOPER. Yes; is that 20 pounds? Mr. BARTON. Yes.

Mr. KINDEL. It would be 83 cents on a through rate by my system, as against \$1.22 by the present system.

Mr. STEPHENS of California. Mr. Speaker, will the gentleman tell me, please, what is the radius of his first zone?

Mr. KINDEL. I have taken exactly what they have adopted, the local zone, the 50-mile zone and the 150-mile zone.

Mr. STEPHENS of California. The first zone radius is 50 miles?

Mr. KINDEL. Yes; the first zone.

Mr. STEPHENS of California. What is the gentleman's rate for that zone on 10 pounds?

On 10 pounds, in the first zone, 13 cents. Mr. STEPHENS of California. Supposing San Francisco is in the ninth zone, what would be the charge from the first to

Mr. KINDEL. Ninety-three cents.

Mr. STEPHENS of California. That would be nine times the weight plus 3 cents.

Mr. KINDEL. Nine times the number of pounds plus three. Mr. COX. How does the gentleman arrive at the fact that from the data which he has given the House now it will be self-sustaining? In other words, how does the gentleman arrive at the fact that this material reduction in the rate would not bring about a deficit in the Postal Department?

Mr. KINDEL. I am glad the gentleman asked the question. I will send the gentleman a copy of this, making a comparison of the pound rate, the 10-pound, and the hundred-pound—a comparison of the freight and express rate. Now, if the gentleman wants to ask what he desires, I will tell him.

The query I propounded to the gentleman, if I made myself plain, is this: The gentleman has worked out some very interesting figures here, but if put into actual practice will it make the Post Office Department, so far as the parcel post is concerned, self-sustaining or bring about a postal deficit?

Mr. KINDEL. It will make it self-sustaining.

Mr. COX. Now, on what figures does the gentleman base his calculation to make the statement of fact that it would be self-

Mr. KINDEL. On a comparison of the express rates, which we now know are too high.

Mr. COX. Can the gentleman enlighten the House on the subject? I have not looked the question up as to whether or not the parcel-post rate now in effect is yielding a profit to the Government.

Mr. KINDEL. We all assume it is.

Mr. COX. But does the gentleman know whether that is true or not?

Mr. KINDEL. I do not know of anybody who does know. Mr. COX. I have observed the press of the country makes that statement as being true; but is the press correct?

Mr. KINDEL. I think the press makes many mistakes. They made a mistake the other day in criticizing Senator BRYAN.

Mr. COX. I quite agree with the gentleman on that. If I understand the gentleman when he makes that statement—that

his figures would not bring about a postal deficit—he makes it based upon facts concerning express rates, freight rates, and so

Mr. KINDEL. Yes, sir. I take the freight rate first on the hundred pounds, then the express rate, and then the parcel post. Take the rate from New York, for instance, to Omaha. The freight rate per 100 pounds is \$1.43. The express rate is \$3.90. The parcel post, under my system, would be \$6.03.

Mr. STEENERSON. Will the gentleman yield?

Mr. KINDEL. Yes.

Mr. STEENERSON. The gentleman has not figured the amount that the Government pays for the transportation. It seems to me he would have to know what rate the Government pays before he can tell whether it is self-sustaining or not.

Mr. KINDEL. Well, I stated at the outset, I take that from

the hearings as being 8 cents per ton-mile.

Mr. STEENERSON. The gentleman ought to know that the amount paid by the Government depends upon the contracts, upon the weight of mail, and the distance.

Mr. KINDEL. Yes.

Mr. STEENERSON. That is a very much larger sum for transportation to the farthest zone than to the first zone.

Mr. KINDEL. Yes.

Mr. STEENERSON. And consequently it would be impossible to offer any figures now to determine whether these rates would be self-sustaining or not.

Mr. KINDEL. Well, I think they are. The express companies are making money, and this will nearly double what the express companies are getting.

Mr. STEENERSON. Maybe they pay less than the Govern-

ment pays.

Mr. KINDEL. Perhaps.

Mr. STEENERSON. Now, does the gentleman favor the present zone or does he favor a restricted or larger zone?

Mr. KINDEL. I would increase the zones to nine.

Mr. STEENERSON. I am asking the gentleman what he favors as the ideal plan?

Mr. KINDEL. I would favor a higher rate for the second zone than that proposed by the Postmaster General until we are quite sure that it is a lucrative business for the Government.

Mr. STEENERSON. I mean as to zones.

Mr. KINDEL. I have already said I favor nine zones.

Mr. STEENERSON. How many zones does the gentleman

think would be an ideal system?

Mr. KINDEL. Nine instead of eight. To-day you have eight zones, and you stop at Salt Lake. From Augusta, Me., to Denver it is eight zones, and then it is a flat rate. I would either make it all flat or all zones.

Mr. STEENERSON. The maximum rate on the zones, with

cents added, would be 12 cents.

Mr. KINDEL. Twelve cents for the first pound and 9 cents thereafter.

Mr. BARTON. What weight limit do you advocate? Mr. KINDEL. Starting in with 25 pounds instead of 20;

but they did not have the scales to do that.

Mr. BARTON. You advocate 25?

Mr. KINDEL. Yes; and as soon as I could I would increase it up to 100 pounds; but I do not want to knock out the Post Office Department. They are not prepared to handle the business as yet. It will come in time.

Another way to test that is to take the nine zones and divide them into three, and then compare the freight, express, and

parcel post and see how you come out.

I have done a great deal of thinking about this. since last March I have done scarcely anything else. Talk about your zones! I will tell you what it means to take an ounce and a pound from here to Salt Lake. A pound from here to Salt Lake is 12 cents and an ounce is 1 cent. Now, if you compare a pound to a cat and an ounce to a kitten, I ask you what is the rate on a cat and on a kitten? You would naturally expect that the mother and the kitten would travel together. Under that you would pay a penalty, because the cat would pay 12 cents and the kitten would pay 1 cent if separate, but together the cat and the kitten make a fraction over a pound, and it is 24 cents. Now, having established that, I would ask you what would be the rate on 10 cats weighing a pound each and on 16 kittens weighing an ounce each? Of course you would dispose of the 10 cats at once by saying ten times 12 are \$1.20. But what about the kittens? If you get the whole 16 in one box weighing a pound they will go for another 12 cents, but if you chance to put 1 kitten with each cat, then you would pay \$2.40 instead of \$1.20, and you would still have 6 kittens left over. How are you going to ship them? If you ship them each in a separate box they will be 6 cents. If you ship five in one box it will be 12 cents, because

that is a fraction over 4 ounces, which makes another pound. Talk about mathematicians! How the scientists in Washington could devise a thing like that I can not understand

Mr. COX. What would the gentleman think of a proposition to turn over the whole question of weights and rates to the Postmaster General?

Mr. KINDEL. Not with this Postmaster General. I have tried to talk with him, and he does not understand the first thing about it. He is absolutely ignorant on this subject. He may know about everything else, but he does not know about this. He is dependent on those four clerks.

Now, further, I saw the gentleman from Georgia [Mr. Adamson], chairman of the Interstate Commerce Committee, and begged him to intercede. I said, "They are going to put this through if you do not look out." He said, "I do not take any stock in this. I have got to turn it over to Mr. Moon, chairman of the Committee on the Post Office and Post Roads.'

I saw the gentleman from Tennessee [Mr. Moon], and he listened to me attentively. As a result he wrote the following letter to Mr. Burleson:

JULY 3, 1913.

Hon. A. S. Burleson, Postmaster General, Washington, D. C.

Hon. A. S. Burleson,

Postmaster General, Washington, D. C.

My Dear Sir: Mr. Kindel, of Colorado, is insisting that the proposed change in zone rates under the parcel-post law will work a very great detriment to the Government. This bill, as you know, was put through as a compromise in order to get the system started. It is intensely crude. We appointed at the same time a parcel-post commission in the House and Senate, whose duty it is to make a thorough investigation and report to the next Congress as to what changes should be made in the law covering rates, zones, and so on. He (Mr. K.) tells me that he has filed a statement with you and the Interstate Commerce Commission, to which reference is made. I have gone over some of the figures with him to-day, and am inclined to think that he is right about the inadvisability of some of the changes.

I, of course, do not want to interfere in any way with what the department may want to do, or the Interstate Commerce Commission, as to what they want to do, or the Interstate Commerce Commission, as to what they want to do, under the authority invested in them under the act. But I am also inclined to think that it would be wise to wait upon the report of the commission and the action of the committee on that report before anything is done. It is evident that the committee in the Post Office Department investigating the matter has not a very full comprehension of the act or the changes that may be desired. They may know more about it than I do, but I feel it is a matter upon which we ought to have some very thorough investigation by the legislative commission and the department in conjunction. Perhaps it would be a good idea to wait until the next session before anything is done, as there is danger of much loss to the Government by too hasty action in this matter. I fear that some of the changes proposed will result in giving the paying business to the Government, by reason of the power now existing for reshipment, or rather remalling, from different zones between the

Chairman Committee on the Post Office and Post Roads, House of Representatives.

This was on July 3. I also saw Mr. Clark, of the Interstate Commerce Commission, several times, begging him to consider the matter well; told him they would be in conflict with every rule and order that they had made heretofore. On July 1 I wrote him this letter:

WASHINGTON, D. C., July 1, 1913. EDGAR E. CLARK, Chairman Interstate Commerce Commission, Washington, D. C.

Washington, D. C.

My Dear Mr. Clark: At the suggestion of Commissioner Marble, with whom I discussed briefly, Monday, the suggestions submitted by the Post Office Department for the alteration of the parcel-post regulations, zones, and rates, I am writing to set forth my objections to these suggestions and to petition the commission, on behalf of the people I represent, that these unscientific, unrelated, and illogical alterations be not made.

It is my understand.

not made.

It is my understanding that Postmaster General Burieson has proposed consolidating the local, first, and second zones into a new first zone, with a radius of 150 miles; that he proposes to increase the weight limit to 20 pounds within this zone and to make the rates one-half of 1 cent per pound plus 5 cents; that he proposes to leave the remaining six zones unchanged and the rates in these six zones likewise unchanged; that, in fact, so far as I can learn, he proposes no changes except those mentioned above—in the local, first, and second zones.

I have urged repeatedly that extensive changes be made in the parcelpost system, and I do not want to hinder in any way alterations which will improve the system and make it a more general instrument for the use of the public in the distribution and delivery of parcels. But I am opposed to these unrelated changes, because I think they will discredit the parcel post and the Democratic Party and will serve only to postpone the day when the parcel post shall be the economical transportation medium it is destined to become.

Under the plan suggested by the Postmaster General the rate on 20 pounds in the 150-mile radius would be 15 cents. There can be no doubt that the existing rates are too high; but there is no warrant for reducing them so radically as the Post Office Department has suggested, while leaving the rates for longer distances unchanged.

The present rate on a 10-pound package in the second zone, from 50 to 150 miles, is 42 cents. On 20 pounds, which could be mailed only in two packages, the rate is 84 cents. It is proposed to cut this rate

to 15 cents, or to make it only 1 cent more than one-sixth the present

to 15 cents, or to make it only 1 cent more than one-sixth the present rate.

It rates for longer distances than 150 miles are to remain unless. Then, in the are all the sent present 150 and 250 miles, the rate on 20 pounds, which could need be seen 150 and 250 miles, the rate on 20 pounds, which could need be seen 150 and 250 miles, the rate on 20 pounds, which could need be seen 150 and 250 miles, the rate on 20 pounds, which could need be seen 150 and 250 miles, the rate on 20 pounds, which could need the seen 150 and 250 miles from the point plag 20 pounds across an imaginary line only 150 miles from the point being forced to put up his shipment in two packages to get it across this imaginary line at all by parcel post.

In my opinion the express companies would be able to use the parcel delivery work in small pockages, while they will deprive the Government of all the long-haul business, on which it might make a profit sufficient to meet the defelt that it will undoubtedly face through a sufficient to meet the defelt that it will undoubtedly face through a sufficient to meet the defelt that it will undoubtedly face through a sufficient to meet the defelt that it will undoubtedly face through a sufficient to meet the defelt that it will undoubtedly face through a sufficient of the su

The SPEAKER. The time of the gentleman from Colorado has expired.

Mr. KINDEL. Mr. Speaker, I ask unanimous consent to ex-

tend my remarks in the Record.

The SPEAKER. The gentleman from Colorado asks unanimous consent to extend his remarks in the Record. Is there objection?

There was no objection.

Mr. KINDEL. The Postmaster General and the Interstate Commerce Commission proceeded very quietly and with as little publicity as possible toward making the important changes that have been made in the parcel-post system. To illustrate the difficulty I had in finding out what they were doing, and to show the manner in which they proceeded, I desire to insert the following letter, which I received from Commissioner Harlan, of the Interstate Commerce Commission:

INTERSTATE COMMERCE COMMISSION,
CHAMBERS OF JAMES S. HARLAN, COMMISSIONER,
Washington, July 1, 1913.

Hon. George J. Kindel, House of Representatives.

House of Representatives.

Dear Mr. Kindel: Following up our brief conference this morning. I requested the Post Office Department to furnish you with a copy of their communication to the commission, and I understood that they would do this at once.

For reasons that have seemed entirely satisfactory to us the commission will make no public announcement either with respect to what the Post Office Department proposes or with respect to our conclusions thereon. This will be done in due course by the Post Office Department. I must request you therefore to pursue the same course, and that you make no public expression respecting the letter that I have asked the Post Office Department to send to you or respecting your comments to us until the Post Office Department has made its announcement. It is important that you let us have your suggestions the first thing in the morning.

Sincerely, yours,

Jas. S. Harlan, Commissioner.

On the same day I received the following letter from the Postmaster General, transmitting to me a copy of the changes proposed, which I had not before been able to obtain. It will be noted that I was cautioned to be very secretive regarding the proposal-to say nothing about it to anybody, and to return it to the department.

OFFICE OF THE POSTMASTER GENERAL, Washington, D. C., July 1, 1913.

Hon. George J. Kindel.

House of Representatives.

My Dear Mr. Kindel. Referring to a request which you have made on the Interstate Commerce Commission for a copy of the memoranda which I furnished the commission in connection with the proposed changes in zones and rates in the parcel-post system, I am handing you herewith copy of the report of the parcel-post committee, bearing the date of June 17, and a copy of my letter and recommendations based upon this report, addressed to the Interstate Commerce Commission, under date of June 26.

These data are given to you with the understanding that they are to be used by you only, and to be returned to this department when they shall have served your purpose.

Very sincerely,

A. S. Burleson.

Postmaster General.

A. S. BURLESON.

Postmaster General.

Later, while I was in Panama, the following letter was sent me by Chairman Clark, of the Interstate Commerce Commission, in answer to the letter I had written the commission protesting against the changes in rates proposed by the Postmaster General:

INTERSTATE COMMERCE COMMISSION, Washington, July 9, 1913.

Hon. Geo. J. Kindel,

Honse of Representatives, Washington.

Dear Sir: Your letter of the 1st instant, relative to certain changes in the parcel-post regulations proposed by the Postmaster General, has been considered by the commission.

We realize that inconsistencies, perhaps, exist in the system, but we realize also that the whole matter is experimental. We have gone into this matter rather exhaustively, have ascertained quite fully the reasons which prompted these proposed changes on part of the Post Office Department and the purposes aimed at, and lnasmuch as the commission is satisfied that the changes are primarily for the purpose of removing restrictions which prevent the mailability of desirable articles and for the purpose of giving the public a more liberal and better service, the commission feels that it should not hamper the efforts of the Post Office Department by withholding consent to the changes, which, like all the rest of the regulations, are largely experimental in their nature, and which can be again changed later if experience shall demonstrate that that is desirable.

Yours, truly,

E. E. Clark, Chairman.

E. E. CLARK, Chairman

I challenge the statement of Commissioner Clark to the effect that the commission made any very exhaustive investigation into the results of the changes proposed by the Postmaster I made an effort to be heard on the subject, but was told that there would be no hearings. I was permitted to file a brief, which I have read in the course of my remarks. I wrote that letter on July 1. The records in the office of the Interstate Commerce Commission show that the order of the Postmaster General was approved by the commission June 26, four days before I was given permission to file my brief protesting against the order. It was signed by all the commissioners except Commissioner Meyer.

I looked over all the papers in connection with the case in the office of the commission. I saw no letters or comments there except those furnished by myself, a letter from Congress-man Moon, which I have read, and a few other pieces of documentary evidence, which had apparently been filed and never

disturbed afterwards.

ADJOURNMENT.

The SPEAKER. Under the previous order of the House, the House will now adjourn.

Accordingly (at 1 o'clock and 57 minutes p. m.) the House, under its previous order, adjourned until Friday, August 8, 1913, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting a communication from the Acting Secretary of War submitting an estimate of appropriation for replacing military stores, supplies, and equipment lost by the National Guard in Ohio during the recent floods (H. Doc. No. 172); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting a letter from members of the commission created for the purpose of investigating and reporting to Congress a suitable design for a memorial bridge across the Potomac, submitting an estimate of appropriation to enable the work to be started (H. Doc. No. 173); to the Committee on Appropriations and ordered to be printed.

3. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Clearwater Harbor and Big Pass, Fla., with a view to securing a channel with a suitable depth and width from the Gulf of Mexico to a point at or near the town of Clearwater, Fla. (H. Doc. No. 174): to the Committee on Rivers and Harbors and ordered to be printed with illustration.

4. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report on preliminary examination of Pensauken Creek, N. J. (H. Doc. No. 175); to the Committee on Rivers and Harbors and ordered to be printed.

5. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report of preliminary examination and survey of Lake Ponchartrain, La., with a view to removal of the middle ground between the Rigolets and north draw of New Orleans & Northwestern Railroad bridge (H. Doc. No. 176); to the Committee on River and Harbors and ordered to be printed with illustration.

6. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report of preliminary examination of Fox Creek, Dorchester County, Md. (H. Doc. No. 177); to the Committee on Rivers and Harbors and ordered to

be printed with illustration.

7. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of inland waterway between Mc-Clellanville and Winyah Bay, and between Charleston and McClellanville, by way of Alligator Creek and Sewee Bay, S. C. (H. Doc. No. 178); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

8. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report of preliminary examination of Blackwater River, Va., with a view to removal of shoal at its mouth (H. Doc. No. 179); to the Committee on

Rivers and Harbors and ordered to be printed.

9. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report of preliminary examination of Wabash River at Maunie, Ill. (H. Doc. No. 180); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

10. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report of preliminary examination and survey of Manhasset Harbor, N. Y. (H. Doc. No. 181); to the Committee on Rivers and Harbors and

ordered to be printed with illustrations.

11. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report of preliminary examination of Hunting Field Creek, Md. (H. Doc. No. 182); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. RAKER, from the Committee on the Public Lands, to which was referred the bill (H. R. 7207) granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes, reported the same without amendment, accompanied by a report (No. 41), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. DENT, from the Committee on Military Affairs, to which was referred the joint resolution (S. J. Res. 52) to authorize the appointment of Thomas Green Peyton as a cadet in the United States Military Academy, reported the same with amendment, accompanied by a report (No. 42), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on the Library was discharged from the consideration of the bill (H. R. 7282) for the relief of the estate of Samuel Very, jr., and the same was referred to the Committee on Claims.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. LINTHICUM: A bill (H. R. 7288) to provide for repairing the U. S. frigate Constellation and stationing her at Baltimore, Md., and for other purposes; to the Committee on Naval

By Mr. LEVY: A bill (H. R. 7289) to amend an act entitled "An act to amend the national banking laws," approved May 30, 1908, by admitting State banks to its provisions; by repealing the prohibitory tax on the circulation of national currency associations, and by providing that the member banks thereof may assume the functions of clearing houses and have the benefits of loan certificates; to the Committee on Banking and Currency.

Also, a bill (H. R. 7290) to amend and extend an act entitled "An act to amend the national banking laws," approved May 30, 1908, by admitting State banks to its benefits, increasing the powers of national currency associations to perform the functions of clearing houses, including issuance of loan certificates, repealing the prohibitory tax on their note issues, providing a continuous market for 2 per cent bonds, and establishing an elastic bank currency on a gold basis; to the Committee on

Banking and Currency.

By Mr. CARTER: A bill (H. R. 7291) to amend article 103 of the Rules and Articles of War; to the Committee on Military Affairs

By Mr. ADAMSON: A bill (H. R. 7292) to provide for the admission of the male employees of the executive departments and independent bureaus of the Government in Washington who may contract tuberculosis while so employed to the United States Public Health Sanatorium for Tuberculosis at Fort Stanton, N. Mex., not exceeding 25 in number to be under treatment at one time; to the Committee on Interstate and Foreign Commerce.

By Mr. BROCKSON: A bill (H. R. 7293) to establish a customs collection district and ports of entry in the State of Delaware; to the Committee on Ways and Means.

By Mr. HULINGS: A bill (H. R. 7294) to enable the Interstate Commerce Commission to investigate appliances or systems to promote the safety of railway operations, and making appropriation for the same; to the Committee on Appropria-

By Mr. BURKE of South Dakota: A bill (H. R. 7290) granting a condemned cannon to the city of Miller, S. Dak.; to the Committee on Military Affairs.

By Mr. STEPHENS of Texas: A bill (H. R. 7296) regulating the expenditure of Indian funds for support of sectarian schools

or religious institutions; to the Committee on Indian Affairs.

By Mr. MONDELL: A bill (H. R. 7297) granting a right of way over certain public lands and reservations to the city and county of San Francisco for the purposes of a water supply

and power development; to the Committee on the Public Lands.
By Mr. BROCKSON: A bill (H. R. 7298) to increase the limit
of cost of the public building at Smyrna, Del.; to the Committee on Public Buildings and Grounds.

By Mr. TREADWAY: A bill (H. R. 7299) to provide for a
site and public building at Great Barrington, Mass.; to the

Committee on Public Buildings and Grounds.

By Mr. KENT: A bill (H. R. 7300) to authorize the establishment of free public schools upon United States military reservations; to the Committee on Military Affairs.

By Mr. CONRY: A bill (H. R. 7301) authorizing the Secretary of the Navy to offer rewards for information or evidence

of violations of the antitrust act; to the Committee on Naval Affairs.

By Mr. LINTHICUM: A bill (H. R. 7302) to place the supervision and control of Fort McHenry and the grounds connected therewith under the city of Baltimore, and making certain provisions in connection with the said transfer; to the Committee on Military Affairs.

By Mr. EVANS; A bill (H. R. 7303) authorizing the Court

of Claims to hear and consider all claims of certain tribes or nations of Indians in the State of Montana; to the Committee on Indian Affairs.

Also, a bill (H. R. 7304) for the relief of certain nations or tribes of Indians in Montana; to the Committee on Indian Affairs.

By Mr. LINTHICUM: A bill (H. R. 7305) providing for the appropriation of a sum of money for the erection at Fort Mc-Henry of a monument and flagstaff to Francis Scott Key, and a memorial hall to the defenders of the Nation in the War of 1812, and the erection of a monument upon the North Point battle field, and for the necessary alterations in the buildings and grounds in connection therewith; to the Committee on the Library.

By Mr. LEVY: Resolution (H. Res. 220) directing the Secretary of the Treasury to furnish the House with a copy of the transfer list of registered 2 per cent bonds by national banks

since July 1, 1913; to the Committee on Ways and Means.

By Mr. GOODWIN of Arkansas: Resolution (H. Res. 221) to print decisions of the Supreme Court of the United States in the Arkansas, Oregon, West Virginia, Missouri, and Minnesota rate cases; to the Committee on Printing.

By Mr. BRITTEN: Resolution (H. Res. 222) directing the Committee on Naval Affairs to report a bill at the earliest practicable date providing for an emergency appropriation sufficiently large to begin the immediate construction of three additional battleships of the dreadnought type; to the Committee on Naval Affairs.

By Mr. STEPHENS of Texas: Joint resolution (H. J. Res. 115) extending belligerent rights to the contending factions in the Republic of Mexico and declaring for a policy of neutrality;

to the Committee on Foreign Affairs. By Mr. HOBSON: Joint resolution (H. J. Res. 116) authorizing the Secretary of the Treasury to furnish certain information to Congress; to the Committee on Interstate and Foreign Commerce.

Also, joint resolution (H. J. Res. 117) proposing an amendment to the Constitution prohibiting the sale, manufacture for sale, and importation for sale of beverages or foods containing alcohol; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions

were introduced and severally referred as follows:

By Mr. ADAIR: A bill (H. R. 7306) granting an increase of pension to Lorenzo D. Crawley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7307) granting an increase of pension to Thomas J. Chilton; to the Committee on Invalid Pensions. By Mr. ANDERSON: A bill (H. R. 7308) granting an in-

crease of pension to Mary Fowler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7309) granting an increase of pension to George H. Suits; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7310) granting a pension to Isabel Arneson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7311) granting a pension to Melissa J.

Gross; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7312) granting a pension to Minnie A. Thornhill; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7313) granting a pension to Bridget Thomas: to the Committee on Invalid Pensions.

Also, a bill (H. R. 7314) granting a pension to Hattie Rey-

nolds; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7315) granting a pension to Eli J. Bertrand; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7316) for the relief of Peter J. Schwarg;

to the Committee on Claims.

Also, a bill (H. R. 7317) for the relief of F. W. Tyler; to the

Committee on Claims.

Also, a bill (H. R. 7318) for the relief of Benjamin F. Dayton; to the Committee on Military Affairs.

By Mr. BROWN of West Virginia: A bill (H. R. 7319) granting a pension to Anna B. McCoy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7320) for the relief of Adolph Kogelschatz;

to the Committee on War Claims.

By Mr. CLARK of Missouri: A bill (H. R. 7321) for the relief of the treasurer of State Hospital No. 1, at Fulton, Mo.; to the Committee on War Claims.

By Mr. CONRY: A bill (H. R. 7322) granting a pension to Michael Collins; to the Committee on Invalid Pensions.

By Mr. DENT: A bill (H. R. 7323) granting a pension to Martha Rebecca Young; to the Committee on Pensions.

By Mr. DICKINSON; A bill (H. R. 7324) granting a pension to Jacob Buzan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7325) granting a pension to James M. Pickett; to the Committee on Invalid Pensions.

By Mr. FERGUSSON: A bill (H. R. 7326) granting a pension to Joseph F. Fike: to the Committee on Pensions.

Also, a bill (H. R. 7327) for the relief of Charles L. Hill; to the Committee on the Public Lands.

Also, a bill (H. R. 7328) for the relief of W. A. Walker; to the Committee on Claims.

Also, a bill (H. R. 7329) authorizing the Secretary of War to award the congressional medal of honor to Second Lieut. Etienne de P. Bujac; to the Committee on Military Affairs

By Mr. FORDNEY: A bill (H. R. 7330) granting a pension to Ira A. Huntley; to the Committee on Pensions.

By Mr. HULINGS: A bill (H. R. 7531) authorizing the Commissioner of Internal Revenue to redeem and pay to Nathan Rosenblum the value of certain revenue stamps destroyed; to the Committee on Claims.

By Mr. KINKAID of Nebraska: A bill (H. R. 7332) granting an increase of pension to William Brown; to the Committee on Invalid Pensions.

By Mr. LAFFERTY: A bill (H. R. 7333) granting a pension to Sue S. Rabb; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7334) for the relief of Charles Leon; to the Committee on Claims.

Also, a bill (H. R. 7335) for the relief of Oliver Steele; to the Committee on Claims.

By Mr. O'HAIR: A bill (H. R. 7336) granting a pension to Elisha Buckner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7337) granting an increase of pension to

James H. Moreland; to the Committee on Invalid Pensions. Also, a bill (H. R. 7338) granting an increase of pension to

James Claypool; to the Committee on Invalid Pensions. Also, a bill (H. R. 7339) granting an increase of pension to

Luther Jenkins; to the Committee on Invalid Pensions,
Also, a bill (H. R. 7340) granting an increase of pension to

John W. Bayne; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7341) granting a pension to Mary A. Vaughn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7342) removing the disability of a charge of desertion in the case of William Martin; to the Committee on Military Affairs.

By Mr. PAYNE: A bill (H. R. 7343) granting an increase of pension to John W. Whitbeck; to the Committee on Invalid Pensions.

By Mr. POST: A bill (H. R. 7344) granting an increase of pension to Wesley W. Gooley; to the Committee on Invalid Pensions.

By Mr. PROUTY: A bill (H. R. 7345) granting a pension to Walter E. Petrie; to the Committee on Pensions,

By Mr. STEPHENS of California: A bill (H. R. 7346) granting a pension to Elizabeth McManus; to the Committee on Invalid Pensions

By Mr. STONE: A bill (H. R. 7347) granting an increase of pension to Catherine Kennedy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7348) granting an increase of pension to William A. Taylor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7349) granting an increase of pension to John T. Lea; to the Committee on Invalid Pensions.

By Mr. THOMSON of Illinois: A bill (H. R. 7350) for the relief of George Q. Allen; to the Committee on Appropriations. By Mr. TREADWAY: A bill (H. R. 7351) granting a pension

to Julia Halloran; to the Committee on Pensions. Also, a bill (H. R. 7352) granting a pension to Eva M. Thomas; to the Committee on Invalid Pensions.

By Mr. UNDERHILL: A bill (H. R. 7353) to remove the charge of desertion against James Green; to the Committee on Naval Affairs.

By Mr. MITCHELL: A bill (H. R. 7354) waiving the age limit for admission to the Pay Corps of the United States Navy in the case of Edward Henry Duane; to the Committee on Naval Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Petition of the Society of Automobile Engineers, protesting against the passage of the Oldfield bill, relative to change in the patent laws; to the Committee on Patents

By Mr. ANDERSON: Papers to accompany a bill granting a pension to Bridget Thomas; to the Committee on Invalid Pensions.

Also, papers to accompany a bill to grant a pension to Hattie Reynolds; to the Committee on Invalid Pensions.

Also, papers to accompany a bill granting a pension to Isabel Arneson; to the Committee on Invalid Pensions.

Also, papers to accompany a bill granting a pension to Mary Tayler; to the Committee on Invalid Pensions.

By Mr. DALE: Petition of the San Francisco Title Insurance Co., of San Francisco, Cal., protesting against mutual life insurance funds in the income-tax bill; to the Committee on Ways and Means.

By Mr. GRAHAM of Pennsylvania: Petition of the North Carolina Pine Association, favoring the retention of the Commerce Court; to the Committee on the Judiciary.

By Mr. FLOYD of Arkansas: Petition of the Harrison Commercial Club, of Harrison, Ark., favoring the passage of the Ransdell-Humphreys bill, to guarantee flood protection; to the Committee on Rivers and Harbors.

By Mr. LONERGAN: Petition of the Society of Automobile Engineers of New York, protesting against the passage of the Oldfield bill, relative to change in the patent laws; to the Committee on Patents.

By Mr. MANN: Petition of Illinois State Branch. United National Association of Post Office Clerks, protesting against an amendment to the Sunday closing law; to the Committee on the Post Office and Post Roads.

Also, petition of sundry citizens of Chicago, Ill., protesting against the proposed tariff on books, etc., in foreign languages; to the Committee on Ways and Means.

By Mr. METZ: Petition of sundry manufacturers of the United States, protesting against the adoption of the proposed cotton schedule in the tariff bill; to the Committee on Ways and Means.

By Mr. SPARKMAN: Petitions of sundry business men of the State of Florida, favoring a change in the interstate commerce laws relative to mail orders; to the Committee on Interstate and Foreign Commerce.

By Mr. TUTTLE: Petition of Plainfield Branch and the officers and members of the Montclair Branch of the New Jersey Association Opposed to Woman Suffrage, protesting against the passage of an amendment to the Constitution favoring suffrage for women; to the Committee on the Judiciary.

By Mr. WILSON of New York: Petition of the Society of Tammany or Columbian Order, relative to the needs of the American Navy; to the Committee on Naval Affairs.

SENATE.

Wednesday, August 6, 1913.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. CONSTITUTIONALIST CAUSE IN MEXICO (S. DOC. NO. 153).

Mr. SHEPPARD. Mr. President, I have not pressed the resolution (S. Res. 142) I introduced recently in regard to affairs in Mexico because the President is endeavoring to make a settlement of the situation through mediation. I shall not take any further action in the matter until the result of that effort is determined.

I have here, however, a statement showing the nature of the constitutionalist cause, the extent of the territory now in undisturbed possession of the constitutionalists, the names of the various military leaders, and the number of their followers in arms. I think this statement will be of great value in enabling the Senate to obtain a proper idea of the situation, and I ask that it be printed in the RECORD and also published as a document. I obtained it from sources I believe to be entirely authentic.

There being no objection, the matter referred to was ordered to be printed as a document and also to be printed in the RECORD, as follows:

MEMORANDUM RELATIVE TO MEXICAN SITUATION.

It is universally believed that 90 per cent of the people of Mexico favor the constitutionalist cause, headed by Gov. Carranza. This cause represents the identical ideas and aspirations of the revolution of 1910, as set forth in the "Plan de San Luis Potosi." The triumph of Madero over Diaz and his effort to bring about a realization of those ideals and

aspirations were rendered futile only through an unwise policy of conciliation, independently adopted by certain members of his cabinet, who conceived it desirable to try to secure the support of the new Government by the group of reactionaries who had so long been in the ascendency and whose rule had brought upon Mexico the oppressive political and social conditions with which the Government then found itself confronted.

The great fault of the administration of Gen. Diaz was his inability to appreciate the necessity for education among the lower classes, to afford them opportunity to earn a livelihood consistent with the economical development of the times. With the investment of foreign capital in Mexico and the rapid industrial development throughout the Republic, which came soon after the permanent establishment of Gen. Diaz in power, the cost of living began rapidly to rise, but not so the earnings of the poor man. The great land barons, whom Gen. Diaz permitted to fraudulently wrest vast tracts of territory from their rightful owners, cleverly managed to evade the payment of taxes, imposing this burden upon the taboring classes, who, already staggering under their load, now wanted for even food to eat. The foreign concessionalres, merchants, contractors, and officials during this period and until the close of the Diaz régime enjoyed great prosperity, but not so the ordinary citizen of Mexico, who day by day found himself more closely approaching industrial bondage, if not actual slavery. Such were conditions in Mexico in 1910, when the "Plan de San Luis Potosi" was drawn as the platform of the patriotic revolutionary movement which Madero inaugurated in the fall of 1910 to relieve the intolerable situation.

It was the old "cientifico" group who so fattened under Diaz that

rions in Mexico in 1910, when the "Fian de San Luis Potosi" was drawn as the platform of the patriotic revolutionary movement which Madere inaugurated in the fall of 1910 to relieve the intolerable situation.

It was the old "cientifico" group who so fattened under Diaz that again in the saddle through the error of members of Madero's cabinet, conspired with Huerta, Diaz, Mondragon, Blanquet, and de la Barra to overthrow the constituted government and establish one of their own in order that they might once more enjoy the fruits of oppression.

The aim of Gov. Carranza, who is endeavoring to restore the constitutional order, to punish the guilty, and to vindicate the national honor, is to carry out the reforms which the present political and economical situation demands. He proposes to establish a government that is constitutional in all respects, to reform the personnel of the judiciary, and to make free elections possible. Next, to apportion parts of the vast estates among their legitimate owners in order that the latter may have opportunity to provide food, clothing, and education for their families. In this Gov. Carranza is supported by the masses.

Huerta, on the other hand, who stands for no principle, is defended by a military oligarchy. Huerta being in possession of the capital and iederal district and in control of the railroad between there and the port of Vera Cruz maintains a "de facto" government; but in no State in the Republic has he real, complete, and absolute control. He has a vast quantity of arms and ammunition, and with the people's money has bought great quantities of other materials of war in Europe and in the United States in the hope of sustaining himself in power. During the month of June alone he purchased 10,000 rifes and 5,000,000 rounds of ammunition from New York, with which to kill people that are struggling for the restoration of their constitution, the right to live, and a vindication of their national honor.

While the Huerta government has been accorded the privilege of purch

problem, one which would have no lasting effect, and which would only protract existing differences.

As a demonstration of the overwhelming majority that is on the side of the constitutionalists, one has only to glance at the inclosed list of constitutionalist chiefs and men under them, which although incomplete gives a good idea of facts.

Moreover, the constitutionalists are in possession of over three-quarters of the Republic of Mexico, and, as stated before, there is not one State of the Republic where Huerta has absolute control, whereas, on the other hand, his enemies have several States and dominate the situation in most of them, as follows:

All of State of Sonora but one town, Guaymas.

All of State of Coahuila but the capital and Juarez.

All of State of Coahuila but the capital and Lampazos.

All of State of Tamaulipas but the capital and Lampazos.

All of State of Tamaulipas but the capital and Mazatlan.

All of State of Sonora but one town, as all and Mazatlan.

All of State of Tamaulipas but the capital and part of the railroad line to Tampico.

All of State of San Luis Potosi but the capital and part of the railroad line to Tampico.

All the coast-line States are controlled by constitutionalists, with the exception of the capitals of the States and some of the large towns.

Huerta controls the greater part of the States of Mexico, Hidalgo, Queretaro, and Pucbla, also the railroad from Mexico City to Vera Cruz, but has his hands full trying to keep away the constitutionalists that are constantly nearing the cutskirts of the capital citles of these States. Chiefs who have esponsed the constitutionalist cause under the leadership of the constitutional governor of the State of Coahuila, Don Venustiano Carranza.

Northern states of the Ereurelle of Mexico.

Mexico is a country of intermingled colonization, composed of people Mexico is a country of intermingled colonization, composed of people of quite different races, traditions, and civilizations. As a people they may be regarded as a genuine national unity, yet such has only come into existence during recent years. Mexico was the principal colony founded by Spain in America, and so it was here that the conservative classes—the aristocracy, the clergy, and the military—gained their highest development and stood in opposition to the humble conditions of life in which the great mass of the inhabitants lived. These facts have been the cause of the several convulsions that have afflicted the Mexican nation in its struggle for life during the last hundred

The war of independence was rather a social than a political strife, its main object having been to emancipate, from a social point of view, the Indians, the mixed bloods, and the peasants, whom the wealthier classes, too jealous of their own privileges, had denied the right to

minte in milite affaire. This war for insigendence lasted for ever their own support in the hope of becoming mere powerful under the rown support in the hope of becoming mere powerful under the written own support in the hope of becoming mere powerful under the written own support in the hope of becoming mere powerful under the written own support in the hope of becoming mere powerful under the written own support in the hope of becoming mere powerful under the written own support in the hope of becoming mere powerful under the written own support in the hope of the stabilishment of the sealed Empire, an enterprise and was full of eath of an Austrian prince and which brought about the final establishment of a democratic government and the separation of the church own welfare and ecclesiastical adults, but were thereafter not allowed to moddle in Government affairs.

In the season of the season of the properties of the church of the season of the public wealth increased consists of peace for 30 years, during which public wealth increased consists of peace for 30 years, during which public wealth increased constitution began to be imparted, though in a seam measure. Diaz, however, utterly neglected to give the people a political education and the public wealth and to satisfy the appeals for justice which were the season of the public wealth and to satisfy the appeals for justice which were a season of the season of the season of the public wealth and to satisfy the appeals for justice which were 30 years of his dictatorabily the social conditions of the country had under unbaarable conditions of the country had under unbaarable conditions of the public wealth and to satisfy the appeals for justice which were a season of the season of the

This plan reads more or less as follows:

1. We repudiate Gen. Victoriano Huerta as President of the Republic.

2. We repudiate also the legislative and judicial powers of the federa-

We repudiate the governments of the States which 30 days hence shall recognize the federal authorities which form the present admin-

istration.

4. For the organization of the military forces necessary to make compliance with our purposes we name as first chief of the forces which shall be called "constitutionalists" Don Venustiano Carranza, governor of the State of Coahulla.

5. On the occupation by the constitutionalist forces of the City of Mexico the executive power shall be taken charge of by Don Venustiano Carranza, first chief of the forces, or whoever may be substituted in command.

6. The President ad interior of the constitution of the constitution of the command.

command.

6. The President ad interim of the Republic shall convoke general elections as soon as peace shall have been established, delivering the power to the person who shall be elected.

7. The person acting as first chief of the constitutionalist forces will assume charge as provisional governor of such States as have recognized Huerta, and shall convoke local elections, after which the persons elected shall assume their duties.

Signed at the estate of Guadalupe, Coahuila, on the 26th day of March, 1913.

This rather simple but direct declaration devoid of high-sounding

Signed at the estate of Guadalupe, Coahuila, on the 26th day of March, 1913.

This rather simple but direct declaration, devoid of high-sounding phrases and complex considerations, met with a high approval at once by a vast majority of the people of the northern States and later by those of other parts of Mexico when its terms became known.

From a political standpoint the leaders of the constitutionalist party have no personal ambition. This is not a quarrel of personalities; it is not a struggle to place a given individual in power. Both leaders and followers aspire to be austere and devoted democrats who are fighting for respect for the law and for the honor of the country. While the political aspect of the present revolution is important, it is less important, however, than its social aspect.

At the bottom the social ideas of the present movement are the same as those of the revolution of 1910, and it can be stated that every event which has taken place since is nothing more than an episode of that same great drama.

In the first place, the whole nation, tired of a régime of special privilege and of a policy that had degraded the judiciary, transforming it into a simple instrument in the hands of a dictator to serve only the interests of the rich, demands the establishment of a new regime founded on real justice, without discrimination against the poor; also, that the department of justice be purified and a revision of the farmer, doing away once for all with certain abuses which in some sections transform the peasant into a slave; in others, they are deprived of all hope of ever acquiring a piece of land for themselves, the landholder absorbing all the product of their work. There are, indeed, parts of the country where the laboring classes are held in such miserable and pitiful conditions that it can be said they live in far inferior conditions to beasts of burden, which are sometimes better cared for and better fed.

The constitutionalists want a more equitable distribution of all public taxation, becau

net taxation, because, through old, corrupt methods, the whole burden rests exclusively on the poor, the wealthy bearing but a very small proportion of it.

The constitutionalists want that certain class of individuals who by unclean means during the Diaz regime deprived even towns, to say nothing of many poor individuals, of their lands, compelled by due process of law to return them.

The constitutionalists demand that certain estates of immense area which are in the hands of individuals who can not cultivate them, and who have not even seen them, shall be divided up, enacting the necessary laws for equitable compensation, and which will harmonize private interests with those of the community. They want new legislation which may favor, either by private enterprise supported by the State or undertaken by the State itself, a system of irrigation and water supply to help the farmer cultivate his land. They declare the necessity for a new financial system which, in a similar way, may provide funds at low interest, so that the farmer may by giving suitable security borrow modest amounts to enable him to cultivate his lands. They also wish to impart education on a large scale, to build roads and turnpikes, and to establish schools of agriculture and industry in sufficient number.

The constitutionalists want the land holdings fixed and respected and at the constitutionalists want the land holdings fixed and respected.

They also wish to impart education on a large scale, to build roads and turnpikes, and to establish schools of agriculture and industry in sufficient number.

The constitutionalists want the land holdings fixed and respected and, at the same time, that legislation may be enacted to facilitate the transfer of property. The condition of workingmen must also be improved by means of a better relationship between capital and the working classes. And it is especially desirable to protect, educate, and redeem the neglected Indians.

Finally, the social ideas of the constitutionalist movement may be condensed by saying that Mexico wishes to take another step forward on the road of moral, political, and social improvement. This movement is one of progress, and, in view of the knowledge that the writer has of the present conditions of the country, he considers that if the present crisis can be solved in a way favorable to the popular will, in a day not very far distant, Mexico will call the attention of the world by the harmonious development of her resources and by the democratic exercise of her rights. The people are already practically prepared for democracy, though they lack experience and, above all, confidence in their rulers to execute their expressed will.

The good element of Mexico, the country people, the middle class, the workingmen, the intellectual men who have not gone into politics as a means to get a living, and the great Liberal Party as a whole are united with the constitutionalist movement, which is favored, it may be said, by no less than 90 per cent of the population.

Among the leaders of this great party are counted in the first ranks Mr. Venustiano Carranza, who belongs to one of the leading and oldest families of the State of Coahulla. He was educated at the City of Mexico and began a course of study at the National School of Law, but was caused to abandon it because of trouble with his eyes. But his splendid preparation put him in a position to become highly cultured. In his personality he is a

is a very heavy one, but he has a clear consciousness of the great need of the present movement, on which depends the establishment of lasting peace in Mexico. He is not impulsive, nor is he unfair in his decisions; but, on the contrary, is humanitarian and a man of repose, and, at the same time, he is endowed with a firmness of character which has made him noted among the leaders of the country.

Mr. Jose Marla Maytorena, governor of the State of Sonora, is also a man of good social position, and he is well to do. He has spent his life developing his estate. He is also admired and beloved by his neonle.

Mr. Jose Marla Maytorena, governor of the State of Sonora, is also a man of good social position, and he is well to do. He has spent his life developing his estate. He is also admired and beloved by his people.

Around these two great leaders and Gov. Castillo Brito, of Campeche, there are all the really influential men of their respective States.

Out of the 235 Congressmen who were elected to form the present Mexican National Congress more than one-half sympathize with the constitutionalist movement. During the last days of Mr. Madero's administration many of them were in great danger of death and were compelled to leave the capital for safety. About 40 of them are already in the army of the constitutionalists. Nearly one-half of the Senators are at heart also sympathizers with the movement, and if their number is not greater it is due to the fact that many of them belong to the old ranks of Porfirio Diaz.

The state of war in which the country finds itself at present has developed the military qualities of many citizens who were unknown before. Thus we have among the prominent leaders and officers of the constitutionalist army many merchants, farmers, manufacturers, and men of various professions. Obregon, Cabral, Calles Bracamontes, in Sonora; Toribio Ortega, Francisco Cos, Atilano Barrera, and others, in Coahuila; Roque Gonzales Garza, Inclo Blanco, Mujice, and many others, in Nuevo Leon and Tamaulipas; Orestes Pereira, Calixto Contreras, Pablo Nateras, Santos Coy, Novoa, Iturbe, Martin Espinoza, in Durango; Zacatecas, Tepich Sinaloa, and Jalisco, Gertrudis Sanchez, Rentera Inbiano, Castrajon, and many others, in Michoacan and Guanajuato. Besides, there are many new leaders in all the States enumerated and others who have just received their commissions in San Luis Potosi, Vera Cruz, Guerrero, Hidalgo, State of Mexico, Puebla, Tabasco, Campeche, and Tlazcala. Zapata, with his many followers in the State of Morelos, would gladly submit to Carranza.

In brief, it may be said that the revolutionary movement h

establish the same throughout the Republic. The principal characteristics of these men is, in general, that all of them are morally sane and are moved by a common desire to work for the benefit of their country.

In the first place, we count on the good will and the active cooperation, according to circumstances, of the great majority of the inhabitants of Mexico. The constitutionalists control nearly the whole of the States of Sonora, Coahulla, Durango, and Campeche, in which states the troops of Huerta control only a very few towns. Chiluahua, Tamaulipas, Nuevo Leon, Zacatecas, and the greatest part of San Luis Potosi, Michoacan, Guerrero, and Sinaloa are also controlled, in a geral sense, by the constitutionalists. In the States of Tabasco, Jalisco, Tepic, Tlaxcala, Puebla, Vera Cruz, Hidaigo, and Mexico several organized movements have been started, spreading with such a facility that within 30 days these States will be entirely under control.

It is easy to foresee that the few States in which the movement has not yet started will very soon follow the others.

It is a fact that war supplies have not been very abundant in the constitutionalist camps, the greater part of the arms and ammunition in their possession being taken from the troops of Huerta. If the constitutionalists could purchase the necessary elements to arm the volunteers who offer their services, they would readily make up an army of more than 100,000 men within 30 days, doing away with Huerta's administration in short order.

This time the leaders of the movement intend to bring it to a final success in order that when the needs that produced it shall be satisfied a definite and organic peace may be established. Thus they are perfectly decided to enter into no negotiations of any kind with either Huerta or with the followers of Felix Diaz, or with the cientificos, or with any other reactionary faction whose tendencies are more or less concealed. A compromise, which was really a sign of weakness, determined the partial failure of the revoluti

and it would surely originate evils far greater than those it intends to remedy.

Among the people at large there is no anti-American feeling; on the contrary, there is a feeling of true friendship. The great majority, as heretofore stated, have their sympathies with the constitutionalists, and therefore the failure to recognize the so-called government of Huerta has been considered by them as a justification of their attitude and has been regarded as an indirect help to them, which have taken place in the City of Mexico are known to be mere artificial manipulations intended to force recognition for the purpose of floating a loan in Europe which we believe could only serve to protract unnecessarily a struggle whose final outcome is easy to predict.

In this connection it must be said, however, that the constitutionalists will never be disposed to recognize such a loan.

The constitutionalists have never asked, and never will ask, any help from foreign powers. All they desire is that these powers consider their cause with justice and calmness. The lives and property of foreign subjects and citizens have been protected by every possible means within their jurisdiction, and it is fair to say that no honest man need have fear. The only men who now run any risk in Mexico are those who have been charged with committing crime or those who have plundered the national treasury.

In spite of the great difficulties encountered in maintaining communication between the different States now in arms, as well as between the different military chiefs, the whole revolutionary movement follows strictly the same ideals and is under the general control of Mr. Carranza. Persons who have a keen interest in misrepresenting the movement have reported that this movement is chaotic and lacks systematic coordination, but these reports are absolutely false. Representatives from all over the country are constantly arriving in Piedras Negras, Carranza's headquarters, to receive orders and instructions.

resentatives from all over the country are constantly arriving in Piedras Negras, Carranza's headquarters, to receive orders and instructions.

Carranza has already begun to form an embryo government and to appoint a cabinet. At the beginning military organization was most important, and he therefore devoted all his attention to the needs of his army; but now he has created two new departments, one of war and one of finance, and in a very few days other departments will be created to meet the necessities incident to the occupation of new territory and fresh responsibilities.

On the 15th day of May last Carranza, without pressure of any sort, issued a decree binding the constitutional government to the principle of international arbitration for the immediate settlement of claims of American citizens and other foreigners against Mexico upon the triumph of his cause. This affords an excellent example of the practical side of his character.

To sum up, the constitutionalists conceive that the seizure of the Government of Mexico by Huerta and his assumption of power did violence to the constitution and justified the people in a resort to arms in an effort to vindicate not only the fundamental law but the national honor.

The masses support this movement for the restoration of constitu-tional order; the aristocracy and the reactionary elements oppose it, favoring Huerta.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ROBINSON:

A bill (S. 2889) forbidding judges to charge juries with regard to matters of fact, but requiring judges to declare the law, and in jury trials to reduce their charge or instructions to writing on the request of either party; to the Committee on the Judiciary

By Mr. PERKINS:

A bill (S. 2890) granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes; to the Committee on Public Lands.

By Mr. KERN: A bill (S. 2892) granting an increase of pension to William Hinson (with accompanying paper); to the Committee on

By Mr. CATRON:
A bill (S. 2893) for the relief of the heirs of Padre Justiniano

Castillo; to the Committee on Indian Depredations.

A bill (S. 2894) to remove the charge of desertion from the military record of Santos Lopez; and

A bill (S. 2895) to remove the charge of desertion from the military record of Joseph D. Depue; to the Committee on Military record of Joseph D. Depue; to the Committee on Military record of Joseph D. tary Affairs.

A bill (S. 2896) granting an increase of pension to Grace E. McDonald; to the Committee on Pensions.

By Mr. MARTINE of New Jersey:

A bill (S. 2897) granting an increase of pension to Sarah M. Pond (with accompanying papers); to the Committee on Pensiens.

AMENDMENT OF NATIONAL BANKING LAWS.

By Mr. LEA:

A bill (S. 2891) to amend the national banking laws approved

May 30, 1908; to the Committee on Banking and Currency.
Mr. LEA. With the consent of the Senate, at the close of the
morning business on Friday I shall desire to submit some remarks showing the changes this proposed amendment makes in
the so-called Aldrich-Vreeland law.

AFFAIRS IN MEXICO.

Mr. CLARK of Wyoming. Mr. President, I submit a resolution which I will send to the desk for reading and information. The VICE PRESIDENT. It will be read.

The resolution (S. Res. 152) was read, as follows:

The resolution (S. Res. 152) was read, as follows:

Resolved, That the Committee on Foreign Relations be authorized and directed to proceed with all due dispatch with a full and complete investigation of the condition of American citizens in the Republic of Mexico, with a view of recommending to the Senate such action as will protect the lives and property of citizens of the United States if the same shall be-in danger and require protection, and to make early report to the Senate of the results of such investigation; such committee shall have the power to send for persons and papers, to subport a witnesses, and to administer oaths, and the expenses incurred hereunder shall be paid from the contingent fund of the Senate.

Mr. CLAPK of Wywning, Mr. Provident Law evenses of the

Mr. CLARK of Wyoming. Mr. President, I am aware of the criticism that usually meets the introduction of a resolution of this sort. I desire to say that it is no spirit of hostility to the administration, nor is it in any spirit of criticism to our Foreign

Relations Committee. It is, however, born of the evident necessity of the Senate of the United States being informed, in some degree at least, of the conditions which confront us in Mexico in order that we may know something of the real facts; and if facts are found to be in accord with general belief that some store he taken lief, that some steps be taken to remedy, and that right quickly,

such intolerable conditions.

To my notion, Mr. President, the tariff is a small affair compared with the matters of national honor and rights of citizenship that are dealt with in the resolution. For some reason or other the Senate is unable to get any definite and authorita-tive information as to the condition as it exists, and therefore we are utterly unable to act in any manner. In the meantime evidences still continue to accumulate that American property is being destroyed, that American citizenship is being dishonored, that Americans are being killed, and even officers of the American Government are being shot in Mexico.

It is no purpose of this resolution to ascertain who is responsible for this condition of affairs, but I believe it is high time that the administration and the Foreign Relations Committee, if either of them have definite information, take the Ameri-

can Senate into their confidence.

know it is often said that matters of this sort should be left alone and not discussed, that foreign affairs are delicate matters to deal with, and that offense may be given to foreign nations which will interfere with the due and proper proceedings by the State Department. But, Mr. President, in my judgment that reason does not obtain here, because it is no secret that other nations as well as ours are interested in the condition of affairs in Mexico. It is a fact that the conditions in Mexico are talked of not only in the Senate but elsewhere, and with the greatest freedom, and no doubt in many cases upon incomplete or false information; and it occurs to me that the better way is to get definite information, and get it as speedily as possible.

Certainly it is true, Mr. President, that this condition can not long be borne with by the American people. Something must be

done or an attempt must be made to do something.

The latest information that we have is that in the course of time, after Gov. Lind shall have looked over the situation and made his report, the administration may be then in a position to give information and to take some definite steps in regard to the situation.

But, Mr. President, that does not satisfy. Mr. Lind goes not as the representative of the Republic of the United States; he goes not as an ambassador from this Nation. He has no power to protect; he can not be appealed to by citizens of the United States in that country. He is simply going for the personal information of the President to make what investigations he

Now, Mr. President, every day's delay that we have means more property destroyed; it means more American citizens

outraged and killed.

I regret that the chairman of the Committee on Foreign Relations is not present, because I should like to interrogate him as to whether that committee has not some information that it may give to the Senate, in confidence if necessary, that would at least give us an idea that we are not simply drifting on a sea of uncertainty with no result and no shore or haven in

I shall not ask to have a vote upon the resolution this morning in the absence of the chairman of the committee, but if no one cares to make any expression in regard to the situation I shall ask that it go over under the rule, and venture to hope that at the next session of the Senate it may be taken up in regular order and be then agreed to.

The VICE PRESIDENT. That action will be taken.

Mr. BACON subsequently said: Mr. President, the resolution introduced by the Senator from Wyoming [Mr. CLARK] in regard to the Mexican situation has gone over, and there is nothing that can be now said about it. That occurred during my absence from the Chamber, which, I am told, was noted at the time. I wish to state that the Foreign Relations Committee was then in session, not having concluded its work. For that reason I was not present to look after the matter.

Mr. CLARK of Wyoming. For that reason, Mr. President, the request was made that the resolution go over until to-morrow so that the Senator from Georgia might be present.

LOUISVILLE & NASHVILLE RAILROAD, ETC.

Mr. LEA submitted the following resolution (S. Res. 153), which was ordered to lie on the table and be printed:

Resolved, That the Interstate Commerce Commission be, and the same hereby is, requested to investigate, taking proof, if necessary, and report to the Senate as soon as practicable—

First. What amount of stock, bonds, and other securities of the Nashville, Chattanooga & St. Louis Railway is owned or controlled by the Louisville & Nashville Railroad;
Second. What other railroad or railroads in the territory served by the Louisville & Nashville Railroad and the Nashville, Chattanooga & St. Louis Railway have been purchased, leased, controlled, or arrangements entered into with for the purpose of controlling, by either the Louisville & Nashville Railroad or the Nashville, Chattanooga & St. Louis Railway: Louis Railway

Louis Railway;

Third. Whether the Louisville & Nashville Railroad and the Nashville, Chattanooga & St. Louis Railway serve the same territory in whole or in part, and whether, under separate ownership, they would be competitive to the various points in their territories;

Fourth. Any other fact or facts showing or tending to show the further relations between the Louisville & Nashville Railroad and the Nashville, Chattanooga & St. Louis Railway, and any fact or facts showing or tending to show whether these relations restrict competition and maintain fixed rates;

Fifth. The terms of the lease of the Nashville & Decatur Railroad by the Louisville & Nashville Railroad, and what amount, if any, of stock, bonds, and other securities of the Nashville & Decatur Railroad and of the Lewisburg & Northern Railroad are owned by the Louisville & Nashville Railroad or any of its subsidiaries or holding companies;

Sixth. Whether the Nashville & Decatur Railroad, the Lewisburg & Northern Railroad, and the Louisville & Nashville Railroad serve the same territory in whole or in part, and whether, under separate ownership, these railroads would be competitive between various points in their territories;

Northern Railroad, and the Louisville & Nashville Railroad serve the same territory in whole or in part, and whether, under separate ownership, these railroads would be competitive between various points in their territories;

Seventh. Any other fact or facts showing or tending to show the further relations between the Louisville & Nashville Railroad, the Nashville Railroad, and any fact or facts showing or tending to show whether these relations restrict competition and maintain and fix rates;

Eighth. What amount, if any, the Louisville & Nashville Railroad, the Nashville, Chattanooga & St. Louis Railway, the Nashville & Decatur Railroad, and the Lewisburg & Northern Railroad, all or any of them, have subscribed, expended, or contributed for the purpose of preventing other railroads from entering any of the territory served by any of these railroads, for maintaining political or legislative agents, for concontributions to political campaigns, and for creating sentiment in favor of any of the plans of any of said railroads; and

Ninth. (a) The number of free annual passes, (b) the number of free trip passes, (c) the number of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officials or at the request of members of legislative bodies and other public officia

ASSISTANT CLERK TO COMMITTEE ON INTEROCEANIC CANALS.

Mr. O'GORMAN submitted the following resolution (S. Res. 154), which was referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Committee on Interoceanic Canals be, and it is hereby, authorized to employ an assistant clerk, at a salary of \$1,800 per annum, to be paid from the contingent fund of the Senate until otherwise authorized by law, to serve in lieu of an assistant clerk now authorized by law at an annual salary of \$1,440.

COTTON BAGGING AND TIES.

Mr. SMITH of South Carolina. Mr. President, before the close of the morning business, I send to the desk a petition which I ask unanimous consent to have read. It pertains to a resolution (S. Res. 134) I introduced some time ago calling attention to the unusual advance in the price of bagging and ties for cotton. It comes from quite an old and responsible farmers' club in my State. I ask that the Secretary read both the letter and the petition.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

BEECH ISLAND FARMERS' CLUB, Beech Island, S. C., August 3, 1913.

Whereas we are informed that the scarcity of bagging and ties and the very high prices demanded for them render it difficult, if not impossible, for the farmers to put their cotton in the market to meet the advances that have been made to them: Therefore be it Resolved, That Messrs. Harry Hammond, George C. Robinson, and B. W. Fair be appointed a committee from the Beech Island Farmers' Club to inform Senators B. R. TILIMAN and E. D. SMITH of this condition and to ask if any steps can be taken to remedy it.

BEECH ISLAND FARMERS' CLUB, Beech Island, S. C., August 3, 1913.

Hon. E. D. Smith,

Senator, South Carolina, Washington, D. C.

Dhar Sir: At a recent meeting of the Beech Island Farmers' Club we were appointed as a committee to communicate with you and Senator Tillman to obtain from you your views as to the prospect of our obtaining bagging and ties and also whether it would be possible for us to obtain relief in use of cotton cloth and wire in lieu of the fact we can not get bagging and ties to put our cotton in commercial shape. We realize the season is late, and as most farmers have obligations to meet and the meeting of these obligations would go to relieve the stringency of moneyed conditions, we would be grateful for any suggestions you see fit to make. In plain words, what are we to do? Can the cotton exchanges condemn our cotton packed in cotton cloth and wire as in unmerchantable shape and thereby cause us a loss?

Very respectfully, Harry Hammond, Chairman,

Very respectfully,

HARRY HAMMOND, Chairman, GEORGE C. ROBINSON, B. W. FAIR,

Committee.

Mr. SMITH of South Carolina. Mr. President, I have presented this matter and had it read in order to emphasize another feature that has occurred to me, not only with reference to the abnormal rise in the price of these commodities for covering cotton, but also the fact that it is now complained that in addition to this rise there is an unusual scarcity to such an extent that it seems that there will be embarrassment even in getting the cotton ready for the market.

I am also informed by Mr. Clark, of the Department of Commerce, who has just returned from Dundee, that there is rather a larger crop this year than heretofore of jute, out of which the bagging is made, and that this rise in the price must come from some other source than from a lack of supply of the

raw material.

Mr. CLARK of Wyoming. Will the Senator yield to me for a moment?

The VICE PRESIDENT. Does the Senator from South Carolina yield to the Senator from Wyoming?

Mr. SMTTH of South Carolina. I do.
Mr. CLARK of Wyoming. Has the Senator a view as to
what might or might not be done in Congress to overcome the shortage of bagging and ties?

Mr. SMITH of South Carolina. Mr. President, all that I hope to do is to find out what is the cause of this advance in view of the fact that the supply of the raw material, according to the report

Mr. CLARK of Wyoming. I did not hear all the communication read, but the part I heard spoke of the scarcity and not of the price.

Mr. SMITH of South Carolina. No; both the price and the

scarcity are referred to in the communication.

Mr. CLARK of Wyoming. I suggest to the Senator that I do not suppose Congress could supply the deficiency in cotton bagging or ties any more than it could supply the deficiency in harvest hands when the farmers of the West harvest their crop of wheat or other grains.

Mr. SMITH of South Carolina. I am calling attention to the fact that somebody is manipulating the market; that there are 2,000,000 bales more of jute out of which bagging is made than there was last year, and the price is 2 cents a yard higher than last year, and the crop of cotton on which this bagging is to be used does not promise to be as large as it was last year. It is just another evidence of the splendid result that flows from the beneficent protective tariff.

The VICE PRESIDENT. The petition and accompanying paper will be referred to the Committee on Agriculture and

Forestry.

THE TARIFF.

The VICE PRESIDENT. The morning business is closed. Mr. SIMMONS. I ask unanimous consent that the Senate proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. LIPPITT. Mr. President——
Mr. PENROSE. If it does not inconvenience the Senator from Rhode Island, I should like to have a few minutes to present some figures relating to the pending measure.

Mr. LIPPITT. I understand that it will take only a few minutes.

Mr. PENROSE. That is all.

Mr. LIPPITT. I yield for that purpose. Mr. PENROSE. I have here, Mr. President, a bulletin from the Department of Commerce, which has been referred to in the newspapers, but it does not seem to me that public attention has been called to the facts set forth therein as fully as they deserve. The figures relate to the subject of the short colloquy I had with the Senator from Missouri [Mr. STONE] the other

day regarding the amount of goods in bonded warehouses.

First, for the information of the Senate, I should like to read a part of the explanation given by the Department of Commerce

as to bonded warehousing:

The bonded warehousing:

The bonded warehousing system of the United States is described by an accepted authority as a system whereby the Government extends the time for the payment of duties on imported merchandise, retaining them in its possession meanwhile to secure such payment. Duties on imports, it adds, naturally fall due as soon as the goods arrive in port, but the economy and convenience of importing in great quantities and in advance of their actual requirement for consumption is so great and the immediate payment of duties would often involve such a large and unremunerative investment of the capital of importers that the principle of warehousing goods in Government custody, with a reasonable extension of time for the payment of duties, has been adopted by all leading commercial nations. The payment of duties is secured by a bond given by the importer or owner of the goods and the goods are then said to be "in bond" and the places of deposit are known as

"bonded warehouses." These are chiefly warehouses owned and controlled by private parties who carry on an ordinary storage business for their own profit, the Government extending its authority over them and retaining a virtual possession of and control over the goods stored therein. No person, however, has a right to keep a warehouse for the storage of dutiable goods unless appointed by the Secretary of the Treasury, who may revoke such appointment at his pleasure. An importer may establish his own private warehouse, but it must be exclusively devoted to that purpose and under charge of a United States customs officer. The warehousing system as applied to imported merchandlse was, according to the same authority, first adopted in Great Britain in 1802 and in the United States in 1846.

The amount of merchandise remaining in warehouse at the various ports at the end of each month is reported to the Bureau of Foreign and Domestic Commerce, Department of Commerce, and published in the Monthly Summary of Commerce and Finance.

So much. Mr. President, by way of explanation as to just

So much, Mr. President, by way of explanation as to just what is meant by "goods in bond."

The statement issued by the Department of Commerce under date of August 4 is quite remarkable, and I invite the consideration of the Senate to the figures which I recite from the bulletin:

MERCHANDISE REMAINING IN BONDED WAREHOUSES ON JUNE 30, 1913.

Merchandise remaining in bonded warehouses on June 30, 1913.

Department of Commerce, Washington, D. C., August 4, 1913.

Merchandise remaining in bonded warehouses at the end of the fiscal year 1913 showed a larger value than ever before, the total being \$106,000,000 against \$72,000,000 at the corresponding date of last year. These figures are from official reports to the Bureau of Foreign and Domestic Commerce, Department of Commerce, which indicate that the quantity of certain principal articles, upon which a reduction of duty is proposed by the pending tariff measure in bonded warehouses of the country is greater than ever before. Of sugar, for example, the quantity in bonded warehouses was on June 30, 778,000,000 pounds, valued at \$15,250,000, against 205,000,000 pounds, valued at a little less than \$6,000,000, on June 30 of last year. Of leaf tobacco the quantity in bonded warehouses was 52,000,000 pounds, valued at \$25,000,000, against 34,000,000 pounds, valued at \$19,000,000, on the same date of last year. Of raw wool, the amount in warehouses was 78,000,000 pounds, valued at \$16,500,000, against 59,500,000 pounds, valued at \$12,000,000, at the same date of last year. Other principal articles of which the quantity in warehouse is unusually large are: Manufactures of fiber (chiefly burlaps and linens), amounting to \$8,500,000, against \$4,000,000 imauntactures of silk, over \$3,000,000; chemicals, nearly \$4,000,000 imaunfactures of silk, over \$3,000,000; rivit and nuts, over \$2,000,000; and manufactures of iron and steel, \$1,500,000. Of this large quantity of imported merchandise remaining in bonded warehouses of the country valued June 30, 1913, at \$105,928,884, against \$72,246,878 on June 30 of last year, all except \$1,500,000 worth is dutiable.

About two-thirds of the merchandise now remaining in warehouses is at the port of New York, which showed in its report for June \$68,000,000 worth of merchandise in bonded warehouses against \$45,250,000 at the corresponding date of last year.

Mr. SUTHERLAND. Mr. President—
The VICE PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from Utah? Mr. PENROSE. I do.

Mr. SUTHERLAND. If the Senator from Pennsylvania will permit me to interrupt him at that point, I will say that I have information, which is entirely accurate, to the effect that there is now in the bonded warehouses of New York \$80,000,000 worth of goods, the duties upon which amount to between \$40.000,000 and \$50,000,000.

Mr. PENROSE. I have no doubt, Mr. President, that this accumulation in the bonded warehouses is increasing by leaps

and bounds.

And if the Senator from Pennsylvania Mr. SUTHERLAND. will permit me just to add a word-it will only take a momentof course the duties under the pending bill are greatly reduced, and as nearly as I can estimate it-and it is only an estimateif the duties are paid upon the goods now in the bonded warehouses of New York under the pending bill instead of under the existing law, it will mean a loss to the Government of anywhere from \$15,000,000 to \$25,000,000.

Mr. PENROSE. I think the Senator's estimate is too low. have some figures here showing the loss of revenue, but I shall not detain the Senate by reciting them, because they are easily calculated.

This statement from which I have been reading continues:

Of the \$25,000,000 worth of tobacco in bonded warehouses at all the ports of the country \$20,500,000 worth was at New York; and of the \$15,250,000 worth of sugar \$9,500,000 worth was at New York, \$3,000,000 worth at Philadelphia, and \$2,750,000 worth at Boston. Of the \$16,500,000 worth at Pailadelphia, and \$2,000,000 worth was at Boston, \$3,000,000 worth at New York, and \$2,000,000 worth at Philadelphia. The value of imported merchandise in bonded warehouses at the present time is more than double that in warehouses immediately prior to the enactment of the tariff laws of 1890 and 1894, five times greater than in 1897, and about 20 per cent larger than in 1909.

Mr. STONE. Mr. President-

The VICE PRESIDENT. Does the Senator from Rhode Island yield to the Senator from Missouri?

Mr. STONE. When I rose I did not know that the Senator from Rhode Island had taken the floor, but if he has, I ask him to yield.

Mr. LIPPITT. Unless the Senator from Missouri merely wants to occupy the floor for a minute or two, I should prefer to go on.

Mr. STONE I merely wish to occupy the floor for a moment.

Mr. LIPPITT. Very well.
Mr. STONE. I shall not detain the Senate for any length of time. I can not under the circumstances make any response to the statement made by the Senator from Pennsylvania [Mr. Penrosel, but I wish to put into the Record in connection with what the Senator from Pennsylvania has said—that is all I can have time now to do—a short extract from a speech made in the House of Representatives by Representative Wallin. of the State of New York, on April 25, 1913. This speech is along the general line of the speeches that have been made here on the other side. I shall not stop to read it, but I shall ask to have it inserted.

Mr. PENROSE. Mr. President, the putting of a speech of a Member of the House of Representatives in the proceedings of the Senate is slightly irregular. Who is the distinghished gentleman who is the author of the production? I did not hear the

Senator from Missouri mention his name.

Mr. STONE. I stated that it was Representative Wallin, of New York. It is a short extract from an address of his, which, instead of reading, in order to save time, I should like to insert in the RECORD. It criticizes this bill and states that it would result in the curtailment of industry and enterprise, and all that sort of thing; just what we have been hearing here from day to day from the other side of the Chamber.

Mr. CLARK of Wyoming. Does the Senator indorse the

statement he desires to put in the RECORD?

Mr. STONE. No.

Mr. CLARK of Wyoming. I do not think anything should be put in the Record unless it has the indorsement of a Senator.

Mr. STONE. I did not hear what the Senator said.

Mr. CLARK of Wyoming. I said I thought nothing should be put into the RECORD of the Senate without having the indorse-

ment of some Member of the body.

Mr. STONE. Oh, this has the indorsement, I am quite sure, the Senator from Pennsylvania and the Senator from Wyoming.

Mr. PENROSE. I do not know what the article is, Mr. President.

Mr. CLARK of Wyoming. I am quite sure the Senator from Wyoming does not know what it is.

Mr. PENROSE. I do not know what it is, and never before heard of it.

Mr. STONE Mr. President, this really is quite diverting. Mr. BRANDEGEE. Mr. President, I rise to a question of

The VICE PRESIDENT. The Senator from Connecticut will

state his question of order.

Mr. BRANDEGEE. Mr. President, the morning business has closed; the Senator from Rhode Island [Mr. LIPPITT] has the floor, and is anxious to proceed. These matters are likely to give rise to considerable debate; and I object to the Senator from Rhode Island yielding further to any Senator.

Mr. STONE. Oh, the Senator from Connecticut objects to a Senator holding the floor yielding to another Senator. That is

a new performance in the Senate.

Mr. BRANDEGEE. Except by unanimous consent, after morning business is closed.

Mr. STONE. Mr. President, in view of the flurry on the other side, I will not proceed further.

Mr. LIPPITT. Mr. President, the subject about which I am going to speak is a very technical one, and I desire to discuss it for the most part in a technical manner. For the purpose of brevity and in the interest of a connected statement, I should much prefer that I be not interrupted during the delivery of my remarks. At the end of them I will be very glad to discuss with any Senator any question in connection with them that he may desire to bring up.

Mr. President, there are three textile industries whose volume makes them important factors in the activities of this country, the manufacture of cotton, of silk, and of wool, and I propose to consider what seems to me the capricious, illogical, and differ-

ent methods used in applying duties to these three industries.

The annual product of silk manufactures is about \$200,000,000, of wool and wool manufactures about \$700,000,000, and of cotton manufactures \$800,000,000—something over a billion and a half dollars at the mill door. This value is greatly increased by the time the products reach the hands of the actual consumer. In a shirt that sells for \$1.50 there is 34 cents' worth of cotton cloth; in a suit of woolen clothes selling for \$23 there \$4.78 worth of cloth; cotton cloth that nets the mill 124

cents is worth 25 cents on the retail counters. It would seem a moderate estimate to say that \$3,000,000,000 of our annual turnover is represented by these textiles.

More than 50 per cent of the wage earners of my own State are employed in these industries. On our border line, and with its suburbs overlapping into Rhode Island, is Fall River, the largest center of cotton manufacturing in the country; a few miles to the east is New Bedford, where the fine-yarn factories are located; to the north is the Blackstone Valley and Worcester; not far away from us are the great textile cities of Lowell and Lawrence. What happens to these industries, therefore, is an important matter to the country at large, and to Rhode Island in particular.

TARIFF PRINCIPLES.

The first step in preparing a consistent tariff is to decide upon the principle upon which it is to be made. So far as protectionists are concerned, this has not been a difficult question, as it has been their purpose to write a tariff intended to give a reasonable preference to the products of American industries in American markets.

The opponents of this policy, however, have many objects in view. At one time they were unconditional free traders, but consistent free trade in practice is impossible in this country, so long as it is proposed to raise revenue through the customhouses, so that this policy soon became transformed into the doctrine of a tariff for revenue only. To-day many additional objects have been suggested. Mr. Underwood, in an article in the Independent Magazine of February, 1912, states his purpose was to reduce unjust profits and to destroy, or at least to check, monopolies. He proposed to accomplish this by so manipulating the rates that importations of substantially 10 per cent would result—a theory that he described as a competitive tariff. His

object, therefore, was to increase the importations.

President Wilson, in his first message to Congress, also proposes to destroy monopoly. "We have built up," he says, set of privileges and exemptions from competition behind which it was easy by any, even the crudest forms of combination, to organize monopoly," but he also proposes to accomplish other results, particularly to increase exports. "We must build up trade, especially foreign trade," he says. And efficiency is to be obtained, efficiency of the most extreme sort. It is not enough to his exacting nature that we should be the equal of others in this respect, but we must be "masters of competitive supremacy, better workers and merchants than any in the world." Duties are also to be laid upon luxuries as distinworld. Duties are also to be also to take the guished from necessities, and finally the tariff is to take the place of schoolbooks to produce mental development. "The obplace of schoolbooks to produce mental development. ject of the tariff duties henceforth laid must be effective competition, the whetting of American wits by contest with the wits of the rest of the world," he says. In addition to all this, a distinction is to be drawn between helping that part of an individual's activities which are spent in producing and that part of his activities which are spent in consuming. Consumption is to be given the preference over production, which can only mean for each one to sell cheap what he has to sell that he may buy cheap what he has to buy.

To accomplish all these results by the simple expedient of

writing one duty of 10 per cent or 20 per cent or 30 per cent, or whatever it may be, against one particular article, seems like a difficult understanding. It must lead to variable treatment as for the time being one object or another becomes the predominating motive, and that is what we find when we compare the

treatment of these three textiles.

VARYING TREATMENT OF TEXTILES.

They are all similar in the operations needed to carry them on. They employ machinery built upon similar principles; the skill and knowledge of the laborer is of the same general kind; the worker frequently goes from one industry to another as opportunity presents itself. Many mills use more than one of these raw materials; there are cotton mills, so called, whose annual bill for silk is larger than for cotton; there are woolen mills that use cotton largely as a raw material. Nevertheless, we find a duty of 45 per cent put upon silk cloths of all kinds without discrimination, a duty of 35 per cent put upon woolen cloths of all kinds without discrimination, but when it comes to cotton it has been thought necessary to grade these duties so that they run from a minimum of 7½ per cent to a maximum of 30 per cent, with an average of perhaps 16 per cent, less than one-half the duty upon woolens and about one-third the duty upon silks, although the average percentage of wages to the total cost of manufacture is the highest in the cotton of any of the three. If the Census Bureau is to be relied upon, the labor cost in cotton is 24 per cent of the total, as against 21.8 per cent in silk and but 18.7 per cent in wool.

Which, then, of all these various objects that the authors of this bill have proposed for themselves, is the one that governed this distribution of taxation, or protection, or revenue among these three similar industries? Is it because more of a luxury than another? If so, to what individual in this country is cotton cloth more necessary than woolen cloth? If it is the principle of luxury which justifies a single ungraded duty of 45 per cent on silk cloths, but necessitates a graded duty running from 7.5 per cent to 30 per cent on cotton cloth, what theory justifies so arranging that cotton duty that the labor in the most ornamental fabric has the least protection of all the products of the loom, regardless of what their raw material may be? Certainly, a piece of cotton goods selling for \$1.50 a yard is as much a luxury as a piece of silk that sells at the same price.

"We have built up a set of privileges and exemptions from competition behind which it was easy by any, even the crudest, forms of combination to organize monopoly," says Mr. Such generalities are easy to make, but if the experience and conditions of these industries are to be relied upon for their verification, they will be hard to prove, for the facts are that never in the history of the world was competition so keen in these industries as it is at this very moment. There was a time, not long back, when a merchant had a strong hold upon the business of his immediate neighborhood, but frequent, rapid, and cheap communication has abolished all that. The wholesale merchant in Chicago and St. Louis makes prices for his competitor in New York on one hand and in San Francisco on the other. The circulars of the mail-order house go from one end of the country to the other. A merchant in his office, using his telephone, obtains prices from a dozen competing manufacturers within an hour.

TEXTILES NOT MONOPOLIES.

To control monopolies can not justify the application of these unequal duties, for surely these textile industries are not monopolized. An increase in the number of silk-making establishments from 483 to 843, as the census report shows occurred during the 10 years ending in 1909, is good evidence that competition has not been done away with in that industry. is certainly no monopoly of the cotton manufacturing industry which stretches from one end to the other of the Atlantic seaboard, in which some 1,324 separate establishments are engaged, and in which the largest individual establishment controls less than 2 per cent of the total machinery.

In woolens, the existence of 985 independent establishments affords ample guaranty of competition in an industry whose product is only some 400,000,000, but if anyone is disposed to cite the American Woolen Co. as objectionable, it would not seem to be dangerous when its production only constitutes some 12 per cent of the total and when its financial results show that for the first 12½ years of its existence, out of gross sales amounting to \$496,832,000, the entire dividends received by the capital invested in it were \$23,825,912, or an increase of only 4.79 per cent, which the public had to pay for woolen cloths over what they would have had to pay if that capital had been satisfied

with no return at all.

If there is need of further evidence of active competition nothing more conclusive could be asked than is contained in the report of the Tariff Board upon wool, where they show that on certain number of woolen fabrics which would have cost \$118.74 to land from abroad duty paid in New York, similar domestic fabrics were selling in this country for \$69.75; and in the cotton report, where the board obtained the prices in this country and in England of some 150 different samples of cotton cloth, which showed the surprising result that in spite of higher labor, more costly plants, and more expensive supplies, more than one-half of these fabrics were selling in this country for a lower price than they were in England on July 1, 1911. To be sure the conditions in the two countries on that date were very different. Under the influence of dull business the active competition of domestic mills had forced American prices to an unprofitable basis and the industry was not prosperous. Many of the mills were running at a loss. Fall River was said to have lost \$2,000.000 upon its manufacturing business in that England, however, was having the most profitable period she had enjoyed for many years. Though such conditions can not be expected to continue, nevertheless that such a situation could exist at any time is ample evidence, it seems to me, to any fair-minded man of the prevalence of the most intense domestic competition in these industries.

Even the Ways and Means Committee, desirous as they were to make a case to justify the radical changes in cottons, could not claim that domestic prices were increased by the amount of the duty. One-half of that duty was all that they ventured

to suggest as the additional price which the tariff put upon cotton goods as shown on page 46 of their handbook. And even this guess of the effect of the duty, the Tariff Board's report showed was probably entirely too high.

The fact is, Mr. President, the more we examine the situation as it applies to these textiles the more we are forced to admit that the height of the duty does not measure the cost of protection. These duties are simply the constabulary that guard the gateways and police the channels of American com-When protection is needed they are there to protect, and when it is not needed they are as harmless and inoperative as a village policeman dozing on a park bench in the noonday

TEXTILE PROFITS.

It has frequently been represented that these textile industries were enormously profitable; that all that was necessary to make a man rich was to have an interest in one; and in some parts of the country perhaps that idea is still entertained. They are not so regarded in New England. The risk attending the operation of textile mills is well understood there, and there is no scramble on the part of investors to buy textile There is scarcely a mill in New England whose stock can not be bought on a basis materially less than its reproduction cost, and this has been the case at almost any time for many years. The highway along which textile growth has passed is strewn with wrecks. During the testimony before the Ways and Means Committee on this subject in 1908, the present Speaker of the House, then a member of that committee, asked about the millionaires of North Adams. At the very time he asked that question the Arnold Print Works of that town, with an investment of millions, the beauty and novelty of whose fabrics have never been excelled by any textile plant here or abroad, was in the act of making an assignment, and its property has passed into other hands with scarcely a dollar being realized by its stockholders.

Four or five years ago there was a short period of unpre-cedentedly profitable business in cotton manufacturing, and the prices of cotton fabrics went so high that the condition was very much regretted by the people permanently engaged in the business and was a source of considerable anxiety to them. result was a temporary rush of people who had not had experience to build mills. The natural effect was overproduction, for anyone can start a textile plant who has the capital and feels so disposed. There is no monopoly of raw material, of location, of machinery, or of any of the things that are necessary to make

the venture.

Nothing can more clearly show the risks of the business than the experience of a mill built in New Bedford at that time, under the auspices of one of the most experienced mill managers in New England, the two and one-half million stock of which was oversubscribed at a price of 1021 within a few days of its being offered and sold at 107 before a wheel had been turned in the mill. Although equipped with the newest and most efficient machinery, built in one of the most progressive sections of the New England textile business, and its management put into the hands of experienced people, it has not yet been able to pay a single dollar in dividends, and its stock could be bought last April for \$52 a share.

Success in this industry is not merely a question of modernness of machinery or technical skill in manufacturing. It more often depends upon the skill of the merchant. The intelligent or fortunate purchase of supplies and marketing of product, success in forestalling the changing fashion of the market, conduce as much or more to profitable results as does the comparatively slight economy that can be made between one mill and another in the actual process of manufacturing. It is with a recognition of these conditions as they are and not as they have at times been represented for partisan or other purposes that we must approach an equitable revision of these textile schedules. I do not believe that the people of this country, from whatever source they get their living, whether from agriculture or otherwise, will be satisfied to see any considerable portion of these important manufacturing industries transferred to another country. I believe that having seen the possibility of conducting them here it would be intolerable to our commercial pride to see such conditions established as would make it possible for cotton grown in the United States to be sent to Europe that it might be returned to us as cloth.

We have heard lately, from Democratic sources, a great deal about efficiency. Through the President and through the Secretary of Commerce the most extreme standards have been set up. I think, therefore, that it will not be out of place to consider whether this bill has been made efficiently. To attain efficiency a wide range of information is necessary. Our industries concomplicated, and in none is this more true than of these textile industries. I have been curious to know from what source or based upon what information the authors of this bill selected the particular rates they have rather than some others to apply to these textile industries, and I have seen no evidence of an attempt to base them upon exact information. of them very elaborate reports have been made by the Tariff Board, containing statements, some of which are correct and some are not. But the committee has made very elaborate arguments againsts these reports, totally condemning and rejecting them. They have not, however, substituted any other kind of expert investigation. They have employed certain so-called Treasury experts. These are not men who have or even claimed to have any particular information about the technical manufacture or the variations of cost in these fabrics. They are men who have information in regard to the way duties have been collected under recent tariff laws, but they are not weavers nor spinners nor textile merchants. The committees have held hearings, but they certainly have not followed, nor even claimed to follow in most cases, the advice received from this source. None of the committee members are textile experts. It is easy to argue about partisan tariff theories, but to apply them equitably is a different matter. Schedules made with such insufficient preparation naturally would be filled with incongruities. Let us see the result.

RESULT OF CHANGE.

The most important thing in regard to this cotton bill, and the thing everybody interested in the matter wants to know, is what the result of it is going to be. When the Ways and Means Committee presented their first bill on the subject in 1911, they accompanied it with certain statements as to its effects upon importations. They have made some slight changes in the details of the bill as it appears to-day, but they have not materially changed the plan upon which it is written nor their estimates of its results. In 1911 their estimate was that it would increase imports from \$28,417,441.39 to \$39,163,800, an increase of \$10,746.359. Their prediction to-day is that the present bill will increase imports from \$24,358,360 to \$36,927,-000, an increase of \$12,568,640. As applied to a total consumption of \$800,000,000, this increase, if it is correct and if that is all the result there is going to be, need not, to my mind, cause any advocate of protection any great anxiety; but the question is, is it correct?

It is the most important statement that has been made in connection with the cotton schedule. Persevered in during two years, it must represent the committee's well-matured belief as to the effect of their action. It has undoubtedly been accepted by such of the public as have given the matter consideration as correct, and their judgment in regard to the schedule has, to a large extent, probably been affected by this statement. I want to explain, therefore, exactly how that estimate was made, for an examination of the reliability of those methods will shed, I think, a great deal of light upon the thoroughness or otherwise with which this subject has been treated. In doing so I am going back to the cotton bill of 1911, because the methods there used for making these calculations are the ones that in substance have been followed since then. That method was the same throughout all parts of the cotton and wool bills of that year, as was stated by Mr. Underwood in his remarks upon these bills; so, as an illustration of it, I confine my explanation to the predictions of imports covered by paragraphs 3 and 5, on page 52 of the Ways and Means Committee's report upon cottons of July 23, 1911. These two paragraphs contain duties that apply to some \$407,000,000 or about two-thirds of the entire cotton manufactures, excluding hosiery, and the prediction is made that under the then proposed law, with its radical reductions, the importations would be \$13.931.600 for the year 1912, as compared with predicted importations of \$12,668,190 if the present bill remained in force, an increase of only \$1,263,410.

When it first appeared I could not find any clear statement of the method by which these figures had been made, either in the report itself or in the explanations which were made about it during the debate in the House of Representatives. In order to satisfy myself of the basis for them I finally went to the statistician, Mr. Parsons, who made them, and from him obtained the exact figures upon which this calculation was based. I have here a table showing these figures in aetail. I will not read them, as there are too many of them to be followed, but I ask that this table and the detailed explanation that goes with it may be printed as part of my remarks (Appendix A).

In substance, this is what happened: Inder the McKinley bill

of 1888 the average duty upon the imports of the articles these paragraphs represent was 47.17 per cent for the year 1892. der the Wilson-Gorman bill this rate was reduced for the tinually of late years have been growing more diversified and year 1896 to 41.64 per cent, a reduction of 5.53 per cent, which

resulted in some increased importations. Under the bill now in force, for the year 1910 the average rate on importations was 42.46 per cent, and Mr. Parsons estimated that under the proposed bill of 1911 the average duty for 1912 would be 24.51 per cent, a reduction of 17.95 per cent.

Now, he evolved the astounding theory that the change of importations caused by a reduction of practically 18 per cent today would be in exact proportion to the change caused by a reduction of 5½ per cent 20 years ago. The figures which he made up and which the Ways and Means Committee accepted two years ago and which they have continued to accept ever since that date and which the Finance Committee of this body has accepted and upon which their report upon this subject here to-day is based have no more foundation than a simple statistical calculation made according to the rule of three. account has been made of all the changed conditions that have occurred in the manufacture of these articles during these last 20 years of progress. It is assumed that taking $5\frac{1}{2}$ per cent off of the margin of safety at the top of a duty of nearly 50 per cent 20 years ago is going to have exactly the same proportional effect as a change of 18 per cent, that cuts deep into the heart of the protection of these articles, will have to-day. It seems to me that it is not necessary to do any more than clearly state this proposition to absolutely destroy any weight that prediction may have

If simple mathematical calculations carried out by the rule of three are a positive guide to the result of tariff changes, how easy the whole question becomes. We no longer need any investigations of the cost of production here and abroad; we no longer care what the cost of labor is in America and England; we certainly do not need a tariff board to spend months trying to procure accurate statements of these conditions. All that it is necessary to do is to get a high-school graduate who is good at mathematics and let him figure out a few proportions. his speech upon this cotton schedule in the Congressional Record of July 28, 1911, in reply to questions from the floor, the chairman of the Ways and Means Committee explained that these estimates for the cotton schedule were made exactly the same as were the estimates for the wool schedule, and that when the wool schedule was being figured a Treasury expert, Mr. McCoy, was employed to check the figures of Mr. Parsons, and goes on to say that this was not necessary for the cotton schedule, because, referring to the wool schedule, with that as a basis there was no need of sending for the expert again, as the same method should produce the same result. As a purely mathematical proposition unquestionably this is so. The rule of three works the same way whether it is applied to the wool schedule or to the cotton schedule, and if anyone believes that such a simple expedient as that is all that is necessary to get accurate results on this important question there is certainly no need for commercial experts. Mr. Underwood was further asked if the committee made any inquiry of others who are familiar with the cotton business in regard to probable importations, and he re-

I will say to the gentleman that I have not inquired of the manufacturers as to how much the reduction of rate will bring about importations, because I find, with a few exceptions, that they insist, if there is a reduction at all, that it means ruin to business.

So we have this official statement of how this prediction of imports was arrived at. It becomes a simple problem in mathematics, applied alike to the products of wool and of cotton. This mathematical method having been discovered, the use of experts is not needed nor is the opinion of those engaged in the business worth asking for.

HOW TO PREDICT RESULTS.

It seems to me that the only efficient method-and under the circumstances we have a right to expect efficiency—upon which to base a prediction on this important matter is a study of the comparative prices here and abroad. So far as affecting importations goes, averages convey very little information. Merchandise is not bought and sold by average prices. Transactions depend upon the actual price of actual articles, and the only way to determine the effect of these most radical changes would be to know what the relation is between the prices of to-day and what they have been over a series of years in this country and in other countries. There has been two years during which it has been possible for the Ways and Means Committee to make such a study. If such data had been obtained and deductions drawn from their study on which to base estimates of this kind, they might have some basis of probability. But to put behind an estimate made up as this has been the weight of the prestige of the great Committee on Ways and Means of the House of Representatives, with no complete statement of the ground upon which it was made, thus leaving the public to assume that it was made on

intelligent ground, seems to me little short of criminal misrepresentation. I do not accuse the Members of the House of Representatives who were responsible for this kind of calculation of knowing misrepresentation, nor do I accuse any of the Members of this body of any such thing, for I can not believe but that one and all of them must have been entirely ignorant of the basis of this prediction, but it certainly has not inspired me with any high opinion of the efficiency of the way in which this schedule was constructed.

If anybody is still in doubt as to the utter unreliability of that method of calculation, I have supplemented the table that shows the calculations for the exact reduction in duties with another table showing what the importations would have been, figured by exactly the same method, if the duty had been reduced to 1 per cent, and this table shows that under that method of estimating imports, with practically no duty at all, these imports of cloth would only have increased \$2,647,692, which is either such a manifest absurdity or, when you consider the undisputed fact of the higher cost of labor and other items of cost in this country, is such a compliment to the effi-ciency of the American manufacturer and laborer that, if true, I should suppose everybody would be satisfied to do nothing at all about this schedule.

If what I have said here is correct, we approach the subject in entire ignorance of what the results are going to be. will not pretend to foretell them. I know of no method of arriving at a result. In Canada, with an ad valorem duty of practically 24 per cent, about the same as the authors of this bill claim their duty is, 44.7 per cent of her manufactures of cotton fabrics are imported. If that is any guide, and 44.7 per cent of our cotton manufactures are imported, it would mean over \$250,000,000 worth. I do not believe that will happen, but I do believe that if this bill is in force for any length of time either the cost of production here will have to be reduced or the importations will be enormously greater than anything that has so far been mentioned. Importations will come in a flood when the point is reached where importations are possible. Tariff duties can be changed, up or down, without any appreciable effect if the changes occur above the line of possible importation, but the instant the point is reached where prices or conditions make it profitable to bring cloth from abroad then results will follow. As an example of the kind of conditions which are likely to produce such effects an account of what is happening in Italy, as given in the Boston News Bureau of July 17, 1913, may be instructive:

ITALIAN COTTON TEXTILE TRUST FORMED,

The matter of fact way in which trusts or industrial syndicates are formed abroad is amazing in view of what is going on in this country. The incidents of organizing one European trust, all done in the open and matters of official record, comprise sufficient of combination, restraint, and agreements to control production and prices to send a whole colony of American capitalists to fail for life if anything of the kind were attempted here. What is a crime on this side of the Atlantic is regarded in Europe as a laudable harmonizing of industry to the economic laws of supply and demand and is thought to be beneficial to all concerned.

The latest example of the sort is the formation of a cotton textile trust in Italy. Details, which are given with statistical accuracy through consular reports, show that the trust or syndicate will control 3,800,000 spindles out of 4,575,925 in the Italian cotton industry. Purpose is formally stated to be to "regulate production and sale of cotton goods in Italy" by restricting output, avoiding overproduction, and generally systematizing the trade in accord with actual conditions of the market. It is hoped to be able to minimize, if not check altogether, the periodical crises in the industry.

The trust is to last five years. All members are rigidly bound to adhere to rules established. Periodical reports will be made by all so that the statistical condition of the trade may be accurately known. The syndicate embraces all branches of the cotton textile trades, the first and most important being spinning and the others being weaving, printing, and finishing. The syndicate begins operations with a shorttime schedule imposed upon all members, requiring closing down-one extra day every two weeks.

Probably the duties under this bill that apply to the bulk of these Italian cloths would not be above 121 per cent. What an opportunity with only such a barrier as this between this great American market for cotton cloth, the most valuable market for such commodities in the world, would be given Italy to relieve her congestion. With the consent of their Government. her manufacturers have consolidated their industry into one compact and formidable commercial machine. Their first step has been to reduce their production by stopping their mills for one day each two weeks. But to thus stop production is expenone day each two weeks. But to thus stop production is expensive, for it means not merely the loss of profits on one-twelfth of the output, but it means that an additional percentage of fixed charges that go on whether the mills run or not must be added to the cost of the product of the other 11 days. I do not know the cost of making goods in Italy, but undoubtedly it is no more than it is here, and probably considerably less. I happened to stand on the street corner beside an Italian workman returning from his work a few days ago. I asked him wh had come to this country, and he said, "Two dollars a day. I asked him why he

said, "How much in Italy?" and he replied, "Eighty cents a day." Now that the policy of these Italy trolled as a unit, how much more profitable it will be for them to take the surplus they are now getting rid of by stopping and send it to a market like that of this country if the sacrifice they have to make does not exceed some 12 or 15 per cent.

Mr. Underwood, in his magazine article, says that with our industries accommodated to importations of 10 per cent they would never have to stop, because in periods of dull business a little reduction in price would enable them to replace the imported goods with their domestic product, and thus they would always have at hand the possibility of an increased market. Utopian dream of academical equilibrium. What does he think would happen under the slight margin he proposes to erect against the enterprises of England when the extremely prosperous times she is now enjoying are reversed and in order to find an additional outlet she only has to make a slight reduction in price to open up to her our markets for an additional quantity of merchandise over the 10 per cent that he proposes to allot to her? A reduction of 10 or 15 per cent in price to dispose of a temporary surplus to the markets of this country, and so avoid glutting the channels of her regular trade, would be a small price, indeed, for her merchants to pay to enable them to retain their regular profits in their regular markets. I suggest that the Senators on the other side of the Chamber who represent States having great cotton-manufacturing industries give this some consideration in deciding how far they want to go in support of a bill that is so manifestly founded upon error.

WHAT ACTUAL REDUCTION IS. In addition to a knowledge of what importations will occur under this bill, the next most important information is to know just what changes in duties have actually been made by it. On page 175 of the Senate Tariff Handbook the equivalent ad valorem for 1912 under the present law is put down at 42.75 per cent and under the proposed law it is estimated at 25.81 per cent. The inference is that the average reduction proposed is the difference between these two rates, or a reduction of 16.94 per cent, practically 17 per cent. This would be an average reduction amounting to about 40 per cent of the present duties. In reality the reduction is very much greater. In the first place the rate of 42.75 per cent there given for the present law is the average rate at which some seven and one-half million dollars' worth of goods were imported. There is no evidence to show that this small amount of importations are imported in the same proportional quantity that the more than four hundred millions of cloth made in this country is manufactured; and unless they are this rate is not an accurate representation of the actual percentage of duty that exists under the present law. There is every reason to suppose that these importations follow largely the line of lowest duties in each classification. I think that is the case, although there are no figures to prove it, but we do know that in a very large number of commonly made fabrics the duty is 50 per cent or more. Many such cases are cited in the Tariff Board's report, and I believe if we had the accurate statistics they would show the average protection of this cotton schedule has been ever since 1897 in the neighborhood of 50 per cent or more. Moreover, the average duty of 25.81 per cent given in that table for the new law can not be the correct average rate of this bill as applied to the goods manufactured in this country. It is an estimate made by a system of figuring that if I cared to take the time I think I could easily show to be utterly erroneous of the rate that would apply merely to the small amount estimated to be imported under this bill, which amount, I think, I have already demonstrated is utterly unreliable. I have here a table showing all the different rates of duties in the proposed cloth schedule, the average of which is represented to be this 25.81 per cent.

Cotton-cloth duties, paragraph 257, Senate bill.

	Total	284 002 513 29

284,002,513.29 ÷ 2,037,653,722 equals 13.93 per cent.
Approximate average protection on cloth manufactured in United States, 13.93 per cent.

It shows eight classes of gray goods and eight classes of colored goods. Adding each of these columns and dividing by the number of duties shows an average of 17.8 per cent for the gray cloth and 20.3 per cent for the colored cloth, the average of the two being 19.05 per cent, or nearly 7 per cent less than the average given in the handbook. But, while this shows a much lower average than the handbook gives for the new bill, it is not in itself a correct way of getting at the average rate. because the last four rates given in each column are very much higher than the first four rates in each column, and those high rates apply to kinds of cloth of which there are relatively very few manufactured. They apply entirely to cloth composed of yarns finer than No. 49, the production of which is small in comparison with the production of yarns coarser than No. 49. On page 43 of the Tariff Board's report are figures taken from the census showing the total production of cotton yarns in this country, and they show that out of a total of 2,037,653,722 pounds only 157,255,429 pounds are finer than No. 41. board's division is made at No. 41 and the bill's classifications divide at 49, a considerable portion of this 157,000,000 pounds would be covered by the duties of the first four classes of this table. It would be perhaps not out of the way to assume that at least 17,000,000 pounds was so included. We would therefore have only about 140,000,000 pounds to which the last four classes of duties apply, as against 1.897,398,293 pounds to which the duties of the first four classes apply; or, in percentages, the duties of the first four classes apply to about 93.12 per cent of all the yarns manufactured in this country, and the duties of the last four classes apply to only 6.88 per cent.

PROPOSED DUTY ONLY 16 PER CENT.

The average of the duties of these first four classes in both the gray and colored column is 13.12 per cent, and the average of the duties in the last four classes in both columns is 25 per cent; and the average of these two duties based upon the pounds of yarn which they represent is 13.93 per cent. But some correction would have to be made in this figure, because the fine yarn is more valuable per pound than the coarse yarn, and because we have no means of knowing to what extent the value of each is increased in cost in the process of weaving. large quantities of both classes of yarn are used to make common fabrics in which the percentage of additional cost for weaving would probably not vary much. But very considerable quantities of both classes are used in making fancy or figured goods in which the increased cost for weaving is enormous, and I think there are materially more of the yarns under No. 49 used for this purpose than of the finer numbers. In any event, the difference between the quantities produced of yarns that come under the first four classifications, as compared with those of the last four classifications, is so enormous that the average duty must necessarily be very much nearer the lower figure than the higher one. I do not know of any figures anywhere from which an absolutely correct estimate of this average duty can be obtained, but, judging from these figures, 16 per cent as the average certainly would not be too low, and that is very dif-ferent from 25.81 per cent, which the committee claimed is the average under the bill. It is perfectly evident to anyone who will examine this table that this figure of the committee's can of yarn that are spun. I doubt if the production in the country is as much as 2 per cent of the total production in the country. If the actual protection to-day is 48 per cent and 16 per cent is what is afforded under this bill—and I think these figures do not exaggerate the conditions-then, instead of the moderate reduction that the handbook's statement would imply has been made in this schedule, a reduction from 42 per cent to 26 per cent, what we actually have is a reduction from 48 per cent

to 16 per cent, or to about one-third of the present duty. That this estimate is absolutely correct I do not pretend to say, but that it much nearer represents changes that have been made by this bill than is suggested by any figures that have been put forth by the authors of it I think is indisputable. Their satements certainly enormously underestimate the changed conditions under which this industry will be carried on if their bill becomes a law.

EXAMPLES OF CHANGES.

As an example, a very common fabric made in large quantities both North and South is a 40-inch 80 by 80 plain cloth, weighing 3.90 yards to the pound. The duty under the present law, as under the previous one, is 3 cents a running yard. The price of such a cloth in England last December, under very profitable conditions of trade, was something under 6½ cents a yard. I have no doubt there would be many periods when that cloth would sell in England at 6 cents. The duty under the present bill would be 12½ per cent, or three-quarters of a cent per yard, which is a reduction of 75 per cent of the duty now paid.

As another example, take a 39-inch 84 by 124 sateen, weighing 3.75 yards to the pound, a fabric which fairly represents a very considerable group. The duty under the present law is 4.87 cents per running yard. Under the proposed law it would be 17½ per cent, provided the examiner in the customhouse tested a sample of it which showed the yarn as fine as it actually was. The fine yarn in it, however, would probably come very close to the dividing line of the classes, and a very slight error in the examination would make the duty on this cloth 121 per cent. The value of it in the era of high prices in England in the spring of 1911 was 8.8 cents per yard. At a duty of 171 per cent this would be 1.54 cents per yard, or a reduction from the present duty of 3.33 cents per yard, a reduction equal to 68 per cent of the present duty. However, if, as might readily be the case, the examiner found that this cloth came under the 121 per cent duty class, the duty would be 1.1 cents a yard, which would be a reduction of 3.77 cents a yard from the present duty, equal to a reduction of 77.4 per cent from the duty now paid.

DASIS OF CLASSIFICATION.

I have discussed so far the character of the so-called information which the committees have given in regard to this bill. I have endeavored to show how inaccurate and misleading it is. I want now to discuss what, from a practical standpoint, I believe is the most serious, illogical, and inexcusable provision of this bill, and that is the particular factor of cost that has been used to classify cloth. This classification has been made to depend entirely upon the finest number of yarn of which the cloth is composed, and, depending upon this feature solely, cloth has been divided into eight classes.

Cloth whose finest number of yarn is not finer than No. 9 has a duty of 7½ per cent ad valorem; containing yarn from 9 to 19, 10 per cent; from 19 to 39, 12½ per cent; from 39 to 49, 17½ per cent; 49 to 59, 20 per cent; 59 to 79, 22½ per cent; 79 to 99, 25 per cent; and above 99, 27½ per cent. When this cloth is bleached, contains color in any form, is figured or mercerized, 2½ per cent is added to the rate of each of these classes.

The assumption here is that the only important element varying the cost of cloth or, to be more exact, varying the labor cost as compared with other costs is the difference in the fineness of the yarn. That undoubtedly is a cause of variation of this cost in making cloth just as it is in making yarn. But it is by no means the only cause of such variation nor in very many cases the most important cause. The great development that has taken place in the manipulation of cotton during the last quarter of a century has been the decoration that constant experiment and increased experience has made possible to apply to these fabrics, so that to-day starting with a very inferior raw material, so far as price is concerned, some products of the cotton loom both for wearing and decorative purposes rival in beauty the products of wool and silk.

It is in this development, so far as this country is concerned, that New England has taken the lead. The fierce competition the cotton-manufacturing industry, originally confined substantially to the Northern States, has been subjected to for the last 25 years by the lower wages, the longer hours permitted by law, and the employment of younger children in the Southern States took away from New England the manufacture of the coarser and commoner fabrics. She has found a legitimate field to replace the gap thus made by the production of these more artistic and more difficult fabrics. Where there were but few mills in New England 25 years ago that were making what are commonly known as fancy goods—and those few were only making fancy fabrics which would now be considered of a simple character—a very considerable part indeed of her machinery is now em-

ployed in making these higher products of the loom. The cloths to which those decorative effects are applied are not determined by the coarseness or fineness of the yarn. In many cases the most elaborate and expensive processes are used to decorate cloths composed of coarse and medium counts, and their greatly advanced value is due almost entirely to the attractiveness of their patterns and to the additional labor of both brain and hand necessary to produce them.

This bill ignores all that element of cost, except that the 2½ per cent additional duty that is applied to cloth when colored is also applied to it if figured. The effect of this is that a piece of unbleached or undyed figured cloth would have 2½ per cent more duty than if not figured. But when bleached or dyed, which is the ordinary way in which such fabrics would be imported into this country, there is absolutely no additional duty.

There has apparently been an attempt in this provision to recognize to a slight extent the difference in the cost between undecorated cloths, ordinarily made on the automatic loom, and the fancy cloths of much greater labor cost; but it will be in practice entirely inoperative, because to escape its provisions entirely it is only necessary for figured cloths to be imported in a bleached or dyed condition, under which circumstance there is no additional duty over ordinary cloth, an arrangement the logic of which is rather incomprehensible.

DECORATED CLOTHS NOT RECOGNIZED.

This cost of decorating cloths, which is only recognized by this abortive provision, is not only as much but in many cases very much more than the difference in labor cost between coarse yarns and fine. Yet while cloths of ordinary numbers, from 9 to 39, have 121 per cent duty and the same cloths, if made out of yarns of numbers 80 or 90, have 25 per cent duty, twice as much as the cloths made out of the coarser yarns, the decorated cloths would have no increased duty at all. If the makers of this bill recognize that it is proper to increase a duty because there is a greater labor cost in fine yarns as compared with coarse or because cloth made out of fine yarns is more of a luxury than when made out of coarse yarns, then it is most illogical to make no provision for this other equally costly and equally luxurious product. It is evident that if the differential they have used in the one case is a proper one and puts the articles to which it applies on an equality as regards protection, then it leaves these figured fabrics in a most unprotected condition. There is no logical reason for having a large differential for one case and none at all for the other, and the inevitable result of this bill must be the loss to this country of a very considerable part of that kind of product.

To show more clearly what I mean I have here a few illustrative samples of cloth. This fabric which I hold in my hand is a common, ordinary piece of plain cloth, of which great quantities are made in the South. It has 48 threads in the warp and 48 threads in the filling, takes 2\frac{3}{4} yards, 40 inches wide, to weigh a pound, and is made of about No. 15 yarn. Bleached or dyed it would pay a duty of 12\frac{1}{2} per cent. Here is also a piece of what is commonly known as print cloth, made from yarns between 19 and 39, and colored or printed or bleached it would be subject to a duty of 15 per cent. Both of these fabrics are commonly made on the automatic loom, and the largest percentage of their cost is represented by cotton; the labor cost is some 20 or 30 per cent.

I have here also some samples of decorative weaves, all of which are made out of coarse or medium numbers of yarn, from 19 to 39, so that in spite of the very evident additional cost of such fabrics the duty upon them would be exactly the same as upon this piece of print cloth, which has the same yarns, and only 2½ per cent more than the very heavy, coarse, southern sheeting. These fancy cloths all require some kind of special attachments on the loom to produce them, such as Jacquard head, dobby head, leno motion, drop box, and so forth, and the complication of weaving them is such that but a few looms can be run by a weaver. I think I would not be at all out of the way in saying that the percentage of labor cost in such fabrics is two or three times the labor cost of these plain, undecorated goods. Here is one in particular which requires a Jacquard head, a leno motion, and a drop box to produce itthree expensive loom attachments. In this fabric the cotton constitutes about 25 per cent of its cost, and 75 per cent of its value is the cost of converting that cotton into cloth. theless it falls in identically the same classification in this bill as the piece of print cloth, and would be subject to a duty of only 15 per cent. Such samples can be accumulated here indefinitely, for they are made in enormous number of varying patterns and varying constructions of cloth; but I presume it is not necessary for me to illustrate this to a greater extent.

What I am simply trying to demonstrate is that here is a great group of fabrics whose larger cost is entirely ignored in the classifications of this bill and that such fabrics are the luxuries of the textile trade, as much luxuries as silks of any class can be considered luxuries, and yet, while under this bill a duty of 45 per cent is put upon silk cloths of all kinds and 35 per cent on woolen cloths of all kinds, these cotton fabrics, equally creditable, equally attractive, and with much higher percentage of labor cost than is in the great majority of silk and woolen fabrics, have been entirely ignored and the classifications of this bill are such that they receive one of the lowest rates of duty put on any product of the loom.

Now, my friends, if your great leader thinks the necessities of the time call for efficiency, they call for efficiency just as much in the Halls of this Congress as they do in the weave room of a manufacturing establishment, and when you undertake to treat products of a similar character in entirely different ways so that one has two and one-half times the protection and another has three times the protection of some other, you can not claim to be writing a scientific or just or impartial act. On the contrary, it is capricious, illogical, and indefensible.

I know-or, at least, it is commonly said-that in the secret councils in which you have discussed this bill you have decided that you will not change it, but I think this matter which I am bringing to your attention is of such importance, the claim which I am making is of such manifest justness, that I hope you will not ignore it, and I will introduce an amendment to this bill which will, at least partially, meet its requirements.

WHAT HAPPENS TO DAMASK.

I have said that these fancy weaves have not been taken into consideration in assorting the duties under this bill. But there is one exception. Paragraph 268 reads:

Cotton table damask and manufactures of cotton table damask, or of which cotton table damask is the component material of chief value, not specially provided for in this section, 25 per cent ad valorem.

Cotton table damask differs from ordinary cotton cloth of the same width and count of threads and weight merely because it has a figure upon it produced by the Jacquard loom. It is made of coarse yarns, usually between Nos. 15 and 30, not of a large number of threads to the square inch, and if it were not figured would be a cloth of very common construction. It is essentially a southern product and its chief place of manufacture is the Rosemary Manufacturing Co., Roanoke Rapids, N. C., in a mill managed by J. L. Patterson. It is woven there upon an automatic loom to which a Jacquard head has been applied, and the gentleman who has charge of that mill has obtained a patent for the use of the Jacquard head in connection with an automatic loom and threatens with legal action anybody who

attempts to use that combination in weaving cloth.

As compared with these highly decorated fabrics which have been showing, the percentage of labor cost in making this cloth is not large. Nevertheless, in spite of the monopoly of a certain form of economy that is attempted to be established by the makers of this fabric the only fancy cloth among all the thousands of kinds of such cloth that are produced in this country that has an increase of duty on it because it is a fancy weave is this cotton damask. If this was a perfectly plain piece of cloth, it would pay a duty of 15 per cent under this bill. because it has a Jacquard figure in it the duty is increased to 25 per cent, an increase of 66% per cent of the duty on the plain cloth. I have shown you a great variety of fancy fabrics which come under exactly this same classification of yarns, from 19 to 39, and which, under this bill, will receive not one iota of additional protection, and I hope the chairman of this committee or the distinguished Senator from Georgia who has charge of it will take occasion to explain to the Senate and to the country the reason why such a distinction is made.

I am not in the slightest degree suggesting that the duty on damask is too high. I know it is not. It is a reduction from a present duty of 40 per cent. Under that duty cotton damask to the extent of \$312,795 is being imported. I think 25 per cent is too low a duty to put upon that article. It is as much entitled to 45 per cent as silk cloth is, or to 35 per cent as woolen cloth I am merely asking that at least the same treatment which is accorded to this cotton damask of North Carolina shall be accorded to the precisely similar products of the Jacquard and other fancy looms of New England, New York, and Pennsyl-

JUTE BAGGING.

In comparison with this duty on cotton damask, to have what weight it may in disclosing the motives and methods that have made this tariff bil what it is, I want to stop long enough at this point to contrast the treatment of damask produced in the South with the beatment that has been accorded to jute bag-

ging consumed in the South in baling cotton. There is a duty on that article to-day of 6/10 cents, amounting to 10 or 12 per cent ad valorem. In this bill, as it came from the House of Representatives, out of all the products of the loom, whether the raw material is silk, or wool, or cotton, or jute, or whatever it may be, the only article that did not have a duty of some sort upon it was bagging to be used by southern planters, which they buy at 5 or 6 cents as may be and sell when put around their bales at 10 or 15 or 20 cents, depending on the price of the cotton it incloses. And that article is still on the free list as reported to the Senate. I can understand the logic of a free trader; I understand and sympathize with the logic of a protectionist; but the man with whom I can not have patience is the one who wants to have a duty on what he sells but expects to have what he buys on the free list.

NOVELTY YARNS.

In addition to the decorative effects that are produced by making figures in the process of weaving there are others that are produced by what are called novelty yarns. The aim in making the ordinary yarn or thread is to make it as even and regular in size throughout its length as possible, to make it uniform. But at times fashion asks for effects that are obtained in exactly the opposite way, and yarns are made so as to obtain a great variety of rough effects. They are filled with nubs and made as irregular as possible, the endeavor being to get a thread that is very thick in some places and very thin in others, and these are produced in a very great variety of different patterns. They are usually coarse yarns that are treated in this way, sometimes single yarns, and sometimes the effect is produced by twisting two or more yarns together in an irregular manner so that one of the threads will in places pile up in nubs or bunches on the other strand. I have here some cards showing samples of a variety of these effects. 'The additional cost of producing them is in most cases very considerable and, as a rule, it is all labor cost. The use of them varies according to the fashion of the day. Just now, a certain form of them is being used in very considerable quantities to make what is known as a ratine that has been for the last year or so one of the most popular fabrics for women's wear.

As a rule, also, the labor cost of weaving cloth is very materially increased by the use of such yarns. No attention is paid at all in this bill to any of these considerations. are utterly ignored. The duty assessed upon the yarns themselves and the cloth containing them is exactly the same as

though they were of ordinary construction.

Certainly, if this schedule is to be a defensible one and the product of efficient methods and if it endeavors, as it apparently does, to make a distinction in its rates of duty between one cotton product and another on account of cost, it must be thorough in that respect. There is no excuse for elaborate distinctions being drawn in some cases on account of difference in cost and equally great or much greater causes of cost variations from other causes being entirely ignored. Nevertheless think these illustrations show conclusively that that is exactly what has occurred.

NORTH AND SOUTH.

This cotton business is peculiar in one respect, in that it is carried on in two differenct sections of the country and under very different conditions. In thinking of cotton goods, we are apt to get in the habit of assuming that because things are made out of the same raw material they can, in tariff making, be bunched under one common head and be properly treated by some uniform duty. This is not the case, for there is as great difference between things that are made from cotton as though the raw material had been in one case cotton and in another silk or wool, and these differences are largely increased when, as happens to be the situation in this industry, the conditions under which the manufacture is carried on are dissimi-As an illustration of this, I quote from the census report of 1910, upon the percentage of labor in making cotton goods: Maine, 30.2 per cent; New Hampshire, 29.6 per cent; Massachusetts, 27.4 per cent; Rhode Island, 29.1 per cent; Connecticut, 28.5 per cent; an average of 28.9 per cent. Compare this with the situation in the South, where in Georgia it is 17.7 per cent; in North Carolina, 18.5 per cent; and in South Carolina, 20.2 per cent; an average of 18.8 per cent. These, of course, are averages, but they show that taking the industry as a whole in these two sections the fabrics made in New England need 50 per cent more labor to produce than those made in the South.

So far as this cotton schedule is concerned, it is a bill made by southerners, and I say it in no disrespect and in no criticism of individuals. I know how diligently the members of the subcommittee of the Senate who took this cotton schedule under

consideration endeavored to understand the problems that were involved in it. I know that the junior Senator from Georgia, who took a prominent part in these deliberations, gave it his very best consideration, but I also know that no man can come out of the training of the law, where he has never been accustomed to dealing with these mercantile questions, and in a few weeks become an expert maker of tariffs that apply to a complicated and diversified industry of this kind.

I do believe that in the consideration of these schedules the gentlemen of the South have had the ear of the committee, and the result is shown in this bill with the products of the South protected. I do not in the least object to that. I think they ought to be protected, but I also think that the legislators who have charge of this bill, and who have the interests of the South at heart, as they should have, and who have taken care that the necessaries of the cotton trade made there are amply protected, as they should do, should at least have been willing to give consideration to the luxuries of the cotton trade, even if they are made in New England. They are entitled to the same treatment that they give in this bill to the luxuries of the silk trade, or the luxuries of the woolen trade, and if 45 per cent is justified in one case and 35 per cent in another, 15 per cent for these artistic fabrics of the northern cotton looms is indefensible, and in effect it means getting them through the door of the customhouse instead of through the door of an American mill.

AUTOMATIC LOOM. A few years ago there was produced in New England, as a result of many years of experiment, what is known as the automatic loom. It is the most important device for reducing the cost of some classes of textiles that has been devised in modern times. It was produced by Americans, to meet the conditions of this country, and never would have been produced unless the Republican tariff system had made this country the field for its About 250,000 of them have been sold in this counoperations. try and on the fabrics they are adapted to they have made great economies possible, so that the weaving machinery of this country is probably the most efficient in the world, and partly because of this it has been possible for 'hat condition to come around which the Tariff Board reported when they discovered so many American cloths selling as low or lower here as English cloths were sold in England.

But this loom is not applicable to all fabrics. There are a great many plain fabrics even which can not be made upon it with any particular saving in cost, and a very large proportion of these decorative fabrics can not be made upon it at all. But because the efficiency of this country, by adopting this device during the last dozen years or so, has made it possible to materially reduce the duty on some cotton fabrics and yet maintain a reasonable protection, is no reason for punishing that part of the industry to which this condition is not applicable, and it seems to me like commercial fanaticism to throw away that part of it in which our machinery is on an equality with the foreign because on another part of it our machinery is far ahead of it.

AD VALOREM DUTIES.

This tariff bill is an ad valorem bill. I do not believe in an ad valorem duty compared with a specific, where it is possible to apply the latter. The ad valorem affords a great temptation to undervaluations, and puts a premium on the dishonest, as against the honest, merchant. Besides being more difficult to collect, it is not stable. It fluctuates with the cost of the raw material, thereby making the Government's revenue uncertain, and provides the most protection to home industry when it is least needed—that is, when times are good and prices are high—and the least protection when it is most needed, at times when business is quiet and prices are low, and when the foreigner is only too glad to get a market at any price for the goods he can not sell to his regular trade. I do not for a moment believe that where the rates have been written in this bill as 10 per cent or 15 per cent or 20 per cent ad valorem, or whatever they may be, that that will be the rate collected in actual practice.

I think it is particularly objectionable that the system of specific rates which has prevailed in this cotton schedule for some 50 years, both under Republican and Democratic administrations, should have been abandoned because, as a result of constant study during that long half century, there has been evolved a scientific system of applying them that is not equaled in any other schedule of the tariff,

YARN DUTIES.

Under the present law the duties on cotton yarn is an example of this. Starting with a basis of $2\frac{1}{2}$ cents a pound up to No. 15, one-sixth cent per pound is added for each number

between 15 and 30, and one-fifth cent per number for each number from 30 up. This gives a uniform differential, worked out as a result of experience, so that the duty varies uniformly with the variation in fineness of the yarn. It is easy to collect, as all it is necessary to do in the customhouse is to find the number of the yarn. It is not necessary to fix the price. Undervaluation is impossible, and there is nothing to quarrel about. It constitutes an equitable sliding scale of duties, varying uniformly in proportion to the variations of cost. This bill substitutes for it a stepping-stone system, by which the numbers are grouped into classes, and wide variations are made in the duties of each class. For instance, yarns from 19 to 39 pay 10 per cent duty; yarns from 39 to 49, 15 per cent duty. Under this system, the duty is exactly the same on No. 20 yarn as it is on No. 39, although the No. 30 is twice as fine as the No. 20. But on No. 40 yarn, which is only one number finer than 30, the duty has been increased by 50 per cent of the rate for No. 39.

It is sometimes necessary in making variable duties to use this stepping-stone classification, but it is never desirable, any more than it is ever desirable to use an ad valorem duty when a specific duty can be substituted for it. In the case of this yarn section, if the authors of the bill merely wanted to reduce the duties, it was a perfectly simple and feasible thing to reduce them to any extent without in the slightest degree destroying the very perfect system under which the duty is now assessed. They could reduce the specific rate by one-fourth, by one-half, or by three-fourths, or anything they pleased, and still retain the system. If they object in this case that they want to substitute ad valorem duties, then I hope some member of the Finance Committee will explain why in the silk schedule they are offering an amendment adopting a specific duty for silk yarns. In the present law, for the first time in the history of tariff making, a specific system of duties was worked out that was applicable to the silk trade. Such a system had not been adopted before because no one had worked out a method by which specific duties could be equitably applied to that particular industry. But it was done during the consideration of the Payne-Aldrich bill, and I understand that in practice it has given excellent results both from the standpoint of the Government in collecting its revenue and from the standpoint of the users of silk. But it is in no sense as perfect and well distributed apportionment of duties as is this present cotton-yarn schedule, the form of which is as near to perfection as probably could be devised, and I fail to understand under what influence the Senate committee should have taken the wise step of substituting this form of duty for silk yarns when they are abandoning the very same idea, although much more perfectly developed, in the cotton-yarn schedule.

UNIFORM DIFFERENTIAL.

Even if they were fixed in their determination, contrary to all good precedent as it is, to use this utterly unnecessary ad valorem duty for this yarn schedule, even then they need not have adopted in the application of that ad valorem duty the stepping-stone system, for it is as easy with an ad valorem duty on yarns to make a uniform differential to apply to yarn as it was to apply a uniform differential with the present specific duty. This yarn schedule begins with a duty of 5 per cent on the coarse numbers, and ends with a duty of 25 per cent on No. 99. The difference between the two is 20 per cent, and it covers 100 numbers, which is equal to an average of one-fifth cent per number. By starting with a proper basis and simply adding one-fifth per cent ad valorem per number, they would easily have avoided the objections to which the stepping-stone system they have adopted is subject. They would not have had the glaring inconsistency, which in this case was entirely unnecessary, of having a duty 50 per cent higher on No. 40 than on the No. 39 just below it. THREAD.

I want to call attention to paragraph 256, which provides for 15 per cent duty upon thread. Thread is made by twisting two or more strands of yarn together, thus forming what appears to the eye like a single thread. The ordinary yarn is the raw material of this product. It is usually made, and this particularly applies to the thread sold at retail for domestic use, out of very fine numbers of yarn. It requires great perfection in its manufacture, much greater perfection than is ordinarily obtained or than is commercially possible for weaving yarns. There are some 40 domestic manufacturers of it. Some \$30,000,000 worth are produced annually. This product is divided into two classes, thread for manufacturers' use, which is generally sold in large quantities, and thread for retail, or domestic thread, as it is commonly called. The manufacturers'

thread constitutes about two-thirds of the industry, some twenty millions, and the domestic thread one-third of the industry, or

ten or twelve millions.

This domestic thread is made principally by one part, in this country, the J. & P. Coats Co., whose American factory is in the city of Pawtucket, in the State of Rhode Island. This company largely controls this part of the thread product in this country and over a substantial part of the world, and it has done so for a great many years. The reason of its control is because it makes the best thread, and always has. Thread demands great perfection. It must be as nearly uniform as possible throughout its length, and uniformity is a very difficult thing to attain. It must be put upon a spool in one unbroken length. Its total cost for a household is very small, and the woman who buys it cares more for a good article than she does for a low price.

The principal numbers of single yarn out of which this household thread is made are in the neghborhood of No. 100. The duty on No. 100 yarn in this bill, bleached or colored, is 27½ per cent, but when strands of that number have been twisted into a thread the duty is only 15 per cent, or about one-half. The labor cost of turning cotton into thread is probably double the cost of turning cotton into ordinary commercial yarn of the size

of which that thread is composed.

The only reason I have heard for protecting the labor employed in thread making about one-fourth what is given for the labor employed in making the yarn of which it is composed is this question of control. It is plain from the existing situation in that industry that no benefit can result from an attempt to attack this control through the tariff. You can not make J. & P. Coats in Paisley, Scotland, compete in price with their factory in this country. If, because of this very low duty, they can market their English product here cheaper than they can make thread here, they will undoubtedly do so, sell it at the same price, and make that much more money. And the only effect of the change will be that the labor now employed in their Rhode Island factory will either lose their employment or be asked to accept lower wages.

The twenty millions or so of manufacturers' thread, in the production of which some 40 American mills are engaged and in which there is active competition, as I understand it, will be put at a greater disadvantage as regards foreign competition

than any other producer of yarn in America.

I see no logic in this duty. If it is an attempt to punish J. & P. Coats for adopting a policy in the manufacture of thread that somebody thinks is against American public policy, the only possible party who can be benefited is the party whom it is sought to punish, and the only parties who will be injured will be the parties who are entirely innoc nt of any wrongdoing. It is a bull-in-a-china-shop proceeding. If the law against monopoly has been violated in any way the Department of Justice is the one to deal with it. I certainly hope the inequality in this thread duty will not be persisted in, and that the large number of working people who now find employment in that industry which, on account of the necessity of obtaining skilled workers to attain the perfection needed pays wages above the average, will not lose their employment.

CLOTH CLASSIFICATION.

In addition to the yarn being grouped into classes according to numbers by this stepping-stone system, cotton cloth is classified in exactly the same way, and into the same subdivisions, but with duties $2\frac{1}{2}$ per cent higher for each division, as compared with the yarn; that is, on cloth containing yarn not finer than No. 9 the duty is $7\frac{1}{2}$ per cent for cloth in the gray and 10 per cent for cloth colored, and so forth, as compared with 5 per cent and $7\frac{1}{2}$ per cent for the unwoven yarn, according to

whether it is gray or colored, and so forth.

I want to consider with what ease duties can be collected on cloth classified in this manner. It is not a new thing to have the duty vary according to the number of yarn in the cloth, being higher as the cloth is made out of finer yarns or, in other words, is lighter in weight. In the present law, and in previous tariff laws for many years, cotton cloth, for the purpose of tariff making, has been divided into classes to which varying rates have been applied, depending in the first place upon the number of threads in a square inch of cloth, and these classes then divided into subdivisions according to the fineness of the yarn in the cloth. In the present law, for instance, one class comprises cloth containing not over 50 threads to the square inch; the next comprises cloth containing from 50 to 100 threads to the square inch; the next 100 to 150 threads to the square inch, and so on. Cloth in this last class has a duty of 1½ cents per square yard if it takes more than 4 square yards to weigh a pound; 2½ cents if it takes between 4 and 6 square yards to weigh a pound; 2½ cents if it takes between 6 and 8 square yards to weigh a pound; 1½ cents if it takes between 6 and 8 square yards to weigh a pound. This latter provision is the

one which varies the duty in accordance with the fineness of the thread.

To determine all the conditions necessary to classify cloth under these countable schedules, as they are called, which include the great bulk of cloth manufacture, is merely to count the number of threads to the square inch, which is very readily done in a few minutes by the aid of a special magnifying glass provided for that purpose, and then put any convenient length of it on a scale and weigh it. This description of cloth conforms to the market stipulations used in buying and selling cloth in this country, and to which merchants are thoroughly accustomed.

NEW CLASSIFICATION DIFFICULT.

In this new bill the division of the cloth into classes, according to the finest yarn it contains, is a matter very difficult to determine, because the classification is dependent not upon the average number of yarn that is in the fabric, but upon the finest number of yarn which it contains. The classification of the present law, so far as it depends upon the fineness of the yarn, is determined by the average number of yarn of which the cloth is composed, which is manifestly the only proper way in which a change of duties depending upon this consideration

should be based.

Cloths are made for various purposes sometimes out of very disproportionate numbers. The ordinary way of making cloth is to have the warp made of a little coarser number than the filling, because in weaving there is very much more strain on the warp than on the filling and the coarser the yarn, other things being equal, the stronger it is; so a piece of print cloth is made of 28 yarn in the warp and 36 yarn in the filling, and some such proportional difference is the usual standard. for many special purposes, cloths are made of very widely different numbers and not infrequently the amount of the fine number used is a very small part of the total cloth. I have in my hand a sample of cloth containing three different numbers of yarn, one number in the warp and two in the filling. The warp yarn and the coarse number of the filling yarn are coarser than number 39 and constitute in the neighborhood of 88 per cent of the total construction of the cloth. But the other number of the filling is about No. 85 and constitutes only some 12 per cent of the total fabric. Nevertheless, under this bill, because there is 12 per cent of that yarn in the cloth it would pay a duty of 25 per cent, although the average of all the numbers contained in the fabric is between No. 19 and No. 39 and would not entitle it to a duty of over 15 per cent. A piece of cloth made entirely of No. 85 yarn would be subjected to exactly the same duty as this piece that contains only 12 per cent of that number. While the average of the yarn in this cloth is such as would put it into the 15 per cent class, it is subjected to a duty two-thirds greater than a cloth having the same average number, but in which that average was made up of numbers which themselves were between 19 and 39.

BUREAU OF STANDARDS.

This method of classifying cloth for dutiable purposes by the finest number which it contains is a novelty so far as American tariffs are concerned. I think it must be a novelty so far as tariffs of any country are concerned, because I have discovered no other place where such a method is now or ever has been resorted to. It is apparent that when it first came up for consideration the possibility of ascertaining the finest number in a piece of cloth was a matter of some consideration, because Mr. Underwood consulted the Bureau of Standards in regard to its possibilities, and the reply of the Bureau of Standards is published in the Congressional Record of July 28, 1911. They say:

28, 1911. They say:

An analyst can readily determine the count of yarns used in the manufacture of any fabric. The accuracy with which this can be done depends upon whether the count is to be given for the yarn in the finished condition or in its gray condition, previous to weaving. If the count in the finished condition is desired, it can be determined accurately within one-half count for warp yarns and one count for the weft or filling yarns. If it is desired in the gray condition previous to weaving, the possible accuracy will depend largely upon the nature of the fabrics. Fabrics having very slight amounts of loading or finishing materials upon them can be analyzed with an accuracy of one count for the warp yarns and two counts for the weft yarns. Fabrics having large amounts of loading or finishing materials which have to be extracted before they are returned to the gray condition can be analyzed with an accuracy of two counts in the warp yarns and from three to four counts in the weft yarns.

And then they go on to say that this result can be obtained

And then they go on to say that this result can be obtained by the analysis of a piece 4 inches square cut from the fabric. I do not say that it is impossible by very careful analysis to find out in most cases approximately the numbers of yarn of which cloth is composed. But that it is easy to do or can be done with anything like the accuracy which the Bureau of Standards sets forth in this letter and by the use of a 4-inch sample, is utterly impossible. It is impossible not because the

different kinds of yarn of which the 4 inches may be composed can not be unraveled and accurately weighed but because the art of spinning yarns for ordinary commercial use has not yet advanced to that point of perfection that so small a quantity of yarn as is contained in 4 inches of cloth can be depended upon to show the actual number in the whole cloth with anything like the accuracy which is here described. The Bureau of Standards have no methods of ascertaining the number different from those commonly employed in the trade. Their methods are exactly the same that have prevailed ever since I have known anything about it, and that is a great many years now.

When this statement of the grounds upon which this classification was proposed to be made was first given to the public two years ago I was very much surprised at the claim that a correct determination of the number of the yarn in cloth could be ascertained by an examination of so small a quantity, because the accuracy of the determination was greater than the

perfection of the article itself.

And I was still more surprised that the bureau should claim that they could ascertain not merely the number of the yarn as it actually appeared in bleached or dyed cloth but that they could also tell with such accuracy, as they claimed, from an examination of bleached or dyed cloth, the number that this yarn had in the gray cloth before it had been submitted to any of these so-called finishing processes, because when a piece of cloth is bleached it loses a certain amount of its weight by the process of bleaching; when it is dyed, in many cases, it absorbs a certain amount of weight; and this loss and gain vary according to many conditions. Therefore to attempt to argue with great accuracy from the weight of yarn as it has been taken from a bleached or colored fabric back to what it may have been in the gray is so unreliable a process, unless the investigator knows all the details of the treatment the cloth has been subjected to in the finishing process, that very few manufacturers will undertake to exactly duplicate a complicated piece of finished cloth without first making an experimental sample. And when they do it they are very apt to find that they have to modify materially their judgment as to how the fabric was composed.

BUREAU ASKED TO MAKE TESTS.

To test therefore the reliability of the claim, shortly after this letter was made public, I submitted to the bureau some samples of yarn in the gray and some samples of cloth, asking them to make an analysis such as they have proposed. I submit in full the correspondence and the report which they made to me. (Appendix B.) I have samples here, if anybody is interested, of the five cloths that I submitted. Most of them were bought within a day or two of my letter in one of the local dry goods stores. They are, of course, samples of the kinds of cloth in which some difficulty would be found in making these analyses. But there are thousands of cloths of equal or greater difficulty of analysis which the customhouses will have to examine in this way if this bill becomes a law. The bureau, in its letter, claimed that the number could be ascertained within one-half count for warp yarns and within one count for weft or filling yarns. The most instructive exhibit of the possibility of doing this is shown by the variations in the numbers which were found in the samples of yarn of which tests were made of 20 successive lengths of 28 yards each. that being about the quantity of yarn that they would find in 4 inches of cloth. In sample A the variation was from No. 63.1 to 69.3, a difference of 6.2 numbers; in sample B the variation was from 63.8 to 70.7, a variation of 6.9 numbers. And so it goes on through the different samples. These variations are not different from what is found ordinarily in weighing small quantities of yarn for testing the number in the ordinary process of manufacture. But it is evident from this variation in the actual yarn itself that what the Bureau of Standards has claimed to do is to determine the number with an accuracy that does not exist in the yarn itself.

In their examination of the cloth, instead of getting results within one-half count of the warp yarn as they claimed was possible, in sample No. 1, with only three weighings, they found a variation of 2.1 numbers. In sample No. 2 in the warp a variation of 4.4 numbers, nearly nine times the maximum variation within which their letter claims they could work. And similar results are apparent in the other parts of their report.

Further than this, what I asked for was for them to give me the count of these yarns in the gray. In two of the samples I knew what this gray count was, or approximately, and I should have been very much surprised if they had obtained it with anything like the accuracy to which their letter claimed they

could attain. But they did not even undertake it, and the reason they give in their report is, "The values" (by which they mean the count) "are for the yarn in the woven condition, since the 'take up' in the weave of the five fancy fabrics is so uncertain, on account of the extra filling to obtain the figure, that it is difficult to correct for it and reduce the count to the yarn in the gray." So that, instead of it being a fact that "an analyst can readily determine the count of yarns used in the manufacture of any fabric," this test shows that it is a matter of some considerable difficulty in some fabrics, and shows further that so far as doing it with anything like the accuracy they have claimed it is impossible.

The classifications into which this bill divides cotton cloth are made to depend upon a difference of one single number in the size of the yarn, and a very material difference in the duty depends upon ascertaining accurately what that number is. If that number is 48½, the duty is 12½ per cent; but if that number is 49½, almost one-half is added to that duty, and it becomes 17½

per cent.

COST OF TESTS.

In addition to asking the bureau to make this test of the number of the yarn, I asked them also to give me a statement of the time and cost of the analyses; also to count the thread per square inch of these samples, that being the way to classify cloth under the present bill, and to give me the time and cost of this process as well. I think the result is very interesting as bearing upon the practicability of adopting this hitherto untried system of classification. The result is given in Table No. 4 of their report, and it shows that on these five samples which I submitted the time consumed in an analysis for the yarn varied from 11 hours to 5 hours and the cost varied from 64 cents to \$4.76; and this was but for a single examination. To be at all sure in actual practice that an analysis of this kind was accurate it would be necessary for the examiner to check it up by making at least one other similar analysis in a different part of the fabric, and that would mean adding materially to the time and cost which the bureau reported, although I do not suppose it would double it. In comparison with this the bureau determined the threads per inch of these fabrics to get the classification under the present law. The time required was from 5 to 15 minutes and the cost was from 8 to 24 cents to a sample, which certainly shows a very material difference in the cost and trouble to the Government of classifying cloth under the present method as compared with the method they propose to establish. It was two weeks after my inquiry before I received the report of what the bureau could "readily determine.

The bureau says, in explanation of these costs, that no doubt employees working continuously on such work could so systematize it as to accomplish four or five times as much. Probably they could reduce the time and cost, but I think it very doubtful that they could make anything like the saving that the bureau guesses they could. But it is also true in making a comparison of the cost of the two methods that it does not, I expect, take the present examiners in the customhouses anything like the time to determine the count that was taken by the Bureau of Standards, so these two anticipated efficiencies would doubtless offset each other to a considerable extent.

ADMINISTRATION.

Under this bill the domestic producer has no way of obtaining information as to how carefully a law of this kind is being administered. Even if the importer of the cloth for any reason believed that the rate is lower than it should be there is no lawful step he can take to compel an increase in it. There is no provision for any interested party except the importer and the Government to obtain any knowledge about how these rates are being assessed; and even if he obtained the information, there is no legal provision by which his views could be submitted to a court for decision.

On July 17 there was published in the New York Commercial an interview with Mr. Downing, the chairman of an importers' committee formed to have this tariff bill made as favorable as possible to their interests. He was congratulating himself and his fellow importers upon the favorable provisions they had been able to obtain in the administrative sections. With such provisions as these it is no wonder these gentlemen who represent the looms and the spindles of England rejoice when they find a system of classification of cotton fabries whose meaning has been established by the experience of half a century's use, and whose terms have been interpreted by repeated decisions in the courts, abandoned and replaced by a new and unheard of classification, under which it is impossible for even a thoroughly impartial tribunal like the Bureau of Standards to determine

with any exactness the conditions that exist in a piece of cloth that will fix its status as regards whether it should pay one

duty or another.

To count the threads in a piece of cloth for the purpose of deciding what duty it shall pay under the present law can ordinarily be done in half a minute. If there is any doubt about it the threads can be counted very quickly in a dozen places, and there is no injury done to the cloth. To cut a sample from a piece of cloth, to pull out and separate the different kinds of yarn and ascertain exactly the finest number, is a tedious operation. If an examiner made twenty such examinations probably no two of them would give the same result. The report of the Bureau of Standards on the yarn which I submitted shows that that yarn varied six numbers in 20 weighings. The change of one number makes a difference of 5 per cent in some cases in the rate of duty the article has to pay.

cent in some cases in the rate of duty the article has to pay.

An examiner so disposed—and powerful pressure can be brought to bear upon the examiners by the great importing interests that the possibilities of business under this bill will bring them in contact with, and pressure that is not bribery either but is just as hard to resist—whose first test shows that the fabric ought to go in a class paying the higher duty, can easily decide that he ought to make another test or two or three, and it would not be surprising if in one of them he discovered conditions that would justify him in classifying the fabric for the lower duty and which he would decide was the

controlling test.

The importer knows how his cloth is made. What will inevitably happen, therefore, will be that in addition to the absolute undervaluation in price that the adoption of this advalorem duty will cause, whenever an examiner makes a mistake and analyzes the yarn in a piece of cloth as being coarser than it is in fact, there will be no protest on the part of the importer; but whenever by any chance the analysis shows the yarn to be finer than the importer thinks it is, or whenever the analysis shows that the yarn is fine enough so that it brings a fabric into a higher class by a small margin, there will be appeals and demands for reexamination on the part of the importer, a process which will cause constant friction and will make an opportunity under this classification for the possibility of deliberate fraud that has not heretofore existed in this textile schedule.

It will not be possible to keep for any length of time all these little, minute frayings of cloth, upon the weighing of which the determination of these classifications has depended, and when they are once destroyed there will be no possibility of checking up the reports.

HOW TO MAKE YARN CLASSIFICATION.

I have gone into some detail in trying to show some of the features of this proposed classification of cloth in accordance with the highest number of yarn it contains. If it was necesin order to establish classification by numbers that it should depend upon the highest number, and if there were good reasons outside of that for preferring a number classification instead of the thread-per-inch classification now used, doubtless we could put up with these inconsistencies and expenses. But it is easily possible to get a much simpler method of making this classification, and that simpler method is the one by which the difference in classification on account of number is made in the present law and in many previous laws. And that is simply to make the classification depend not upon the finest number of yarn that happens to be in the fabric, utterly irrespective of the amount of that yarn that might be present, but to base the classification upon the average number of all the yarn that is contained in the cloth. As I have already explained, all the steps it would be necessary to take to acquire the information to assign a piece of cloth to its proper classification under that arrangement is simply to count the number of threads and to weigh the fabric, exactly as it is done to-day.

If that should be done, then to raise an equal amount of revenue or to give an equal amount of protection, whatever may be the theory on which the bill is written—and I do not know what it is, because some of the schedules of this bill are as highly protective as the most extreme protectionist could ask, and they go down through successive gradations to articles on the free list for whose presence there I can see no more reason than for many of those that are covered by duties—it would be necessary to make the differential of $2\frac{1}{2}$ per cent between duties on the cloths and yarns a little higher—certainly 5 per cent, and perhaps $7\frac{1}{2}$ per cent. By so doing probably most cloths would pay practically the same duty as they would under the arrangement of the bill, and all these difficulties of administration arising from the long and delicate process of analyzing the fabric, necessitating as it does the destruction of a certain part of it, would disappear at once.

CONCEALED DUTIES.

I do not know in whose mind this system of making classifications originated. I do not know by what arguments it has been defended. All I have ever heard advanced in favor of it was that the communication from the Bureau of Standards claimed that it was possible. It is certainly most incomplete, but I presume whoever did originate it knew that in trying to make it depend solely upon the finest number in the fabric by so doing, while apparently putting upon cloths merely 21 per cent more duty than upon the yarns of which they were woven, they were in reality making a concealed protection as applied to a great many fabrics of another 21, or 5, and in some cases of 71 per Whether the subcommittee of the Senate who had charge of the revision of this schedule understood this I do not know. In what has been published of the hearings held before them, there is no reference to it, but so little of those hearings, as I understand it, has been published that it may have been brought Whether the Ways and Means Committee to their attention. knew it I do not know, but it is one of the things they should have known, and is so plain and simple they would have known it if they had had about them some textile expert, as they

From any point of view, however, whether of administration or of a frank application of whatever duty is intended, it is objectionable. If the amount of duty now involved in this schedule is the amount that the party in power wished to impose, then the way to impose it is the way that will lead to the fewest complications and deceptions in administration.

SECRETARY OF THE TREASURY.

In addition to the difficulties and injustice which will inevitably result from this unnecessary classification, there is another feature that is also of great importance. This bill provides in paragraph 258 that the number of the yarn in cotton cloth herein provided for shall be ascertained under regulations to be prescribed by the Secretary of the Treasury. The bill itself leaves absolutely undetermined some very important features that should be decided by this Congress and not by the Secretary of the Treasury, because, as they are decided, one way or another, the rate of duty will be materially affected. It is the duty of Congress to legislate upon the amount of duties that fabrics shall pay. We may very properly leave to the Secretary of the Treasury the decision of details of administration that simply affect the ease and convenience of the merchant and the customhouse employees. But we should not permit, and it is not scientific legislation to permit, that official to decide, according to his personal inclination and without any guide expressed in law, questions that in themselves materially lower or raise the rates of duty.

or raise the rates of duty.

In this bill as it came from the caucus there was, at the end of paragraph 258, after the words "to be prescribed by the Secretary of the Treasury," a provision which read as follows:

"But the number to be determined by taking the length of the yarn to be equal to the distance covered by it in the cloth." That caucus amendment is omitted from the bill as it comes from the hands of the committee, but the question involved is not settled, it is merely side-stepped. It will still have to be decided by the Secretary of the Treasury whether, when a fabric has been dissected and the strands are to be weighed, they shall be measured to obtain their actual length, or it shall be assumed when a piece of 4-inch cloth is used for the analysis that each piece of yarn in it is just 4 inches long. Under most circumstances some of the threads in a piece of 4-inch cloth are more than 4 inches long, because they go under and over intersecting threads, and in some cases that amounts to a very considerable increase in length. It is not uncommon for threads to be 10 per cent longer than the length of the cloth, and in some decorative effects threads are put into the cloth in such a way that they are in reality as much as twice the length of the cloth itself. The covering thread of what is known as a Russian cord is an example of that sort of construction, and I have here a sample which I accidentally found a few days ago of a fabric now selling in the market where, as you will see by looking at it, the warp thread when unraveled is practically twice the length of the cloth.

The number of a thread upon which the classification in this bill depends is determined by the length of it that it takes to weigh a pound. If it takes \$40 yards to weigh a pound, it is No. 1; if it takes twice that, or 1,680 yards, it is No. 2; and so on. If, therefore, the Secretary of the Treasury should decide upon the policy which this caucus amendment represents, the length of threads such as I have described in ascertaining the number would be assumed to be just one-half of what they actually are, and the count ascribed to them, therefore, would be just one-half of what it in reality was. A No. 50 would be taken as a No. 25 to fix a classification, and if that happened

to be the finest number in the fabric, instead of the cloth paying a duty of $22\frac{1}{2}$ per cent it would pay a duty of $12\frac{1}{2}$ per cent—a very material difference.

PLY YARNS.

But a more burning question than that, and one which has been entirely side-stepped from one end of this bill to the other, is in what manner the Secretary is going to decide the question for the purpose of classification of the numbers of twisted or ply yarns, as they are called. Cloths are made frequently, for purposes of strength or other reasons, out of what are known as twisted yarns; that is, two or more single yarns are twisted together into a single strand. They appear in the cloth to the eye as a single thread. They are in reality made up of two or more threads, and it is very simple in most cases to ascertain how many single threads they are composed of, and then by weighing determine the number of those single threads. cloth contains such a yarn composed of two threads of No. 50 twisted together, it will be a thread approximately No. 25. If the Secretary decides that the individual yarns of which that twisted thread is composed are to be ignored and the size of the twisted thread as a whole is to be the one that determines the classification, then cloth in which all the elements of cost have been put, that according to the methods of this bill would entitle it to the classification of a No. 50 thread cloth, with a duty of 22½ per cent, will only pay the duty of a No. 25 thread cloth, which is 12½ per cent. Exactly this same question will have to be determined by the Secretary under this bill as it stands in regard to twisted yarns that are imported as yarns instead of as cloth, as exactly the same conditions apply.

I think a bill has been very carelessly constructed which leaves to the discretion of an executive officer questions whose decision one way or the other will affect rates of duty nearly 50 per cent. Congress should decide these questions. And that they should be left in this indeterminate form is another example of the careless, slipshod, and inconsistent construction of which this measure is full.

DESTRUCTION OF STATISTICS.

There is one other result that will come from this radical change in the way of classifying yarn and cloth, and that concerns the statistics of importations which are going to result from it. There are at present in the cotton schedule somewhere in the neighborhood of 250 different classifications. There is a separate account kept by the customhouse authorities of the merchandise that is imported under each one of these classifications, giving the amount of merchandise, its value, the duty collected, and the rate of duty that was applied. As these classifications are along the same general lines that have existed for a great many years, we have a large body of comparative statistics, going back for years, showing the fluctuations in imports and values and rates during all this period, which is very valuable for comparison and is the chief source from which is derived the information necessary for intelligent changes, whether up or down, when tariffs are revised.

In this bill there is substituted a small number of classes that divide cotton products into entirely different groups. The reports that will be made of importations hereafter if this bill becomes a law in its present form will report all the imports under these new and comparatively few divisions. There may be large quantities of imports, and undoubtedly will be, under some, if not all of them, but as to what the character of the cloth is, whether plain or fancy, whether containing a great many threads to the inch or very few, we shall have no information of any kind. We will simply have a few averages of imports, the details of which may be due to an enormous variety of causes, but which it will be impossible to ascertain. It seems a pity that this continuity of annual reports should be destroyed and no provision made for obtaining detailed information that will be useful in the future.

REDUCTION EASY WITHOUT CHANGING CLASSES.

If in order to reduce the duties in this schedule it had been necessary to adopt a different classification from the one now in existence, while all those disadvantages and inconsistencies might be deplored, they would have to be accepted. But there is no reduction that might have been decided upon for this schedule, whatever its amount, whether large or small, that could not equally well have been applied to it without in the slightest degree abandoning the present classification. Moreover, I believe the present classification is an infinitely more advantageous one than that which has been substituted for it. To be sure, to carry out an equitable reduction in this form would have required a more careful study and a more thorough understanding of this schedule than was necessary to adopt this ad valorem duty and number classification. It always takes more intelligence and more study to apply properly a specific

duty than an ad valorem. An ad valorem duty is naturally a lazy man's duty and an ignorant man's duty. It can be applied with little knowledge and less thought so as to present an appearance of fairness to the uninformed, but its result, if equity is to be the object, is as relatively unsatisfactory as its application is easy. In this cotton schedule an attempt has been made to correct some of the evils of the ad valorem system—a crude and most imperfect attempt, it is true, yet still an attempt; but in its sister schedules of wool and silk not even an attempt is made. The conditions that demand variations in the rates exist alike in each. In each there are fabrics whose labor cost as compared with other costs is small, and in each there are fabrics where this comparative labor cost is enormous. But in wool and silk a single flat rate of 35 and 45 per cent has been applied to everything, which means an enormous protection to some things and probably not enough to others. In cotton a pretentious but most inequitable system of differentiation is adopted, which, however, is not carried far enough to give to even the most elaborate products of that industry the rates that are assigned to the simplest products of wool and silk. Nothing can be more unjust or unscientific, nor can it be urged as an excuse that it was impossible to accomplish. In the silk schedule as it exists to-day there is the basis for proper differentiation. In the wool schedule proposed by the Finance Committee of the Senate last summer, where some duties outside of the compensatory duty are as low as 25 per cent, there is the basis for the same thing for most of the products of that industry, carefully worked out from data in the Tariff Board's report. If the rates there are too high for this bill, they could be made whatever is desirable without interfering with the principle involved. But to do that meant work, study, and knowledge; hence these mongrel textile schedules with their diametrically opposite treatment and their gross inequalities.

HALF-BAKED SCHEDULES.

The fact is these textile schedules are only half baked. They are not the result of thorough mastery of the subject. The rates are out of all balance one with another; similar things are given most dissimilar treatment, and no reason is assigned for it. The inference is, and I believe the fact is, that no good reason exists. They are just the capricious and haphazard result of a desire to do something, and in the shuffle cotton got the worst of it, very much more the worst of it than was meant or understood, it seems to me as I have studied it.

What, then, is the reasonable thing to do? The party in power wants to reduce these rates, but not "to move toward this end headlong, with reckless haste or with strokes that cut at the very roots of what has grown up amongst us by long process and at our own invitation," as President Wilson puts it.

"It is a condition and not a theory," as President Cleveland put it. One condition we find is that it is generally thought that the cotton schedule in the Payne-Aldrich bill was an advance. Personally, I do not agree with that view, but fortunately there is no need to argue about it. Let us throw that schedule aside and go back to the old schedule of 1897. The business prospered well enough under that as a whole. The further desire is to have duties lower even than that schedule and in a way that can not be misunderstood. I believe the cotton manufacturers as a rule share that view. They will willingly try the experiment of a reduction; they protest against revolution. They do not know, as a matter of fact, any more than the community at large and the men who made this bill how much of a reduction can be safely made. The industry is complex. No one is an expert in all of it.

HORIZONTAL REDUCTION THE REMEDY.

Suppose, then, we take a long step and make a horizontal reduction of 20 per cent from the duties as they were in that old schedule, something more perhaps than that on some items of yarn, and let us see how it works. That is so plain that everyone can understand that it is a reduction and a material one, and the reduction is made without destroying the methods on which the duties have been applied all these years, methods which the courts have interpreted and the trade understands. In the last years that that schedule was in force the average duties on imports of cloth were about 38 per cent; 20 per cent taken off of this would leave average duties of 30.4 per cent, which is materially lower than the 35 per cent on wool or the 45 per cent on silk. If, as I think is the case, the real protection is 50 per cent, this reduction would leave an average of 40 per cent, halfway between wool and silk, and the census report shows that the average labor cost of cotton is higher tham either silk or wool.

That seems to me a reasonable step, and I have proposed as amendment to this schedule to that effect. I hope it will have

the consideration of those who have the power to make or mar this \$800,000,000 of our annual product.

APPENDIX A.

Analysis of methods by which importations of \$13,931,600, as shown on page 53 of Report No. 65 of the Ways and Means Committee, Sixty-second Congress, first session, were estimated to be the result for 1912 of paragraphs 3 and 5 of House bill 12812. July 19, 1911, covering cotton cloth, including cotton and silk fabrics, tracing cloth, waterproof cloth, cotton window Hollands, oilcloths, and so forth.

Fiscal year 1892.

Average ad valorem equivalent of the rates of duty on im-	\$170, 421, 800
ports of clothper cent Percentage of imports to domestic consumptiondo Fiscal year 1896.	47. 17 2. 71

\$179, 834, 400 Fiscal year 1910.

Domestic consumption (census)

Average ad valorem equivalent of the rates of duty on imports of cloth

Percentage of imports to domestic consumption

______do____ \$336, 197, 800 42.46 3.11

Estimate for 1912 (calendar year). \$407, 337, 300

The calculation from these figures is as follows: 47.17 per cent minus 41.64 per cent equals 5.53 per cent; 2.79 per cent minus 2.71 per cent equals 0.08 per cent; 42.46 per cent minus 24.51 per cent equals 17.95 per cent; as 5.53 per cent is to 0.08 per cent so is 17.95 per cent to the answer equals 0.26 per cent; 3.11 per cent plus 0.26 per cent equals 3.37 per cent; 3.37 per cent plus 0.05 per cent added as a margin of safety equals 3.42 per cent; \$407,337,300 times 3.42 per cent equals \$13,931,600 of imports; \$407,337,300 times 3.11 per cent equals \$12,668,190 of imports; \$1,263,410 increase.

To illustrate the effect of this method of figuring, let us suppose the duty was reduced to 1 per cent instead of to 24.51 per The calculation then would have been as follows: 47.17 per cent minus 41.46 per cent equals 5.53 per cent; 2.79 per cent minus 2.71 per cent equals 0.08 per cent; 42.46 per cent minus 1 per cent equals 41.46 per cent; as 5.53 per cent is to 0.08 per cent so is 41.46 per cent to the answer equals 0.60 per cent; 3.11 per cent plus 0.60 per cent equals 3.71 per cent; 3.71 per cent plus 0.05 per cent equals 3.76 per cent; \$407,337,300 times 3.76 per cent equals \$15,315,882 of imports. That is, if the committee's method is the way to estimate results, a reduction of duty to 1 per cent instead of to 24.51 per cent would have increased imports only \$1,384,282 over a duty of 24.51 per cent.

The calculation from these figures is as follows:

The difference between the duty of 41.64 per cent in 1896 and the duty of 47.17 per cent in 1892 is 5.53 per cent.

The imports in 1896 were 2.79 per cent of the total consump-

tion, as compared with 2.71 per cent in 1892, a difference of 0.08 per cent.

The average duty on imports in 1910 was 42.46 per cent, which it is estimated the proposed bill will reduce to 24.51 per cent, a difference of 17.95 per cent.

We therefore have the proportion as 5.53 per cent is to 0.08 per cent, so is 17.95 per cent to the answer, which equals 0.26 per cent. This is the amount it is estimated the proposed bill would increase the percentage of imports to total domestic consumption in 1910.

The imports in that year were 3.11 per cent of the domestic consumption; adding 0.26 per cent would make 3.37 per cent that they would have been if this bill had been in operation. There was then added to this figure 0.05 per cent as a margin of safety, making the percentage 3.42 per cent. The value of the consumption for 1912 was estimated at \$407,337,300 and 3.42 per cent of this would have been \$13,931,600, the amount given in the report of the committee.

The imports for 1912 on the estimated consumption of \$407,-337,300 at the rate of 3.11 per cent, the actual rate of 1910, would have been \$12,668,190, so the difference caused by this new bill would have been an increase of \$1,263,410.

APPENDIX B.

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF STANDARDS,
Washington, August 22, 1911.

Hon. HENRY F. LIPPITT, United States Scnate, Washington, D. C.

Sin: Complying with your request of August 7, I am pleased to transmit berewith reports covering the determination of yarn counts

in the samples of cotton fabrics submitted by you and the determination of the yarn counts of 20 specimens taken consecutively from the cops accompanying them. We have endeavored to furnish you complete information and have in some cases carried the investigation beyond the limits requested by you.

We have taken the liberty of including among the fabrics two plain fabrics, in order that you may have data on the simpler materials. We have also included some cops which were furnished us by another mill. The time required to prepare this report has been unusually long, because of the absence from the bureau of some of the assistants in the textile laboratory. We wished particularly to compare the results secured by individual analysts, and therefore have held the report until the absent men returned to the bureau.

We shall be pleased to undertake any further investigation which you wish upon the subject, and hope to be favored with your cooperation in the extension of the investigations which we have in progress. Respectfully,

S. W. STRATTON, Director.

UNITED STATES SENATE, Washington, D. C., August 7, 1911.

United States Senate,

Washington, D. C., August 7, 1911.

Hon. E. B. Rosa.

Director Bureau of Standards, Washington, D. C.

Sia: Referring to your favor of July 18, 1911, addressed to Mr.

Underwood, in which you say "an analyst can readily determine the count of yarns used in the manufacture of any fabric," I hand you herewith samples of five different cotton fabrics, and would be obliged if, at your early convenience, you would tell me what is the number of each of the different kinds of gray yarn used in the manufacture of each of the sesamples. In making the report I should like to have a detailed statement of the various operations which you perform in making each analysis and if you think it desirable to make an analysis of more than one cutting of each sample for proof of the correctness of your results, a detailed statement of each such analysis.

In addition to getting the number of the yarn, as above, I should like to have you give me the number of threads per square inch of each fabric. I should also like to have you give in each case the time consumed and the actual cost to your department of ascertaining the threads per inch and of ascertaining the number of yarn in each fabric. I also inclose two cops of filling yarn and one bobbion of warp yain. I understand that in the case of a fabric counting 64 threads in the warp and 64 threads in the filling per square inch and using a 4-inch cutting, as described in your letter, the length of yarn on which the accuracy of your test would be ascertained would be about 28 yards. I should like to have you weigh 20 successive 28 yards from these three samples of yarn and give the number of the yarns as shown by each of these weighings.

Hoping to receive this information at your earliest convenience, I am,

Yours, very truly,

HENRY F. LIPPITT.

REPORT ON THE YARN COUNTS IN FIVE SAMPLES OF FANCY WEAVE AND TWO SAMPLES OF PLAIN WEAVE. COTTON FABRICS—REPORT ON THE DETERMINATION OF THE YARN COUNT OF 20 SPECIMENS TAKEN CONSECUTIVELY FROM COPS OF COTTON YARN.

DEPARTMENT OF COMMERCE AND LABOR,
BUREAU OF STANDARDS,
Washington, August 21, 1911.

The measurement of the yarn counts in seven widely varying fabrics was undertaken in order to determine the agreement in the results which would be obtained between different observers of varying experience, the time required, and the cost of each.

Five of the fabrics were of fancy weave, and involved some of the most difficult determinations which would obtain in textile analysis; two were plain weave, and the determination would be about the usual analysis.

analysis.

The counts obtained by three observers working entirely independently are shown in Table 1. The values are for the yarn in the woven condition, since the "take up" in the weave of the five fancy fabrics is so uncertain, on account of the extra filling to obtain the figure, that it is difficult to correct for it and reduce the count to the yarn in the gray.

In sample No. 4 insufficient material was furnished to permit the first observer to make a determination, and in sample No. 7 the first observer was not present at the laboratory when the sample was submitted.

The analyses were made in the average was not present at the sample was submitted.

submitted.

The analyses were made in the usual manner. Where the nature of the fabric permitted an amount of yarn obtained from raveling a specimen 4 inches square was used. In determining the extra filling it was necessary to use less. In most cases the observer had only sufficient sample to obtain one specimen, and even a closer agreement could probably have been obtained if the usual three specimens could have been used by each observer and the average taken.

The raveled yarn was weighed on an analytical balance to the nearest tenth of a milligram in an atmosphere of 65 per cent relative humidity at 75° F. From the known length and weight, the number of hanks of 840 yards each which would be required to weigh a pound was computed.

Tables 2 and 3 give a summary showing the accuracy and the

hanks of 840 yards each which would be required to weigh a pound was computed.

Tables 2 and 3 give a summary showing the accuracy and the variation from the mean with which the counts were obtained by the three observers.

Table 4 shows the time required by each observer to make the determinations and compute the results, the annual salary of each observer, and the approximate cost for personal service computed on the basis of 300 working days of 7 hours each.

The first two observers are very much more expensive men than would be required to do the work regularly, and would usually be assigned to supervision of cheaper assistants.

The results obtained by the third observer, a \$900 laboratory assistant, whose work upon these samples was his first experience, show that the analyses could be made in a thoroughly dependable manner, under supervision, by assistants at that salary or even less.

Table 5 gives the number of threads per inch in both directions in all the fabrics as determined by two observers. These determinations were made with a count glass.

Table 6 gives the time required by observer 2 and the cost. The time of the other observers was not kept, as they did not work continuously upon the measurements.

REPORT ON ACCURACY WITH WHICH THE YARN COUNT CAN BE MADE ON 20 SPECIMENS OF 30 YARDS EACH TAKEN CONSECUTIVELY FROM SAME COP OF COTTON YARN.

20 SPECIMENS OF 30 YARDS EACH TAKEN CONSECUTIVELY FROM SAME COP OF COTTON YARN.

The specimens consisted of six cops obtained from two different sources.

One set (A, B, C) consisted of two cops (A, C) of filling, and a bobbin (B) of warp yarn. The other set (D, E, F) consisted of 2 cops (E, F) of carded-warp yarns and one (D) combed-filling yarn.

Twenty consecutive lengths of 30 yards each were cut from each cop by reeling on an ordinary yarn reel 1½ yards in circumference. They were marked serially and placed in an atmosphere at a relative humidity of 65° and 75° F. for two hours. They were then weighed by observer No. 1 on an analytical balance to the nearest tenth of a milligram and the counts obtained in the usual manner. Two days later the specimens of A, B, C were taken to another laboratory, weighed on another balance, by a different observer, and the values computed. This latter laboratory had no humidity control so that the relative air humidity is only known by the general condition of the atmosphere upon that day. It was approximately 75 per cent as shown by instruments in other portions of the bureau, or about 10 per cent higher than when the first weighings were made. This would probably account for the almost constant difference between the two observers. The results show that the weighings can be made and duplicated by different observers with a high degree of accuracy.

To determine the accumulative error which might occur in weighing the small samples separately and consequently the error in the yarn count arising from using 30-yard samples, the 20 specimens of A. B. C were weighed collectively and the results are entered at the foot of each page.

Table 13 gives a summary of the variation in the entire six cops arranged in three classes: (1) The number in which the variation in count was between 0 and 1 count; (2) those between 1 and 2 counts; and (3) those above 2 counts, with the corresponding percentage that it is of 20, the total number.

Table 14 gives the marks which the manufacturer h

Mr. SMITH of Georgia. Is the Senator from Rhode Island through?

Mr. LIPPITT. Yes.

Mr. SMITH of Georgia. I wish to ask the Senator if he will leave us the samples that he has used, and give us also for each sample the number of threads and the cost per yard?

Mr. LIPPITT. I have described two or three of these samples. I have not the cost of these various articles. I have simply produced them for illustration.

Mr. SMITH of Georgia. I make the request also, at the suggestion of several other Senators, that so far as the Senator can, he will give us the information.

Mr. LIPPITT. I am willing to put at the disposal of the Senator all the samples which I have here. So far as the cost goes, in my remarks I have referred to the cost of certain of these samples, and they will be designated so that they can be understood. Most of the samples were used merely for illustrative purposes.

Mr. SMITH of Georgia. And so that we shall also have the

number of threads in the various samples.

Mr. LIPPITT. I will give the Senator all the information I

have on the subject.

Mr. SMITH of Georgia. Mr. President, I do not desire at this time to enter into any extended reply to the Senator from Rhode Island. There is, however, one portion of his address to which I do wish to call attention. I am unwilling for his suggestion that anything in this cotton schedule is sectional or unfair to New England to go out without immediate reply.

Upon the subcommittee of the Senate which had charge of the cotton schedule was the senior Senator from Maine [Mr. JOHNSON], the Senator from New Jersey [Mr. HUGHES], and myself. So that the subcommittee, at least, was certainly nonsectional.

I will not refer, as though it were a matter of importance, to the Senator's own personal interests in the manufacture of many of these articles about the reduction of duty upon which he complains, because I consider that his speech, as a whole, was from his standpoint both able and fair, and I do not believe that his personal interests controlled him.

The only section of the bill upon which the Senator predicated the suggestion of sectionalism was that paragraph which provides for the duty of 25 per cent upon cotton table damask; and he stated that the manufacture is exclusively in North

Mr. LIPPITT. I did not, Mr. President. Mr. SMITH of Georgia. I understood the Senator to say that. Mr. LIPPITT. I stated that the principal seat of it was in North Carolina.

* Mr. SMITH of Georgia. If that is true, I did not know it. I know there is a plant in North Carolina, and I know that the president of that plant came before our subcommittee and pro-tested earnestly against the reduction which is made by this bill on cotton table damask, but we declined to make any

Now, to be fair, it seems to me that the Senator from Rhode Island should have called attention to the numerous other special rates upon special goods named in the bill. For instance, plushes, velvets, plush or velvet ribbons, velveteens, corduroys, chenilles, pile fabrics, and so forth, have a duty of 40 per cent.

I think it is true that all those products, so far as I am aware, certainly the great bulk of them, are produced in New England.

Again, tapestries and other Jacquard figured upholstery goods will pay a duty of 35 per cent ad valorem. So far as I know. practically all of those goods are manufactured in New England or in Pennsylvania.

Bandings, beltings, bindings, bone casings, and so forth, have

a specific rate of 30 per cent.

Lace window curtains, nets, nettings, pillow shams, and bed sets, finished or unfinished, have a duty of 35 to 40 per cent.

So, Mr. President, there are a number of different articles particularly specified with a fixed rate of duty in the bill besides cotton table damask, and a large number are specifically given a rate that certainly have not their chief production in

North Carolina or in the South.

Mr. LIPPITT. I was speaking, Mr. President, in my remarks of what is commonly known as countable cotton cloth. Tapestries, a very highly special fabric, made almost entirely in Pennsylvania, and of course pile fabrics are entirely different fabrics; besides, they could not possibly be classed as cotton cloth. I may have overlooked something, but I think my statement is correct, that many of the articles that are known as cotton cloth coming under the countable clauses are damasks, and are the ordinary product of the Jacquard loom and the fancy looms of various kinds. The only one I have been able to find was the particular sample I exhibited here.

Mr. SMITH of Georgia. Mr. President, I have called attention to the paragraph that specifically put products of the Jacquard loom at 35 per cent ad valorem. I only desire to carry that suggestion far enough to show that there were other items

in the bill given specific rates.

Now, I wish to call attention to another fact. The rate on cotton yarns up to No. 9s, inclusive, is 5 per cent; the rate from No. 9s to 19s, inclusive, is 7½ per cent. The great bulk of the product of yarns in the Southern States is below 20s, so that the rates placed upon the yarns produced in the southern section are at the very bottom.

Why are the rates carried up higher on other yarns? I will not at this time stop to discuss that, but I do call attention to the fact that the great bulk of the yarns above 50s are made in New England, and that the rates on those yarns go up to 271

per cent.

Mr. SMOOT. It is 25 per cent on the yarns, but 271 on the cloth.

Mr. SMITH of Georgia. Twenty-five per cent on the yarns, yes. So that, if you study these rates, surely no one can claim for a moment, and sustain the claim, that there has been any sectional purpose in connection with the fixing of the rates.

I only wish to go this far at present, so that the RECORD may carry the additional facts, which I think answer that part of the

Senator's suggestion.

Mr. SMOOT. I wish to ask the Senator a question in that particular, so that Senators may not have a misunderstanding, or, at least, I do not want to misunderstand the Senator from The Senator speaks of yarns above 99s carrying a rate of 25 per cent; that yarns No. 20, which are made in the South, only carry 10 per cent.

Mr. SMITH of Georgia. It is 5 per cent up to 9s, inclusive,

and 7½ from 9s up to 19s, inclusive.

Mr. SMOOT. I was speaking of 20s. On the 20s it is 2½ per cent more; but I will confine it to 19s and under, where the duty is only 7½ per cent. The Senator knows, of course, if he has studied this question, that it all depends on how many pounds can be spun in a day or in an hour. Any manufacturer can spin four times the amount or even more

Mr. SMITH of Georgia. I will not yield to the Senator to make a statement. If he wishes to ask me a question, I will

yield to him.

Mr. SMOOT. I thought the Senator was through and had taken his seat, and I asked him—

Mr. SMITH of Georgia. No.

Mr. SMOOT. Well, if the Senator is not through, I will not continue.

Mr. SMITH of Georgia. I will yield if the Senator from Utah wishes to ask me a question. I only desire to refer to one other fact now.

Mr. SMOOT. Then, let me ask the Senator a question. Does not the Senator from Georgia know that yarns, say, No. 15, can be made at five or six times less than yarns No. 100 or above?

Mr. SMITH of Georgia. Mr. President, I do not intend at this time to enter into a discussion of that proposition. What I desired to state and to call to the attention of the Senate was, that the great bulk of the production of yarns in the southern section was under 20s, and that the rates placed upon those

yarns are 5 per cent and 7½ per cent, while the rates on yarns made in New England go up as high as 25 per cent. I did not wish to go into the merits of the question further than to call attention to the fact that there certainly has been no sectional

discrimination in this bill.

One thing further I wish to add. The Senator from Rhode Island called attention to free jute bagging. I wish to call attention to the fact that we have also put jute bagging intended for wool on the free list, and we have put jute bagging intended for grain on the free list. I mention this because I would not have it thought that we would frame a bill, and I would not be willing to see, even if I could write it myself, a bill that was sectional; and I dislike very much to have any diversion from the merits of the discussion by any thought upon anyone's mind that any Senator would be willing to make a sectional bill, and I wished to refer to other features of this bill which seem to me to meet the suggestion with regard to the cotton table damask.

Mr. SMOOT. Did I understand the Senator from Georgia to say that plain woven fabrics made of the kind of jute that grain bags are made of are under this bill placed upon the free

list?

Mr. SMITH of Georgia. I think so. I think the Senator will find that the jute-bagging burlaps intended for wrapping wool is placed on the free list, as is also bagging used in covering grain.

Mr. SMOOT. In section 288 I find:

Plain woven fabrics of single jute yarns, by whatever name known, bleached, dyed, colored, stained, painted, printed, or rendered noninflammable by any process, 20 per cent ad valorem.

Mr. SMITH of Georgia. I will call the Senator's attention to the particular paragraph later on which applies to the bagging intended to cover wool. The paragraph the Senator read applied to bleached goods, did it not?

Mr. SMOOT. It applies to bleached, dyed, colored, stained,

printed, and so forth.

Mr. SMITH of Georgia. Well, they are not the class of goods used for this purpose; but I do not desire further to delay the discussion of that feature of the bill which should come before the Senate at this time. I only wished to meet that one part of the argument of the Senator from Rhode Island [Mr. LIPPITT].

Mr. STONE. Mr. President-

Mr. SMITH of Georgia. I am told that paragraph 416 is the particular paragraph covering this matter. I quote from it, as follows:

Plain woven fabrics of single jute yarns by whatever name known, not bleached, dyed, colored, stained, printed, or rendered noninflammable by any process, nor in any manner loaded so as to increase the weight per yard.

One word more. The Senator from Rhode Island said that the cotton farmer sold this jute bagging for more than he paid for it. In point of fact, a deduction is made from the price of the cotton on account of the jute bagging; and until recently in the English market 6 per cent of the entire weight of the bale has been deducted. One of the most active efforts we are now making in the interest of the cotton grower is to obtain a reduction of this tare, and to save him the great loss he incurs on account of the excessive deduction from an estimate of the weight of the jute and the ties much in excess of actual weight.

Mr. WEEKS. Mr. President, I should like to ask the Senator from Georgia if that reduction is due entirely to the bagging? Is it not due partly to other causes?

Mr. SMITH of Georgia. Other causes are claimed, but largely it is due to the bagging and the ties. It has recently, I believe, been reduced to 5 per cent.

Mr. SUTHERLAND. Mr. President-

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from Utah?

Mr. SMITH of Georgia. I am through. I only rose to answer

the Senator from Massachusetts [Mr. WEEKS].

Mr. SUTHERLAND. Mr. President, I do not want to delay the consideration of the bill, but I was very much struck with the statement made by the Senator from Rhode Island [Mr. Lippitt] with reference to the change in the method of levying these duties.

Mr. SMITH of Georgia. I do not, Mr. President, desire to discuss that at present. I only wished to refer to the sectional feature and not to take up any other portion of the speech of the Senator from Rhode Island.

Mr. SUTHERLAND. I wanted to ask the Senator if he could tell us in a few words what was the reason for the

change?

Mr. SMITH of Georgia. I do not desire to discuss it at present.

Mr. SUTHERLAND. Very well.

Mr. STONE. Mr. President, the Senator from Georgia [Mr. SMITH] has made some effective remarks by way of reply to the charge of the Senator from Rhode Island [Mr. Lippitt], that this was a sectional bill. Before we proceed with the reading of the bill at the point where we left off yesterday I desire to make an observation or two by way of reply to another assertion made by the Senator from Rhode Island.

The Senator from Rhode Island and others who have spoken in this debate have not been overparticular to avoid being offensive. Senators on the other side are attacking this measure all along the line and from every possible standpoint; but there is one line of attack which, it seems to me, ought not to be indulged in too much, although it has been indulged in too much already. It is a common expression on that side—such expressions were used this morning by the Senator from Rhode Island—that this bill is "half-baked," "ignorantly prepared and without adequate knowledge or due consideration." The Senator from Rhode Island brings before the Senate a sample trunk, so to speak, full of samples which he has spread out over two or three desks, and says that the members of the Ways and Means Committee of the House and the members of the Finance Committee of the Senate who have prepared the cotton schedule know nothing about these goods, and hence have evidently acted without proper information or without due regard to the public interest.

Mr. President, about this I wish to say a few words. The Senator from Rhode Isiand is an experienced manufacturer of cotton fabrics; he makes these goods, and therefore knows more about the technique of the industry than the average Senator, for the average Senator is neither a manufacturer nor merchant. He seems to think that men who are familiar with the technicalities of the industry—that is, the manufacturers—should fix the tariff rates and write the tariff law on cotton manufactures. That has been the practice in the past. Before the very honorable Senator from Rhode Island came to grace this body with his official presence, he was accustomed to appear before the committees of the Senate and of the House, as were numerous others representing this very industry, to discuss its technicalities with Representatives and Senators who were not themselves familiar with those technicalities—any more then than now—and not only did they come with reference to this industry, but also with regard to practically every industry of any moment in the country.

try of any moment in the country.

It is not to the credit of our legislation in the past that interested representatives of the cotton industry, the wooleu industry, the steel industry, and other industries were permitted by the Ways and Means Committee of the House and the Finance Committee of the Senate to come here and prepare the tariff schedules in which they were interested, to be after-

wards passed by the two Houses of Congress, and to be approved by a Republican President. That used to be done.

But this is not the time when that sort of thing can be repeated. It may be, Mr. President, that the Senator from Rhode Island knows more—and he does know more—about the technicalities of cotton fabrications than the average Member of the House of Representatives or the average member of the Ways and Means Committee, where this bill was framed. I freely concede that; but that committee was not willing that the interested representatives of this industry should appear there and write out the tariff law which that committee was to report.

That was the custom in Republican times, but that day is ast. We have entered upon a different era. The Democratic We have entered upon a different era. Party desires, so far as possible, to subserve the well-being of the manufacturing industries of the country. We would be, in fact, the very idiots, and worse than the very idiots, the Senator from Rhode Island and others of his colleagues would brand us as being if we were disposed to deliberately injure, much less destroy, any legitimate industry. At the same time the fact should be recognized that we have gone beyond the day when interested men, when manufacturers of cotton goods or steel goods or woolen goods or any other kind of manufacturers can come into the Senate or the House and prepare tariff schedules to suit themselves. By doing that very thing in the past an economic industrial situation was created whereby monopolies were established and whereby undue control of the great business of the country was put in the hands of a few men, to the detriment of the great masses of the people; and because of that very thing the American people at the last election registered a mighty protest.

No, Senators—I am speaking to my friends upon the other

No, Senators—I am speaking to my friends upon the other side—such days as I have spoken of are past; and the assaults the other side are making will have no effect. The supercilious, toploftical, contemptuous air some of our friends over there assume will have no effect in deterring us or in changing the

fixed line of our purpose to make a tariff in the interest of the American people as a whole. We will go straight forward and keep the faith.

Mr. WEEKS. Mr. President-

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Massachusetts?

Mr. STONE. I am through, Mr. President. Mr. WEEKS. I should like to ask the Senator from Missouri before he takes his seat to name some of the monopolies which he has referred to as having been developed by the process he has just described, in the textile industry or in any other.

Mr. STONE. I am astonished that the Senator does such poor justice to his own intelligence as to ask a question like that. The country is full of examples, known of all intelligent men. I suppose the Senator would have me mention the Steel I suppose the Senator would have me call attention to woolen and cotton mills in New England and elsewhere whose stock is sold at 200 and 300 per cent above par, and well sold at that, because of the enormous profits realized on the investments under the operation of extortionate tariffs.

Mr. WEEKS. But, Mr. President, the Senator from Missouri must know that there is no monopoly in the cotton or woolen business in this country; and the fact that the stocks of certain mills have sold at large premiums could not have

had anything to do with monopolies in those industries,
Mr. WILLIAMS. If not monopoly, then exploitation.
Mr. STONE. Well, let it go at that. Mr. President, I should

like to have the reading of the bill continued.

Mr. CLARK of Wyoming. I hope it will not be delayed longer, Mr. President.

The reading of the bill was resumed, beginning with para-

graph 133, page 39, line 16.

The next amendment of the Committee on Finance was, in paragraph 133, page 39, line 17, after the word "kinds," to insert "machine cut"; in the same line, before the words "per cent," to strike out "25" and insert "20"; in the same line, after the words "ad valorem," to insert "hand-cut files and files of precision, 35 per cent ad valorem," so as to make the paragraph read:

133. Files, file blanks, rasps, and floats, of all cuts and kinds, machine cut, 20 per cent ad valorem; hand-cut files and files of precision, 35 per cent ad valorem.

The amendment was agreed to.

The Secretary read paragraphs 134 and 135, as follows:

134. Muskets, air-rifles, muzzle-loading shotguns and rifles, and parts thereof, 15 per cent ad valorem.

135. Breech-loading shotguns and rifles, combination shotguns and rifles, and parts thereof and fittings therefor, including barrels further advanced than rough bored only; pistols, whether automatic, magazine, or revolving, or parts thereof and fittings therefor, 35 per cent ad valorem.

Mr. SMOOT. Mr. President, I should like to ask the Senator in charge of this part of the bill why it is that the rate on breech-loading rifles has been advanced from the present law.

Mr. THOMAS. That was done by the House committee, and

we did not change it.

Mr. SMOOT. The present rate on breech-loading rifles is 25 per cent. They have increased the rate from 25 per cent to 35

Mr. THOMAS. Does the Senator object to it? Mr. SMOOT. I do not think it is necessary. I move, Mr. President, that the words "and rifles," on line

21, page 39, be stricken out; and, after the words "ad valorem," on line 25. I move to strike out the period and insert a semicolon, and add "breech-loading rifles, 25 per cent ad valorem."

The VICE PRESIDENT. The question is on agreeing to the

amendment proposed by the Senator from Utah.

Mr. SMOOT. On that I should like to have the yeas and

Mr. CRAWFORD. Mr. President, I should like to ask the Senator from Utah why the rate on rifles should be different from that on shotguns.

Mr. SMOOT. It always has been and-

Mr. CRAWFORD. That is not any reason for anything.

Mr. SMOOT. Wait a minute, and I will tell the Senator. It always has been; and the reason given for it is that the barrel of a rifle is not so difficult to finish as the barrel of a That is the reason that has been given in the past.

Mr. CRAWFORD. But the difficulty in manufacture in the one case applies to manufacture in foreign countries the same as to manufacture in our own country. Why should it cause a difference in the rate?

Mr. SMOOT. There is not as much labor in the making of a rifle as there is in the making of a shotgun; and it is for that

reason that in the rates in the present law there has been a difference of 10 per cent.

Mr. CLARK of Wyoming. Mr. President—
The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Wyoming?

Mr. SMOOT. I yield.

Mr. CLARK of Wyoming, I really should like some informa-tion on this item. Does the Senator from Colorado, in charge of this schedule, believe that the present rate on rifles is too

Mr. THOMAS. That is a question that it is very difficult for me to answer. I do not think it is upon an article of commerce that is in general use. I think the duty as it has been made by the House, bringing breech-loading and combination guns, and so forth, all under one duty, is a more proper classification than the old one. I think, also, that the Senator from Utah is in error in his statement that there is the difference which he has stated to exist.

Mr. SMOOT. Then, let me call the Senator's attention to the fact of the matter, so that I can disabuse his mind of that

Mr. CLARK of Wyoming. I want to get through with my

Mr. THOMAS. Yes; I will yield to the Senator from Utah

Mr. SMOOT. I did not know the Senator from Colorado had

the floor. I have the floor.

Mr. CLARK of Wyoming. My question is not at all in regard to the technical manufacture. My question is as to the motive or reason of the committee in raising the present rates upon breech-loading rifles. The Senator thinks they ought to be

Mr. THOMAS. Our contention is that they are not raised. Mr. CLARK of Wyoming. But they are raised, specifically. Mr. THOMAS. That, of course, is a matter of computation.

Mr. CLARK of Wyoming. The present law, as I understand-I am subject to correction-

Mr. THOMAS. The present law carries what is estimated as

an ad valorem equivalent of 45.94 per cent.

Mr. SMOOT. That is for the whole section, taking in muzzleloading shotguns. It could not be an equivalent ad valorem of forty-odd per cent on rifles, because if the Senator will turn to the present law, paragraph 156, he will find it reads in this way:

Muskets, muzzle-loading shotguns-

Mind you, there is a comma thererifles, and parts thereof, 25 per cent ad valorem.

Mr. THOMAS. That is not the section of which this is a duplicate.

Mr. SMOOT. Why, Mr. President, the framers of the bill have taken this section and put it in with a new section and made them all dutiable, under the wording and phraseology there, at 35 per cent.

Mr. THOMAS. The Senator is mistaken. Section 134 of House bill 3321 is the same classification as section 156 of the

present law

Mr. SMOOT. If the Senator will take the law itself and look

Mr. THOMAS. I am looking at it. It is right before me. Mr. SMOOT. Then let me call the Senator's attention to it.

Paragraph 156 of the present law reads as follows: "Muskets," comma, "muzzle-loading shotguns," comma. rifles," comma, "and parts thereof, 25 per cent ad valorem."
Mr. THOMAS. Yes; and you will find the same thing in

section 134 of this bill. Mr. SMOOT. No, Mr. President; you find this in this bill: "Muskets," comma, "air rifles," comma, "muzzle-loading shotguns and rifles," comma-

Mr. THOMAS. Muzzle-loading; yes. Mr. SMOOT. "Muzzle-loading shotguns and rifles." That includes the muzzle-loading weapons; but the breech-loading shotguns and rifles the Senator will find in paragraph 135, and they are dutiable at 35 per cent.

Mr. THOMAS. Mr. President, I think that is merely a technical play upon words. Section 135 of the present law covers in

express terms breech-loading shotguns and rifles.

Mr. SMOOT. I am perfectly aware of it, and it says they are dutiable at 35 per cent. To-day they are dutiable at 25 per cent, so that you are increasing breech-loading rifles from 25 per cent to 35 per cent.

Mr. THOMAS. Of course the Senator's ipse dixit is very

strong, but we do not admit anything of the sort.

Mr. SIMMONS. Where does the Senator find that?

Mr. THOMAS. The Treasury report upon imports, at page 36, No. 15, specifies on "firearms, double barrels, for sporting breech-loading shotguns and rifles"—

Mr. SMOOT. That is the double barrels.

Mr. THOMAS (continuing). "Further advanced in manufacture than rough bored only, number, \$3 each plus 35 per cent"; and the ad valorem percentage is placed at 43.82.

Mr. SMOOT. Why, Mr. President, if the Senator will read

it, that is the barrels for double-barreled breech-loading shot-

Mr. THOMAS. It does not make any difference whether they are double-barreled or single-barreled; the duty that is provided in section 135 covers them. Take the Senator's own emphasis upon punctuation, "breech-loading shotguns and rifles." We say nothing there about "double-barreled" rifles or "double-barreled" shotguns. The combination includes it all.

Mr. SMOOT. The Senator was reading from the statistics. If he will read from the law, paragraph 157, this is what he

will find:

Double-barreled, sporting, breech-loading shotguns-

Now, notice the wording:

Combination shotguns and rifles-

That is the combination; but in that paragraph there is not one word as to breech-loading rifles. Rifles are taken care of in paragraph 156 of the present law.

Mr. THOMAS. But in paragraph 135 there is a specific refer-

ence to breech-loading rifles:

Breech-loading shotguns and rifles.

Mr. SMOOT. I am perfectly aware of it, and you provide there a duty of 35 per cent; but in the present law breech-

loading rifles fall in paragraph 156, at 25 per cent.

Mr. THOMAS. I do not think they are so classified; but, in any event, this equalizes the duty as to all these firearms of a particular class and sort. In other words, paragraph 134 refers to muskets, muzzle-loading shotguns and rifles as one classification, and paragraph 135 refers to breech-loading arms as another classification.

Mr. SMOOT. That is right; and at present the rate upon breech-loading rifles is 25 per cent, while now it is proposed to

raise it to 35 per cent.

Mr. THOMAS. I understand the Senator's position precisely,

but I do not think it makes any difference.

Mr. SIMMONS. I do not know that I do understand the Senator with reference to paragraph 135 of the bill and paragraph 157 of the present law. Paragraph 135 of the pending bill imposes a duty of 35 per cent ad valorem-

Mr. SMOOT. That is true.

Mr. SIMMONS. On breech-loading shotguns and rifles, combination shotguns and rifles. The present law—

Mr. SMOOT. A combination shotgun and rifle is a shot-

Mr. SIMMONS. The Senator will not permit me to finish. I am going to show him that the present law uses the same language:

Double-barreled, sporting, breech-loading shotguns, combination shotguns and rifles, valued at not more than \$5, \$1.50 each—

Mr. SMOOT. Yes; but where do you find "breech-loading rifles" there? That item is not found in that paragraph.
Mr. SIMMONS. There it is—"breech-loading shotguns."
Mr. CLARK of Wyoming. "And rifles."

Mr. SMOOT. "And rifles."
Mr. SIMMONS. "Double-barreled, sporting, breech-loading shotguns "-that is the present law.

Mr. SMOOT. Mr. President, let me read it.
Mr. SIMMONS. It does not make any difference whether it
is a rifle or not. Then you have the combination shotguns and

Mr. SMOOT. Why, Mr. President, a combination shotgun and rifle is a gun that is not only a rifle but a shotgun; they are combined in one gun.

Mr. SIMMONS. Of course they are combined in one gun,

Mr. SMOOT. But I am talking about breech-loading rifles.

Under the present law

Mr. SIMMONS. The Senator insists that the things enumerated in the old law are not the things enumerated in the pending bill. I disagree with him about it. I think the language of the pending bill and the language of the old law are substantially the same. The Senator probably has not calculated the present rate upon double-barreled sporting breech-loading shotguns and combination shotguns and rifles. Under the present law, if they are valued at \$5, the duty is 45 per cent ad valorem. If valued at \$10, the duty is 55 per cent.

Mr. SMOOT. I do not dispute what the Senator says in that

respect; but I call his attention again to the fact that breech- shall so vote.

loading rifles are not mentioned in paragraph 157 of the present law.

Mr. SIMMONS. I think they are included.

Mr. SMOOT. Mr. President, they are not mentioned, nor are they included.

Mr. SIMMONS. I think they are, Mr. NORRIS. Mr. President—

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Nebraska?

Mr. SMOOT. Yes; I yield.

Mr. NORRIS. If the Senator from Utah will permit me, I should like to ask the Senator from Colorado a question. Is it the desire of the committee to increase the tariff on rifles?

Mr. THOMAS. It is not the desire of the committee to increase the tariff on rifles, and it is its contention that it has not

done so.

Mr. NORRIS. I understand that. Mr. THOMAS. It has merely made a slightly different classification, upon the assumption that the position of the Senator from Utah is correct.

Mr. NORRIS. Will the Senator from Colorado tell me what rate the breech-loading rifle, or any rifle, would have to pay under the proposed law? Would it be 35 per cent?

Mr. THOMAS. Under the proposed law rifles which are muzzle-loading would pay 15 per cent ad valorem. Rifles which are breech-loading would pay 35 per cent ad valorem.

Take the breech-loading rifle, then. Senator contend that under the present law a single-barreled breech-loading rifle would pay more than 25 per cent ad valorem?

THOMAS. A single-barreled rifle would pay 35 per cent if it were breech-loading.

Mr. NORRIS. I mean under the existing law.
Mr. THOMAS. Under the existing law it would have paid, last year, an equivalent of 45.94 per cent ad valorem.

Mr. NORRIS. I understand that that is in the table, but suppose the table must have been deduced from paragraph 157 of the present law; and I am not able to find in paragraph 157 anything that seems to me to cover a single-barreled breechloading rifle.

Mr. THOMAS. That may be, but I think-

Mr. NORRIS. If it is not contained in that paragraph under the present law, must it not be contained in paragraph 150 of the present law, which fixes the rate at 25 per cent ad valorem?

Mr. THOMAS. Of course, if it does not fall under paragraph

157 it falls under paragraph 158. That is clear.

Mr. NORRIS. I am seeking information. It seems to me that no man can construe the two sections together and find any place in paragraph breech-loading rifle.

Mr. THOMAS. We think otherwise.

Mr. NORRIS. If the Senator can find it there, I wish he

language that he thinks covers it.

find it, I am sure I

Mr. THOMAS. If the Senator can not find it, I am sure I can not, to the extent of satisfying him. Our contention is that it is included in the phraseology of that section.

Mr. NORRIS. I understand the Senator's contention. I am

only trying to get at the true fact of the matter. If the Senator has that information and can point to the language, I should

be very glad to have him do it. Mr. THOMAS. I can only read the section to the Senator. Mr. NORRIS. But paragraph 157 covers several different specifications.

Mr. THOMAS. Yes.

Mr. NORRIS. I should like to know the specification that would include in its terms a single-barreled breech-loading rifle.

Mr. CLARK of Wyoming. Mr. President— The VICE PRESIDENT. Does the Senator from Utah yield

to the Senator from Wyoming?

Mr. SMOOT. Certainly. Mr. CLARK of Wyoming. I will ask the Senator from Colorado if he is willing to take the opinion of the Treasury Department as to which one of these two sections the rifle desig-

nated by the Senator from Nebraska would come under? Mr. THOMAS. If the Treasury Department has decided in accordance with the contention of the Senator from Utah and the Senator from Nebraska, I suppose it would be controlling over any mere opinion of mine. Besides, I have no pride of

opinion. Mr. CLARK of Wyoming. Then the Senator would say that it came in at 25 per cent. Would he then still think it would be

wise to raise the duty to 35 per cent?

Mr. THOMAS. I do. I think these arms should be classified as they have been classified by the House in this measure, and I

Mr. NORRIS. If the Senator feels that way

Mr. CLARK of Wyoming. Then the Senator thinks the wisdom of the House should at all times prevail?

Mr. THOMAS. Oh, no.

Mr. SMOOT. Of course, from the position now taken by the

Senator I have not another word to say.

The VICE PRESIDENT. The Chair must insist, in the interest of the Reporter, and not in the interest of the Chair, that there shall be some orderly method of procedure. The Reporter can not take a chorus.

Mr. NORRIS. Mr. President, I will ask the Senator from

Utah if he will yield to me now?

Mr. SMOOT. Certainly. Mr. NORRIS. As I understand the motion of the Senator from Utah, as he understands the present law and the paragraph under consideration of the present bill, the effect of the motion is to reduce the tariff on single-barreled breech-loading rifles from 35 per cent to 25 per cent ad valorem?

Mr. SMOOT. That is exactly it, Mr. President; and to con-

form to the present law.

Mr. NORRIS. I am not particularly concerned about conforming to the present law; but it does seem to me, with all due respect to the opinion of the Senator from Colorado, that the bill as reported here by the committee increases the tariff on single-barreled breech-loading rifles from 25 per cent to 35 per cent, and the effect of the motion of the Senator from Utah will be to reduce the tariff to 25 per cent.

Mr. SMOOT. That is exactly it. Mr. WALSH. Mr. President—

The VICE PRESIDENT. Does the Senator from Utah yield

to the Senator from Montana?

Mr. SMOOT. I yield.

Mr. WALSH. Assuming that the Senator from Utah is correct about his construction, I should like to hear him state briefly what objection he has to a duty of 35 per cent on breech-

loading rifles.

Mr. SMOOT. The objection is that 25 per cent on rifles is a protective duty. It has been in the past. No one has asked for an increase so far as I know. I have not received a single letter asking for an increase from a private individual or a manufacturer in the United States. No complaint of the present rate has been made to anyone. I think the present duty is a protective duty, and therefore I think that is the duty that ought to be imposed.

Mr. WALSH. If I may be permitted further, do I understand the Senator to object to it because nobody has asked for

the change?

Mr. SMOOT. Oh, no; I object to it because 25 per cent is a

protective duty

Mr. WILLIAMS. Mr. President, as I understand, the Senator from Utah is objecting because this is a protective duty. Is

Mr. SMOOT. Oh, no; I said 25 per cent was a protective duty. I do not object to any protective duty; but since in the past 25 per cent has been a protective duty, and no objection has been made to it from any source, I do not believe it ought to be increased. It is for that reason that I have offered my

Mr. WILLIAMS. I merely wanted to express my gratification at discovering some duty that was too high for the Senator from Utah.

Mr. SMOOT. Mr. President, of course the Senator from

Mississippi is now facetious.

Mr. WILLIAMS. Oh, no; not facetious. The Senator is mistaken in my meaning. I was never more earnestly and prayerfully solicitous about anything in my life. I have been looking for two years to find some duty that was too high for the Senator from Utah. This is my first opportunity, and I am merely expressing my gratification in public. If the Senator thinks I am humorous about it, he is mistaken. He may think I am humorous, but I am in the most earnest possible position right now; and I want the entire American public to know that we have finally discovered a duty that is too high for the Senator from Utah.

I remember that a recent Senator from Idaho said that if a fence was 6 feet high, and that kept out the invasions of stock, it did no harm to make it 40 feet high, because that would equally keep out the invasions of stock. If the Senator is in favor of a protective tariff, I do not see how he can quarrel with a rate because it is more protective than even he thought. If his philosophy has any meaning at all, I guess it means that he wants the domestic producers of articles to be left without foreign competition. Now he has struck a rate which, according to himself, will preclude foreign competition, and he is quarreling with us about it. That merely indicates that no

matter what we may possibly do, the Senator would still

This reminds me of the report of the Senator's expert upon cyanide of soda. He pronounced it a sedative. because it is a deadly poison; and, if you give it to anyone, it will put him in a sedative conditon for quite a long while. the Senator has finally discovered a duty that puts a sedative upon the importation of repeating rifles, he ought to be

happy, from his standpoint; and if anybody ought to quarrel with it, we are the people that ought to do the quarreling, and

not he.

Mr. SMOOT. The Senator from Mississippi has not watched very closely the amendments I have offered to this bill so far. I think nearly every amendment I have offered so far, with the exception of a few, has been to decrease the rate. I have tried to take articles for which rates have been provided by the Democrats in this bill and put them on the free list in cases where they are on the free list to-day. I have now asked for a decrease in the rate that they have provided through the phraseology adopted. Through that phraseology a rate has been increased from 25 to 35 per cent. The 25 per cent is a protective rate, as I told the Senator, with no one objecting to it; and it is 6 feet high, measured by the standard of the fence spoken of by the Senator, that was mentioned by the late Senator from Idaho, Mr. Heyburn.

Mr. WILLIAMS rose.

Mr. STONE. That is enough.

Mr. WILLIAMS. I did not rise for any purpose of discussion. I rose merely to express my gratification, to express in a certain sense my recognition of the Senator from Utah as a new adherent of the party of tariff reduction. I am not certain that my memory is correct, but if it is correct he was one of the chief architects of the Payne-Aldrich bill; and he is very bitterly opposing this bill principally upon the ground that it reduces duties. Yet he appeared before the public a moment ago and announced that every amendment that he has offered hitherto, except two, was for the purpose of reducing duties. If the Senator, within the next six months, can reconcile his vote for the Payne-Aldrich bill with the position he has just announced, and can reconcile those two positions with his opposition to this bill, which reduces duties all around, it will be a delightful curiosity of political literature.

Mr. SMOOT. No, Mr. President; I simply called the Senator's attention to the fact that he was mistaken in thinking this the first chance I have given him to express his pleasure, because about every amendment I have offered so far was to take items provided with a duty in this bill from the dutiable list and place them on the free list, where they are under the

present law.

I want to say to the Senator that it gives me delight if any action on my part in this body has pleased the Senator from Mis-

sissippi. I assure him the pleasure is mine.

Mr. WILLIAMS. The Senator from Utah can feel delighted because he has succeeded in that regard, but so far as I remember the Senator has not moved to put anything upon the free list, nor to remove any duty where any American producer had a pocketbook interest in collecting a part of the tax from the American consumer. So far he has moved to put things upon the free list that were not produced in America or else to reduce a duty that was too high even to satisfy the tariff cormorants. That is as far as he has gone. He seems to measure in his philosophy this result: That if the thing is produced in America the American people ought not to receive any revenue from its importation; in other words, that unless somebody in America has a pocketbook interest in the imposition of the tax he is opposed to it.
Mr. SMOOT. Mr. President—

Mr. STONE. Mr. President, I ask the Senator from Utah—Mr. SMOOT. Very well, at the solicitation of the Senator from Missouri I will not answer the Senator from Mississippi, but simply call for a vote by yeas and nays on my amendment.

The VICE PRESIDENT. Is the demand for the yeas and

nays seconded?

The yeas and nays were ordered.

Mr. SHIVELY. Let the amendment be read.

The VICE PRESIDENT. The Secretary will read the amendment.

The Secretary. In paragraph 135, page 39, line 21, after the word "shotguns" strike out the words "and rifles"; and in line 25, after the words "ad valorem" and before the period insert a semicolon and the words: "breech-loading rifles, 25 per cent ad valorem," so as to make the paragraph

volving, or parts thereof and fittings therefor, 35 per cent ad valorem; breech-loading rifles, 25 per cent ad valorem.

The VICE PRESIDENT. The Secretary will call the roll on agreeing to the amendment of the Senator from Utah.

The Secretary proceeded to call the roll.

Mr. CHILTON (when his name was called). I have a pair
with the junior Senator from Maryland [Mr. Jackson]. Unless

I can get a transfer, I will refrain from voting.

Mr. FLETCHER (when his name was called). I have a general pair with he Senator from Wyoming [Mr. WARREN].

In his absence, I withhold my vote.

Mr. THORNTON (when the name of Mr. Johnston of Alabama was called). I desire to announce that the junior Senator from Alabama [Mr. Johnston] is necessarily absent from the Chamber

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. Roor]. I transfer that pair to the Senator from Oklahoma [Mr. Gore] and vote "nay."

The roll call was concluded.

Mr. SMITH of Georgia (after having voted in the negative). I inadvertently voted a moment ago. I have a general pair with the senior Senator from Massachusetts [Mr. Lodge]; but I transfer that pair to the junior Senator from Colorado [Mr. SHAFBOTH] and will let my vote stand.

I wish to announce that my colleague [Mr. Mr. JAMES. Bradley] is detained from the Chamber by reason of illness, He has a general pair with the Senator from Indiana [Mr.

Mr. KERN. I transfer my general pair with the Senator from Kentucky [Mr. Bradley] to the Senator from Alabama [Mr. Johnston] and vote "nay."

Mr. BACON. I inquire whether the senior Senator from Minnesota [Mr. Nelson] has voted?
The VICE PRESIDENT. He has not.

Mr. BACON. For that reason I withhold my vote, having a general pair with that Senator. If he were present, I should

Mr. CHILTON. I transfer my pair with the junior Senator from Maryland [Mr. Jackson] to the senior Senator from Maryland [Mr. Smith] and vote. I vote "nay."

Mr. JONES. I desire to state that my colleague [Mr. Poin-

DEXTER] is necessarily detained from the Chamber.

Mr. SHAFROTH. By a transfer of pairs, I stand paired on this vote with the senior Senator from Massachusetts [Mr.

Mr. PERKINS (after having voted in the affirmative). inquire if the junior Senator from North Carolina [Mr. Over-MAN] has voted?

The VICE PRESIDENT. He has not.
Mr. PERKINS. I will transfer my general pair with the
Senator from North Carolina [Mr. Overman] to the junior Senator from Wisconsin [Mr. STEPHENSON] and let my vote

Mr. SHEPPARD. My colleague [Mr. Culberson] is unavoidably absent. He is paired with the Senator from Delaware [Mr. DU PONT]. I will let this announcement stand for the day.

Mr. GALLINGER. I was requested to announce that the junior Senator from Maine [Mr. BURLEIGH] is paired with the junior Senator from Virginia [Mr. Swanson]; the Senator from Delaware [Mr. DU PONT] with the Senator from Texas [Mr. Culberson]; the Senator from West Virginia [Mr. Goff] with the Senator from Alabama [Mr. BANKHEAD]; and the Senator from North Dakota [Mr. McCumber] with the Senator from Nevada [Mr. NEWLANDS].

The result was announced-yeas 31, nays 40, as follows:

	YE	AS-31.

So Mr. Smoot's amendment was rejected.

Mr. BRANDEGEE. Mr. President, although I do not suppose it makes any difference to the party that has framed this bill as to what the difference in the cost of production here and abroad may be, it makes a great difference to the makers of these goods. I have a communication here from a maker in my State of pistols, which are covered by this paragraph, in which the writer says:

We feel, should these tariff measures go through as proposed now before Congress, it would result in working a very grave hardship to the men employed in this line of industry, as their wages would of necessity have to be very materially reduced, or else our factories would be obliged to close their doors.

Another states:

Another states:

We maintain that the present duty of 75 cents each and 25 per cent ad valorem is no more than sufficient to cover the difference in the cost of labor in our factory and in the gun factories of Belgium and Spain where our principal foreign competition is located.

In our factory we employ about 500 operatives—all grown men—and a large percentage American born. Our skilled workmen earn from \$15 to \$20 per week, working 55 hours. The operatives of our foreign competitors are largely women and children, and they earn from \$3 to \$5 per week. The few skilled men employed earn from \$6 to \$9 per week. The hours of labor are from 60 to 65 per week.

There are no agreements of any kind between American makers of pistols, but on the other hand competition is so keen that the prices have declined during the last few years to a point where there is practically no profit in the business.

I also have here a statement from several manufacturers of double-barrel guns in the State of Connecticut, among them Hopkins & Allen Co., of Norwich, Conn.; the American Firearms Co., of Meriden, Conn.; and Parker Bros., of Meriden, Conn. They state in relation to their industry as follows:

In view of a proposed change in tariff, we, the manufacturers of double-barrel sporting shotguns earnestly ask that such double-barrel shotguns be considered separately from all other firearms, as in the past. Referring to the last proposed change embodied in tariff bill H. R. 18642, paragraph 31—

They have the wrong number, however; they were looking at the bill which came from the House in the last Congress-

the bill which came from the House in the last Congress—
it was proposed to classify double-barrel shotguns with rifles, revolvers, single-barrel repeating and automatic shotguns. We beg to call the attention of your bonorable committee to the fact that formerly double-barrel shotguns have always been considered in a class by themselves, and must be so considered in order to permit the American manufacturers of such arms to remain in business, inasmuch as conditions surrounding their manufacture vastly differ from other firearms. * * * We beg to submit our opinion that if the proposed change were permitted it would be absolutely fatal to the double-barrel gun industry in this country, because the cost of production of a double-barrel shotgun here as compared with the cost abroad is more than double (the difference in cost being made up almost entirely in the difference of wages paid in Belgium as compared with the wages paid in the gun factories in the United States). We cite Belgium, as seven-eighths of the guns imported into the United States are from that country. Any material reduction of the present tariff would be the means of crippling or destroying the double-barrel shotgun industry.

To establish the fact of difference in wages we quote from Dally Consular and Trade Reports, issued in Washington by the Government, dated August 31, 1912, page 1117, the following:

"The wages paid in the gunmaking industries in Belgium vary from 77 cents to 96 cents per day for the ordinary workmen and from 96 cents to \$1.54 for skilled workmen. In spite of a steady advance in the cost of living there was a tendency to reduce the scale of wages of the workingmen employed in gunmaking:

And, according to data published by the Belgium Government in the Annualre Statistique, which gives the official figures for 1910, shows the following dally wages:

About 65 per cent of the men workers over 16 years of age earn less than 68 cents; of the workmen, 67 per cent earn less than 30

the following daily wages:

About 65 per cent of the men workers over 16 years of age earn less than 68 cents; of the workmen, 67 per cent earn less than 39 cents and 33 per cent less than 58 cents per day.

We mention the wage scale of the women because a large percentage of work in Belgium gun factories is done by women and children. It is therefore a very conservative estimate if we assume that the wages paid in Belgium for this class of work is something less than one-third the wages paid for the same work in this country, and the cost of a gun manufactured in this country is composed of over 80 per cent labor. For example, a gun that costs the American manufacturer \$20 to produce represents:

Material Labor Lab	\$4.00 16.00
Total	20. 00
Same gun in Belgium would cost: Material Labor	\$4.00 5.35
Total	9. 3
Present duty added— Specific. Ad valorem, 15 per cent	4. 00

The above shows that the present protection is not sufficient to cover the difference in cost of production, and any further reduction in duty must of necessity swing balance of trade almost exclusively to the Belgium manufacturers, which condition existed prior to our present tariff schedules, and we therefore earnestly ask that the present duty on double-barrel shotguns be left without change.

Mr. President, as I said, it is difficult to make any argument to Senators who say that they utterly disregard the difference in the cost of production between the goods produced in this country and the goods produced abroad. Therefore, as has been repeatedly demonstrated in the past, I do not think it is of any use whatever to offer any amendment to this proposed reduction

Of course, the producers who come here one after another and state they will be obliged to curtail their output and discharge their employees and shorten their hours of work and reduce wages are simply flouted. It is said that any industry which asks to be protected is simply looking after its pocket nerve. In that way one industry after another, and altogether constituting the total productive capacity of this country, is simply set aside. It is assumed—one would think, at least, the assumption to be that there are no persons in this country but consumers, and that the consumers are not producers.

Mr. President, if each industry is to be put out of court by saying that they are trying to protect themselves and hence are not entitled to consideration, I do not know how the prosperity of this country is to be maintained by turning over voluntarily the employment of both the capital and the labor of the country to foreigners in order to reduce temporarily the cost of living, as they say to a certain portion of the people who are nothing but consumers. The trouble is everybody is a consumer, both the employed producers and the people of wealth who do not have to work for a living. But where will the operative who is now getting wages in these factories under a protective tariff that has paid some consideration to the difference in the cost of production in this country and abroad based upon the theory that on the average from 70 to 80 per cent of the cost of every manufactured article is labor, where are the people of this country, the great masses of whom are producers now engaged at profitable wages, to avail themselves of any reduction in the cost of living, even if the importer and the jobber and the middle man and the retailer would allow the ultimate consumer to have the benefit of the cheaper foreign goods that are imported in place of those produced by our own labor and capital? Where are they to get the wages to avail themselves of even the reduced prices of these commodities if in order to get these commodities they are to be discharged from their now productive and prosperous trades?

As I said in the beginning, it is very evident that it would be no use to offer any amendment or make any argument upon this question, when the difference in the cost of production is not even pretended to constitute a controlling element in the opinion of the framers of these measures.

Therefore it is just as well, from my point of view, to vote against the committee provision that is contained in the bill as it is to propose an amendment endeavoring to correct the abuse and have the majority vote it down without a break. It appears to make no difference what the strength of the argument upon any question may be, it is to be voted down. Even if the argument made is unanswered, no amendment proposed by any Senator upon this side of the Chamber is to be tolerated. Men are to vote blindly even when defeated in argument and debate in favor of the action of this secret party caucus, which stands bound not to submit to the dotting of an "i" or the crossing of a "t" or the changing of a comma in the bill, unless the same is proposed as an amendment by the committee in charge of the bill.

As I said before, I shall content myself with voting against the reductions proposed.

The VICE PRESIDENT. The Secretary will proceed with the reading of the bill.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 136, page 40, line 3, after the word "or," to insert the words "any of the above composed wholly or in chief value," so as to make the paragraph read:

136. Table, kitchen, and hospital utensils, or other similar hollow ware composed wholly or in chief value of aluminum or any of the above composed wholly or in chief value of iron or steel, enameled or glazed with vitreous glasses, but not ornamented or decorated with lithographic or other printing, 25 per cent ad valorem.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

Mr. SMOOT. Mr. President, I am going to content myself with calling the attention of the Senate to the amendment now under consideration. I believe if you will take out of the amendment the words "any of the above" there will be no misunderstanding as to what the paragraph really means, but with those words in I do think there will be a great misunderstanding. Let me tell the Senate why. The paragraph reads:

Table, kitchen, and hospital utensils, or other similar hollow ware, composed wholly or in chief value of aluminum, or any of the above made wholly or in chief value of aluminum—

And so forth.

What are "any of the above"? "Any of the above" are table, kitchen, and hospital utensils composed wholly or in chief value of aluminum. If the Senator wants to have it apply not only to aluminum, but to steel and iron, by striking out "any of the above," then it would read this way, which is perfectly plain:

Table, kitchen, and hospital utensils, or other similar hollow ware, composed wholly or in chief value of aluminum or composed wholly or in chief value of iron or steel.

That covers both of them; but the way this wording is, in order that they shall be composed wholly or in chief value of iron or steel they have to be composed wholly or in chief value of aluminum. The words "any of the above" refer to aluminum ntensils.

Mr. THOMAS. Ithink the Senator and I are wholly agreed as to what the purpose of the amendment was designed to subserve, but it seems to me that the criticism of the Senator's suggestion lies in this: If you strike out the words "any of the above," then there would be no provision made for table, kitchen, and hospital utensils composed wholly or in chief value of iron or steel, unless the latter were enameled or glazed with vitreous glasses.

Mr. SMOOT. No; that is the way the House had it. The way you have it now, with the words "any of the above," those words refer to aluminum ware or aluminum ware composed wholly or chiefly of aluminum; and in order that the latter part of the paragraph may have any effect whatever it first must be tableware composed wholly or in chief value of aluminum; but if you strike those words out, then the meaning is plain.

is plain.

Mr. THOMAS. It may be that the Senator's criticism of the language of the paragraph is sound. We have no pride of opinion in construction. But I still think that if we eliminate those words we must add something to cover table, kitchen, and hospital utensils composed wholly or in chief value of iron or steel which are enameled or glazed with vitreous glasses. As it stands, the committee thinks that it does cover all classes; and inasmuch as these utensils which are composed wholly or in chief value of aluminum are not enameled or glazed, and can not be, as I understand it, that amendment was made.

not be, as I understand it, that amendment was made.

Mr. SMOOT. If that is the case, certainly the comma should be stricken out after the word "steel." But I will ask the Senator if he will not let the paragraph go over for further examination.

Mr. THOMAS. We will examine it, of course. We want to get it precisely as the Senator thinks it ought to be. We are agreed as to the result that is satisfactory.

Mr. STONE. It is a mere matter of phraseology. I ask that the paragraph be passed over.

The VICE PRESIDENT. Paragraph 136 will be passed over. The Secretary continued with the reading of the bill.

The next amendment was, in paragraph 137, page 40, line 12, after the word "articles," to strike out "25" and insert "20," so as to make the paragraph read:

137. Needles for knitting or sewing machines, latch needles, crochet needles, and tape needles, knitting and all other needles not specially provided for in this section, bodkins of metal, and needle cases or needle books furnished with assortments of needles or combinations of needles and other articles, 20 per cent ad valorem; but no articles other than the needles which are specifically named in this section shall be dutlable as needles unless having an eye and fitted and used for carrying a thread.

Mr. McLEAN. Mr. President, some time ago I submitted an amendment to this section. I suppose it has been printed and is now on the table. If it is not at hand, I can read from the amendment which I have. On page 40, line 8, between the words "needles" and "and" insert the following:

The hook part of which is made of metal, 40 per cent ad valorem, crochet needles, the hook part of which is made of other materials than metal.

My amendment makes a distinction between the needles made of metal and of wood, crochet needles, which those interested in the business say should be made. There is no reason why there should be as large a duty upon needles made of wood as there is upon the metal needles.

But my principal objection to this section is the rate applied to sewing-machine needles. If Senators will look at the reports upon this product at page 142 of the Tariff Handbook, they will note that in 1896 the rate was 25 per cent and the imports were \$53,000. In 1905 the rate was 34 per cent, an increase of nearly 10 per cent, and the importations increased to \$145,064. In 1910 the rate was raised still higher, to 41.93 per cent ad valorem. Notwithstanding this, the importations increased more than \$50,000, to \$206,875. In 1912, with the same rate, 41.94 per cent, the imports increased more than \$50,000, to \$263,162.

Mr. President, I desire to call the attention of Senators upon the other side of the Chamber who have charge of this schedule

to the fact that in regard to this industry it does not seem to me it could have been considered at all and the rate fixed as it has been fixed.

In Connecticut the industry began in 1866. Needles at that time sold for \$50 a thousand, but by reason of improvements in machinery the price has now been reduced to \$5 a thousand or thereabouts. Owing to improved machinery and the competition which has resulted from the German makers of this same class of goods, this concern some years ago was compelled to build a factory in Germany, at Aachen, where they introduced precisely the same machinery which they had in the mills at Torrington. They had to do this in order to meet the German

I call the attention of Senators on the other side to the fact that this is a clean-cut case of a duty on a product where the only difference in the cost of production is the labor cost. The same firm with the same machinery to-day is manufacturing needles in Germany and also manufacturing them in Torring-

In the brief which was submitted to the committee it seems to me that the Torrington concern very frankly states the exact difference in the cost and the reasons for it, and shows that the German cost is \$3.25 a thousand, whereas the American cost by the old machinery is \$7.80 and by the newer machinery, the latest model, it is \$6.57 per thousand. All they ask for is the maintenance of the present duty, not that it makes good the difference in the cost, because even the present duty does not do that. The report shows that there are absolutely no exports in this product, and it shows that the imports have been increasing very rapidly since 1896. Practically the only difference in the cost of the product here and in Germany is the labor cost.

Mr. STONE. How much is that difference?
Mr. McLEAN. It is about \$2.55 a thousand.
Mr. STONE. What is the per cent of difference?
Mr. McLEAN. It is much more than is asked for. All they

ask is 40 per cent, the same duty that has been upon this article all the years in which the importations have increased. The Torrington manufacturer states in his brief that the reduction of the duty will drive the whole of this industry to Germany. There is no question about that. It can not stand the sharpness of the competition as it is at present.

I want to call the attention of the committee to the fact that in the list of questions which was sent out by the committee that of labor cost was one of the important questions

Mr. STONE. If the Senator will permit me, I will say that I have a table here of the imports into the country in 1912. What is the particular kind of needle the Senator has in mind?

Mr. McLEAN. These are the latch sewing-machine needles. Mr. STONE. Here I find an item for knitting or sewingmachine needles, and the value of the imports for the year ending June 30, 1912, was twenty-nine thousand and odd dollars; of crochet and tape needles, knitting, and all other needles not specially provided for, and bodkins of metal, eighty-seven thousand and odd dollars. Do those two items cover the needles which the Senator from Connecticut has in mind?

Mr. McLEAN. I do not think so; but if the Senator will look at page 132, which includes the importations under paragraph 137, he will find that they are bunched together; and it is very difficult to identify the different varieties of needles that come in under the importations; but the total amount has increased

very rapidly.

Mr. STONE. If the Senator please, I find another item in this list which has been made by the Treasury Department of this kind—"latch needles." Is that what the Senator has reference to?

Mr. McLEAN. That is one of the classes of needles which is made at Torrington and one of the important products.

Mr. STONE. I was endeavoring to get at just what kind of

needles were made at Torrington.

Mr. McLEAN. The other interests appeared before the com-The crochet-needle men appeared before the committee, and their argument was based practically upon the same reasons that the Torrington factory gave-that the importations have increased notwithstanding a constant increase in the duty.

Mr. STONE. Of these latch needles, \$145,000 worth were imported in the fiscal year ending June 30, 1912. Has the Senator from Connecticut any data on his desk by which he could give the production of these needles as compared with

importations?

Mr. McLEAN. No; I have not. As there were no exports, I did not think that that would be important. It seemed to me that the fact that the imports have increased so rapidly under almost double the duty that is imposed here it must be clear to the committee that unless this duty is maintained

the manufacture of this product will have to go to Germany, and that is clearly what the president of the Torrington company, Mr. Vincent, says in his statement to the committee. I will read a paragraph from this brief, which seems to me to be a very fair statement of the situation:

be a very fair statement of the situation:

We felt obliged some years since to establish factories in England and Germany, as we were losing the greater part of our foreign trade, owing to our not being able to meet prices from our factory here. The figures we are giving are comparisons between our factory costs at our Torrington plant and our factory costs at our plant in Aachen, Germany. These figures are made up under the same system and are submitted to the same people eventually for correction and tabulation. We are giving figures of factory cost, leaving out general and selling expenses, as these might differ considerably between the two countries and would be higher in Germany than in the United States, because we go more to the retail trade in Germany than here. In these costs we have taken in all factory costs except insurance, taxes, and depreciation.

We have given two columns of Torrington costs, the first being costs with our latest machinery and the second column costs with the same machinery as we are using in Germany.

In the Torrington factory the costs are: For stock, 53 cents

In the Torrington factory the costs are: For stock, 53 cents per thousand; supplies, 19 cents; labor, \$4.86; machine-shop repairs, 11 cents; waste, 60 cents; factory overhead charges, 20 cents; a total of \$6.57 per thousand.

In Germany the stock is 37 cents; supplies, 18 cents-not a very great difference-labor, \$2.14, in comparison with the \$4.86 in this country; machine-shop repairs, 4 cents; waste, 34 cents; factory overhead charges, 14 cents; a total of \$3.21 a thousand.

It seems to me, Mr. President, in view of the fact

Mr. STONE. Mr. President, I have not been able somehow to place great reliance at any time during these various tariff discussions from session to session upon statements such as the Senator has just made. We have heard over and over again that there was a difference in the labor cost on particular manufactures here and in Germany or in England. I have read with some care divers and sundry reports on that subject, among others the report of Mr. Herbert Knox Smith, former head of the Bureau of Corporations, who made a pretty exhaustive investigation into this subject. I hold in my hand a very excellent synopsis and analysis of that report, and I read three lines from it. as follow:

The bureau attempted to get costs of manufacture in the chief for-eign producing countries, but it was found impossible to obtain any comprehensive information as to cost.

The conclusion is that there was, in fact, no available trustworthy data of the kind referred to, and that comparisons, of course, are therefore practically out of the question as a basis of calculation or of legislation. I would be glad if I had some more definite information on that subject, but such as I have had does not appeal very strongly to my confidence.

Mr. McLEAN. That might well be so in a great many instances, but I present this case because it does seem to me that the committee had trustworthy information in regard to the exact cost, not only from this concern, but I think representatives of two or three other concerns appeared and filed their briefs, not only before the Senate committee but before the House committee.

If the Finance Committee assume in every case that the American manufacturer presented false statements when he came before the committee to appeal for a certain rate of duty, why, of course, I have nothing more to say.
Mr. STONE. Oh, Mr. President, I hope the Senator from

Connecticut will not assume that.

Mr. McLEAN. The Senator from Missouri has stated that he found it very difficult to obtain reliable information.

Mr. STONE. Yes; I have.

Mr. McLEAN. In reply, I suggest that there were at least three firms, whose representatives appeared before the

three firms whose representatives appeared before the committee, and the one which I have mentioned in particular did state to the committee precisely the difference in the cost of production at home and abroad of this particular article. Se in this case the difficulty under which the Senator labored car not exist, provided he gives credence to the American manufacturer. That is all I said. That being the case, the only purpose, apparently, of the committee in fixing this rate was to drive the American manufacturer out of the country and give the benefit of the doubt to the foreign producer. say further to the Senator from Missouri that the author of this bill, almost under the very roof where these needles are made, used the following language:

Now, there are two sides to this question. There isn't a particle of possibility of the Democratic Party that it won't equalize the difference in labor cost at home and abroad.

He said that in Waterbury, close to this factory.

Mr. STONE. Well, I can not assume, and I do not assume, as the Senator does, that the distinguished chairman of the Ways and Means Committee has not kept faith and practically performed that promise in this bill, even as to this particular item of the bill.

Mr. McLEAN. Well, if that is the position taken by the Senator, then his claim is that this rate does make good the difference in the cost of production at home and abroad.

Mr. WILLIAMS. No; the labor cost. Mr. McLEAN. The labor cost?

Mr. WILLIAMS. Yes; the labor cost.

Mr. McLEAN. But let me call the attention of the Senator from Mississippi to what Mr. Underwood said in that same speech. Perhaps the Senator was not here when I read it the other day. Mr. Underwood said in Waterbury:

Now, let us see what the difference between these two great parties is. He says—

Referring to ex-Representative Hill-

we are a free-trade party. I deny it. There is a clean distinction, revenue tariff must be a competitive tariff.

If the Senator from Iowa [Mr. CUMMINS] were here, he would now get Mr. Underwood's definition of a competitive

Whenever you cut off competition then you are damming back revenue, and your tariff is levied for the purpose of protecting somebody's profit, and not for the purpose of getting revenue for the Government. When you coualize exactly the difference in cost at home and abroad, if you can do it—it is impossible to do it exactly, but you may approximate it—but when you do that you have got a competitive tariff.

I was addressing my remarks to the Senator from Mississippi [Mr. Williams], but if he does not care to hear me, I will not read any further. I was endeavoring to communicate to the Senator from Mississippi the definition of a competitive tariff as announced to the people of Connecticut before the election by the author of this bill. If the Senator does not care to hear any more of it, of course I will not proceed further.

Mr. WILLIAMS. I do not know how the Senator arrives at the idea that I was not always sweetly receptive of anything in the world he wanted to say.

Mr. McLEAN. The Senator was engaged in conversation with

another Senator.

Mr. WILLIAMS. That was merely an incidental matter. I did not know the Senator wanted me to listen. If I had known it, I would have listened with all my heart and strength and

Mr. McLEAN. I apologize to the Senator. I will continue to read Mr. Underwood's definition of a competitive tariff:

It is a field in which you can collect a revenue tariff-

That is the competitive tariff-

because all, after fixing the exact difference of cost at home and abroad, on downward it is a revenue tariff. Now, what I said at the meeting at Hartford was that that being the case, and the Government needing all the revenue it could get—we have got to have it—we had to levy the taxes at the highest revenue rate consistent with our principles, which, of course, can not go above the difference of cost at home and abread. and abroad.

Mr. Underwood does not limit the cost to the labor cost.

Mr. WILLIAMS. But he said it in the beginning of the address, did he not?

Mr. McLEAN. No.

WILLIAMS. I suppose he did not have to repeat it every time.

Mr. McLEAN. He finished with this sentence:

There isn't a particle of possibility of the Democratic Party that it won't equalize the difference in the labor cost at home and abroad,

Mr. WILLIAMS. Ah, yes.

Mr. McLEAN. At least equalize the labor cost. Mr. WILLIAMS. The labor cost; yes.

Mr. McLEAN. But a competitive tariff must begin with the difference in cost, according to Mr. UNDERWOOD.

Mr. WILLIAMS. No; labor cost. Mr. McLEAN. Oh, no; he does not limit it to "labor" cost. It may not be a matter of very great importance, except to you; but it does seem to me, under the circumstances, that the confidence of the people of Connecticut was secured by this declaration of the author of this bill. The conditions were such that every word uttered by him was weighed carefully by these men. They were there with their upturned faces to get from him what they were to expect if the Democratic Party should be returned to power; and when he said to them that they need have no concern, that the revision which he might have control of would certainly equalize the difference in the labor cost at home and abroad, I think it would take more than any excuse which I have heard at present to satisfy the laboring man, provided he loses his employment, that he has not been betrayed and deceived. That is why I took the liberty to bring the attention of Members on the other side of the Chamber to this one product, because it is a clean-cut illustration where, if the manufacturers are honest, if their statements are to be given credence—and I believe they are absolutely honest—the tariff does not equal the difference in cost at home and abroad.

Mr. STONE. Mr. President, the Senator from Connecticut has several times quoted from a newspaper report of a speech made by the chairman of the Ways and Means Committee of the House. The speech, it seems, was made in Connecticut during the last campaign. As to the accuracy of the report I have no means of knowing. The Senator is very much wedded to it, as, in way, he keeps referring to it. He quoted it all in a somewhat elaborate and very interesting address he made here some days ago; and about every time he takes the floor he reads again from this supposed utterance of Mr. Underwood, taken from some newspaper in Connecticut. I should think, however, if the Senator from Connecticut were really desirous of knowing the position of the Democratic Party on the tariff, he might, with greater profit, refer to the platform itself, although I do not in that statement mean to say that the chairman of the Ways and Means Committee, a very wise and influential legislator and a great Democrat, has at any time departed from the declaration and policy announced in the party platform.

Mr. President, aside from all that, here we have a reduction of a little above 40 per cent ad valorem. I see the Senator

shake his head. Does he differ from that statement?

Mr. McLEAN. I was simply freeing myself from the heat. I was not annoyed-

Mr. STONE. I did not suppose the Senator was annoyed. It was a question of whether he disagreed.

Mr. McLEAN. No; I do not disagree.
Mr. STONE. Well, according to the figures tabulated by
Treasury officials and now lying on my desk, the existing duty on the articles to which my friend refers is a little above 40 per cent, and the House bill reduced it to 25. Now, Mr. President, I think that——
Mr. McLEAN. If the Senator will pardon me, it is now re-

duced to 20 per cent.

Mr. STONE. The House bill provided a duty of 25 per cent, and the Senator was criticizing the action of the House committee, and particularly that of Mr. Underwood, chairman of the committee.

Mr. President, it seems to me that with a duty such as has been provided here in this bill, even by the amendment of the Senate committee, the workingmen at Torrington who heard Mr. UNDERWOOD speak-

Mr. McLEAN. Well, I did not say that-

Well, that is immaterial. I understood the Mr. STONE. Senator to say

Mr. McLEAN. I said he delivered this speech in Waterbury, which is practically under the roof of or a short distance from

the Torrington factory. Mr. STONE. Then the Senator says that during the delivery of the speech Mr. UNDERWOOD made at Waterbury, in the audience were a number of the men engaged in the industry about

which he had been speaking? Mr. McLEAN. Yes; and men engaged in hundreds of other

industries in the State of Connecticut.

Mr. STONE. And men engaged, as the Senator says, in hundreds of other industries in Connecticut were sitting there, as he described them, with upturned faces listening to what this great leader of the Democratic Party had to say, and that they were influenced by what he said, probably, to vote the Democratic ticket.

Mr. President, I think my friend is unduly alarmed, if he is really alarmed, and is not joining in the same general crusade of his party colleagues on this Democratic tariff measure in a general effort to discredit it. If that be true, then it would be useless to say anything to him or to any other Senator who is inspired by motives of that kind; but, assuming now that he is speaking from the heart and from his judgment, then he must be unduly alarmed.

These manufacturers will go on with their enterprises under the duty fixed in this bill, and the workingmen whom the Senator described most eloquently as looking into the face of Mr. Underwood when he was delivering an impassioned address will go on with their work and their employment just the same

and at the same price.

Mr. McLEAN. I have no desire to prolong this discussion; but I would suggest to the Senator from Missouri that the mechanics of Connecticut had a right to assume that the author of this bill, Mr. UNDERWOOD, would give them a safer interpretation of the Democratic platform, perhaps, or as safe an interpretation as they could get anywhere. Inasmuch as he came to Connecticut with authority to speak as the author of the bill, you can hardly blame the mechanics of Connecticut for accepting his interpretation of the tariff plank of the Democratic platform, because we all know that as a matter of history there has been some difficulty in reaching a consensus of opinion as to what Democratic tariff platforms have meant.

Just one suggestion and I shall finish. I want to say that the report of this speech which I have read was published in a leading Democratic paper of Connecticut, and I have reason to believe that the most accurate stenographer that could be had in the State was sent to Waterbury to take that speech. Inasmuch as I read this speech to the Senate nearly a week ago and no one has seen fit to question the accuracy of a word of it, it is fair to assume that it represents precisely what Mr.

UNDERWOOD said.

So much for that. I want to say further to the Senator from Missouri that I know there are Republicans who will overestimate the injury which will result from the passage of this bill, as a matter of course, and I think it is safe to assume that there are Democrats who will underestimate the extent of the injuries that will result. That is human. But if it comes to us, as it does to-day, so sacred that no amendments can be had; if it comes to us from the mountain, cut in stone, so sacred that when-I will not say by a mistake, but by what seemed to me to be an accident—a rate is raised higher than any human being desires to have it raised, it must still receive the baptism of that side of the Chamber, I want to suggest to the Senator from Missouri that he may be mistaken in this matter, and if so, very serious consequences will result to the manufacturing interests of Connecticut. I mentioned two woolen concerns the other day. I believe the statement I made with regard to them is accurate.

Mr. STONE. Yes; I remember the statement. Mr. McLEAN. I want to say, in conclusion, that if these men in Torrington lose their occupation, if they have to tread the streets in idleness and want, it will take more than the jubilant whistlings of the senior Senator from Missouri to satisfy them that they have not been betrayed and deceived.

Mr. STONE. Mr. President, I do not say one way or the other as to the accuracy of the newspaper report of Mr. Underwood's speech. I am indifferent about it. But certainly every man who heard the speech, and who had read the Democratic platform and the speech made and the letter written by Gov. Wilson accepting the nomination, must have known that it was the declared purpose of the Democratic Party to reform what we considered tariff abuses; that our purpose was to revise the tariff and to keep our promise-whatever our Republican friends may have done about their promises to the same effect—to revise the tariff downward. That meant to cut it somewhere and everywhere along the line. They must have known that it was not the purpose of the Democratic Party to retain the high protective duties laid by the Payne-Aldrich bill.

There is another thing, Mr. President, that these men must have known when they sat there listening to this speech; for I think the people of Connecticut are exceptionally intelligent people. They at least come up to the highest average of our American citizenship. The Senator will agree to that. They must have known that this same Mr. Underwood, chairman of the Ways and Means Committee, had at the previous session of Congress, before he delivered this speech, presented to Congress a bill remodeling the metal schedule, and that the reduction of duties carried in this bill appeared in that bill.

Looking at that fact, that these men knew what had been done by Mr. Underwood's committee and under his guidance, knowing what the Democratic platform contained in giving expression to the purpose of the Democratic Party to reduce taxation all along the line-

Mr. WILLIAMS. And the indorsement of the action of the

Mr. STONE. And, as my friend from Mississippi says, expressly giving indorsement to the previous action of the Housein the face of all this these bright-faced and intelligent workmen from Torrington, making needles, who sat under the eyes listened to the voice of Mr. Underwood, certainly could not have understood him as saying that there was no intention to reduce these duties.

What the Senator read was to this effect-I am trying to state the substance of it-

Mr. McLEAN. I will read it again for the Senator. Mr. STONE. No; the Senator has read it so often that I hope he will not read it again. I can not repeat it verbatim, but I can repeat the substance of it. It was that Mr. Underwood declared that there would be no legislation that would not maintain the difference in the labor cost here and abroad.

Mr. McLean. Or that would destroy any legitimate industry. Mr. STONE. Or that would destroy any legitimate industry. Mr. WILLIAMS. That was not in this speech. Mr. STONE. That is in the platform. I do not know whether

the Senator read that in the speech or not.

Mr. McLEAN. I have no doubt the Torrington mechanics understood it that way.

Mr. STONE. Now, the Senator from Connecticut contends that the existing duty of 40 per cent is not sufficient to cover the difference in the labor cost here and abroad. In other words, he claims that the difference in the labor cost here and abroad is about 60 per cent. Does he understand that Mr. Underwood was promising these happy, bright-faced, intelligent workingmen of Torrington that he would raise this duty to 60 per cent-assuming, now, that the Senator's statement of fact is correct?

Mr. McLEAN. If it was necessary to preserve the industry;

Mr. STONE. Oh!
Mr. McLEAN. But all they are asking is 40 per cent.
Mr. STONE. Mr. President, if the Senator is prepared to say, in view of all the things to which I have referred, that these workingmen believed or for one moment expected any such thing as that, he must be so badly mistaken that the foundation of his contention is-

Mr. WILLIAMS. Rotten.
Mr. McLEAN. I heard the suggestion of the Senator from Mississippi; and if the Senator will pardon me, I would suggest that in the event that we assume that this is a legitimate in-dustry and it is destroyed by the tariff which it is proposed to place upon this article, I will leave to the Senator from Mississippi and the Senator from Missouri the demonstration of the fact that the Democratic Party has kept its promise to these laboring men. I have no doubt those Senators will be able to convince these men that when the author of the bill told them that their industry should not be destroyed they had no right to expect that Mr. Underwood was making a promise which

he intended to perform.

Mr. STONE. Let me ask the Senator from Connecticut a question. Has the Senator offered his amendment? I am not

quite sure whether he has or not.

Mr. McLEAN. Yes. Mr. STONE. Then, Mr. President, I should be glad to have vote on the amendment.

Mr. GALLINGER. Mr. President, the Senator will not get

vote just yet. Mr. STONE. My dear friend does not imagine that I would endeavor to shut him out?

Mr. GALLINGER. Oh, no; I understand.

Mr. STONE. I am always too charmed to hear him. Mr. GALLINGER. Mr. President, a couple of hours ago, when the Senator from Missouri, apparently in a somewhat excited state of mind, told this side of the Chamber that they were wasting time—that they were offering "toploftical" amendments, if I remember the term correctly—I was not quite sure that I would have the temerity to say another word during the consideration of this bill.

But the Senator from Missouri has resumed his normal sweetness of temper; and that being the fact, I propose to say

word or two about this paragraph.

The imports of these needles are very considerable, and from my viewpoint I think they ought not to be increased. I think the factories that make these needles in this country are all in New England. I have been struggling to protect some other New England industries and have not had any success, and I have little expectation that I shall be able to do much for the manufacturers of needles. But I want to read from a brief that was filed with the Committee on Finance of the Senate during the consideration of this bill. It is signed by the following concerns, or their officers:

E. H. Sturtevant, treasurer Franklin Needle Co., Franklin, N. H.; W. F. Duffy, treasurer Mayo Machine & Needle Co., Franklin, N. H.; C. J. Darrah, treasurer William Corey Needle Co., Manchester, N. H.; A. Currier, treasurer Dodge Needle Co., Manchester, N. H.; J. E. Wilson, treasurer Wardwell Needle Co., Laconia, N. H.; John T. Busiell, president Laconia Needle Co., Laconia, N. H.; J. F. Alvord, president Excelsior Needle Co., Torrington, Conn.; W. S. Page, Page Needle Co., Chicopec Falls, Mass.; C. E. Kehoe, Charles Cooper Machine & Needle Works, Bennington, Vt.; E. E. Sawyer, president Contoocook Needle Co., Contoocook, N. H.; J. M. Shaw, treasurer George H. Adams Needle Co., Hill, N. H.

It will be observed that while Connecticut has one needle factory-at least, the name of the representative of a concern in Torrington, Conn., appears in this brief-there are eight mills in my little State of New Hampshire making needles. Hence, I think I have a right to say a word in behalf of this industry, which is a very considerable industry in New Hamp-

In their brief they said:

In their brief they said:

Fully 85 per cent of the cost of manufacturing latch needles is in labor, and there is a strady demand for increased wages. Since 1909 our wages have been increased between 6 and 7 per cent and the cost of material has increased in a greater proportion. With this steady increase in the cost of wages and material and a reduction in the tariff on latch needles that is already too low, the American needle maker will have to shut down his factory and turn the whole business over to the German competitor. There are several small needle makers in Germany to day that are not importing into this country at the present time. With a reduction in the tariff these small needle makers will increase their capacity and establish agencies in this country, undersell the American manufacturer, and take away what trade there is that the present importers can not supply.

It seems to me that as this bill has been reported the Committee on Finance either intentionally or unintentionally has struck a deathblow at this industry. The duty was reduced in the House bill as it came to the Senate from 41 per cent to 25 per cent, and for some inscrutable reason the Democratic members of the Committee on Finance reduced it still further, to 20 per cent. I presume they had some reason for doing that. Certainly it could not have been upon the ground that it covered the difference in the labor cost in Germany and in the United States, because those of us who have looked into the matter know that it will not equalize the labor cost between the two countries. Therefore, I say that while the bill as it came to the Senate is, from my viewpoint, a very disastrous bill, so far as this New England industry is concerned, and especially the New Hampshire industry, the proposed further reduction of the duty, as recommended by the Senate Committee on Finance, is without question going to work irreparable injury to the manufacture of needles in this country.

I received a few days ago from a gentleman connected with one of these factories a letter, which I will read:

LAKEPORT, N. H., July 31, 1913.

Hon. J. H. GALLINGER, Washington, D. C.

Washington, D. C.

Dear Mr. Gallinger: Do you think it possible for us to get any increase in the duty on latch needles? Knowing that you would do everything possible for our industry the writer has refrained from asking any further effort on your part; but for some unexplained reason the Senate has cut the House rate 5 per cent, which makes the duty entirely too low. The Germans are constantly increasing their importations under the present rates, and to reduce the duty to 20 per cent ad valorem places American manufacturers at a great disadvantage. Our employees are mostly skilled help and receive high wages while the Germans pay very low wages. The maximum for men is about \$8 per week, and women receive \$1.75 to \$4 per week. In this country we pay some of our men \$18 per week, and the women \$6 to \$10. The labor cost of latch needles is \$5 per cent. Competition is now so keen that the profit per thousand needles is very small. As you are doubtless aware, there are no latch needles made outside of New Enjand, and most of them are made in New Hampshire—Manchester, Franklin, and Laconia. We are aware that the chances are very much against us, but you may see some way to get the duty placed at a reasonable sum, and anything you can do will be much appreciated. Thanking you for your kindly interest in the past, we are,

Yours, very truly,

Wardwell Needle Co.,

Julius Wilson, Treasurer.

WARDWELL NEEDLE Co., JULIUS WILSON, Treasurer,

My correspondent was not very hopeful when he wrote that letter, and I am sure he will be very much depressed when this paragraph is acted upon if the majority insist upon the violent reduction they propose to make in the duty on this product. It is a very serious matter to the section of country from which I come that these little industries, upon which our prosperity so greatly depends, are taken one by one in this bill and marked, as I think, for slaughter.

I am not a prophet of evil. My nature is to be optimistic rather than pessimistic. I shall indulge the hope that notwithstanding the legislation that is proposed some of them may continue to exist and make profitable returns. But I am constrained to the feeling that so far as the little manufacturing industries in the industrial North are concerned, the policy that is pursued in this bill will irreparably injure them.

I am not concerned about the Woolen Trust, or the Steel Trust, or any of the great concerns that can weather almost any storm, however severe it may be. But I am greatly concerned about these little industries that employ a hundred or two hundred or three hundred men, granting them high wages, giving them an opportunity to own their own homes, giving them an opportunity to deposit in the savings banks, as they are depositing, considerable sums of money. I am concerned about those men and those women; and I should not be doing myself justice if I did not register my protest against a pro-posed reduction of duty such as is embraced in this paragraph.

From the year 1893 to 1897 the laboring people of New Hampshire drew from the savings banks of that little State more than \$10,000,000 to supply the necessaries of life to their families. I do not want to see those men turned out of employment again, as they were during that terrible period of disaster. While I do not and can not persuade myself to believe

that any concession will be made to us, even in this small matter, I want to say it ought to be done; and these men and women, happy and contented in their homes, earning large wages, ought not to be compelled to enter into a keen competi-tion with the people of Germany and other European countries where wages are not 50 per cent of what they are in the needle mills of New England.

Mr. President, the Senator from Connecticut [Mr. McLean] is about to offer an amendment, and I will wait until it is acted upon. If it is not agreed to, I have one or possibly two amendments that I shall desire to offer to this paragraph.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Connecticut.

Mr. STONE. Let the amendment of the Senator from Connecticut be read.

The VICE PRESIDENT. The amendment will be stated.

The Secretary. On page 40, line 8, after the word "needles," where it occurs the second time in the line, it is proposed to insert:

The hook part of which is made of metal, 50 per cent ad valorem; crochet needles, the hook part of which is made of other materials than metal.

Mr. McLEAN. On that I ask for the year and nays.

The yeas and nays were ordered.

The Secretary proceeded to call the roll, and Mr. ASHURST responded in the negative.

Mr. McLEAN. I wish to call the attention of the Senate—— Mr. SIMMONS. Mr. President, I make the point of order that the roll call has begun, and it has been responded to.

Mr. McLEAN. The amendment is not my amendment.

The Secretary resumed the calling of the roll.

Mr. BRANDEGEE (when his name was called). I am informed that the amendment as reported is not the amendment that the Senator from Connecticut offered. I should like to know what the amendment is before I vote upon it. There is a mistake, I understand, in the wording of the amendment, and I should like to know what I am voting on.

The VICE PRESIDENT. The Chair will state for the infor-

mation of Senators that this amendment was submitted by the Senator from Connecticut on the 24th day of July and ordered to lie on the table to be printed; but the form of the amendment offered by the Senator from Connecticut to-day the Chair does not know, because it was not sent to the desk. However, it was assumed by the Secretary and by the Chair that the amendment offered by the Senator from Connecticut on the 24th of July was the amendment upon which he desired the vote to be taken.

Mr. McLEAN. I wish to modify my amendment by reducing

the rate to 40 per cent; that is all.

Mr. STONE Mr. President, if it is in order, that the RECORD may appear right, I ask unanimous consent to vacate the order

for the yeas and nays.

Mr. SMOOT. That can not be done.

Mr. LA FOLLETTE. It can not be done, the roll call having commenced.

The VICE PRESIDENT. The Chair is going to take the authority to say that the Senator from Connecticut has a right to modify his amendment, and he modifies it so that it reads "40 per cent." The roll call will proceed upon the amendment with that modification.

Mr. STONE. I understand the Senator from Connecticut [Mr. McLean] says that the amendment now being voted on is

not the amendment he offered.

Mr. BRANDEGEE. The votes of Senators that have been cast have been upon one basis, and now a modification comes changing the amendment. As the Chair has stated, the entire amendment was not stated to the Senate before the roll call was begun, and I think the amendment should, at least, be was begun, and think the amendment should, at least, be stated to the Senate by the Secretary.

The VICE PRESIDENT. The Senator from Connecticut is

in error. It was read by the Secretary, and now the Senator from Connecticut has modified his amendment. The roll call

will proceed upon the amendment as modified.

Mr. BRANDEGEE. The amendment was read by the Secretary as offered by the Senator from Connecticut some days ago and printed. The amendment the Senator from Connecticut offered on the floor to-day has a different per cent, and it ought to have been stated, it seems to me.

Mr. STONE. Let us proceed. I call for the regular order.
Mr. BRANDEGEE. I hope the request of the Senator from
Missouri for unanimous consent will be given.
Mr. LA FOLLETTE. The regular order.
The VICE PRESIDENT. The Secretary will commence at

the beginning and call the roll.

The Secretary again proceeded to call the roll.

Mr. BANKHEAD (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr.

GOFF], which will stand until further notice.

Mr. JAMES (when Mr. BRADLEY'S name was called). again announce the absence of the Senator from Kentucky [Mr. Bradley] on account of illness, and state that he has a pair with the Senator from Indiana [Mr. Kern]. I will allow this announcement to stand for the day.

Mr. CHILTON (when his name was called). I make the same announcement of a transfer that I made on the former

roll call and vote "nay."

Mr. THORNTON (when the name of Mr. Johnston of Alabama was called). I again announce the unavoidable absence of the junior Senator from Alabama [Mr. Johnston]. I ask

that this announcement may stand for the day.

Mr. KERN (when his name was called). I transfer my general pair with the senior Senator from Kentucky [Mr. Brad-LEY] to the Senator from Alabama [Mr. Johnston] and vote. I vote "nay."

Mr. GRONNA (when Mr. McCumber's name was called). wish to announce that my colleague [Mr. McCumber] is absent on account of illness in his family. He is paired with the senior Senator from Nevada [Mr. NEWLANDS]. I wish this announcement to stand for the day.

Mr. SMITH of Georgia (when his name was called). I transfer my pair with the senior Senator from Massachusetts [Mr. Lodge] to the senior Senator from Nebraska [Mr. Hitch-

[Mr. LODGE] to the senior Senator from Nebraska [Mr. Hitch-cock] and vote "nay."

Mr. THOMAS (when his name was called). I transfer my general pair with the senior Senator from New York [Mr. Root] to the Senator from Oklahoma [Mr. Gore] and vote

Mr. SMITH of Michigan (when Mr. Townsend's name was called). My colleague [Mr. Townsend] is temporarily absent from the Chamber. He has a pair with the junior Senator from Florida [Mr. BRYAN]

The roll call was concluded.

Mr. BRYAN. I will transfer my pair with the junior Senator from Michigan [Mr. Townsend] to the junior Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. SUTHERLAND. I will inquire whether the senior Sen-

ator from Arkansas [Mr. CLARKE] has voted.

The VICE PRESIDENT. He has not.

Mr. SUTHERLAND. I have a pair with the senior Senator from Arkansas, and therefore withhold my vote.

Mr. JONES. I desire to announce again the necessary absence of my colleague [Mr. Poindexter].

The result was announced—yeas 18, nays 50, as follows:

	YE	AS-18.	
Brandegee Catron Colt Dillingham Gallinger	Lippitt McLean Nelson Oliver Page	Penrose Perkins Sherman Smith, Mich. Smoot	Sterling Warren Weeks
	NA:	YS-50.	
Ashurst Bacon Brady Bristow Bryan Chamberlain Chilton Clapp Fletcher Gronna Hollis Hughes James	Johnson, Me. Jones Kenyon Kern La Follette Lane Lea Lewis Martin, Va. Myers Norris O'Gorman	Overman Owen Pomerene Ransdell Reed Robinson Saulsbury Shafroth Sheppard Shields Shively Simmons Smith, Ariz,	Smith, Ga. Smith, S. C. Stone Thomas Thompson Thornton Tillman Vardaman Walsh Williams Works
	NOT VO	OTING-28.	
Bankhead Borah Bradley Burleigh Burton Clark, Wyo. Clarke, Ark.	Crawford Culberson Cummins du Pont Fall Goff Gore	Hitchcock Jackson Johnston, Ala. Lodge McCumber Newlands Pittman	Poindexter Root Smith, Md. Stephenson Sutherland Swanson Townsend.

So Mr. McLean's amendment was rejected.

Mr. CLARK of Wyoming. Mr. President, I desire to state that while present I did not vote because I did not believe that a roll call once begun could be interrupted until it had been completed to the end.

Mr. JONES. I desire to say that I understood in voting upon the amendment that we were voting upon a 50 per cent rate proposed by the Senator from Connecticut. If the rate of the

amendment was 40 per cent, I should vote for it.

Mr. GALLINGER. Mr. President, I propose to offer an amendment, which I will first state and then it can be read from the desk. It reduces the rates of the present law on needles for knitting or sewing machines from \$1 to 75 cents

per thousand and from 25 per cent to 20 per cent ad valorem; latch needles from \$1.15 to 90 cents per thousand and from 35 per cent to 25 per cent ad valorem; and on bodkins of metal from 25 per cent to 20 per cent ad valorem.

Mr. President, that is a very large reduction from the existing law under which the manufacturers of these needles find it very difficult to sustain themselves as against the intense competition from foreign countries.

I hope the amendment will receive an affirmative vote. The VICE PRESIDENT. The amendment offered by the Senator from New Hampshire will be read.

The Secretary. Strike out paragraph 137, as printed in the bill, and insert in lieu thereof:

137. Needles for knitting or sewing machines, 75 cents per thousand and 20 per cent ad valorem; latch needles, 90 cents per thousand and 25 per cent ad valorem; crochet needles and tape needles, knitting and all other needles, not specially provided for in this section, and bodkins of metal, 20 per cent ad valorem, but no articles other than the needles which are specifically named in this section shall be dutiable as needles unless having an eye and fitted and used for carrying a thread. Needlecases or needlebooks furnished with assortments of needles or combinations of needles and other articles shall pay duty as entireties according to the component material of chief value therein.

Mr. GALLINGER. I ask for the year and nays on the amendment.

The yeas and nays were ordered.

Mr. OLIVER. I should like to ask the Senator from New Hampshire how the rates in his amendment compare with the 40 per cent rate that was proposed by the Senator from Connecticut [Mr. McLean]?

Mr. GALLINGER. My impression is that it would place the ad valorem a little below 40 per cent.

Mr. OLIVER. A little below? Mr. GALLINGER. I think so. I feel sure that it would be as low as 40 per cent.

The VICE PRESIDENT. May the Chair suggest to the Sen- . ator from New Hampshire, as the amendment he has offered embraces an entire change in the paragraph, that the commit-

tee amendment should be first passed upon?

Mr. GALLINGER. The Senator from New Hampshire does not think so. I think that a substitute can be offered which if it is agreed to will extinguish the committee amendment absolutely. If this amendment is not agreed to, I will say to the Chair that I have some amendments to offer to the committee amendment itself.

Mr. STONE. Let us have a roll call.

The VICE PRESIDENT. The Secretary will read Rule XVIII

The Secretary read as follows:

RULE XVIII.

AMENDMENTS-DIVISION OF A QUESTION.

If the question in debate contains several propositions, any Senator may have the same divided, except a motion to strike out and insert, which shall not be divided; but the rejection of a motion to strike out and insert and insert one proposition shall not prevent a motion to strike out and insert a different proposition; nor shall it prevent a motion simply to strike out; nor shall the rejection of a motion to strike out and insert. But pending a motion to strike out and insert. But pending a motion to strike out and insert, the part to be stricken out and the part to be inserted shall each be regarded for the purpose of amendment as a question; and motions to amend the part to be stricken out shall have precedence.

Mr. GALLINGER. Mr. President, I think that manifestly means a motion from the floor to amend. We have here an entire proposition coming from the committee. The committee recommend an amendment that has not been agreed to; it is a part of the paragraph as it stands now. If I had made my motion to strike out and insert, and a Senator had made a motion to amend the text, unquestionably the rule would apply; but I do not think it applies in this case at all.

The VICE PRESIDENT. The only difficulty with the Chair

is that the Chair has been ruling heretofore that before a motion to strike out the text and insert other matter the committee has a right to have its amendment first passed upon and the text perfected. The Chair has no pride of opinion about

this question or any other.

Mr. GALLINGER. Mr. President, I will submit to the ruling of the Chair, whatever it may be, but it places those who desire to amend this paragraph at somewhat of a disadvantage, for the reason that after the rejection of this mendment, if it shall be rejected, then I propose to offer amendments to the amendment submitted by the committee. It is true I could offer them now, but I do not think they would have the potency that they would have after my proposition to strike out and insert has been acted upon. However, I will surrender to any decision the Chair makes on the proposition.

Mr. BRISTOW. Mr. President-

Mr. STONE. I am inclined to think the Chair is correct in the suggestion he made; but there has been no point of order raised against it, and I think we can dispose of the amendment of the Senator from New Hampshire much more speedily by acting upon it now, unless the Chair thinks he is obliged to

make a ruling of this kind.

The VICE PRESIDENT. The VICE PRESIDENT. The Chair does not care the slightest about it in the world. The Chair simply announced that he had heretofore made the ruling that the friends of a measure have a right to perfect the text before there is any motion entertained to strike out and insert a different text; but if no one cares to insist upon the rule, the question will be taken on the amendment proposed by the Senator from New Hampshire. On this amendment the year and nays have been ordered, and the Secretary will call the roll.

Mr. BRISTOW. Mr. President, I should like to inquire of

the Senator from New Hampshire about what is the per cent in these changes he has made, since it is not an ad valorem but a specific rate? I desire to say that from the discussion I believe the amendment of the committee to the paragraph is not justified; but I do not want to go much above the point fixed by the House. How much would the ad valorem rate be as it

is proposed by the Senator?

Mr. GALLINGER. I have not made a calculation, and I think I would not be competent to do it if I tried. I should give it as my judgment that the proposed reduction from the existing law embraced in the amendment I have offered would undoubtedly reduce it from 41 per cent to considerably below 40 per cent, and quite likely to 35 per cent. That is my judg-

The VICE PRESIDENT. The Secretary will call the roll on agreeing to the amendment of the Senator from New Hamp-

The Secretary proceeded to call the roll.

Mr. BRYAN (when his name was called). I again announce my pair with the junior Senator from Michigan [Mr. Town-SEND] and the transfer of the pair to the junior Senator from Nevada [Mr. PITTMAN]. I vote "nay."

Mr. CHILTON (when his name was called). I make the same announcement of my pair and its transfer as before. I

vote "nay.'

Mr. KERN (when his name was called). I transfer my pair with the Senator from Kentucky [Mr. Bradley] to the Senator from Alabama [Mr. Johnston] and vote "nay."

Mr. SMITH of Georgia (when his name was called). fer my pair with the senior Senator from Massachusetts [Mr. LODGE] to the junior Senator from New Hampshire [Mr. Hollis] and vote. I vote "nay."

Mr. SUTHERLAND (when his name was called). I again announce my pair with the Senator from Arkansas [Mr. CLARKE], and on account of his absence refrain from voting. I will let this announcement stand for the remainder of the

Mr. THOMAS (when his name was called). I transfer my general pair with the senior Senator from New York [Mr. Root] to the Senator from Oklahoma [Mr. Gore] and will vote. I vote "nay."

The roll call was concluded.

Mr. SMITH of Georgia (after having voted in the negative). The junior Senator from New Hampshire [Mr. Hollis], to whom I had transferred my pair, has come into the Chamber, and I will therefore withdraw my vote.

The result was announced—yeas 25, nays 45, as follows:

		AS—25.	,
Brandegee Burton Catron Clapp Clark, Wyo, Colt Dillingham	Gallinger Gronna Jones La Follette Lippitt McLean Nelson	Oliver Page Penrose Perkins Sherman Smith, Mich. Smoot	Sterling Warren Weeks Works
	NA.	YS-45.

So Mr. Gallinger's amendment to the amendment of the com-

mittee was rejected.

Mr. GALLINGER. Mr. President, the affirmative vote is growing somewhat. I had hoped on the last vote to get at least the votes of the Senator from New Hampshire [Mr. Holls] and the Senators who have told us that the sugar industry will be destroyed if the bill passes as it has been reported; but I have been disappointed.

The rate proposed in this bill by the Senate committee is 20 per cent. I presume that anything I might say would fall on

deaf ears on the other side of the Chamber.

Mr. STONE. I should like to have a little more order. I can not hear what the Senator is saying. Did I understand the

Senator to offer an amendment to the sugar schedule?

Mr. GALLINGER. No; I will leave that for other Senators when the sugar schedule is reached. I made an observation about it; that was all. I suggested, Mr. President, I will say for the benefit of the Senator from Missouri, that the proposed rate in this bill of 20 per cent, in the judgment of those who know something of this industry and who want to preserve it if they can, preferring that the work shall be done in the United States rather than in Germany, and that the wages shall be paid in New Hampshire and in other States of New England rather than in foreign countries, is a disastrously low rate and ought not to be agreed to. I shall offer no further amendment, Mr. President, but I ask for the yeas and nays on the amendment reported by the committee.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee, on which the Senator

from New Hampshire demands the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded

to call the roll.

Mr. BRYAN (when his name was called). I transfer my pair with the junior Senator from Michigan [Mr. Townsend] to the junior Senator from Nevada [Mr. PITTMAN] and will vote. I vote "yea."

Mr. CHILTON (when his name was called). I again announce my pair and its transfer, as before stated.

Mr. KERN (when his name was called). I transfer my pair with the Senator from Kentucky [Mr. Bradley] to the Senator from Alabama [Mr. Johnston] and will vote. I vote

yea."

Mr. SMITH of Georgia (when his name was called). transfer my pair with the senior Senator from Massachusetts [Mr. Lodge] to the junior Senator from Mississippi [Mr. VARDA-MAN] and will vote. I vote "yea.'

The roll call was concluded.

Mr. STERLING. I wish to announce that my colleague [Mr. CRAWFORD] is necessarily absent from the Chamber. this announcement to stand for the day.

Mr. GALLINGER (after having voted in the negative). inquire whether or not the junior Senator from New York [Mr. O'GORMAN] has voted?

The VICE PRESIDENT. The Chair is informed that he has

Mr. GALLINGER. I have a general pair with that Senator, but I will transfer the pair to the junior Senator from Wisconsin [Mr. Stephenson] and allow my vote to stand.

The result was announced—yeas 39, nays 28, as follows:

YEAS-39.

Ashurst Bacon Bryan Chamberlain Chilton Fletcher Hitchcock Hollis Hughes James	Johnson, Me. Kern Lane Lea Lewis Martin, Va. Martine, N. J. Myers Overman Owen	Pomerene Ransdell Reed Robinson Saulsbury Shafroth Sheppard Shields Shively Simmons	Smith, Ariz. Smith, Ga. Smith, S. C. Stone Thomas Thompson Thornton Walsh Williams

So the amendment reported by the committee was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 138, page 40, line 20, after the words "ad valorem," to insert "Provided, That no article of fishing tackle herein named shall be imported having attached thereto any of the feathers the importation of which is prohibited by this act,' so as to make the paragraph read:

138. Fishhooks, fishing rods and reels, artificial flies, artificial baits, snelled hooks, and all other fishing tackle or parts thereof, not specially provided for in this section, except fishing lines, fishing nets and selnes, 30 per cent ad valorem: Provided, That no article of fishing tackle herein named shall be imported having attached thereto any of the feathers the importation of which is prohibited by this act.

Mr. SMOOT. Mr. President, I should like to have that paragraph go over until the feather paragraph is finally passed

Mr. STONE. I think that is very well.

I think that it ought to go over, not that I am objecting to the rates or anything of that kind.

Mr. STONE. I agree with the Senator.

The VICE PRESIDENT. Paragraph 138 will be passed over. The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 139, page 40, line 24, after the word "plates," to insert "halftone plates, photogravure plates, photo-engraved plates," so as to make the paragraph read:

139. Steel plates engraved, stereotype plates, electrotype plates, half-tone plates, photogravure plates, photo-engraved plates, and plates of other materials, engraved for printing, plates of iron or steel engraved or fashioned for use in the production of designs, patterns, or impressions on glass in the process of manufacturing plate or other glass, 15 per cent ad valorem; lithographic plates of stone or other material engraved, drawn, or prepared, and wet transfer paper or paper prepared wholly with glycerin, or glycerin combined with other materials, containing the imprints taken from lithographic plates, 25 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read to the end of paragraph 142, page 41.

Mr. PENROSE. Mr. President, I ask that the next paragraph, 143, be passed over.

The VICE PRESIDENT. It will be passed over.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 144, page 42, line 7, after the word "manufactured," to strike out "25" and insert "15," so as to read:

144. Wheels for railway purposes, or parts thereof, made of iron or steel, and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, or other railway tires or parts thereof, wholly or partly manufactured, 15 per cent ad valorem.

Mr. PENROSE. Mr. President, I do not suppose it will be of any use to record a protest on this paragraph; but I should like to call the attention of the Senate to a few facts concerning this business.

The investment is approximately \$25,000,000. The plants are located in the States of Illinois, Missouri, Pennsylvania, New York, Michigan, and Colorado. It is estimated that employment is given to 8,000 men in this industry.

If any change of a material nature is made in the existing tariff rates, it would not be possible, in the opinion of all of those engaged in the business, for the manufacturers of these products in the United States to compete with importations of similar products from Europe. This is proven by the fact that they are now unable to compete successfully with the European manufacturers for the exportation of these articles to Canada, where the opportunities for securing this business are equal and the deciding factor should be one of price only. At the present time the United States manufacturers are unable to secure any business except when the demand is urgent and it is impossible to await delivery from Europe-that is, in Canada.

Investigation will show that prices for home consumption of these products in Europe are higher than the prices charged by American manufacturers of these products to home consumers. In England and Germany tires are sold at upward of 4 cents per pound; in the United States at from 3 to 31 cents per pound, and in no case as high as 4 cents per pound. Canada and Mexico are practically the dumping grounds of Europe for the excess production of these materials by European manufacturers, and it is certain that the United States will likewise become the dumping ground of the same products from the same sources if any material reduction is made in the duties.

England protects her industry by the compulsory use of

British tires manufactured in England or her colonies and Germany protects hers by a high tariff. At the present time the production of these materials from the plants in the United States is largely in excess of the American demands. This fact has already reduced the price which the manufacturers can obtain for their goods to a much lower basis than the importance of the business demands and would justify. If, in addition to this, they are to be confronted with the surplus products of the European manufacturers, it will have a disastrous effect on the business and capital invested in the plants, particularly when England has shut off any possibility of competition in the British Isles and her colonies, and Germany has done the same thing by her tariff laws.

I simply desire to call the attention of the Senate to the large investment, the peculiar character of the foreign trade, and the

results which are anticipated.

The foreign plants manufacturing these materials are located principally in Germany and England, there being but 3 plants in France as against 8 in Germany, 10 in England and Scotland, and 3 in Belgium. Thus it will be seen that the great majority of the foreign manufacturers are protected from importations from this country, or practically so; and if these duties are to be reduced they can send their surplus products here, with practically no chance of retaliation by the home manufacturer.

If competition is a desirable thing to bring about, Mr. President, it certainly should be reciprocal. A one-sided competition, where the American manufacturers have no chance to get into the foreign markets on account of the facts above stated, certainly is not to be desired. Moreover, as already stated, these products are selling in this country, due to local competition, for considerably less than the same products sell for in foreign markets. Naturally the foreign manufacturer does not desire to reduce the price in this country any lower than prevailing prices, because he can already sell his products for a higher price at home, and he will only avail himself of our markets with his surplus product, or when there is a duliness in his home market.

Here we have a case, therefore, of an American industry in which a very considerable amount of capital is invested, one in which the business has been created in various parts of the country by the ingenuity and ability of the American people,

and by means of which a large number of our citizens-some 8,000, as I have stated-obtain their employment and their livelihood.

If this change is made, it is confidently believed in the trade that it will result in the partial destruction of the industry, if not in the very serious embarrassment of the entire business.

I do not intend to offer any amendment, Mr. President, I simply desire to call the attention of the Senate to the facts.

Mr. THOMAS. Mr. President, I merely wish to call the attention of the Senate to the fact that in 1910 the value of the imports under this paragraph was \$37,708, while the production was \$18,740,000, with an export trade of \$410,291.

Mr. OLIVER. Mr. President, I should like to have from the committee some explanation as to why they reduced the rate proposed by the House, 25 per cent ad valorem, to the exceed-

ingly low rate of 15 per cent ad valorem.

Mr. THOMAS. For the same reason that other reductions are made, because the raw material for this product is placed upon the free list, and also because the large disparity between imports and exports justifies it, in the opinion of the committee.

Mr. OLIVER. Does the Senator mean to say that placing the raw material upon the free list is going to make very much difference in the cost of the raw material to the producers of these wheels?

Mr. THOMAS. I do not see any reason why it should not. If they get their raw material free of duty, certainly the cost of production will be to that extent decreased.

Mr. OLIVER. Then do I understand that the Senator proposes that the raw material for these wheels shall be brought in from abroad?

Mr. THOMAS. I understand that to be the contention of the

other side.

Mr. OLIVER. Oh! Then the Senator confesses that he expects all the raw material for this industry to be brought in from other countries?

Mr. THOMAS. Oh, no: I do not expect that, and I do not think the Senator does.

Mr. PENROSE. My only contention was that the American people are getting this commodity cheaper than any other people in the world, and owing to the peculiar laws and requirements in England and the tariff of Germany there can be absolutely no reciprocity in our foreign relations so far as this particular product is concerned. It is simply surrendering our own market as a dumping ground to the foreigner and putting us on a level with Mexico in connection with the articles mentioned in this paragraph.

Mr. SHERMAN. Mr. President, the railway tire is a very highly finished product. It requires special machinery and highly skilled labor for its manufacture. There are 12,000 men, all of them skilled laborers, engaged in that particular industry in this country. Between four and five thousand of them are engaged in the Mississippi Valley, principally in two States, in the large manufacturing centers of that part of

the country.

As given in the bandbook, in 1910 the entire domestic production consisted of 366,000 tons, valued at about \$18,000,000. The exports of this product aggregated only \$410,000. percentage of the entire domestic production represented by exports, if the value be considered, is very low, making a very high consumption of the domestic product in this country.

By referring to the figures for 1912 in the handbook, it is

found that the imports for that year amounted to 1,341.000 pounds, valued at only about \$35,000. This measures the entire imports of this product for 1912. For 1910 the imports are slightly larger, aggregating in round numbers about \$37,000.

Our imports under the existing rate are comparatively small. If you reduce the figures to tons instead of pounds, as given, the tonnage is very small. That is under a rate of 11 cents per pound. The proposed rate of 15 per cent ad valorem is equivalent to a reduction of about 64 per cent, I think, instead of the reduction indicated in the handbook. If the price be taken as the basis of figuring the reduction, it runs from 58 to 64 per cent of actual reduction.

Railway tires are selling in Chicago on board the cars for from 3 to 31 cents a pound. Three and a half cents a pound is about the maximum price on the market at any point in the Mississippi Valley where I have information that the articles are manufactured. If 3 cents a pound be taken as the figure, it is a reduction of about 64 per cent, as you will find if you figure it up. It is correspondingly smaller as the price on the market increases. This 64 per cent reduction is given without any compensating advantage to the manufacturers of more than \$18,000,000 worth of this single product in this country.

Germany maintains a very high protective tariff. When it is put alongside of our product, selling at from 3 to 31 cents a pound, it is practically prohibited as an article of export to Germany; and so our manufacturers in Chicago find it. They are practically shut out of the German trade. They are entirely prohibited, as the Senator from Pennsylvania says, from entering the United Kingdom. Great Britain prides herself on being a free-trade country. Her budget is made up entirely on a revenue basis. But when she undertakes to protect an article of her manufacture, she does not take the roundabout method of a protective tariff. She in this case absolutely prohibits a solitary tire from this country rolling on one of her wheels in England, or in any of her dependencies. It amounts, in substance, to a prohibition. It is not protection; it is an absolute exclusion of the American manufacturer from partici-

pation in that trade abroad.

The wages paid the men in Chicago, in Pullman, in Chicago Heights, and in East St. Louis, Ill., range from \$2.75 to \$5 per day. Their labor is skilled labor. Some of the wages range even higher than that. There have been some wages paid, at one time, amounting to nearly \$6 a day. Notwithstanding that, our product here goes upon the market at a maximum price of about 3½ cents. By throwing our market open on the basis of a 50 or 60 per cent reduction, with no compensating advantages in Germany, with France maintaining a rate of \$1.10 per hundred pounds on steel tires, with our absolute exclusion from England, and with the rate of wages paid for skilled labor, it means not only that we lose the comparatively small quantity of our export trade, but this 15 per cent basis, with a 64 per cent reduction, leaves us practically but 36 per cent of the present protective rate.

It means, in substance, throwing open our markets for this product to the manufacturers of Germany, England, and Austria. There are three countries which produce this article in greater quantities than their domestic needs. They export it largely to countries demanding the article. Because of the degree of protection of 14 cents per pound the imports into this country have been small during the continuance of that This is a lower rate than it has been under former. Those manufacturing that product in our country tariffs. under former tariffs were able to establish their industry. They have been able to keep running every day in the year under the present rate of one cent and a quarter a pound, but with a 64 per cent reduction of this article, with the article selling at a maximum of $3\frac{1}{2}$ cents a pound, it looks to me like it amounts to a suspension of the business in this country.

I have here petitions signed by a large number of men engaged in this industry. They are not the owners or managers of the enterprises; they are the men who are working in the shops. I do not care to encumber the RECORD with the petitions, but I wish respectfully to call attention to the presentation of the petitions in connection with the remarks I have submitted. These men are on the pay rolls at Chicago Heights, at Pullman, Ill., and at East St. Louis, Ill., in the factories manufacturing this variety of product.

Mr. NORRIS. Mr. President, I wish to ask the Senator

from Illinois a question, if he will yield to me. Can the Senator give us any information as to the cost of the production

of this product here and abroad?

Mr. SHERMAN. We produce the article here with a very high degree of efficiency. Our labor cost is nearly two to one.

Mr. NORRIS. The Senator from Pennsylvania, I understand, makes the statement that we can produce it here as cheaply as it can be produced in a foreign country.

Mr. PENROSE. No: I said it is sold to the American con-

sumer more cheaply than it is sold in Europe.

Mr. NORRIS. Can the Senator from Pennsylvania give us

any information as to the cost of production?

Mr. PENROSE. I probably could do so to-morrow. I have not the information at hand here. But this is a very peculiar case, as the Senator from Illinois has so ably stated. Germany and England have by their dumping process absolutely extinguished this industry in every other country in Europe. right at our borders, is already a dumping ground for those two We can not hope for any reciprocity from them, because Germany has her tariff and England has her peculiar laws about the use of this material in connection with railroads in the United Kingdom and in her colonies.

Therefore we are deliberately letting down the bars to make. the American Republic a dumping ground, and, in the opinion of many persons, it will absolutely extinguish an investment of \$25,000,000, employing throughout the country some 8,000 people. If it was an ordinary case where we could hope for foreign interchanges, the question might be different; but I can not imagine the argument which prompted the majority in this Chamber to cut down the duty in this particular paragraph.

Mr. SHERMAN. Mr. President, I should like to answer a little more at length the question of the Senator from Nebraska. Our efficiency is high. Our rate of wages is correspondingly high. It is roughly stated at from 2 to 1 as compared with the pay rolls of our principal competitors. We can only continue to produce and sell at the rate of from 3 to 3½ cents per pound the finished product when we have the entire domestic market. The domestic market practically belongs to the manufacturers

of our country at this time.

The domestic production was 366,000 tons in 1910, having a commercial value of \$18,740,000. The domestic consumption in the United States amounted to \$18,368,000. Of course, in this is included our imports to find our total domestic consumption. But our imports for the same year are trifling, amounting to only \$37,000 in commercial value on the market. So practically our domestic market furnished by these manufacturers was over That constitutes practically all of the American market. As long as the home manufacturer has the American market he can continue to sell his product on a very close margin, because the quantity that he sells is large; but if the quantity is reduced by importations, his margin of profit being small, having not the entire American market, he can not sell at 3 or 31 cents a pound. If he does, he will have no margin to continue business on.

Mr. NORRIS. Can the Senator give us any idea as to the difference in freight? The difference in freight ought to be some protection to the American producer.

Mr. SHERMAN. The freight is practically to be ignored in

figuring on this product.

Mr. NORRIS. The freight must be quite an item. Mr. SHEKMAN. The freight on this article is not an important item.

Are there any manufacturers in the eastern part of the United States, along the coast?

Mr. SHERMAN. It costs something to import from abroad, but the importations are brought here with the advantage of a

through rate or a joint rate.

Mr. NORRIS. I do not think the Senator heard my question. Is there any of it produced along the eastern shore of the United States?

Mr. SHERMAN. Of this article?

Mr. NORRIS. Yes.

Mr. SHERMAN. Yes, sir.
Mr. PENROSE. I recited the States that produce it. These

Mr. PENROSE. I recited the states that produce it.
are Pennsylvania, Illinois, Colorado, half a dozen States.
Mr. OLIVER. Mr. President, if the Senator from Illinois
will allow me, I think I can answer the question of the Senator from Nebraska about freight. When you come to an article as high in value as this the freight becomes a comparatively small factor, because these tires are transported at practically the same rate as lower grades of steel, and the freight rate is small in proportion to the value. For instance, take 3½ cents a pound as the value of the article; the freight, say, from Pittsburgh to Chicago would be only 18 cents a hundred. That is a very small amount compared to the value. The freight rate of 18 cents a hundred applies just as well upon an article worth only 2 cents a pound.

Mr. NORRIS. Yes; but, of course, this article is very

Mr. OLIVER. Of course it is heavy. Mr. NORRIS. I presume the freight rate is low because it is not liable to be broken or anything of that kind.

Mr. OLIVER. It is not liable to be broken, but— Mr. NORRIS. Still it has to be transported a long distance. That is the reason why I was inquiring about the production of the article in the eastern part of the United States. I can see how the freight rate across the ocean might be more than the freight rate from Chicago to the Atlantic seaboard.

Now, I should like to ask the Senator about the dumping process that he speaks of. It seems to me there is rather a peculiar condition in regard to this product. As yet there has been no dumping process going on in this country. Can the Senator give us any idea about overproduction in the other countries?

Mr. SHERMAN. There is a surplus in three countries and has been for probably five years. That is as far back as I have the figures.

Where has that found an outlet heretofore? Mr. SHERMAN. It finds some outlet in Canada, some in Mexico, and wherever there is railway development. Wherever

able mileage of railway, the European manufacturer finds an outlet for it

Mr. NORRIS. There has not been any of it so far dumped in the United States.

Mr. SHERMAN. There has not been since the existing rate or any rate that has been similarly protective, because the dumping process is unprofitable. It can not get in here without the added cost-

Mr. NORRIS. I can see how a high enough tariff would

prevent that, of course.

Mr. SHERMAN. But figuring 3 cents a pound as the mini-mum price, with the volume of business done in this article a 64 per cent reduction will immediately produce the condition the Senator from Pennsylvania speaks of; the dumping process will begin, because there is a surplus in those countries. Germany, Austria, and England manufacture more than they can use there, and continually finding a surplus on their hands it will be shipped here. We can not get into that market. The United Kingdom bars us.

Mr. NORRIS. Mr. President—
Mr. STONE. I ask that we may have a vote. Let us dis-

pose of this paragraph.

Mr. OLIVER. I think the Senator should allow this side a little latitude in debating an important proposition like this, and not try to take a Senator off the floor when he is engaged in its discussion.

Mr. STONE. I beg pardon, if the Senator thought I intended

to take anyone off the floor.

Mr. PENROSE. This is one of the most vicious paragraphs in the whole bill, and it ought not to be lightly passed over. Let it go over until to-morrow.

Mr. STONE. Very well, if we can not dispose of it now.

Does the Senator from Nebraska desire to speak?

Mr. PENROSE. I suggest that we let the paragraph go over until to-morrow and that the Senate adjourn.

Mr. STONE. I ask if the Senator from Nebraska desires to

debate this paragraph?

Mr. NORRIS. I do not know that I shall desire to debate it, but I was seeking some more information. I understand the Senator from Pennsylvania has some information that he does not have with him here in the Senate Chamber. I myself should like to have some more light upon it.

Mr. PENROSE. I hope to have some information to-morrow,

and the Senator from Illinois I have no doubt will desire to

debate the paragraph a little further.

Mr. SHERMAN. On one query propounded by the Senator from Nebraska, I think, in the morning I can give some additional light.

Mr. STONE. Does the Senator desire to pass over the para-

graph until to-morrow?

Mr. SHERMAN. I am willing to yield until to-morrow.

Mr. BACON. Mr. President— Mr. STONE. I yield to the Senator from Georgia, and I ask to lay the bill aside for the present.

The VICE PRESIDENT. Unanimous consent is given to lay

the bill aside, the Chair understands.

PROPOSED CURRENCY LEGISLATION (S. DOC. NO. 154).

Mr. KERN. I ask unanimous consent to have printed as a public document a letter written by the chairman of the Senate Committee on Banking and Currency showing the advantages of the pending currency bill to the country banks. It is a different letter from that ordered printed the other day. short letter, and I am very anxious to have it printed.

Mr. OLIVER. I should like to inquire which pending cur-

rency bill it refers to?

Mr. PENROSE. It is the administration measure, I assums.

Mr. KERN. It relates to the currency question.

Mr. PENROSE. Is it the House bill or the administration bill to which it refers?

Mr. KERN. I made the only statement I care to make on

that subject. It is on the currency question.

Mr. SHERMAN. Does the Senator ask to have it read? The VICE PRESIDENT. The Senator from Indiana asks that the letter be printed as a public document. Is there objection? The Chair hears none, and it will be printed.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 11 minutes spent in Mr. SHERMAN. It finds some outlet in Canada, some in Mexico, and wherever there is railway development. Wherever there is a railway building or wherever there is any consider- day, August 7, 1913, at 12 o'clock m.

NOMINATIONS.

Executive nominations received by the Senate August 6, 1913. MINISTER.

Preston McGoodwin, of Oklahoma, to be envoy extraordinary and minister plenipotentiary of the United States of America to Venezuela, vice Elliott Northcott, resigned.

UNITED STATES DISTRICT JUDGE.

William H. Sawtelle, of Arizona, to be United States district judge for the district of Arizona, vice Richard E. Sloan, whose recess appointment expired on March 4, 1913.

PROMOTIONS AND APPOINTMENT IN THE NAVY.

Lieut. Raymond S. Keyes to be a lieutenant commander in the Navy from the 1st day of July, 1913.

Asst. Surg. Walter A. Bloedorn to be a passed assistant surgeon in the Navy from the 28th day of March, 1913.

Robert H. Foster, a citizen of Mississippi, to be an assistant surgeon in the Medical Reserve Corps of the Navy from the 29th day of July, 1913.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 6, 1913. COLLECTOR OF INTERNAL REVENUE.

Alexander Stuart Walker to be collector of internal revenue for the third district of Texas.

PROMOTIONS IN THE NAVY.

Ensign Harold W. Boynton to be a lieutenant (junior grade) Ensign William B. Cothran to be a lieutenant (junior grade).
The following-named assistant paymasters with rank of ensign to be assistant paymasters, with rank of lieutenant (junior grade):

George S. Wood,
Ulrich R. Zivnuska,
Alonzo G. Hearne,
Hervey B. Ransdell,
Harold C. Shaw,
Henry R. Snyder,

Smith Hempstone, Harry W. Rush, jr., Harold C. Gwynne, and Robert W. Clark.

POSTMASTERS.

GEORGIA.

Gilbert B. Banks, Waynesboro.

TOWA

William Briggs, New Holland. O. E. Curl, West Mansfield. Louis J. Golling, Bedford. Albert G. Witte, Elmore.

SENATE.

THURSDAY, August 7, 1913.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. REPORTS ON COURTS AND JUDGES (S. DOC. NO. 156).

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Attorney General, which will be

The Secretary read as follows:

OFFICE OF THE ATTORNEY GENERAL, Washington, D. C., August 6, 1913.

The President of the United States Senate.

legislative, executive, and judicial appropriation bill. Their duties consist in the making of periodical and special investigations of the conduct in office of United States attorneys, United States marshals, clerks of United States courts, United States commissioners, and refereres and trustees in bankruptcy. There are two special examiners, having the same duties as the statutory examiners.

The expert accountants are employed primarily in investigations of violations of the national banking act, although they are also used quite extensively in other cases where the services of an accountant are required.

The special agents are engaged primarily in collecting evidence in complaints and in cases arising under the criminal laws of the United States.

complaints and in cases arising under the criminal laws of the United States.

The expert accountants and special agents are employed and their salaries and expenses are paid under authority of the following provision in the sundry civil appropriation bill:

"Detection and prosecution of crimes: For the detection and prosecution of crimes against the United States; the investigation of the official acts, records, and accounts of marshals, attorneys, clerks, and referees of the United States courts and the Territorial courts, and United States commissioners, for which purpose all the official papers, records, and dockets of said officers, without exception, shall be examined by the agents of the Attorney General at any time; for the protection of the person of the President of the United States; for such other investigations regarding official matters under the control of the Department of Justice as may be directed by the Attorney General."

The names of the examiners, special examiners, and expert accountants will be found in the department register, a marked copy of which is hereto annexed.

The names of the examiners, special examiners, and expert accountants will be found in the department register, a marked copy of which is hereto annexed.

The duties of the special agents being to detect crime and to collect evidence in criminal cases, the disclosure of their names, I think, is incompatible with the public interest. I am informed that committees of both the House and Senate have accepted this view and withdrawn their requests for the names of these special agents when reminded of the nature of the duties performed by them.

General instructions to examiners and expert accountants are contained in a series of circular letters addressed to them from time to time, complete sets of which are hereto annexed. They are also given from time to time special instructions in the particular cases in which they are engaged.

The special agents are furnished with a pamphlet containing general instructions, and are constantly given special instructions in particular cases, all with a view to preventing their doing any unjust or oppressive act. To make public the instructions given the special agents, in my opinion, would be incompatible with the public interests.

Within the past five years agents of the department have investigated the conduct of three judges of courts of the United States appointed under the Constitution to hold office during good ochavior, and of three judges of the United States who were removable by the President, and no others. The investigation of the conduct of Judge Archbald, which is already a matter of public record, constituted one of the cases of the first class. The report of that investigation was transmitted to the House of Representatives and was printed as a public document. To state with particularity what courts and judges have been under investigation within the past five years by agents of this department would, in my opinion, be incompatible with the public interests.

The Constitution provides that the President "shall take care that

been under investigation within the past five years by agents of this department would, in my opinion, be incompatible with the public interests.

The Constitution provides that the President "shall take care that the laws be faithfully executed." It is impossible for him successfully to discharge this obligation unless the judges whom he appoints are faithful to the trust imposed upon them; and occasionally it has become highly important that he should know the real facts in reference to charges preferred against them. While without power to remove judges appointed under the Constitution, it seems clearly within his prerogative to inform the House of Representatives of facts which might necessitate a further investigation or an impeachment.

The suggestion that the Department of Justice is maintaining a system of espionage over the courts and judges of the country is entirely without foundation. The conduct of judges and the actions of courts have very seldom been the subject of inquiry by its agents, and in those few instances specific complaints seemed imperatively to require an ascertainment of the real facts. The utmost care is taken to select agents of proved integrity, judgment, and fairness, and see that they so proceed as fully to inform the House of Representatives in cases which appear to merit that course.

Respectfully,

J. C. McReynolds,

Attorney General.

J. C. MCREYNOLDS, Attorney General.

Mr. WORKS. Mr. President, this communication from the Attorney General does not meet the requirements of the resolution passed by the Senate. It is so general in its terms as to be almost useless as information.

almost useless as information.

If the time has come in the history of this country when a head of one of the departments may secretly investigate the doings of the courts and judges of the country and conceal that fact from the Congress of the United States, I think it is about

time we should inquire into that phase of the question.

I am not satisfied with this reply of the Attorney General. It is wholly insufficient. It is an evasion of the questions that have been submitted by the Senate. But I am not going to take up the time of the Senate now in discussing the question. I shall expect at a later time to insist that these questions shall be answered.

Six: Interpreting Senate resolution No. 126, introduced by Senator Works and passed July 7, 1913, as a request to be supplied, so far as not incompatible with the public interest, with the information in the possession of the Department of Justice touching the matters mentioned in the resolution, I have the honor to reply thereto as follows:

No inspectors or other agents are appointed or employed by the Attorney General or by the Department of Justice specifically to investigate and report upon the conduct or proceedings of any of the courts or judges of the United States.

However, a force is employed by the department under the authority of acts of Congress to investigate all subjects in respect of which it is the duty of the department to keep itself informed. This force consists of three classes of employees: (1) Examiners, (2) expert accountants, and (3) special agents.

Except in two special instances the examiners are statutory employees whose positions and salaries are provided for in the regular

culated to influence judges in their decisions and in their conduct where the Government was interested. In different ways and by different methods other than by the usual practice judges are given to understand the views of the Government as to what the law is and what the decision should be, and in different ways and by different methods judges are relieved and others whose views of the law are more satisfactory are substituted.

Mr. President, this is, I realize, a serious charge to make. If I were not prepared, in my judgment, to sustain it, I would not make it. I know that it has been done, if the information which I have, which comes almost first hand, can be relied upon at all.

It has come to me more than once.

Now, Mr. President, there is nothing in which the people of this country are so much interested as in the integrity and the independence of their judges. There is nothing left to this Republic if our judges can be controlled by any influence other than the law and the facts as they are presented by litigants in the open forum and face to face with each other. No other influence is high enough or holy enough to be intrusted with the control of our courts. The law and the law only as it is written must be their guide.

Mr. SMITH of Georgia. Will not the Senator state the period of time at least in which these efforts were made?

Mr. BORAH I said for the last several years. I think it fair to say that no facts which I have relate to this administration.

Mr. SMITH of Georgia. Would not the Senator be willing to

indicate more specifically the time?

Mr. BORAH. I think it has been going on for several years. Therefore, Mr. President, while I am not going to detain the Senate this morning, I want it understood before this matter passes from the consideration of the Senate that it shall devolve upon us at some future day to determine how we are to These judges are appointed by the control such a situation. Executive: they are promoted by the Executive. I am opposed to any influence being exerted by departmental action. The view of the Government is made known to the judges; the judges are given to understand what the Government desires; and they are impressed with the desire that the Government desires decisions along certain lines. It is altogether to the credit of the judiciary that such vicious practices are ordinarily ignored; but that such practices have been indulged I can not, I am not permitted to doubt. I realize how difficult it is to prove it, for all parties are interested in denying it, and the evidence is almost completely secret, and it now seems incompatible with the public interest for it to be known.

I say that there is no more serious thing with which we have to contend than that proposition. If we are going to have that kind of influence exerted upon judges in this country, then I am in favor of the popular election of the Federal judges and a recall by the people. Much as I am opposed to the principle, it is a thousand times better than to have our judiciary controlled through sinister and subtle influences about which the people know or can know nothing. The Government has no more right to privately communicate with a judge about causes in which the Government is interested than individuals or corporations. The judge either stands indifferent to all the world

or he stands condemned by all the world.

Mr. NORRIS. Mr. President, it seems to me that I ought not to let the occasion pass without saying just a word on this

subject.

I wish to say, to begin with, that I most heartily concur in everything that the Senator from Idaho [Mr. Borah] has said. I believe it is a serious proposition, and yet I do not believe I would want to take any action that would prevent the Department of Justice or any other department from making any investigation that it saw fit.

I see the danger lurking in it. The judiciary ought to be independent; it must be independent of any other department of

It seems to me that if an investigation is made it ought to be made public at least when it is finished. If the judge who is investigated is found to be all right along the lines that have been investigated he ought to have the benefit of a vindica-

I presume charges are often made of a serious nature and the Department of Justice deems it necessary to investigate them. If the investigation is made along lines that in no way transcend the powers of the judiciary or the judge, without any attempt to influence him in his official capacity, it can do no harm, particularly if it is afterwards made public.

Now, the Attorney General in his letter refers to an investi-gation that was made in the case of the late Judge Archbald. I feel like saying a word on this general subject, because I

think I have a definite knowledge of every detail of that entire investigation. There was such an investigation made, and it was of the greatest value to the House of Representatives, particularly those Members of the House who were investigating the conduct of Judge Archbald, in reaching a conclusion on that very important matter. They would have been seriously handicapped had it not been for that investigation, which brought forth the facts that were obtained before the public or before the Congress knew very much about it, although in that case the Attorney General says, and says truly, that it was communicated to the House of Representatives. It was not done, however, until after the House of Representatives had passed a resolution calling on the President for that information. Possibly that might have been done; I am not saying it might not have been the intention to do that anyway; but the first information directly of an official nature that the House of Representatives had was in response to a resolution which I introduced in that body and which was passed and sent to the President.

I do not believe when we do legislate, if we legislate on this subject, we ought to go so far as to prevent the Department of Justice from making investigations. I realize that it is a difficult matter to draw the line. I know that it is a dangerous line. If the Department of Justice or the administration was inclined to take an advantage of judges, perhaps to influence them unduly in their official work, it might be done if there were no

restraints upon them in that respect.

At the same time, I believe we would go to the other extreme if we would absolutely prevent the Department of Justice from investigating any complaints that might be made of a serious nature against the members of the judiciary. If the investigation is honest, if it is fair, then no honest judge would be injured. But I believe that if such an investigation is made the judge ought to have the benefit of it and the country ought to have the benefit of it, and it ought not to be concealed. seems to me that the Attorney General is wrong when he thinks that the good of the public service demands that these things should be kept secret.

Mr. CRAWFORD. Do I understand the Senator from Nebraska also concurs in the view expressed by the Senator from Idaho that these investigations have been made not upon complaint for the purpose of ascertaining whether or not there were substantive charges, but made for the purpose of securing an undue influence and control over a judge so that his decisions might be according to the preconceived view of some department

of the Government?

Mr. NORRIS. That is a matter upon which the Senator from Idaho expressed his opinion, he having information. Of course, do not have that information.

Mr. CRAWFORD. Does the Senator concur in that view? Mr. NORRIS. Of his judgment as to whether that is true or not I can have no opinion, because I do not have the evidence

that the Senator from Idaho has. Mr. CRAWFORD. It seems to me that that is one of the most astounding charges I have heard on the floor of the Senate.

Mr. NORRIS. It is a very serious and astounding charge. Mr. BORAH. Mr. President, it is nothing new. I made this statement two years ago in a discussion of the question of the recall of judges. I asserted at that time that, in my opinion, it was being done. I have no doubt about it now. At the time referrred to, on August 7, 1911, in the Senate I used the fol-

lowing language:

"But, Mr. President, I am not only opposed to the popular recall, but I am opposed to private recall. I am opposed to the subtle, silent system which has grown up in this country to a remarkable extent unknown to most people—that of exercising an influence upon Federal judges through the executive departments of our Government. If there is going to be a recall, we want a popular recall. We want a people's recall. We want it We want it in the open and not in quiet and subtle ways by devious and undiscovered methods. We want the privacy sought to be established between Federal judges and the heads of departments forever condemned and damned. It is vicious, indefensible, and ought to forever discredit the judge who would brook it or the department head which would seek it.

I am not going to discuss this at length at this time. I hope to do so at a later date. I only want to say now it is well known to those who have examined and watched the system that, during the last few years, when certain departments here are interested in a question they have a system by which they get for a particular cause a judge off the bench that they want off and another on that they want on They have a system of transfer and exchange carried on formally under the statute, but in fact through the impudent exertion of power upon the part of the interested department. If the time ever comes in

this country when the people of the country understand that there is any string attached to a Federal judge which they do not through established laws hold, they will not only elect, but they will recall their Federal judges. Those who are preaching against the recall of judges throughout this country must be careful that they do not adopt a system which will far outweigh the strength of their words and overcome their argu-When the system goes so far that an assistant United States attorney privately approaches a Federal judge to suggest that he disqualify himself to sit in a particular case or formally consent to be transferred because some one else is wanted to try the case, it is time that the system should be The statutes provide for changes when necessary because of disqualification or an extra amount of business, but it contemplates that it be done in the open, and if a judge is

it contemplates that it be done in the open, and if a judge is actually disqualified let the disqualification be shown in the presence of the contending parties."

Mr. OWEN. Mr. President, the administrative branch of the Government is charged with the duty of seeins that the laws of the United States are faithfully executed. In the discharge of that function it may be entirely proper and necessary to institute an inquiry into the conduct of a judge. A judge on the bench is only a human being after all: a judge on the bench. the bench is only a human being after all; a judge on the bench may be corrupt personally. Shall he be so safe under the sacred ermine of his office that no man shall inquire into his conduct?

Mr. BORAH. Mr. President—
The VICE PRESIDENT. Does the Senator from Oklahoma

yield to the Senator from Idaho?

Mr. OWEN. I yield to the Senator from Idaho.

Mr. BORAH. Mr. President, we do not object, so far as I know, on this side of the Chamber or anywhere else, to investi-What we want is that the public shall know the result gation. of that investigation and why it is being made. If there is anything that the public ought to know it is that the judge is honest if he is honest, and that he is dishonest if he is dishonest.

Mr. OWEN. Mr. President, the observations which I make are sufficiently broad to cover all classes of cases. In the case of Judge Archbald the Senate and the country became advised at some length of his turpitude and of his unfitness. I call the attention of the Senate-

Mr. CRAWFORD. Mr. President-

Mr. OWEN. I ask the Senator please to allow me to con-I do not wish to carry on a desultory debate. I merely desire to make a few observations, and then I will yield the

I wish to say, however, that in this Union there are 48 States, and they have two ways of taking a judge off the bench-one by impeachment, the other either by resolution of

the legislature or by a fixed tenure of office.

I believe Federal judges should be subject to matured public opinion; that they should respect it; that they should regard themselves as the faithful administrators of the law, as the servants of the people. I believe, therefore, that those judges should not be appointed for life, with no other way to reach them except by the cumbersome and almost impossible remedy of impeachment. I believe the British rule of the right of Parliament to pass a resolution to that effect should suffice to remove a judge from the bench, without any charges being made with regard to his conduct, if he proves to be unfit for any reason; and I believe the people of this country will be obliged to come to the point of exercising a greater control over the Federal bench.

I believe it would be better to have the people nominate and elect the inferior Federal judges for limited terms. The short term of four or six or eight years would suffice to make the judges duly respectful of matured public opinion, and they would, in that event, administer the law in a much more efficient and proper manner. That is all I care to say with regard

to the subject.

Mr. CRAWFORD. Mr. President, I think that no one will question the propriety and the right of the proper department to investigate the conduct of a judge—a judge is no better than any other officer-but that is quite a different thing from the exercise of dangerous power under the guise of investigation, or whatever you may call it, to unduly exercise control over his decisions. The statements made here go to that extent. I think if the power of the Government is being employed or has been employed in that way, to bring about, through coercion or through any other undue influence, a decision which is not the free judicial judgment of the court, it is high time that it was investigated.

Mr. O'GORMAN. Mr. President, I should like to ask the Senator who has just spoken whether he knows of any instance where the Department of Justice, in this or in any previous administration, has sought improperly to influence the judicial action of a Federal judge?

Mr. CRAWFORD. Mr. President, I am glad to say that I do not-

Mr. O'GORMAN. Nor do I. Mr. CRAWFORD. And I am glad to say that I never heard so astounding a claim made before it was made this morning on the floor of the Senate by one of the most distinguished Senators in this body, whose word I am bound, for one, to respect. When a statement so sweeping as that is made in all seriousness, I think we should pay some attention to it.

Mr. O'GORMAN. Unfortunately I was out of the Chamber when the statement was made, and can only infer what it really was from what has just been said by the Senator. As I gather from the discussion, if it be assumed-and, so far as my knowledge goes, it should be assumed-that no such improper action has ever been taken by the Department of Justice, I am at a loss to understand why there should be such an insistent demand for a radical change with respect to the investigation of charges affecting the judiciary.

Mr. SUTHERLAND obtained the floor.

Mr. SIMMONS. Mr. President

Mr. SUTHERLAND. Mr. President, I shall take only a moment.

Mr. SIMMONS. I wish to inquire of the Senator from Utah if this debate is proceeding by unanimous consent?
The VICE PRESIDENT. It is.

Mr. SUTHERLAND. I understand that I had been recognized.

The VICE PRESIDENT. The Chair recognized the Senator from Utah.

Mr. SIMMONS. Well, Mr. President, if this debate is proceeding by unanimous consent, I ask for the regular order.

Mr. SUTHERLAND. I understood that the presiding officer had laid before the Senate a communication from the Attorney General, which was being discussed.

The VICE PRESIDENT. That is true; but such discussion can only take place during the morning hour by unanimous consent.

Mr. SUTHERLAND. If the Senator from North Carolina will bear with me-

Mr. SIMMONS. I am not going to make the objection against the Senator now, but after the Senator concludes I shall ask for the regular order.

Mr. SUTHERLAND. I only wish to make a single observation. I should have been through by this time if I had been permitted to proceed.

Mr. SIMMONS. Very well.

Mr. SUTHERLAND. The statement made by the Senator from Idaho [Mr. Borah] this morning is to me a very startling one; and yet, knowing the Senator from Idaho as I do, and knowing the care with which he makes statements upon the floor of the Senate, I am bound to accept what he says as having a foundation in fact. That being so, it is a most serious proposition, and one which to my mind demands investigation.

Certainly, nothing can be worse in our form of government than sinister influences brought to bear, either by officers of the Government or by private persons, upon our judges, because, if successful, the very sources of justice are corrupted and the end

of the Republic is in sight,

I simply rose, however, for the purpose of saying that while it may be true that influences of that kind have been attempted, for one feel quite sure that they have not been successful. I think, and my observation and study of the judicial system of the United States warrant me in saying, that there is no body of judiciary anywhere in the world that is more free from corrupt influences than the Federal judiciary of the United States, and I think it is a very rare circumstance, one which always attracts alarmed attention, when any member of that great body departs from the line of right conduct.

Mr. WORKS. Mr. President, what would the Senator think of the Attorney General or of his representatives, when he found that a judge was unsatisfactory in the trial of a case, if he should call upon the presiding judge to call in somebody else

for that reason and insist upon it?

Mr. SUTHERLAND. I think it would be utterly indefensible. Mr. CLARK of Wyoming. And yet that has been done.
Mr. COLT. Mr. President—

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Rhode Island?

Mr. SUTHERLAND. I yield to the Senator from Rhode Island.

Mr. COLT. Mr. President, I only wish to state for the information of the Senate that from my personal experience of something over 31 years upon the Federal bench in the first

circuit I have never known of any improper influence of any nature or description being brought to bear by the Attorney General, his department, or any of the officers representing that department upon the judges of the first circuit. I am aware that there have been agents from the Department of Justice who have been sent into the first circuit for the purpose of investigation; but I merely wish to say in a single sentence that I have never known of any influence that the department has attempted to bring to bear of any nature or description upon the official act of a single judge in the first

Mr. SIMMONS. Mr. President, I ask for the regular order. The VICE PRESIDENT. The presentation of petitions and memorials is in order.

PETITIONS AND MEMORIALS.

Mr. BRISTOW presented a memorial of sundry citizens of Oswego, Kans., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia.

Mr. LEA presented petitions of sundry citizens of Memphis, Tenn., praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which were referred to the Committee on Woman Suffrage.

Mr. MYERS presented sundry petitions signed by citizens of the State of Montana, praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which were referred to the Committee on Woman Suffrage.

Mr. JACKSON presented a resolution adopted by Pomona Grange, Patrons of Husbandry, of Montgomery County, Md., indorsing the interpretation of the parcel-post law as rendered by the Postmaster General, which was referred to the Committee on Post Offices and Post Roads.

Mr. TOWNSEND presented a memorial of sundry citizens of St. Joseph County, Mich., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was referred to the Committee on the District of Columbia,

WOMAN SUFFRAGE AMENDMENT (S. DOC. NO. 155).

Mr. FLETCHER. From the Committee on Printing I report back favorably the motion of the Senator from Oregon [Mr. CHAMBERLAIN] to have printed as a public document the proceedings in the United States Senate July 31, 1913, upon the presentation of petitions favoring the adoption of Senate joint resolution No. 1, proposing an amendment to the Constitution of the United States extending the right of suffrage to women, together with the report of the Senate Committee on Woman

Suffrage recommending the passage of the joint resolution.

The VICE PRESIDENT. The report will be received, and if there be no objection the matter will be ordered printed as a

public document.

Mr. CHAMBERLAIN subsequently said: Mr. President, I desire to ask to have printed as a public document the paper which was reported out favorably from the Committee on Printing this morning by the Senator from Florida [Mr. Fletcher].

The VICE PRESIDENT. That action has already been taken. Mr. CHAMBERLAIN. I did not so understand.

ESTATE OF ADAM L. ROSE.

Mr. MARTIN of Virginia. Several days ago a communication from the Chief Justice of the Court of Claims requesting a return of the court findings in favor of the estate of Adam L. Rose, deceased, was received and referred to the Committee on Appropriations. 1 ask that that committee be discharged from the further consideration of the communication and that it be referred to the Committee on Claims. The papers in the case are with the Committee on Claims.

The VICE PRESIDENT. The communication was referred to the Committee on Appropriations through a misunderstanding on the part of the Chair. The Committee on Appropriations will be discharged from its further consideration, and it will be referred to the Committee on Claims.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BRISTOW:

A bill (S. 2899) to provide a site and erect a post-office building at Mound City, Kans.; to the Committee on Public Buildings

and Grounds.

A bill (S. 2900) to remove the charge of desertion against Joseph B. McCall; to the Committee on Military Affairs.

By Mr. DILLINGHAM (by request):

A bill (S. 2901) to establish in the District of Columbia a laboratory for the study of the criminal, pauper, and defective classes; to the Committee on the District of Columbia.

By Mr. CHAMBERLAIN:

A bill (S. 2902) to reduce fees in the United States district courts, to fix the salaries of the clerks of such courts, to increase the mileage and per diem of witnesses and jurymen therein, and to repeal section 840 of the Revised Statutes and all other conflicting laws; to the Committee on the Judiciary.

A bill (S. 2903) for the relief of Judd McKelvey; and (By request.) A bill (S. 2904) for the relief of certain persons, their heirs or assigns, who heretofore conveyed lands inside national forests to the United States; to the Committee on Public Lands.

By Mr. McLEAN:

A bill (S. 2905) granting an increase of pension to Ellen M. Hall (with accompanying paper); and

A bill (S. 2906) granting an increase of pension to Harriet A. Barry (with accompanying paper); to the Committee on

By Mr. O'GORMAN:

A bill (S. 2907) to authorize the President to award a medal of honor to Dr. John T. Nagle for conspicuous bravery at the Battle of Kernstown, Va., on July 24, 1864, while serving as an acting assistant surgeon of the United States Army; to the Committee on Eoreign Relations.

By Mr. SHIVELY:

bill (S. 2908) granting an increase of pension to William M. McClure (with accompanying papers); to the Committee on

THE GOLD RESERVE.

Mr. OWEN. I introduce a short bill providing for increasing the gold reserve in the Redemption Division of the Treasury Department. The bill is very short, and I should like to ask that it be printed in the RECORD for the information of the Senate.

The bill (S. 2898) providing for increasing the gold reserve in the Redemption Division, retiring the 2 per cent bonds, and unifying the currency issues of the United States, and for other purposes, was read the first time by its title and the second time at length and referred to the Committee on Banking and Currency, as follows:

A bill (S. 2898) providing for increasing the gold reserve in the Redemption Division, retiring the 2 per cent bonds, and unifying the currency issues of the United States, and for other purposes.

currency issues of the United States, and for other purposes.

Be it enacted, etc., That the Secretary of the Treasury is hereby authorized and directed, as gold certificates are received into the Treasury or subtreasuries of the United States, to have them canceled and the gold represented by such certificates transferred to the Redemption Division of the Treasury, and in lieu of such canceled gold certificates to issue Treasury notes of the United States, redeemable in gold at the Treasury of the United States at Washington, D. C.

The Secretary of the Treasury is further authorized, in his discretion, when requested to do so by national banks having outstanding national-bank notes, secured by 2 per cent, bonds, to purchase such bonds at par and accrued interest, and to assume the redemption at par of the bank notes secured by such bonds, charging the amount of such notes against the proceeds of such 2 per cent bonds and paying the balance in cash to such national bank. Such 2 per cent bonds shall then be canceled and a like amount of 20-year 3 per cent bonds shall be placed in the Redemption Division and the annual interest thereon credited to the funds of the Redemption Division. When such national-bank notes the redemption of which has been thus assumed shall come into the Treasury of the United States, they shall be canceled and retired, and in lieu of such notes so canceled and retired the Secretary of the Treasury shall issue Treasury notes of the same amount.

FEES OF CLERKS OF DISTRICT AND CIRCUIT COURTS.

FEES OF CLERKS OF DISTRICT AND CIRCUIT COURTS.

Mr. CHAMBERLAIN submitted the following resolution (S. Res. 155), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Whereas the fees and compensation paid to the clerks of the several district courts of the United States and to the clerks of the several district courts of appeals vary in different States of the Union and in different districts in the several States, in many instances the amount of compensation paid to such clerks being largely in excess of a reasonable compensation for services rendered; and Whereas the fees and compensation of these officials were fixed by statute in many of the States under conditions which differed materially from conditions which exist to day; and Whereas in some of the States under statutes passed more than 30 years ago the fees of clerks of the then circuit and district courts were made double the fees of clerks in other States, and conditions which warranted these statutes have completely changed, so that the compensation now received under them is largely in excess of a reasonable compensation; and
Whereas the act of March 3, 1911, entitled "An act to codify, revise, and amend the laws relating to the judiciary" did not harmonize or attempt to rearrange the fees and compensative of the clerks of the district courts and circuit courts of appeals intivided for in said act, and there is now confusion as to the proper construction in many instances as to the amount of feet and compensation that ought to be collected by the clerks of said courts; and

Whereas the amount of fees and compensation allowed to the clerks of said courts is now so exorbitant that they are practically prohibitive and prevent a man of moderate means from litigating his cases in said courts to final determination thereof: Therefore be it

cases in said courts to final determination thereof: Therefore be it Resolved, That a committee of five Senators be appointed by the Vice President to examine into the question as to the fees and compensation allowed to the clerks of the several district courts and circuit courts of appeals, and to report the same to the Senate with their findings thereon, and with power vested in the committee, if deemed best by them, to report a bill that will correct any injustices and irregularities that may exist in the premises to conform to the views of the committee, having for its purpose an adjustment of the question of the compensation paid to such clerks upon a just and reasonable basis: And be it further be it further

be it further

Resolved, That the said committee be, and they are hereby, authorized to sit during the recess or sessions of the Senate at such times and places as they may deem advisable, to send for persons and papers, to administer oaths, and to employ such stenographic, clerical, and other assistance as may be necessary, the expenses thereof to be paid from the contingent fund of the Senate; and the committee is authorized to order such printing and binding as may be necessary for its use.

EXPENDITURES FOR TELEGRAMS.

Mr. SHAFROTH submitted the following resolution (S. Res. 156), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the expenditures for telegrams sent or received by Senators on public business, payable out of the contingent fund of the Senate, be, and is hereby, limited to a sum not exceeding \$60 per annum for each Senator.

STUDIES IN CRIMINOLOGY.

Mr. KERN submitted the following resolution (S. Res. 157) which was read and, with the accompanying paper, referred to the Committee on Printing:

Resolved, That a manuscript, entitled "Studies in Criminology, Including Other Patho-Social Conditions," by Arthur MacDonald, be printed as a Senate document, and that 200 copies each of Senate Document No. 187, Fifty-eighth Congress, third session, entitled "Man and Abnormal Man," and of Senate Document No. 532, Sixtleth Congress, first session, entitled "Juvenile Crime and Reformation," be reprinted; and that the Superintendent of Documents be permitted to order copies for sale.

THE TARIFF.

Mr. PENROSE. Mr. President, I have here an amendment to the pending tariff bill, which I have been intending to offer for some time. My attention, however, was called by the course of the debate last evening to the urgency of its introduction, and I therefore offer it now, rather than wait until the paragraph to which it relates is reached. It is an amendment providing for what is known as an antidumping clause in the pending tariff bill.

When the Senate adjourned last night we had under consideration a paragraph concerning which the discussion partially disclosed the fact that the article of manufacture covered by the paragraph is peculiarly susceptible of dumping. It is one of the articles which have been dumped upon the foreign market, its production in Germany and in England having entirely extinguished the manufacture of similar articles in every other country in Europe. It is proposed by a cut of over sixty-odd per cent in the present duty to expose the American market to a similar dumping process, which, in the opinion of those engaged in the manufacture of the articles mentioned in the paragraph, would practically extinguish the industry in the United States. The antidumping provision which has been stricken out of the House bill by the Senate Committee on Finance has been altered in phraseology and scope in the amendment which I intend to offer.

I propose to ask the Senate to introduce into our tariff law a provision levying a slight extra duty on foreign goods which are dumped, to use a common term, into this country at prices that frequently are below the cost of production. Briefly my amendment provides that on any importation of articles of a class or kind that are produced in the United States which are sold or consigned for export to the United States at an export or selling price less than the actual market value or wholesale price at which such articles are sold in the ordinary course of trade for home consumption in the country of exportation there shall be levied a duty equal to the difference between this export price and the market value in the home country. In order, however, that there should be no undue increase of duty the amendment provides that this special duty or dumping duty shall in no case exceed 15 per cent ad valorem, and that it shall not apply to goods upon which the tariff act levies a duty of 50 per cent or more. The amendment applies to free goods as well as to dutiable goods.

Dumping of surplus products into a foreign market-always at a lower price than they command in the home market and frequently at less even than the cost of production-is done for the purpose of maintaining prices in the home market by keeping the supply in the home market on a parity with the de-The great proportions it has attained in these days is

due in some measure to the organization and maintenance in European countries of syndicates, conventions, or cartels, as they are variously called, the avowed and actually accomplished purpose of which is to fix and maintain selling prices in the country of production, punishing any deviation from the agreement by certain fines and penalties which are part of the agreement. These agreements sometimes include as well other countries on the European Continent, but they leave the members of the syndicate, convention, or cartel at perfect liberty to sell at whatever prices they please in countries that are not included in the agreement. Of course, the United States with its wonderful power of absorption is a shining mark for these syndicates, and is the best outlet in the world for the dumping of their surplus production. Right here I wish to remind the Senate that agreements of this character, which would be made the subject of a criminal prosecution in this country, do not .t all incur the disfavor of the Government in those countries, but on the contrary are actually fostered and encouraged by them. In Germany the Government is a partner in the syndicate organized to regulate the price of potash. If anyone has any doubt as to the existence of these syndicates or conventions with their huge output, I refer him to page 379 of the report on Schedule A, made by the Committee on Ways and Means of the Sixty-second Congress in reporting to the House H. R. 20182.

In extending this dumping clause so as to include free goods I am meeting what seemed to be the chief objection to such a provision in the minds of the Democratic majority of the Finance Committee as expressed in its report on the bill. clause is still open to the other objection expressed by them relating to goods paying ad valorem rates of duty. I have not made any attempt to meet that objection, because it is a very easy matter for the committee to remove the cause of that objection if it sees fit, and I prefer to let the committee do it.

I shall attempt no extended statement at this time, because the vital importance of this matter and the great interest which attaches to it require that it should be made the subject of fuller remarks and discussion, which can be had later on. I would like, however, to commend the amendment to the serious attention of the Senate, in the hope of favorable action thereon. It should be remembered that an antidumping clause, of the same general character as this, was put into the tariff bill by the Democratic Ways and Means Committee, and that it received the approval of the House by a unanimous vote. Its desirability and usefulness were urged upon the House by two of the Democratic members of the Ways and Means Committee. Finally, while it is a new feature of tariff legislation in this country, it has been thoroughly tried in the neighboring country of Canada under conditions surrounding importations which closely approximate those in our own country. It has been in effect in Canada since 1904, and has been completely successful there, although at no time has the dumping duty reached such proportions as to constitute an oppressive exaction. I hope when this paragraph of the bill is reached in due course to make some further remarks thereon, in the hope of demonstrating the value and necessity of some such provision as this in our law.

Mr. President, I now offer the amendment, and ask to have it read and lie on the table.

The VICE PRESIDENT. The amendment submitted by the Senator from Pennsylvania will be read.

The Secretary read as follows:

Amendment intended to be proposed by Mr. Penrose to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, viz: On page 271, beginning on line 24, insert the following:

ment, and for other purposes, viz: On page 271, beginning on line 24, insert the following:

R. That whenever articles are exported to the United States of a class or kind made or produced in the United States, if the export or actual selling price to an importer in the United States or the price at which such goods are consigned is less than the actual market value or wholesale price of the same article when sold for home consumption in the usual and ordinary course in the country whence exported to the United States at the time of its exportation to the United States, there shall, in addition to the duties otherwise established, be levied, collected, and paid on such article on its importation into the United States a special duty (or dumping duty) equal to the difference between the said export or actual selling price of the article for export or the price at which such goods are consigned and the said actual market value or wholesale price thereof for home consumption in the country of exportation, and such special duty (or dumping duty) shall be levied, collected, and paid on such article, although it is not otherwise dutlable: Provided, That the said special duty shall not exceed 15 per cent ad valorem in any case, and that goods whereon the duties otherwise established are equal to 50 per cent ad valorem shall be exempt from such special duty.

"Export price" or "selling price" or "price at which such goods are consigned" in this section shall be held to mean and include the exporter's price of the goods exclusive of all charges thereon after their shipment from the place whence exported directly to the United States.

Involces of such goods shall show in parallel columns the export or selling price or price at which the goods are consigned and the actual

Invoices of such goods shall show in parallel columns the export or selling price or price at which the goods are consigned and the actual market value or wholesale price thereof for home consumption in the

country of exportation, and the Secretary of the Treasury shall make such rules and regulations as are necessary for the carrying out of the provisions of this section and for the enforcement thereof.

The VICE PRESIDENT. The amendment will be printed and lie on the table.

AFFAIRS IN MEXICO.

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from yesterday, which will be read.

The Secretary read the resolution (S. Res. 152) submitted by Mr. Clark of Wyoming on the 6th instant, as follows:

by Mr. CLARK of Wyoming on the 6th instant, as follows:

Resolved, That the Committee on Foreign Relations be authorized and directed to proceed with all due dispatch with a full and complete investigation of the condition of American citizens in the Republic of Mexico, with a view of recommending to the Senate such action as will protect the lives and property of citizens of the United States, if the same shall be in danger and require protection, and to make early report to the Senate of the results of such investigation; such committee shall have the power to send for persons and papers, to subpoma witnesses, and to administer oaths, and the expenses incurred hereunder shall be paid from the contingent fund of the Senate.

Mr. CLARK of Wroming. Mr. President on vectorday, when

Mr. CLARK of Wyoming. Mr. President, on yesterday, when this resolution was presented, I stated the purpose of the resolution as well as I was able, and I have no desire to make any further remarks upon it.

I hope the resolution may be taken up and passed at this

session of the Senate.

Mr. WILLIAMS. Mr. President, the resolution has to go to the Committee to Audit and Control the Contingent Expenses of the Senate, does it not?

Mr. CLARK of Wyoming. I am not sure of that.

Mr. WILLIAMS. I suppose it would have to, as nothing can be paid out of the contingent fund of the Senate under any resolution without its being first referred to that committee.

Mr. CLARK of Wyoming. There is a difference of opinion on

that point.

Mr. WILLIAMS. If I caught the reading of the resolution correctly, it says "to be paid from the contingent fund of the

Mr. CLARK of Wyoming. Yes; but I say there is a difference of opinion on the question raised by the Senator from

Mississippi.

Mr. BACON. Mr. President, in view of the present conditions, both of a public nature and of the business before the Senate, I hope the Senator from Wyoming will consent to the reference of the resolution to the Committee on Foreign Re-

Mr. CLARK of Wyoming. Mr. President, the request coming from the Senator from Georgia, the chairman of the Foreign Relations Committee, in whom for many, many years I have had the utmost confidence as to his desire to turn in the right direction the business intrusted to the care of that committee, would have a prevailing effect upon my mind were it not for the very facts that were set forth in my statement yesterday.

I know very well the motives that impel the Senator from Georgia, the chairman of the Foreign Relations Committee, to request that the resolution go to that committee. In my view of the conditions that surround us at this moment, however, I can not consent, so far as I am concerned, at least, to that

reference being made.

The Senate for months-I was going to say for years-has been trying to get some light upon the Mexican situation. The people of the country for months and months have been wondering why there was not something definite coming out of the disturbed condition in the Republic on our southern border. For months and months we have had a standing army of from 15,000 to 20,000 men stationed along that border, an evidence of the disturbed condition of affairs and of the danger to American citizens and American property across the border. we have waited in vain for any definite statement, either from the Committee on Foreign Relations of the Senate-and I am not blaming them for this-or from the present or the past administration, of any facts upon which we could base a just judgment of the actual conditions as they exist.

The only information we have-whether reliable or not, I do not know-comes through the newspaper press, through newspaper correspondents, through correspondence with individuals in Mexico. Probably there is not a Senator in this body who has not had in his mail some letter from a personal friend or a personal acquaintance reflecting upon the condition of affairs regarding American citizens in that country. The telegraph every evening brings to the Associated Press something of the supposed condition there; and yet we are left absolutely at sea as far as any definite official information is concerned.

For weeks the Foreign Relations Committee has had under consideration resolutions which are intended to effect the same purpose that this resolution is intended to effect, and yet with-

out result. The administration probably has a policy, but we do not know what it is,

The President of the United States has now sent his third confidential messenger into that Republic, if we are to believe the current reports. One, two, and now the third have been sent. Days, weeks, and months have been spent in this manner of investigation, and while American lives are being lost and American property is being destroyed, the Congress of the United States is left without one single fact authoritatively stated upon which to base any action that we may care to take as the representatives of the American people.

It seems to me the resolution ought not to be referred. It seems to me it ought to be passed. It seems to me no harm can come if the Committee on Foreign Relations shall enter upon an investigation on behalf of this body, as the administration for months has been investigating on its part to find out the

conditions.

Why should we not have some information? Why should we not have it now? Why should we not have had it months ago? If we had had it months ago, many an American citizen who to-day is dead in Mexico would be alive, and hundreds and hundreds of thousands of dollars of American property would have been protected.

I think, Mr. President, that this resolution ought not to be referred. I think this resolution is as important on the subject covered by it as anything before the American Congress or the American people to-day. We have the tariff before us, and it is urged by the chairman of the Committee on Foreign Relations that as long as we have the tariff and other important matters, we ought to refer the resolution to the committee rather than to take present affirmative action.

Mr. President, there is no matter before the American people or the American Congress to-day, in my judgment, and there can be none, more important than the protection of American

citizens.

Mr. President, it is coming too much to be the case that American citizenship has well-nigh become a byword, and that in a foreign country no man is so poor as he who owes his allegiance to the American flag; and if we may believe the current reports, we find the humiliating fact that in Mexico American citizens are appealing to foreign ambassadors to protect their lives and property.

It is time, Mr. President, that we had some information, that we had something upon which to act, because we do not want

to act without information.

I am opposed to referring the resolution to the Committee on Foreign Relations or any other committee of this body. lieve the Senate ought to take up the resolution, and if it is the judgment of the Senate that we ought to have the information, let us act offhand and pass the resolution, and thus get the information.

I desire to modify the resolution by striking out the last

sentence.

Mr. PENROSE. The clause with reference to payment? Mr. CLARK of Wyoming. The clause with reference to the payment of the expenses of the investigation.

Mr. BACON. Mr. President, there is one thing said by the Senator from Wyoming in which I most heartily agree with him, and that is that there is no more important subject before the Senate and no more important subject now engaging the attention of the American people than the question of our relations with Mexico under the conditions now existing.

If that is true, Mr. President, there is no higher duty on us than to approach it with the utmost gravity and with the most careful consideration of that which it is best for us to do, having in view the honor and dignity of the United States Government, the general public welfare, and the protection to which each and every citizen of the United States is entitled.

It is, Mr. President, in full recognition of that fact that I made the suggestion to the Senator from Wyoming, which I am very sorry he did not recognize the propriety of agreeing with, that the resolution should without debate go to the Committee

on Foreign Relations for consideration.

Mr. President, they are very light matters which come before this body that are recognized as being so light that they shall be considered by the body without first having been considered by a committee. The most trivial matters as a rule go to the committees selected by this body with special reference to their fitness for the consideration of such matters. Yet we are to be told that a matter of this utmost gravity—and I use the word "utmost," Mr. President, because there can be no word more far-reaching than the word "ntmost"; there is nothing beyond the utmost-I say this matter of the utmost gravity the learned Senator from Wyoming would have this body pass upon without its having been considered by the committee selected by this body for the special consideration and examination of matters relating to foreign affairs with a view to recommendations to the Senate for action thereon.

I am glad, Mr. President, that the Senator recognizes it as a matter than which there is no other more important, and I would need no stronger argument than that upon which to base the contention, and the urgent contention, that it should have the careful consideration of the Committee on Foreign Relations before it is acted upon.

Mr. President, I do not wish to go into the question of the Mexican situation at this time, because I do not think that it is for the best interest of the public weal or for the best interest of any person, official or private, that it should now be gone into for discussion. The time will come when it will have to be discussed, I have no doubt. This Mexican question is not going to be settled in a day or a week, and I fear not in a very much longer time. There will be ample opportunity for Senators to say what they wish to say on this subject.

But, Mr. President, there are times when it is not advisable, when it is not prudent, when it is not politic to discuss some matters, not because they should be kept secret, but because that discussion at an inopportune time may defeat measures which are best calculated to bring about the Lest result.

Mr. President, we are not in the dark as to what is going on. We know what is going on. We have a grave duty and a grave responsibility, and stand in the face of an unspeakable danger. It is our great desire that peace shall be restored in Mexico; that orderly government may be set up in Mexico; that personal safety and that of property, not only of the Mexican people, but of our own people who are there, shall be safeguarded. are two ways in which it can be done. I do not mean that there are only two ways, but there are two ways in which we of the United States have any possibility of action. There may be other ways open to the people of Mexico in which we have not possibility of action. One way open to us is the attempt through peaceful measures to bring about a condition of affairs which will relieve the present distressing conditions. The other way open to us is by the strong arm, by force.

Who will say, Mr. President, that the latter should not be the very last to be resorted to by the United States, and then not until every other peaceable device and effort has been ex-

hausted to accomplish the end otherwise?

Mr. President, I do not desire now to discuss the question as to what would be the consequences upon our own people there of the attempted exercise of force by the United States Govern-It is sufficient to say that the present purpose is to endeavor to bring about the best results through peaceful measures. It is a known fact to the people of the United States, not by rumor, not by irresponsible newspaper paragraphs, but by the official enunciation from the Department of State, speaking for the President of the United States, that he has formulated a plan with a view to affecting, if possible, this desired result by peaceful means; that he has formulated a plan and that he is now engaged in the effort to execute it.

Mr. President, Senators may say that that plan will not Everybody recognizes that it is a situation of very great difficulty. Everyone recognizes that it is a situation of extreme difficulty, and everyone must recognize that in any situation of extreme difficulty there is no certainty of success.

No one will pretend that there is.

But, Mr. President, in proportion to the gravity of the situation and to the vast disasters which may flow from these conditions, in the same proportion is it that every chance, however small it may be, should have the best effort, the best opportunity, to make it successful rather than that it should be repudiated in advance.

Mr. President, I say what is not a secret. It is not mere rumor; it is known. It has been officially announced that the President has openly sent a personal representative to Mexico for the purpose and in the hope of bringing about some composition, some arrangement by which peaceful results may be

Mr. FALL. Mr. President, will the Senator yield to me for a moment?

The VICE PRESIDENT. Does the Senator from Georgia yield to the Senator from New Mexico?

Mr. BACON. I do.

Mr. FALL. I have no desire to debate this question; I do not intend to do so at all; and for that reason just at this point I wish to ask the Senator if he has not been furnished with a copy of the reply of the Mexican Government to that particular effort which we are making now?

Mr. BACON. I wish the Senator would speak just a little

louder. I heard him imperfectly.

Mr. FALL. The Senator has referred to efforts which are just being made by this Government in the sending of a private investigator to Mexico, and I rose to ask the Senator if he has not been furnished with a copy of the reply received, forwarded to the Secretary of State here from the Mexican Government, with reference to that mission of Mr. Lind.

Mr. BACON. I know to what the Senator alludes,

Mr. FALL. The Seuator, then, understands, does he not, that the Mexican Government, through its minister, in an official statement to the United States Embassy and cabled here, says:

By order of the President of the Republic, I declare, as minister of foreign affairs ad interim, that if Mr. Lind does not bring credentials in due form, together with recognition of the Government of Mexico, his presence in this country will not be desirable.

The Senator, I presume, has been furnished with a copy of that statement.

Mr. BACON. Possibly if the Senator had given me the opportunity I might have read that before I got through. I have a copy of it before me.

Mr. FALL I knew the Senator had it.

Mr. BACON. Then the Senator was not inspired by a lack of information when he propounded the inquiry.

Mr. President, I was saying that in the proportion that the situation is one of extreme difficulty and of great danger in the same proportion ought we to be careful to give opportunity for every chance, however small that chance might be, and I was coming to a full recognition of the fact that the chance is small. I have been furnished with the paper the Senator has It was handed to me by a reporter of the Associated Press as I was entering the Chamber. I have not been furnished with it by any official authority or from any official source. This paper states that it was sent to the State Depart-I do not know whether it has been or not, but conceding that it has, Mr. President, it is nothing but right and proper that that fact should not be considered as one authorizing action on our part until the reply has been made, either by message or by act, to the message of the President when received by the Mexican authorities.

There has been as yet no message received by any official or authority of any kind in Mexico from this Government or from the President of the United States, and not until that has been done should we undertake to deal with the situation, and not until the effort being made by the President has come

to a definite and formal conclusion.

It is possible, Mr. President, that when Mr. Lind gets to Mexico and delivers his message there may be a different reply. It is possible that the situation may be entirely changed when that comes

Recognizing the danger of failure, at the same time I must recognize the fact that when the Government of the United States undertakes in a peaceful way to aid a sister Republic in restoring conditions of order, and when, as I have no doubt, every civilized nation in the world of any consequence will back up the United States in that benevolent effort, I am not prepared to accept it as a fact that it will be rejected, however much in the haste and irritation of the moment such a mes-

sage as that might have been sent.

Where is the necessity that we should act until this most commendable and humane effort has come to its conclusion? It has not come to its conclusion. Here is a message sent by one claiming to be an official, evidently in a moment of heat and temper, before it has received any communication whatever from this Government. And whatever we may think about it, I appeal to Senators to ask themselves the question-when the President of the United States has sent an envoy, his personal representative, not an ambassador, not one clothed with official power, but has sent his representative to do what he would have a right to do if he himself could have personal conference with the Mexicans, for the purpose of endeavoring to bring about the result which we all desire—I ask every Sen-ator to answer for himself whether there is anything in the conditions which require such haste that we should not permit the President of the United States to have his personal representative deliver his message and receive a reply. That is all. Whenever the personal representative of the President of the United States delivers the message and receives his reply, then the result will have been ascertained. If his reply is such as this telegram from Mexico indicates—that nothing can be accomplished in that line—then, no doubt, what will be necessary to be done by our Government will be done; but it is not proper, Mr. President, to defeat absolutely the possibility, however small that possibility may be, of success by action now taken when there is no such urgency as requires it to be

Senators will say that when the lives of American citizens are in danger and their property is being destroyed there is urgency; I grant that; but, Mr. President, there is no such condition as will make any action taken by us save a life tomorrow or the next day or the next week. If the resolution as framed were adopted and if the Committee on Foreign Relations were instructed to proceed with this investigation, it would not be an investigation of a day or of a week or of a month. So there would be no such hasty result from this resolution, if adopted, as would meet such a stage of urgency as to the present danger to life and property in Mexico.

Mr. President, the Senator from Wyoming is not correct in stating that present conditions are not known; the Senator is not correct in stating that the methods pursued, the undertakings on the part of the executive department, are not known. Every detail can not possibly be known, but in a general way they are known. One thing, I presume, is undoubtedly true, that, so far as these conditions are made public or represented to exist, they are in some measure exaggerated and set down without due regard to exact accuracy; but not only is it known, Mr. President, that the executive department is endeavoring in the manner which has been published to the world to compose matters in that country, to bring about peace and the restoration of order, if possible, to bring about harmony, if possible, to that distracted people; but it is a fact that the Foreign Relations Committee has not been idle. The Foreign Relations Committee has been gathering in its own way, in a quiet way, without any direction from the Senate, such information as it could in regard to the situation in Mexico. It has heard witness after witness, men of prominence, men acquainted with affairs in Mexico. At the very time when the Senator from Wyoming had that resolution read from the desk and when he was making his speech to the Senate on yesterday the Foreign Relations Committee was actually in session and hear-ing evidence on this subject. It was for that reason that members of the committee, myself among the number, were not present in the Senate on yesterday when the resolution was introduced and read.

Mr. President, if it be true, as stated by the Senator from Wyoming, in which I most fully agree, that this is a matter of great gravity, I should like for Senators to answer what is the propriety in having a committee selected with reference to the consideration of these questions if a resolution which is supposed by the Senator from Wyoming to be so far-reaching and so radical that it will, if adopted, cure the situation—if a question of this magnitude shall be taken away from the committee and presented to the Senate, and the Senate asked to act upon it without any opportunity for consideration by that committee? If the committee has been well selected, if it is adapted to its work, its examination and its opinion are certainly worthy of consideration by the Senate before it acts upon this resolution.

There is no politics in this question, or, rather, no party in this question; there is no division between the Republican and the Democratic Parties upon the question of our relations with Mexico as to what we should do in regard thereto. It is true, Mr. President, of the Foreign Relations Committee that it is not a political committee. The Senator from Wyoming was for a long time an honored member of that committee, and he knows the fact that I now state, having served, as I have, upon many standing committees of the Senate, that the great distinguishing feature between the Committee on Foreign Relations and any other committee in this body is the utter absence of political partisanship in that committee.

There is a saying, well uttered by some one, that our party differences end at the seashore, and properly so; and I may say, as a general thing, that in the Committee on Foreign Relations our party differences end at the committee door. It is a rare thing—an exceedingly rare thing—that anything like partisan politics engages the attention or influences the action of the Foreign Relations Committee. There are divergences of opinion, Mr. President, in the present membership of the Foreign Relations Committee as to what should be done in Mexico. Naturally that is so; but I can say, with the utmost confidence, that those differences have no possible mark of party line about them.

I want to say, however, one thing, that, so far as that committee is now concerned, and so far as those divergences of opinion are now concerned, I have heard but one voice from any member of that committee, whether he be a Republican or a Democrat, and that is, that the President of the United States should be given full opportunity in the effort to make successful that which he has now undertaken. I have heard that as emphatically and as earnestly said by Republicans in that committee as it has been said by Democrats.

Mr. President, I want to appeal to Senators on the other side of the Chamber and to ask each one of them to answer for him-

self the question if, in face of this action by the President of the United States, which has been published to the world, which is not only known in America but known in every country in Europe, that the President has undertaken this great task in this way-I ask not only my colleagues on this side of the Chamber, but I ask every Republican Senator to answer for himself the question whether the passage of this resolution would not be considered as flouting in the face of the President of the United States an utterance of an utter distrust in anything which he has undertaken to do at this time? Are you willing to stand in that position? Is it possible for any Senator to give his support to this resolution in face of a request that it may go to the Committee on Foreign Relations under the statements which I have made here to-day? Is it possible for any Senator to do otherwise than to recognize that it would be flouting the President of the United States in a matter in which he is entitled to the support, and the cordial support, not only of Senators on this side of the Chamber, but of Senators sitting on the other side of that aisle?

One thing is sure, that if there is belief in the efficacy of the measures which he has inaugurated and in the success of that which he has undertaken, there would be no need for the passage of this resolution. There would be no necessity for this resolution if what the President has undertaken is to succeed and it were believed that it is going to succeed. If it is to succeed, then peace and order will be restored and person and property in Mexico will have protection.

Now, I want to ask Senators, even if they do not have confidence that it is going to succeed, is it a proper thing, if there is one chance in a hundred of its success, to take action which shall assume that it will not succeed? Mr. President, if a Senator does not believe there is one chance in a hundred of success, is there no other reason why the President should be permitted to carry through his program in this particular, coming, as it must, to a very speedy and quick conclusion?

There are two reasons why I say he should be allowed to carry it through, even if it is foredoomed to failure. One reason is the respect that is due to him in his high office, and the confidence that I know is entertained and that should be manifested in his integrity, official and personal, in the presence of this great emergency.

Mr. NORRIS. Mr. President—
Mr. BACON. If the Senator will pardon me, I will yield to him in a moment. The other reason is this: If I had been certain in advance that this effort would be a failure, I would have applauded the action of the President of the United States in making it. We stand in a very peculiar relation to this question, and what we do in the future may be most momentous in its consequences, and therefore, sir, even with the certainty, if I had it, that this effort would fall, I would still applaud the making of it, because it puts us before the world as exhausting every possible device in the effort to bring about peace in that country; to bring tolerable conditions to the Mexican people; and also to bring about a condition of affairs which will redound to the safety of our own people and their property in that country. So far as this effort goes, it puts us before the world as exhausting every possible device before we resort to any other measure. This effort and others, if you please, along the same line, if they shall be found advisable, are important as acquitting us in the eyes of the world of any sordid or mercenary or unfriendly desire in any action we may hereafter take as to Mexico. Therefore it is that this action of the President is to be commended and applauded, and will serve a valu-

Mr. NORRIS. Mr. President, I should like to ask the Senator a question; but I will preface my question with the statement that I would be the last man here or elsewhere to interfere in any way with the effort which the President is trying to make to bring about peace and the best possible results, even though, as the Senator himself has said, I doubted the wisdom of the course he has taken. I want to give him full permission to do as he thinks right; but it seems to me the Senator assumes that this resolution would be disrespectful to the President and that it would interfere with the President.

able end, even if it does not succeed. Now I yield to the Senator

from Nebraska.

Mr. BACON. If the Senator will permit me to correct him, I did not say "disrespectful."

Mr. NORRIS. Perhaps the Senator's statement was not that broad.

Mr. BACON. On the contrary, I think it goes a good deal beyond the matter of disrespect.

Mr. NORRIS. The Senator thinks it goes beyond disrespect? Mr. BACON. Oh, yes.

Mr. NORRIS. As I heard the reading of the resolution, certainly the President would have no reason to be offended, it

seems to me, if we pass it and ask the committee to do what the Senator himself has practically said the committee is already

doing without a resolution.

Mr. BACON. Mr. President, a mere matter of disrespect, which, of course, is something which should be very carefully guarded against by the Congress, or either branch of it, in its dealings with the President of the United States, may be in some instance a very grave matter, and it may be in another instance a very grave matter, and it may be in another instance a very trivial matter. Disrespect is a matter of degree, as almost everything else is; so that I would not put this resolution in the classification of disrespect at all.

I say, here is the President of the United States in the face

of the gravest emergency which has confronted the Congress of the United States since I have been a Member of the Senate much graver than that which confronted us when the Cuban question was here-much greater. That was a tempest in a teapot compared to what may be the consequences of our efforts to restore peace and order and maintain it in Mexico, as we will have to do for a generation or two generations; and when the President of the United States, standing in the face of such an emergency, with such an unspeakable duty and responsibility resting upon him, in the same way that an unspeakable duty and responsibility will rest upon us in a certain emergency; when he in good faith as a man of integrity, of official and personal character for which we all give him credit, has undertaken a policy, for us to adopt a resolution which can only be based upon the assumption of its failure, I say is to flout him in the face.

Mr. President, there are a great many things that it is very difficult to restrain the temptation to say in regard to this matter; but I do restrain myself, because I do not want to say anything to-day except as it may bear upon the question whether or not we should now take this proposed action in the

adoption of this resolution,

Mr. SMITH of Michigan. Mr. President-The VICE PRESIDENT. Does the Ser Does the Senator from Georgia yield to the Senator from Michigan?

Mr. BACON. I do.

Mr. SMITH of Michigan. I think, Mr. President, that the Senator from Georgia does not appreciate the gravity of the situation in which we are placed more than do Senators upon this side of the Chamber.

Mr. BACON. I fully grant that.
Mr. SMITH of Michigan. I feel that his apprehensions are justified. I would personally welcome a thorough investigation. The difficulty of this situation, if I may be permitted to say so, is that there is so much misinformation abroad. This morning, for instance, the first page of the Congressional Record contains an exhibit of the so-called Carranza strength which an immediate investigation might easily dispel.

I am bound to say in justice to my colleagues upon both sides of the Chamber that there is at the present moment in this Capital a thorough, practical, systematic lobby, putting forth their revolutionary propaganda with a serious and a definite object of affecting the American attitude toward the Government of Mexico which Senators ought to fully understand. A man who stood at the elbow of the late President Madero, a witness before the committee of which I had the honor to be chairman, is now in this Capital, as he has been for two years on our border, directing a war junta, not in the interest of peace but war, ably aided by experts who pretend to have the ear of the Department of State in this administration as they claimed to have the ear of the last administration, and such evidence as this warns the Senate that it must not be misled.

The Senator from Georgia will, I think, do me the credit to say that while for weeks, under the authority of the Senate, we took a thousand pages of testimony, all sworn to and all to the point, yet the delicacy of the situation was such that I did not feel that I should put my personal views forward at a time when the effect might be baleful to our country. I have refrained from doing it, and up to this moment I have not said a single word; and yet I can remain silent no longer if this

matter is to be left where it now rests.

I was here during the days of the Cuban insurrection. was one of the men who was taken into the confidence of President McKinley, as were other Senators upon this floor. He did not hesitate to communicate with the Senate and the House. We were apprised of every delicate and difficult situation. I think it would be eminently becoming—and I do not say it in criticism or in anger—if the President of the United States would allow the Committee on Foreign Relations to know some of the facts upon which he is taking extraordinary and unusual initiative. I do not know of a President since I have been connected with public affairs who did not invite the attention of the time of his remarks I have heard no intimation that this

these committees to the delicate and important work he was trying to do. in connection with far-reaching foreign policy affecting the welfare of the people we represent.

The President of the United States in this crisis may be misled as are others. He may have misinformation. I do not desire to trespass upon the courtesy of the Senator from Georgia, for whom I have the highest respect and in whom I have the greatest confidence. He has viewed the situation with dignity and with candor to his associates. But the situation is exceedingly serious. Human life has been imperiled by our laxity and frequently unnecessarily taken. The arm of our Government has been too freely used to sustain an administration in Mexico and too sparingly used to protect American life and property in this crisis. The officers of our Government have thronged the borders. The jails of our cities have been filled with Mexican noncombatants and with those active in the revolution. It is a tale that reflects no credit upon our country. Up to this moment nothing has been done which measures up to the dignity or the importance of our Government in the western world.

I wish we might have more uncolored light. I wish the light we have might be more clearly understood by my associates. If more light is not forthcoming soon, I promise the Senate a careful detail of the information that has been gathered under oath, with such recommendations as we believe, upon our responsibility as Senators, should be the basis for definite action.

What I have said has been said in the kindlest spirit. I know the President is patriotic. I know his Secretary of State is patriotic. I would not do injustice to either. But the in-formation upon which they act is not official, and it should be official. It is largely hearsay and haphazard when the true condition is within our grasp by the appropriate committee of the Senate.

Mr. BACON. Mr. President, I was about to take my sent when the Senator asked permission to interrupt me, and I held the floor only because I presumed he intended to ask me a I have no objection whatever to his having occupied question. the time.

I do not think, however, that what the Senator has said casts any special light upon the question as to whether this particular resolution should be adopted or should be referred to the Committee on Foreign Relations. I repeat that there are a great many things with regard to the Mexican situation that one is very strongly tempted to discuss at this time. Some things have been said by the Senator who last addressed the Senate which are provocative of reply. Passing them by generally, I will only say that one purpose in sending Mr. Lind to Mexico is to secure information at first hand, and that information when received will doubtless be substantially com-municated to Congress. But I am trying to limit myself to the single question before the Senate, because there will be ample opportunity for discussion of all these other matters.

The simple question here is, with the known fact that the President of the United States has formulated a plan by which he hopes to bring about peace and order in Mexico and to restore the authority of law, and is in the attempted execution of it, whether we shall pass a resolution which, however justifiable it might be under other circumstances, can be based only upon the assumption that that which he has undertaken is to fail. Even if that assumption were correct, we should not properly consider the position and attitude of the President if we failed to await the formal conclusion of the effort on his

part.

Therefore I shall insist upon the motion which I made to refer the resolution to the Committee on Foreign Relations. I do that when I might make a motion which would be more summary, but which I have no desire or disposition to make. I will only repeat and emphasize to the Senators that I do think whatever action is taken in the Senate in regard to this matter should first receive, as all grave matters and almost all trivial matters habitually receive, the prior consideration of the committee charged generally by the Senate with the considera-

tion of matters relating to foreign affairs.

Mr. CLARK of Wyoming. Mr. President, just one word.

I do not agree with the Senator from Georgia that this is one of the resolutions which should be referred to the Committee on Foreign Relations, for the simple reason that it directs the committee to perform a certain service; and it occurs to me that it is folly to direct a committee in a resolution to perform a certain service and then leave it with the committee to say whether or not such a direction shall be given. It is simply a direction to the committee to perform a service for this body.

was in any respect a political resolution. The Senator and myself served long enough on the Foreign Relations Committee, before I was relieved from service on that committee, for him to know that so far as a thing of this sort is concerned there would be no politics in any resolution I might offer. My support, now and hereafter, will be given to the President of the United States in such action as he may wisely see fit to take upon the various matters that may confront him with relation to our foreign affairs. But I, for one, am tired of following a blind trail. I believe there comes a time, even in the consideration of our foreign affairs, when we should have a path marked out knowing in what direction it leads. So far as the success or nonsuccess of the present mission to Mexico is concerned, I believe it is not affected, nor is it sought to be affected, by the resolution.

I hope Gov. Lind's mission may be a success. I have every confidence in the man himself. I have known him for 25 years. know that he is an honest, straightforward, thoroughgoing American citizen. I know he will do whatever in him lies to carry out the wish of the President in bringing about some adjustment of Mexican affairs. But no matter what may be the policy of the President, no matter what may be the success of John Lind in Mexico, I, as a Member of the Senate of the United States, want some information, gathered from our own

sources; upon which we may safely rely.

Mr. FALL. Mr. President—
The VICE PRESIDENT. Does the Senator from Wyoming yield to the Senator from New Mexico?

Mr. CLARK of Wyoming. Certainly.

Is it not a matter of history that in every affair of this character—Mexican in 1858, Cuban in 1898, Venezuelan long prior to that—the President of the United States, Mr. Cleveland first, long before his final message to the secretary of foreign affairs of Great Britain, took the Congress of the United States into his confidence in a message, saying that "Congress was the body who finally had to act," and so forth? Is it not a fact that two years before the Spanish-American War Mr. Cleveland transmitted to the Congress of the United States information with reference to Cuba and called upon Congress to investigate the situation? Is it not a fact that a year before the Spanish-American War Mr. McKinley, coming into the Presidency and taking up the matter where Mr. Cleveland had left off, communicated to the Congress of the United States his views and asked their assistance in the investigation, and let them know what he was doing?

If those things be true, why is a different method now pursued, and why is an effort being made to prevent an investiga-

tion by the Congress of the United States?

Mr. CLARK of Wyoming. Mr. President, I am not personally familiar either with the facts or with the history of all the incidents to which the Senator alludes. I do, however, know that the Foreign Relations Committee of the Senate for weeks and months before the Spanish-American War—and I think the Senator from Georgia and myself were both members of the committee at that time—had in its charge exactly such an investigation as that which is asked by the pending resolution. Nobody at that time raised the question that it was disrespectful to the President of the United States, and no one questioned the wisdom of the course then pursued.

I want to say here that I am somewhat surprised that the Senator from Georgia should indicate that this resolution is, or was intended to be, disrespectful to the President of the United States, and should go so far as to characterize it as flaunting something in the face of the President of the United States. Mr. President, nothing was further from my thoughts. The situation that confronts the country to-day is bigger than the President of the United States or any other citizen; and it was only to get important and absolutely necessary information that this resolution was introduced and is now being pressed.

Mr. CRAWFORD. Mr. President, will the Senator from Wyoming yield to me?

Mr. CLARK of Wyoming. Yes.

Mr. CRAWFORD. I judge from the remarks made by the Senator from Michigan [Mr. SMITH] that the subcommittee of which he is chairman very recently made an investigation for the purpose of ascertaining the Mexican situation, and we have here a whole volume containing sworn testimony; so that the Senate does not appear to be without information upon the question of conditions in Mexico. Mr. CLARK of Wyoming.

Mr. President, that is one of the We have not been given even the things I am complaining of.

information thus gathered.

Mr. CRAWFORD. Why do we want another investigation when we have just had one? A committee of the Senate has

just made an investigation extending over a number of weeks. It has made a report here that probably not one Senator out of fifty has seen.

Mr. CLARK of Wyoming. Mr. President, the Senator from South Dakota is just arriving at what I am trying to get at. We have been working on this thing. A subcommittee, I think, of the Foreign Relations Committee investigated along the border as to our own losses and as to what we were doing. subcommittee made its investigation under the able and energetic chairmanship of the Senator from Michigan. It took hundreds of pages of sworn testimony. Yet the Senate has no report from that committee up to to-day. Its investigations and activities, for some reason unknown to me at least, were stopped while in full swing, and the work of the Senator from Michigan and his colleagues on that committee has consequently been of little avail and has practically gone for naught.

Mr. SMITH of Michigan. Mr. President, will the Senator

from Wyoming permit me?

The VICE PRESIDENT. Does the Senator from Wyoming yield to the Senator from Michigan?

Mr. SMITH of Michigan. I do not want to annoy the Senator. Does the Senator yield?

Mr. CLARK of Wyoming. Certainly. Mr. SMITH of Michigan. The committee of which I was chairman made no formal report, although we laid before the Senate the results of our labor and each Senator has to his credit the testimony taken at El Paso, in California, and at New Orleans, showing fully the deplorable condition of our countrymen in Mexico and much of the unfortunate situation of our sister Republic; but our work was not fully concluded when the reins of government passed into other hands and we were unable to go further.

Mr. CLARK of Wyoming. That is it exactly, Mr. President. Mr. SMITH of Michigan. Senators will not accuse me of lack of diligence nor of lack of patience or persistence in any work assigned to my care, but we were not permitted to close up our work. I do not charge that to anyone. I think they intended to complete the work, and I think they intend to do it now. There ought to be an investigation. I entirely agree with the Senator from Wyoming.

Mr. BACON. I hope the Senator will permit me to say that nothing I said reflected upon the Senator personally. not say that was the intention of the resolution; I said that

was the effect of it, and that statement I stand by.

Mr. CLARK of Wyoming. Mr. President, I can not agree to that. If it is a reflection upon the President of the United States, in matters of the greatest international concern, for the Senate of the United States, through its proper committee, in a decent, orderly way, to make investigations of those affairs, then the Senator is right; otherwise the resolution is not subject to that particular criticism of the Senator.

Mr. FALL. Mr. President, will the Senator yield to me for moment?

Mr. CLARK of Wyoming. Yes; I yield to the Senator from New Mexico.

The Senator said he was not familiar with the Mr. FALL. Cleveland message on Cuban affairs. I have here a portion of that message which I should like to read to him, and I call his attention to it.

On December 7, 1896, two years before the Spanish-American War, Grover Cleveland, the President of the United States, sent to the Congress of the United States a message on Cuban affairs. I will read only a few words from it:

But I have deemed it not amiss to remind the Congress that a time may arrive when a correct policy and care for our interests, as well as a regard for the interests of other nations and their citizens, joined by considerations of humanity and a desire to see a rich and fertile country intimately related to us saved from complete devastation, will constrain our Government to such action as will subserve the interests thus involved and at the same time promise to Cuba and its inhabitants an opportunity to enjoy the blessings of peace.

A year afterwards, and a year before the Spanish-American War, Mr. McKinley sent an almost identical message, taking the Congress of the United States into his confidence and asking their help.

Mr. CLARK of Wyoming. Mr. President, I ask for a vote upon the resolution.

The VICE PRESIDENT. Does the Senator from Wyoming ask for the yeas and nays?

Mr. CLARK of Wyoming. I ask for the yeas and nays. Mr. POMERENE. Mr. President, I regret exceedingly that we have this unfortunate disturbance in the Republic south of us, but I am in hearty accord with the position taken by the chairman of the committee that this resolution should be re-ferred to the Foreign Relations Committee before it is finally acted upon by the Senate.

Everyone who has spoken here to-day has referred to the splendid character and ability of the President and of the Secretary of State and of Mr. Lind, who has been sent as a special representative of the President to Mexico. That confidence is not going to be misplaced.

I can not believe that either the President or the Secretary of State adopted the course they have without full justification,

based upon official information in their possession.

I do not think that we are justified in saying that such information as they have had has been gathered from different sources and lacks an official character-by no means,

I do not know what their position is with respect to this resolution except as I infer it from the action of the President and the Secretary of State when a resolution was referred to them on the 24th of April calling upon the State Department for certain information with reference to the kind and character and number of claims which American citizens have against the Republic of Mexico. That resolution also asked for a statement as to what redress, if any, had been offered by Mexico or demanded by the United States of America, and the result of such offer or demand, and what assurance of protection to the lives and property of our peaceful, law-abiding citizens Mexico offered. The Secretary of State, with the approval of the President, replied on July 30, 1913, that in their judgment it would be incompatible with the public business to give that information to the Senate at that time.

Now, it does seem to me that the scope of the present resolution is much wider than that which was presented to the Senate on April 24, and if in their judgment at that time it was in-compatible with the public interest to give that information to the Senate, certainly, in my judgment at least, we ought not at the present time to take this up for investigation, certainly not

in a public way.

For that reason it does seem to me that we ought not to act

hastily upon this resolution.

The VICE PRESIDENT. The hour of 2 o'clock having arrived, the morning hour has expired, and the Chair lays before the Senate the unfinished business.

Mr. CLARK of Wyoming. I ask that the resolution may go

over without prejudice.

The VICE PRESIDENT. The resolution goes to the calendar under the rule, the Chair understands.

I understood the Senator from Wyoming to Mr. SIMMONS.

ask that the resolution should go over.

Mr. CLARK of Wyoming. The presiding officer indicated Mr. CLARK of Wyoming. The presiding officer indicated that the morning hour had closed and I asked that the resolution should go over without prejudice.

Mr. SMITH of Georgia. Under the rules it goes to the cal-

Mr. CLARK of Wyoming. Under the rules it goes to the calendar, where undoubtedly it will be buried, if the Senator from Georgia desires.

Mr. SMITH of Georgia. I ask that it go to the calendar. I ask unanimous consent that the Mr. CLARK of Wyoming.

resolution may lie on the table.

Mr. SMITH of Georgia. I object. The VICE PRESIDENT. The request of the Senator from Wyoming being objected to, the resolution goes to the calendar. THE TARIFF.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. WARREN rose. Mr. LIPPITT. Mr. President-

The PRESIDING OFFICER (Mr. SHAFROTH in the chair). Does the Senator from Wyoming yield to the Senator from Rhode Island?

Mr. WARREN. I understand that the Senator from Rhode Island desires to complete his argument and to answer some questions propounded to him at the close of his speech yesterday, and I yield for that purpose.

The PRESIDING OFFICER. The Senator from Wyoming yields, and the Senator from Rhode Island will proceed.

Mr. LIPPITT. Mr. President, a few minutes after the close of my remarks yesterday, and while I was out of the Chamber, the Senator from Missouri [Mr. STONE] made some remarks which I find upon page 3151 of the Record of to-day and which, if they were not abusive, were certainly not flattering. seem to insinuate that I have at some time, or that somebody has at some time, done something that is wrong in regard to the cotton schedule.

I appreciate the compliment which the Senator pays when he chooses to criticize the man instead of replying to the argument, but I do not understand exactly what it is that he intends to criticize in his remarks. I have a very high regard for

the Senator, and I should like to stand well in his mind. Perhaps, to put it a little more definitely, I want him to state what it is that has been done that is subject to criticism. I will take occasion to read from the remarks of the Senator from Missouri [Mr. STONE]:

souri [Mr. Stone]:

Before the very honorable Senator from Rhode Island came to grace this body with his official presence he was accustomed to appear before the committees of the Senate and of the House, as were numerous others representing this very industry, to discuss its technicalities with Representatives and Senators who were not themselves familiar with those technicalities—any more then than now—and not only did they come with reference to this industry, but also with regard to practically every industry of any moment in the country.

It is not to the credit of our legislation in the past that interested representatives of the cotton industry, the woolen industry, the steel industry, and other industries were permitted by the Ways and Means Committee of the House and the Finance Committee of the Senate to come here and prepare the tariff schedules in which they were interested, to be afterwards passed by the two Houses of Congress, and to be approved by a Republican President. That used to be done.

But this is not the time when that sort of thing can be repeated.

A little further on he says:

A little further on he says:

That was the custom in Republican times, but that day is past. We have entered upon a different era.

Mr. President, I was not accustomed to appear before committees of the House or Senate. I never appeared in my life before a committee, except once, and I was so little accustomed to it that I can say I was almost frightened to death on that I subsequently wrote a short letter to the committee in regard to the tariff, and then went to Europe.

Now, just exactly what it is that the Senator thinks in that record I did that was wrong I hope he will take occasion to specify, because I should like to stand well in his graces, as

I have said.

But I further want to find out exactly what he means by saying that the custom of people appearing before committees and of being in intimate relations with those making these tariff bills and of being relied upon for information in connection with them is something that was simply characteristic of

Republican bills and is no longer permitted.

I have here, Mr. President, Tariff Bulletin No. 6, published by the American Cotton Manufacturers' Association of North Carolina under the auspices of the committee on tariff and legislation, composed of 14 members, I think, from the States of North and South Carolina, Georgia, Virginia, and Alabama. It consists of 67 pages. Of the 67 pages over 40 pages are taken up with an intimate correspondence between the two leading members of that committee, Mr. Lewis M. Parker and Mr. Stuart W. Cramer, with Mr. Underwood, in which they show the most intimate relations, the correspondence going on over several weeks, if not months, and the correspondence referring to repeated personal interviews. I will read the beginning of it.

Mr. STONE. Is that a public document?

Mr. LIPPITT. No; it is not a public document of the Senate. It is a document that has been published widespread through the South, and there is no secrecy about it in any way.

I will say, furthermore, Mr. President-and I am not in the slightest degree going to criticize Mr. Underwood, and I am not in the slightest degree going to criticize Mr. Cramer or Mr. Parker. I know those gentlemen well, and I have a very high opinion of all of them. I do not believe that any one of them would try to do anything that is improper, and I am absolutely sure that, however much they might try, there is no man who could make the chairman of the Ways and Means Committee of the House do anything that is improper. I am not in the slightest degree trying to throw any discredit upon the source to which he went for information, but I am trying to discover why the Senator from Missouri, in the light of the facts which are in that publication, pretends that the present bill, and particularly the cotton schedule of the present bill, was not written under the closest association with the people he says in his speech it should not be associated with. I read:

Lack of space prevents publishing these statements in full-

He is referring to some tables-

Furthermore, the following briefs and correspondence of Messrs. Cramer and Parker with Mr. Underwood and his committee fully cover the ground (including several personal interviews).

I am not going to encumber the RECORD with all these letters. They are the correspondence back and forth between Mr. Cramer and Mr. Parker and Mr. UNDERWOOD. I simply want to call attention at one point in them to show how intimate those relations were.

My dear Mr. UNDERWOOD-

Says Lewis W. Parker on January 28-

I regret I was not able to see you before leaving Washington to express my appreciation of your courtesles.

I am auxious, before you determine upon the cotton-goods schedule, to go over in detail with you and such other members of the committee

as you may desire the provisions of the suggested schedule of the American Cotton Manufacturers' Association.

February 3, a few days later, Mr. Underwood replied acknowledging the receipt of this letter:

I am very anxious to go over the matter with you, and if you will let me know when it is convenient for you to be here will arrange the necessary time for the consideration of the matter.

Mr. Parker writes again, in reply to Mr. UNDERWOOD, on February 4, saying:

I had expected to leave the afternoon of Saturday, the Sth Instant, for New York, where I shall be for several days. I could arrange, however, to leave the afternoon of Friday, the 7th, and be with you on the 8th instant, or I could arrange to stop over in Washington as I return from New York.

I read from Mr. Parker's letter of February 7 to Mr. Underwood, Evidently there had been some communication with him:

I expect to see you, as previously advised, on the morning of the 13th, when I shall discuss this matter with you further.

Now, all that interview was being arranged for the purpose of going over the cotton schedule with Mr. Underwood before it had been reported, as they say. All the letters are full of data that show the most intimate relations between these two, and in the light-

Mr. BRANDEGEE. Mr. President-

The PRESIDING OFFICER. Does the Senator from Rhode Island yield to the Senator from Connecticut?

Mr. LIPPITT. I do. Mr. BRANDEGEE. Will the Senator be kind enough to state again the title of the document from which he has been reading?

Mr. LIPPITT. It is called Tariff Bulletin No. 6, published

by the American Cotton Manufacturers' Association, North Carolina, which is an association of the southern end of the cotton business. It also has some members from the North, but it is substantially a southern organization. lotte, N. C." "March 5, 1913, Char-

Mr. BRANDEGEE. How many pages are there in the document?

Mr. LIPPITT. There are 67 pages in the document, of which something over 40 are taken up with the correspondence, which is perfectly open, and which is published and distributed through the South and over the country. I say there are about 40 pages that are taken up with this correspondence between these gentlemen. The other pages are taken up with certain tables to explain references in the correspondence.

Mr. BRANDEGEE. I should like to know whether the document is entirely given over to the questions in the cotton schedule of the proposed tariff bill.

Mr. LIPPITT. Entirely.

Mr. BRANDEGEE. Does it purport to be a report by a committee of this association to the members of the association?

Mr. LIPPITT. It is a report by a committee of the association to the members of the association.

Mr. BRANDEGEE. I understand it now.

Mr. LIPPITT. The Senator from Missouri refers to information and testimony, open testimony, that was given before the Ways and Means Committee by myself and others some four years ago, and implies that I did something discreditable. do not believe the Senator really thinks that I did anything discreditable, but that is the implication of his speech. I know of no way in which a committee of this body that is going to prepare a bill of this kind can obtain proper information unless it gets it from sources where the knowledge exists, and I think it is a very objectionable practice for Members of this body to discredit witnesses who do come down here fairly and honestly to give such testimony and to impugn their motives, for the simple reason that it prevents people from coming here who are in possession of the facts and from whom they can be obtained, and who are the only people from whom they can be obtained.

Now, I did not want to let those remarks of the Senator from Missouri go by, in which he claims such entirely different methods to be in existence at the present time, without some little

statement in regard to it.

The PRESIDING OFFICER. The Senator from Wyoming will proceed.

Mr. STONE. Mr. President-

The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Missouri?

Mr. WARREN. I yield to the Senator from Missouri.

Mr. STONE. Mr. President, I wish in the beginning of what I may have to say in reply to the Senator from Rhode Island [Mr. Lippitt] to disclaim any purpose of intended discourtesy to him. The Senator in his personal intercourse with the Members of this body since he entered the Senate has been characterized by the highest courtesy and kindliness, and I am

sure that, so far as the personal equation goes, he is regarded with most kindly consideration by everyone.

Mr. President, I listened yesterday to the address of the Senator from Rhode Island. There were remarks in that address that I thought he might well have left out of it. In a way he impeached the capacity of the Ways and Means Committee of the House and the Committee on Finance of the Senate to deal with the questions before them relating to tariff revision. He assumed, as I thought, an air and tone of toploftical superiority that was not altogether agreeable to me. A man may be superior to other men in many ways, at least in his own opinion, and of course he has a right to a flattering opinion of himself, but I do not care to have my hair rubbed the wrong way by having any man tell me that he thinks he knows more and is in many ways better than I am, or that his party is better than mine.

Mr. President, I did say that the Senator had been accustomed in past Congresses to appear before congressional committees to use his influence in shaping tariff legislation. Senator says I was mistaken in saying that he was accustomed to do this; that he had never appeared except once, and that he was frightened on that occasion. I accept his statement that he personally never appeared except once, but, Mr. President, I positively assert that it has heretofore been the custom of interested parties, representing all kinds of industries, to appear before congressional committees and to use their influence to shape legislation. I do not mean to say that gentlemen who thus appeared used their influence in a corrupt or even in an altogether improper way. They were dealing with legislators who were in sympathy with them; there was a concurrence of views and a mutuality of interest between them; they were working hand in glove, and I do not severely criticize the representatives of great industries if, when offered the opportunity to appear before committees of Congress having in charge legislation in which they are vitally interested, they come and strive to direct the course of such committees. have a right, I suppose, to so appear and help themselves if they can. I am not going to discuss the propriety of that. There is certainly no turpitude in that kind of proceeding. If a committee is willing to have outside interested parties write tariff schedules for it, the outside party is at least not much to

Now, as to the part the Senator from Rhode Island played in this legislation relative to the cotton schedule as it was written in the Payne-Aldrich bill, I desire by way of reminder to re-produce a bit of history. It is a matter which I did not intro-duce yesterday, but now that it is called for I think I may properly introduce it. What I am going to read may be incorrect, and if so, the Senator from Rhode Island should here now have a chance to make his own reply.

Mr. President, I do not certainly know what influence the

Senator had in shaping the cotton schedule of the Payne-Aldrich bill. All I know is what I have read and heard. I hold in my hand some excerpts from the debates had in the Senate at the time the Payne-Aldrich bill was pending and when the cotton schedule was under consideration.

From these I will first read an extract from a speech of former Senator Dolliver, of Iowa, one of the most distinguished and eloquent men who ever represented that great State in the Senate

On May 4, 1909, page 1719, volume 44, of the Congressional RECORD, Mr. Dolliver is reported as saying:

Mr. Dolliver. * * * Mr. H. F. Lippitt, of Providence, R. I., a member of the Arkwright Club, of Boston, representing a large number of cotton spinners of New England, came before the committee (Ways and Means) on the 1st of December and stated as follows (this is from page 4528 of the hearings):

"We ask that the present cotton-cloth schedule shall not be reduced—

That was all that was asked, that the rates should not be

reduced-

because when it was enacted it was the result of a careful inquiry into the conditions of the cotton-manufacturing industry. We ask, therefore, that the present schedule shall not be materially changed. (Page 4532.)

"I am not here to ask for an increase in the duties on the cloth clauses of the cotton schedule. I think that while there are importations going on under them, it is reasonably regulative of the cotton trade. The importations are not so large that we feel justified in asking that the duties be increased." (Page 4538.)

Someton Dell'iver read this cortract from these bearings, which

Senator Dolliver read this extract from these hearings, which I have here now on my desk. Then he proceeded to say-I am now quoting from his speech:

Now, notwithstanding that statement, Mr. Lippitr and James R. MacColl, for the Arkwright Club, on January 15, 1909, addressed a letter to the Committee on Ways and Means asking for provisions substantially identical with those that appeared in paragraphs 318 and 321 of this bill as originally reported from the House Ways and Means Committee.

And these paragraphs increased—in some respects materially increased—the rates of the Dingley law.

Mr. President Mr. LIPPITT.

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Rhode Island?

Mr. STONE. I should prefer if the Senator would let me finish this statement.

Mr. LIPPITT. I will do so. Mr. STONE. I resume the reading:

Upon discovering to what extent they had been misled by following these suggestions Mr. Payne, one of the wisest practical students in the United States on the cotton business or any other business of our people, and a man who, in my judgment, knew more about it in 1890 than William McKinley did, and more definitely about it in 1897 than even Gov. Dingley himself—

Mr. LIPPITT. Mr. President—
The PRESIDING OFFICER. Does the Senator from Missouri yield to the Jenator from Rhode Island?

Mr. STONE. I do. Mr. LIPPITT. I merely want to ask the Senator if he has the copy of that testimony there or if he can tell me just where I can refer to it?

Mr. STONE. I have it here.
Mr. LIPPITT. May I look at it while the Senator is reading?
Mr. STONE. Certainly. I send the Senator the volume containing his statement before the Ways and Means Committee and the letter signed by him and Mr. MacColl. The letter is not very long; his statement is not very long; and I am not sure. Mr. President, but that it would be enlightening to incorporate both of them in this connection in the Record. However, I will not now ask to have that done.

Senator Dolliver continued:

Senator Dolliver continued:

When Mr. Payne found out what had been put into the bill by adopting the suggestions made in writing by James R. MacColl and Mr. Lippith he said to them in plain language, somewhat exaggerated by implety, that he would have nothing to do with it. In other words, he and his associates on the committee felt that these two amiable gentlemen who came there stating that they desired no increase to be made in the cotton schedule had perpetrated an act of bad faith in inducing them to report an amendment which, in the judgment of the committee, could not be defended in the Congress of the United States. I will say another thing. These very amendments, with the omission of one or two which were cast out in wrath by the House committee; come back with great rejoicing in the report of the Senate committee on the cotton schedule. * * I traced the very language of this bill past the customhouse to the two honorable gentlemen who wrote to Mr. Payne a letter, which does not appear in the cotton hearings in the House of Representatives, although it has an obscure resting place in the appendix of that interesting series of volumes.

I find that the language which they prepared for Mr. Payne—
Mark you, which they prepared for Mr. Payne—

Mark you, which they prepared for Mr. PAYNE-

was handed in to the customhouse by Mr. Lippitt and Mr. MacColl, and was approved by the experts, who, we have supposed, were engaged out of the abundance of their wisdom and knowledge in writing the whole thing by themselves. I confess it leaves a very ugly impression upon my mind.

When Mr. Payne found that he had been swindled, he dropped the enterprise, and with it practically all the other suggestions of these amiable gentlemen. I want to say now that they perpetrated even a greater swindle upon the Senator from Rhode Island.

I do not see how it was possible, however, to overreach the then Senator from Rhode Island, Mr. Aldrich.

Again, on May 5, 1909, page 739, volume 44, of the Congres-SIONAL RECORD, Mr. Dolliver is reported as saying:

For 10 years I have heard about the mercerization of cloth, but I never understood it until very recently, although it has been a known process in cotton weaving for 107 years. It is not a very costly process. It consists in bathing the cloth after it is made in a bath of caustic soda dissolved in water. * * * That provision for a duty of 1 cent a yard more for mercerization is not the work of our honored committee; it is not the work of our honored appraisers—those eminent retired statesmen that are now sheltered in the customhouse at New York waiting for future promotion to justices and supreme justices of the Court of Customs Appeals in that great building. [Laughter.] That proposition was put in there by two amiable gentlemen from New England who know more about this cotton business than all the rest of us put together.

And they do.

I quote again from Mr. Dolliver:

Did they tell the customhouse appraisers what this process cost? Not a word. Did anybody make any inquiry as to what the process cost? Did any human being weigh the relative cost here and abroad and put a rate on it that would about cover it, with a little profit to enterprising and good people? Not a word of it.

I could go on and quote much more from this speech of our lamented friend, the former Senator from Iowa, but I will end this particular line of quotations at this point.

On June 3, 1909, Mr. La Follette said, as may be seen by reference to page 2595 of the RECORD:

Mr. Lippitt, if I may supplement what the Senator from Iowa has said, is one of six men or six families who control the great cotton industry of Rhode Island. Mr. Lippitt is a man who has been on hand here whenever tariffs were to be revised as the spokesman of the cotton industry.

So the Senator will notice that I am not the only Senator who was unaware of the fact that he had appeared here only

once. If, however, he really appeared only once, many others came very frequently.

Mr. Lippitt is the head and front of the cotton organization in Rhode Island. He did not represent, Mr. President, the great body of the people of Rhode Island when he sent his letter up here asking for some increases after he had appeared before the Ways and Means Committee and stated that the conditions were satisfactory to the cotton industry under the Dingley tariff any more than he represents in his views as a member of the Republican Party the rank and file and the great body of voters of that party in Rhode Island.

At that point the distinguished Senator from Minnesota [Mr. Nelson] rose and said, as appears on page 2705 of the Record:

Mr. Nelson. I want to say that the trouble with Mr. Lippitt at the time he made that statement before the Committee on Ways and Means was that he was not aware of the new doctrine that the tariff was to be revised upward. If he had been impressed with that idea, his statement would have been more conservative. [Laughter.]

Now I wish to read another interesting chapter to the distinguished Senator from Rhode Island. In the Senate on June 4, 1909, page 2750, volume 44, of the Congressional Record, this appears:

Mr. I.A FOLLETTE. * * * Mr. LIPPITT appeared before the Ways and Means Committee, and I found an interesting little colloquy in the report of the hearings which gives a New England manufacturer's idea of a fortune and what constitutes a fortune. The Senator from Massachusetts said that New England fortunes were not large—

I suppose that must have been the present senior Senator from Massachusetts [Mr. Lodge], although it may have been the then junior Senator, but that is immaterial; it was one of them-

or that large fortunes were not acquired in this industry at least—referring to the cotton industry—and that seems to be the view of Mr. LIPPITT, to whom reference has been so often made in the course of this debate. * * After summarizing the condition of the cotton-mill industry in New England, Mr. LIPPITT said:

"The result of all this is that while the best-managed mills of New England have made a living they have shown no extraordinary profit. Great fortunes made in cotton manufactures are very rare."

Great fortunes! Senators, you must keep in mind the descriptive words—"great fortunes" or "large fortunes." Subsequently Mr. Lippitt was interrogated on the subject of large fortunes and answered as follows:

Mr. Longworth, I do not know whether I understood Mr. Lippitt correctly to say that no large fortunes have ever been made in this business in New England.

Mr. Lippitt, I think so,

Mr. Longworth, My impression is that most of the large fortunes have been made in it.

Mr. Lippitt, We are not accustomed to large fortunes in New England.

Mr. Longworth, Then may I ask you what you call a large fortune?

Mr. Lippitt, I would receive a feature of three converge of a bill

Mr. Longworth, Then may I ask you what you call a large fortune?

Mr. Lippitt. I would regard a fortune of three-quarters of a billion as a large fortune.

Mr. Hill. That would be quite a moderate one for an Ohio man, would it not?

Mr. Longworth. I only asked the question because I thought it was rather an exaggerated statement.

Mr. Lippitt. I do not think so.

Mr. McCall. You mean that there are no manufacturers of very great wealth in New England?

Mr. Lippitt. Yes; I mean to say if you compare the cotton industry with others. with others.

A little later in the course of Mr. Lippitt's testimony, in order to make certain that there should be no misunderstanding of the New England standard of fortunes, Mr. Lippitt was further interrogated and made answer as follows:

Mr. CLARK. How much would you say you would regard as a com-rtable fortune, three-quarters of a million or three-quarters of a

billion?

Mr. Lippitt. The gentleman asked what I would consider was a large fortune. I said I thought three-quarters of a billion was a large fortune.

Mr. CLARK. A billion?

Mr. Lippitt. Yes, sir.

In other words, anything below \$750,000,000 the Senator took out of the class of large fortunes; under that sum in New England fortunes were to be regarded as moderate.

My friend from Georgia [Mr. SMITH] suggests that under the protective system a man such as the Senator from Rhode Island, who materially aided, directly and potentially aided, in writing the cotton schedule of the Payne-Aldrich law, is naturally of the opinion that the profits piling up from year to year do not exceed reasonable bounds, nor yet create large fortunes in the hands of those profiting by statutory extortion, until a fortune reaches the minimum standard of \$750,000,000.

Mr. President, I have no wish, and I had no such desire yesterday, to say anything offensive to the Senator, but I can not withdraw the statement that the Senator did appear-he says "only once," but, my Lord, that once was enough-and used his great and seemingly controlling influence in first inducing the Ways and Means Committee to write his suggestions into the bill which that committee reported to the House. I do not adopt the language of Senators from whom I have quoted-I merely read it-in saying that the Ways and Means Committee

was misled. I do not know as to the fact; I have only Senator Dolliver's statement, that Chairman PAYNE said he was misled and that he repudiated the provisions relating to cotton as they had been prepared and submitted to him, and which he had adopted. But, not content with Chairman PAYNE's repudiation of their suggestions, it appears that these manufacturers of cotton cloth came here to see the Finance Committee, presided over by Senator Aldrich, and induced that committee to adopt and report to the Senate the cotton-cloth schedule as it had been first adopted by the Ways and Means Committee, and then afterwards repudiated by that committee, as I have shown.

Mr. President, I do not personally know what the present Senator from Rhode Island had to do with all this. He knows whether what I have read is true. He says he appeared but once. I do not know whether that once was before the Ways and Means Committee or the Finance Committee; but when and wherever he did appear, according to the record, he said that he did not ask for an increase; he only protested against a reduction in the duty; and yet, in the letter which the Senator has in one of those volumes I sent over to him and from which the then Senator from Iowa quoted, signed by the Senator and Mr. MacColl and addressed to the Ways and Means Committee, they wrote out in that letter the very phraseology of the bill, in so far as their particular industries were concerned, suggesting the very words and form of the law, knowing that the effect would be to increase the duties.

Mr. President, this sort of controversy is not agreeable. Yesterday I passed it by; but to-day the Senator brings it up in a way that warrants me in saying what I have. I have not anything but personal good will and kindly feeling for the Senator; but, Mr. President, in vew of what has occurred, I can not retreat from nor retract any syllable of the statement I made on yesterday, that in past Congresses, when Republicans were in control of both Houses and of the White House, interested men, dominating, controlling, directing great manufacturing establishments and interests, came here and arranged the very form of tariff legislation that was to be enacted into law.

I think I will read before I sit down an extract from the testimony of the Senator from Rhode Island before the so-called lobby committee of the present Congress. I read from

the hearings before that committee:

the hearings before that committee:

The CHAIRMAN. You have a list of the questions that have been propounded by the committee to all Senators appearing here. You will find 11 questions there, and I will ask you to look at the questions and answer them fully in your own way.

Senator Lippitt. In reply to the first question, I will say that I am now and have all my life been interested in the manufacture of cotton goods of various kinds. I also have some slight interest in the manufacture of a refrigerating machine and a small interest in an experimental attempt to make an oil engine. I think those are the only things that I am interested in that would come under the description given in that question.

The CHAIRMAN. The question says to state fully the nature and also the extent of your interests.

Senator Lippitt. In the manufacture of cotton goods, the Manville Co., of Providence, R. I., manufactures a very wide range of cotton cloths of various descriptions, and, of course, all of the articles manufactured are to some extent affected by the proposed tariff changes. I do not know what detail you want me to go into.

The CHAIRMAN. What is the capital stock?

Senator Lippitt. S6,280,000.

The CHAIRMAN. What is the extent of your holdings?

Senator Lippitt. I own about a quarter of it.

Mr. President, so there were over six and a quarter million

Mr. President, so there were over six and a quarter million dollars in one concern interested in cotton manufacture, of which the Senator says he is himself the owner of one-fourth. While with most of us that would be considered a large fortune, I presume according to the Rhode Island standard a man possessing only that amount would be close on to the verge of That is all I care to say.

Mr. LIPPITT. Mr. President-

The PRESIDING OFFICER. Does the Seming yield to the Senator from Rhode Island? Does the Senator from Wyo-

Mr. WARREN. I yield.

Mr. LIPPITT. Mr. President, the arts and methods of the

cuttlefish are very well understood.

I made a speech yesterday in which I discussed one of the most important schedules of the tariff bill. I discussed it, I believe, with great fairness. I tried to point out some of the things in which I thought it was deficient. I tried to point out its inequalities. I did not enter into any personalities, so far as I can remember. I did criticize the bill, however, and I am not surprised that the Senator from Missouri is hurt, and says that I must not say that a bill is not well made even if, as a matter of fact, it is not well made. That is the sum and substance of his criticism.

The Senator has brought up, as an answer to my criticisms on this schedule, quotations from a discussion that went on in this body four years ago, a discussion which lasted a fortnight or more, during which testimony was quoted for partisan pur-

poses and misquoted for partisan purposes. It is an effort to distract attention from the very proper criticisms which I have made on the textile schedule of the bill that the Senators on

the other side have prepared.

Mr. Dolliver, when he made those statements and quoted me as saying that I had appeared here in behalf of men who did not ask to have the cotton schedule increased in whatever year it was, 1908 or 1909, quoted me correctly as far as he went. quoted the position which I took at that time, and which I have taken ever since. Over and over again I have said that so far as the cotton schedule was concerned the cotton industry as a whole did not need any more protection. Mr. Dolliver, however, failed to quote all that I said, for I also pointed out that there were some minor features which were still in controversy and might need elucidation. This is exactly how I put it: "As it is, however, excepting some minor details which should be corrected, it regulates reasonably well the cotton trade of the country under present conditions."

In accordance with the suggestion there made, that there were some points that needed elucidation, and at the request of the chairman of the Ways and Means Committee of the House— Mr. PAYNE, as I recollect, but it is .. far back that I am not certain on that point—I spent some little time in studying some of the decisions which had been made in regard to that schedule. There was one thing in particular that I investigated. and I am sorry I have not a sample of the cloth here. During the debate there was shown here a piece of cloth so filled with colored yarns that it looked as though it had as much color in it as the carpet on which I stand. Yet, by a decision of the appraisers in New York or the courts of final jurisdiction, the law was so interpreted that such fabrics came into this country as white goods.

Was there any impropriety, at a time when that law was to be reconsidered, in finding the proper language to meet such a situation, where a piece of goods so thoroughly colored that you could scarcely see any white yarn in it at all was nevertheless admitted through the doors of the customhouse as a piece of white goods, with a difference in duty of a cent or two cents a yard or more, perhaps, as compared with the duty of other

colored fabrics?

Then there was another situation. I do not want to go into the discussion of all the technicalities of that old question, but there was another question. It was the question of etamines and vitrages. An etamine is a fabric composed of twisted yarns, 2 ply or more. It is of very open construction. The yarns have to be twisted so that they will not slip on each other, so that they will retain their position, so that the mesh will be square. If they are made of single yarns the yarns may be the same size, but in practice they slip one over the other and fray, as it is called.

Etamines are at certain times in fashion, and had been in fashion but a short time before the revision of that bill came about, and because of that there had been an attempt on the part of some importers to have etamines put in an entirely different classification. Because they were composed of this twisted yarn, which added greatly to their cost, they were at that time in a paragraph—I think of the flax schedule—at a duty of 60 per cent. Suit was brought on the ground that nothing was an etamine unless it was called an etamine: that the interpretation of that paragraph should be that any piece of goods that came into this country and was not stamped "etamine," or did not have a ticket on it that called it etamine, or in some way was described as etamine, it did not make any difference what its construction was, was not an etamine. The courts decided that way. Immediately there was not a single etamine coming into the country. The goods that had been brought in here at 60 per cent were brought in, in some cases, at as low a duty as 8 per cent under the paragraph into which they were put.

Was there any impropriety in my taking up that question? I had been asked by the cotton manufacturers of New England to act as part of a committee representing them. Until I arrived in Washington I had not the faintest idea that I was going to be the spokesman of the committee. It came about by accident. I was not thoroughly prepared for it, but I was asked shortly before I did so to make a statement for the com-To the best of my ability I complied, and to the best of my ability I told the committee and the country that the cotton manufacturers did not ask for any higher duty, but they did ask

to have the schedule properly interpreted.

What was proposed? We suggested to cover the twisted-yarn situation that when a piece of goods came in and the threads were counted for classification so as to decide, for instance, whether it would go into a class comprising threads between 50 and 100, with one duty, or between 100 and 150, with another duty, the single threads of which the 2-ply yarns were composed should be counted in establishing that classification just exactly as would have been the case if they had been single That had not been done before in the tariff. was some decision away back-I do not know how far; a long time ago-by which it was decided that under the wording of the tariff a twisted yarn must be counted as one yarn, and therefore goods counting between 100 and 200 were sometimes put as low as into the 50-thread class. It seemed like a simple way to adjust it to provide that threads composed of two or more threads-I do not remember the exact language, but this is the substance of it-should be counted for classification according to the threads of which they were composed.

The purpose of it was to put etamines and similar fabrics back at a duty of about 30 to 40 per cent, whereas under the old law they had been dutiable at 60 per cent until this decision of the courts had taken them out of the 60 per cent class and put

them down into a lower class.

To see just how it was best to cover such points as these, after I appeared before the committee I went home and studied the question and consulted with people whom I supposed had information about it, and wrote what I thought were desirable changes. Every one of them was of very little consequence. I then went to Europe. That was before the bill had been reported from the Ways and Means Committee. I did not come back to this country until after the bill had been reported to the Senate.

Mr. STONE, Mr. President-

The PRESIDING OFFICER (Mr. SHAFROTH in the chair). Does the Senator from Rhode Island yield to the Senator from

Mr. LIPPITT. I do. Mr. STONE. I find here-

What is "here"? Mr. LIPPITT.

Mr. STONE. This is testimony given before the lobby investigating committee. I find here, on page 154, the statement that after the Senator had been before the Ways and Means Committee he went to Europe or Africa or went abroad, and

On my return the bill had been reported to the Senate, as I have said, and when I arrived in New York I was telegraphed to and asked to come down here to act as an expert in advising the committee, or particularly the chairman of the committee, Mr. Aldrich, who was a great personal friend of mine and who had confidence in my understanding of that subject, in regard to the effect and general bearing of that schedule of the bill.

Did the Senator come in response to that telegram?

Mr. LIPPITT. I was just going on to say So.
Mr. STONE. Then the Senator came more than once.

Mr. LIPPITT. What does that imply? I have not said I did not come more than once.

Mr. STONE. I certainly understood the Senator to say so when he was first on the floor this morning-that he had made one appearance here before the Ways and Means Committee.

Mr. LIPPITT. The Senator from Missouri spoke about my appearing at public hearings before the Ways and Means Committee and said I was accustomed to go there. I was not accustomed to go there. I never was there but once in my life, as I said to the Senator.

Mr. President, when I was interrupted I was talking about 2-ply threads, and I had said that we made this report suggesting that the proper way to classify the goods was by the single threads of which the 2-ply threads were composed. The result of that would have been to take etamine from the 8 to 15 per cent class, at the very bottom of the list, and restore it to a medium class, where the duty would have been about 30 or 40 per cent instead of the 60 per cent class, where it had been until this court decision practically deprived it of duty. Quite a large variety of goods of this kind come in here occasionally. They are called voiles, vitrages, and various names. They are very attractive and very expensive fabrics, and it was a perfectly proper thing to suggest a reasonable rating for

What happened? After the bill was reported to the House some interested representatives of importers went to Mr. PAYNE and told him that counting the threads in that way raised the duty, and that he had been fooled; that it was a "joker;" that had been fooled by me. Well, he was fooled, but he was fooled by the importers that went to him and told him that. was not here. I was in Europe. I was in no position to What that change did was to take a piece of goods of that kind and raise it from the 8 to 15 per cent duty, where it had wrongfully gone, to about one-half the duty that it had carried when the duty had been rightfully collected. If there was any deception about it, it was deception on the part of the representatives of the foreign interests, who forgot to tell Mr.

PAYNE that while the change raised the duty from a very low point it brought it nowhere near the high point at which it had originally been.

Was there anything wrong about that? Was I doing anything wrong when I pointed out that irregularity in that minor I say "minor," for the whole value of all the etamines and all the voiles and all the vitrages that are used in this country is so small that they are insignificant.

As for the mercerization question, that subject is very fully discussed in a speech made by the senior Senator from Massachusetts [Mr. Lodge] during the course of the debate on the Payne-Aldrich bill. I will not take the time here to repeat or amplify what was then said.

Let me see—what was the other charge the Senator made against me? Why, that I thought three-quarters of a billion

dollars was a large fortune.

Has any man ever said that it was not a large fortune? To the Senator from Missouri does it appear a small fortune? came about in this way: While I was testifying, Mr. Longworth, of Ohio, a member of the committee, in a joking way, with a smile on his lips, said to me: "What do you consider a large fortune?" and with a smile I said, "Three-quarters of a bil-

Why did I say it? Because a few days before the papers of the country had been full of the evidence of a gentleman reputed to have made nearly that sum in the iron and steel business, Mr. Carnegie. No Carnegie ever came out of the textile busi-No Rockefeller ever came out of the textile business. But it is out of the iron and steel business, and out of the banking business, and out of the mining business, and out of the lumber business, and out of the railroad business these fortunes have been accumulated. At the time the question was asked me, as I say, the papers were full of the fact that Mr. Carnegie had sent back word from Scotland that the steel industry did not need any more protection; and it seemed to me like a very strange and remarkable circumstance, just at that moment, that a gentleman who had made that amount of money out of a protected industry, when his time had come to retire, should send back word that it did not need any more protection. I supposed, really, that some of the gentlemen would go on and ask me what I meant by it; but it was passed over, and occasioned at the time no particular interest.

Since then some people-and now the Senator from Missouri takes it up-have tried to insinuate that I think nothing less than three-quarters of a billion dollars is a large fortune. When he made the insinuation he knew it was not true. He knew I did not think any such thing. He knew no man would make such a statement. I did make the statement that it was a large fortune, and he tried to put into those words the statement that nothing less than that was a large fortune. Why is he saying it? Because yesterday I showed what the cotton schedule really was. Because I showed that, as compared with the silk schedule and wool schedule, it was absolutely unjust. Because I showed that one part of it, as compared with another part, was absolutely unjust. Now they are trying here, with their cuttlefish methods, to injure the witness in the hope of discrediting the testimony.

Mr. SMOOT. Mr. President—
The PRESIDING OFFICER. Does the Senator from Wyoming yield to the Senator from Utah?

Mr. WARREN. I yield for the moment.

Mr. SMOOT. Mr. President, it seems, according to our friends on the other side, that it is a crime for a manufacturer to appear before any committee of either branch of Congress, especially if he speaks in behalf of any industry in which he may be interested.

In looking over the hearings and the briefs that have been filed during the consideration of the pending bill, I am fully convinced, as the Senator from Missouri has so often stated, that there is a change of policy. The change is that instead of the manufacturers of this country being listened to or asked for information affecting rates of duties, the importers have the ear of the committees of Congress and their advice is paramount.

I am not going to take the time to discuss this question, but I am going to ask that the names of importers and others who appeared asking for reduction in tariff duties may be printed in the RECORD, and also in connection with that, a list of the briefs and statements filed with the Committee on Finance of the Senate on the different schedules of the bill. I ask that that may be printed in the RECORD.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah? The Chair hears none.

Mr. REED. Does this give the names of all that appeared?

Mr. SMOOT. As nearly as I can find out. I went over them pretty carefully. I may have missed a few, but I certainly have not included any that did not appear.

The matter referred to is as follows:

NAMES OF IMPORTERS AND OTHERS WHO APPEALED FOR REDUCTION OF TARIFF DUTIES AT HEARINGS BEFORE WAYS AND MEANS COMMITTEE. SCHEDULE A.

Robert J. Keller; Alfred Kubler, vice president: the Geigy-Ter Meer Co., New York; manufacturers in Basel, Switzerland, of tannic acid and nutgall extracts (p. 53).

C. S. Welsh; Park & Tiiford, New York; importers of perfumery, toilet preparations, brushes, etc. (p. 66).

Ferdinand Cocorullo, New York; importer of mannit (p. 87).

G. R. Schroeder, secretary Italian Chamber of Commerce, New York (pp. 88, 101, also pp. 284, 480, Schedule B). Subsidized by the Italian Government, p. 278, line 15).

E. O. Lemon, vice president; W. J. Dippel, secretary; C. Tennant & Sons Co., New York 100 William Street: United States agents of the Norwegian Hydro-Electric Nitrogen Co. (Ltd.) (pp. 89-92).

Schering & Glatz, New York; camphor (p. 130).

Joseph Dick, 198 Broadway, New York; importer of German and Austrian bone glues in cake form (p. 217).

E. C. Kilpstein, A. Kilpstein & Co., New York; importers of indigo colors. "We are importers, and consequently we have not come here to say that any of the things you have done or are going to do are going to ruin us" (p. 227).

A. H. Washburn, representing J. A. & W. Bird & Co., New York and Boston; importers of paints; agents for the Repolin Co., Holland (p. 312).

Maurice Leon, representing Roger & Gallett, New York; importers of

and Boston; importers of paints; agents for the Repolin Co., Holland (p. 312).

Maurice Leon, representing Roger & Gallett, New York; importers of perfumery and soaps. "Under the present rates (Payne-Aldrich) it has been our experience that it is difficult, if not impossible, for us to compete on our market for the class of goods which goes into the homes of people in medium circumstances" (p. 389).

Francis B. Arnold, representing F. R. Arnold & Co., New York; importers of soaps. "Under the Payne tariff we have been able to recommence the importation of the low-priced soaps" (p. 391).

Lockwood, Brackett & Co., New York; importers of Castile soap (p. 414).

Albert & Hart, representing Leousi, Clouney & Co.; advocated free sponges (p. 419).

SCHEDULE B.

The Meyer Co., 253 Broadway, New York; tiles (p. 436).

Adolph Grant & Co., New York. "The tile industry in this country would not suffer in the least if the entire duty were removed" (p. 437).

W. S. Pitcairn, New York, representing the importers of English china and earthenware (p. 564).

E. H. Pitkin, Chicago, merchant; dealer in pottery, crockery, and earthenware (p. 607).

Jerome Jones, merchant; dealer and importer of china, crockery, and earthenware (p. 612).

George Kolb, Herman Siegel, Julius Rosenfeld, committee of the importers of German and Austrian china, New York; electric-light carbons (p. 689).

M. Kirchberger, 374 Second Avenue, New York; H. G. McFoddin & Co., 38 Warren Street, New York; Henry Endemann, 32 Park Place, New York; Oscar O. Snedlently, 127 Duane Street, New York; Fonderille & Naw Industrie, 37 Warren Street, New York; Fensterer & Riehl, 47 Murray Street, New York; B. Gunthel, 49 Barclay Street, New York; Franz Enler & Co., 1 Hudson Street, New York; importers of glassware at the port of New York (p. 765).

Oscar O. Friedlander, New York; importer of hollow glassware (p. 776).

M. E. Mailhouse, New York; representing German manufacturers of yelvet (p. 285).

Atkinson & Haserick, importers of the control of th

Mr. WARREN. Mr. President, with the threatened Mexican war and the cotton war, I hope we may have the alighting of the dove of peace for the tariff.

The VICE PRESIDENT. The Senator from Wyoming is

recognized.

Mr. WARREN. Mr. President, a few mornings since the distinguished and amiable Senator from Missouri [Mr. Stone], ranking member next to the chairman of the Finance Committee, took to task in rather forceful manner and terms all the Senators on this side of the Chamber who had so far made speeches upon the pending tariff bill, charging, in effect, that such Senators were in a conspiracy to bring on hard times and financial distress during or following the consideration of this bill, in order thereby to obtain some political advantage.

That the Senator was more in jest than in earnest we must,

of course, believe, for it would be a preposterous, a monstrous, injustice to presume that either side of this Chamber desires or would knowingly participate in favor of any course of legislation that would bring on panic and retrogression. I myself would many, many times rather see the present dominant party retain the reins of government for a long, extended time, with continued prosperity equal to that which the Nation has enjoyed under Republican rule since 1896 than to again endure the strain and hardships of the period following the election of 1892 and continuing until into 1896 which we were subjected to.

ALL WANT PROSPERITY.

I believe that all of us, regardless of political label, desire

national prosperity first and always.

But, Mr. President, if Republicans believe that these great tariff changes will disarrange business affairs, I claim that it is their privilege, if not their duty, to say so, equally with the majority Senators who are holding out promises of greatly increased national prosperity following the prospective change in our financial affairs.

Mr. President, sometimes when one doubts the successful outcome of a proposed enterprise or policy he throws out hedges or guards in the way of straw men or bogy men, laying the blame beforehand on the other fellows for what he fears might happen to his policy. Can it be possible that our Democratic

friends are thus hedging?

But these things "all come out in the wash." If Republicans have forebodings, and express them, which the future shows to have been groundless, then Democrats gain prestige and Republicans lose thereby. If Democrats make too many rosecolored promises that can not be fulfilled, the equation works

the other way.

Another method of hedging is to criticize severely or attack present and past conditions, however satisfactory they may have been, whenever some proponent is big with promise and anxiety to obtain the indorsement of his fellows to some new process or plan. I fear our most amiable friend the chairman of the Finance Committee has fallen into this habit in at least some slight degree as to several matters, and most egregiously so regarding the farmer, as I shall show a little later on in my remarks. But for a few moments let us roam in the realm of prophecy.

IN THE REALM OF PROPHECY.

The able chairman of the Finance Committee [Mr. Simmons], in presenting the tariff bill in the Senate, assumed the rather dangerous rôle of a prophet. Of the future results of the proposed legislation he says:

The passage of this bill will not result in closing factories; it will not throw labor out of employment. On the contrary, I confidently predict that it will open a broader field to our manufacturers and farmers, both at home and abroad, and that the resulting expansion of both our foreign and domestic trade will open new opportunities to industry and enlarged employment for labor.

Very cheering words. I sincerely pray this may come true. We remember the lines Perhaps it will do all of these things. of the old hymn:

God moves in a mysterious way His wonders to perform; He plants His footsteps in the sea And rides upon the storm.

Possibly out of the mysteries of the present bill will come the wondrous results predicted by the prophets of the majority. for one hope they will not prove to be false prophets, but that all their predictions of prosperity may be fulfilled. At any rate, I shall not enter the lists against them in the realm of prophecy by predicting the misfortunes and disasters which many good citizens fear will follow in the wake of this assured tariff legislation

However, in this connection I would say that during the past three months, while the tariff bill has been pending, I have re-ceived, probably, thousands of letters from citizens of the United States, representing hundreds of industries, and the bulk of these letters have contained expressions of fear as to the future should the Underwood-Simmons bill become law and protests against the rates prescribed for importations of goods or products manufactured or produced by the writers.

Many of these letters are pleas for the preservation of the

industry in which the writers are interested or appeals to Congress to save their businesses from being wiped out of existence.

Many of these appeals are pathetic, and I believe that most of them are the cry of men fearful that their commercial existence is to be destroyed by this legislation instead of broadened and enlarged, as predicted by the prophetic Senator in charge of the bill. I have not as yet presented here in the Senate a single one of these many letters.

In no one of the many letters which have come to me regarding the proposed legislation is there a hopeful expression or an optimistic view concerning the future. On the contrary, they show the existence in the business world of widespread anxiety regarding the future, and their general tone indicates that the people of the country have grave forebodings concerning what is in store for them.

TIME WILL TELL.

While I shall not attempt to say what the future may bring forth as a result of the Underwood-Simmons Tariff Act, yet I have ventured in an earlier speech to remind the Senate of what the past has dealt out to us in periods following the enactment of tariff legislation of the same general trend as that provided for in this bill, recalling at the same time what great American statesmen have said, that "there is no way of judging the future but by the past."

It is well known by every student of American political history, and needs no elaboration here, that we have had during nearly the entire life of the Republic alternating periods of downward and upward tariff rates, periods tending toward free

trade alternating with periods of protection.

The legislation approaching free trade has been secured by those whose knowledge of the subject has been obtained from the textbooks of theorists. The college professor, holding an honorable place in the thinking world and yet helpless in business matters, has supplied the arguments for the free-trade trend of legislation.

On the other hand, protective legislation has been the result of actual business experience and has been fathered by business men, who had learned by the trials of real work and the hard knocks of adversity what was needed in tariff legislation to insure prosperity.

Thus throughout our history we find that low-tariff legislation and periods in which the trend was toward free trade have been quickly followed by business depression, business disturbances, failures, hard times, low wages, and general commercial and financial depression.

On the other hand, the periods of adequate tariff and the application of the principle of protection in tariff legislation have been periods of good wages, ample work, fair profits, and

general commercial and financial prosperity.

Of course hard times may have been an incident, and not caused by low-tariff legislation, while good times may have been incidental and not caused by high tariffs, but the coincidences are remarkable, and form a reasonable basis for the assumption that the interests of the country have been best served in the

past by protective legislation.

And there is, therefore, good reason to assume that with the passage of the pending bill, which is a free-trade measure in its application to the greater industries of the country, history will repeat itself, and we shall again have to contend with adversity until there is an opportunity to repeal the law and enact a new one; and among the disappointments that I imagine will be the most heartbreaking will be the failure to satisfactorily reduce the cost of living and provide the ultimate consumer with the Utopian conditions expected. Next to these will be the disappointments caused by those enthusiastic Representatives who have promised, in terms, great reductions in the retail prices of clothing, food, etc., to consumers, who will find no reduction as to many things and little reduction as to others, whereas great reductions all around are expected. "Great cry whereas great reductions all around are expected. "Great cry and little wool" will be the refrain from the consumers who and little wool" will be the refrain from the consumers who have taken as law and gospel these promises of great reduction in the cost of living. I heartily wish these rosy representations could and would materialize; but there is nothing that I can discover in the history of this country, or any other, that justifies the expectation that the enactment of this bill will greatly lessen the cost of living, unless it be at the expense of the returns for labor. Labor is the predominating factor of the returns for labor. Labor is the predominating factor of cost in almost every product, alongside of which the relatively infinitesimal protective tariff upon so-called raw material and a moderate tariff on conversion cost seem puny enough.

For be it remembered that heretofore the removal or reduction of tariff, while perhaps it lessened the cost to the manufacturer and increased the profits of the middleman, has not appreciably reduced the price of the commodity or fabric to the ultimate consumer, as witness the fact that we removed the duty on coffee years ago, and it has steadily increased in price since and is now higher in price than ever before, the differ-

ence in gold and paper currency considered.

Again: Note that boot and shoe manufacturers promised, Again: Note that boot and shoe manufacturers promised, four years ago, when asking for free hides, a reduction of prices and a better quality. A little later the promise of cheaper shoes was dropped and the promise of better shoes alone was relied upon. But no lower prices were made; no better quality furnished. Instead came an actual rise in prices

to the wearers of many kinds of footwear. During the past two months, since free wool and a lower tariff on cloths has seemed certain, various meetings of clothing men, in associations or otherwise, have been held and the foundation laid for the pronouncements from the ready-made clothing manufacturers and merchants that the public must expect very slight reductions, if any, because of the free wool and low woolens tariff; but it is intimated that better quality may be

This has cropped out at various times and places, but notably on Monday of this week in a speech of the distinguished Sena-

tor from New Jersey [Mr. MARTINE], who said:

I wish to state that quite recently I had a conversation with a member of the great clothing firm of this country known as the Stein-Bloch Co. In conversation with this gentleman as to the operation of the tariff he said to me, "I fear you will be mistaken in a very radical reduction in the cost of clothing. But," said he, "you will get infinitely better clothing than you do now. Our clothing of the day for the average mortal is very largely laid with shoddy. A free-wool clause will give the people better clothing; it will last longer, and in that way it will be cheaper."

History repeats itself. The shoe men provided in advance a soft place on which to fall; the clothing men are now doing the We shall have the same old retail price for clothing; the same old shoddy and adulterants (which the pending bill proposes admitting free) inserted in all the fabrics that yield readily to that treatment in the course of their manufacture.

Yes; history undoubtedly will repeat itself in this regard, for human nature and avarice is the same now as it was four

years ago and has been since.

THE FARMER

But, Mr. President, I promised to talk of the farmer, and shall now turn to him and his most important of all industries.

In his defensive speech of July 19 the chairman of the Finance Committee [Mr. SIMMONS] said, and with much emphasis:

No class of our people have reaped as little from the Republican tariff system and suffered as heavily from its exactions as the farmer.

Mr. President, that assertion is absolutely disproven by the statistics of agriculture in this country collected and published by the United States Census Bureau.

The chairman of the Finance Committee in making this statement evidenty desired to convey the idea or conviction that the

proposed new tariff measure will be an improvement over the present law. The farmer knows better than this.

That the exact contrary of Chairman Simmons's assertion is true is shown plainly by the table on page 265 of the Abstract of the Census of 1910, under the caption "Farms, farm land, and farm property of the United States," which, with the comments of the Census Bureau, I ask to have inserted in the RECORD.

The VICE PRESIDENT. If there is no objection, that will be done.

The matter referred to is as follows:

FARMS AND FARM PROPERTY-UNITED STATES, AS A WHOLE, 1910 AND 1900. The present chapter gives the principal data pertaining to farms and farm property, by States and geographic divisions, for 1910 and 1900, and by geographic divisions for each census from 1850 to 1910.

The following table summarizes, for the United States (excluding noncontiguous possessions), the principal facts with regard to farms and farm property for the years 1910 and 1900:

Farms, farm land, and farm property of the United States.

	1910	1900	Increase.1	
	(April 15)	(June 1)	Amount.	P. et.
Population	91,972,266	75, 994, 575	15,977,691	21.0

try, and bees	4,925,173,610	3,075,477,703	1,849,695,907	60. 1
erty per farm	\$6,444	\$3,563	\$2,881	80.9
farms	\$46.64	\$24.37	\$22.27	91.4
acre	\$32, 40	\$15.57	\$16, 83	108.1

¹ A minus sign (—) denotes decrease.

² Population of incorporated places having ,in 1910, 2,500 or more inhabitants. The figure for 1900 does not represent the urban population according to that census, but is the population in that year of the territory classified as urban in 1910.

² Total, exclusive of urban. (See Note 2.)

⁴ Change in area due to the drainage of lakes and swamps of Illinois and Indiana, building of the Roosevelt and Laguna reservoirs, and the formation of the Salton Sea in California.

"Change in area due to the dramage of lakes and swamps of Illinois and Indiana, building of the Roosevelt and Laguna reservoirs, and the formation of the Salton Sea in California.

There are in the United States 6,361,502 farms (a "farm" for census purposes is all the land which is directly farmed by one person managing and conducting agricultural operations, either by his own labor alone or with the assistance of members of his household or hired employees. The term "agricultural operations" is used as a general term referring to the work of growing crops, producing other agricultural products, and raising animals, fowls, and bees. A "farm" as thus defined may consist of a single tract of land or of a number of separate and distinct tracts, and these several tracts may be held under different tenures, as where one tract is owned by the farmer and another tract is hired by him. Further, when a landowner has one or more tenants, renters, croppers, or managers, the land operated by each is considered a "farm." In applying the foregoing definition of a "farm" for census purposes, enumerators were instructed to report as a "farm" any tract of 3 or more acres used for agricultural purposes, no matter what the value of the products raised upon the land or the amount of labor involved in operating the same in 1909. In addition, they were instructed to report in the same manner all tracts containing less than 3 acres which either produced at least \$250 worth of farm products in the year 1909, or on which the continuous services of at least one person were expended), containing a total of \$78,798,000 acres, of which 478,452,000 acres are improved. The land in farms ("land in farms") is divided at the present census into (1) improved land, (2) woodland, and (3) all other unimproved land. The same classification was followed in 1880. At former censuses, except that of 1880, farm land was divided into improved land. Improved land, woodland being included with unimproved land. Improved land, swamp land, and any other land w

the Census. There is evidence that the same kind of land has at certain times and places been reported as "improved land" and at other times and places as "unimproved land," rendering these classifications less accurate than the report of total farm acreage and value) represents somewhat less than one-half, 46.2 per cent, of the total land area of the country, while the improved land represents somewhat over one-half, 54.4 per cent, of the total acreage of land in farms. Improved land in farms thus represents almost exactly one-fourth, 25.1 per cent, of the total land area of the country. On the average the farms of the United States contain 138.1 acres, of which, on the average, over one-half, 75.2 acres, are improved land.

The total value of farm property reaches the enormous sum of \$40-901,000,000, of which over two-thirds represents the value of land, about one-sixth the value of buildings, and about another one-sixth the combined value of implements and machinery and of live stock. The average value of all farm property per farm reporting is \$6,444. The average value of all farm property per acre of land in farms is \$46.64, and the average value of the land itself per acre is \$32.40.

It is a significant fact that whereas the total population increased 21 per cent between 1900 and 1910, the urban population increased 34.8 per cent and the rural population only 11.2 per cent. The number and acreage of farms increased much less rapidly than the total population, but the growth in the number of farms nearly kept pace with the movement of the rural population, amounting to 10.9 per cent. The total farm acreage, on the other hand, increased only 4.8 per cent. This, however, is less significant than the increase in acreage of improved farm land, which amounted to 15.4 per cent, showing a greater percentage of increase than the number of farms or rural population but still falling appreciably behind the increase in total population but still falling appreciably behind the increase in total population but should

118.1 per cent, and this in turn was due largely to the advance in the price of land, the average value per acre being more than twice as high in 1910 as in 1900—\$32.40 as compared with \$15.57. There have been remarkable increases also in the value of farm buildings and equipment, the value of buildings having increased 77.8 per cent, that of implements and machinery 68.7 per cent, and that of live stock 60.1 per cent.

per cent.

Notwithstanding the decrease in the average size of farms, the value of all farm property per farm increased from \$3,563 in 1900 to \$6,444 in 1910, or 80.9 per cent.

Mr. WARREN. This résumé of our agricultural growth covers 10 years, 1900 to 1910, under the Dingley and Payne-Aldrich protective tariffs, and the result is a fair test of what the policy of protection has accomplished for agriculture.

It will be noticed that while the population of the entire

country increased 21 per cent in the 10-year period-

The value of farm property increased
The value of farm land increased
The value of farm buildings increased
The value of farm implements and machinery increased
The value of domestic animals increased
The value of domestic animals increased
The average value of all agricultural property, per farm, increased from \$3,563 to \$6,444, or
The average value of all agricultural property, per acre of land, in farms increased from \$24.37 to \$46.44, or
The average value of land, per acre, increased from \$15.57 to \$32.40, or 100 118 60 80

Again, in a table published on page 281 of the Census Abstract, giving the agricultural statistics by decades from 1850 to 1910, a remarkable growth in agricultural lines is shown from one 10-year period to each succeeding 10-year period, but the greatest percentage of such growth has taken place during the 1900-1910 period, with a protective tariff continuously in force.

I ask that the table mentioned be inserted in the RECORD.

The table referred to is as follows:

Farms, farm land, and farm property of the United States, 1850 to 1910,

1 100 1 100 1 100 1 100 1 100						1000

Mr. WARREN. As to mortgage indebtedness on farms the abstract shows, on page 295:

Total value of the 1,006,511 farms in the United States in 1910

in 1910 _____ \$6, 330, 000, 000 Amount of debt, only 27.3 per cent of the value, or ____ 1, 726, 000, 000

Percentage of debt to value in 1890 was 35.5 per cent. (No statistics of the mortgage indebtedness on farms were collected for the 1900 census.)

There was thus, during the 20 years, a marked diminution in the relative importance of mortgage debt. The average amount of mortgage indebtedness per farm increased from \$1,224 in 1890 to \$1,715 in 1910, but the average owner's equity per farm increased from \$2,220 to \$4,574, or more than doubled.

Thus, the average net ownership of the agriculturist, after deducting his mortgage indebtedness, was \$2,220 in 1890 and \$4,574 in 1910, showing that in that 20 years revised the

\$4,574 in 1910, showing that in that 20-year period the average farmer of the country more than doubled his possessions in the face of the four years of hard times coincident with the Wilson-Gorman tariff.

I commend to the chairman of the Finance Committee a careful reading of the agricultural statistics presented in the Abstract of the Thirteenth Census, on page 360, Table 1. It is there shown that the value of all crops, exclusive of forestry, and so forth, produced in the United States was-

In 1899---In 1909---\$2,998,704,412 5,487,161,223

An increase of 83 per cent in the 10 years.

And this, we are advised by the oracles of wisdom in charge of the tariff bill, was while the farmers suffered under a Republican protective tariff.

- \$89.46 - 59.66 - 523.00 - 863.00

The forestry products for 1909 aggregated \$5,487,161,223.

In the increased value of the cereal crops of the country during the last census period the showing is remarkable.

Bushels. 4, 438, 857, 013 4, 512, 564, 465 An increase of but 1.7 per cent, or ____

But the value of the cereals produced increased from \$1,482,-603,049 in 1899 to \$2,665,539,714 in 1909, an increase of \$1,182,-

936,665, or 79.8 per cent, in value.

Mr. President, these figures are of course offic	ial, having been

Mr. President, these figures are of course official, having been taken from the census, and they must be accepted as correct, notwithstanding any pronouncement to the contrary from any one of us, be he a Senator or a chairman of committee.

Mr. WALSH, Mr. President—
The VICE PRESIDENT. Does the Senator from Wyoming

yield to the Senator from Montana?

Mr. WARREN. I do.

Mr. WALSH. Before the Senator leaves those interesting

figures, I have been endeavoring to follow the course of his discussion. I understand the course of his argument to signify that the gratifying results to which he has invited our attention are as a matter of course to be attributed to the tariff.

Mr. WARREN. That is rather a broad statement.
Mr. WALSH. I thought so.
Mr. WARREN. I am answering an assertion made by the chairman of the Finance Committee that at no time had the farmer been as badly served, and, as he seemed to think, by the tariff, as during the last 10 years in consequence of and under a protective tariff.

Mr. WALSH. So I understand.

Mr. WARREN. I am showing, or endeavoring to show whether or not the farmers have been successful in those 10 I draw the conclusion myself that it has not all been due to the tariff, but nevertheless a protective tariff has been of substantial benefit to all farmers.

Mr. WALSH. I was interested in the figures simply because I used a great many of them a year or two ago when I delivered an address to the graduates of the agricultural college in my State, and I thought I had correctly attributed a great deal of this gratifying growth to the better style of farming which had been introduced into this country consequent on the enlightenment given by the agricultural colleges and the Department of Agriculture.

Mr. WARREN. Undoubtedly a measure of credit should go to both, but I beg my friend from Montana to understand that when we are running all the way over from 25 per cent to 125 per cent in growth of assets of the farmer in the 10-year period there is room sufficient to accredit much to agricultural colleges and the Agricultural Department and still recognize and give much credit to the protective tariff.

Mr. WALSH. If I do not interrupt the Senator, I will say further I noted particularly his reference to the increase in the production of cereals. I recall very distinctly inviting the attention of the students on that occasion to the experiments made by a distinguished professor of the State of Minnesota-the senior Senator from Minnesota will doubtless recall him-who conducted extensive experiments in the breeding of wheat, by which the production of wheat was largely increased. The selection of seed corn in the State of Iowa has proceeded until it is a real science, by which the production of corn has been immensely increased, increasing immeasurably the value of corn land in the State of Iowa and in the State of Illinois. I thought possibly the results might in a measure be attributed to that source.

Mr. WARREN. I think I ought, right here, to correct the Senator as to there being any great increase in the total volume or number of bushels of wheat and corn. As a matter of fact, the figures show that there has been a decrease in the quantity of corn raised, but the value is more-

Mr. WALSH. In the yield per acre?
Mr. WARREN. I have not quoted the yield per acre.
Mr. WALSH. That is what I was speaking of.
Mr. WARREN. Undoubtedly the Senator from Montana is

correct in that; but as to the total quantity and price per bushel. I recall the time when in the State of Nebraska and possibly in other States corn was used for fuel, and I recall with regret, too, that I have bought a great many thousands of bushels of corn for 8 and 10 cents a bushel, where I have had great pleasure since in paying 50 cents a bushel.

Mr. FLETCHER. Mr. President—
The VICE PRESIDENT. Does the Senator from Wyoming

yield to the Senator from Florida?

Mr. WARREN. If the Senator will just allow me a moment to explain the reason why I say I was in distress with the low price of corn and happy when prices were higher. It was be-cause the corn was used in producing meat product, and the country and the market were at the time in such condition that we could hardly get more than the transportation and cost of feeding for our meat product, even with the low price of corn. With the increase since in price of meat product, and without any increase but, instead, a reduction in transportation, commissions, and such charges, there has been ample reason why the farmers could get, and the feeders could afford to pay, the higher price of corn, and reason for our satisfaction

in feeding and paying the better prices.

Mr. WALSH. I, of course, am familiar with the history of it. It is my recollection that we had practically the same pro-

tective system at the time they were burning corn in Kansas.

Mr. WARREN. The Senator is partially incorrect in that.

yield to the Senator from Florida.

Mr. FLETCHER. I was merely going to suggest that I gathered from listening to the statistics furnished by the Senator that the whole trend of his discussion tended to show that the quantities had decreased.

Mr. WARREN. No.

Mr. FLETCHER, As to production. Mr. WARREN. The quantities have decreased so far only in

one product—that of corn.

Mr. FLETCHER. And as to the others I think the figures will show that the increase has not kept pace with the increase of population in the country, while the values as shown indicate a marked increase as to that feature. I ask the Senator whether he attributes the increase in value of these products to the tariff, or to what other cause?

Mr. WARREN. Mr. President, I am very glad to answer the question. The increase has been because the general business of the country, under an adequate protective tariff, has been so prosperous for a number of years that the number of men engaged in farming has not kept up in proportion with the number in other vocations, and the consequence is that what the farmer raises is naturally higher because of the scarcity proportionately of farmers and because of the increase in the

Mr. President, that is where my grief comes in. Our friends on the other side, honest, of course, in their contentions, when they undertake to reduce the cost of living, are, in my opinion, killing the goose that lays the golden eggs by making farming less attractive because less profitable; driving farmers out of business with their proposed free wool and free cattle; greatly reducing the number of animals that will conduce to the meat product, and hence increasing rather than decreasing the cost of living

Mr. FLETCHER. I will not interrupt the Senator further, but my recollection of the statistics is that since 1907 the population has increased 9,000,000 and there has been a decrease of 16,000,000 in the number of cattle in the country, a decrease of 22 per cent as to cattle, compared with the increase in population; and that has all occurred under the protective system.

Mr. WARREN. Mr. President, I have not at hand the figures for 1907 to which the Senator from Florida alludes, but I shall take the matter up at another time. At present I am dealing with 10-year periods, in order that I may base my remarks upon the official census reports, which all of us must accept as correct.

The agriculturists engaged in the sugar-beet and sugar-cane industries are satisfied with conditions relating to them under a protective-tariff policy, and have represented to the President and to Congress that the proposal to ultimately remove the protective duty on sugar will seriously cripple the sugar-beet industry and annihilate the sugar-cane industry in this country. That these representations are correct is the belief, it is safe to say, of a majority of the Members of the Senate; and it is equally safe to say that a majority of the Democratic majority of the Senate is doubtful of the wisdom of this free-trade policy in the treatment of the sugar industry of the country. It is noticeable that in his opening speech in defense of the pending bill, the chairman of the Finance Committee was mute as to Schedule E; and it is also noticeable that the majority report of the Finance Committee on the bill put forward as the most salient fact in reference to Schedule E that the duties now in force shall be extended up to and including the 28th day of February, 1914.

I assert, without fear of successful contradiction, that if the fiat of the White House prescribing free sugar were withdrawn there would be no difficulty in obtaining an amendment to the pending bill which, while it would in some degree reduce duties,

would eliminate the free-sugar proviso.

It is a matter of common knowledge and general comment in the press of the country that the condition of the farmers in recent years has improved to a greater degree than that of any other class of manual-labor workers, although it is true, to be sure, that his workday has been nearer 16 hours than 8 hours long, and that he has had all the extreme hard work incident to his calling. Under the protective system and consequent prosperity the farmer has been able, with strict and rugged economy, to send his sons and daughters to college; his home has been fitted up with modern conveniences, and he has enjoyed all of the modern means of transportation; the rural free postal delivery takes the mail and city papers to his door daily; the telephone has removed the isolation of farm life and has placed the farmer in close touch with the entire countryside.

The press of the country, recognizing the prosperity of the farmer, has humorously cartooned him as the modern aristocrat, surrounded by all the luxuries of present-day ingenuity. And yet we have not farmers enough, up to this date, nor farm produce enough to force down the cost of living, as we so much desire to do, or to furnish enough of many of the large agricultural products to supply domestic consumption—notably sugar, wool, and now beef and many minor products. While not long ago we exported meat products and wheat in great values, now it is a question whether we are not at the point of importation

rather than exportation.

BACK TO THE FARM.

"Back to the farm!" is the cry. Back to the farm, in order that congestion may be relieved in many quarters and also that a sufficient food supply may be grown for our own countrymen. But "Down with the farmer!" is practically the sentiment of the now dominant party, as read in this proposed tariff bill by farmers and hosts of others.

Cost of production shall not be considered or cared about, say

the Senators in charge of this measure.

Millions upon millions of acres of public domain and millions more in private ownership in this Republic are yet uncultivated, and if let alone, with the progress of the last few years under protection, the farmers would continue to increase in numbers and power of production, whereas they have no chance with the discouragement of being forced to produce crops at lower prices in competition with the world and its pauper labor, while paying full American wages. In competition with other industries upon which a tariff is levied—a tariff which, although termed a revenue tariff, is nevertheless a protective tariff in just so far as it increases the price of the foreign product to the consumer—the number of farmers and their power of production have no encouragement or reason to increase.

The success and prosperity of the farmer during the present protective-tariff period is due to the fact that his products have been protected by some portion, at least, of the rate of duty, while the protective policy applied to other industries has brought success to them, and there has thus been maintained a

steady, dependable home market in addition to any obtainable

foreign market.

Under the pending bill this policy of protecting the farmer and the manufacturer is to be abandoned. So far as the farmer is concerned the bill goes beyond even the Walker free-trade bill in that it places the so-called raw material of the farmer, the unmanufactured product, on the free list, where the Walker tariff imposed duties on the raw materials. It follows the lines of the Mills bill which Congress refused to pass and which formed the subject of the presidential campaign in 1888, resulting in the defeat of Mr. Cleveland and the election of Mr. Harrison.

Will consideration of this bill have an effect similar to that of

the Mills bill?

As the chairman of the Finance Committee admits, the pending bill places on the free list many of the products of the farm; in fact, all of the large, important ones, including those which we do not yet raise in sufficient quantities to provide for American consumption, such as sugar, wool, and now cattle. It places on the free list wheat, flour, cattle, sheep, swine, sugar, wool, eggs, potatoes, buckwheat and buckwheat flour, corn, flax and flax straw, hides, lard, meats, milk and cream, nuts, rye and rye flour, tallow, and so forth.

Other products of the farmer have been greatly reduced as

follows

Article.	Rate, tariff act 1909.	Rate, proposed bill.	Decrease.
Horses and mules	25 per cent 20 per cent	10 per cent	Per cent.
Barley	30 cents per bushel	15 cents per bushel	
Barley malt	45 cents per bushel	25 cents per bushel	
Oats	15 cents per bushel	6 cents per bushel	
Rice, cleaned	2 cents per pound	1 cent per pound	
Rice, uncleaned	11 cents per pound	# cent per pound	50
Butter	6 cents per pound	21 cents per pound	60
Cheese	do	do	60
Beans	45 cents per bushel	25 cents per bushel	4.5
Beets	25 per cent	5 per cent	80
Vegetables, natural state	do	15 per cent	40
Vegetables, prepared	40 per cent	25 per cent	371
Cidar	5 cents per gallon	2 cents per gallon	60
Hay		\$2 per ton	50
Honey	20 cents per gallon	10 cents per gallon	50
Onions	40 cents per bushel	20 cents per bushel	50
Peas	25 cents per bushel	10 cents per bushel	
Straw	\$1.50 per ton	50 cents per ton	
Cabbages	2 cents each	15 per cent	
Apples, peaches, quinces, plums, and pears.	25 cents per bushel	10 cents per bushel	1,100
Lemons	11 cents per pound	d cent per pound	66
Oranges, etc	1 cent per pound	do	50
Poultry, live	3 cents per pound	1 cent per pound	
Poultry, dead	5 cents per pound	2 cents per pound	
Flaxseed	25 cents per bushel	15 cents per bushel	
Vinegar	72 cents per gallon	4 cents per gallon	35

In brief, every product and by-product of the farm and ranch has either been placed on the free list or the duties on it have been reduced below any measure of possible protection and below any measure which would sustain competition with the foreign-produced article and still maintain prices of labor in this country as against foreign products raised by cheap foreign labor.

Every shred of protection under which the farmer has prospered is to be torn away, and from now on he will sell in practically a free-trade world's market and buy in a protected

market.

Cattle, sheep, wheat, meats, wool, and the product from sugar cane and sugar beets, forming the bulk of the farmers' productions, will come in free, and hay and other products at such low rates of duty as to afford no protection; and in return or justification for placing practically all of the productions of the farmer on the free list, the chairman of the Finance Committee pleads that certain articles used by the farmer have also been placed on the free list or the duties on them have been greatly reduced.

He leads off with cotton bagging and cotton ties, a wholly sectional concession, designed to aid but one class of farmers,

the growers of cotton.

Paragraph 416 of the free list provides for free entry of—bagging for cotton, gumy cloth, and similar fabrics suitable for covering cotton, composed of single yarns made of jute, jute butts, aloe, mill waste, cotton tares, or other material not bleached, dyed, colored, stained, painted, or printed, not exceeding 16 threads to the square inch, counting the warp and filling, and weighing not less than 15 ounces per square yard; plain woven fabrics of single jute yarns by whatever name known, not bleached, dyed, colored, stained, printed, or rendered noninflammable by any process, nor in any manner loaded so as to increase the weight per yard; waste of any of the above articles suitable for the manufacture of paper.

Bags or sacks for use in handling grain, wool, and so forth, used by farmers generally, are given a reduction of duty from seveneighths of a cent per square yard plus 15 per cent to 10 per cent.

Paragraph 290 of the bill provides that "bags or sacks made from plain woven fabrics of single jute yarns not dyed, colored, stained, painted, printed, or bleached," shall pay a duty of 10 per cent ad valorem.

The wool and grain raised in foreign markets come in free, in competition with the wool and grain raised by our farmers. The American farmer goes into a free-trade market with his product, but the sacks he buys in which to make his shipments carry 10 per cent duty. To be consistent and nonsectional, cotton bagging and cotton ties should carry 10 per cent duty or other bagging should come in free. Why free wool and grain, which the farmer must put in protective-tariff sacks for shipments, while cotton may have free sacks or covering?

THE PREE LIST.

Stress is laid on placing baling wire on the free list to aid the farmer. At present balling wire carries 35 per cent duty. Practically all of the balling wire used in this country is made here, the imports entered for consumption being inconsiderable. Consequently this "concession" to the farmer amounts to naught, 80,772 pounds only being imported, including all kinds of wire.

Plows, harrows, harvesters, reapers, drills and planters, mowers, horserakes, cultivators, thrashing machines, and cotton gins, now carrying a duty of 15 per cent ad valorem, are placed on the free list; but as we buy these but occasionally and consume them but slowly, and as we get practically none of these implements from other countries, but export many of them from this country, the concession in duty will not help the farmer in any great degree. The imports of these articles for the year ending June 30, 1912, amounted to only \$22,069.90 in value, bringing to the Government only \$3,310.50 in duties, while the exports amounted to \$35,640,005 in 1912.

Headers, wagons, and carts, and beet and sugar machinery also are placed on the free list; but under the present tariff law of 1909 these articles are now admitted free from any country which imposes no tax or duty on like articles imported into it from the United States. And as the imports for 1912 aggregated in value only \$67,664, it is evident that cutting off the duty will not help the farmer in that direction to any great

Sewing machines, now carrying a duty of 30 per cent, are placed on the free list; but we import very few such machines. Placing them on the free list will not help the farmer, as the market is held by American-made machines, the prices being controlled mainly by the status of the patents on them.

Harness, saddles, and saddlery, now paying a duty of 20 per cent, are placed on the free list. But with the exception of a few English hunting saddles, used by the aristocrats of the turf, the harness and saddlery used in this country are made here. In fact, we imported in value of goods but \$58,359 worth of harness, saddles, and saddlery in 1912, while in the same year the home production amounted to \$54,224,602—only one dollar's worth of foreign goods to a thousand dollars' worth of domestic; and we exported goods of this character to the extent of \$788,374—nearly fourteen times as much exported as imported. Therefore, while putting harness on the free list may injure the manufacturers in this country, it will not materially help the farmers.

The farmer is promised relief through removing the duty of 10 per cent on importations of boots and shoes and placing them on the free list. I earnestly hope the promised relief may materialize and that the price of boots and shoes may be lowered not only to the farmer but to all other classes.

DOES THE FREE LIST LOWER PRICES

When the Payne bill was pending a campaign for free hides was conducted by the manufacturers of boots and shoes, harness, and other leather products, and the promise was then made that with free raw material the consumer would be given cheaper boots and shoes, cheaper harness and saddlery, and so forth. Well, the 15 per cent tariff was removed and hides went on the free list; 15 per cent of the duty on boots and shoes and 25 per cent of the duty on harness, saddles, and saddlery was removed, and the day the law went into effect the importers put up the price of hides from abroad about 15 per cent. The Government lost about \$3,000,000 a year revenue; the foreign shippers of hides made that amount of additional profit; and boots and shoes, harness, and other manufactures of leather cost no less to the consumer under free hides than when the former rates of duty were imposed.

It is not likely that placing boots and shoes on the free list will materially help the farmer, but, in the opinion of boot and shoe manufacturers, this is what will be the result:

(1) An extreme reduction in the wages they are paying for

labor, which will reduce the employees to the condition of foreign labor:

(2) Closing the factories; or (3) Moving the plants abroad. (See p. 1807, briefs and statements filed with Senate Finance Committee.)

The chairman of the Finance Committee says that the farmer will be the beneficiary of putting textbooks on the free list, apparently overlooking the fact that the textbooks of the children of the farmer are published and printed in this country. Furthermore, the Payne tariff admitted free all books printed chiefly in languages other than English, while the Underwood-Simmons bill imposes a duty of 15 per cent. The Payne Act admitted free all books for educational institutions.

The benefits to be taken from the farmer by the pending bill are enormous; the benefits to be given him are inconsiderable and trifling.

The world is to be permitted to ship the great staples of commerce into the home market of the farmer without restriction, while he will be obliged to buy hundreds of articles of daily use on which duty remains.

Mr. President, practically speaking, the pending tariff bill might be termed a war measure, if not revolution. It is in its predicated effect tantamount to a declaration of war against the farmer, especially against the northern farmer, and more especially against the farmer of the Northwest.

According to the declaration of one of our great war leads, "War is hell." This has never been denied; is always admitted; and therefore I beg the liberty of saying that this bill is feared to be, indeed, hell, so far as the farmer of the Northwest is concerned. About everything he has to sell, the use of his capital and his labor, the product of both must, with but few exceptions, meet the competition of the world with its cheap pauper and peon labor, while everything he has to buy, barring certain occasional purchases, is taxed.

Whatever else may contribute to the building up of the country, agriculture must be the most valued, the most substantial, and altogether the most important basis. The farm is the very foundation upon which successful government must That country is poor indeed in which agriculture can not rest. flourish.

YIELD OF THE SOIL.

The products of the soil yield a greater income to this country than any other industry—nearly \$11,000,000.000 annually—and by protecting and fostering the farm industry through adequate protective tariffs, the same as afforded manufacture and trade, we can at one and the same time immensely enlarge our own product, prevent higher prices, and furnish meanwhile through import duties on the balances from foreign countries the most productive sources of revenue for defray-ing the expenses of the Government, as, for instance, sugar, bringing into the Treasury over fifty millions annually; raw wool, twenty millions; and wool manufactures about as much

The production of beet sugar has grown from 163,458,075 pounds in 1900 to 1,199,000,000 pounds in 1912, being more than sevenfold in volume in 12 years.

Beef, mutton, and wool have been large productions that have not only satisfactorily employed the farmers but have brought substantial revenues from such of the products as have been imported from other countries.

There has been more or less effort expended-"hot air." some would term it-in explaining that the farmer's tools used in his business are to be free; and while that is true as to a few of the items which he must occasionally buy, like a wagon or plow or harrow, they are inconsequential as compared with the real, all-round expenses of the farmer and the tremendous list of items which he must purchase, all of them under revenue duty.

TAXED ARTICLES FARMER MUST BUY.

The long list of articles which the farmer must purchase and which bear a duty is appalling, when it is remembered that all of his own chief products, heretofore protected, are to be made free. Nearly everything that he eats or drinks not raised on his own farm or in his garden is taxed. Nearly every utensil, all articles of furniture, plate, tableware, including table linen, and so forth, bear duties. Everything in manufactured cotton, linen, wool, and silk which he wears, uses on his table, about his bedroom, kitchen, or in general house furnishings; floor coverings-carpets, mattings, and so forth; all of the chemicals, medicines, drugs, needed for himself and family or for domestic animals, are taxed. Oils, paints, varnishes, glue, coal-tar products, and substances used for the preservation of buildings and are taxed.

fences; musical instruments, toilet articles, shoe blacking, pins, pens, pencils, ink, paper; flavoring extracts and coloring matter for the butter and cheese which he manufactures; his tobacco, pipes, cigars, cigarettes, spirits of all kinds, mineral waters, and so forth, are, of course, all taxed, the same as to those citizens who manufacture and sell only protected articles, while the farmer sells in a world-made, free-trade market.

The farmer must be more or less a jack-of-all-trades, and the carpentering tools, such as files, saws, planes, bits, augers, grindstones, and the like, are taxed; lime, brick, tile pipe for draining, every kind of iron pipe except cast iron, lead pipe, and all are taxed. His surveying instruments, field glasses, spectacles, fishing hooks and tackle, the same. Gypsum and other fertilizers, with which to improve the soil; buckets, bottles, and decanters; milk pans and pails, of either tin, stone, or earthenware; and whether he takes his coffee from a cup, or food from a plate, of china, granite ware, or tin, it is all the same—all taxed. The range upon which his food is cooked, as well as his heating stoves, all the same. The flatirons and all small tools used about the house—the same. Tin and iron for roofing or sidings of buildings; horse, ox, or mule shoes; bolts, nuts, and rivets; telephone and other wire, except barbed wire and certain baling wire; manure forks, shovels, scrapers, crowbars, paint brushes and calcimine brushes; chains, hay knives, and other farm and table knives; forks, spoons, hooks and eyes, needles for indoor and farm use; copper utensils of all kinds; extra pieces and repairs of every kind; casks, boxes, sacks, barrels, window blinds, building paper, brooms, matches, baskets, also rope, cord, cable, string—though it is true that some kinds of binding twine are to be free, but other kinds, for binding wool,

As for food not raised on the farm, the taxed items are too numerous to mention, and they include fish food, pineapples, bananas, nuts, spices, chocolate, and so forth.

But the farmer may smile and be temporarily happy when he discovers that the important items of asafetida, catgut, and balm of Gilead are to be free. These three items may go a long way toward contributing to his good health, amusement, and final salvation, but they cut little figure in the final equation, when everything he has to buy of the many thousands of items, except a paitry few, even to the gravestone that marks his final resting place, he must seek in a protected market, while what he has to sell, every crop or product of the larger denominations and most generally grown, must meet the competition of the world's market under free trade.

THE PIONEERS

Mr. President, the farmers, the live-stock men, and the miners have been great developing factors in our national life. They have been in the front rank, the pioneers who in the last generation, or a little more, have pushed the frontier of settlement in this country away across the plains and mountains—that hitherto almost unknown country—until there is no longer a frontier between settled and unsettled domains; until there is no longer between the Atlantic and Pacific Oceans a barrier of unsettled, unknown, and uninhabited (except by savages) country, as of yore. It has been the farmer who has pushed west from point to point all the way from the Alleghenies-the miner and the sheep and cattle growers in the lead, the forage and grain raisers next, and finally the sugar-beet grower, orchard and small-fruit grower, and the all-round intensive farmer and gardener.

NOT A MEMBER BUT A VICTIM OF TRUSTS.

The farmer is a member of no trust or combination. He is possessed of no "swollen fortune" or "predatory wealth." He stands alone, his back to the wall, battling not only against trusts, combinations, and trust products, but with the elements, wind, drought, and flood to protect and preserve his industry. Long hours, hard manual labor, epidemic and other diseases of human, animal, and vegetable life are his lot and risk. He deserves good and not ill treatment at the hands of this Congress and administration, and I plead with all the earnestness at my command for more liberal consideration of him than is at present proposed in the pending bill.

Mr. KENYON. Mr. President, I had intended to submit some suggestions on paragraph 145, which we are about to reach, but at this hour of the day I am in somewhat of a quandary as to whether to proceed. I will accommodate myself to the chairman of the committee. If he desires to go ahead with the bill at this time, well and good; or, if he prefers, I will go on to-

Mr. PENROSE. We are still on the car-wheel paragraph.
Mr. STONE. We have not yet reached the paragraph to
which the Senator from Iowa refers.
Mr. PENROSE. We have not yet reached it.

Mr. KENYON. Reached what? Mr. PENROSE. The aluminum paragraph.

Mr. KENYON. I understood we had.

Mr. STONE. No; that is the next paragraph.
Mr. KENYON. Mr. President, I will give notice, then, that to-morrow at the close of the morning business I will speak on that subject.

Mr. STONE. I beg the Senator to consider a moment that we are now right on the eve of taking up the aluminum paragraph. I think there is very little left to be said with reference

to the preceding paragraph.

Mr. KENYON. I desire to submit some remarks with reference to another amendment which I intend to propose. I have offered an amendment to place aluminum on the free list, and

Mr. STONE. Then will the Senator allow us to take up the

next paragraph?

Mr. KENYON. I simply want to give notice that to-morrow interat the close of the morning business, if no other business intervenes, I will speak on this subject.

Mr. STONE. If we get to that paragraph in the next few

minutes

Mr. KENYON I will ask to have it go over until to-morrow.
Mr. STONE. Oh, the Senator is not ready to proceed?
Mr. KENYON. I am ready to proceed; yes.
Mr. JAMES. Would the Senator prefer to go on this after-

noon or to wait until to-morrow?

Mr. KENYON. I think I would prefer to wait until tomorrow, if that is agreeable to the committee.

Mr. STONE. Well, let us go ahead with the bill.
The VICE PRESIDENT. The Chair understands that paragraph 145 goes over until to-morrow.

Mr. STONE. No; there has been nothing said about it. Let us go on with the bill.

The VICE PRESIDENT. The Secretary will state the pending amendment.

The Secretary. The Committee on Finance propose, in paragraph 144, page 42, line 7, to strike out "25" and insert "15"; and in the same line, after the words "ad valorem," to strike out "ingots, cogged ingots, blooms, or blanks for the same, without regard to the degree of manufacture, 10 per cent ad valorem," so as to make the paragraph read:

144. Wheels for railway purposes, or parts thereof, made of iron or steel, and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, or other railway tires or parts thereof, wholly or partly manufactured, 15 per cent ad vaiorem: Provided, That when wheels for railway purposes, or parts thereof, of iron or steel, are imported with iron or steel axles fitted in them, the wheels and axles together shall be dutiable at the same rate as is provided for the wheels when imported separately.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary proceeded to read paragraph 145, on page 42.

Mr. KENYON. Mr. President, I ask that that paragraph be passed over.

The VICE PRESIDENT. The Chair understands that under the agreement the paragraph will be passed over.

Mr. THOMAS. Does the Senator desire it to go over until to-morrow?

Mr. KENYON. I desire to submit some remarks on it tomorrow

Mr. THOMAS. But does the Senator want it to go over until to-morrow :

Mr. KENYON. Yes; I should like to have it go over until to-morrow.

Mr. THOMAS. Only to-morrow? Mr. KENYON. Yes.

Mr. SHERMAN. Mr. President, I desire to submit some additional remarks on paragraph 144. I did not care to submit them on the amendment. I did not conclude yesterday evening. It is immaterial to me just at what time I proceed. the rules that prevail in the Senate I can just as well take up the matter on dried fish or catgut as I can on any other subject. I prefer to have my remarks somewhat pertinent, or within reasonable gunshot of the paragraph, if I can.

Mr. JAMES. Is the Senator speaking to an amendment? Mr. SHERMAN. I am asking whether by unanimous consent

I can properly speak to paragraph 144 after it has been passed? Mr. PENROSE. Mr. President, when the Senate adjourned yesterday the Senator from Illinois had the floor, and it was understood that he should continue on paragraph 144.

Mr. THOMAS. Mr. President, I think the committee has no intention of endeavoring to prevent the Senator speaking on that paragraph.

Mr. PENROSE. No; I do not think so. I think we had better go back to paragraph 144.

Mr. THOMAS. The Senator was not here, and consequently we voted upon it.

Mr. JAMES. I am trying to find out whether the Senator wishes to offer an amendment. The committee amendment has

already been agreed to.

Mr. PENROSE. Inadvertently, the Senator from Illinois was not aware of the fact that the amendment had been disposed of.

Mr. SHERMAN. I tried to obtain recognition before the announcement was made; but it is immaterial, Mr. President, as I say. I wish to be heard on it at some time before the final vote is taken. I am not consumed with impatience.

Mr. PENROSE. I ask unanimous consent that we return to

paragraph 144.

The VICE PRESIDENT. Does the Chair understand that the vote by which the amendment was agreed to shall be set aside? Mr. JAMES. No, Mr. President. The amendment has already been agreed to.

The VICE PRESIDENT. Or does the Senator from Pennsylvania merely ask that we may return to the paragraph in order that the Senator from Illinois may complete his remarks?

Mr. PENROSE. The Senator from Illinois has a right to

speak on paragraph 144.

Mr. SHERMAN. I will withdraw my request for recognition

Mr. STONE. There is certainly no objection to the Senator

speaking, Mr. President.

Mr. SHERMAN. Very well. I desire to take it up in this order more particularly in view of the questions asked by the Senator from Nebraska [Mr. Norms]. There was some question in his mind about the production cost of steel tires abroad as compared with our own production cost in this country.

I endeavored to secure accurate information on that subject from some of the departments. Generally, it is available here. I called, and caused an investigation to be made at some length at the Bureau of Foreign and Domestic Commerce in the hope that I might secure tables on that subject. I have not been able to do so. I was told at that department that there were no available statistics on the subject; that in the investigation made by the Tariff Board they were unable to get the produc-tion cost from England or from other foreign countries on this article; that there were some difficulties encountered in the way of collecting the figures. I also called upon the persons having charge of the investigation of corporations some time ago, with the thought that some statistics might be available at that place. There were none.

So I have recourse only to some general facts which are available, the source of which, I think, is the London Board of Trade. I can find only the general wages paid to such workmen as blacksmiths, boiler makers, ironworkers, and machinists engaged in the manufacture of metal. The scale of wages of these related occupations, when collected, appears to be a fraction over 40 cents per hour in the United States and less than 21 cents per hour in the English and Scotch workshops. This would substantially bear out the general statement made yester-day that the labor cost stands in about the relation of 2 to 1. The cost of equipment and the cost of putting the product on the market are not more in those countries, and I would be safe in saying they are less, than the cost of putting a similar product on the market in the United States.

I repeat here that there is no open market in England, Scotland, Ireland, or any of the dependencies of Great Britain for the products of the United States of this character. All of them are excluded by positive regulations. Therefore, all of this product that might go to that country, if we had any

surplus to export, is barred. There is substantially the same condition in Germany. Germany maintains a high protective tariff. She does it avowedly for the purpose of giving her producers the domestic market.

Mr. THOMAS. Mr. President—

The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from Colorado?

Mr. SHERMAN. I do.
Mr. THOMAS. I wish to inquire of the Senator the basis of his statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that there is a prohibitive tariff duty upon the statement that the statemen importation of these commodities in Great Britain. I understood the Senator to say that Great Britain had placed a prohibitive duty upon their importation into Great Britain or any of its colonies

Mr. SHERMAN. Yes.

Mr. THOMAS. I merely wish to ask the Senator for the sources of his information in that respect.

Mr. SHERMAN. The information was obtained from the shipping departments of three of the principal factories turning

out this product. The Senator will not find it in the budget or the revenue law of Parliament.

Mr. THOMAS. No; and I am unable to get from the Departments of Commerce and Labor information upon the subject that is confirmatory of the Senator's statement.

Mr. SHERMAN. I made a somewhat exhaustive search in the first instance to find it there, and it is not there; nor will it be found in any of Great Britain's revenue laws relating to that subject. There are a great many chapters; but in their budget, made up annually by the House of Commons, it will not be found.

Mr. SIMMONS. Do I understand the Senator to say that there is some law or regulation of Great Britain prohibiting the importation of these tires? I have here the trade report of Great Britain up to the year 1913, embracing the year 1912. According to that report, in 1912 there were imported into Great Britain, of foreign and colonial merchandise, tires and axles to the value of £40,970.

Mr. SHERMAN. What year was that?

Mr. SIMMONS. Nineteen hundred and twelve. The importations for 1908 were £21,000. I will not call off the odd figures. In 1909 they were £51,000; in 1910 they were £40,000; in 1911, £38,000; in 1912, £40,970.

Mr. PENROSE. Mr. President, will the Senator permit me to make a suggestion at this point?

to make a suggestion at this point?

Mr. SHERMAN. Yes.

Mr. PENROSE. That very frequently occurs, and those figures are most misleading. The importations might have been for reshipment to South America or to some oriental country. There is no evidence from the figures there that the tires were used in Great Britain, and they could not be so used under her compulsory law.

Mr. SIMMONS. Has the Senator that law?

Mr. PENROSE. I have references to the law. I have not the law itself. There is no question about the law, however.
Mr. SIMMONS. I think there is, from inquiries I have made.

Mr. PENROSE. The Senator can not successfully question

Mr. SIMMONS. This is the report of imports of foreign and

colonial merchandise into the British Empire.

Mr. PENROSE. There is certainly no significance in those figures unless the proof accompanies them that the articles were used in the United Kingdom; and they can not be so used.

Mr. SIMMONS. Can the Senator tell us where we can find that law? I find these figures in a British trade document, an official document published by the British Government. That explanation, unless there is some authority for it, would not seem to be altogether convincing.

Mr. SHERMAN. The inquiry is certainly a proper one. I was struck with the fact myself. The explanation lies in what the Senator from Pennsylvania said. It is very evident, from the course of trade, that certain of these products-I think a small proportion, however-may have passed through the United Kingdom and have been entered in their customhouses for reexport to some of the European or Asiatic countries. By turning not only to the existing law, but to the language of this bill, it will be found-

Mr. SIMMONS. But the Senator said yesterday that Great Britain was a great exporter, and that she was dumping this product upon Mexico and Canada. If Great Britain is a great exporter of this product, why is she importing it for the purpose of exporting it again?

Mr. SHERMAN. I will get to that in a minute. There is a difference between a stoppage in transit to a foreign country and a shipment out of this country that does not stop in transit. That sometimes happens.

Mr. SIMMONS. Does the Senator think that if this product were simply stopping there in transit it would be recorded in official documents as an importation?

Mr. SHERMAN. It goes through in bond, as we sometimes export through Canada, or Canada through this country.

Mr. SIMMONS. What is the Senator's authority for making that statement in the face of these official figures?

Mr. SHERMAN. I will go along further in a moment. I will read the language of the bill, which will explain the greater part of it, as well as the language of the existing and

preceding laws covering the subject.

The language of the bill is as follows:

144. Wheels for railway purposes, or parts thercof, made of iron or steel, and steel-tired wheels for railway purposes, whether wholly or partly finished, and iron or steel locomotive, car, or other railway tires or parts thereof, wholly or partly manufactured.

Some of these are street car wheels. Quite a large part of the output of certain of the plants in this country is used exclusively for street cars, or tram cars as they are called. Some of

those are not subject to the prohibition. Tires for the steam roads of foreign countries are the ones to which this pro-hibition was originally applied. I think that explains it in Nevertheless, if we consider the entire export that is given for the years referred to, it is not very important.

The exports for 1909-I will give them now in turn, taking them in their chronological order-were 54,944 tons, valued at

Mr. SIMMONS. Where were the exports from? Mr. SHERMAN. From the United States. Mr. SIMMONS. Oh, from the United States?

Mr. SHERMAN. Yes; of a value of \$439,356. I will explain that these figures are taken from the report of the Bureau of Foreign and Domestic Commerce for these years. For 1910 the export was 50,689 in number and \$410,291 in value. In 1911 it was 46,891 in number and \$367,453 in value. Our exports for 1912 are given in the figures the Senator quoted, and are the same that I have here.

The exports for 1912 were to the countries I will name. I think it is significant, in view of where these exports go, to keep in mind the condition of the tariff laws that bar us in our entry into that market, as well as this regulation of the English

Government.

I started awhile ago, when interrupted, to make the statement that Germany not only avowedly maintains a high protective tariff but she likewise

Mr. SIMMONS. Will the Senator tell us what is the German tariff?

Mr. SHERMAN. I do not know. I have not it here. Has the Senator the information there?

Mr. SIMMONS. Yes; I have it here.

Mr. SHERMAN. On this article the German tariff is-I am quoting from memory

Mr. SIMMONS. I have it here. It is 271 cents a hundred

Mr. SHERMAN. I was about to say 30 cents in round num-

Mr. SIMMONS. It is 27½ cents a hundred pounds, which, at the rate of 3 cents a pound, is equal to 9 per cent, or less than the rate fixed in this bill.

Mr. SHERMAN. 27½ per cent ad valorem?
Mr. SIMMONS. Oh, no; 27½ cents a hundred pounds, which is equivalent, upon the basis of 3 cents a pound, to 9 per cent ad valorem. In other words, the German tariff instead of being a high protective tariff, as the Senator contends, is only about one-half the rate that we retain in this bill.

Mr. SHERMAN. The rate in Germany of 27% cents a hundred pounds is enough to make it extremely difficult to export if there were no other obstacle. As a matter of fact, every exporter from this country finds another impediment in his way. That is where I have not completed my statement. If I had, probably the Senator would have taken the two things together and then would have seen the bearing of the matter, as I am sure he will now.

The German railroads are nationalized. The purchasers of railway trucks, wheels, and other equipment of that kind always represent a Government purchasing agency. When the exporters from this country submit their bids, as they have found by experience, they must not only compete with this tariff, which of itself apparently is not an insuperable obstacle, but they must meet the impossibility of selling to the German Gov-

I wanted to couple that with the statement that the German tariff, with the other element, is impossible of avoidance.

does not permit any competition in this product.

Mr. SIMMONS. I wish to ask the Senator from Illinois, however, if he agrees with the Senator from Pennsylvania [Mr. Penrose]? On yesterday the Senator from Pennsylvania said that these tires were selling for about 4 cents a pound, I think.

Mr. SHERMAN. No; a maximum of 3½ cents, he said.

Mr. SIMMONS. Four cents in Europe.
Mr. PENROSE. Four cents in Europe and 3½ cents in this country.

Mr. SIMMONS. Yes. I desire to know if the Senator from Illinois agrees with the Senator from Pennsylvania?

Mr. SHERMAN. I do.

Mr. SIMMONS. The Senator agrees that they are selling higher there than they are here, then?

Mr. SHERMAN. I do; and that the maximum price here is about 34 cents.

Mr. SIMMONS. And in that condition of things, with this product selling higher in England and in Germany than here, with a German tariff of one-half what our tariff here is, the Senator insists that we would not be upon a basis of reasonable competition with those countries?

Mr. SHERMAN. Yes; I anticipated that argument, and I have heard it a great many times. I have heard the same argument used against the shipping departments of these factories.

Here is the condition we meet: England, with its prohibitive regulations; Germany, with its nationalized railroads, buying our product, if at all, only through a Government purchasing agent. As a matter of fact, they absolutely refuse to buy the American product at any price in the German market. In purchasing railway equipment of this kind they do pay 4 cents a pound on the market for the German product rather than pay 31 cents for the American product; so that we are absolutely barred from that market.

The conditions in both of those countries are such that we can not sell there our product that we sell at home for 31 cents a pound, even if we were to take it there and pay the freight and meet the criticism after we came back with our product sold that we were selling cheaper abroad than we were here, because we had to pay the freight.

Mr. SIMMONS. I was calculating a little while ago upon a 3-cent basis. Upon a 4-cent basis the German ad valorem is only 7 per cent. I understand the Senator to say that with this product selling at only 31 cents here, in Germany, with a tariff of only 7 per cent, they will not buy from us, although they may be able to get it from us at a less price than it sells for on e German market? Why does the Senator say that? Mr. SHERMAN. Just because the German citizen is a good

deal better than a tariff reformer in this country; that is the

Mr. SIMMONS. As a matter of patriotism? Mr. SHERMAN. He would a good deal rather buy in his own country, and have the iron and the price of it there, to use an old expression, than to buy at some other place and have only the iron, and lose the money. That is the reason. German Government and the German people buy their material there from choice.

Mr. SIMMONS. The Senator on yesterday said that we could not get into the German market because of their high tariff. To-day, when we come here and show the Senator that the German tariff is only one-third of the rate we have inserted in this bill, he says the Germans will not buy our product under those circumstances. Then, would the German buy it if it had no duty at all?

Mr. SHERMAN. I have seen a good many men that did not get all of the statement before they started in to refute it.

That is the difficulty now. I have just gotten to the point where I have said that they maintain a high tariff avowedly for the purpose of excluding us, and before I had proceeded further to explain the nationalization of the roads and the method of purchase, I was cut off. I have both statements on my notes here, and I intended to make them together.

Mr. SIMMONS. Then I should like to ask the Senator another question. If he regards a German tariff of 7 per cent as a high tariff, why does he insist that the American rate fixed in

this bill, 15 per cent, is a low tariff?

Mr. SHERMAN. If the project of a certain gentleman was carried out and our roads here were all nationalized like those in Mexico, with the exception of the Mexican Southern road, having 51 per cent of the stock and guaranteeing a billion and a half of bonds-if we were in that condition here, so that the United States Government bought nothing but American tires, we would be in a condition where the 7 per cent that the Senator talks about would be something to be considered if a foreigner were buying tires to ship into this market.

Mr. SIMMONS. Did I understand the Senator to say Ger-

many, or Mexico, or Canada a little while ago?

Mr. SHERMAN. They have nationalized their railroads. Mr. SIMMONS. Has Canada nationalized her railroads? Mr. SHERMAN. I do not know.

Mr. SIMMONS. Has Mexico nationalized her railroads?

Mr. SHERMAN. She has,

Mr. SIMMONS. Then I have misunderstood the Senator. Mr. SHERMAN. But if the German railroads are nationalized and the purchasing department refuses to buy an American product, that, coupled with the rate of tariff the Senator has

quoted, makes it an impossibility for us to enter that market. Mr. SIMMONS. Then I should like to ask the Senator if because of the nationalizing of their railroads over there they will not buy these tires from other countries what is the necessity of putting a tariff on them at all? If they have a prohibition against buying them because their railroads are nationalized

Mr. SHERMAN. You will have to ask the Germans. not know. We impose our duty as a defense against the unfavorable conditions abroad.

Mr. SIMMONS. The Senator does not contend that the railroads of England are nationalized, does he?

Mr. SHERMAN. I do not know.
Mr. SIMMONS. I will tell him that they are not nationalized. If that argument applies to Germany, where the railroads are nationalized, and if that is the reason the Germans will not buy it does not apply to England, because the railroads of England are not nationalized. They are privately owned.

Mr. SHERMAN. They have a positive prohibition in an act of Parliament. When our exporters try to reach that market they are turned out. They find when they attempt to get through the customhouse in England that it is of no use to go They will not meet a single sale. I have the sales here during those years and they show what has become of our trade.

Mr. THOMAS. Mr. President

Mr. SHERMAN. I yield to the Senator. Mr. THOMAS. I find from the Report of Commerce and Navigation of the United States for 1912 these figures with reference to the exportation of these articles from this country to the United Kingdom. In 1912, \$8,468 worth to England, and to Scotland \$3,890 worth. In 1911 to England \$12,486 worth, and in 1910 to England \$8,010 worth. So the last statement of the Senator from Illinois seems to be a little too broad.

Mr. SHERMAN. I have those same figures taken out of the report. I call attention, in connection with those quotations, to the fact that in 1909, a year further back than the Senator went, and which he has there, our total exports amounted to \$439,356. In 1910 they were reduced to \$410,291; in 1911 to \$367,453; in 1912 to \$327,285. The figures show a constantly diranishing export in those products. They are not all steel tires, it is true. They are not separated in the customhouse. It includes not alone the center of the wheels. That might go over. I do not think many of them will be exported. I think they are only of chilled iron in this country. But it includes either the tire or the tire and wheel welded together.

Mr. THOMAS. But does the Senator notice that there is a diminution of imports to this country; but the rate of diminu-

tion is much greater?

Mr. SHERMAN, I have likewise the exports from other countries, which would be our imports here. Our imports for the year ending June 30, 1912, are in quantity by pounds 1,341.363, of the value of \$34,725, the duties levied amounting to \$16,767. Those are the imports for one year. I have not the figures up to the 30th day of June, 1913, but for the first three-quarters of the present fiscal year of 1913 the imports amount to 1,400,416 pounds, slightly in excess of the totals of last year, with a total value of \$36,043 and with a duty of \$17,505.

I take these figures for the purpose of showing that of late years our exports have diminished and our imports have not increased There is very little increase. Possibly there was some increase in 1913 over that of 1912, if the last quarter is in, but it remains about the same.

Our total manufactures in this country, added to our imports of these articles, aggregate for 1912 a little over \$18,000,000. If, however, the exports be deducted, it shows that the greater part of the products made in this country is used here. other words, of \$18,000,000 worth of steel tire and steel-tire railway wheels for steam roads, for street cars, and for other purposes we are, in substance, using the greater part of it in this country without exporting abroad.

Then the question comes up-

Mr. SIMMONS rose.

Mr. SHERMAN. Pardon me just a minute, and I will yield. I want to finish the statement for obvious reasons. tion comes up, if we sell at a maximum price in this country of 31 cents a pound, while they are selling in England and continental Europe at 4 cents a pound, why there is any danger in this rate if it is higher in the European countries. Our principal competitors are England and Germany. They are the ones against which these provisions were originally framed.

Mr. SIMMONS. Right there, if the Senator will pardon me, as I understand the Senator's position it is that although the tires are selling at 4 cents a pound in Germany and in England and at 3½ cents a pound here, if we make this reduction in our tariff, retaining a duty of only 15 per cent, England and Germany will dump their surplus upon this country and swamp the manufacturers of this country.

Now, the Senator thinks that is a reasonable statement to make, in view of the fact that this product is worth half a cent a pound more in England and in Germany than it is here, and that before it can enter this market place it must pay 15 per cent duty under this bill?

Mr. SHERMAN. Yes, sir.

Mr. SIMMONS. Yet the Senator is afraid of dumping from Europe.

Mr. SHERMAN. That— Mr. SIMMONS. I want to follow that up a little. The Senator therefore thinks that England is producing a very large surplus of this product, and that she is dumping it upon such countries of the world as she can find an opportunity to place

I want to give him from this official document-the British Foreign Trade—the amount of the total exportations last year from Great Britain, so that he may see that Great Britain is consuming nearly all that she produces of this product. Our exportations last year were about \$400,000. This document informs us that in 1912 the total exportation of this producttires and axles-from Great Britain was £502.591, or about \$2,500,000. That is the total export from Great Britain. It is to be assumed that that was all the surplus that Great Britain produced last year. Where did it go? The Senator from Pennsylvania says that a part of it was dumped upon

Mr. SHERMAN. I will come to that shortly in the course

of my remarks. I have it here.

Mr. SIMMONS. I have here all the countries to which the £502,000 of this product was exported last year, and I will read where it went. Some of it went to Portuguese East Africa, some to Spain, Egypt, France, China, Japan-the United States got 178 tons of it-to Chile, Brazil, the Argentine Republic, Cape of Good Hope, Natal, British India, Australia, New Zealand, and other British possessions. Mexico is not mentioned.

Mr. THOMAS. And, if the Senator will permit me, I will say right here that our exportation to Mexico was nearly \$114,000

worth greater, I believe, than that of Great Britain.

Mr. SIMMONS. It does not appear that England exported any to Mexico. It does not appear that there was any dumping last year in any part of this continent.

Mr. SHERMAN. I will take one at a time, Mr. President. never was able to talk double-barreled. Our export trade to Mexico in this product has fallen off. By looking at the exports from the border you will find a decrease. It is not very large, but it has fallen off.

Mr. THOMAS. That is due to the disturbed political condi-

tion.

Mr. SHERMAN. It is about \$113,000 in value, I think, for the fiscal year 1912. For 1913 I have not footed up for the

three quarters.

Take the English export, to which the Senator from North Carolina alluded. Here are the exports to foreign countries of our total product. To Germany last year we sold nothing. Look at the export trade and you will find nothing in quantity and nothing in value. We sold nothing to England save 1.287 in number of the value of \$8,468. This is practically a negligible quantity. Eight thousand four hundred dollars or \$8,500 worth out of a total of \$18,000,000 worth of domestic production is such a small proportion that we had as well consider that our English trade does not merit serious attention. They separate the affairs of the two countries. We sold to Scotland a total of \$3,890 worth in 1912. To Ireland we sold nothing. So, taking the combined trade of England, Scotland, and Ireland, we sold a total of less than \$13,000 worth out of a total production in this country of more than \$18,000,000. To Canada we sold \$36,000 worth in 1912. To Japan we sold \$9,080 worth To China we sold nothing. Not a pound of any railway equipment of this character went to China in the year 1912, and it is safe to say that nothing will go to China. Dollar diplomacy may be discredited, but dollar diplomacy have been vindicated in the sale of railway iron, railway trucks, and railway equipment if the six nations that were in the course of negotiations for the financial and industrial development of that Empire had been permitted to compete in their undertaking with the United States as a factor. But in place of dollar diplomacy and the sale of our productions in the Far East we have grape-juice diplomacy in this country and the sale of nothing. That is modern statesmanship as applied to the Orient and elsewhere.

Take steel tires and the related industries in this country. Steel tires alone, to say nothing of the related industries, have run up into hundreds of millions of dollars. The steel tire and wheel industry alone has an invested capital in the States of Colorado, Missouri, Illinois, New York, and Michigan of more than \$25,000,000, and in that \$25,000,000 there is not a dollar of water. It is boiled down, and that applies to every dollar's worth of stock in the steel tire and railway business from Mount Vernon, Ill., clear through to Michigan, and from St. Louis clear to New York. There is not a dollar of watered stock

in railway or wheel tires in all the business, whether the wheels

be sent out in one form or the other.

Now, with the \$25,000,000 invested, which represents an actual investment without a dollar of water, which has on its pay roll 12,000, more than three-fourths of whom are the highest form of skilled labor there is in this country, by this reduction of 64 per cent we lose what little trade we have abroad; and it means not only that the small pitttance which remains, as shown by these reports, will be lost but that worse will happen. This 15 per cent ad valorem duty that is in effect a 64 per cent reduction means that the American market is thrown open to France, Germany, Belgium, and England to come in with these products.

If anyone should have any scruple about voting for 11 cents on this finally, it can be removed by showing that in 1890 the McKinley rate was 24 cents a pound on these products. Wilson Act of 1894 imposed a duty of 11 cents a pound. Dingley Act of 1897 retained the rate of 11 cents a pound, and the Payne-Aldrich bill of 1909 kept the same rate that the McKinley Act put on in 1890, that the Wilson Act kept in 1894, that the Dingley Act kept in 1897. There is no increase along the line in all these years, no change in all these years, until we come to the year 1913, when a 64 per cent reduction is put

on the single product.

The freight rate is not a sufficient protection. Let me urge on the question of freight rates, that on articles that are bulky and not in advanced stage of manufacture freight often is a sufficient protection. The mere distance of itself, as was well argued here one day, in regard to other products, is enough to equalize the difference in cost of production or in giving us

the advantage of our home market.

The steel tires, especially if they are shipped without being shrunk or welded on the railway wheel, are of themselves not bulky. They can be shipped so that comparatively the freight charge is small; but where it is produced in England and Germany, with labor that equalizes about two to one, the advantage becomes apparent to the foreign producer on this

64 per cent reduction.

I took some figures of related industries from the British Board of Trade. There are no statistics here in the department. Some of the gentlemen were out who are interested in this phase of the controversy. I asked the Bureau of Foreign and Domestic Commerce to give me the rate of wages and the production cost of wheels and steel tires in England and Ger-They do not have any figures and gave me the information that it was very hard to obtain any authentic statistics on that subject from foreign countries. They were somewhat averse apparently to giving it up; but the Tariff Commission encountered the same difficulty when they undertook to get the wages from abroad. I called up the department that had the investigation on for corporations some time ago and they had no information on the subject. So I took the report of the British Board of Trade, the last figures of which, I think, are for 1907.

The figures are only of the related industries. They do not segregate the different classes of workmen-the boiler makers, the machinists, the blacksmiths, and the general term "iron-

I find in this country, if you take all of them together, when we add them and take an average, we get over 40 cents an hour here for a 10-hour day, reducing it correspondingly if the number of hours is shorter. In other words, the pay is per hour instead of per day. In England in these related industries they do not segregate the steel-tire and the wheel manufacturers or workmen in such a way as to make a separate estimate. The compensation for the like lines of work, the blacksmiths, the machinists, the boiler makers, and the ironworkers, in which latter clause would be embraced those engaged in the manufacture of the product in question, obtain about 21 cents, or nearly a ratio of 2 to 1 in favor of the rate of wages paid per hour in this country. The equipment, the machinery, the building, the charges in the construction of the building, are lower correspondingly in those countries. As a result, the general cost of production must necessarily be less in the foreign country. The freight charge is of a kind, I think, that would not afford a sufficient protection here in view of this 64 per cent reduction.

Mr. NORRIS. Mr. President-

The VICE PRESIDENT Does the Senator from Illinois yield to the Senator from Nebraska?

Mr. SHERMAN. Yes, sir.

Mr. NORRIS. If the figures just given by the Senator from Illinois are correct, how does he account for the fact that this product is selling for half a cent a pound less in this country than it is in Europe?

Mr. SHERMAN. Yes, sir; I will get to that. That was the question which was very properly asked by the Senator from North Carolina [Mr. SIMMONS]. In Germany the quoted price will show that it ranges about 4 cents a pound. In England it sells at 4 cents a pound. The average price of the product at the plant in the United States, as well as in the domestic market here, is 3½ cents a pound. I was making a statement of conditions.

Mr. NORRIS. I do not want to interrupt the Senator until he has finished his statement; but when he concludes I want to ask him another question.

Mr. SHERMAN. I yield to the Senator. Mr. NORRIS. I want to ask the Senator if his figures are correct, showing that the wages are higher here but that the finished product is sold at a less price per pound, does it not follow that the labor or the machinery, or both, here must be much more efficient than they are in Europe? That must be true, or the manufacturers in Europe are making a much larger profit than those in this country are making. In addition to all that must be added the difference in freight, if they come over here to compete. That would amount to something, although, as the Senator said, it might not be a very large item.

Mr. SHERMAN. The 4 cents a pound in the countries mentioned is largely in England the price at which it is sold from the plant to the railway companies or the street car companies. They sell at that price in that country, although their production cost may be less. I do not know what contributes to sustain that selling price in England.

Mr. PENROSE. Will the Senator from Illinois permit me to interrupt him?

Mr. SHERMAN. Yes, sir. Mr. PENROSE. I think the question raised by the Senator from Nebraska [Mr. Norris] brings up the whole dumping proposition. These prices are maintained in England and in Germany, but every year they have a surplus of this product, which is dumped on the rest of the world and sold at a lower price than it is sold for to the domestic consumer there.

Mr. NORRIS. But, Mr. President, if that be true, it seems to me the figures given here must certainly be erroneous. statistics, as they have been produced here during the debate, show that there has been very little of this particular product sold in the United States and in Mexico. On the other hand, we have sold some in Canada, in Mexico, and even in England and in Scotland. I can not see from these figures where the dumping process has been going on.

Mr. SIMMONS. Mr. President—
The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from North Carolina?

Mr. SHERMAN. I do. Mr. SIMMONS. If the Senator will permit me, I think I can enlighten the Senator about the facts a little bit more than has been done. The entire amount of exportation of this article, as I said a while ago, from England last year was in value 502,000 pounds sterling; the quantity exported in that year was 25,606 tons. I have just had that calculated, and I find that the average price at which these English exports were sold last year was 4.2 cents a pound, or two-tenths of a cent higher than the Senator says it is selling for in the English market. So there was no dumping in that.

Mr. NORRIS. Mr. President, if the Senator will permit me, the quantity almost demonstrates that there is no dumping.

Mr. SIMMONS. It does demonstrate it. Mr. NORRIS. They have not sold enough of it to amount to

anything; it is so small in quantity.

Mr. SHERMAN. Mr. President, the price abroad in the countries named is the usual selling price quoted from the trade journals. The current trade journals for 1911, 1912, and 1913 are my authority. They export and the same authorities state that they sell at a lower price the surplus stock they have on hand at the end of the year than they do for the domestic consumption in either England or Germany, following the idea that they must clean up whatever they have for that year.

Mr. NORRIS. I presume that is true of the manufacturers Perhaps that accounts for our exportation of in all countries. some of our products to England, to Scotland, and to Canada. I presume our manufacturers were also cleaning out at the end of the year and selling their surplus.

Mr. SHERMAN. I wish here, in connection with that same subject, to state that the uniform maximum price of 3½ cents in this country is maintained only when we have the whole \$18,000,000 worth of our domestic market intact.

Our export trade of this merchandise is comparatively small. It does not aggregate out of the over \$18,000,000 in any one year, as I remember, over half a million dollars. If this surplus, that comes in from abroad, that remains after the domestic consumption has been satisfied, comes in at that reduced rate, it breaks the domestic consumption in this country to the home manufactured article. In that event, the plants now manufacturing the article can not maintain their present prices. It is only by having a market that we can do that.

Mr. NORRIS. Is it not true that the exportations from all

countries are small as compared with the amount of the prod-

ucts manufactured in the respective countries?

Mr. SHERMAN. I do not think so.

Mr. NORRIS. I think, as I remember the figures given, that there is not any country that exports a very large amount as compared with the amount that is produced in the country. As I recall the figures given in the case of Great Britain, they were something over a million dollars in value, or \$2,000,000, I believe it was.

Mr. SIMMONS. Two and a half million dollars.
Mr. NORRIS. But those exports were divided up over the entire world. Several of England's dependencies got a portion of them. So the amount exported to any one country as compared with the amount produced was very small-almost an insignificant quantity.

Mr. SHERMAN. In connection with the figures quoted as the

export price from England of 4.2 cents, it is not stated whether that is the price leaving England or the price at the point to

which exported. That would make some difference.

In 1912 the distribution of plants manufacturing this article in Europe was as follows: Belgium contains 3 plants, but their exports are comparatively small. France contains 3, but neither of those countries is much of a competitor of ours for the domestic market. Germany contains 8 plants, and England contains 10. The trade journals report that they manufactured more for this year and last year than the domestic consumption in either country. That surplus constitutes what they export They export it abroad and sell it for what they can abroad. They have already made their profit in the domestic market in their own country. If sometimes in this country, as the Senator suggested, an article is sent abroad and sold cheaper than it is here, on investigation it is invariably discovered that it is what is left over. It is the dump of our domestic market taken abroad to clean up for that year. The next year's model of machine, whatever it may be, will contain some improve-ments, so the old is gotten out of stock before they start in on the new manufacture.

Mr. NORRIS. Mr. President, will the Senator allow me?

Mr. SHERMAN. Yes, sir.

Mr. NORRIS. Right on that point, I want to make an inquiry of the Senator. I think what he has said is true of all countries in the civilized world, for it seems to be a law of business; but does he think that we can meet that contingency by raising the tariff so high as to meet all such exigencies? Would it not be better by some general law to provide against the dumping process? I understand the Senator from Pennsylvania [Mr. Penrose], in order to remedy that very situation, has to-day proposed an amendment to the pending bill. If we undertook to remedy that difficulty by placing the tariff on all articles of manufacture high enough to shut them out, we would need a tariff higher, I think, than the Senator from Illinois would support.

Mr. SHERMAN. I should like to ask the Senator from Nebraska if he considers excessive the rate of 11 cents in the McKinley tariff law of 1890 or the rate in the Wilson Act of

Mr. NORRIS. Well, I do not know enough about the product to be advised in that regard, but I should think, taking into consideration all the subsequent tariffs which cut down the McKinley rate, that the McKinley rate was too high. Now, let me ask the Senator right along that line, assuming when the Wilson bill and the Dingley bill were enacted, both of which had the same rate on this product, that that rate was right, would it not follow, as a general proposition-there might be exceptions to it, and this might be one—that after the lapse of these years we could stand a reasonable reduction in that

Mr. SHERMAN. Not at all. Mr. NORRIS. Has it not been the general rule that tariffs enacted 10, 15, or 25 years ago would be higher than would be

necessary now to give proper protection?

Mr. SHERMAN. No, sir. Precedent does not possess any particular virtue in tariff schedules. Every schedule is to be made in view of existing conditions. In view of the conditions now in our market and the surplus abroad, I am contending that a 64 per cent reduction will result in very great injury to this line of industrial effort in this country.

Mr. NORRIS. Without disputing the Senator's statement in that regard—of course, that is a reduction, and, even if we

concede that there should be some reduction, whether it is too great or not is entirely another question-but, following up the suggestion I made to the Senator, that usually when tariffs are revised, the tariff is reduced, has not that been true of all tariff bills? Take the McKinley tariff. It imposed a high duty on this particular product, which was cut down by the Wilson bill in a Democratic Congress, and, then, in the Republican Congress which followed, after they investigated it, they found. I presume it is safe to say, that the Wilson rate of a great many years ago was a protective rate and was sufficiently high. That was done when the Payne bill was enacted; and they, at least, found that it was not necessary to increase the rate. Take the average rates in the different tariff bills, and from a protective standpoint I think history will show that on the average they have all been reduced in the general run of tariff revisions, even along protective lines.

Mr. OLIVER. Will the Senator allow me?
The VICE PRESIDENT. Does the Senator from Illinois yield to the Senator from Pennsylvania?

Mr. SHERMAN. Certainly.

Mr. OLIVER. Mr. President, there is one phase of this dumping matter that has not been alluded to in the course of the present debate, and that is that continental countries particularly encourage their manufacturers to sell to their own people higher than they sell to foreign countries. They encourage the formation of syndicates and trusts to maintain high prices amongst their own people and, to keep their factories and establishments running full, send their surplus out to other countries at lower prices than they charge to themselves.

Mr. SHERMAN. My contention is that the reduction of 64 per cent is excessive. If the Senator from Nebraska is not satisfied with a rate of 11 cents a pound, he might suggest an ad valorem duty of 30 or 35 per cent, which would be at least some degree better than the reduction to 15 per cent ad valorem. The equivalent of the old rate of 14 cents a pound on this product is 48 per cent and a fraction. This rate was fixed at 25 per cent in the House and cut to 15 per cent by the Senate At some place between these extremes, possibly, committee. some Senators who are not willing to support the old rates of 1894, 1897, and 1909 may find some middle ground. I want here to make a claim for as adequate a degree of protection against the surplus product from abroad as may be pos-

The VICE PRESIDENT. The Secretary will continue the

reading of the bill.

Mr. GALLINGER. Mr. President, I have had such poor success in securing the adoption of the amendments I have offered that I do not propose to offer one to paragraph 145.

Mr. PENROSE. That goes over.
Mr. THOMAS. That has been passed until to-morrow.

Mr. GALLINGER. I call the attention of Senators having charge of that paragraph to the fact that the proper designa-tion for this product should be "aluminium" and not "alumi-I think, perhaps, when they look in the dictionary they will conclude to make an amendment to the bill.

Mr. THOMAS. I think the Senator will find that the two words are used interchangeably in all the standard dictionaries. Mr. GALLINGER. I think the Senator is wrong on that

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 146, page 42, line 22, after the word "metal," to paragraph 146, page 42, line 22, after the most strike out "antimony ore, stibnite, and matte containing antistrike out "antimony ore, stibnite, and matte containing antimony but not containing more than 10 per cent of lead," to read:

146. Antimony, as regulus or metal, 10 per cent ad valorem.

Mr. SMOOT. Mr. President, I notice in paragraph 4041 that "antimony ore, stibnite, and matte containing antimony, only as to the antimony content," are placed upon the free list. I believe that the words "antimony matte" and "antimony regulus" are one and the same thing; they are synonymous words, and if the committee intended to place a duty on antimony as regulus they are going to cause a conflict at the ports of entry.

The same question arose in relation to copper. It was decided in a case that was tried that copper regulus and copper matte were one and the same thing and the words were synony-The division that has been made here, putting matte upon the free list and regulus upon the dutiable list, will surely

lead to trouble if it is allowed to remain in this way.

Mr. THOMAS. I will state for the Senator's information that we will look into that matter between now and the time we reach the free list. Of course, however, the Senator is familiar with the fact that the same classification appears in the present law, which provides one rate of duty for regulus or metal and another rate of duty for matte.

Mr. SMOOT. Yes, Mr. President; but the question did not arise under the present law, because they were all dutiable.

Mr. THOMAS. But on different bases, at different amounts, one being 1½ cents per pound and the other 1 cent per pound.

Mr. SMOOT. But one was in the ore and the other was after it had been put in regulus form.

Mr. THOMAS. No; matte could not be ore. If it were, it would not be synonymous with regulus.

Mr. SMOOT. No, Mr. President; I say, here it is matte from the ore. It is not made into the regulus; that is, I mean, into the pure antimony, or the pure copper, or the pure lead.

Mr. THOMAS. The Senator's criticism is perhaps well

founded. As I say, by the time we reach the free list we can dispose of it, and perhaps can come to an agreement. I do not know as to that.

Mr. SMOOT. I simply wished to call the attention of the Senator to the matter now.

Mr. THOMAS. I am obliged to the Senator, of course. The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 146, page 42, line 24, after the words "ad valorem," to strike out all down to the end of line 18, page 43, as follows:

to strike out all down to the end of line 18, page 43, as follows: Provided, That on all importations of antimony-bearing ores and matte containing antimony the duties shall be estimated at the port of entry, and a bond given in double the amount of such estimated duties for the transportation of the ores by common carriers bonded for the transportation of appraised or unappraised merchandise to properly equipped sampling or smelting establishments, whether designated as bonded warehouses or otherwise. On the arrival of the ores at such establishments, they shall be sampled according to commercial methods under the supervision of Government officers, who shall be stationed at such establishments, and who shall submit the samples thus obtained to a Government assayer, designated by the Secretary of the Treasury, who shall make a proper assay of the sample and report the result to the proper customs officers, and the import entry shall be liquidated thereon, except in case of ores that shall be removed to a bonded warehouse to be refined for exportation as provided by law, and the Secretary of the Treasury is authorized to make all necessary regulations to enforce the provisions of this paragraph.

And on line 19, page 43, after the word "antimony," to strike

And on line 19, page 43, after the word "antimony," to strike out the comma, so as to make the paragraph read:

146. Antimony, as regulus or metal, 10 per cent ad valorem; antimony oxide, salts, and compounds of, 25 per cent ad valorem.

Mr. SMOOT. Mr. President, I have another matter to suggest in relation to that paragraph, but I will wait until we reach the free list and then bring up both questions at the same time

The VICE PRESIDENT. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The reading of the bill was resumed.

The reading of the on the Committee on Finance was, in paragraph 148, page 43, line 24, before the word "bronze," to insert "8 cents per pound"; and in line 25, after the word "leaf," to strike out "25 per cent ad valorem" and insert "4 cents per 100 leaves," so as to make the paragraph read:

148. Bronze powder, brocades, flitters, and metallics, 8 cents per pound; bronze, or Dutch-metal or aluminum, in leaf, 4 cents per 100 leaves.

The amendment was agreed to.

The next amendment was, in paragraph 149, page 44, line 1, after the word "copper," to strike out the comma; and in line 2, after the word "rods," to insert "strips," so as to make the paragraph read:

149. Copper in rolled plates, called braziers' copper, sheets, rods, strips, pipes, and copper bottoms, sheathing or yellow metal of which copper is the component material of chief value, and not composed wholly or in part of iron ungalvanized, 5 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment was, in paragraph 152, page 44, line 12, after the word "lahn," to strike out "30" and insert "25," so as to make the paragraph read:

152. Tinsel wire, lame or lahn, made wholly or in chief value of gold, silver, or other metal, 10 per cent ad valorem; bullions and metal threads, made wholly or in chief value of tinsel wire, lame or lahn, 25 per cent ad valorem; fabrics, ribbons, beltings, toys, or other articles, made wholly or in chief value of tinsel wire, lame or lahn, or of tinsel wire, lame or lahn, and india rubber, bullions, or metal threads, not specially provided for in this section, 40 per cent ad valorem. valorem.

The amendment was agreed to.
Mr. OLIVER. Mr. President, at the request of the senior
Senator from Massachusetts [Mr. Lodge], who is absent, I
should like to have paragraphs 153, 163, and 169 passed over until his return, which will be either to-morrow or Monday.

The VICE PRESIDENT. Without objection, those paragraphs will be passed over.

Mr. SUTHERLAND. I will ask that paragraphs 154 and 155 go over until to-morrow morning. I desire to say a few words in regard to them. I intend to be very brief about it, but I prefer not to take up the matter to-night.

Mr. THOMAS. We have no objection.

The VICE PRESIDENT. Paragraphs 154 and 155 will be passed over until to-morrow.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 158, page 46, line 15, after the word "metallic," to insert "not specially provided for in this section," so as to make the paragraph read:

158. Pens, metallic, not specially provided for in this section, 8 cents per gross; with nib and barrel in one piece, 12 cents per gross.

The amendment was agreed to.

The next amendment was, in paragraph 159, page 46, line 22, after the words "ad valorem," to insert "Provided, That pens and penholders shall be assessed for duty separately," so as to make the paragraph read:

159. Penholder tips, penholders and parts thereof, gold pens, fountain pens, and stylographic pens; combination penholders, comprising penholder, pencil, rubber eraser, automatic stamp, or other attachment, 25 per cent ad valorem: Provided, That pens and penholders shall be assessed for duty separately.

The amendment was agreed to.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 164, page 48, line 13, before the words "per cent," to strike out "10" and insert "12½"; and, in the same line, after the words "ad valorem," to insert:

after the words "ad valorem," to insert:

Provided, That on all importations of zinc-bearing ores the duties shall be estimated at the port of entry, and a bond given in double the amount of such estimated duties for the transportation of the ores by common carriers bonded for the transportation of appraised or unappraised merchandise to properly equipped sampling or smeltering establishments, whether designated as bonded warehouses or otherwise. On the arrival of the ores at such establishments they shall be sampled according to commercial methods under the supervision of Government officers, who shall be stationed at such establishments, and who shall submit the samples thus obtained to a Government assayer, designated by the Secretary of the Treasury, who shall make a proper assay of the sample and report the result to the proper custom officers, and the import entries shall be liquidated thereon, except in case of ores that shall be removed to a bonded warehouse to be refined for exportation as provided by law. And the Secretary of the Treasury is authorized to make all necessary regulations to enforce the provisions of this paragraph. this paragraph.

So as to make the paragraph read:

So as to make the paragraph read:

164. Zinc-bearing ores of all kinds, including calamine, 12½ per cent ad valorem: Provided, That on all importations of zinc-bearing ores the duties shall be estimated at the port of entry, and a bond given in double the amount of such estimated duties for the transportation of the ores by common carriers bonded for the transportation of appraised or unappraised merchandise to properly equipped sampling or smeltering establishments, whether designated as bonded warehouses or otherwise. On the arrival of the ores at such establishments they shall be sampled according to commercial methods under the supervision of Government officers, who shall be stationed at such establishments, and who shall submit the samples thus obtained to a Government assayer, designated by the Secretary of the Treasury, who shall make a proper assay of the sample and report the result to the proper custom officers, and the import entries shall be liquidated thereon, except in case of ores that shall be removed to a bonded warehouse to be refined for exportation as provided by law. And the Secretary of the Treasury is authorized to make all necessary regulations to enforce the provisions of this paragraph.

Mr. OLIVER. Mr. President, I will ask the members of the

Mr. OLIVER. Mr. President, I will ask the members of the committee whether they are quite sure about the word "smeltering" in line 19, page 48, and whether it should not be "smelting"? It seems to me rather uncommon.

Mr. THOMAS. Oh, yes; that should be "smelting." seems to be a clerical error.

Mr. PENROSE. I suggest that the correction be left to the Democratic caucus.

Mr. THOMAS. We will accept the suggestion.
Mr. STONE. I move, Mr. President, that the word "smeltering," in line 19, page 48, be stricken out, and the word "smelting" substituted.
The VICE PRESIDENT. The amendment to the amendment

will be stated.

The Secretary. In the committee amendment, on line 19, page 48, it is proposed to strike out "smeltering" and insert "smelting."

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 165, page 49, line 9, after the word "remanufactured," to strike out "10" and insert "15," so as to make the paragraph read:

165. Zinc in blocks, pigs, or sheets, and zinc dust; and old and worn-out zinc fit only to be remanufactured, 15 per cent ad valorem.

The amendment was agreed to.

The next amendment was, in paragraph 166, page 49, line 11, after the word "caps," to insert "of metal," so as to make the

paragraph read:

166. Bottle caps of metal, collapsible tubes, and sprinkler tops, if not decorated, colored, waxed, lacquered, enameled, lithographed, electroplated, or embossed in color, 30 per cent ad valorem; if decorated, colored, waxed, lacquered, enameled, lithographed, electroplated, or embossed in color, 40 per cent ad valorem.

The amendment was agreed to.

The reading of the bill was resumed, and the Secretary read

to the end of paragraph 168, page 49.

Mr. STONE. Mr. President, that finishes this schedule, except for several paragraphs which have been passed over. eral of them were passed with the understanding that they would be taken up and disposed of to-morrow. It is now nearly 6 o'clock; and if the Senator from Georgia wishes to make a motion, I will yield for that purpose.

EXECUTIVE SESSION.

Mr. BACON. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 15 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 10 minutes p. m.) the Senate adjourned until to-morrow, Friday, August 8, 1913, at 12 o'clock meridian.

NOMINATIONS.

Executive nominations received by the Senate August 7, 1913. ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY.

Madison R. Smith, of Missouri, to be envoy extraordinary and minister plenipotentiary of the United States of America to Haiti, vice Henry W. Furniss, resigned.

COLLECTOR OF CUSTOMS.

David C. Barrow, jr., of Georgia, to be collector of customs for the district of Georgia, in place of William R. Leaken, whose term of office expired by limitation August 5, 1913.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 7, 1913. COLLECTORS OF INTERNAL REVENUE.

James Coffey to be collector of internal revenue for the district of North and South Dakota.

Duncan C. Heyward to be collector of internal revenue for

the District of South Carolina.

Josiah W. Bailey to be collector of internal revenue for the fourth district of North Carolina.

SENATE.

Friday, August 8, 1913.

The Chaplain, Rev. Forrest J. Prettyman, D. D., offered the

following prayer:

Almighty God, we come to Thee this morning in the midst of a great sorrow that has fallen upon our national life. One whom Thou didst honor, calling him to places of power and authority, who was honored by his fellow citizens of a great State, called to be their leader in public affairs, this hero of the past, this great true man, has passed on to the great

We remember with reverence and with deepest affection the lives of the worthy fathers whose characters were forged in the furnace of the conflicts of the past, who came out of the furnace unsoiled and stood for the highest, the truest, and the best. As these fathers pass on to the beyond, give to us the

inheritance of their character and the inspiration of their ex-

We pray that Thou wilt sanctify unto us the bereavement of this hour, teaching us the uncertainties of life, giving to us the real concern for the highest ideals of life, as we gather these inspirations out of the characters of the men whom Thou dost call into leadership in this great country.

Guide us, we pray Thee, in all our ways. Help us to follow the path of duty and honor until at last we, too, shall be gathered to our fathers. For Christ's sake. Amen.

The Secretary proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. Smoot and by unanimous consent, the further reading was dispensed with and the Journal was approved.

DEATH OF SENATOR JOSEPH FORNEY JOHNSTON.

Mr. OVERMAN. Mr. President, in the absence of the surviving Senator from Alabama it becomes my sad and painful duty to announce the death of Senator Johnston. The end that |

comes to us all found him this morning at 8.30 o'clock in his apartment house in this city, surrounded by his stricken wife, his devoted son, and loving friends.

A prince among men, a gallant Confederate soldier, an able governor, a great Senator, a true patriot, a faithful and loyal friend has passed from this world of strife and bitterness and has crossed over the river, to rest under the shade of the trees in a better land of peace, happiness, and eternal rest.

I would ask the Senate that a public funeral in the Senate Chamber be observed, but his family desire that his funeral

shall be of the simplest character.

The Senator from Alabama [Mr. BANKHEAD] at a future time will ask the Senate to set apart a day that fitting tribute may be paid to his memory and his long and faithful services.

I offer the resolutions which I send to the desk.

The VICE PRESIDENT. The Secretary will read the resolutions submitted by the Senator from North Carolina.

The resolutions (S. Res. 158) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with deep regret and profound sorrow of the death of the Hon. Joseph Forner Johnston, late a Senator from the State of Alabama.

Resolved, That a committee of 17 Senators be appointed by the Vice President to take order for superintending the funeral of Mr. Johnston.

Resolved, That as a further mark of respect his remains be removed from his late home in this city to Birmingham, Ala., for burial, in charge of the Sergeant at Arms, attended by the committee, who shall have full power to carry these resolutions into effect.

Resolved, That the Secretary communicate these proceedings to the House of Representatives.

The VICE PRESIDENT appointed, under the second resolution, Mr. Bankhead, Mr. Bacon, Mr. Overman, Mr. Chamber-LAIN, Mr. HITCHCOCK, Mr. CLARKE Of Arkansas, Mr. VARDAMAN, Mr. Johnson, Mr. Swanson, Mr. Smith of South Carolina, Mr. Thornton, Mr. Gallinger, Mr. Waeren, Mr. Bristow, Mr. CATRON, Mr. BRADY, and Mr. KENYON as the committee on the part of the Senate.

Mr. OVERMAN. Mr. President, I move, as a further mark of respect to the memory of the deceased Senator, that the Sen-

ate do now adjourn.

The motion was unanimously agreed to; and (at 12 o'clock and 7 minutes p. m.) the Senate adjourned until to-morrow, Saturday, August 9, 1913, at 12 o'clock meridian.

HOUSE OF REPRESENTATIVES.

FRIDAY, August 8, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

Father in heaven, let Thy blessing descend copiously upon us, that our minds may be clarified and our hearts strengthened for whatever tasks may be laid upon us. Loving mercy, doing justly, walking humbly with Thee, for if we are with Thee who can be against us? Reputation may suffer by the traducer, but if the character points to the pole, in spite of wind and tide reputation will right itself and we shall sail on and in due season reach that fair haven for which we all long under the guiding hand of the Great Captain of our salvation. Amen.

The Journal of the proceedings of Tuesday, August 5, 1913,

was read and approved.

RESIGNATION FROM LOBBY INVESTIGATION COMMITTEE.

The SPEAKER. The Chair lays before the House the following letter, which the Clerk will read.

The Clerk read as follows:

AUGUST 8, 1913.

Hon. Champ Clark, Speaker House of Representatives, Washington, D. C.

MY DEAR MR. SPEAKER: I regret very much that serious illness and the imperative orders of my physician make it necessary for me to resign from the lobby investigation committee. It is with deep regret that I tender my resignation, to take effect at once.

Yours, very sincerely,

Without objection, the resignation is ac-The SPEAKER. cepted, and the Chair appoints the gentleman from Oklahoma [Mr. Ferris] in lieu of Mr. Roddenbery.

There was no objection.

BUST OF WILLIAM PITT, LORD CHATHAM (S. DOC. NO. 150).

The SPEAKER. The Chair lays before the House a letter from the President, transmitting a letter from Lady Paget, which the Clerk will read.

The Clerk read as follows:

AUGUST 4, 1913.

Hon. CHAMP CLARK, The Speaker.

MY DEAR MR. SPEAKER: I take pleasure in transmitting herewith a copy of a letter recently received from Lady Paget, speaking for a

number of American ladies now living in England, in which they express the desire to join in presenting to the United States, in connection with the approaching Anglo-American Peace Centenary, a bust of William Pitt, Lord Chatham, the friend and champion of America, to be placed in the White House. I venture to suggest that inasmuch as the gift must be received through me as President, but can not be accepted without the permission of Congress, the Houses graciously grant that permission. that permission. Cordially and sincerely, yours, WOODROW WILSON.

The SPEAKER. The Clerk will also read the letter from Lady Paget.

The Clerk read as follows:

The Clerk read as follows:

35 Belgrave Square, S. W.,
London, England, July 1, 1913.

Mr. President: It is the desire of American women married and resident in England to take some slight part in the coming celebration in connection with the Anglo-American Peace Centenary, and I have suggested the presentation to the United States of a bust of William Pitt, Lord Chatham—that great Englishman, so preeminently the friend of America—to be placed in the White House.

I understand from our mutual friend, Mr. House, that this presentation would have to be made through the President, who would consult Congress as to whether it would be acceptable to the American Nation, and that this would, of course, have to be ascertained before proceeding further. It is desired very strongly to emphasize the fact that this offering would have absolutely no political significance—that it is entirely a matter of sentiment—a wish on the part of American women here to express their unchanging love of their native land, though zeparated from it by marriage.

If you, Mr. President, would have the kindness to give us your help and sympathy, and would bring the matter before Congress as early as possible, we feel sure our wishes could be carried into effect; and we would owe you a deep and lasting debt of gratitude.

With the earnest hope that what we ask is not impossible, I remain, Mr. President,
Yours, very trult,

Minnie Pager (Lady Pager).

Mr. President, Yours, very truly,

MINNIE PAGET (LADY PAGET).

The SPEAKER. Both of these letters are ordered printed and referred to the Committee on Foreign Affairs.

Mr. MANN. Well, Mr. Speaker, do not they go to the Com-

mittee on the Library?

The SPEAKER. The Chair was somewhat puzzled to know which one to send it to. The Chair is rather inclined to think they ought to go to the Committee on the Library.

Mr. MANN. That would be following the precedents. The SPEAKER. The Chair had a notion of sending it there once, but then it seemed to him it was a foreign matter. The reference will be changed to the Committee on the Library.

CURRENCY BILL.

Mr. McKENZIE. Mr. Speaker, I ask unanimous consent to extend my remarks in the Record by having published a review of the proposed currency bill by James B. Forgan, president of the First National Bank of Chicago.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks by printing a letter from

Mr. James B. Forgan.

Mr. MURDOCK. Mr. Speaker, reserving the right to object, I desire to ask the gentleman from Illinois if this is one of the documents which has been published as a Senate document on the currency proposition?

Mr. McKENZIE. Not to my knowledge, I do not think so. Mr. MURDOCK, Well, has it been published anywhere or is it an original manuscript?

Mr. McKENZIE. Not as a public document. Mr. MURDOCK. It has been published, though—it has been

Mr. McKENZIE. Well, Mr. Forgan had it printed, I believe. The SPEAKER. Is there objection?

Mr. WINGO. Mr. Speaker, reserving the right to object, I

did not understand what the article was.

Mr. McKENZIE. It is a review of the proposed Glass-Owen currency bill, written by James B. Forgan, president of the First National Bank of Chicago,

Mr. WINGO. Where does the article come from? Has it been published in some magazine?

Mr. McKENZIE. No; it is a private publication.

Mr. WINGO. A private letter?
Mr. McKENZIE. It is published in pamphlet form by Mr. Forgan himself, I understand.

Mr. WINGO. Mr. Speaker, I object.
The SPEAKER. The gentleman objects.
Mr. McKENZIE. Mr. Speaker, I am sorry the gentleman

objects.

The SPEAKER. The Chair knows, but the gentleman has an inherent right to object.

EXTENSION OF REMARKS.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent to extend my remarks by inserting in the Record a short article nonpolitical, moral in character, written by my colleague, Congressman Weaver, from Oklahoma, making about a page of typewritten matter-

The SPEAKER. The gentleman from Oklahoma asks unanimous consent to print in the RECORD a letter by his colleague; Mr. Weaver, on a nonpolitical, moral subject. Is there objection?

Mr. BORLAND. Mr. Speaker, reserving the right to object, I wish to say that there has been a good deal of comment recently in regard to putting in the Record articles not written by Members of Congress and not having any bearing on the matters under discussion; in other words, making the RECORD something that it was not intended to be. I do not intend to object to this particular article. The principal reason for my not doing so is because it is an intellectual product of a Member of this House and presumably bears upon public questions and ought to be made a matter of public record. Therefore I do not intend to object to it. But it does seem to me the time has come to object to the insertion of newspaper editorials, magazine articles, and all that sort of thing, that some Member might happen to think ought to be published at public expense and circulated in his locality.

Mr. MURDOCK. Mr. Speaker, how far is the gentleman going with that? He mentions magazine articles. How about pamphlets?

Mr. BORLAND. I include them. I think articles not written by any Member of Congress nor by any member of the administration, but by private citizens, and which have the full latitude of publication as a private document, ought not to be printed as a public document unless they appear as a bona fide part of a Member's debate on the floor of this House. I think there is a very close line-

Mr. MURDOCK. It would make the Congressional Record a more interesting publication.

Mr. BORLAND: There is no question of that. been printing many things that ought not to be in the RECORD. I will not say that I am not to blame in that direction, but I will not do it any more. At one time I printed a speech by a distinguished western man, president of the Trans-Mississippi Commercial Congress, at an annual gathering of that congress. I do not think that was a right thing to do, although it probably was not a serious breach of the rules. I will not attempt to sit here for the purpose of objecting, but if I am here I am going to object to foreign matter being inserted in the Record that has no connection with the business being transacted on the floor.

Mr. MURDOCK. Will the gentleman yield? Mr. BORLAND. Yes.

Mr. MURDOCK. The trouble with the gentleman's resolution is this, that unless one Member takes it upon himself to do this the exclusion will not be accomplished all the time, with the result that some Members will have the favor and others will not. If the gentleman is going to take upon himself that thing, he ought to be here all the time.

Mr. BORLAND. If the "gentleman from Missouri" undertook that, he would make himself the guardian of the House, which he does not intend to do. It is not any more his privilege than the privilege of other Members. But I think the sentiment ought to be inculcated which will lead to the objection being made when that sort of thing is attempted, and I intend to do my part toward that general sentiment.

Mr. STAFFORD. Does not the gentleman think it would be better if the Committee on Printing should bring in a resolu-

tion to apply to all these cases?

Mr. BORLAND. I do not think that would cover it. This is a request for unanimous consent, and if it be given it does not matter what the article is, because it goes in. So I think it is a matter more of sentiment, more of public opinion, among all the Members of the House than it is a matter of any fixed rule. It is a question of building up an opinion that will discourage the insertion of foreign matter in the RECORD. So, withdrawing my objection for the present, I am going to object to foreign matter being put in the Record hereafter. The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I have heard the speech the gentleman from Missouri [Mr. Borland] has now made at least three or four times a year ever since I have been a Member of the House; not made by him, perhaps, before. But two years ago it was made by my friend from Kansas [Mr. MURDOCK], not then the leader of a party. Now that he is such a leader he will feel the responsibility of protecting the men who are with him in the party. You can not prevent the publica-tion in the Record of many of these articles. You can adopt rules, but they will not be followed out. One side of the House can protect itself against encroachments of the other side of the House when it comes to unanimous consent.

The gentleman from Arkansas [Mr. Wingo], as he had the right to, without any explanation objected to the insertion of an article which was offered by my colleague from Illinois [Mr. McKenzie] in relation to a matter now pending, of great importance, and where the views of men from the outside are much needed on the inside of the Chamber. The gentleman has the right to object. I am not criticizing him at all. But it can not be that Democratic Members of the House shall have the right to insert articles in the Record constantly, relating to banking and currency or other subjects, but that Republican Members or Progressive Members can not do so. While I shall not object to the request of the gentleman from Oklahoma [Mr. Ferris], yet if it is to be the policy of the other side of the House, or of any Member of it, to object to the requests from this side of the House for leave to extend, I shall be here sufficiently often to carry out the proposition for a time, for a time only.

Mr. BORLAND. Mr. Speaker, will the gentleman yield? The SPEAKER. Does the gentleman from Illinois yield to the gentleman from Missouri?

Mr. MANN. Certainly. Mr. BORLAND. I know that the gentleman from Illinois is not in sympathy with the idea of putting too much foreign matter in the RECORD.

Mr. MANN. I would keep it all out if possible, but it is not

possible.

Mr. BORLAND. Therefore the gentleman thinks it is not worth while to have any opinion or sentiment in the House on the subject?

No; I think it is very well worth while to have Mr. MANN. an opinion and sentiment on the subject; but I notice that the sentiment changes as gentlemen want to put their matters in

Mr. BORLAND. That is hardly the case here.

Mr. MANN. The gentleman and I agree, and the gentleman from Kansas [Mr. Murdock] and I agreed two years ago; but still the practice continues.

Mr. GARDNER. Mr. Speaker, will the gentleman yield? Mr. BORLAND. I do; but I have not the floor.

Mr. GARDNER. I thought the gentleman reserved the right to object.

Mr. BORLAND. No.

Mr. GARDNER. I therefore reserve the right to object, Mr. COX. Mr. Speaker, I demand the regular order.

The SPEAKER. Is there objection? Mr. GARDNER. I object.

The SPEAKER. The gentleman from Massachusetts [Mr. GARDNER | objects.

Mr. GARDNER. I will withdraw my objection if the gentleman from Indiana [Mr. Cox] will withdraw his demand for the regular order.

Mr. COX. I demand the regular order, Mr. Speaker.

The SPEAKER. The gentleman from Indiana demands the regular order.

Mr. GARDNER. Then, I object.

ADJOURNMENT UNTIL NEXT TUESDAY.

Mr. UNDERWOOD. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet on Tuesday next

The SPEAKER. The gentleman from Alabama [Mr. Underwood] asks unanimous consent that when the House adjourns to-day it adjourn until Tuesday next. Is there objection? [After a pause.] The Chair hears none, and it is so ordered.

EXPENSES INCIDENT TO THE FIRST SESSION, SIXTY-THIRD CONGRESS. Mr. SISSON. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I send to the Clerk's desk.

The SPEAKER. The Clerk will read the resolution.

The Clerk read as follows:

Joint resolution (H. J. Res. 118) making appropriations for certain expenses incident to the first session of the Sixty-third Congress.

Resolved, etc. That the following sums are appropriated out of any money in the Treasury not otherwise appropriated, namely:

SENATE. For compensation of the officers, clerks, messengers, and others in the service of the Senate, namely:

For 16 pages for the Senate Chamber, at the rate of \$2.50 per day each from July 1, 1913, until the close of the first session of the Sixtythird Congress; so much as may be necessary.

HOUSE OF REPRESENTATIVES.

For the following employees, from and including July 1, 1913, until the close of the first session of the Sixty-third Congress, namely:

For 46 pages, including 2 riding pages, 4 telephone pages, 1 press gallery page, and 10 pages for duty at the entrance to the Hall of the House, at \$2.50 per day each; 3 telephone operators, at the rate of \$75 per month each; so much as may be necessary.

The SPEAKER. Is there objection?

Mr. GARDNER. Reserving the right to object, Mr. Speaker, I have no objection to proceeding by unanimous consent if gentlemen do not call for the regular order and thereby shut off a proper question. But especially did that come ill from the gentleman from Indiana [Mr. Cox], because he, in this very last Record, inserted a document with reference to the banking and currency question, the product of the brain and pen of Mr. John Skelton Williams, who, I believe, is an employee of the Government.

Mr. COX. Mr. Speaker, will the gentleman yield?

Mr. GARDNER. It comes especially ill from the gentleman from Indiana, because his side of the House has just objected to the introduction of an exactly similar document by a Member of our side of the House. Now, Mr. Speaker, I demand the regular order.

Mr. SISSON. Mr. Speaker, will the gentleman withhold that

for a moment?

Mr. MANN. I hope the gentleman from Massachusetts will withhold.

Mr. GARDNER. I will withhold, Mr. Speaker.
Mr. SISSON. Mr. Speaker, I want to say that these pages have not been paid for the month of July. They are provided for in the general deficiency bill, but the general deficiency bill has assumed such proportions that the hearings have been continued, and it is quite possible that that bill may not get through the Senate for two or three months. It is not likely

that they will sidetrack the tariff bill for it.

Mr. GARDNER. The gentleman from Mississippi misunderstands me. I am not objecting to unanimous consent, but I demand that the question be now put—no, Mr. Speaker; I

withdraw that.

Mr. MANN. Mr. Speaker, I think the gentleman from Mississippi ought to make a statement in reference to the resolution, which I understand is for the payment of pages employed in the House and Senate.

Mr. SISSON. That is what I wanted to do. I want to state, Mr. Speaker, that the pages on both sides of the House and in the Senate were provided for in the last legislative bill up to

July 1.

Now, these little boys have not had their salaries for the month of July, and unless this joint resolution is passed it will not be possible for them to get any salaries for the month of August, and probably not for the month of September. was very careful not to include in this joint resolution a single page or employee not provided for by law. These boys are certainly entitled to their money.

Now, there are some other employees who are not receiving their money, but Mr. Woods, the Superintendent of the Capitol Building and Grounds, tells me that the charwomen who did not receive their pay for the month of June failed to receive it because he had apportioned the fund so as to take care, as

nearly as possible, of the Malthy Building.

There are some other session employees who will have to be taken care of. But these pages are provided for by law and are entitled, of course, to their salaries for the month of July, which are now overdue, and for the month of August, which will soon be due.

Will the gentleman allow me to interrupt him? Mr. LLOYD.

Mr. SISSON. Yes.

Mr. LLOYD. The Committee on Accounts have undertaken to take care of a number of individuals.

Mr. SISSON. Yes. Mr. LLOYD. They asked the Committee on Appropriations in May last to provide for their payment, but up to this time it has not been done.

Mr. SISSON. I will say to the gentleman from Missouri that the reason why it has not been done is because provision is made for them in the general deficiency bill, which has not yet been reported. I have no objection to a resolution to take care of all these employees of the House and Senate who are not now being paid. They ought to have their money. Their board bills are due.

Mr. LLOYD. I want it distinctly understood that I am not objecting in any way to the payment of these pages. They ought to be paid; but, on the other hand, I very much regret the condition which exists

Mr. SISSON. So do I.

That employees of both Houses are not paid Mr. LLOYD. That employees of both Houses are not paid and can not be paid until the deficiency bill passes Congress, which may be two or three months from now.

Mr. SISSON. I will state to the gentleman from Missouri that if my attention had been called to one or two other classes of employees in the House and Senate at the time this joint resolution was prepared by the clerks of the House and Senate Appropriations Committees I should have requested that they

include these other employees, but my attention was only called to the case of the pages and charwomen.

The gentleman from California [Mr. KAHN] called my attention to the fact that certain charwomen had not been paid, but when I called up Mr. Woods, Superintendent of the Capitol Building and Grounds, he said that the matter could be taken care of in the general deficiency bill, and he did not insist upon it.

Mr. KAHN. But these charwomen have not been paid since

the 1st of June, as I understand it.

Mr. SISSON. Some of them have not been paid.

Mr. KAHN. And they get less than \$20 a month. Mr. SISSON. But they have all been paid since the 1st of Their salaries since the beginning of the fiscal year were provided for in the legislative bill. The fund for the last fiscal year was exhausted, and some of the charwomen for the Maltby

Building have not been paid for the month of June. Mr. KAHN. Does the gentleman say they are taken care

of now? Mr. SISSON. The superintendent informs me that they are taken care of for the present fiscal year in the last legislative

Mr. MURDOCK. Will the gentleman yield for a question?

Mr. SISSON. Yes. Mr. MURDOCK. Will the gentleman tell us what is the reason for the delay in reporting the general deficiency bill? I should like to know that.

Mr. SISSON. To be frank with the gentleman, I will say that it is because of the great number of deficiencies. In other words, what it was supposed would perhaps be an urgent deficiency bill has grown into a general deficiency bill.

Mr. MURDOCK. . What is the likelihood that it will be reported?

Mr. SISSON. I think it will be reported in about 10 days. Mr. MURDOCK. The Committee on Appropriations are working on the bill?

Mr. SISSON. Oh, yes; they have been at work on it for about four weeks.

Mr. MURDOCK. And there is no reason for this delay other

than that it is a larger deficiency bill than usual? Mr. SISSON. I do not know that the deficiency bill when brought in will be larger than usual, but it is a most unusual bill for a special session of Congress, I will state to the gentle-

The SPEAKER. Is there objection?

Mr. MANN. Reserving the right to object, I believe this resolution was not introduced until this morning.

Mr. SISSON. That is correct.
Mr. MANN. What was the reason for dating it a week later than now?

Mr. SISSON. I do not know how that occurred, and I will say to the gentleman that if I can get unanimous consent for the present consideration of this joint resolution, I will ask unanimous consent to have the date changed as of to-day.

Mr. MANN. That is no part of the resolution. Mr. SISSON. No.

man.

Mr. MANN. Mr. Speaker, while this resolution is dated August 15, it is late enough now. This is the 8th of August, and this Congress met in special session on April 7. The months of April, May, June, and July have passed. This Congress has been in session four months, and an urgent deficiency bill has not yet been presented to the House. The proposition is now to pass a resolution by unanimous consent to pay the boys who are pages in the House and at the door both in the Senate and in the House. The general deficiency bill should cover appropriations which were utilized out of which was expended money for services rendered prior to July 1, and the general deficiency bill has not yet been reported. It is a remarkable situation, that with the House and Senate in session for more than four months a bill to supply urgent deficiencies has to wait until now, and, as the gentleman from Mississippi says, may not pass the Senate for several months yet. They might just as well wait and make it a general deficiency bill for December. Char-women who do the cleaning in the House Office Building have to stand off the people from whom they buy groceries and from whom they rent rooms because the Congress of the United States has not provided the money with which to pay them.

Mr. SISSON. Will the gentleman permit an interruption?

Mr. MANN. Yes.

Mr. SISSON. The gentleman is mistaken; the money is provided to pay them after the 1st of July. It is the month of

June for which they are not paid.

Mr. MANN. Oh, I understand; the money has not yet been provided to pay them up to date. It is true the appropriation

commencing July 1 is available to pay them for services rendered since July 1, but the deficiency bill is to provide for emergencies that arose before July 1, and the charwomen who do the cleaning, get down on their knees and scrub out the House Office Building, still have owing to them by the great Government of the United States the money for their services for the month of June.

The same thing applies wherever the deficiency bill proposes to appropriate money. Now, I do not know that it is the Committee on Appropriations which is to blame. From the deficiency estimates which have been coming to the Speaker of the House, and which I take the opportunity of examining as they are printed, apparently almost every branch of the Government is sending in as deficiency estimates requests for money which were turned down in the last Congress in the ordinary course of business. Congress declined to appropriate the money to make provision for work and services asked for by the departments, and the departments in utter disregard of the will of the appropriating power now blandly send through the Secretary of the Treasury estimates to the Speaker asking to have the money appropriated as a deficiency which was re-fused as a regular appropriation. The Committee on Appropriations apparently has been kept busy hearing these gentle-men, seeing whether they can differentiate between now and last winter. I do not know whether there will ever be an end to it. I hope the Committee on Appropriations may soon be able to report the deficiency bill and pay these persons who have money due to them for services rendered before July 1 last.

Mr. SISSON. Mr. Speaker, I will state for the information of the House that this deficiency bill is a large one. I hold the original estimate in my hand. It takes a good deal of time to go through the bill and have a hearing in reference to all these estimates. The subcommittee on deficiencies, of which I am a member, has been meeting for several weeks every day at 10 o'clock and sat frequently until late in the afternoon in hearings on the bill. I will state that the hearings have about been completed and the chairman of the committee hopes to report the bill within about 10 days from this date.

I am frank to admit that a good many of these deficiencies are matters which were turned down by the Congress at the last session, and these so-called deficiencies or demands on Congress are nothing more or less than demands denied by the Congress to the departments at the last session. I think it is fair and proper that that much be admitted. But the Appropriations Committee has been endeavoring to arrive at exactly what the departments are really entitled to and exactly what they ought to have, and in order to do that it is necessary that we should have careful hearings, in order that we may give the Members of the House proper information in reference to the bill when it is reported and considered.

Mr. HAMLIN. Will the gentleman yield?

Mr. SISSON. Yes, Mr. HAMLIN. I appreciate the gentleman's position; but has that any reference to the House employees, whose salaries are fixed? There is no necessity for hearings in regard to them.

Mr. SISSON. Absolutely not; but they were included in the deficiency bill.

Mr. HAMLIN. But this resolution does not cover it.

Mr. SISSON. If I had known and my attention had been called to some of these items, I would have had the clerks on the Committee on Appropriations take care of these.

Mr. HAMLIN. I understood the gentleman to make that

statement a moment ago. Now, I want to ask the gentleman if he will not bring in immediately another resolution covering the employees here?

Mr. SISSON. I am perfectly willing to present to the House a resolution for these employees, whose salaries are past due. I think it is an outrage for these people to work here two or three months without their pay, and for that reason I am presenting this resolution-

Mr. HAMLIN. Then if the gentleman feels that way about it he certainly will bring in a resolution in a short time, providing for their pay.

Mr. SISSON. I am frank to state that these matters were not

called to the attention of the committee until-

Mr. CLAYTON. Can not the gentleman amend the present resolution in accordance with the suggestion of the gentleman from Missouri?

Mr. SISSON. I would not like to do that unless I can prepare a resolution so as to include exactly the proper language, so as

not to overshoot or undershoot the mark.

Mr. HAMLIN. There will be no overshooting. I have in mind some janitors doing janitor service under very small pay who have not been paid for May and June, and have been com-

pelled to borrow money to pay their bread bills. New, that is inexcusable, it seems to me, and their pay ought not to be held back because you can not determine what particular items should be allowed.

Mr. SISSON. I will say to the gentleman I am perfectly willing at the next session of Congress for the Clerk to make up a list of the employees of the House

Mr. HAMLIN. You do not want to wait until the next session of Congres

Mr. SISSON (continuing). I did not know at the time this resolution was prepared that anybody else except certain char-women had not been provided for. There has been no complaint to the committee, and when we had up Mr. Woods, Superintendent of the Capitol Building and Grounds, he said the charwomen were now being cared for, but that a small number who were in the Maltby Building who performed services for the month of June might be taken care of in the deficiency bill, and for that reason they are not included. If I had known of these things, I should have been glad to have included every proper salary in this resolution where the services were authorized by law and rendered.

Mr. HAMLIN. Will the gentleman give the House any

assurance that—he said the next session of Congress; of course he meant the next session of the House

Mr. SISSON. I meant the next session of the House. Mr. HAMLIN. Can the gentleman give the House at Can the gentleman give the House assurance that such a resolution will be forthcoming at the next session

I will be glad to look into the matter, and if Mr. SISSON. I find such conditions exist as the gentleman states, where any of these employees are rendering services without being paid, I feel like the chairman of the Committee on Accounts and like my friend from Missouri, and I will be glad to do it.

Mr. HAMLIN. If we have that assurance, I certainly shall not object, because I think these pages ought to be paid and these other people ought to be paid.

Mr. SISSON. I am not trying to play any favorites; I am simply trying to take care of the people I know about.

Mr. KAHN. Will the gentleman yield?

Mr. SISSON. Yes. Mr. KAHN. The gentleman from Missouri [Mr. HAMLIN] has been referring to employees of the House who have not been paid. I understand that all over the country there are merchants who have furnished supplies to the Government who have not been paid, and that in many instances these men have had to borrow money from the banks in order to carry along their business because this great Government of ours has not Now, can the gentleman assure us or paid them their bills. give us any idea when it is likely this deficiency bill will become a law, in order that we may inform these merchants who happen to live in our districts when they can expect their money?

Mr. SISSON. I will state to the gentleman that properly audited claims which were authorized by law are always taken care of by the Committee on Appropriations, as the gentleman knows, if they are proper deficiencies and proper claims against the Government, and the Congress of the United States always reserves the right to be the final judge of whether they will or will not pay any claim.

And many of these so-called claims that are presented are frequently nothing, more nor less, than claims against the Government that have been turned down in the auditor's office.

Mr. KAHN. The matters of which I speak are not in that category. I refer to men who have furnished all kinds of food supplies for the Army and Navy and various departments of the Government prior to July 1, 1913, that have not had their money and are clamoring for it.

Mr. SISSON. In proportion to the amount of goods sold by these people, those deficiencies are infinitesimally small, and if in the Army and in the Navy men shall sell to the Government goods without the money being appropriated, they, of course, must take their chances upon the long delays in Congress

Mr. KAHN. Yes; but does not the gentleman see that it will work ultimate damage to the Government? Because merchants, when they find they have to wait for their money, will charge more for their goods.

Mr. SISSON. I am not endeavoring to justify a condition. I am simply stating that wherever a deficiency is a proper charge against the Government and the auditors say it is I have never known any Appropriation Committee to turn it down.

Mr. KAHN. But often it takes a long time before they get the money. Can the gentleman inform us when we may be able to write our constituents that they can have their money at such and such a time?

Mr. SISSON. I stated in the gentleman's presence three or four times that we hope to report this bill to the House within about 10 days. Now, I do not know what the Senate is going to do; but I did consult with one Member of the Senate, and he stated that there would be no disposition to sidetrack the tariff bill in the Senate and take up this deficiency bill, and how long the Committee on Appropriations in the Senate may keep this bill is as much within the knowledge of my friend from California as it is within my knowledge.

Mr. KAHN. Then the gentleman considers it advisable to write to our constituents that they may have to wait until the

snow flies before they can get their money?

Mr. SISSON. If you on your side do not hold up the tariff bill over there in the Senate and do not hold up things here, we may be able in 10 or 15 days to give your constituents the money that is properly due them.

The SPEAKER. Is there objection to the present considera-tion of this House joint resolution?

Mr. HINEBAUGH. Reserving the right to object, I would like to ask the gentleman from Mississippi a question or two. Has there been any meeting of the Appropriation Committee in reference to this resolution that is reported here to-day?

Mr. SISSON. The subcommittee on deficiencies have had meetings frequently. The full committee has not met.
Mr. HINEBAUGH. With reference to this particular resolu-

tion?

Mr. SISSON. No. sir.

Mr. HINEBAUGH. Is it the practice of individual members of the Appropriation Committee to present resolutions on the floor of the House bringing the matter to the attention of all the members of the Appropriation Committee?

Mr. SISSON. All members of the Committee on Appropriations have the estimates, and if the gentleman will look at the estimates he will see on page 17 the item for the House pages, and the chairman of the Committee on Appropriations of the Senate prepared the language in reference to the Senate bill. and that is why I ask unanimous consent. If we had had a report of the Committee on Appropriations, we might have taken it up on the call of the committees.

Mr. HINEBAUGH. I will say to the gentleman this, that I am a somewhat insignificant member of the Committee on Appropriations, a representative of the first minority in this Congress on this committee. So far I never heard from that committee as to any meeting or any action of the committee, nor have I had a copy of that resolution.

Mr. SISSON. Nor has the gentleman from North Carolina [Mr. Page] seen it. I consulted with the gentleman from Illinois [Mr. Mann], the leader of his party, and with the gentleman from Kansas [Mr. MURDOCK], the leader of the other party, and the gentleman from Alabama [Mr. UNDERWOOD], and the Speaker of the House, calling attention to this provision, but there has been no meeting of the Appropriation Committee. The only committee that has had a meeting was the subcommittee on deficiencies, and we will report that bill to the full committee, and the gentleman, of course, will be notified of that meeting.

Mr. HINEBAUGH. The gentleman does not answer my question. I am asking for information and I have no desire to object at all; but, as a member of the Committee on Appropriations, I think I am within my rights in asking whether or not it is customary, or whether it is a practice, for members of that committee to present resolutions from that committee.

Mr. SISSON. This is not a resolution from the committee.

This is a resolution of individual members.

Mr. HINEBAUGH. That is what I mean—independent of the committee.

My friend Dr. Foster, or any other Member in Mr. SISSON. this situation, could have presented this resolution and asked unanimous consent for its present consideration. doing it as a member of the committee but simply because it was called to my attention as an individual Member of the House, and I was requested to introduce the resolution, and I did so.

Mr. HINEBAUGH. Then it does not come from the committee?

Mr. SISSON. No. It was simply referred to the committee by the Clerk at the desk.

The SPEAKER. Is there objection to the present consideration of the House joint resolution? [After a pause.] The Chair hears none. The question is on the engrossment and third reading of the House joint resolution.

Mr. SISSON. Mr. Speaker, I ask unanimous consent that the Clerk may make a proper correction. I notice that the Public Printer has the bill dated on the back "August 15."

Mr. MANN. That is not required. That is no part of the resolution itself.

The House joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is, Shall the House joint res-

olution pass? The question was taken, and the House joint resolution was passed.

LEAVE OF ABSENCE.

Mr. Houston, by unanimous consent, was granted leave of absence, indefinitely, on account of sickness in his family.

EXTENSION OF REMARKS.

Mr. FERRIS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by the insertion of a short article, measuring about half a column in the Record, by Congressman Weaver. I got caught under the meshes a little

The SPEAKER. The gentleman from Oklahoma [Mr. Fer-RIS] asks unanimous consent to extend his remarks in the Rec-ORD by inserting an article produced by his colleague, Mr. Weaver, as part of his remarks. Is there objection?

Mr. FOSTER. Reserving the right to object, Mr. Speaker, may I inquire of the gentleman from Oklahoma if it is the intention to print this article in the body of the proceedings or in the back of the RECORD?

Mr. FERRIS. I have no preference about that.

The SPEAKER. There was an agreement entered into here at the last Congress by which speeches introduced in this way should be printed at the end of the RECORD. The Chair does not know whether the Public Printer has paid any attention to that or not.

Mr. FERRIS. That is satisfactory to me.

Mr. MURDOCK. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. MURDOCK. The Speaker says that an agreement was entered into at the last Congress. Now, I notice another form, and I would like to know the origin of it. Formerly such a speech when inserted in the RECORD was headed, "Speech by the Hon. So-and-so." Now, under the present practice the heading is, "Extension of remarks" of the gentleman. Now, the question is, Who authorized the change?

The SPEAKER. The man who first used that phrase on the floor of the House, so far as the Chair remembers, was the gentleman from Illinois [Mr. MANN], and it was a part of the agreement, because to take a long speech made on the outside somewhere and inject it into the interlocutory proceedings here made the whole thing seem ridiculous, and it was agreed to all around. The Chair does not think any resolution was passed in regard to it, but it was agreed that speeches such as those should be printed at the end of the proceedings, and the gentleman from Illinois [Mr. Mann] suggested that they ought to be marked "Extension of remarks."

Mr. MURDOCK. I think the change, in so far as it gives

further definition of what a man was doing, is very valuable,

and I approve the practice; but I did not know its origin.

The SPEAKER. The Chair is informed that the Public Printer has observed this regulation. Is there objection?

Mr. BUCHANAN of Illinois. Mr. Speaker, I would like to ask if it would not also be a good reform to label it with a statement of the actual fact when a man makes a speech with not more than half a dozen Members present, including the Speaker. It seems to me that would be an improvement. I have seen here probably as small a number as five Members of the House when a Member was delivering a speech. It seems to me we ought to let our constituents know all the facts.

The SPEAKER. Is there objection? [After a pause.] The

Chair hears none, and it is so ordered.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks, announced that the Senate had passed the following resolutions: IN THE SENATE OF THE UNITED STATES

August 8, 1913.

Resolved, That the Senate has heard with deep regret and profound sorrow of the death of the Hon. Joseph Forney Johnston, late a Senator from the State of Alabama.

Resolved, That a committee of 17 Senators be appointed by the Vice President to take order for superintending the funeral of Mr. Johnston.

Resolved, That as a further mark of respect his remains be removed from his late home in this city to Birmingham, Ala., for burial, in charge of the Sergeant at Arms, attended by the committee, who shall have full power to carry these resolutions into effect.

Resolved, That the Secretary communicate these proceedings to the House of Representatives.

Resolved, That as a further mark of respect to the memory of the deceased Senator the Senate do now adjourn.

In compliance with the foregoing the Vice President appointed as said committee Mr. Bankhead, Mr. Bacon, Mr. Overman, Mr. Chamber-

LAIN, Mr. HITCHCOCK, Mr. CLARKE OF ARKADSAS, Mr. VARDAMAN, Mr. JOHNSON, Mr. SWANSON, Mr. SMITH OF SOUTH CAPOlina, Mr. THORNTON, Mr. GALLINGER, Mr. WARREN, Mr. BRISTOW, Mr. CATRON, Mr. BRADY, and Mr. KENYON.

DEATH OF SENATOR JOHNSTON OF ALABAMA.

Mr. UNDERWOOD. Mr. Speaker, it is my sad duty to announce to the House the death of the Hon, Joseph F. John-STON, of Alabama.

At a later date I will ask the House to set apart a day to

pay proper respect to his memory.

I now move the adoption of the following resolution. The SPEAKER. The Clerk will report the resolution. The Clerk read as follows:

House resolution 225.

Resolved, That the House has heard with profound sorrow and sincere regret of the death of the Hon. Joseph F. Johnston, late a Senator from the State of Alabama.

Resolved, That the Clerk communicate these resolutions to the Senate and send a copy thereof to the family of the deceased Senator.

Resolved, That a committee of 17 Members of the House, with such Members of the Senate as may be joined, be appointed to attend the funeral.

The resolution was agreed to, and the Speaker announced as the committee on the part of the House, Mr. Underwood, Mr.

CLAYTON, Mr. TAYLOR of Alabama, Mr. RICHARDSON, Mr. HOB-SON, Mr. BURNETT, Mr. HEFLIN, Mr. DENT, Mr. BLACKMON, Mr. ABERCROMBIE, Mr. WEBB, Mr. HOWARD, Mr. AUSTIN, Mr. TOWNER, Mr. NORTON, Mr. KELLEY of Michigan, Mr. CULLOP, Mr. McKellar, and Mr. Bell of California.

ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I move the adoption of the following resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

Resolved. That as a further mark of respect to the memory of the deceased Senator, the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 53 minutes p. m.) the House, in accordance with the order heretofore adopted, adjourned until Tuesday, August 12, 1913, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting a letter from the Acting Secretary of the Navy reporting that under provisions of the act of June 24, 1910, the Navy Department has considered, ascertained, adjusted, and determined that \$91 is due the Union Oil Co. of California, Seattle, Wash., owner of the Union Oil Co.'s wharf at Seattle, for damages for which the vessels of the Navy were found to be responsible (H. Doc. No. 185); to the Committee on Appropriations and ordered to be printed.

2. A letter from the Secretary of the Treasury, transmitting a letter from the Attorney General submitting an estimate of appropriation for the enforcement of antitrust laws (H. Doc. No. 186); to the Committee on Appropriations and ordered to be

3. A letter from the Secretary of the Treasury, transmitting a letter from the Acting Secretary of the Interior submitting an estimate of appropriation for special repairs to the Pension and Patent Office Buildings made necessary by the storm of July 30, 1913 (H. Doc. No. 187); to the Committee on Appropriations and ordered to be printed.

4. A letter from the Acting Secretary of War, transmitting a letter from the Chief of Engineers, together with copies of reports from Col. W. M. Black, Corps of Engineers, on preliminary examination and survey of East River and Little Hell Gate, N. Y., and resurvey of East River and Hell Gate, N. Y., including any ledge or ledges near to the westerly shore (H. Doc. No. 188); to the Committee on Rivers and Harbors and ordered to be printed, with illustrations.

5. A letter from the Acting Secretary of War, transmitting, with a letter from the Chief of Engineers, report of preliminary examination of Hillsboro River, Fla., between Tampa Electric Co.'s dam and Crystal Springs (H. Doc. No. 183); to the Committee on Rivers and Harbors and ordered to be printed, with illustration.

6. A letter from the Acting Secretary of War, transmitting with a letter from the Chief of Engineers, report of preliminary examination of harbor at Duluth, Minn., and Superior, with a view to extending the 20-foot channel up the St. Louis River to Commonwealth Avenue, New Duluth, including a channel of the same depth on the south and east sides of Big Island (H. Doc. No. 184); to the Committee on Rivers and Harbors and ordered to be printed with illustration.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. PROUTY, from the Committee on the District of Columbia, to which was referred the joint resolution (H. J. Res. 107) directing the Treasurer of the United States to transfer \$1,003,257.24 upon his books from the District of Columbia to the credit of the United States, reported the same with amendment, accompanied by a report (No. 44), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. GARD, from the Committee on Military Affairs, to which was referred the joint resolution (H. J. Res. 111) to authorize the reinstatement of Adolph Unger as a cadet in the United States Military Academy, reported the same with amendment, accompanied by a report (No. 43), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Appropriations was discharged from the consideration of the bill (H. R. 7350) for the relief of George Q. Allen, and the same was referred to the Committee on Claims.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. SMITH of Minnesota: A bill (H. R. 7355) to amend an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911; to the Com-

mittee on the Judiciary.

By Mr. L'ENGLE: A bill (H. R. 7356) to authorize the Secretary of War to donate two condemned brass or bronze cannon and cannon balls to the city of Sanford, in the State of Florida; to the Committee on Military Affairs.

By Mr. SMALL: A bill (H. R. 7357) to promote efficiency in the civil service; to the Committee on Reform in the Civil Service.

By Mr. HOUSTON: A bill (H. R. 7358) providing for the registry of officers, clerks, and employees in the Federal service, and for other purposes; to the Committee on the Census.

By Mr. ROTHERMEL: A bill (H. R. 7359) to establish a fish-cultural station in the thirteenth congressional district in the State of Pennsylvania; to the Committee on the Merchant Marine and Fisheries,

By Mr. HULINGS: A bill (H. R. 7360) to provide revenues for the United States by the taxation of the issues of and transactions in securities as defined herein, to prohibit gambling contracts by regulating certain stock-exchange transactions, and for other purposes; to the Committee on Ways and Means.

By Mr. CARAWAY: A bill (H. R. 7361) to amend an act to authorize the erection of a bridge across the Mississippi River at Memphis, Tenn.; to the Committee on Interstate and Foreign Commerce.

By Mr. THOMSON of Illinois: A bill (H. R. 7362) prohibiting the use of steam locomotives in or within 20 miles of the District of Columbia; to the Committee on the District of Columbia.

By Mr. LINDBERGH: A bill (H. R. 7363) to amend the national-banking laws; to provide a revenue system by which the Government taxing powers shall be represented by United States currency drawn on the people of the United States, to be disbursed through the governmental agencies on appropriations by Congress for services rendered or to be rendered the Government; to inaugurate, develop, and maintain an American financial policy and currency system which will liquidate and eventually abolish debt, national, State, and municipal, and put the public and private enterprises, industries, and exchanges upon a sound economic basis, and remove the power of private interests to monopolize the mediums of exchange, and for other purposes;

to the Committee on Banking and Currency.

By Mr. CARTER: A bill (H. R. 7364) to authorize certain changes in homestead allotments of the Choctaw and Chickasaw Indians in Oklahoma; to the Committee on Indian Affairs.

By Mr. WICKERSHAM: Resolution (H. Res, 224) requesting

information from the Secretary of the Navy respecting naval coal upon the Pacific and in Alaska and a naval-base railway therein; to the Committee on Naval Affairs.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions

were introduced and severally referred as follows:
By Mr. CLARK of Missouri: A bill (H. R. 7365) granting a pension to Louisa Merritt; to the Committee on Invalid Pen-

By Mr. COOPER: A bill (H. R. 7366) granting an increase of pension to Levi H. Yance; to the Committee on Invalid Pensions.

By Mr. FRENCH: A bill (H. R. 7367) granting an increase of pension to Anton Maybaum; to the Committee on Pensions. Also, a bill (H. R. 7368) granting an increase of pension to

Augusta S. Roske; to the Committee on Invalid Pensions. By Mr. KETTNER: A bill (H. R. 7369) granting an increase

of pension to Eva M. Lamb; to the Committee on Invalid Pensions.

Also, a bill (H. R. 7370) for the relief of John W. Reddington; to the Committee on Military Affairs.

By Mr. POWERS: A bill (H. R. 7371) for the relief of the heirs of Algenon S. Gray, deceased; to the Committee on War Claims.

By Mr. STEPHENS of Texas: A bill (H. R. 7372) for the relief of Samuel E. Howell and James H. Howell; to the Committee on War Claims.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid

on the Clerk's desk and referred as follows:

The SPEAKER (by request): Petition of the National Hay Association, of Winchester, Ind., favoring currency legislation during the present session; to the Committee on Banking and Currency.

By Mr. BURNETT: Petition of Fritz Apel, Cullman, Ala., favoring the passage of legislation exempting mutual life insurance companies from the income-tax bill; to the Committee on Ways and Means.

By Mr. DALE: Petition of the Allied Printing Trades Council of New York City, protesting against the reduction of the duty on printed matter; to the Committee on Ways and Means.

By Mr. DOOLITTLE: Petition of the farmers of Gregory County, S. Dak., favoring the passage of the farm-loan bill (H. R. 6158); to the Committee on Ways and Means.

By Mr. KETTNER: Petition of Bennington Camp, No. 20, United Spanish War Veterans, favoring a bill for the distribution of rifles belonging to the United States among civilian organizations; to the Committee on Military Affairs.

By Mr. McGILLICUDDY: Petition of the Socialists of Lewiston, Me., favoring a congressional investigation of the imprisonment of certain labor leaders because of solicitude in connection with strikers; to the Committee on Labor.

By Mr. RAKER: Petition of the Commonwealth Club, of San Francisco, Cal., favoring House bill 6281; to the Committee on the Public Lands.

SENATE.

Saturday, August 9, 1913.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of yesterday's proceedings was read and approved. MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by Mr. J. C. South, its Chief Clerk, announced that the House had passed a joint resolution (H. J. Res. 118) making appropriations for certain expenses incident to the first session of the Sixty-third Congress, in which it requested the concurrence of the Senate.

The message also transmitted to the Senate resolutions of the House on the death of Hon. Joseph Forney Johnston, late a Senator from the State of Alabama.

THE TARIFF-COTTON SCHEDULE.

Mr. HOLLIS. Mr. President, I desire to give notice that on Monday next, at the close of the morning business, I shall address the Senate on the tariff bill, with particular reference to the cotton schedule.

PETITIONS AND MEMORIALS.

Mr. WORKS presented a petition signed by sundry citizens of San Francisco, Cal., praying for the adoption of an amendment to the Constitution extending the right of suffrage to women, which was referred to the Committee on Woman Suffrage.

Mr. NELSON presented a resolution adopted by the Com-mercial Club, of Mankato, Minn., favoring an appropriation for the purchase of suitable residences for American representatives abroad, which was referred to the Committee on Foreign Relations.

Mr. SUTHERLAND presented a petition signed by sundry citizens of the State of Utah, praying for the adoption of an amendment to the Constitution extending the right of suffrage to women, which was referred to the Committee on Woman Suffrage.

WOMAN SUFFRAGE (S. DOC. NO. 160).

Mr. MARTINE of New Jersey. Mr. President, in view of the widespread interest taken in our country on the question of woman suffrage and the mooted discussion pro and con of that subject, and inasmuch as many documents and petitions have been presented fortifying and substantiating the claim of woman suffrage, I have been requested by Miss Annie Bock, a most estimable and cultured lady from Los Angeles, Cal., to present to the Senate a letter or address that it was hoped she might have delivered before the committee personally, but arriving too late, I have been requested to present the same and ask that it be printed in the RECORD.

I will say that I have read the letter or address; that it is couched in most beautiful, dignified, and decorous terms, and attacks no one or no party bitterly, while upholding the side that she herself advocates. Having been formerly a woman suffrage advocate, having enlisted in the cause of that propaganda, and having acted as a captain or ward worker, so to speak, in her city of Los Angeles, I feel that she can speak with force and with some knowledge of the subject.

I present the paper, and ask unanimous consent that it may

be printed in the RECORD.

Mr. GALLINGER. I will ask the Senator if it would not be quite as agreeable to him to have the paper printed as a document? I think that is a better form than to have it printed in the RECORD.

Mr. MARTINE of New Jersey. I thank you very much, Senator. At the suggestion of the Senator from New Hamp-

shire I make that request.

The VICE PRESIDENT. Is there objection to printing the paper as a public document? The Chair hears none, and it will be so ordered.

REPORTS OF COMMITTEES.

Mr. THOMPSON, from the Committee on Irrigation and Reclamation of Arid Lands, to which was referred the bill (S. 221) for the relief of the Garden City (Kans.) Water Users' Association, and for other purposes, reported it without amendment and submitted a report (No. 99) thereon.

Mr. WILLIAMS, from the Committee to Audit and Control

the Contingent Expenses of the Senate, to which was referred Senate resolution 155, authorizing the appointment of a committee of five Senators to examine into the question as to fees and compensation allowed to clerks of the several district courts and circuit courts of appeals, and to report the same to the Senate with their findings thereon, reported it with amendments.

ELIZABETH T BUTLER.

Mr. SHAFROTH, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred Senate resolution 145, submitted by Mr. Kern on the 31st ultimo, reported it without amendment, and it was considered by unanimous consent and agreed to, as follows;

Resolved, That the Secretary of the Senate be, and he is hereby, authorized and directed to pay, out of the contingent fund of the Senate, to Elizabeth T. Butler, widow of Maj. George Butler, late a member of the Capitol police of the United States Senate, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, said sum to be considered as including funeral expenses and all other allowances.

ESTATE OF ANDERSON GORDON, DECEASED.

Mr. SHAFROTH. I report back favorably with an amendment from the Committee to Audit and Control the Contingent Expenses of the Senate Senate resolution 150, submitted by the Senator from Arizona [Mr. SMITH] on the 4th instant. for its present consideration.

The Senate, by unanimous consent, proceeded to consider the resolution.

The amendment was, in line 3, after the word "Senate," to strike out "to Ulysses Gordon, son" and insert "to the legal heir or heirs," so as to make the resolution read:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay, out of the contingent fund of the Senate, to the legal heir or heirs of Anderson Gordon, late a hostler in the employ of the Senate, a sum equal to six months' salary at the rate he was receiving by law at the time of his death, the said sum to be considered as including funeral expenses and all other allowances.

The amendment was agreed to.

The resolution as amended was agreed to.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SAULSBURY:

A bill (S. 2910) granting a pension to Amelia Xandry; to the Committee on Pensions.

By Mr. SMOOT:

A bill (S. 2911) further to assure title to lands granted the several States, in place, in aid of public schools; to the Committee on Public Lands.

By Mr. BRYAN:

A bill (S. 2912) to prohibit the importation and the interstate transportation of certain films or other pictorial representations, and for other purposes; to the Committee on Interstate Commerce.

By Mr. CLAPP (by request):

A bill (S. 2913) to authorize the Secretary of the Navy to amend the record of Lieut. William S. Cox; to the Committee on Naval Affairs.

By Mr. O'GORMAN:

A bill (S. 2914) granting an increase of pension to Catherine E. Stamp; to the Committee on Pensions.

By Mr. McLEAN:

A bill (8. 2915) granting an increase of pension to Ellen C. Messenger (with accompanying paper); to the Committee on Pensions.

By Mr. GALLINGER:

A joint resolution (S. J. Res. 63) providing for the disposition of the undistributed residue of the reports of the South Sea Exploring Expedition; to the Committee on the Library.

BANKING AND CURRENCY REFORM-AGRICULTURAL FINANCE AND COOPERATION.

Mr. FLETCHER. I introduce a bill which I send to the desk with a statement to accompany it. I ask that the resolutions which I also present be read.

The Secretary read the resolutions, as follows:

The Secretary read the resolutions, as follows:

At the State convention Florida Division, Farmers' Educational and Cooperative Union of America, held at Gainesville, Fla., July 16, 1913, the following resolution was passed:
Whereas there are 12,000,000 farmers in this country and 32,000,000 people directly dependent on agriculture owning property valued at \$40,000,000,000, producing annually products valued on the farm at \$9,500,000,000; and
Whereas those engaged in agriculture pay high prices for the supplies they require, and are burdened with high rates of interest and inadequate credit facilities wholly out of proportion to their resources and of a character not responsive to their needs; and Whereas in the banking system established some 50 years ago the farmer has not been duly considered and the great industry of agriculture has been ignored; and
Whereas in the changes proposed by S. 2639, while improvement is suggested in these respects, said bill, dealing almost exclusively with commercial banking suited to the needs of the merchant and manufacturer, fails to provide adequately for the needs of agriculture: Therefore be it

Resolved, That we petition the President of the United States and

Resolved. That we petition the President of the United States and the Congress to see that provisions are incorporated in said bill for the establishment of a specific class of institutions, such as cooperative rural banks and national organizations, designed especially to meet the requirements and demands of agriculture in respect to credit and

finances.

Resolved further, That these resolutions be transmitted to the President, to our Senators and Representatives in Congress, to the national union, and all local unions in this State as a request for their consideration, assistance, and cooperation in these matters.

M. S. Knight, President.

R. M. Bush, Secretary-Treasurer.

Mr. FLETCHER. I ask that the bill be read by title.

The bill (S. 2909) to provide for the establishment, operation, management, and control of a national rural banking system in the United States, and for other purposes, was read twice by its title.

Mr. BRISTOW. I understand that the Senator from Florida has introduced a bill and now proposes to address himself to

the bill he has introduced?

Mr. FLETCHER, I have introduced a bill, and I propose to make some remarks at this time.

Mr. BRISTOW. But the bill is not up for consideration?

Mr. FLETCHER, No.

Mr. BRISTOW. Except as to the address of the Senator?
Mr. FLETCHER. Precisely. It is not up for consideration.
Mr. President, the resolutions just read prompt me to ask

the indulgence of the Senate at this time for a brief consideration of this very important subject.

COMMISSION ON BURAL CREDIT AND COOPERATION.

The commission appointed by the President under act approved March 4, last, "to investigate and study in European countries cooperative land-mortgage banks, cooperative rural

credit unions, and similar organizations and institutions devoting their attention to the promotion of agriculture and the betterment of rural conditions," sailed on the Saxonia April 26 and returned on the Ccdric July 26. It pursued its studies and investigations in Italy Austric Harrows Commercial Science and investigations in Italy, Austria, Hungary, Germany, Switzerland, France, England, Denmark, Wales, and Ireland, and through subcommittees in Russia, Denmark, Switzerland, Holland, Belgium, Norway, Sweden, Scotland, Spain, and Egypt.

An immense amount of material has been collected, which must be compiled, boiled down, analyzed, reduced to its essence, and made ready for convenient use. This will require some time, and when completed will form the basis of findings and recommendations of a definite and, we believe, important char-Very valuable information of great public interest and up to date, on the ground, has been gained. At a later time a

formal report will be laid before Congress.

Inasmuch as banking and currency legislation is in immediate prospect, I feel it advisable to take occasion now to direct attention to a very important phase of the subject, is already known to warrant some general conclusions which should be under special consideration at this time.

PRESENT BANKING AND CURRENCY LAW.

The Federal reserve bill now before the committees of the House and Senate is most opportune. I shall not now attempt any analysis of that bill. It may be that some of its provisions could be improved upon, and if so, the committees will doubtless discover them. I have thought of submitting some views on that proposed measure, but will allude to only a few features. Generally speaking, I have no criticism to offer. On the contrary, I most cordially commend the principle and plan of

the reserve banks as therein provided.

The point I especially desire to press now is that the proposed measure is mainly a commercial banking measure. quite agree with the idea that our trouble is more with banking than with currency. I believe this bill will accomplish a very great improvement in our present system and work a much-Our system is a commercial system, intended needed reform. primarily to accommodate industries and commerce. chant and the manufacturer are chiefly taken care of and advantaged by it. It is modeled after the Ohio law of 1844. It is antiquated and insufficient for our present needs. did have reference to that other great enterprise constituting in large part the foundation of our institutions and of civilization itself-agriculture. It began by discriminating against the farmers' chief asset, real estate, and it has continued to neglect, if not ignore, the interest of agriculture. To a large extent agriculture can not be accommodated or taken care of by any commercial banking system.

Broadly speaking, the needs of agriculture can only be met by

a separate and distinct system of banking. Credit associations based on cooperation, organized and managed by those engaged in agriculture, coordinating with a banking plan with sufficiently broad and extensive powers and authority, supervised and directed by Government officials, will be inevitably required.

It is impossible to devise a system suitable and effective adapted to commerce and industry which would afford the kind of credit and banking accommodation the farmer must have.

I realize the demand for legislation such as contemplated by the pending bill. Our present reserve system is unquestionably defective and vicious.

THE WAY OUR RESERVE SYSTEM OPERATES.

Under the laws governing national banks the country banks must hold 15 per cent of their demand liabilities in cash. They may redeposit three-fifths of this reserve in reserve city banks. These city banks must hold 25 per cent of their demand liabilities in cash and they may redeposit one-half of this in the central reserve city banks in New York, Chicago, and St. Louis. The country banks can count as reserves three-fifths of the 15 per cent when deposited with reserve agents, and the city banks one-half of the 25 per cent when deposited with central reserve

The effect of this is these central reserve city depositories hold millions of deposits made by banks. These central reserve city banks must carry 25 per cent of their demand liabilities in cash in their vaults. They dare not tie up all their funds over

and above this 25 per cent reserve in time paper.

In times of stress the demands of agriculture on the country banks and of commerce and industries on the city banks are passed up to these central reserve city banks. They have not passed up to these central reserve city banks. been able to calculate on the possibility of these demands. They have been absorbed in a practice which meant continuous returns to the banks. They hunt for loans payable on demand. They find that market in Wall Street. Here they get higher rates for call loans, and the tighter the money the higher the banking institutions.

rates, and the higher the rates the greater the flow from the country towns and smaller cities to the great centers. Street bids against the country and wins. The rede The redeposited reserve money of the other banks of the country is already there, and it will remain there because it can be loaned "on call" and earn interest.

The banks of New York become under this system of redepositing reserves the ultimate holders. They normally carry \$500,000,000 of cash reserves, equal to one-third of all the money in the banks of the country and equal to one-sixth of all the lawful money of the United States. Under sections 5192 and 5196 of the Revised Statutes of the United States it would seem the comptroller has very extensive power and broad discretion in the matter of appointing reserve agents or depositaries, and may lay down rules and regulations for the protection of the reserves and their use. Some of the present evils could be remedied by the judicial exercise of this power and discretion.

The "reserve" intended to protect in time of trouble and furnish relief in time of need performs no such function. It is based on no sound principle, because, while one bank may be amply protected by a reserve of 10 per cent, another, owing to the kind of business it does, would require a reserve of, say, 35

per cent.

When the demand for money is great the banks, under the present system, naturally raise interest and curtail loans. This makes the situation worse. If there is real stringency, or a

scare, they stop loaning altogether. This increases the trouble.

Business demands credit in vain. The actual value of farm lands counts for nothing. Agriculture is on no credit basis. The resources of legitimate industries offer no inducement in such times—the very times they need it—for credit.

Again, we can not afford to continue a system whereby the control of the money of the country and the control of credit may be concentrated in the hands of a small group of men. Better have the Government look after that control, if it is to be vested anywhere, and especially attend to the issue of the

currency.

It is a situation which carries menace of alarming proportions where 18 financial institutions in New York, Chicago, and Boston, by means of interlocking directorates, have a voice in the management of 134 corporations with an aggregate capital of \$25,325,000,000.

These 18 financial institutions have 180 men connected with them in official capacity, and these are further officially connected with banks and trust companies, insurance companies, railroad systems, producing and trading corporations, and public-utilities corporations; and who can estimate the power they have to stifle competition, to work their own will in their own way, to control credit through the control of money, and thus, being master of the situation as to credit, become master of the commerce and industry of a nation?

Mr. OWEN. Mr. President-

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Oklahoma? Mr. FLETCHER. I do.

Mr. OWEN. I ask the Senator whether under any circumstances in this country capital can be obtained for any great enterprise without the consent of these gentlemen?

Mr. FLETCHER. It seems that such consent would be abso-

lutely necessary.

It is not necessary to find this tremendous power active and exercised. It is sufficient to know that it is existing. Those who possess it may not improperly use it, but the men who come after them in the management of these institutions may not be so considerate. It is an unsafe and unsound situation. No body of men responsible only to themselves can, in safety and justice, whether they exercise it or not, possess such power or possibilities of control over the destinies, the very bread and butter, of 95,000,000 freemen.

AS AFFECTING AGRICULTURE.

While the pending legislation is most desirable, it does not, can not, and no amendment to it could be made to supply the great and pressing call for financial consideration by agriculture. In the past Great Britain bent her energies developing her

industries and her commerce.

Germany realized she must provide food for the people, including her army, and she looked after agriculture as well. consequence. Germany has the most complete financial system aimed to benefit agriculture and under which her farmers per, and without which they would have perished. Raiffeisen heard the call in 1849. The Landschaften and other plans were evolved. They are quite distinct from ordinary commercial

In recent years England has endeavored to remedy her oversight. Her statesmen and economists saw the trouble and legislation has been enacted in the interest of agriculture.

But the most marked example of the successful application of the German idea to local conditions is found in Ireland. In the days of absent landlordism and tenancy that country was noted for the poverty, distress, intemperance, and discontent of its people and the prevalence of crime. Since the efforts of her patriots resulting in the act of Parliament constituting the development commissioners in 1909, whereby the Government by its credit of \$1,000,000,000 has made it possible for those who work the land to own it, there is bounding hope, general prosperity, contentment, and progress on every hand, and the jails are turned into schoolhouses, and the Irish lad no longer hurries from the farm. Under the leadership of such economists as Sir Horace Plunkett there has come about a real rural reconstruc-It is because by some wise consideration shown those who till the soil, enabling them to have a fair and square chanceand they have never asked special favor or special privilegeslife on the farm is being made, as it must be in every country, if that country is to prosper, conspicuously comfortable, intellectually interesting, and socially satisfying.

We must not get into Ireland's former condition.

Statistics show there has been an increase of tenants on the farms of this country of some 12 per cent since 1880, a decrease of occupying owners in that period of 14 per cent. The exodus from the farm is increasing—our exports of food products rapidly decreases. Soon, at the present rate, we shall not be producing sufficient to supply the home demand. For instance, while our population has increased 9,000,000 since 1907, the number of cattle has decreased 16,000,000. Yesterday 900,000 pounds of beef from the Argentine Republic was delivered in Washing-The shipment came from Buenos Aires via Liverpool, and the time required was 35 days.

It may be claimed that section 27 of Senate bill 2639 will serve the farmer. To a degree it will be of benefit, but it does not approach ample provision. It removes the ban on real estate as security heretofore existing, but the farmer can not return his capital in nine months. This would give but temporary short-time accommodation. What the farmer wants is long-time loans at a low rate of interest, with an amortization feature. In this way he can acquire a home, improve his property, develop his industry, and out of the annual proceeds pay off the debt by

installment reductions.

Mr. GALLINGER. Mr. President-

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from New Hampshire?

Mr. FLETCHER. I do. Mr. GALLINGER. I will ask the Senator from Florida when we may expect a report from the commission that made this

Mr. FLETCHER. The commission returned on the 26th of last month. I have been spending nights and days studying the data which have been collected. It will take quite a time to boil down and digest that matter. I can not state in response to the Senator's inquiry when the report will be made, but the work is going on continuously, with the hope that before a great while we shall be able to submit a formal report.

Mr. GALLINGER. As I understand, the Senator from Florida was denied the privilege, because of public business, of ac-

companying the other members of the commission.

Mr. FLETCHER. I am sorry to say that is the truth. Mr. GALLINGER. I will ask the Senator if he knows

whether the commission took up particularly the problem of what is called sometimes intensive farming with a view of

increasing the output of American farms?

Mr. FLETCHER. My understanding is that the commission investigated all the subjects marked out in the scope of the inquiry as defined before it left this country, and that the report will include production, distribution, financing the affairs of the farmer, which would, of course, include the question of intensive farming, and also matters looking to the betterment of rural conditions generally.

Mr. GALLINGER. One of the most interesting books I ever read had the title "Ten Acres Enough." It was a plea to the effect that in Europe 10 acres, if properly cultivated, would enable a man to raise and educate his family. Once as I had the privilege of passing through some of the European countries Hungary in particular, and Bohemia-I was rather impressed with the thought that if much smaller farms were cultivated in this country to the extent of their productive capacity we would be better off than we are with the large farms which our western farmers seem to desire to secure. There seems to be a disposition, as I have gone through the West, for a farmer when he gets a quarter section of land—160 acres—to ahead of the rural.

add another quarter section; and when he gets that he thinks he ought to have a section, and, of course, it can not be farmed to the best advantage.

I hope the commission did deal with this subject. I am in great sympathy with the work the commission laid out to do and will look forward with great interest to getting the report.

Mr. FLETCHER. I am quite sure the Senator will not be disappointed with the result of the investigation made there. am glad to hear him express his interest in it. I think the subject he mentions will be included in the report.

COMMERCIAL BANKING SYSTEM NOT SUFFICIENT.

You can not provide for that in any commercial banking You must have a separate plan. In nine months he might be able to meet obligations incurred for temporary needs for supplies to enable him to produce the last crop-but that is but a small addition to the avenues now open to him for that purpose. Besides, the Senator from Oklahoma [Mr. Owen] estimates this section would make available for loans on real estate some \$250,000,000. This is an insignificant sum compared to the demands of that great industry. How great it is may be understood when we reflect that over 10,000,000 of our people are directly engaged in it, and over 30,000,000 are on the farms and supported by them. Furthermore, that the value of the products on the farm, last year, were \$9,400,000,000, and it is estimated that one-third of these were consumed on the farms, leaving the remainder to be marketed, and for which the consumers paid over \$13,000,000,000. Further, our farmers owe some \$5,000,000,000, nearly three billion of which is secured by mortgages on the land. What would two hundred and fifty million amount to when it is a question of properly taking care of that three billion, to say nothing as to the other two billion secured by crop liens and due local merchants?

I realize that in some portions of the country the farmers are lending money to the banks, enjoying automobiles and other luxuries. There are many other portions where the farmer is having a hard and miserable existence. Excessive rates of interest, inability to get capital, lack of credit, or other difficulties, in no few districts, prevent his getting a direct return from

his toil, strive how he will.

STATUS OF AGRICULTURE AND RURAL LIFE,

We must take the average, as we must deal with the average man in all our calculations. We find that the average farmer earns, gross, \$700 per annum, less than \$2 per day. With this he must support his family, educate his children, meet medical bills; then he can buy barrels with which to store away the remainder.

There seems to be two theories advocated by earnest, con-

scientious, able thinkers, respectively:

Mr. David Lubin contends the farmer is-

Mr. David Lubin contends the farmer is—
behind the times in the United States * * * because he has no
cash, no open account. Give him that and he will have the rest. It
therefore follows that the American commission should first of all find
out why the European farmer has cash, has open accounts, and why
the American farmer has not. Having found out the why, it will be
easy enough for the American farmer to build up the structure he
should have so as to adapt himself to the needs of the twentieth century and in conformity with the progressive modes in operation in the
United States in all other fields of activity.

Sir Havenon Plumbert, the Luigh patriot, economist, and pub-

Sir Horace Plunkett, the Irish patriot, economist, and publicist, says:

I hold strongly that until farmers have fallen into line with the economic system of your and our countries by organizing their business they can not themselves know the character of the security they have to offer, and therefore will not have credit or get cash adequate for their requirements.

He insists upon dealing with "the problem of rural life in its entirety" rather than restricting our efforts "to the financial aspect of the problem."

As I understand, he contends that we must first get the farmer ready to utilize credit. He must organize cooperative societies, combine with his neighbors, prepare himself and his undertaking in order to make effective and economical use of the credit which will come to him, and then a system may be devised whereby he can economically finance all, his operations.

Both aim for the same goal; both wish to accomplish the same ends; the difference appears to be in methods or means. seems to me both may be right; that the resultant, rather, the middle course, would be nearer the true and the wise course. In other words, let us proceed with both developments at the same time—cooperation to better rural conditions and financial arrangements pari passu.

George Washington said:

I know of no pursuit in which more real and important service can be rendered to any country than by improving agriculture.

In that day our agricultural population was 96 in 100; to-day it is 52 in 100. Everywhere the urban population is increasing Daniel Webster said:

Farmers are the founders of civilization and prosperity.

The farmer must always be the foundation, but that does not

mean he must be kept beneath the surface.

The rewards of his labor are too meager. Experts say, upon an average, the farmer gets only 35 cents of the consumer's dollar. The cotton grower gets the largest proportion of what the consumer (meaning the manufacturer) pays, 70 per cent. The vegetable and fruit grower get the smallest per cent, 20 per cent. This is because cotton passes through fewer hands. He pays high prices for the things he buys. He pays tribute to the manufacturer, the middleman, and the financier. The poorest preachers the church sends to the country meeting houses. The most inexperienced and inefficient teachers the State sends to the country schools. About the cities and towns the paved roads are found. There is need of centers for business and social gatherings in order to make rural life more richly enjoyable and humanly interesting. Farming must be made more remunerative. The returns do not warrant good wages, and hence the lowest wage is given to farm labor, and hence, too, its decreasing quantity and quanty.

receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less for the hours he spends in toll than any other receives less than the hours have been decreased by the hours have been decreas worker. His work is unceasing, is never done. Yet Adam Smith stated the fact that "all wealth comes from labor applied to land."

The primitive values are food and shelter. There is much talk about universal peace; build up a contented and prosperous husbandry and you make the greatest stride in that direction. The farmer is for peace; he is never a despoller. He brings on no wars, although, like the hunting-shirt men under Jackson, he does the best fighting when it needs to be done.

We talk about world disarmament; let a nation produce a surplus of prime necessities of life which other nations must come to it to obtain or go hungry and unclothed, and you have a nation in position of supreme power.

I would encourage, not undermine, the policy of self-help and

individual initiative.

But something must be done to give this oldest and really only absolutely necessary industry its proper place in the Nation's economy.

We know that about 1880 the cooperative movement for the benefit of agriculture became very active in Germany, Italy,

Denmark, France, and other continental countries.

Sir Horace Plunkett and a Jesuit priest, Father Finlay, just from his studies in German universities, organized the pioneer society of agricultural cooperation in English-speaking countries, the Irish Agricultural Organization Society, which has brought into existence all the present societies, combining 100,000 Irish farmers, giving an output valued at £2,500,000 annually. They apply the cooperative principle to agricultural production, distribution, and finance.

In sporadic instances that course is pursued in the United States. I have been informed that a cooperative society about Summerville, S. C., saved last year to its members \$7 per ton

on the fertilizers the members used.

EXPERIENCE IN OLDER COUNTRIES.

The three causes which revolutionized Irish farming are given as: Land purchase, whereby the farmer became the owner of the land; technical education, whereby he was taught to do better farming; and agricultural cooperation, whereby business methods were applied to the industry and the produce was disposed of to the best advantage. The Irish Agricultural Organization Society has successfully demonstrated that the cooperative system is capable of enabling the farmer to produce and distribute efficiently and economically, and at the same time to finance both these operations. Credit societies have been formed as auxiliary to the cooperative society.

There are some 200 rural banks in Ireland. One of the first forms of cooperation on the Continent, and the most useful, was cooperative credit. No loss has come to anyone in their operation in all the years since Raiffeisen started the plan in 1849.

In 1884 the idea took fast hold in France and the agricultural syndicates were established and soon came to be considered veritable public utilities.

regression to the considered verifable public utilities.

To-day there are 4,000 syndicates, having a million members, representing 5,000,000 of the rural population of France.

There are 1,350 credit societies after the Raiffeisen principle,

There are 1,350 credit societies after the Raiffeisen principle, having some 60,000 members. There are 1,500 societies of agricultural credit under the law of 1894, which inaugurated a special type of bank composed of members of agricultural syndicates.

These societies have resulted in doubling the produce of the land, enabled the farmers to meet the competition of other coun-

tries, attached the people to the soil, advanced the rural population in prosperity and in economic, moral, and social improvement. An illustration of the way cooperation works is this statement: The syndicate chartered steamers to carry strawberries to London, and growers doubled their profits over what they were when they consigned to Paris and left Paris to sell to London. Foreign trade was established in the same way in fruits and early vegetables, to the immense advantage of the growers.

In Germany there are 17,000 credit societies, with 1,500,000 members. These and the Landschaften and other institutions providing for amortization and low rates of interest on long-time loans have redeemed agriculture in Germany. The German farmer and the French obtain all the money they need under the cooperative credit system at 3 to 4 per cent.

The farmer must have capital. He must provide for annually recurring requirements. He must have the means of using his asset (land) to get money as capital. Relief can not come through a system of commercial banking. There is need for a special kind of bank, authorized to use its credit to guarantee long-term loans, so as to meet the farmers' capital requirements.

These can not be met by direct loans from any bank. The railroads are financed by the sale of long-term bonds, based on capitalized prospects, rights, and property. The farmer needs an institution to guarantee his bonds and make them saleable; one that would furnish not only the capital requirements of the farmer, but his annually recurring needs, naturally bringing about business methods, necessitating organization and cooperation, thus covering the entire field of agricultural reconstruction and making conditions for ideal rural life.

I can not too strongly urge that a special kind of bank, a system separate and distinct from commercial banking, must be established in order to supply the needs of agriculture and

rural life.

The deposit of postal savings funds and, perhaps, the governmental funds with the rural banks thus established would be wise and helpful, enabling the banks controlled by individual farmers, familiar with the needs of their communities, to make the loans as needed.

The objection that such facilities would encourage debt and extravagance is unsound. On the contrary, the effect would be to lend hope to the farmer, brighten the lives of the country men, instill habits of thrift and economy, give open accounts and savings accounts, and promote business methods, so much desired, and strengthen the independence and self-reliance of the rural population.

The experience of older countries is contrary to the apprehension indicated. By the establishment of financial institutions primarily for the benefit of those engaged in agriculture and by methods of cooperation in various directions that industry has, perhaps, attained its highest development in Germany. With an area of 208,780 square miles—not as large as Texas by an area greater than Alabama (53,618 square miles)—that Empire produces 95 per cent of the food required for its 67,000,000 people.

The contention may be that an act creating a rural banking system would be class legislation. This is not well founded. Agriculture, commerce, and industries are the three great pillars of support and strength. The banking system heretofore in force contemplated meeting the requirements chiefly of the last two-commerce and industries. Agriculture has been left out of the reckoning. No commercial banking provisions can supply the needs of the farmer and must largely be confined to commerce and industries. The man engaged in trade and the manufacturer must have facilities which are entirely different from those needed for the farmer. The time has come when the chief stone of the temple must be considered. We can no longer neglect suitable financial provision for the farmer. Statistics furnish argument enough when they show the population of the United States increased from 1900 to 1910, 21 per cent, while the number of workers increased on the farm during that period only 10.9 per cent and the workers in the factories increased (1900-1909) 40.3 per cent and in the mines (1902-1909) 83.1 per cent.

The criticism may be made that the proposed legislation smacks of paternalism. Not at all. The Government is asked for no subsidy. The postal savings must be deposited somewhere; why not in the rural banks? It simply means providing by law a means of self-help. Individual initiative by the farmers must be exercised in order to make the system a success. The Government does no more in this matter than it does in respect to commercial banks. It gives opportunity, furnishes the machinery, supplies the working tools or a chance to get and use them. Laws applicable to the sea are peculiar and different from the laws in force on land, because the condi-

tions are different.

The conditions of rural life are not at all the same as conditions of life in the cities. Laws governing commerce are not the same as those with respect to mining. The proposition simply is to establish a system of agricultural finance suitable to the needs of those priests of nature who live nearest the fountain of life in the divine economy and on whose prosperity the welfare of all depends.

It would mean that agriculture is not to be longer subordi-

nated to commerce and industry.

The Government should play no favorites. The moral and material upkeep of the rural population is quite as important as the development of urban industries or commercial expansion. The strength and health of society depend on the intelligent labors and well-being of the countrymen.

We must look after something more than merely giving instruction how to cultivate, produce, and market. We must do those things which will create a social order and adjust it to

human needs.

We can provide the machinery whereby the farmer can protect himself, and by its intelligent use reconstruct his great industry and redeem rural life from stagnation and decay.

That the time has come for the taking of steps of this kind is clearly indicated, I think, by what has been already said, to which I might add references to a few more statistics.

Mr. President, I offer certain tables, which I ask to have printed as a part of my remarks.

The VICE PRESIDENT. Without objection, leave will be granted.

The tables referred to are as follows:

Table 1.—Number and percentage of farms of specified tenure in the United States, 1880 to 1910.

[From decennial census of agriculture.]

Year.	Number operate		Percentage of farms operated by—	
	Owners.1	Tenants.	Owners.1	Tenants.
1880 ² . 1890 ² . 1800 .	2, 984, 306 3, 269, 728 3, 712, 408 4, 006, 826	1,024,001 1,294,913 2,024,964 2,354,676	74.5 71.6 64.7 63.0	25.5 28.4 35.3 37.0

1 Includes farms operated by owners, part owners, owners and ten-

ants, and managers.

Not including farms with an area of less than 3 acres, which reported the sale of less than \$5 worth of products in the census year. (This table can be expanded to a showing by geographic divisions and by States.)

TABLE 2 .- Urban and rural population in the United States, 1880 to 1910. [Urban population resides in incorporated places of 2,500 inhabitants and over.]

Year.	Num	ber.	Percentage.	
	Urban.	Rural.	Urban.	Rural.
1880	14, 772, 438 22, 720, 223 30, 797, 185 42, 623, 383	35, 383, 345 40, 227, 491 45, 197, 390 49, 398, 883	29.5 36.1 40.5 46.8	70.5 63.9 59.5 53.7

Note.—Quotation from abstract of the Thirteenth Census. (This table can be expanded to a showing by geographic divisions and States.)

-Number and percentage of farms in the United States mort-gaged and free from mortgage, 1890-1910. TABLE 3 .-

[From decennial census.]

	Num	ber.	Percentage of owned farms.	
Year.	Mortgaged.	Free from mortgage.	Mort- gaged.	Free from mortgage.
1890	886, 957 1, 127, 749 1, 327, 439	2, 255, 789 2, 510, 654 2, 621, 283	28. 2 31. 1 33. 6	71.8 C8.9 66.4

-The figures are for farm families in 1890 and for farms in 1900 and 1910.

(This table can be expanded to a showing of geographic divisions and States.)

Table 4.—Percentage of farm-mortgage debt of the value of the mort-gaged farms, 1890 and 1910.

[From decennial census.] 35. 5 27. 3

Mr. FLETCHER. Table 1 has been prepared from the census reports as far back as 1880, and the results of these censuses with regard to farm tenure show that the fraction of farms operated by tenants has steadily increased from 25.5 per cent in 1880 to 37 per cent in 1910.

It appears also from this table that the fraction of farms operated by owners decreased from 74.5 per cent in 1880 to 63

per cent in 1910.

The actual and relative urban and rural populations from 1880 to 1910 are expressed in Table 2, and in this table it appears that the rural population has declined from 70.5 per cent of the total population in 1880 to 53.7 per cent in 1910. Conversely the urban population has increased from 29.5 per cent in 1880 to 46.3 per cent of the total population in 1910. These figures do not mean that the changes in the relative proportions of these two classes of population have been caused entirely by the movement from country to city. Immigrants have tended more and more to remain in the cities, especially in New England and in the Middle States.

The censuses of 1890, 1900, and 1910 took account of the number of farms operated by owners that were mortgaged or were free from mortgage, and the results are expressed in Table 3. The fraction of farms operated by owners that were mortgaged increased from 28.2 per cent in 1890 to 33.6 per cent in 1910.

The bulk of the farm-mortgage debt is incurred to secure deferred payments and to make improvements. This was thoroughly investigated in the census of 1890. See Abstract of the Eleventh Census, page 243.

Farms were worth more per acre in 1910, including improvements, than they were worth in 1890, and because of the increase in the value of lands the ratio of farm-mortgage debt to the value of the mortgaged farms declined from 35.5 per cent in 1890 to 27.3 per cent in 1910. See Table 4.

The decline in exports in the case of wheat and most of the

packing-house products has been marked. In the exports of

cotton it is true there has been enormous increase.

In connection with an examination of the trend of exports of farm products it may be borne in mind that the imports of agricultural products has been greatly increased.

The fact that agricultural production is not keeping pace with consumption is full of meaning. This diminution of agricultural surplus may be partly due to the effect of unfavorable climatic influences upon production; but it is also due in part to the building up of cities by immigration and to the drift from agriculture to other occupations at a faster pace than formerly. The movement from country and farm to city and town exists and has existed in all parts of the United States, and it everywhere exceeds the contrary movement, such as it is,

Last year we produced on our farms and in our factories and mines products valued at \$40,000,000,000, of which we consumed thirty-eight billion and exported two billion, in round numbers. We imported and consumed commodities from other countries of the value of \$1,800,000,000. The important part cotton plays in the balance I need only suggest.

ILLUSTRATIONS-RURAL CREDITS.

To be sure, there is no "royal road" to success in farming any more than there is to learning.

Everything depends on the individual farmer-his industry,

judgment, and capabilities.

But, assuming he has the necessary sense, energy, and ambition, he could get much further ahead, accomplish much more, enjoy life to a fuller degree if he is enabled to make judicious financial arrangements on terms two or three times as advantageous to himself as he can now.

Certainly it means much to the country if a plan can be devised and put into execution whereby the worthy and industrious man may secure a farm, which lack of cash or credit makes impossible to him now. It would count for the indi-vidual and the general good if a way could be found whereby the people may be attached to the soil in contentment, comfort, and prosperity, whereas now they seek the city for employment yielding only a bare existence.

It would help mightily in the well-being of society if a plan of organization or cooperation can be put into use whereby the tenant can acquire a home for himself and become the owner of the farm he cultivates.

These ends can be attained by profiting by the experience of others whose necessities compelled a solution of the problem

For instance, take this illustration from a Danish mortgage society law, mentioned by the commission on rural credits and betterment: Members of the company (farmers who have mortgaged their property) must pay a yearly amount of 4 per cent interest, three-fourths of 1 per cent amortization, and one-fourth of 1 per cent for expenses, making altogether 5 per cent per

annum, with the result that in 47 years their debts, principal and interest, are paid in full.

The American farmer mortgages his farm and pays from 7 to 10 per cent interest per annum. The average rate of interest paid by the American farmer to-day is 7.79 per cent per annum, while the German pays 3½ to 4 per cent, notwithstanding interest rates are generally higher there than here. His mortgage runs for 3 to 10 years—no matter what time—at the end of which he must pay the entire principal. Suppose, with renewals, his mortgage runs 12 years. He would pay 90 to 95 per cent for the use of his money for that time. The Danish farmer would pay 135 per cent for his money for 47 years. The American farmer would pay 7.5 per cent a year for his

money—the Dane would pay 2.9 per cent.

The Dane's loan is an investment. He can afford to borrow money to improve his farm or purchase his farm at that rate. The American is in debt and mortgaging his home; the Dane is using his credit. Each year, while paying only 5 per cent on the money received, the Dane is getting out of debt. The American is paying 7 to 10 per cent and not reducing his debt a penny. At the end of 47 years—or less time if he chooses to pay more the Dane is out of debt and his premises are free. At the end of any period—even 100 years—the American would owe the original principal, his premises would be encumbered by the mortgage, although he will have paid twice as much as the Dane.

A special imperial act provides for cooperative societies in Germany. As we have seen, there are 17,000 cooperative agri-cultural banks in Germany, with a total membership of over one and a half millions. The loans outstanding at the end of 1910 for fixed periods, together with overdrafts, amounted to £93,034,000, while the savings deposits totaled £92,429,000, and the deposits on current account amounted to £10,865,000.

The late distinguished minister of finance in Prussia, Herr von Miguel, some 17 years ago said in Parliament:

This must be our goal-to have a cooperative loan bank in practically every parish of the whole monarchy.

The result is the transaction with the German farmer is as follows: On a loan made at 4 per cent is added three-fourths per cent for amortization, one-fourth per cent to cover operating expenses of the association, and by paying this amount, a total of 5 per cent annually for between 40 and 50 years, the entire loan is paid off. The farmers of this country must be got out of the clutches of money lenders, such as demand uncon-scionable rates and terms, factors who charge outrageous interest on advances, merchants who sell him goods on time at double prices, middlemen who take advantage of the situation to despoil him, transportation companies which take all his products will bring him and call for more. I do not say these practices are universal or that the farmer is commonly imposed upon; but the picture is quite too familiar and at

present he is too often helpless.

Mr. OWEN. Mr. President—

The VICE PRESIDENT. Does the Senator from Florida yield to the Senator from Oklahoma? Mr. FLETCHER. I do.

Mr. OWEN. I understand that even at the other end of the earth, in New Zealand, they have a plan of lending money to farmers at 3 per cent on the principle of amortization, so that at the end of 30 years, on an extremely low rate of interest a farmer can acquire a home or borrow money on the home, improve it, make it more productive, and by the use of easy credit produce the values from the home easily to pay for its development.

I do not know whether the investigators studied the New Zealand method or not, and I should be glad to have the report include the New Zealand method of farm land credits.

Mr. FLETCHER. Mr. President, the commission did not visit New Zealand, but I do not doubt that the Senator from Oklahoma is entirely correct in his statement of the practice there. I have, however, no information on that subject through the commission or from any investigation which I have made. I have not any question but that the Senator's statement is correct. The system there is similar to the system which has been in existence and in operation in Germany for a great many

The farmer, to whom we must go for what we eat and wear, should and must be a free man, when he is fit and does his part, and not the slave of grinding conditions. Some of these conditions can be remedied by legislation. We surely can find a plan adaptable to circumstances here which will build up the economic as well as the social structure of rural life.

I wish to submit as a part of my remarks the preliminary statement agreed upon by the permanent American commission, on board of the steamship Cedric as they were returning from the

investigations in Europe, in cooperation with the United States commission, heretofore mentioned.

The VICE PRESIDENT. Without objection, leave will be granted.

The statement referred to is as follows:

PRELIMINARY STATEMENT OF THE AMERICAN COMMISSION.

The VICE PRESIDENT. Without objection, leave will be granted.

The statement referred to is as follows:

FREIMINARY STATEMENT OF THE AMERICAN COMMISSION.

The American Commission on Agricultural Cooperation has completed its tour of European countries and has perfected plans to digest and organization of rural life in European countries along financial, business, and social lines. It is believed that this task can be completed before the end of the present year, when the final report of the commission is deeply impressed with the vital importance of a theoroughly organized and united rural population. In this respect the manufactural interests of most of the European countries visited by the commission are organized along one or more of the following betterment of country life.

Organizations for the provision of credit facilities for European farmers follow the natural division into short-time presents credit and long-respective to the commission of credit facilities are as highly developed as are the systems of commercial banking. The prevailing rate of interest paid by the farmer follow the natural division into short-time presents and by the farmer following the prevailing rate of interest paid by the farmer following the prevailing rate of interest paid by the farmer following the prevailing rate of interest paid by the farmer following the prevailing rate of interest paid by the farmer following the prevailing rate of interest paid by the farmer following the prevailing rate of interest paid by the farmer following the prevailing rate of interest paid by the farmer following the prevailing rate of interest paid by the farmer following the prevailing rate of interest paid by the farmer following the prevailing rate of interest paid by the farmer following the following the form of cooperative should be followed by the farmer following the prevailing rate of interest paid by the farmer following the following following the following following following the following following following the following followi

economists, leading agriculturists, and business men all contributed with most gratifying willingness to the successful accomplishment of the work of the commission.

The commission has selected two committees to draft the final report regarding the investigation to submit to the full commission.

The members of the compliation commission are: Dr. Kenyon L. Butterfield, of Massachusetts, president of the Massachusetts Agricultural College and formerly a member of the Roosevelt Country Life Commission; Dr. John Lee Coulter, the Government's expert on agricultural statisties: Mr. Le Roy Hodges, formerly immigration commissioner of the Southern Commercial Congress; Dr. Charles F. Balley, deputy minister of agriculture. Province of Ontario, Canada; and Mr. Robert L. Munce, of Pennsylvania, farmer.

The members of the advisory committee are: Dr. J. E. Stubbs, president of the University of Tennessee; State Senator John Cunningham, of Ohlo, farmer: Robert B. Van Cordiandt, of New York, farmer and retired banker; William B. Hatch, of Michigan, editor and farmer; Col. J. S. Williams, of Texas, farmer; and Lieut. Gov. E. L. Daughtridge, of North Carolina, farmer.

Mr. FLETCHER, Any financial system is insufficient, in-

Mr. FLETCHER. Any financial system is insufficient, inadequate, and fails utterly in its application which denies to that great industry lying at the base of all wealth and which must prosper if there is to be prosperity, which must make progress, if there is to be any, and which must keep pace with the times and improve in method in order to supply the increasing demand of a growing population just and fair facilities equal to those furnished the other great industries.

It is said the farmers' assets are not liquid, therefore they can not be utilized, as, for instance, goods moving in trade. do not dispute the claim. I simply say then the farmer must have a system or plan different from the commercial plan suitable to the proper demands of agriculture. There is a necessary relation between cooperation and organization among the farmers and a banking scheme which must be evolved in solving their financial problems. Credit is necessary to suc-cessful cooperation. Organization on a cooperative basis will make possible the establishment of a system of agricultural credits. The most eminent authority on German commercial and agricultural banking, Prof. Reisser, says, "Agriculture reand agricultural banking, Prof. Reisser, says, "Agriculture requires a credit system adapted to the special nature of its production." Let us have this great economic truth sink into our minds to stay. Let us not ignore or blot it from our memories. Fully cognizant of its meaning let us face the problem in the blazing light of that truth.

By Bulletin No. 1, April, 1913, by John Lee Coulter, it appears that of the total loans made by national banks only 6 per cent are secured by real estate, including mortgage owned; that of

are secured by real estate, including mortgage owned; that of the total loans made by mutual savings banks, 42.6 per cent are so secured; that of the total loans made by stock savings banks, 40.6 per cent are thus secured; that of the total loans made by loan and trust companies, 10 per cent are thus secured; that of the total loans made by private banks, 20.5 per cent are thus

As I understand, this includes all real estate, and I dare say a comparatively small portion of the real estate included is country property.

NECESSITY FOR A COMPLETE SYSTEM OF RURAL BANKING.

Mr. President, in what I have said I have sought to present a kind of general survey of the economic situation as affecting agriculture as an industry, a business, and a life, for it means all of these.

Particular reference has been had to pending and proposed legislation respecting what is designated "currency reform," as related to that situation. I have sought to concisely state some reasons why I regard it highly desirable, if not absolutely necessary, that legislation, such as the pending Federal reserve bill, should be enacted into law, and that speedily.

I have endeavored to point out that our present system of national banks is a commercial system, incapable of meeting the

needs of agriculture.

I have contended that the Federal reserve bill likewise is necessarily limited to the demands of commerce and industries. I have attempted, though in a cursory way, to point out the efforts made in other countries to save agriculture by cooperative organizations and the establishment of banking and credit systems and to suggest that we profit by the experience and example of older countries, compelled by necessity to devise and put in operation such systems that agriculture might prosper.

I have sought to give a glance at the status of agriculture in this country, its importance, its problems, and rural condi-

tions to-day.

I have particularly aimed to stress the disadvantages under which the farmer now labors by reason of the lack of proper financial facilities, and to point out the necessity of a separate, distinct banking law under which institutions will be organized which can be authorized and empowered to supply the peculiar needs of the farmer.

I contend that adequate banking facilities are necessary to the successful conduct of any business; that for this large class of our citizenship, about one-third of our population, and for this great industry upon the prosperity of which the welfare of the Nation depends, there has been heretofore no sufficient provision for meeting their banking necessities.

I contend further their financial requirements can not be sufficiently provided for, except through a special system of

rural banking.

I would like now to be more specific, both as to the needs and the remedy. Before attempting to provide a remedy you will want to clearly understand the needs.

The needs of the farmer, as I conceive them, can be stated, in a condensed way, under three general heads, as follows: FIRST. THE NEED OF CAPITAL TO ACQUIRE, IMPROVE, AND EQUIP HIS FARM.

The cost of improving and equipping his farm is as much a part of the capital requirements of the farmer as the cost of the machinery in a cotton mill is a part of the capital cost of the mill. No class of men should be expected to work without tools or to make bricks without straw. A certain amount of money must be invested as capital in any business in order to equip that business and enable it to earn proper returns. This capital must be permanently invested or else it must be loaned to the business for a long period on such terms that the loan can be repaid in small annual installments out of a portion of the profits derived from the business. This is felt keenly, too, when one desires to purchase land and acquire a home in the country. A remedy means tenants will become owners.

SECOND. BANKING FACILITIES.

The farmer must have available institutions which can meet his temporary banking requirements. He must be able to borrow for a few months some of the money needed to till the soil and to harvest and market the crop. Like the merchant who seeks temporary accommodation to secure money with which to discount his bills and pays back this money out of the proceeds of sale of the goods purchased therewith, so the farmer must likewise be able to borrow temporarily to discount his bills for fertilizer, seed, and so forth, and for the purpose of carrying on his business during its nonproductive period. Such loans must run for a few months, must be repaid out of the proceeds of the crop, and should not properly be borrowed on a real estate mortgage on the farm any more than the manufacturer's temporary accommodations for discounting his bills should be borrowed on a mortgage on his plant.

THIRD. BUSINESS METHODS IN THE CONDUCT OF HIS BUSINESS.

The farmer, like the merchant, will ultimately keep an accurate statement of the condition of his business, so that he can always ascertain whether he is operating at a profit or at a loss, and he will cease depending on the business man to conduct all business transactions for him. He will adopt business methods and put them in practice in his own affairs.

HOW THESE NEEDS CAN BE SUPPLIED.

If this analysis of the farmer's needs approaches accuracy, the important question then is, How can these needs be supplied? And it must be remembered that these needs have been stated in the order of their importance, and that, in order to meet the requirements of the situation, it is necessary to provide some machinery for supplying these needs in the order named.

FIRST, HIS CAPITAL NEEDS.

How can the farmer secure capital for the improvement and equipment of his farm or for the purchase of a farm?

The answer is obvious. The farmer has only one asset, viz, land, on the credit of which he can secure capital. He must secure his capital by borrowing on his land. Remembering that this capital must be in substance a permanent investment, it is obvious that any loan on land, made for the purpose of supplying the capital requirements of the farmer, should be a longtime loan, repayable in small annual installments set aside by the farmer for that purpose out of the annual profits derived by reason of the purchase or the improvements and equipment made possible by the loan. A loan of one year or three years or five years will not furnish the farmer's capital requirements, because he obviously can not repay it from his profits in that time. No other business could pay off its capital investment within such a period.

It is plain, therefore, that the best if not the only method of furnishing the capital requirements of the farmer is the creation of a long-term first-mortgage bond, secured on his land, which bond shall contain an amortization or sinking-fund provision, so that a small amount will be set aside each year sufficient in the aggregate to pay off the bond when it matures.

This is analogous to the German Landschaft plan.

Moreover, the capital requirements of the farmer, like the capital requirements of the merchant, manufacturer, or the railroad, can not be met by direct loans from the banks. The farmer's loans, made to furnish his capital requirements, should run from 20 to 50 years. No bank can loan money for such a length of time. The money must be borrowed from the invest-

Consequently the problem is not only to create such a bond, but more than this, it is to create such a bond in such a way that it will be bought and traded in by the investing public on

In order to do this, the bond must not only be secured on the land but it must be guaranteed by some financial institution or institutions of sufficient standing to satisfy the investor that the bond is absolutely beyond question. Just here is where a special system of banks is needed, which will be authorized to use their credit in guaranteeing such bonds under restrictions which will reduce the risk of such guaranties to a minimum. Such banks must be limited in their operations, so that a guaranty of this kind will not, under any circumstances, endanger their solvency.

SECOND. HIS TEMPORARY BANKING NEEDS,

The temporary banking facilities needed by the farmer must be supplied by local institutions managed and controlled by his neighbors, who are familiar with his needs, and who will see that the money borrowed is applied to the purposes for which it was This means that the farmer should have available the services and resources of a local rural bank, owned and managed by local people, which will collect together the neighborhood funds and make them available for neighborhood purposes. In the system outlined in the bill which I have offered, these local rural banks serve this purpose, and are also permitted to use their credit to guarantee the long-term bonds of the farmer, and so aid in supplying his capital requirements, which are the first and greatest needs. This follows the idea of the Raiffeisen system, to which I have alluded.

THIRD. HIS NEED OF BUSINESS METHODS

The observance of business methods by the farmer and the keeping of proper accounts can not and could not be enforced simply by legislation. Business methods will be observed only where business conditions require the observance. The observance of business principles by the farmer will be accomplished when the banks which lend him the money for his temporary requirements demand the observance of such practices and the keeping of proper accounts as a condition of such loans. local rural bank provided for in the bill will induce the farmer to keep accurate accounts as a condition to his obtaining the desired credit to meet his annually recurring banking needs.

HOW THE BILL MEETS THESE REQUIREMENTS.

The bill, through a system of rural banks, limited as to their operations and containing the power to use their credit in guaranteeing long-term farm bonds, furnishes a means of meeting these three essentials of any banking system suggested for the rural population. The rural banking board is so constituted and given such powers of supervision and control as to safe-guard all transactions and have the system conform to correct principles.

COMMERCIAL BANKS ARE UNABLE TO MEET THE REQUIREMENTS OF THE FARMER.

I feel quite convinced that we can not expect a system of commercial banking to meet the needs of the farmer. It is recognized all over the world that no commercial banks can with safety be allowed to execute a pure contract of guaranty. A commercial bank can not afford to guarantee the payment of long-term bonds. Its assets must be quickly convertible and must become due and payable within a short period. By concensus of opinion it is generally recognized that it is unwise for commercial banks to lend money for a longer period than four months. It must be in position to respond to any liability

FIRST, CAPITAL,

As the farmer's capital requirements must be met by longterm loans obtained from the investing public, as the guaranty of these long-term bonds by some financial institution is necessary to their sale, as a commercial bank can not safely execute a contract of guaranty, it is obvious that commercial banks can not meet the farmer's capital requirements.

SECOND. TEMPORARY BANKING FACILITIES.

As commercial banks can not safely grant temporary credit for longer than four months, and as the farmer's requirements are for temporary accommodations for a longer period (or until the crop comes in), it is equally obvious that commercial banks are not suited to supply the annually recurring banking needs of the farmers.

THIED, BUSINESS METHODS

Commercial banks, as a rule, are located in cities, towns, villages, or other centers. They are usually remote from the farmer. Being remote, they are unable to make small loans needed in the operation of his business because of the expense incident thereto and because they can not keep in close enough touch to ascertain if the money derived from these loans is used for the purposes for which it was granted. The local rural bank is accessible, convenient, and conducted at nominal expense.

THE PRESENT CURRENCY BILL.

Let me recur again to the pending Federal reserve bill, which is generally referred to by the public as a "currency-reform measure." As a matter of fact, it is more than this. It is, in fact, a bill for the reform of the currency and for the reform of the existing commercial banking system. But the bill refers only to commercial banking and not to rural banking, as heretofore stated.

As a currency bill I favor the Federal reserve bill. reform of commercial banking I favor it. I am prepared to say that in the effort to meet the needs of the farmers it has gone further than any commercial banking act has ever gone. I respectfully insist that the farmer's needs can not be dealt with and should not be dealt with in a commercial banking bill.

This is so important I feel justified in repeating that it must be evident that the Federal reserve bill, although it attempts to grant some relief to the farmers, does not meet the needs of the situation. The only provisions in the bill to meet the farmer's banking requirements, as we have seen, are contained in section 27. This provides that not exceeding 25 per cent of the capital and surplus or 50 per cent of the time deposits of certain banks can be loaned on the security of unencumbered lands for not exceeding nine months.

This provision, from the standpoint of the farmer, is inef-

fectual for three reasons:

First. Because a nine months' loan can not furnish the capital requirements of the farmer, for obvious reasons. It is not a permanent investment. It is not a loan which can be repaid out of the profits of the business.

INEFFECTUAL.

Second, The class of loan provided is not suited to meet the annually recurring banking requirements of the farmer. meet his temporary financial needs a farmer can no more afford to put a mortgage on his property than the manufacturer could afford to put a mortgage on his plant in order to secure a ninety-day, accommodation.

INADEQUATE.

Third. The relief afforded in the bill is, moreover, inadequate, The present mortgage loans on farms in the United States approximate \$3,000,000,000. In explanation of section 27 of the bill, the chairman of the committee has said, in effect, that if every bank in the system loaned every dollar that it could under this provision there would be available about \$250,000,000, which is just about one-fourteenth, or 7 per cent, of the present requirements, and is obviously inadequate.

SPECIAL BANKS NECESSARY.

The conclusion is irresistible that rural banking should be provided for in a separate system from commercial banking; that rural banks should have a special power to use their credit in addition to their cash resources to meet the needs of the farmer, and especially in order to aid the farmer to obtain capital, and should, on the other hand, be limited and restricted as to their operations and activities, so that the use of their credit will not impair their solvency.

Some critics have suggested that bankers and capitalists

would like to facilitate the mortgaging of farms and issuing of bonds in the expectation that they might eventually own the farms. Here, again, the experiences of other countries is help-In Saxony 85 per cent of the land-mortgage bonds are held by the people of that Province. The rural people themselves are the chief and, in most instances, almost the exclusive owners of the bonds. The terms are so favorable to the borrower as to interest, reductions, and payments there can be no excuse whatever for losing his land.

Mr. President, I frankly say that the bill I have introduced has its weaknesses. It is not claimed to be perfect. It is not the last thought or the final word on the subject by any means. It has the merit of proposing something definite, and my hope is it will provoke discussion and lead to action now. It seems to me greatly preferable to have it considered at this time rather than have it go over to next session. It ought to be taken up and, if possible, considered and acted upon along with the commercial-banking bill.

Mr. President, there is no more important subject before the people of this country to-day than the unsolved problems of rural life

It is gratifying to note that interest is being aroused on this subject and our people are stirring in an unprecedented fashion. The highest country ideals mean the highest civilization.

If we can set in motion agencies that will bring about the highest type of an advanced rural society, we will have done a most useful public work.

If we can start moving forces which will develop the best country life, we will have answered the call for genuine service.

We make a tremendous contribution in those directions when we reach out our hand to the tillers of the soil and say, "We will start with you on the land; we will be with you in the cultivation, go with you to the markets, and open the way for you to finance your affairs."

When that is done, fair opportunity will widen the horizon and beautify the lives of those engaged in agriculture. It will open the way for the betterment of rural conditions, even as Daniel's window opened toward Jerusalem.

Mr. President, I move that the resolutions and the bill be referred to the Committee on Banking and Currency, and that the statement which accompanies the bill, explaining it, may be printed as a document. (S. Doc. No. 158.)
The motion was agreed to.

INVESTIGATION OF ATTEMPTS TO INFLUENCE LEGISLATION.

Mr. REED. I send to the desk a resolution and ask that it be read. I shall then make a statement in just a few words

The resolution (S. Res. 159) was read, as follows:

Resolved, That the expenses of the investigation of the charge of a "lobby being maintained in Washington," ordered by the Senate under resolution of May 29, 1913, be paid out of the contingent fund of the Senate upon vouchers to be approved by the chairman of the Committee on the Judiciary or the chairman of the subcommittee thereof. The stenographers employed shall receive a compensation at a rate not to exceed \$1 per printed page. Mr. REED. Mr. President, I ask unanimous consent that the

Mr. WILLIAMS. Mr. President—
The VICE PRESIDENT. The Chair thinks that under the statute the resolution ought first to go to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. REED. I understand that by unanimous consent the

Senate can do almost anything.

The VICE PRESIDENT. The Chair does not think so. The Chair does not think that will satisfy the statutes of the United States

Mr. WILLIAMS. There is a statute covering the subject. can assure the Senator from Missouri that the committee will take up and consider the resolution as soon as possible.

The VICE PRESIDENT. The resolution will be referred to the Committee to Audit and Control the Contingent Expenses

of the Senate.

Mr. REED subsequently said: Mr. President, I ask consent at this time to report favorably with an amendment from the Committee to Audit and Control the Contingent Expenses of the Senate the resolution submitted by myself this afternoon. The amendment appears upon a separate sheet.

Mr. GALLINGER. Let the resolution be read.

The VICE PRESIDENT. Is there any objection? The Chair hears none.

Mr. GALLINGER. Let the original resolution be read. The VICE PRESIDENT. The Secretary will read the resolu-

The Secretary. The original resolution reads as follows:

The SECRETARY. The original resolution reads as follows:

Resolved, That the expenses of the investigation of the charge of a

"lobby being maintained in Washington," ordered by the Senate under
resolution of May 29, 1913, be paid out of the contingent fund of the
Senate upon vouchers to be approved by the chairman of the Committee
on the Judiciary or the chairman of the subcommittee thereof. The
stenographers employed shall receive a compensation at a rate not to
exceed \$1\$ per printed page. The action of said subcommittee in employing clerks is hereby ratified, and the expense so incurred shall be
paid out of the fund aforesaid.

Mr. DEFED. The expendement has been written in there It

Mr. REED. The amendment has been written in there. It comes in at that point.

The Secretary. The following amendment is proposed:

The committee is authorized to continue the employment of such clerks and stenographers until the work of the committee as authorized be completed.

Mr. GALLINGER. Mr. President, I will venture to ask the Senator from Missouri whether or not the end of this investigation is anywhere in sight?

Mr. REED. I can not answer that question. Mr. SHAFROTH. What is the question?

Mr. GALLINGER. I asked the Senator from Missouri whether the end of the so-called lobby investigation was in

Mr. SHAFROTH. The Senator from Missouri knows more about that than I do.

Mr. GALLINGER. I asked the question of the Senator from Missouri.

Mr. REED. I can not answer the question. The committee has been proceeding as rapidly as it could with some regard for some of the duties of the Members here. The expenses have been held to the absolute minimum. The only reason for requesting the adoption of the resolution at this time is that a technical objection has been raised to it as it was originally submitted, in which it is claimed that there was no authoriza-tion of clerks. The only clerks employed have been some five or six people to separate, out of something like 150,000 or 200,000 letters, those which appeared to be somewhat pertinent to the inquiry. Their work is almost completed, although probably there will be a couple of indexes to be prepared.

Mr. GALLINGER. Beyond question provision ought to be made to pay the expenses of the investigation; and yet I am somewhat curious to know exactly how far it is going. Almost every suggestion that is made here about somebody being around the Capitol, as a suggestion was made this morning concerning Mexico, is met with the remark, "Why, let the lobby committee take it up." Some of us had not thought the field would be as wide as it has proved to be.

I have noticed that about 4,000 printed pages have been sent to us. That means \$4,000 for stenographic work. Of course, I have no disposition to curtail the work of the committee; and yet I venture to say that I trust the committee will exclude everything they can in the future, so as to get to the end of the investigation, and make a report.

Mr. REED. Mr. President, nobody wants to quit this work more, I think, than the members of the committee, because it is

very onerous.

I ask for the present consideration of the resolution.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The Senate, by unanimous consent, proceeded to consider the resolution.

Mr. WILLIAMS. Mr. President, the Committee to Audit and Control the Contingent Expenses of the Senate has reported the resolution favorably; but before we dismiss the subject I want to express the hope that the committee to discover lobbies in Washington will not quit until it has investigated the lobby—the paid syndicate which I believe to exist—which is trying to propagate and bring about a war between the United States and the Republic of Mexico. The original language of the resolution is broad enough to cover that question, and I hope the committee will go into it before it ceases its labors.

I am firmly convinced that special interests—moneyed interests in Mexico and moneyed interests in the United States are enlisted in bringing about a war between this country and that country. It is of the utmost importance to the American people, if that be a fact, as I believe it to be-I do not know with any degree of absolute personal knowledge—that it should be examined into before the committee adjourns.

Mr. GALLINGER. Mr. President, I will add to what I have said that I sincerely hope this committee, which was appointed for a different purpose, will not enter upon an investigation of matters connected with our relations with Mexico.

There may be somebody who wants a war. I do not know who he is. I am sure I do not want a war. I can not believe there is a conspiracy on foot to plunge the United States into a war with any country. I think it would be "love's labor lost" if the committee should undertake that investigation.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the committee.

The amendment was agreed to.

The resolution as amended was agreed to.

PHILIPPINE INDEPENDENCE (S. DOC. NO. 159).

Mr. SHAFROTH. Mr. President, I ask unanimous consent that an article by Mr. Moorfield Storey, relative to the Philippine Islands situation, be incorporated in the Record or printed as a public document.

The VICE PRESIDENT. Is it the Senator's request that

the article may be printed as a public document?

Mr. SHAFROTH. I ask that it may be incorporated in the RECORD.

Mr. SMOOT. I did not hear the Senator's statement as to what the article is.

Mr. SHAFROTH. The article is one by Mr. Moorfield Storey relative to the Philippine Islands situation. It is a very able

document and one that he has taken considerable time to prepare. It is upon a subject that is bound to be of great interest to the American people, especially during the next year. I know it will throw great light upon the situation, and I ask that it may be printed in the Record.

The VICE PRESIDENT. Is there any objection?

Mr. JONES. Mr. President, I assume the Senator has read the article?

Mr. SHAFROTH. I have read it. It is a very able document. Mr. SUTHERLAND. Mr. President, I have read the article, and it is a very able one, as the Senator says; but I do not think an article of its kind and length ought to be printed in the RECORD. Those who are particularly interested in the subject can be informed if it is printed as a public document. That is the usual practice of the Senate with reference to documents of this character. I shall object to its being printed in the RECORD.

Mr. SHAFROTH. Will the Senator object to its being printed as a public document?

Mr. SUTHERLAND. I have no objection at all to that.

Mr. SHAFROTH. Then I ask that it may be printed as a public document.

The VICE PRESIDENT. There being no objection, the article will be printed as a public document.

PERSONAL PRIVILEGE-FATHER'S DAY.

Mr. LEWIS. Mr. President, I rise, in a small matter, for a dual purpose-something of privilege, but more of justice to a Member of the coordinate branch.

The public papers have been printing, and the Congressional RECORD recording, by some error, that I am the author of a bill or measure of some nature having for its object the creation of a day designated as "father's day." I have never seen such a bill; I never heard of such a bill until this publication; I have never presented such a measure. But since there seems to be some credit here and there given to that benefaction it is in justice to the distinguished Representative from Maryland, Mr. Lewis, that I desire the public records corrected and that he may be given the credit wherever such credit is due, as he, I understand, is the author of this very meritorious project.

Again, sir, the public press, by some error, credits me with the excellent literary production of the distinguished Senator from Oregon [Mr. Lane] in the proceedings of the woman suffrage day. The Senator from Oregon created an observation exquisite for its literary invention, as well as for its delightful construction. The public press for some days has been crediting me with this. I simply desire to say that I made no speech to this honorable body on the woman suffrage question at the time of the presentation of the petitions on the subject. The credit and praise which have been given me are due to the Senator from Oregon.

With these corrections, I thank the Senate for its attention, as I rose merely to "render unto Cæsar the things which are Cæsar's.'

SALARIES OF PAGES.

The VICE PRESIDENT. The Chair lays before the Senate a joint resolution from the House of Representatives, the title of which will be stated.

The Secretary. House joint resolution 118, making appropriations for certain expenses incident to the first session of the Sixty-third Congress

Mr. MARTIN of Virginia. Mr. President, I ask unanimous consent for the present consideration of the joint resolution.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

Mr. JONES. Let it be read, Mr. President.
Mr. MARTIN of Virginia. The resolution will be read in a
moment. In the meantime it will take but a second for me to say that it is a joint resolution passed by the House of Representatives on yesterday, providing for paying the salaries of the pages who serve here in the Senate and those who serve in the House.

Mr. GALLINGER. Will not the Senator have the resolution referred to the Appropriations Committee and reported back in the regular way?

Mr. MARTIN of Virginia. I will go through that empty form if any Senator desires it.

Mr. GALLINGER. I think it would be better.
Mr. MARTIN of Virginia. Senators will know just as much about the joint resolution when they hear it read as they will know after it has been reported from the committee.

The joint resolution contains about a dezen lines, and simply provides for paying the salaries of these little boys, who ought to be paid before to-night. They have not had a cent of money for more than a month.

Mr. GALLINGER. There is no question about the urgency of the matter, but there are a great many other bills that might be acted upon in the same way, and requests of this kind are constantly made. I am not one of the technical Members of the body, but the Senator is the chairman of the Appropriations Committee, and some of the rest of us are members of it, and we will authorize the Senator to report back the joint resolution immediately

Mr. MARTIN of Virginia. If the Scnator objects, I shall have to go through that form.

Mr. GALLINGER. I shall not object, Mr. President.

Mr. MARTIN of Virginia. I ask unanimous consent for the present consideration of the joint resolution because of its absolute simplicity. It is but a simple provision to pay the salaries of the pages. The Senate will understand it just as well without a report as with a report from the committee.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

Mr. JONES. Let us have it read.

The VICE PRESIDENT. The Secretary will read the joint resolution as requested.

The Secretary read as follows:

Resolved, etc., That the following sums are appropriated out of any money in the Treasury not otherwise appropriated, namely: SENATE.

For compensation of the officers, clerks, messengers, and others in the service of the Senate, namely:
For 16 pages for the Senate Chamber, at the rate of \$2.50 per Gay each from July 1, 1913, until the close of the first session of the Sixty-third Congress; so much as may be necessary.

HOUSE OF REPRESENTATIVES.

For the following employees, from and including July 1, 1913, until the close of the first session of the Sixty-third Congress, namely:
For 46 pages, including 2 riding pages, 4 telephone pages, 1 pressgallery page, and 10 pages for duty at the entrances to the Hall of the House, at \$2.50 per day each; 3 telephone operators, at the rate of \$75 per month each; so much as may be necessary.

The VICE PRESIDENT. Is there objection to the present consideration of the joint resolution?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the joint resolution.

joint resolution was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

PERSONAL EXPLANATION-CONSTITUTIONALIST CAUSE IN MEXICO.

Mr. SHEPPARD. Mr. President, I rise to a matter of personal privilege.

The VICE PRESIDENT. The Senator from Texas will

Mr. SHEPPARD. On Thursday, August 7, the Senator from Michigan, Mr. William Alden Smith, made the following statement in the course of his remarks on the Mexican situa-

The difficulty of this situation, if I may be permitted to say so, is that there is so much misinformation abroad. This morning, for instance, the first page of the Congressional Record contains an exhibit of the so-called Carranza strength which an immediate investigation might easily dispel.

I am bound to say, in justice to my colleagues upon both sides of the Chamber, that there is at the present moment in this Capital a thorough, practical, systematic lobby, putting forth their revolutionary propaganda with a serious and a definite object of affecting the American attitude toward the Government of Mexico, which Senators ought to fully understand.

I had been called out of the Chamber before the Senator from Michigan began his speech and was not present when he was on the floor. I would have called attention to this matter yesterday but for the fact that the Sanate properly adjourned on account of the unfortunate death of the late Senator from Alabama.

Mr. President, I was responsible for having placed in the RECORD the statement to which the Senator from Michigan referred. As he stated in the very next sentence, after referring to that exhibit:

There is at the present moment in this Capital a thorough, practical, systematic lobby, putting forth their revolutionary propaganda with a serious and a definite object of affecting the American attitude toward the Government of Mexico, which Senators ought to fully understand—

I deem it my duty to state the source from which I obtained that statement. I neglected to do this through pure oversight when I obtained permission Wednesday to have the statement published in the RECORD and printed as a public document.

I want to say here that since the death of Madero and the rise of the constitutionalists I have been watching affairs in Mexico with especial interest. On Tuesday, July 29, I introduced a resolution recognizing the beiligerency of the constitu-tionalists, because I believe that this recognition is necessary to the maintenance of neutrality on the part of this Government between the contending forces. I introduced the resolution on my own initiative and at the suggestion or intimation of no one

A day or two after I introduced the resolution Mr. Romero, the official agent of the constitutionalists in Washington, called to see me and thanked me for having introduced the resolution, He did not endeavor in any way to suggest what my course should be in this matter or any other matter. I was impressed with the earnestness, the sincerity, and the ability of Mr. Romero, and I requested him to prepare a statement for me showing the history and the nature of the constitutionalist cause, the extent of the territory that the constitutionalists now control, and the number of men in the constitutionalist army. Mr. Romero had this statement prepared in his office at my request, and did not know to what use I might put the statement.

When I read the statement I deemed it of such value that I asked permission to have it published in the RECORD and printed as a document. It did not emanate from any lobby whatever, and if any lobby exists here in behalf of the constitutionalist cause I do not know it. I know that my good friend the Senator from Michigan would not suggest, in view of my statement, that I was influenced in any way by a lobby in this matter. If any lobby exists here improperly to influence legislation in behalf of the constitutionalists, the information ought to be given to the lobby investigating committee in order that the matter may be properly investigated.

Mr. SMITH of Michigan. Mr. President, of course the Sen-

ator from Texas understands that in what I said about the exhibit which appeared in the Congressional Record, giving the so-called strength of the Carranza forces, I had no disposition whatever to criticize the Senator from Texas, whose motives and high character I appreciate very thoroughly. In a service of many years with him I have learned that he is both painstaking and active and honorable in everything that he does

I did say, as the Senator has quoted me as saying, that much misinformation was abroad. I shall not repeat it. It is unnecessary to repeat it. I could emphasize it, and I could give specific instances of proof, if that be desired.

I encountered these same people on the Mexican border. They infested the city of El Paso for two years. They made it the base of their operations, and have now shifted their base of operations from El Paso to Washington.

Mr. SHEPPARD. Mr. President

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Texas?

Mr. SMITH of Michigan. Certainly.

Mr. SHEPPARD. Would the Senator object to giving us the names of those parties?

Mr. SMITH of Michigan. No; I will not object to giving the

Mr. OVERMAN. If the Senator will excuse me, does he mean lobbying with Members of Congress:

Mr. SMITH of Michigan. No. They are not lobbying with

Members of Congress, so far as I know.

Mr. OVERMAN. If they are lobbying with any Members of

Congress, I think the matter ought to be investigated. Mr. SMITH of Michigan. But if any Senator on the other side of the Chamber challenges the statement that there is such an organization here, that it has its headquarters in one of the prominent buildings in Washington, that it has as its adviser a man who drew \$50,000 from the Mexican treasury for his services at the close of the Madero revolution, I am prepared to

sustain that charge.

Mr. CLAPP. Will the Senator yield to me for a moment?

Mr. SMITH of Michigan. Certainly.
Mr. CLAPP. Of course, I would not say what I am going to say in any sense to challenge the Senator's statement, but it does seem to me that if for any reason the accuracy of the statement could be challenged, the information ought to be stated as to the individuals and the office and the association of which he speaks.

Mr. SMITH of Michigan. Well, Mr. President, I had thought possibly that if I could get my data together soon I would report fully to the Senate the result of my investigation and certain recommendations concerning its present aspect, which will include that matter.

Mr. CLAPP. · If the Senator will pardon me further, it strikes me that the question of making the report of the committee and its recommendations is not necessarily involved in the statement that there is now an organization here, who they are, and where are their headquarters. I confess I have not seen any of them. If there are any such characters here, I think we should know who they are. I do not want to press the Senator at this time if he has any hesitancy about the matter.

Mr. SMITH of Michigan. I appreciate the motive of the

Senator from Minnesota. I am only going to say that the

junta to which I refer is advised by Mr. Hopkins, of this city, a lawyer, who has been engaged by the Madero government in Mexico for service in this Capital, who seems to have had the ear of the State Department in the last administration and who may have had access to this administration. I refer to Mr. Hopkins and to Mr. Sommerfield, Mr. Sommerfield having been for over two years the head of the so-called Maderista propaganda on the border between the United States and Mexico. are here now; they are carrying on this work, and they are undertaking to influence, not corruptly, the course of public opinion and the action of officials of this Government.

Now, if you want further evidence, summon Mr. Hopkins and summon Mr. Sommerfield, the agent of the Maderista government, before the committee. I have had both of them before

my committee.

Mr. OVERMAN. Has the Senator made a report from his committee?

Mr. SMITH of Michigan. I have not made a formal report. The testimony has all been submitted to the Senate, and I think a final report should be made.

Mr. JAMES. Mr. President, I should like to ask the Senator a question

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Kentucky?

Mr. SMITH of Michigan. Certainly.

What is the basis of the charge of the Senator from Michigan that Mr. Hopkins has the ear of the State Department? That is a grave charge.

Mr. SMITH of Michigan. It is a grave charge.

Mr. JAMES. And it appears to me that if the Senator has such information as that upon which he bases so grave a charge in the Senate of the United States, the Senator ought to state to the Senate the facts upon which he bases the charge, and he himself ought to appear before the lobby committee to give this information. In the crisis that now confronts our Government, whether it is grave or not, certainly the charge the Senator has made upon the floor of this Chamber that our State Department has given its ear to a representative of the Madero government in Mexico is one that ought not to pass by unnoticed, but the

facts should, if the Senator has them, be given.

Mr. SMITH of Michigan. Well, I do not intend that it shall

pass unnoticed.

Mr. SIMMONS. Mr. President, I rise to a question of order. The VICE PRESIDENT. The Senator from North Carolina will state his point of order.

Mr. SMITH of Michigan. I shall make my report to the Senate

Mr. SIMMONS. I withdraw the point of order for the present.

Mr. GALLINGER. Mr. President, if the Senator from Michigan will permit me, it seems to me that he ought not to be loading any more work on the so-called lobby committee.

Mr. OVERMAN. I agree with the Senator.

Mr. GALLINGER. If there is substantial ground for the accusation which the Senator from Michigan makes-and I assume there must be-he ought to go to the Committee on Foreign Relations, it seems to me, that committee having, I think, direct jurisdiction over matters of this kind.

Mr. OVERMAN. I agree with the Senator as to that.

Mr. SWANSON. Mr. President-

The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from Virginia?

Mr. SMITH of Michigan. Certainly. Mr. SWANSON. The Senator from Michigan is a member of the Foreign Relations Committee. The Secretary of State has repeatedly appeared before that committee. If the Secretary has been improperly influenced and has given improper hearings to anyone, the proper place for the Senator to have made that charge would have been to his colleagues on that committee, and I am satisfied that committee would have directed a full investigation. The Senator has been attending the meetings of that committee, and I am surprised he could leave the committee this morning, come on the floor of the Senate, and make a charge that was not heard in that committee.

Mr. SMITH of Michigan. Well, Mr. President, the Senator from Virginia need not be surprised. I was called to my feet by the Senator from Texas [Mr. Sheppard], who rose to a question of personal privilege. I was biding my time and would have made my report formally to the Senate for the Senator's information. I have never seen the Secretary of State in the Committee on Foreign Relations since he assumed the duties of his office.

Mr. SWANSON. If the Senator failed to see him, it is not the fault of the Secretary of State, who is always accessible.

Mr. SMITH of Michigan. Mr. President, the Senator from Virginia ought to be cautious as to his own words in attempting to put me in a false position, because the Senator from Virginia has no warrant whatever for saying that I have said that any one has the ear of the Secretary of State. I was very cautious to say "the State Department." I did not say the Secretary of State.

Mr. SWANSON. The State Department is run by the Secre-

tary of State.

Mr. SMITH of Michigan. I do not believe it; but you say it

Mr. SWANSON. I believe it is so. The Secretary of State is capable, he is efficient, he is able, and patriotic; and I believe he runs the State Department. He is attentive to it. I am sure the Senator from Michigan, as I do, entertains for the Secretary of State a very exalted opinion.

Mr. SMITH of Michigan. Certainly. My opinion has never changed as to the eminent ability and patriotism of the Secretary of State. I have not criticized him and shall not do so.

Mr. SWANSON. I should like to ask the Senator another question, and that is, Does he think it improper for the Department of State to listen to representations made by the constitutionalists and the different factions in Mexico? Should they not listen to them all and get all the facts they can? Is the Senator such a partisan that he thinks nobody ought to be listened to except one faction in Mexico?

Mr. SMITH of Michigan. Oh, no, Mr. President. I think the State Department should get its information wherever it can obtain it accurately, and I assume that it does so. I am finding no fault about that. When I said that there was in this Capital a determined lobby attempting to affect public opinion in the United States on the Mexican situation, I stated the fact. I know it to be the fact, and I know the men; I have encountered them before. They have never attempted to influence me, but their testimony under oath is upon the record, and it requires no guesswork from anyone to ascertain what they have done or how they have done it.

Mr. SWANSON. Is that the information that the Senator

gathered as chairman of a subcommittee-

Mr. SMITH of Michigan. It is; some of it.
Mr. SWANSON. On which the Senator says he expects to make a full report to the Committee on Foreign Relations very

Mr. SMITH of Michigan. I think I shall try to make a

report on Monday to the Senate committee.

Is the Senator authorized to report to the Mr. SWANSON. Senate or to the Foreign Relations Committee?

Mr. SMITH of Michigan. I will do whichever seems to be

Mr. SWANSON. Does the Senator think he is authorized to

report to the Senate?

Mr. SMITH of Michigan. I am sure that, in the regular order, it ought to come through the committee of which I am a

Mr. FALL. Will the Senator yield to me?

Mr. SMITH of Michigan. But, inasmuch as I have been asked to do it, I thought I might as well respond to the invita-

Mr. SWANSON. When was this wonderful evidence taken that is so important to the country?

Mr. SMITH of Michigan. I do not understand the Senator. Mr. SWANSON. When was this wonderful evidence takenhow long ago?

Mr. SMITH of Michigan. While the Senator was busily at work here in the summer of last year.

Mr. SWANSON. When was it finished?

Mr. SMITH of Michigan. It was printed about March 1.

Mr. SWANSON. About March 1, and yet no report has been

Mr. SMITH of Michigan. Yes.

Mr. SWANSON. The Senator says the State Department has been derelict, although it only came into office on the 4th of

Mr. SMITH of Michigan. Well, Mr. President, the attempt of the Senator from Virginia to becloud our work will not have any influence with me. I have known him long enough to know that when he sees that it has been conscientiously and appro-

priately done he will acknowledge it.

Mr. SWANSON. I know that the evidence has been conscientiously gathered. The Senator is always alert and active. I am only complaining of the delay in getting it to the attention

of the Senate.

Mr. SMITH of Michigan. It is just possible, Mr. President, that, if I may have the cooperation of my friends on the other side of the Chamber who are also members of the committee, we can quickly finish and report our work.

Mr. CRAWFORD, Mr. WILLIAMS, and Mr. BACON addressed the Chair.

Mr. SMITH of Michigan. I am going to say no more.
The VICE PRESIDENT. Does the Senator from Michigan yield to the Senator from South Dakota?

Mr. SMITH of Michigan. Certainly.

Mr. CRAWFORD. I thought the Senator had yielded the floor.

Mr. SMITH of Michigan. I have.

Mr. FALL. I should like to ask the Senator a question. Mr. CRAWFORD. Mr. President—

The VICE PRESIDENT. The Chair would like to recognize all Senators at once, but that is an impossibility.

Mr. SMITH of Michigan. If the Senator from New Mexico

desires to ask me a question, I will answer it.

Mr. FALL. Mr. President, along the line the Senator was addressing the Senate upon, I merely wanted to ask a question that possibly may throw some light upon this matter, if the Senator from South Dakota [Mr. Crawford] will yield to me. I think the testimony of Mr. Hopkins taken before the committee here in Washington is the testimony to which the Senator from Michigan referred?

Mr. SMITH of Michigan. It is.

Mr. FALL. That testimony is printed, and any Member of the Senate can get it at any time he wants it. It was taken, I think, in the presence of the Senator from Nebraska [Mr. HITCHCOCK] and several of the other members of the subcommittee.

Mr. SMITH of Michigan. And the Senator from North Dakota [Mr. McCumber].

Mr. JAMES. Will the Senator tell us when that testimony was taken.

Mr. FALL. It was taken in February, I think. Mr. JAMES. Does the Senator think that testimony taken last February ought to be the basis for a charge made in the Senate that the State Department now is under the influence of certain individuals?

Mr. FALL. I have made no charge.

Mr. SMITH of Michigan. I did not say that. Mr. FALL. I know nothing about Mr. Hopkins's influence upon this administration, if he has any. I imagine he has very little. That is my guess at it. There is, however, something in the testimony of Mr. Hopkins itself which was perfectly frank. He is the man who testified to receiving a \$50,000 fee.

Mr. JAMES. If the Senator will permit me, certainly that testimony taken in February last can not throw any light upon the conduct of the State Department at this time, when we all know that this administration was not inducted into office until

last March.

Mr. FALL. Certainly not. I was simply trying to explain what this testimony of Mr. Hopkins's was and what was the basis, as I understand, of the statement of the Senator from Michigan that Mr. Hopkins had influence with the State Department. Mr. Hopkins, I believe, testified—there was a question asked him on cross-examination-with reference to a certain letter which he had written to a man by the name of Firth, in Germany, and which had been repeated to the President of one of the Central American Governments, stating that Mr. Hopkins did have great influence with the State Department; but that was two or three years ago. I have certainly heard nothing of Mr. Hopkins's influence with this administration or with the State Department. I have met Mr. Hopkins two or three times in town recently. I want to say that on a very recent date I called Mr. Hopkins, as the attorney for the constitutionalist junta, into my office, because there was a threat to deport an American citizen from Mexico. The State Department were doing what they could to prevent the deportation of this American citizen, but I did not believe their methods would be thoroughly successful. I sent for Mr. Hopkins and repeated to him a statement that I had made to the Secretary of State with reference to the effect of this attempted deportation, and warned him that there might be interference which even this Government could not control in the event that method of dealing with American citizens was pursued. Mr. Hopkins secured a telegram to Pesqueira, governor of Sonora, with reference to that matter, and I think that it, together with the representations of the State Department, resulted in the action being taken which we wanted.

Mr. STONE. Mr. President, I rise to a parliamentary inquiry. The VICE PRESIDENT. The Senator from Missouri will state his parliamentary inquiry.

Mr. STONE. What is before the Senate?

The VICE PRESIDENT. The debate has been proceeding by unanimous consent.

Mr. CRAWFORD. I desire to say a word.

The VICE PRESIDENT. The present order of business is petitions and memorials.

Mr. BACON. Mr. President—
Mr. CRAWFORD. I desire to say a word, and I think the Senator from Missouri [Mr. STONE] will indorse what I have

Mr. STONE. Very well; but after the Senator has finished shall call for the regular order.

Mr. WILLIAMS and Mr. CRAWFORD addressed the Chair, The VICE PRESIDENT. The Senator from Mississippi.

Mr. WILLIAMS. Mr. President, if the rule is going to be enforced, I shall insist that it be enforced right now, and not in such a way that one side is to have an opportunity to be heard and no opportunity is to be given to the other side to reply. Therefore, understanding that the Senator from Missouri will call for the regular order in a moment or two, I call for it now.

Mr. CRAWFORD. Well, Mr. President, my desire is not to express a view in harmony with some things that have been said; I take exception to them; and I should like to have an opportunity to say a word or two on the subject.

The VICE PRESIDENT. Does the Senator from Mississippi

call for the regular order?

Mr. WILLIAMS. I call for the regular order. If it is understood that it is going to be called for by the Senator from Missouri after the Senator from South Dakota is through, it might as well be called for now.

The VICE PRESIDENT. The Chair lays before the Sen-

Mr. OVERMAN. Mr. President, I understand the Senator from Missouri has not raised a question of order, and I think the Senator from South Dakota has a right to speak.

The VICE PRESIDENT. The Senator from Mississippi did

call for the regular order.

Mr. OVERMAN. I think the Senator from Mississippi said that if it was to be called for, he would call for it, but he did

The VICE PRESIDENT. The Chair knows what the Senator from Mississippi said; and he called for the regular order.
Mr. WILLIAMS, I did not misunderstand, Mr. President; I

understood what the Senator from Missouri said, and I insisted that, if the regular order was going to be called for, it should be called for now.

SECOND INTERNATIONAL OPIUM CONFERENCE (S. DOC. NO. 157).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Foreign Relations and ordered to be printed: To the Senate and House of Representatives:

I transmit herewith a communication from the Secretary of State, accompanied with a report prepared by Mr. Hamilton Wright on behalf of the American delegates to the Second In-ternational Opium Conference, which met at The Hague on the

1st of July last and adjourned on the 9th of the same month.

The first opium conference assembled at The Hague on December 1, 1911, and adjourned on January 23, 1912. The convention formulated by this conference has since been signed by all of the Latin American States and by a great majority of those of Europe, and all but three of the States that have signed have already agreed to proceed to the deposit of ratifications.

The results of the conferences should be regarded by the Government and people of the United States with great satisfaction. An international convention imposing the obligation to enact legislation strictly to confine the trade in opium and allied narcotics to medical purposes has been signed by all but 10 nations of the world, and there is reason to believe that by the end of the present year, through the action of the recent conference, all the nations of the world will have become signatories of the agreement.

It remains for the Congress to pass the necessary legislation to carry out the stipulations of the convention on the part of the United States. Such legislation has recently passed the House of Representatives without a dissenting vote; and I earnestly urge that this measure, to the adoption of which this Government is now pledged, be enacted as soon as possible dur-

ing the present session of the Congress.

WOODROW WILSON.

THE WHITE HOUSE, August 9, 1913.

PERSONAL EXPLANATION-OFFICERS AND MEN OF THE NAVY.

Mr. KERN. Mr. President, I rise to a question of personal privilege. I hesitate to take the time of the Senate for any considerable time, and I have so hesitated for several days; yet I think it is my duty to call the attention of the Senate to the matter to which I am about to refer.

A few days ago, when the junior Senator from Virginia [Mr. SWANSON] asked unanimous consent for the publication as a public document of an address recently delivered by the Secretary of the Navy, the senior Senator from New Hampshire, in the course of some remarks on that subject, propounded the following inquiry:

I will ask the Senator from Virginia whether the Secretary of the Navy in this address advocated what he has advocated somewhere else, if not on that occasion, that the officers and sailors of the Navy should be required to mess together?

The Senator from New Hampshire, while regarded as one of the sturdiest champions of stalwart Republicanism here, has such a reputation for fairness on both sides of this Chamber and is usually so careful in statements of this kind that I felt sure he did not desire to do injustice to any man of any party, and being morally certain that the Secretary of the Navy, whom I have known intimately for many years, entertained and had expressed no such views as were thus attributed to him, I asked the Senator from New Hampshire if he was quite sure that the Secretary of the Navy on any occasion had declared in favor of the sailors and officers of the Navy messing together, to which he replied:

I think there can be no question about it. It has been published broadcast and never denied.

After some further colloquy the Senator from New Hampshire

I will suggest to him (the Senator from Indiana) that the Secretary of the Navy has rescinded that order, admitting that it was not correct—that is my understanding.

Mr. President, all this proves, if proof were necessary, how unsafe it is, here or elsewhere, to base statements reflecting upon the official or personal character of any man upon unverified newspaper reports.

The Secretary of the Navy assures me that he has never, in any public address nor in any other way, expressed the sentiment attributed to him by the distinguished Senator from New Hampshire; that he never issued any such order as was spoken of by him, nor for a moment contemplated the issuance of such

order. It transpires that a certain New York newspaper printed a story some time ago that the Secretary of the Navy favored the plan of requiring officers of the Navy and enlisted men to mess together, and had issued or was about to issue an order carrying that plan into execution. But it also transpires that immediately upon reading that publication, on the day following

its appearance, the Secretary of the Navy repudiated and denied it.

The Senator from New Hampshire doubtless read this original publication and observed that it was reproduced in other newspapers, but did not see the denial so promptly made by the Secretary.

Such an oversight is neither strange nor unusual, for it is a matter of common knowledge that the people who read publications, however false and libelous, rarely see the denial or

retraction which often follows.

To illustrate still further the unreliability of many news items, I call attention to the fact that notwithstanding my efforts, in the colloquy referred to, to defend the Secretary of the Navy against a charge which I characterized as cruel if untrue, one of the leading newspapers of Washington on the following day in giving an account of the Senate proceedings stated in effect that Senator KERN had declared himself in favor of the proposition that officers and sailors should be required to mess together; while a day or two later it was declared by an afternoon paper, usually accurate in its news reports, that I was about to institute an investigation into certain matters pertaining to the Navy-there being not the slightest basis for such a statement.

Mr. President, I allow no man to go beyond me in admiration for the American Navy, nor is any man prouder of its achievements, which have glorified so many pages of American his-But, sir, I have insisted, and shall continue to insist, that the door of opportunity shall never be closed in the faces of enlisted men who by bravery, devotion to duty, and proved

ability show themselves to be worthy of promotion.

I have complained that under present regulations, as I have understood them, when the enlisted man, no matter what his merit may be, reaches a certain subordinate place a dead wall stands in his way which prevents further advancement. There is only one avenue through which it is possible for him to reach further promotion, and that is under a regulation which permits 12 of such men to take an examination once each year before a board of naval officers and who if successful in that examination may be advanced to higher rank. Many enlisted men, common sailors, are looking forward to this examination as their last and only chance for preferment, and study hard and work assiduously while in the service, hoping that through this only avenue they may have their laudable ambitions gratified.

These enlisted men who take this examination are, according to an editorial printed in a recent issue of the Washington Post, referred to by officers of the Navy as "mustangs," an appellation of doubtful compliment, to distinguish them from their more favored comrades, and it is charged that the examining board referred to, composed of naval officers who have been educated at public expense and who for the most part came from the ranks of the common people, has adopted such methods of examination as to make it extremely difficult for any man who has ever been a common sailor to run the gantlet of their

It is also charged, but I hope for the honor of the American Navy that it is not true, that some of these officers who sit on that examining board have expressed their abhorrence of the idea that a man who has been a common sailor should by reason of a promotion through such examination become entitled to sit at the same table with them and other officers who have had the good fortune to reach the higher grades without the hard service known only to the common sailor.

When in the colloquy the other day I used the term "per-fumed naval officers," I had in mind such un-American snobs as would thus discriminate against their equals; nor did I refer to the brave, manly Americans fully imbued with the American spirit of equality, who for the most part make up the great body of officers of the American Navy, and who have in so many ways honored the uniform they wear.

Mr. President, I am sure that our naval officers are too brave, too thoroughly American in all that the name implies, to forget that in this Republic there can exist no order of nobility, save that which is within the reach of all brave, true, and deserving men in every walk of life, who by intellectual superiority and moral worth are entitled to it, and they must know that every attempt to introduce into any department of this Government any regulation or practice which does violence to the American idea of equality will surely arouse resentment throughout the country and be condemned by all patriotic people.

It is not strange that irregularities should often exist and abuses spring up in any department, for there is not perfection anywhere, but it is one of the glories of this Republic that most such irregularities and abuses vanish almost at once upon their discovery, and I have no sort of doubt that if such wrongs as have been complained of exist they will be quickly righted, not by reason of congressional investigation but because of the high ideals and patriotic impulses of the officers of the American

Mr. GALLINGER. Mr. President, I will apologize in advance to the Senator from North Carolina [Mr. Simmons], who is anxious to take up the tariff bill, for taking a single moment of the time, and I will occupy only a minute or two.

In the first place, I thank the learned Senator from Indiana for his kind personal reference to me. The newspapers exaggerated the little colloquy that occurred the other day between the Senator from Indiana and myself. One would have supposed from the newspaper accounts that we had had almost a personal altercation in the Senate Chamber. No one admires the Senator from Indiana, his diligence, his learning, and his knowledge of public affairs, any more than I do, and it was far from my mind to say or do anything offensive or unfair either to the Senator or the Secretary of the Navy.

Mr. President, what occurred the other day is a fresh illustration of the fact that unless a man is a real humorist he would better not undertake to indulge in humor. My question was asked in a humorous spirit, and I supposed that it would end with a simple reply to the effect that the incident to which I alluded did not occur on the occasion to which the Senator from Virginia alluded.

I regret, Mr. President, if I was the innocent means of doing the Secretary of the Navy the least possible injustice. I have watched his career since assuming that high office with a great deal of interest. I have noticed the practical manner in which he has taken hold of naval affairs, his investigation of naval stations and navy yards; and a recent report from the board of inspection, approved by the Secretary, has been read by me with the greatest possible satisfaction, because I believe it is calculated to do very great good to the Navy.

So far as the officers of the Navy are concerned, I have had

the honor of knowing many of them, having served upon the Committee on Navel Affairs of the Senate for a good many years, and I have never come in contact with the "perfumed" officers the Senator from Indiana referred to the other day. There are possibly some of them in the service, but I have found them, as a rule, high-minded, patriotic, earnest men. I in Mexico with property, women, helpless children. Certainly confess I regretted and do regret that the Senator from Indiana nothing should be said to inflame the passions and arouse the

used the term in the broad sense that he seemed to use it on that occasion.

Now, Mr. President, I repeat my regret that any casual observation of mine has done an injustice to the distinguished Secretary of the Navy, and I would gladly withdraw it from the Record if it were possible to do so. I saw the statement in several newspapers, and it also came to me from another source, and I did not see the denial which the Senator from Indiana says was made by the Secretary. Had I seen that denial, I assure the Senator from Indiana and the Senate itself that no allusion to the matter, even in a humorous way, would have been made by me.

Mr. SIMMONS. Mr. President, I ask unanimous consent that House bill 3321 be laid before the Senate and proceeded with.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. KENYON. Mr. President-

Mr. CRAWFORD. I do not want to trench on the time of the Senator from Iowa, but I do want, if he will permit me, to have the opportunity to say a word or two, which I wanted to say a little while ago when the discussion was indulged in

here relating to the Mexican situation.

Mr. KENYON. I yield to the Senator from South Dakota. Mr. CRAWFORD. Mr. President, with all my heart and with the deepest conviction of my being I sympathize with the statement which has been made here several times that all partisanship and all factional spirit ends at the seashore, and that when grave, delicate, and difficult situation arises between our country and a foreign nation we are one.

I have no doubt, sir, and I do not believe that any Member of the Senate has any doubt, but that the President of the United States and the great State Department of this Government, presided over by a man who for years has been a national figure, commanding the admiration of millions of his fellow citizens, aided in his work by a master of international lawdo not believe there is a doubt in the mind of a single Member upon this floor but that these men are bringing to the service of their country patriotism, wide experience, great ability, and that they are giving to these difficult questions their constant, anxious, and solicitous attention. They are entitled to our united, sympathetic, loyal, complete support, and I deplore, sir, the evidence of any disposition to be hypercritical, to add to their difficulties, to lay upon them greater burdens than they are now compelled to bear.

Mr. President, the Senate has in its service a committee which deals with foreign relations. Every member of that committee, no matter to which political party he belongs, has distinguished himself in service in this body, enjoys the full confidence of the Senate, measures up to the responsibility placed upon him. That committee is in charge of this delicate situation as the working committee into whose hands great questions of this character have been intrusted by the Senate. I regret to see any course or conduct which may add to the difficulties which surround this committee, which we all know is giving its undivided and solicitous attention to this situation of embarrassment and great difficulty.

I wish to say to the distinguished chairman of the Committee on Foreign Relations that I for one appreciated every word that he uttered on the floor of the Senate the other day. No matter if I do belong to this side of the Chamber, and to a different political party, I regret to observe any inclination, any disposition, or evidence of desire to hinder or embarrass or make more difficult the work which that great committee is called upon to perform.

Mr. President, the administration may commit error; probably it will. It will be subjected to criticism; that is inevitable. The argus-eyed press of the country, watching every step, and filling the columns of the papers with readable articles in regard to the situation, will start criticism. The great public will indulge in criticism. But Members of the Senate, a body which must participate in the settlement of difficulties with foreign nations, the making of treaties, and the abrogation of treaties, have a responsibility that compels the Senate in its dignity to rise above the field of carping criticism, of partisan criticism. I do not say that criticism should not be indulged in here by Members in the discharge of their duties who think mistakes are being made, and who wish to call attention to them and have them rectified, but it ought not to be partisan criticism.

There is a grave situation in Mexico. There are Americans

excitement of people unduly, because if the public temper is inflamed to a certain condition of fever we know what the result will be. We might crush Mexico as a paper box, perhaps, but it would be no credit to us to do that. We might take upon ourselves a responsibility that would extend down to our children and our children's children, and raise the lid from Pandora's box; but we ought to weigh the situation very carefully before we take the first step that may lead to such a result.

I say this question is too serious to be discussed from the standpoint of small advantages for anybody or in any spirit of that kind. I wanted to say that much here in the hope that it may aid in small part at least in bringing to this situation sober, dignified, impartial judgment and discretion. The American people expect that from us. That much is due from us all.

I hope, Mr. President, that in the deliberations of the Senate, in the grave situation before us, which may remain here for some time to come, every phase of it will be viewed in the spirit of loyalty, patriotism, and unselfish interest in the welfare of the whole country which is expressed in the language used by the distinguished Senator from Georgia [Mr. BACON] the other day when he said all partisanship stops at the seashore.

Mr. WILLIAMS. Mr. President-

The VICE PRESIDENT. The Senator from Iowa is recognized. Does the Senator yield to the Senator from Mississippi? Mr. WILLIAMS. Will the Senator yield to me for three or four minutes?

Mr. KENYON. No more than that? Mr. WILLIAMS. I think not.

Mr. KENYON. I am not inclined to yield for a long speech, I will say to the Senator, but I am perfectly willing to yield for three or four minutes.

Mr. WILLIAMS. That is what I want.

The VICE PRESIDENT. The Senator from Mississippi will

Mr. WILLIAMS. Mr. President, all enlightened America will applaud the cool, dispassionate, and patriotic remarks just made a moment ago. There are periods in the life of a people when speech may be silver, but when silence is certainly golden. have a period of that sort now confronting us. I do not think that anyone who loves the three Americas—North and South and Central America-would willingly inflame the minds of the people or any part of them against each other at this moment.

Mr. President, I frankly confess, with the first Secretary of State of the United States, that my passion is peace. I am a peace-at-almost-any-price man, anything short of absolute hu-

miliation, national pusillanimity.

Therefore in what I am about to say I know that nobody will think that I am trying to exaggerate the situation. Several Senators have given their credos as regards what is going on in Mexico or about what is now happening here. I want to say to the Senate, and I want to say to the American people in a voice of warning-and I wish the voice were strong enough to catch their attention-that I am of the deliberate opinion that there is now an organized and a syndicated effort to bring about war between the United States and Mexico, organized with lobbyists here, organized and syndicated through the newspapers with money behind it, and not all of it Mexican money, and that they must, in their patriotism and good sense and wisdom, hold themselves in check all they can. I do not believe there is a Senator here who has been noticing recent editorials in many metropolitan newspapers who will not agree with me that they have a sameness of tenor, a sameness of purpose, and a sameness of statement that show a syndicated, moneyed effort behind them. It is time, I think, that we should pause.

I merely want to add this sentence: So far as I am con-cerned, I do not feel even brave to myself—and a man very easily does that-when I am talking about war with poor little Mexico, disrupted, torn to pieces, disemboweled, weak anyway. I might feel a certain degree of inspiration, of sham courage, if I were talking about war with some nation that could stand

upon its own two feet for a little while.

Mr. SHIVELY. Mr. President-The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Indiana?

Mr. KENYON. I yield to the Senator from Indiana. Mr. SHIVELY. Mr. President, I came into the Senate just as the senior Senator from Michigan [Mr. SMITH] was making his statement relating to certain work that had been done by a subcommittee of the Committee on Foreign Relations. It so happens that I was a member of that subcommittee. It is only justice to the other members of the subcommittee to say that it was impossible for me to participate in the work that was done by that subcommittee. The burden of that work fell upon the senior Senator from Michigan and the senior Senator from New Mexico [Mr. FALL].

The question of the report by the subcommittee was only adverted to while I was present in the Chamber, but I was glad to be reassured that before any report by that subcommittee should be made that report would be submitted to the full Committee on Foreign Relations of the Senate. I did not apprehend that the Senator from Michigan would assume to make the report before taking into his confidence the entire Committee on Foreign Relations; and I am glad to be assured by him that whatever report is to be submitted, whatever recommendations are to be made by those who investigated the subject, will be first submitted to the Committee on Foreign Relations, to be there considered by that committee, utterly regardless of any question of partisanship.

Mr. KENYON. Mr. President, if there is no one else who desires me to yield, I will submit a few observations. however, glad that I yielded to the Senator from South Dakota [Mr. Crawford]. He has expressed the sentiments I know, of a large number of Senators on this side of the Chamber. The President of the United States, the distinguished Secretary of State, and the level-headed and distinguished chairman of the Foreign Relations Committee of the Senate [Mr. Bacon] are doing their best in a troublesome situation, and we ought to hold up their hands, and not in any way irritate the situation

with relation to Mexico.

I know, Mr. President, it is customary in submitting remarks here on the tariff question to state that the speaker hesitates to take up "the valuable time of the Senate." I had that feeling in my mind for the first two weeks of the discussion, but I have gotten entirely over it now. We have spent hours on the discussion of dextrine, wool grease, peanut oil, oxalic acid, and Even in the last two days we have entered upon the trial, practically, of a Senator in this Chamber; and I have been suspicious now and then that there might be an organized effort among a few of our Democratic friends to delay this bill by talking and filibustering, much to the sorrow of many of us on this side of the Chamber, who want to get through with it. So I am not going to enter any apology for taking up "the valuable time of the Senate" in this discussion. I have come to the conclusion that it is not so very valuable after all, but I would have been glad to have waived any argument in the discussion had it not been for what seemed to me a waste of time; and as we are apparently settled down here now for the summer and fall on this bill, I am going to be so bold as to take a little time in advancing some arguments in favor of some propositions contained in amendments I have introduced.

Mr. President, I know that a number of Senators on this side of the Chamber would be glad to vote for some bill that would reduce or eliminate some of the extravagant and unnecessary duties of the Payne-Aldrich law. I regret that a bill has not been drawn that would more nearly conform with their views, although, of course, we could not expect or ask it.

I am not one of those, Mr. President, who join in the clamor and cry that this bill when enacted into law will produce devastation and panic; nothing will so assist in bringing on panic as to continually predict it. I am aware of the fact that there are those in this country who are so blinded by partisanship that they will be actually disappointed if panic does not follow the enactment of this measure; if factories do not close; if times are not hard; if men are not out of employment; if children are not hungry; but I believe it a patriotic duty to decry all such clamor. The country is prepared for the passage of this bill; the people know it will pass in practically its present form. Their one anxiety is to get through with discussion and let the bill pass as soon as possible. The waters of the industrial sea should be calmed instead of being lashed into any further fury.

There is a distinct line of cleavage in this country between the advocates of a protective tariff and the advocates of free trade. Our country must be in the last analysis either protection in principle or free trade. This bill seems to be framed on no tariff-for-revenue principle; it draws no inspiration from the philosophy of the Walker revenue tariff; some one seems to have taken the Payne-Aldrich bill and simply reduced duties here and there, removed certain articles from the protected list and placed them on the free list. It is not a tariff-for-revenue measure, it is not a free-trade measure, it is constructed on no economic theory, it is a protection-in-spots measure, and "selected spots" at that. Many of the reductions are good, and could the bill be taken up schedule by schedule many Members on this side would be glad to support a large part of the bill, including, of course, the income-tax feature.

It is a protective measure to a certain extent. If protection is a robbery, as our Democratic friends have so often asserted in their platform and preached from the rostrum, a robbery of the many for the benefit of the few, then protection is wrong.

If protection is a robbery of the many for the benefit of the few, why not get rid of the robbery and go to a free-trade basis? If a national system of protection is right as a system, then why not proceed with a permanent tariff board and take the question entirely out of politics? Along these two lines must come the essential difference in the future of the two great political parties. The Democratic Party has hardly dared declare for free trade, but the time will come in this country when some party will so do, and then the two prin-

ciples will be squarely fought out.

Mr. President, while believing in the principle of protection as a national policy, I am not a high-tariff Republican, and never have been. The people of my State are not, but the general system of a tariff so levied as to equalize conditions in this country for the producers has nothing to fear from the firesides of the West. The farmer of the West has believed that a general system of protection by tariff duties which would protect the American working man against the low-waged laborer of foreign countries was a wise and thrifty policy, a policy that would preserve a home market for the home producer. He has believed that if competition existed behind tariff walls the tariff would not increase to the consumer by the extent of the tariff the cost of the article; he has realized that where he was selling his products abroad and was an exporter that the tariff was of little direct benefit to him, and its benefit came in the general welfare that it might bring to the people, an incidental benefit to him; that the duties given to him on his products practically amounted to nothing as long as we were a Nation exporting agricultural products, but he now sees great areas open in Canada and the Argentine and finds that the American consumption is increasing so that he may cease to be an exporter in a short while, and that articles such as he produces will be imported, and when the tariff therefore becomes of some direct practical benefit to him it is taken away. It occurs to him as he sits around his fireside that this is not a fair proposition, and that it does not savor of the square deal. He has been taught that to sell his products in a free-trade market and buy in a protected market is a species of discrimination.

But, Mr. President, I never, up to the last few years, have heard it preached to the farmers of this country that the tariff on wheat, the tariff on corn, and the tariff on oats directly increased the price of those articles. I have heard from boyhood, and have believed, that the farmer was benefited by a protective tariff only incidentally, by the promotion of the general welfare, by the planting of the factory by the side of the farm, by furnishing more mouths to fill, and by giving better wages; but, Mr. President, I fear those who advocate a high tariff on the products of the farm and preach to the farmer that that is a direct benefit to him are sowing a whirlwind, because, if the day ever comes in this country that the tariff on wheat or corn or oats directly increases the price to the consumer by the extent of the tariff, and thus imposes a tax upon breadstuffs in this country, such a tariff can never stand before the en-lightened judgment and the conscience of the American people. The farmer has been content to accept the protective-tariff theory as one making for great general welfare, in which he has been a participant, and he is more prosperous to-day than

ever before in his history.

Mr. BRISTOW. Mr. President—

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Kansas?

Mr. KENYON. Yes.
Mr. BRISTOW. Let me inquire if the Senator thinks it is any worse or more indefensible to put a tariff on foodstuffs than it is to put a tariff on clothing?

Mr. KENYON. Well, it is about the same thing. I will talk

about that later.

Mr. President, in 1908 the Republican Party went into the campaign pledged to a revision of the tariff, and that revision was understood to be a downward revision. No one is candid who claims otherwise. Protection, while being a great national system, and believed in by a majority of people in this country, had been abused by those who desired to plunder the American people. It was not the principle of protection that the people were at war with, but it was the abuse therof. Its abuse had developed lobbyists, trading statesmen, conglomerations of favorseeking selfishness, and the people were restless under it. Tariff bills had been so drawn that it was difficult to understand their meaning; there grew up a feeling that protection in some way bore a close relationship to campaign contributions; there was dissatisfaction and suspicion over Members of Congress serving on campaign committees soliciting funds from protected industries. The abuse of the system seemed to have atrophied the power of many men in public life for moral thinking and assisted in commercializing our legislation.

The Republican Party, therefore, in 1908, pledged itself to a revision of the tariff. Up to that time, however, it had never been inserted in the Republican platform that the tariff should be such as to afford a reasonable profit to manufacturers. appeared for the first time in the platform of 1908. With American genius, American capital, American brains, labor conditions being equal, we could compete with the world. The protectivetariff system was not a system to help some and injure others. It never could have stood the test of the years if such was its mission; it never was based on the proposition of insuring profits to anyone.

The justification for a protective tariff was and is that it is a great national system making for general welfare. If it ceases to do that, its existence can not be justified. It had made for general welfare, but it had become possible for those who cared more for special welfare than general welfare to crack the party whip, to wave the flag, to talk about American wages for American workingmen, to talk about the best-paid labor in the world, which was true, and the splendid conditions under which labor worked, which was only in part true. And so, rallying the party and winning victories, they had gone on increasing tariff duties

until the people rebelled.

We heard much and do hear much of the standard of American wages; no one wants to lower them. The protective tariff has given better wages and higher standards of life, but it is idle to contend that the American workingmen have received or are receiving their proportion of the great prosperity that has come to this country under laws, the very excuse for their exist-

ence being that they benefit the man who toils.

If one picks up the report of the Pittsburgh Survey or the report of the Commissioner of Labor investigating conditions in the steel industry, he will see that there has been a good deal of buncombe about the talk of labor conditions in this country. Men were compelled in those steel industries to work long hours at the white-heated furnaces with little chance to see their families, enjoy the blue sky or the green grass. It is easy for men living in luxury to talk about the high prices paid labor; wages of labor have not increased in proportion to the price of necessities, and wages have been increased not through generosity but because of the organizations of labor demanding it. Labor conditions have driven mere children to work in factories and shops; have required women, who ought to be attending to their families, to go into the factories and the sweat-shops and try to earn something to keep their families going.

In 1909 the leaders of the Republican Party had come to realize these things and yet, after the pledge in the platform for a revision of the tariff, they presented to the country the Payne-Aldrich bill, which was an instance at least of party forgetfulness. Four years ago a little band of Senators in this Chamber blazed the way for fair tariff reduction; they asked only for a fulfillment of the Republican platform. The old leaders of the party would not consent, with the result that they became absolutely lost in a wilderness of a popular condemnation. Opportunity knocked at the door of the Republican Party, modestly asked that party pledges be kept; it was denied admission, and passed on. Had President Taft denounced the Payne-Aldrich bill as a failure of the party to live up to its pledges and vetoed it, Mr. Wilson would not, in my humble judgment, have been President to-day, but Mr. Taft would have been triumphantly reelected.

The Payne-Aldrich bill has been referred to by a distinguished Senator as the Gettysburg of the Republican Party. I think it comes much nearer being the Waterloo of the Repub-

lican Party.

People in this country are not particularly interested in party welfare; they are deeply interested in public welfare, and any party that does not keep its promises can not longer hold men to its ranks by imploring them by the old slogan of In the election of 1910 the country repudiated the Payne-Aldrich bill. It was the issue in that campaign. Broken party platforms were on trial; the verdict was easily understood except by those "who having eyes see not and ears hear not." In the last presidential campaign the Republican Party and the Progressive Party agreed on one thing-the protection principle. I hope they may soon agree on other measures.

The President of the United States believes in his party keeping its pledges. I do not join in the clamor against him for alleged attempts to influence legislation. I do not believe he attempts to influence legislation improperly. He has the right, elected on a platform making certain pledges, to urge Members of Congress to carry out those pledges. He has no right to try and coerce by the use of patronage. Any President who would do that should be impeached. But the present President of the United States has too high a conception of public duty, is too honorable a man to use patronage to accomplish his pur-

The President is one of those conscientious men who believe that party platforms should be kept; he believes his party has been commissioned to revise the tariff downward.

I doubt not the country wants a revision of the tariff downard. They have grown tired of deception with reference to tariff revision; tired of having schedules written by those who have a direct pecuniary interest therein; and they have likewise grown tired and weary of tariff debates. Whatever may be the result of the passage of this bill—and let us hope in a spirit of patriotism that it may result in great good to the country—no one in the future can rise and say that President Wilson did not have the courage of his convictions, even though it was a little embarrassing to our friends from Louisiana who have been voting the Democratic ticket for so many years and whose present predicament finds great sympathy on this side of the Chamber, but, like the philosophy of Hancock, our friends have been, I fear, rather of the opinion that the tariff was a

I find myself in an embarrassing position as to this bill. have advocated for many years revision of the tariff downward; am anxious to vote for many schedules of this bill; am especially anxious to vote for the income-tax feature. I do not want to cast a vote that might in any way be an approval of the Payne-Aldrich Act. That act placed duties too high. I the Payne-Aldrich Act. That act pla fear in some instances this is too low.

My predecessor gave days and nights of ceaseless toil in the fight against that measure. His work shortened his life, and he was as much a martyr to the people's cause as any soldier who ever died on the battle field. He gave his life fighting a battle to reduce the burdens of the toiling millions in this country who are compelled to wear clothes, and while his fight was of no avail in Congress it awakened the conscience of the people and made it impossible ever again for trickery and deception to fool the American people on any tariff bill, and, although he is gone, he has left a great work, a work that makes for better citizenship, better legislation, better politics, and keeps open a little wider the door of opportunity for the children of to-morrow. No voice rang out more in exposing the shams and

hypocricies of the Payne-Aldrich bill than did his.

Believing in him as I did in life, and believing in him now that he has crossed over the river, I would be false to myself, false to him, and false to my constituency if I was not willing to do something to reduce the tariff rates of the Payne-Aldrich bill. That I am ready and anxious to do. If some changes were made in the Simmons-Underwood bill I should not hesitate to cast my vote for it. If we could get rid of caucus domination, those who believe in tariff revision on this side and those who likewise believe in it on that side could undoubtedly frame a bill that would be satisfactory to the country. course, Mr. President, it is impossible to have an ideal bill or one that suits everybody, and I realize that the majority have tried to frame a measure in line with their belief as near as

I have offered two amendments to this bill, one to place trust and monopoly controlled products upon the free list; the other to place aluminum on the free list. I introduce the amendment as to aluminum because it is a sample of a monopoly-controlled product.

I think I will not stop at this time to read the amendment, Mr. President.

I want to urge my Democratic friends to adopt these amendments. Their platform at Baltimore declared in favor of such

You said in 1908:

We favor immediate revision of the tariff with reduction of import duties. Articles entering into competition with trust-controlled products should be placed upon the free list.

In 1912 you said:

Articles entering into competition with trust-controlled products and articles of American manufacture which are sold abroad more cheaply than at home should be put upon the free list.

The Republican platform in 1912 said:

The Republican Party is opposed to special privilege and to monopoly. So in adopting this amendment you would be merely carry-

ing out your party pledges.

Many years ago in my State the Republican Party adopted a somewhat similar plank, its import being that where the tariff in any case was a shelter to monopoly it should be removed. This was the somewhat famous Iowa idea, and like Iowa ideas in general, it is sound. I am glad that the Democrats followed

theory can not consistently advocate such a doctrine. judgment Alexander Hamilton's theory of a protective tariff was right. A protective tariff covering the difference in cost of production at home and abroad would produce prosperity if behind that tariff wall combinations were not formed to control prices. Protection for the producer and competition for the consumer. A far greater trouble in this country than high tariff has been the enormous growth of trusts and combinations.

I know when anyone says anything about trusts or combinations he must expect to be termed a demagogue, and so we are derided, and pass it by, and they go on and flourish. But if my Democratic friends, by adopting an amendment to this bill in accordance with their platform at Baltimore, could assist in the work of destroying the trusts in this country, they would accomplish greater good than merely to reduce the tariff.

Mr. President, the question of controlling the great combinations of wealth far overshadows any other question in this country. It has demanded the attention of all political parties. The figures of the distinguished Senator from Idaho as to the control of the wealth of the country, submitted in a speech a few days ago on the subject, were startling. One of the leaders of the new Progressive Party, who had made a fortune in trust organizations, elucidated during the campaign the philosophy that he wanted this country to be a better place for his children to live. I have always thought that rather a selfish view, and the broad view would be to have this country a better place for everybody's children to live, and I could have had more enthusiasm for the cause he advocated and his trust policies if he had not been instrumental in the organization of two of the greatest trusts that the world has ever seen. Reformation is splendid, but it is more entitled to respect if the reformer returns the stolen goods.

Mr. President, if this Government can not control the trusts in this country, if it must confess itself impotent on this proposition, then we may as well concede that the trusts are powerful enough to destroy this Government. The Sherman Act has been helpful. The Supreme Court of the United States in the Naval Stores case, recently decided, has upheld the criminal sections of that act, and I hope that some trust magnates may eventually land in jail. It has always been my theory that the criminal sections of the Sherman Act if enforced, and jail sentences imposed instead of fines, would restrain trusts in this country.

That proposition was so splendidly put by a distinguished Senator from Texas, who has left this body, that I am going to make bold to use his language.

Senator Bailey some years ago, in discussing this question,

Mr. President, I will tender my good offices to this administration. I will show that I am more of a patriot than a partisan, and God knows I am as much of a partisan as any good citizen ought to be. Yet I am willing to see the Republicans do right, and I am even willing to help them do right.

I will tell them how they can make obedience to the laws of the United States certain. The plan is simply to send one of the malefactors of great wealth to the penitentiary. That will do it. Send one of them there for violating either the interstate-commerce law or the antitrust act, and he will be the last one of his kind to violate it. You can not restrain them by levying a fine, because when the courf fines a trust the trust fines the people. They pay the sheriff with one hand and they take a double sum out of the pockets of the people with the other hand. As long as their punishment can be measured in delars and cents they will continue to violate your laws, because men will take the chance of a pecuniary loss, in the hope of a greater pecuniary gain. But send one of them to the penitentiary and it will operate like magic. The millionaire trust magnate values but one thing in this world more than he does his fortune, and that is his liberty. He does not seem to love justice. He does not seem to love that repose of mind for which other men toil. He seems bent, after having many millions, upon acquiring many millions more.

Now, my Democratic friends-

Mr. NELSON. Will the Senator allow me?

The PRESIDING OFFICER (Mr. OVERMAN in the chair). Does the Senator from Iowa yield to the Senator from Minnesota?

Mr. KENYON. Certainly.

Mr. NELSON. I do not want to interrupt the Senator against his will, but I wish to call his attention to the fact that it has been the reluctance of the juries to convict.

Mr. KENYON. I am painfully aware of it.

Mr. NELSON. The Senator is no doubt familiar with the Packers' Trust prosecution in Chicago. The law has been on the statute book all the time. Yet there has been no conviction and sentence of these men. The trouble has been with our juries. this Iowa idea in their platform and wish that they might follow it in their bill. It is in no spirit of criticism or with any desire to embarrass anyone that I offer this amendment. I offer it because I firmly believe in the principle, and see no reason why a Republican who believes in a protective-tariff heart and the right spirit into American jurymen in such cases?

Mr. KENYON. Of course the best method is education. I am painfully aware of what the Senator said, because we have

Mr. BORAH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Iowa

yield to the Senator from Idaho?

Mr. KENYON. If it is on the same line with the question of the Senator from Minnesota. If it is not, I wish to answer

the question before yielding.

Mr. BORAH. I will not interrupt the Senator until he has answered the Senator from Minnesota, and then I wish to dis-

cuss the same subject a little.

Mr. KENYON. I discovered where great business enterprises had been built up in a community and it was thought that the prosperity of the community was to some extent created by those great enterprises, and that influence reached all through the employees and the citizens, you could not secure a jury that in some way was not subjected to that influence. But I believe you can secure juries in most cases outside of the great cities. It is not an easy task to try and convict men who have built up a great enterprise, as the packers had done in Chicago, of violating the law when it was thought at least a jail sentence would follow; but time and time again there have been convictions, and the courts instead of sending to jail have imposed fines. A fine is merely transferred to the back of the consumer, but a jail sentence can not be transferred to anyone else's back. Because the jurors may not convict in every case same argument would apply to a murder trial and all kinds of criminal cases.

I yield to the Senator from Idaho.

Mr. BORAH. It seems to me that there is another pertinent suggestion in connection with the failure of juries to convict which we have overlooked.

In the first place, the Sherman antitrust law provides the remedy of injunction against the formation of these combina-tions. The juries have been called upon frequently to convict some 10 or 15 years after the Government has connived at the existence of these combines. There was a combination formed some 8 or 10 years ago, and before it was formed it was advertised throughout the papers that it was going to be formed, and upon what basis it was going to be formed, and the amount of the capital stock. It was discussed and understood that it was to be one of the most powerful combinations that could be brought into the industrial field.

The Government of the United States could have restrained the formation of that combination. The law provided for it. But the Government not only failed to restrain it, but by failing

to restrain it connived at its formation.

Now, if a jury is called upon some 8 or 10 years thereafter to convict men and send men to jail for that which they have done with the practical connivance and consent of the Government, it is no wonder that a spirit of equity to some extent pre-

vails and they refuse to act.

Now, there is another proposition, if the Senator will pardon me, and that is that the law itself is almost impossible of exe cution before a jury. To my mind it is just as impracticable to try a man for the crime of restraint of trade as it would be to try a man who had committed murder for having retarded the development of the human race. If the law was simplified, and it was specifically stated that such and such an act should be a violation of the law-for instance, the lowering of the price of an article in a particular community in order to destroy its competitor, the making of an agreement to limit output, division of territory—that these separate acts should of them-selves be offenses, the court and the jury could get hold of the matter and juries would not hesitate to act. But now weeks and weeks are taken to try a question which involves law, evidence, economics, speculation, and so forth, and thus a matter is pre-sented so involved and intricate that it often results in a miscarriage of justice.

I think such a law would be absolutely im-Mr. KENYON. possible. It would be well if human wisdom could devise such law. But I do not believe that it is so difficult to enforce the Sherman Act as the Senator says. As everyone knows who has had any experience with it, it is just as easy to define terms under the act as it is, for instance, in a question of negligence in a lawsuit. Of course there are difficulties in it, but it is

not impossible of execution.

Mr. COLT. Mr. President The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Rhode Island?

Mr. KENYON. I do. Mr. COLT. Mr. President, I am inclined to think that in Mr. COLT. Mr. President, I am inclined to think that in the enforcement of the Sherman law on its criminal side one not quite succeed. The farmers did not quite get him in that

difficulty arises in the rules of evidence and in the constitutional safeguards which are thrown around the individual with respect to his conviction of a crime.

I hardly agree with the position of the Senator from Minnesota [Mr. Nelson] that it is the fault of the jury. It seems to me that the trouble lies in applying the strict rules of the common law in criminal cases and the constitutional safeguards to a question of industrial combination under the Sherman Act. In other words, it would seem as if the rules of the common law must be somewhat modified in order to secure convictions by the jury under the instructions which must now be given by the court.

The difficulty, it seems to me, is not so much with the jury as in the application of the present rules of procedure to an industrial question of this character. I merely suggest this to the Senator and ask him if he does not consider this to be one of the difficulties. I am not combating his argument at all.

Mr. KENYON. Does not the Senator believe that the diffi-

culty is that the courts have dealt with this as a business statute—an economic statute—and dislike to send men to jail for violating such a statute?

Mr. COLT. Possibly.

Mr. KENYON. However, I did not want to go into a dis-

cussion of that question.

Mr. COLT. I am inclined to think, so far as the courts are concerned, after a very long experience, that it is their endeavor to enforce the law, whether it sends a poor man or a rich man to jail; that they know no distinction, but that they do enforce the law and the rules of procedure as they exist. Of course, the temperaments of judges differ. Liberal-minded judges would seek, so far as appears to be justifiable, to conform the law to public opinion, but there may be other judges who take a more technical view. However, I do not think that the men who are convicted are not sent to jail because the judge himself has any leaning in support of the proposition that a man convicted under the Sherman Act should not be sent to jail.

Mr. KENYON. Of course, I did not want the Senator to understand me as criticizing the courts at all. I entertain the The courts can same high respect for the courts that he has. have nothing to do with it until the man is convicted. I have had some complaints with the courts for not sending men to jail when they were convicted instead of fining them. In the whole history of the Sherman Act, which has been 21 years on our statute books, to my knowledge, up to the Cash Register case, where a number of men were sentenced to jail, there was but one case where distinguished gentlemen were sentenced to jail, and that case was reversed by the Supreme Court not over two or three months ago. So we never have had the experiment of these men, who seem to think the earth and all the fruits thereof belong to them, reflecting over this matter in jail.

I am not ready to give up the Sherman Act-I know that many people are-until we put it to that final test. Then if it will not do the work it is time to try some other plan.

Now, I know, Mr. President, that a great many—
Mr. SHERMAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Illinois?

Mr. KENYON. Certainly.

Mr. SHERMAN. The inquiry I wish to make is entirely friendly to the line of thought that the Senator from Iowa is pursuing. The statement already made that jurors are loath to convict under the Sherman Antitrust Act is true. It does not follow that any just ground of criticism of jurors or the jury system exists. A verdict rendered in a prosecution under the antitrust law in the jurisdiction from which I come, where I know the personnel of the jurors—

Mr. KENYON. What case was that? Mr. SHERMAN. It was in the Packers' case; not the original immunity case, but, I believe, another one. There was on that jury a number of farmers. There was on it a farmer with jury a number of farmers. whom I had been associated, off and on, for, I will say, 18 years, an actual farmer. If he had any prejudices it must have been against the defendant. There were out of the 12 jurors 7 farmers, and none of them lived by the sweat of the hired man's brow. Their hands were just as hard as those of the average farmer who sustains himself, in large part, by his own toil, Still there was very little difficulty in arriving at a verdict of acquittal. I am stating this as a certificate to the integrity and fitness of juries. This is only in justification.

Mr. KENYON. And let me add, one, I to

And let me add, one, I think, had been a

Progressive candidate for Congress.

year. This is only in order to round out the thought presented here that ultimately will be found to come up at a long session.

The question raised by the Senator from Rhode Island [Mr. COLT] on the rules of procedure embraces two things. One is the admission of testimony. That is very material on a verdict. The jury is sworn to try the case on the evidence. The admission of the testimony is governed by the rules of which the The court does not arbitrarily make those Senator speaks. rules; he administers those rules as he finds them. Again, the instruction from the court, in a Federal court especially, and in many State jurisdictions, obliges the jurors to take the law from the court.

In these industrial controversies there are sometimes in some of the larger industrial combinations, such as the Packers, the Steel Trust, and similar ones, having offices both in the East and in the Middle West, grave questions, and it is extremely hazy as to whether the Sherman anti-trust law on the acts complained of has been violated at all.

Again, the question is whether it is such a violation as to constitute a crime. This leads me to make the inquiry—
Mr. KENYON. I do not want to try the Packers' case over

again; I spent three months upon it.

Mr. SHERMAN. No; this leads me to make the inquiry, in view of the statement made, whether in the solution of this question and the reluctance of a jury to convict under present conditions we must not reach the point where we must decide on what has come up any number of times in these prosecutions and in the formation of these industrial combinations.

First, whether in the formation there ought to be some authority to approve the incorporation articles before the concern is launched upon the industrial life of this country. That constitutes one feature of remedial legislation. One fragment of the Republican Party inclines to the opinion that there ought to be some form of a commission or some head of a department or some reliable authority to pass upon and validate the articles of incorporation before the corporation is given a Federal license.

Mr. KENYON. Does the Senator speak by authority as to this constituting a fragment of the Republican Party?

Mr. SHERMAN. No; only the Progressive platform of 1912.

speak by the authority of that platform only. Mr. KENYON. Then the Senator is speaking without authority.

Mr. SHERMAN. The only authority I have is from the returns of the last election. It seems to me like there was little of anything but fragments of our party to speak of, to the best of my information. I was in it.

Mr. KENYON. So was I.
Mr. SHERMAN. If the Senator will pardon me, the other method is whether we will not take outright the platform of the Democratic Party as adopted at Baltimore a year ago this summer. It laid down the principle of a code that shall definitely and specifically define what is lawful and what is unlawful in the formation of these industrial combinations. That is what we reach here. It is what has been reached in State legislation, and in any attempt to modify or amend the Sher-man antitrust law we will reach it in this Chamber. The question arises whether it shall be a commission, with authority to license or approve and with powers to suspend and dispense with statutes, to grant absolution for industrial sins, or whether we go to the opposite view and frame a code which will define specifically what can be done lawfully and what can not be Then when there is a specific code, anybody who comes along, lawyer, client, and other authority passing upon this question, will have brought squarely before them the lawfulness or unlawfulness of the act on the part of these industrial com-binations or whether they shall be launched upon the business life of the country. You will find in this instance it is a statute which will be your guide. Every man who practices law where these things have come up knows that many, many times the hardest thing in the world is to advise a business combination whether they can properly invest their money in it without the danger of being prosecuted under the antitrust law or possibly be charged with an offense that will land them in jail.

Mr. NELSON. Mr. President-

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Minnesota?

Mr. NELSON. I shall not trespass on the Senator— Mr. KENYON. I hardly know who started this subject. I should like to go on with my speech.

The PRESIDING OFFICER. Does the Senator from Iowa decline to yield further?

Mr. KENYON. I do.

The PRESIDING OFFICER. The Senator from Iowa has

Mr. SHERMAN. Mr. President—
The PRESIDING OFFICER. The Senator from Iowa declines to yield further.

Mr. SHERMAN. I want to complete the inquiry—
The PRESIDING OFFICER. The Senator from Iowa refuses to vield.

Mr. SHERMAN. I do not want to take any time.
Mr. KENYON. How long will it take to complete the inhiry? I will yield to the Senator only to finish.

The PRESIDING OFFICER. The Senator from Iowa yields, and the Senator from Illinois will proceed.

Mr. SHERMAN. In rounding out the explanation of this principle, some light might be properly given by the Senator on this subject, whether we take a code or a commission. I am asking for information.

Mr. KENYON. I will just make this answer to the Senator from Illinois: Many good and wise men have come to the conclusion that the Sherman Act is a failure. I am not a wise man, but I try to be a fairly good man. I am not willing to accept that theory. If the time comes when it is a failure and we are not going to accomplish anything under the Sherman Act, I am ready to join in the movement for a commission of some kind to pass upon the question of incorporation and probably on the question of capitalization. It must be one or the other. But let us not give up the Sherman Act until it has been fully tried out. Let us rather equip the Department of Justice with trained lawyers and pay them large salaries and let them go ahead and enforce the criminal features of that act. You can not do it under the present equipment of the Department of Justice.

Now, Mr. President, I want to get back to where I was. know there are a great many wise people who feel that the tariff and the trusts have nothing to do with each other, that they ought to be separate subjects, and that you can not undertake in a tariff bill to do anything in relation to the trusts. Other very wise people believe otherwise.

I quote from a very distinguished lawyer, who was President of the United States, Mr. Taft, who at Missouri Valley, in my State, said relating to this question:

It should not be so high as to furnish a temptation to the formation of monopolies to appropriate the undue profit of excessive rates.

In his speech of acceptance he said:

The excess over that difference serves no useful purpose-

That is, the difference in the cost of production at home and abroad-

but offers a temptation to those who have monopolized the production and sale of such articles in this country to profit by the excessive rates.

It seems to me that excessive tariff rates may help monopoly. I can not understand why my Democratic friends are not willing in this bill, if it can be done, to assist in a new method

of helping to destroy the trusts in this country.

Where the Nation has granted protection, and when the industry so protected violates the law of the Nation, that protection should be taken away from it. That is all this amendment seeks to do, and it only does that when a court has decreed that the article is the subject of monopoly. Out of abundance of caution it does not go as far as your platform. If this may strike down the protective-tariff system, it certainly will not hurt your feelings. You do not believe in having the country, the wealth thereof, and its industries dominated and controlled by great trusts and combinations. Why will you not support this amendment? Do you not mean what you said in your platform about it, that articles entering into competition with trust-controlled products should be put upon the free list? Have you no independence? Are you the slaves of King Caucus? Is your party in caucus greater than you party in convention assembled? implore you not to set aside the action of your convention and submit to the dictation of a caucus. How far is this caucus proposition to go?

Is the currency bill to be a matter of caucus? Is the Mexican situation to be a matter of caucus? Is every question that comes up here to be a matter of caucus? I am glad that we can not have binding caucuses on this side of the Chamber. refuse to abide by party caucuses on this side. Everything should be open. Let the sunlight of publicity in. Committee meetings, except where foreign relations are involved, should be open to the public; caucuses likewise should be open to the public. Do not, my Democratic friends, I beseech you, because of caucus slavery, repudiate this important plank in the Baltimore platform. It will be suggested that Republicans have nothing to do with this platform, that you are suspicious of such assistance from Republican sources; but I have waited in vain for some Democrat to take up the cudgel for this plank. As no one has come forward, I venture in a modest and humble way to offer my assistance with this amendment, because I believe it to be in the interest of those seeking industrial freedom in this

Mr. SUTHERLAND. Mr. President, I promise not to trespass on the Senator's time

Mr. KENYON. I have been accustomed to it. I am perfectly willing.

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Utah?

Mr. SUTHERLAND. The Senator has yielded.

I understood the Senator from Iowa in the beginning to justify, and I think, perhaps, going further than that, to commend the President of the United States in his effort to direct the

present Congress, or, at any rate, the Democratic——
Mr. KENYON. No; I did not. I ask the Senator to-place it as I stated it, if he desires to comment on it.

Mr. SUTHERLAND. I was simply stating, preliminary to the question-

Mr. KENYON. I should like to have the preliminary correct,

Mr. SUTHERLAND. The Senator justified the President in his effort to induce the Democratic membership of the two Houses to put through a tariff bill, because, as the Senator said, that would be carrying out the platform pledge of the Democratic Party, and the Senator seemed to think it was the duty of the President to see that that platform pledge was carried out as far as he was able to do it.

Mr. KENYON. I said I thought he should not be criticized

for attempting to carry it through in a proper way, by argu-

Mr. SUTHERLAND. By advising the members

Mr. KENYON. Not by the use of patronage.
Mr. SUTHERLAND. I quite understood that, but by advising in a legitimate way the members of his party in Congress.

Now, the Senator has called attention to this particular plank in the Democratic platform with reference to the trust question. It is a part of the party platform, and does not the Senator think that it was the duty of the Democratic President to have advised his party with reference to that as well as these other things?

Mr. KENYON. I wish he had done so. I think certainly it would do no harm. Of course I am not in the confidence of the

President, and I do not know what he would prefer.

Mr. SUTHERLAND. Does the Senator think that may explain the failure of the Democratic Members of the two Houses to put that proposition into the bill; that is, that the President had not so advised them to do it and therefore they left it out?

Mr. KENYON. I am not going to try to explain anything

that the Democratic Congress may have done.

If this amendment were adopted, doubtless many articles would go on the free list. I want to take one glaring example of a monopoly-controlled product as an illustration—a great corporation that has come up from a small investment of money to where they have declared enormous dividends and represent millions of capital, have secured power from Niagara Falis, and now seeking further power on the St. Lawrence River, and willing to invest \$40,000,000 to secure it; a monopoly so bold that it has not only absorbed practically all the business in this country in its line, but through a subsidiary company in Canada has entered into contracts with European companies actually providing that this article shall not be sold to the United States Government by these foreign concerns; a company that has built up a monopoly so powerful that it is engaged in business treason against the Government under which it lives and under which it enjoys protective-tariff duties. I refer to aluminum and the products thereof, which are now protected by tariff duties.

I do not want to spend much time in argument, as I am not in favor of delay in the passage of this bill. Even those who are opposed to the bill, knowing that it will pass, are anxious that it be immediately passed. The country is squared away for the bill and will try it out, and it must stand or fall by the test of operation. If the bill is a good one, the country is entitled to it at once; if bad, the sooner found out the better. If the bill is a success, if it reduces the high cost of living and still maintains high wages for the laborer and good prices for the farmer, the Democratic Party can look forward to a long lease of power; if it does not do these things, however, it will be some sixteen or so odd years before they will come into power again. I am glad the bill is not a compromise measure. It should embody the views of those who sincerely believe in a principle, and I assume it does, although it is difficult to discover the principle.

Indeed, in my judgment, Mr. President, the country is not particularly alarmed concerning this tariff bill. Nothing but failure of crops can bring hard times in the present condition of our affairs. The people are more interested in the question of banking and currency and in questions of industrial and social justice than they are in tariff legislation.

ALUMINUM.

I now want briefly to take up the question of aluminum.

In 1889 Charles M. Hall was granted a patent on a process for the manufacture or reduction of aluminum by the aid of

an electric current.

In 1892 Charles Bradley, who had made application prior to Hall, was granted a similar patent, and about the same time a French inventor named Herroult began to apply substantially the same electrical process in the manufacture and reduction of aluminum.

In 1888 the Pittsburgh Reduction Co., afterwards the Aluminum Co. of America, was incorporated. They became the owners of the Hall patent process and had some litigation with reference to the Bradley patents, securing rights under both these patents. The capital stock of the Pittsburgh Reduction Co. originally was \$20,000. This stock was increased in 1889 to \$1,000,000. There is some question as to just how much of this was cash.

I ask to be permitted to insert in my remarks, without taking the time to read it, certain portions of the testimony taken be-fore the Ways and Means Committee of the House.

The PRESIDING OFFICER. Without objection, permission

to do so is granted.

The matter referred to is as follows:

The matter referred to is as follows:

Mr. Palmer. How long did the capital continue at \$1,000,000?

Mr. Davis. For a number of years, when we increased the capital to \$1,000,000 by issuing \$600,000 of preferred stock for \$600,000 in cash. The capital then remained at \$1,600,000 for another period of years, when we issued \$2,200,000 more of common stock, making the total of common-stock capitalization \$2,200,000, and of this \$2,200,000 \$1,200,000 was for cash and \$1,000,000 was a stock dividend.

Mr. Palmer. \$1,200,000 was cash?

Mr. Davis. Yes, sir: and \$1,000,000 was a stock dividend. And then at the expiration of our patents—our patents expired in 1909, or at the end, I think, of 1908—we capitalized the carnings which we had always left in the company, because we paid little or no dividends during all those years; we declared a stock dividend and authorized the issuance of \$20,000,000 worth of stock, but only \$18,750,000 is issued.

Mr. Davis. Yes, sir.

Mr. KENYON. Mr. Davis admits that no amount equal to \$2,000,000 in cash was ever invested from outside sources in the aluminum company.
Mr. OLIVER. Mr. President-

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Pennsylvania?

Mr. KENYON. I think I will.

Mr. OLIVER. I merely want to correct—
Mr. KENYON. I should like to ask the Senator first, however, before I yield, if he is interested in any way in the Alu-

minum Co. of America?

Mr. OLIVER. Mr. President, I regard that question as

being rather impertinent in this place.

Mr. KENYON. I will withdraw it.

Mr. OLIVER. But I will cheerfully answer it. I am not and never have been in the slightest degree interested in that company

Mr. KENYON. Did the Senator not appear before the House committee with reference to power sites on the St. Lawrence River in behalf of the Aluminum Co. of America?

Mr. OLIVER. I did, Mr. President—
Mr. KENYON. The Senator was there directly representing this company in the hearings before the House committee?

Mr. OLIVER. I was there representing the owners of this company, who are constituents of mine, and endeavoring, so far as I could, to accommodate them; but I am not and never have been directly or indirectly interested in any degree whatever in this business or in anything connected with it.

Mr. STONE. I should like to ask-

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Missouri?

Mr. STONE. I should like to ask the Senator from Iowa-

Mr. OLIVER. I was just going to ask—
The PRESIDING OFFICER. To whom does the Senator from Iowa yield?

Mr. KENYON. I yield first to the Senator from Pennsylvania [Mr. OLIVER], and then I will be glad to yield to the Senator from Missouri [Mr. STONE].

Mr. OLIVER. Mr. President, the Senator said, or, at least, I so understood him, that at no time was any sum approximating \$2,000,000 in cash paid in. I think he will find from the testimony that Mr. Davis said that there was something over \$2,000,000 in cash paid in.

Mr. KENYON. I set out the testimony; but I will not stop to read it. My recollection of the testimony is that it was exactly opposite, and that \$2,000,000 had not been paid in. Mr. OLIVER. I think the Senator will find, upon examina-

tion of the testimony, that he is wrong.

Mr. KENYON. If I am, I will be glad to be corrected. I

now yield to the Senator from Missouri.

Mr. STONE. I merely wanted to remark that the Senator from Iowa, in the beginning of his speech, said something about delay, and, among other things, that a Senator had been put on trial here the other day. I was just wondering if the Senator from Iowa was endeavoring to put some Senator on trial.

Mr. KENYON. If I am, I will not take as much time as the

Senator from Missouri took in his trial.

Mr. STONE. Then, it is a mere question of time. Mr. KENYON. I will not occupy in all I have to say anything like the time the Senator from Missouri has occupied on

In 1903 the Aluminum Co. of America took over the Pittsburgh Co. Its present capitalization is \$30,000,000, so that from the investment of less than \$2,000,000 the Aluminum Co. in 24 years has made approximately \$28,000,000. It developed the industry until 1911, in which year it produced about 30,000,000 pounds, which was substantially the entire production in the United States.

PROFITS.

This monopoly has made enormous profits. In 1908 this company declared a stock dividend of 100 per cent. In 1909, three months after the passage of the Payne-Aldrich Act, it declared a dividend of 500 per cent on a capitalization then of \$3,200,000, while at that time their profit and loss account was \$6,500,000.

Mr. Davis, the head of this company, had testified before the

Ways and Means Committee of the House in hearings on the Payne-Aldrich bill that the tariff of 8 cents on aluminum ingot and 13 cents on sheets, bars, and rods was absolutely necessary if their company was to continue to produce aluminum in this country, to give employment to American workmen, and to provide reasonable profit on the capital invested; and yet within three months after the passage of that act they declared a dividend amounting to \$16,000,000. Commenting on this fact, the

The Aluminum Co. of America, whose headquarters are at Pittsburgh, has declared a stock dividend of 500 per cent. It recently gave notice that it would increase its capital from \$3,200,000 to \$25,000,000. The company is now paying the equivalent of 24 per cent on its common stock per annum. No recent quotations have been made on the stock. It sold some months ago as high as \$350 per share and in 1907 at \$500 per share.

The New York Times of November 19, 1909, in commenting on the fact that the Aluminum Co. of America had a stock dividend of 500 per cent, properly termed it "Melons to the Mellons.

The Payne-Aldrich Act reduced the duty on aluminum ingots from 8 to 7 cents per pound and reduced the duty on sheets, bars, and rods from 13 to 11 cents per pound. Taking the figures for the total production of aluminum in the United States from the United States Geological Survey and subtracting the figures of imports furnished by the Department of Commerce and Labor, we find that the total production of the Aluminum Co. of America from the year 1891, when their production was 150,000 pounds, to June 30, 1909, was about 160,000,000 pounds. Their lowest duty since the Dingley bill was 7 cents per pound. The highest protection under the Dingley bill was 8 cents per pound. This dividend of 500 per cent, therefore, in 1909 amounts to 10 cents per pound on every pound of metal they had ever produced, or more than the entire duty for this period.

In Mr. Davis's testimony (House committee, p. 1495) he shows the Aluminum Co. from 1891 to 1909 had earned from twenty to twenty-four million dollars on 80,000 tons of aluminum. That would give them a net profit per ton of from \$250 to \$300 on every ton of aluminum made. The protection on ingots during this time was about 8 cents per pound, or \$160 per ton. So they were making in profits the entire protection and an ad-

dition of approximately \$90 to \$140 per ton.

Again, Mr. Davis states in his testimony that the price of the Aluminum Co. of America during 1912 on ingots was 21 cents. The average price in Europe was 15½ cents. If the Aluminum Co. made 101 cents per pound selling at 21 cents, according to Mr. Davis's own testimony they would have made 5 cents per pound if duty had been removed. In other words, a profit of 5 cents per pound on a cost of 11 cents per pound, or at least 40 per cent on the cost price.

An institution of this character can not well be claimed to be an infant. It has grown to be a very lusty infant, swallowing and digesting practically all other concerns in this country endeavoring to engage in business, and like Oliver Twist continually asking for more. It was before the Sixty-first Congress asking for power sites on the St. Lawrence River and calculating to spend \$40,000,000 therefor.

I ask to be permitted, Mr. President, to insert from the hearings of the House committee certain parts of page 690. I do not wish to stop to read it.

The PRESIDING OFFICER. In the absence of objection, permission is granted.

The matter referred to is as follows:

Mr. Littlefield. What do you take as your aggregate investment?
Mr. Davis. We are calculating \$40,000,000 ought to see us through.
Mr. Littlefield. Covering everything?
Mr. Davis. Covering everything. That is applied to the power house as well, excluding any aluminum plants or transmission lines or any means of utilization.
Mr. Littlefield. Does that include damages you may have to pay for ringrian rights?

riparian rights?

Mr. Davis. We do not expect to have to pay any damages for riparian rights, because we own all of the property which would be affected

rian rights, because we own an of the property by this enterprise.

Mr. LITTLEFFELD. That is, the expectation of the promoters is that they are in a position where no riparian proprietor will be in a position to recover damages in case the development is made?

Mr. Davis. That is our expectation.

Mr. KENYON. On January 14, 1913, Mr. Davis, speaking for the Aluminum Co. of America, stated to the Ways and Means Committee of the House that their present capitalization was \$30,000,000, and he admitted that the company was earning annually from 15 to 18 per cent on its capital, or from \$4,500,000 to \$5,400,000 per annum, and he was asked this question by Mr. Palmer:

So when you earn 15 per cent on your \$30,000,000 you are earning from 180 to 225 per cent on the actual money which was invested in your plant?

Mr. Davis. Yes, sir.

This company has held the American price of aluminum without reference to cost at a point just a little above or a little below the European prices plus the duty, which is verified from a table taken from the American Metal Market of New York

I ask permission to insert that table as part of my remarks. The PRESIDING OFFICER. Without objection permission to do so is granted.

The table referred to is as follows:

. Year.	Average price in Europe per pound.	Plus duty.	Average price in United States per pound.
1908. 1909. 1910. 1911. 1912.	Cents. 18, 89 14, 56 15, 65 12, 95 15, 25	Cents. 8 7 7 7 7	Cents. 26, 89 to 30, 50 21, 56 to 23, 00 22, 65 to 22, 25 19, 95 to 20, 34 22, 25 to 21, 00

GOVERNMENT'S CASE.

Mr. KENYON. Mr. President, so powerful had become this great monopoly, and so iniquitous were the contracts it was entering into, both at home and abroad, that the Government commenced suit under the Sherman Antitrust Act in the District Court of the United States for the Western District of Pennsylvania, charging it with violating the Sherman Antitrust Act as a combination in restraint of trade and as a monopoly. It was charged in the Government petition that it controlled not only the raw product but the manufactured product likewise; that it controlled:

First. Raw material. Second. Cooking utensils. Third. Castings. Fourth. Aluminum goods and novelties.

The aluminum company own and control, as charged by the Government, more than 90 per cent of all the known deposits of bauxite in the United States and Canada. This is denied by Mr. Davis in his testimony, but he admits that they control 90 per cent of the bauxite beds in this country which are being commercially used; and that it is true to some extent that the revson the other bauxite beds are not being used commercially because there is nobody to sell it to except the Aluminum Co. of America

I.

In 1905 or thereabouts the Aluminum Co. of America acquired the General Chemical Co. In 1911 they acquired the aluminum bauxite properties of the Republic Mining & Manufacturing Co. from or through the Norton Co. The only remaining independent producer of bauxite in appreciable quantities is the National Bauxite Co., but its output has been used entirely in the manufacture of alum and chemicals with the General Chemical Co., the Norton Co., and the Pennsylvania Salt Manufacturing Co. The only other possible competitors they have are under

agreements and contracts, which I will refer to later.

It is quite apparent that the aluminum company has a monopoly as to bauxite. The refiners of bauxite into alumina, suitable for making metal aluminum, are the Aluminum Ore Co., the Pennsylvania Salt Manufacturing Co., and the Merrimac Chemical Co. The Aluminum Ore Co.'s capital stock is owned by the Aluminum Co. of America. The amount of alumina produced by the Merrimac Co. is negligible. These companies are all tied up with contracts, so that the aluminum company practically control it.

ALUMINUM COOKING UTENSILS.

This industry has grown very much. The Government in its petition states:

The history of the aluminum cooking utensil business in the United States is a history of shipwrecks caused chiefly by the arbitrary, discriminatory, and unfair dealings of the Aluminum Co. of America.

The United States Aluminum Co., the Aluminum Cooking Utensils Co., and the Northern Aluminum Co. own and control approximately 78 per cent of the stamped and spun aluminum cooking-utensil business of the United States and Canada.

The United States Aluminum Co. practically owns and controls the stock and entirely controls trade and commerce in aluminum cooking utensils.

ALUMINUM CASTINGS.

Prior to 1909 there were a number of independent manufacturers of aluminum castings throughout the United States. Patents were about to expire. In May, 1909, there was a combination of the plants engaged in the manufacture of aluminum There was one at Cleveland, one at Detroit, and one at Buffalo. These plants combined with the United States Aluminum Co., of New Kensington, Pa., and the Syracuse Aluminum & Bronze Co., of Syracuse, and the Eclipse Foundry Co., of Detroit, Mich. These were all combined by stock exchanges into the Aluminum Castings Co., a corporation organized under law of the State of Ohio, of which the Aluminum Co. of America owns 1,625 out of the 4,000 shares. This ownership, together with the fact that said company is the only profitable source of supply of aluminum ingots in the United States, enables them to control the policy of said Aluminum Castings

IV.

ALUMINUM GOODS AND NOVELTIES.

This is another branch of the industry. Several large plants of the United States have been united under the corporate name of the Aluminum Goods Manufacturing Co. of New Jersey.

Mr. MARTINE of New Jersey. Mr. President— The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from New Jersey?

Mr. KENYON. I always yield to the Senator from New

Mr. MARTINE of New Jersey. I am quite free to confess that the little Commonwealth of New Jersey has been the festering place, the spawning pool, of a thousand iniquities, of which I am heartily ashamed.

Mr. KENYON. During the long residence of the Senator in New Jersey, in his State, I am surprised they could have ex-

isted.

Mr. MARTINE of New Jersey. We Democrats have done our best to allay the iniquity and in a measure we have succeeded, but we are hoping, nevertheless, for better results than we have thus far obtained.

Mr. KENYON. Then I sincerely hope the Senator will sup-

port my amendment regardless of the caucus.

The Aluminum Co. of America own 37 per cent of the capital stock, which, together with the fact that it is the sole available source of supply, places them in control of its policy; and in said suit it is charged that on account of its interest in said company they furnished crude and semifinished aluminum to said Aluminum Goods Manufacturing Co. at preferential

price quoted in the table heretofore introduced of 21 cents on American produced aluminum was the price at which the great part of the output of the Aluminum Co. of America was sold by them to their subsidiary companies, in which they owned a large portion of the stock and whom they favor by preferential rates and deliveries in the sale of the raw product, making competition by the independent consumers in the open market practically impossible. I will, if I may be permitted to do so, insert as part of my remarks a copy of one of their contracts, which is a fair sample of the harassing methods employed by this arrogant monopoly toward those who were compelled to deal with them.

The PRESIDING OFFICER. In the absence of objection,

permission is granted.

The matter referred to is as follows:

COPY OF CONTRACT.

Mr. KENYON. I also ask permission to insert four letters filed with the Ways and Means Committee of the House from various jobbers, showing the method of treatment accorded them by this monopoly

The PRESIDING OFFICER. Without objection, permission

is granted. The letters referred to are as follows:

CINCINNATI, OHIO, January 13, 1913.

The letters referred to are as ioliows:

Cincinnati, Ohio, January 13, 1913.

Hon. Oscar W. Underwood,
Chairman Ways and Mears Committee, Washington, D. C.

Dear Sir: As merchant jobbers handling manufactured aluminum products, would say that during the last six months we have lost valuable contracts and orders in large quantities, due to the fact that we are advised by the manufacturers that they are unable to secure a sufficient amount of aluminum ingots. This we believe due to restricted productions by the United States Aluminum Co. and their failure to fill orders placed with them. We as well as the manufacturer find it impossible to secure elsewhere the aluminum ligots, and in a great number of cases other articles have been substituted and aluminum dispensed with, in some cases resulting in permanent diversion of business from us.

Promises of delivery are made indefinite, and we have not only lost valuable orders but are daily threatened with cancellation of such orders as we now hold. The consumers of aluminum products to-day are suffering through nondelivery, and if there is anything, in our opinion, on which the tariff should be removed it is aluminum ingot. It is our opinion, based on the best information we can secure, that aluminum can be manufactured in this country nearly as cheap as abroad, and this applies on sheet aluminum, rods, molding, and aluminum tubing. We think on these there should not be more than 3 cents per pound duty inflicted upon the consumer, provided the rods, molding, sheets not thinner than one-sixteenth inch to one-eighth, and tubing are not smaller in diameter than 2 inches.

We trust therefore your honorable committee can devise means whereby aluminum products may be delivered more satisfactorily to the consumers.

Yours, truly,

consumers.
Yours, truly,

E. K. MORRIS & Co.

RACINE, WIS., November 25, 1912.

CHAIRMAN WAYS AND MEANS COMMITTEE, Washington, D. C.

MY DEAR SIR:

to said Aluminum Goods Manufacturing Co. at preferential rates, thereby enabling the said company to underbid its competitors.

In all these respects the Aluminum Co. is a monopoly. It would be difficult to find a more many-sided one. The independent users of the country have been at their mercy. In letters filed before the Ways and Means Committee it was apparent that the independent users were unable to get deliveries at any price from the Aluminum Co. of America in 1912. The

can produce material and sell it abroad cheaper than what it can be sold at in this country it clearly shows that they are reaping the benefit of the duty on all stock imported. It is not a question of wage earners, but one in which the profits are put on a more equitable basis. This matter would not have arisen had the aluminum company been able to take care of the users of aluminum in this country; but they are not in a position and can not take care of their customers, apprising them all to import their stock.

Our claims, as far as the exporting of this stock is concerned, can be substantiated by referring to the trials of the tariff commission, and if these are not available the information can be secured through Mr. Arthur Seligman, 165 Broadway, New York City, who has a complete copy of all shipments of aluminum made abroad during the past year.

We consider this matter serious owing to the fact that we are importing approximately 20 tons in the coming three months—December, January, and February; and by being able to have this duty of 11 cents removed it would make a tremendous large saving for us as well as the balance of aluminum users in this country, and at the same time put the thing upon a fair basis for all concerned.

We believe in protection where it can be shown that protection is of some benefit to all concerned, and not to any one individual, as it is in this instance.

We appreciate that you have a good many matters come before you; also that a good many of these matters are hard to take up, but we ask that as a favor some action be taken if it is possible. Do not hesitate to ask for any further information that you need.

Yours, very truly,

RACINE MANUFACTURING Co.,
By HAROLD SMITH, Secretary.

RACINE MANUFACTURING Co., By HAROLD SMITH, Secretary.

TOLEDO, OHIO, January 14, 1913.

Hon. OSCAR W. UNDERWOOD, Chairman Ways and Means Committee, Washington, D. C.

Hon. OSCAR W. Underwood,
Chairman Ways and Means Committee, Washington, D. C.

Dear Sir: We understand that at an early date the Ways and Means Committee is going to take up the question of tariff on aluminum. This country, on account of the increased use of aluminum on automobile bodies, is now using an enormous amount of aluminum, and the supply at the present time is very much below the demand.

We ourselves are using a great deal of the material and are having a great deal of trouble to get shipments made quicker than six or eight months. We have been compelled, in order to keep our business going, to purchase several quantities of this material outside of the United States, and the present tariff is exceptionally high and makes the delivery price of such material very large.

We believe that, owing to the increased demand on account of automobile bodies, that this tariff should be lowered a good deal and that it should be placed at not over 3 cents a pound.

We further believe that this country can produce aluminum as cheap as other countries, because it was not very long ago that the United States exported a great deal of aluminum, and this aluminum was sold at lower prices than it was sold in this country.

When we mentioned above that we believed that duty should not be over 3 cents a pound we referred to the semimannfactured article, such as sheet aluminum, rods, moldings, etc.

We also believe that the tariff should be made on a pound basis rather than ad valorem; then the manufacturers of this country would know what duty to figure on.

Yours, very respectfully,

The Milburn Wagon Co.,
H. W. Suydam, President.

THE MILBURN WAGON CO., H. W. SUYDAM, President.

BLUFFTON, OHIO, January 21, 1918.

Hon. J. H. GOEKE, Washington, D. C.

Dear Sir: You are undoubtedly aware of the fact that the rates of duty provided in the present tariff are an injustice to the American consumer. The production in this country has not by any means been sufficient to enable buyers to secure all they needed, and they have been compelled to buy a very large portion of their requirements in the European markets; that is, from importers. We attach copies of two letters from the Aluminum Co. of America verifying this statement.

of two letters from the Aluminum Co. of America verifying this statement.

It is also a well-known fact that aluminum can be produced as cheaply over here as it can abroad, and only a few years ago very considerable quantities of aluminum were exported to Europe and sold by the American producer at prices ruling on the other side, which, of course, were much lower than the prices pald over here; that is, the duty deducted from the American prices usually shows the prices obtainable in Europe. Statistics show that for the year ending June, 1912, there were exported in aluminum from this country an aggregate amounting to \$1,144,353. It is only reasonable to say that should the duty be revised it would lead to a very large extension of the aluminum Industry in America and would absolutely benefit the manufacturers as well as the country in general.

Ingot aluminum, rods, moldings, etc., being only semimanufactured, should pay no more than 1 cent per pound duty.

We feel sure that some relief must come to the American manufacturer using aluminum. The present situation compels us to order from four to eight months in advance, and it is next to impossible for the average manufacturer to anticipate requirements so far in advance. Reduction in the tariff will be a relief, and we strongly urge that you use your influence in furthering this needed reduction when the metals schedule is brought before the committee for consideration.

Yours, very truly,

The Diller Manufacturing Co.,

THE DILLER MANUFACTURING CO., P. DILLER, President.

Mr. KENYON. The decree secured by the Government in the suit against them under the Sherman Act recites (p. 14):

This decree having been agreed to and entered upon the assumption that the defendant, Aluminum Co. of America, has a substantial monopoly of the production and sale of aluminum in the United States, etc.

This was a consent decree agreed to by the Aluminum Co., in which they agreed that they have a substantial monopoly of the production and sale of aluminum in the United States, and the court so finds.

Why should this monopoly have any further protection for their product? But they say, "We are a good trust, not one of the wicked trusts." Mr. Davis, president of the company, wrote Senator Kavanaugh, of Arkansas, February 16, 1913, a letter,

which Senator Kavanaugh placed in the hearings before the House committee. I ask permission to insert that letter in the RECORD.

The PRESIDING OFFICER. Without objection, permission is granted.

The letter referred to is as follows:

Washington, D. C., February 6, 1913.

Washington, D. C., February 6, 1918.

United States Senate, Washington, D. C.

Dear Senator Kavanaugh: The Aluminum Co. of America finds one of its principal sources of raw material in Arkansas, which is our reason for venturing to interest you in our behalf, for any blow to the aluminum industry will be correspondingly reflected by depression in value and activity in the bauxite fields of Arkansas.

We have presented a brief to the Ways and Means Committee, and inclose you a copy of it. The fact that we are the only manufacturers of aluminum has, however, brought upon us the undeserved charge of monopolistic practices. We have therefore filed a "supplemental statement."

of aluminum has, however, brought upon us the undeserved charge of monopolistic practices. We have therefore filed a "supplemental statement" bearing directly upon this point, and inclose you a copy of that statement.

Our patents, which were the foundation of the aluminum industry, did not expire until the beginning of 1909, and for two or three years the effects of the panic were such that few enterprises were started. In 1911 or 1912, however, the only company that ever tried to start in the aluminum business, so far as we know, raised \$10,000,000, and have their plant nearly finished in North Carolina. We have never tried to stop anybody from going into the aluminum business, and we have never combined with or bought out any other aluminum manufacturers. We certainly ought not to be called a monopoly in the offensive use of the term. We do not hesitate to say that we have been a good monopoly, both with respect to our treatment of our customers and workmen and with respect to the development of the aluminum industry. We certainly have not used our position to the detriment of either our customers or workmen or would-be competitors.

Along with the charge of monopoly and the insinuation that our policy has been "monopolistic" the fact that our investment has grown is urged against us. The fact is, however, that our earnings have been only reasonable and normal on the investment, but we have pursued the rather unusual policy of not paying out our profits to any extent, but have kept them in the business. Few people stop to think how fast reasonable profit, yet 20 per cent per annum reinvested in the business.

For instance, 20 per cent in a manufacturing business is not an unreasonable profit, yet 20 per cent per annum reinvested in the business.

For instance, 20 per cent in a manufacturing business is not an unreasonable profit, yet 20 per cent per annum reinvested in the business.

We will certainly very much appreciate any assistance which you can give us to getting a fair and reasonable amount of protect

ALUMINUM CO. OF AMERICA, ARTHUR V. DAVIS, Jr., President.

Mr. KENYON. It will be observed that Mr. Davis says in his letter, "We do not hesitate to say that we have been a good monopoly." It is interesting to note what a "good" monopoly they have been. In the hearings of the House committee, page 1501, is the following interesting dialogue:

Mr. Palmer. Then your only contract is between your Canadian company and the European companies?

Mr. Davis. Yes, sir.
Mr. Palmer. Which prevents the European companies from importing into Canada—is that the contract?

Mr. Davis. No, sir; that is not the nature of the contract.
Mr. Palmer. What is it?
Mr. Davis. Well, the companies agree to subject themselves to certain rules of a committee, both with respect to price and quantity of output, etc.
Mr. Palmer. This agreement prevents competition between your Canadian plant and the foreign manufacturers?
Mr. Davis. Yes, sir.
Mr. Palmer. Is it successful in preventing that competition?
Mr. Davis. Yes, sir.
Mr. Davis. Yes, sir.

Mr. OLIVER. Mr. President-

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Pennsylvania?

Mr. KENYON. I do. Mr. OLIVER. The Senator understands that that has reference to the sales in other countries and does not affect sales in the United States in any way whatever.

Mr. KENYON. I am coming to that in just a moment. The Senator is anticipating me a little.

Also note the further dialogue:

Mr. PALMER, Then your Canadian company has a contract with all the aluminum manufacturers?

Mr. DAVIS. Yes, sir.

Mr. PALMER. Which contract regulates the prices?

Mr. DAVIS. Yes, sir.

Mr. PALMER. What is the price in Canada to-day?

Mr. PALMER. What is the price in Canada to-day?

Mr. PALMER. Yes. Is it the same as it is here?

Mr. DAVIS. Yes. The same as it is in England or Italy. Just now it is abnormally high. It has averaged about 12 or 14 cents until just within the last two or three months.

Mr. SHIVELY. Mr. President, will the Senator right there yield for just a moment?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Indiana?

Mr. KENYON. Certainly.

Mr. SHIVELY. Was it not in this same examination of Mr. Davis that the following testimony was given?

Mr. PALMER. What companies are connected with your Canadian company in a contract? Where do they operate?

Mr. Davis.—

Of course, this Mr. Davis was president of the Aluminum Co. of America

There is a company in Italy, a Swiss company, with plants in Switzerland, Germany, and Austria; two companies, I think, in Norway; some five or six companies in France; two companies in England; and another company in Switzerland, independent of the one first spoken of, I think that is all.

Mr. Palmer. That comprises about all the aluminum manufacturers on the Continent?

Mr. Davis. Yes, sir; all aluminum manufacturers on the Continent.

Mr. KENYON. I thank the Senator. I quote further from the testimony of Mr. Davis before the House committee:

Mr. Palmer. Is there real competition abroad between these various companies which you have mentioned?

Mr. Davis. There has been.

Mr. Palmer. Is there now?

Mr. Davis. Not now; no, sir.

Mr. Palmer. Why not?

Mr. Davis. On account of this contract that I speak of.

Mr. Palmer. Well, I mean in the foreign markets; is there real competition?

Mr. Palmer. Well, I mean in the foreign markets; is there real competition?

Mr. Davis. This contract covers the foreign market.

Mr. Palmer. As well as the Canadian market?

Mr. Davis. Yes, sir.

Mr. Palmer. And the only other territory, then, so far as you are concerned, is the United States?

Mr. Davis. Yes, sir; as far as we are concerned.

Mr. Palmer. Did you make an effort at the time to have the United States included within that agreement?

Mr. Davis. No. sir.

Mr. Palmer. Why not?

Mr. Davis. It was against the Sherman law.

Mr. RAINEY then questioned him concerning French bauxite. I will not take the time to read it, but will ask to have that included in the Record as a part of my remarks.

The PRESIDING OFFICER. Without objection, permission

is granted.

The matter referred to is as follows:

Mr. RAINEY. You do not anticipate that French bauxite can penetrate very far into this country, do you?

Mr. Davis. French bauxite at the present time goes in large quantities to Pittsburgh. That is the farthest that I know it goes.

Mr. RAINEY. And that is as far as you expect it to go on account of freight rates?

Mr. Davis. Yes, sir.

Mr. RAINEY. These foreign countries do not control the bauxite deposits in France and in the other countries where bauxite is found, do they? de they?

Mr. Davis, No, sir.

Mr. Rainey, I understand the situation to be that you own the

Mr. RAINEY. I understand the situation to be that you own the Canadian company.

Mr. Davis. Yes, sir.

Mr. RAINEY. And the Canadian company controls the foreign companies?

Mr. Davis. No, sir; the Canadian company controls no companies.

Mr. RAINEY. Well, it has an agreement with all of the other foreign

Mr. RAINEY. Well, it has an agreement with all of the other foreign companies?

Mr. DAVIS. Yes, sir.

Mr. RAINEY. And your company in Canada has a perfect agreement with all the foreign companies?

Mr. DAVIS. Yes, sir.

Mr. RAINEY. Of course you do not expect your Canadian company to furnish much competition, do you?

Mr. DAVIS. In this country?

Mr. RAINEY. Yes.

Mr. DAVIS. No, sir; naturally not.

Mr. KENYON. Also, from page 1507 I quote the following: Mr. Hill. Does your Canadian company, which you own, agree with the European companies as to the price at which the metal shall be

the European companies as to the price at which the metal shall be sold in Europe only?

Mr. Davis. In Europe only. In Europe and Canada.

Mr. Hill. Then it does not affect any other country in the world?

Mr. Davis. No, sir.

Mr. Hill. The European companies can sell in any other country except Canada, and at any price they please?

Mr. Davis. No, sir; you misunderstood me. The agreement covers all of the world except the United States.

Mr. Rainey. And the only reason why it does not cover the United States is because we have a law here which prevents it?

Mr. Davis. I must admit perhaps that is a fair way of putting it.

So we find this "good" trust controlling the market, controlling the prices, not only in this country but practically throughout the world. And again as a sample of their "goodness" are the contracts entered into by them, one, to which I now refer, being so infamous as to constitute business treason. The Aluminum Co. of America, controlling the Northern Aluminum Co. of Canada, which is owned by them, entered into a contract in September, 1908, with the Swiss Co. of Europe, which is the largest of European companies engaged in the aluminum industry and which is designated in their agreement as A. J. A. G. Parts of this contract are as follows: 2. The N. A. Co .-

That is, the Canadian company-

agree not to knowingly sell aluminum directly or indirectly in the European market.

The A. J. A. G. agree not to knowingly sell aluminum directly or indirectly in the American market—defined as North and South America with the exception of the United States, but including West Indies, Hawailan and Philippine Islands.

4. The total deliveries to be made by the two companies shall be divided as follows:

European market, 75 per cent to A. J. A. G., 25 per cent to N. A. Co. American market, 25 per cent to A. J. A. G., 75 per cent to N. A. Co. Common market, 50 per cent to A. J. A. G., 50 per cent to N. A. Co. The Government sales to Switzerland, Germany, and Austria-Hungary are understood to be reserved to the A. J. A. G.

The sales in the United States of America are understood to be reserved to the Aluminum Co. of America.

Accordingly the A. J. A. G. will not knowingly sell aluminum directly or indirectly to the United States of America and the Northern Aluminum Co. will not knowingly sell directly or indirectly to the Swiss, German, and Austro-Hungarian Governments.

5. The Northern Aluminum Co. engages that the Aluminum Co. of America will respect the prohibitions hereby laid upon the Northern Aluminum Co.

Aluminum Co.

In this agreement it will be noted that the foreign company, under an agreement with the subsidiary of the American company, absolutely refuses to sell aluminum directly or indirectly to the United States Government. And this agreement by a company asking for a protective tariff. The Navy and War Departments use large quantities of aluminum. I was so astounded by the language of this contract that I took up with the War and Navy Departments the question of the use of aluminum since June 30, 1912, and I beg that I may have the privilege of putting in, as part of my remarks, the letters received from these departments showing such and the companies from whom the same was purchased.

The letters referred to are as follows:

ALUMINUM, PURCHASE OF, FOR NAVAL SERVICE.

NAVY DEPARTMENT, BUREAU OF SUPPLIES AND ACCOU SUPPLIES AND ACCOUNTS, Washington, D. C., May 28, 1913.

Hon. WILLIAM S. KENYON,

United States Senate, Washington, D. C.

SIR: 1. In reply to telephone request from your office, the bureau's records show the following purchases of aluminum, after newspaper advertisement, since January 1, 1910:

Sched- ule.	Date.	Quan- tity.	Unit price.	Contractor.
2036	Jan. 4,1910 Jan. 25,1910 Aug. 2,1910 Aug. 9,1910 Nov. 8,1910 May 31,1911 Dec. 5,1911 Jan. 16,1912 May 7,1912 May 14,11912 July 2,1912	Pounds. 800 1,500 2,000 3,000 3,000 5,000 16,000 20,000 6,000 1,600 25,000	\$0, 215 .2175 .2299 .219 .2175 .2015 .1820 .185 .194 .1890 .2160	Great Western Smelting & Refining Co. Nassau Smelting & Refining Works. Berry & Aikens. Nassau Smelting & Refining Works. General Metals Selling Co. Pope Metals Co. Aluminum Co. of America. Pope Metals Co. Aluminum Co. of America. Do. Do.

2. The above list includes the larger items of this material which have been purchased during the period named, but there may have been certain small purchases made through the various Navy pay offices, in addition to the above quantities, which can not be readily referred to.

3. The bureau understands that the principal use of this material is as an alloy in combination with other metals when it is desired to produce a metal combining strength with lightness of weight, etc., and for similar purposes.

Respectfully,

Paumaster General United States Navy

Paymaster General, United States Navy. WAR DEPARTMENT.

OFFICE OF THE CHIEF OF ORDNANCE, Washington, May 28, 1913.

Hon, William S. Kenyon,
United States Scnate, Washington, D. C.

Dear Senator: In reply to telephonic inquiry from your secretary, I desire to state that the following tabulation shows the principal purchases of aluminum made by the Ordnance Department of the Army since June 30, 1912:

Date.		Quantity purchased.	Price per pound.	From whom purchased.	Used for.	
July	1, 1912	3,000 pounds (ingots)	Cents. 22	Aluminum Co. of Amer- ica.	Castings at Rock Island Arsenal.	
July	1,1912	18,000 sheets, 0.04 by 7 by 33½ inches, 0.88 pound per sheet, grade 3 S 2. 26,000 sheets, 0.04 by 31 by 9½ inches, 1.08 pounds per sheet, grade 3 S 2.	31	United States Aluminum Codo	Meat cans, cups, etc., manufac- tured at Rock Island Arsenal. Do.	
July	16, 1912	300 pounds rivets 250 pounds rivets 446 sheets, 0.075 by 30 by 48 inches, 10.1 pounds per sheet.	35 43 31		Do. Do. Miscellaneous man- ufactures at the Frankford Arse- nal.	
Apr.	8, 1913	7,000 sheets, 0.05 by 9 by 40 inches, 1.7 pounds per sheet, grade 2 S 0.	41	do	Canteens manufac- tured at the Rock Island Arsenal.	

Since January 1, 1912, 93,915 aluminum canteens and cups have been purchased by this department from the Aluminum Goods Manufacturing Co., Manitowoc, Wis., at a price of \$1.02 per canteen and cup on a lot of 23,085 canteens and cups, and at a price of \$1.07 per canteen and cup for the remainder of the quantity purchased.

The canteen above referred to is of a new design, and there is little likelihood that so large a number will again be purchased during so short a time. A plant for the manufacture of these canteens has been installed at the Rock Island Arsenal, and it is intended to manufacture sufficient aluminum canteens and cups at that establishment to meet the needs of this department. the needs of this department, Very truly, yours,

R. BIRNIE,
Colonel, Ordnance Department, United States Army,
Acting Chief of Ordnance.

Mr. CLAPP. Mr. President—
The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Minnesota?

Mr. KENYON. I do.
Mr. CLAPP. I simply wish to make an inquiry, which is whether the contract to which the Senator has just referred is found in the hearings before the committee?

Mr. KENYON. It is in the hearings before the committee and is set forth in the Government's suit. I mean it is in the House hearings.

Mr. CLAPP. I mean the House hearings, of course.

Mr. KENYON. I think it is in the Senate hearings, too.
Mr. SHIVELY. I do not think the bill of the Government and the decree were repeated in the Senate hearings.

Mr. KENYON. They were in the House hearings.
Mr. SHIVELY. They were incorporated in the House hear-The record is complete so far as concerns the action of the Government against the Aluminum Co. of America.

Mr. CLAPP. I was inquiring about the contract, extracts from which the Senator has just read, with reference to selling in this country and other countries. I wish to know whether that is in the House hearings.

Mr. KENYON. It will be found in the House hearings, in

volume 2. I have it here.

It is interesting to note that the War Department purchased aluminum castings, meat cans, cups, canteens, and other miscellaneous aluminum articles which they could not purchase from the foreign company if they desired because of this contract. The Navy Department likewise purchase large quantities of aluminum, which is used for various purposes in the Navy. But there are two great departments of the Government precluded from purchasing abroad what may be necessary in times of war for the safety of the Government by virtue of the monopolistic restraints of trade and contracts entered into by this powerful monopoly. Does not that come pretty well within the Baltimore platform? Such a monopoly ought to be destroyed; it comes close to being treasonable; and why should any protection be longer accorded this product? Why not open the doors and let this gigantic monopoly take its chances with the world's importation?

Mr. McLEAN. Mr. President-

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Connecticut?

Mr. KENYON. I do.

Mr. McLEAN. I should like to know just what effect the re duction of the tariff would have upon a monopoly which, as stated by the Senator, controls the product throughout the

Mr. KENYON. It is world-wide. I had anticipated that question.

Mr. McLEAN. If this agreement stands, what effect will the reduction of the tariff have?

Mr. KENYON. Then there can certainly be no objection to reducing the duties, because the converse of the Senator's proposition is true, and they are here asking for this protective

Mr. McLEAN. Very true. Mr. KENYON. It may not affect it one particle if they have a world-wide monopoly; but it is a matter of principle.

Mr. LA FOLLETTE. And they must receive some benefit

from it or they would not ask it.

Mr. KENYON. They would not be here, appearing before the committee and filing their briefs, if it were not of some benefit, I assume.

Mr. McLEAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Iowa further yield to the Senator from Connecticut?

Mr. KENYON. I do. Mr. McLEAN. I hope the Senator from Iowa will pardon me if I quote to him the opinion of his illustrious predecessor, Mr. Dolliver, in this body.

Mr. KENYON. Anything Mr. Dolliver said is good, and I hope the Senator will always follow it.

Mr. McLEAN. The subject was brought up in 1909. In May of that year Senator Dolliver said-

Mr. KENYON. What is this-a campaign textbook?

This is taken from the Congressional Record. Mr. McLEAN.

Mr. KENYON. But is it a campaign textbook? Mr. McLEAN. No; it is entitled "Story of a tariff."

Mr. KENYON. Whom is it by? Mr. McLEAN. This is Senator Dolliver that I am quoting.

Mr. LA FOLLETTE. Who compiled it?

Mr. KENYON. "Story of a tariff," by Senator Dolliver? Mr. McLEAN. No; I am quoting from Senator Dolliver's address, delivered in this Chamber in May, 1909, upon this sub-

I spoke years ago in the Senate Chamber on the subject of the protective-tariff system and the speculative trusts. Very few listened to what I said, and I never have met anybody since who appeared to have had any familiarity with the literature which that speech created. And yet it is some satisfaction for me to know it laid down some broad principles and some sound principles, and among them this, that no trust can master this market place in the present state of American enterprise and the present abundance of American capital without first monopolizing the raw material with which business must be transacted. I have felt ever since that a wise thing for the Senate to do is not to put trust-made goods on the free list, a remedy which would fall equally upon the just and unjust, and instead of killing the trusts would be more likely to kill the struggling competitors and turn the entire domestic business over to the trust, or, if not, would at least sacrifice American labor, which must be entitled to our consideration, whatever may be the offenses of American capital against our policy and our laws.

The point to which I want to call the attention of the Senator is this: If there is an absolute monopoly, I understand the Senator agrees with me that a reduction of the tariff will not affect it. If there is less than a monopoly, you destroy competition in

this country.

Mr. KENYON. Regardless of that, does the Senator believe that where a concern has been decreed to be a monopoly, where such contracts have been entered into by a concern as the one I have called attention to, they are in any position to ask for

protective-tariff rates?

Mr. McLEAN. That is a question— Mr. KENYON. It is a moral question.

Mr. McLEAN. It is a question for the courts to decide, upon prosecution under the Sherman Act.

The courts have passed upon it. The only Mr. KENYON. objection I find to it is that it was not a criminal prosecution.

Mr. REED. Mr. President

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Missouri?

Mr. KENYON. Certainly.

Mr. REED. Did I not understand the Senator to say, early in his remarks on this branch of the subject, that aluminum was being sold in this country at the European price plus the tariff, or substantially that?

Mr. KENYON. I put in a table showing substantially that. Mr. REED. Then it is manifest that for some reason-and this is the answer to the question which has just been askedthis company, although a world-wide monopoly, is able to take advantage of the tariff in this country, and that if the tariff were taken off the American people would at least get the benefit of European prices.

Mr. McLEAN. That depends upon the agreements and the

Mr. KENYON. Unless, of course, the world-wide trust they might be engaged in elevated prices all over the world.

Mr. REED. Of course, they might elevate the prices in Europe, which would diminish their output and profits. that sort of condition, we need not speculate as to how it obtains, as long as it does exist.

Mr. KENYON. If it were not of some benefit, it is quite

certain that Congress after Congress—
Mr. CRAWFORD. Mr. President—
The PRESIDING OFFICER. Does the Senator from Iowa

yield to the Senator from South Dakota?

Mr. KENYON. Just a moment. I would like a chance to finish once. As I say, if it were not of some benefit, it is quite certain that Congress after Congress would not find these gentlemen present stating that they could not conduct their business without a protective-tariff duty.

Mr. CRAWFORD. I desire to know the present status of the suit brought by the Government. I have not followed the

litigation.

Mr. KENYON. The suit has gone to decree. been entered by the court enjoining this company from further enforcement or carrying out of these contracts.

Mr. BORAH. Mr. President—
The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Idaho?

Mr. KENYON. I do.

Mr. BORAH. I presume, then, if the suit has gone to decree, in view of the experience of the past, instead of having one trust we will have several, and their stocks will increase rapidly in value.

Mr. KENYON. Not yet.

Mr. BORAH. Has the decree been effective?

The decree goes to the annulment of these Mr. KENYON. contracts and enjoins them not to carry out these contracts.

Mr. BORAH. Has it worked out any result?
Mr. KENYON. I do not know whether it has or not.
Mr. OLIVER. Mr. President—

Mr. POMERENE. Mr. President-

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Pennsylvania or to the Senator from

Mr. KENYON. I yield to the Senator from Ohio.

Mr. POMERENE. I was going to ask when this decree was entered?

Mr. KENYON. I can only guess at that. I should say five or six months ago.

Mr. POMERENE. Has any criminal prosecution been begun against any of the parties to the agreement?
Mr. KENYON. There has not.

Mr. POMERENE. Does the Senator know of any reason why such prosecutions should not be begun?

Mr. KENYON. I do not. It is a very fertile field for criminal prosecution.

Mr. POMERENE. I entirely agree with the Senator.

Mr. OLIVER. Mr. President-

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Pennsylvania?

Mr. KENYON. I do. Mr. OLIVER. I think the Senator ought to add that the agreement to which he has just alluded was voluntarily abrogated years ago and was not in force when the suit was brought.

Mr. KENYON. I did not know that that was true. If that

is true, I ought to add it.

Mr. OLIVER. I can inform the Senator to that effect.

Mr. SHIVELY. Mr. President—

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Indiana?

Mr. KENYON. I do. Mr. SHIVELY. I think it will be found that some of the agreements that had been entered into had actually expired by limitation of their own terms before this suit was brought.

Mr. KENYON. I think that is true as to one or two of

Mr. SHIVELY. But, as a matter of fact, after the complaint was filed the defendant stopped with filing an answer, pre-ferring not to go into the litigation of the case on the facts and permitting a decree to be taken against itself.

Mr. KENYON. The defendant consented to the decree.
Mr. SHIVELY. Yes; rather than have an investigation and
exposure in the court of the real facts in the case.

Mr. KENYON. Which decree, the Senator remembers, recited that they were a substantial monopoly.

Mr. SHIVELY. Oh, certainly.

Mr. BORAH. Mr. President—

The PRESIDING OFFICER. Does the Senator from Iowa again yield to the Senator from Idaho?

Mr. KENYON. I do. Mr. BORAH. I should like to ask the Senator from Indiana, while he is on his feet, in view of his statement, upon what mr. SHIVELY. Does the Senator mean in the present act?

Mr. SHIVELY. D. Mr. BORAH. Yes.

Mr. SHIVELY. I will give it up, if the Senator please.
Mr. KENYON. The Senator from Idaho means in the proposed act, does he not?

Mr. SHIVELY. The Senator is inquiring about the act of 1909.

Mr. KENYON. No; I think he is talking about the present bill.

Mr. SHIVELY. Under the act of 1909 a duty of 7 cents per pound was fixed upon crude aluminum. A duty of 11 cents per pound was fixed upon the products of crude aluminum-sheets, plates, bars, and rods. Why any such duty should have been placed in the act of 1909 I am unable to state to the Senator from Idaho.

Mr. BORAH. Upon what theory is the duty placed upon it

in this bill?

Mr. KENYON. Why is it placed there now?
Mr. SHIVELY. Let me state that the Dingley Act placed a duty of 8 cents a pound upon crude aluminum. It placed a duty

of 13 cents a pound upon the plates, sheets, and rods. The act of 1909 placed a duty of 7 cents a pound on crude aluminum, a reduction of 1 cent a pound. The same act placed a duty of 11 cents a pound upon sheets, rods, and strips, or a reduction of 2 cents a pound. The House passed this bill reducing the duty to 25 per cent ad valorem, that applying both to the crude aluminum and to the fabrications of aluminum. That was a reduction of what, at the time these tables were made up, was a duty of about 58 per cent ad valorem to a duty of 25 per cent. It came to the Senate, and we have reduced the duty on crude aluminum from the present law, where it is 7 cents a pound, to 2 cents a pound, and from 11 cents to 3½ cents a pound on the plates, sheets, rods, and strips, leaving a low revenue duty upon the article.

Mr. BORAH. Mr. President-

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Idaho?

Mr. KENYON. I will let the Senator complete what he is about to say, and then I should like to be permitted to finish.

Mr. BORAH. I will not interrupt the Senator if he desires that I shall not do so.

Mr. KENYON. Go ahead; I am willing to yield to the Senator.

Mr. BORAH. Then, as I understand, this duty is placed

here as a revenue duty?

Mr. SHIVELY. Why, certainly.

Mr. BORAH. But it seems, from the argument of the Senator from Iowa, conceded by the distinguished Senator from Missouri, that notwithstanding that fact they sell in this country at a price with the duty added over that which is the price in Europe. So it must be that it is a duty which, while it is a

revenue producer, at the same time gives protection.

Mr. SHIVELY. If the Senator please, of course where there is competition there is not any question that as an incident of the revenue the domestic industry will get that much incidental advantage. That will attend any duty that is a revenue duty in its character where there is competition.

Mr. BORAH. I will not further detain the Senator from

Town.

Mr. KENYON. I should like to finish. Mr. REED. Mr. President, will the Senator from Iowa yield to me for a second?

Mr. KENYON. Yes.

Mr. REED. As showing how hard it is to agree upon matters of this kind, I call attention to the fact that the amendment offered by the Senator from Iowa [Mr. Cummins] gives these rates:

Aluminum, aluminum scrap, and alloys of any kind in which aluminum is the component material of chief value, in crude form, 6 cents per pound; * * barium, calcium, magnesium, sodium, and potassium, and alloys of which said metals are the component material of chief value, 2 cents per pound and 20 per cent ad valorem.

Which is about three times as much as is proposed here.

Mr. BORAH. Mr. President-

The VICE PRESIDENT. Does the Senator from Iowa further yield to the Senator from Idaho?

Mr. KENYON. I decline to yield any further. I want to finish what I have to say.

Mr. BORAH. I was going to say something which I think the Senator from Iowa would like to hear.

Mr. SMOOT. Mr. President—
The VICE PRESIDENT. The Senator from Iowa has de-

clined to yield further.

Mr. KENYON. I yield to the Senator from Utah for a moment.

Mr. SMOOT. The Senator from Missouri stated that the rate of 2 cents a pound and 20 per cent ad valorem on barium and calcium and magnesium and sodium and alloys of metals was about three times what the present bill provides. The present rate on those articles is 3 cents per pound and 25 per cent ad valorem, and that is only equivalent to 27.79 per cent, whereas the pending bill provides 25 per cent ad valorem. So there is scarcely a 10 per cent reduction in the present rate upon those

Mr. REED. Mr. President, the Senator misquotes me. I did not confine my remarks to those articles. I spoke of the entire proposition.

Mr. SMOOT. All I know is that the Senator mentioned

barium and calcium.

Mr. REED. I read that at the last of the paragraph and made my comments on the paragraph, the first item of which is 6 cents per pound instead of the rate in this bill.

Mr. KENYON. Now, Mr. President—
Mr. KENYON. Mr. President—
Mr. KENYON. I decline to yield.
Mr. SHIVELY. Just one word.

Mr. KENYON. I fear that we will be charged with trying to filibuster against the passage of this bill.

Mr. SHIVELY. No; we will absolve you from any such

charge as that.

Mr. KENYON. I yield to the Senator for a moment. Mr. SHIVELY. The senior Senator from Iowa [Mr. Cum-MINS], who has given special study to Schedule C, does propose, as suggested by the Senator from Missouri, a duty of 6 cents a pound on crude aluminum while we propose a duty of 2 cents a pound. He proposes a duty of 9 cents a pound on the plates, sheets, bars, and rods, while we propose a duty of 312 cents a pound. I only wondered if it were not possible for the Junior Senator and the senior Senator from Iowa to hold some sort of conference—not a caucus; I know the Senators object to a caucus—that might result in some unity on this question.

Mr. CUMMINS. Mr. President, I think my colleague will

yield to me now for just a moment. Mr. KENYON. Certainly.

Mr. CUMMINS. Of course, the Senator from Missouri could not resist the temptation to cast some sort of imputation upon me. I have my own views about these matters, for which my colleague is in no wise responsible and for which he must not be held responsible. When I come to present the amendment which I have proposed I will give those views to the Senate. I trust the argument of my colleague may be allowed to proceed without attempting to days were arrested to the contract of the contrac to proceed without attempting to draw my amendment into the matter, for we have had no caucus respecting the subject. We do not caucus. Each man upon this side holds his independent, free opinion.

Mr. BORAH and Mr. REED addressed the Chair.

The VICE PRESIDENT. Does the Senator from Iowa yield,

and to whom?

Mr. KENYON. No. This illustrates the independence of this side of the Chamber. The other side might well follow it. Nobody is doing any thinking for anybody else on this side

of the Chamber.

Mr. REED. Mr. President—

The VICE PRESIDENT. Does the Senator from Iowa yield

to the Senator from Missouri?

Mr. REED. The Senator's colleague made a remark indicating that I could not resist the temptation to reflect upon him. I think that statement is of such a nature that the

Senator ought to permit me to say what I am going to say.

I made no reflection upon the Senator. I intended no reflection upon the Senator. I have never reflected upon the Senator, in public or in private, and I do not know why he makes that statement. I called attention to this matter merely to illustrate the fact that it was difficult on this side to prepare a bill that would make a reduction satisfactory to the other

Mr. CUMMINS. Mr. President, I understood that my colleague was making an argument for the importation of this commodity without duty, and that the Senator from Missouri called attention to the fact that in that respect he did not agree with the senior Senator from Iowa; that is all.
Mr. BORAH. Mr. President—

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Idaho?

Mr. KENYON. I do.

Mr. BORAH. It is evident that all these schedules were made up without the remarkable information which has been given to us this afternoon. If that be true, why would it not be well for the Democratic caucus to meet with the two Senators from Iowa and put this article upon the free list?

Mr. KENYON. And include the Senator from Idaho, and

take up the lead schedule, too.

Mr. BORAH. I have already given my consent. I do not need to be there.

Mr. SHIVELY. Mr. President-

Mr. KENYON. Mr. President, I decline to yield further.

Mr. SHIVELY. Just one concluding observation.

Mr. KENYON. No; not for one word. I am going to get through

Mr. SHIVELY. Has the Senator really arrived at the point of his speech where he declines all further interruptions?

Mr. KENYON. I have certainly been pretty lenient in regard to interruptions. I should like to get through. The Senator will have plenty of time then. I do not want to be discourteous. Mr. SHIVELY. An observation had just been made that I

thought ought to be answered. Of course, the Senator has the right to conclude his speech without interruption if he insists. Mr. KENYON. The Senator from Indiana will have plenty of time to answer it before this bill is passed.

I am sorry these little colloquies drift in. The senior Senator from Iowa always has good reasons for his amendments, and

will take care of himself in his own proper time. I have simply been trying to argue this out as a moral question and as a patriotic question-rather outside of economic questions. I have been trying to advance the theory that protection ought not to be further granted to such an institution as this; that it comes with poor grace from people who have not only violated the law of their country, but have been willing to rob their Government and to prevent its great departments of national defense from securing at fair prices what they need, to ask for protection from their country in the way of tariff duties. The benefits of a protective tariff ought not to be granted to those who rob their

Government and violate its laws to add to their greedy profits.

Other contracts entered into by this "good" trust are those with the General Chemical Co., a portion of which I ask to be

inserted as part of my remarks:

inserted as part of my remarks:

Fourth. Said chemical company further expressly covenants and agrees that it will not use or knowingly sell any of the bauxite sold to it by the said bauxite company hereunder, or any other bauxite, or the products thereof for the purpose of conversion into the metal aluminum, and that upon proof that any of said bauxite or products thereof have been put to any such use it will not make any further sales or deliveries to the purchaser thereof.

Eighth. It is understood and agreed that the bauxite sold hereunder by the said bauxite company to the said chemical company shall be used by the said chemical company to the said chemical company shall be used by the said chemical company to the said chemical company to aluminally or whose stock is largely held by it, and by no other person or party, and only for the manufacture of alum, alum salts, alumina sulphate, or alumina hydrate for alum and its compounds, and for no other purpose whatsoever.

prose whatsoever.

Fifth. The said reduction company agrees to use its good offices in the interest of said chemical company so far as relates to promoting the trade of the latter in alum and alum products in the United States and in foreign countries; and said chemical company reciprocally undertakes and agrees to use its good offices in the interest of said reduction company so far as relates to promoting the metal business of the latter in the United States and foreign countries.

Also the contract with the Norton Co., a portion of which I ask to insert:

ask to insert:

Tenth. Norton Co, may mine and use bauxite from the said 40-acre tract of bauxite land referred to in paragraph D above, which shall be used for the purpose of manufacture of alundum, and may mine and sell from the said property bauxite or other mineral taken therefrom for any purpose except for the manufacture of aluminum; and Norton Co, shall not sell or otherwise dispose of said 40-acre tract except subject to the above restrictions.

Eighteenth. Norton Co, shall not at any time during the continuance of this agreement use or sell any of the bauxite contained on the said 40-acre tract described in paragraph D above, or any other bauxite, or the products thereof, hereinafter acquired by Norton Co., in the United States of America or the Dominion of Canada, for the purpose of conversion into aluminum.

Also the contract with the Pennsylvania Salt Manufacturing Co., a part of which I ask to insert:

The Pennsylvania Salt Manufacturing Co. agrees not to enter into the manufacture of aluminum as long as this agreement is in force.
This agreement was ratified, explained, and enlarged by the Pennsylvania Salt Manufacturing Co. in a letter dated January 1, 1907, as

This agreement was rathed, explained, and charged by the real-sylvania Salt Manufacturing Co. in a letter dated January 1, 1907, as follows:

"Referring to the clause in the contract of this same date between our companies for the sale and purchase of alumina, wherein we agree not to engage in the manufacture of aluminum during the term of the contract or the extension thereof in case you avail yourselves of the option contained in the contract for its extension, we wish to assure you that this clause will be carried out to the full extent of the spirit and intent as expressed in our verbal conversations; that is, we will not manufacture aluminum ourselves nor allow any company in which we own a controlling interest to do so, nor will we invest any of our capital in any way, through the stock of any corporation or otherwise, in the manufacture of aluminum. Furthermore, we will not sell, directly or indirectly, any hydrate or anhydrate of alumina while the contract or any extension of it may be in effect to any person or persons for use in the manufacture of aluminum; and in case it should be discovered that any persons to whom we have sold alumina have resold it so that it is being used in the manufacture of aluminum, we will take such steps as to future sales to such persons as will prevent any alumina which has been manufactured by us being used in the manufacture of aluminum."

Also with the Kruttschnitt-Coleman, or rather individuals.

Also with the Kruttschnitt-Coleman, or rather individuals, which I ask also to insert:

As part consideration for the execution of this agreement by Aluminum Co., Kruttschnitt & Coleman hereby severally agree that for the period of 20 years from the date hereof in that part of the United States of America east of a north and south line through Denver, Colo., neither Kruttschnitt nor Coleman will directly or indirectly engage or become interested in the manufacture or fabrication or sale of aluminum or any article made substantially of aluminum, provided that either or both the said Kruttschnitt and Coleman may be employed by or become interested in Aluminum Co. or said Aluminum Goods Manufacturing Co. without committing a breach of this contract.

The Government also in its suit set up many acts of unfair competition. This guilty company practically plead guilty to the charge and permitted a consent decree to be entered.

The revenues derived from importation are not large. A table prepared by the statistical clerk to the Committee on Ways and Means gives an estimate for a 12-year period under the highest duties, which are duties of 25 per cent. The revenue derived would be \$625,000. The Senate has reduced these duties even more and made them specific, so that the duties would not now amount to more than approximately \$450,000.

I ask leave to include that table, so prepared, as a part of my

The VICE PRESIDENT. Is there any objection? The Chair hears none.

The matter referred to is as follows:

	Dingley		Payne tariff.	Estimates for a 12-	
Imports.	tariff, 1905.	1910	1911	1912	month period, H. R. 10.
Quantity pounds. Value Average units Duties Equivalent ad valorem, per cent.	638, 513 \$153, 134 \$0. 240 \$51, 081 33. 36	12,386,898 \$1,840,851 \$0.149 \$875,462 47.56	6, 240, 826 \$445, 820 \$450, 000	14,971,290 \$1,857,726 \$0,120 \$1,047,990 56,41	\$2,500,000 \$625,000 25.00

Mr. KENYON. Mr. President, I have taken up too much of the time of the Senate, but I have not been entirely to blame. I have cited and discussed aluminum merely as an example of the proposition I am trying to bring forward for attention, namely, that articles entering into competition with trust or monopoly controlled products should be put upon the free list. That does not mean war with healthy business enterprise; no one in this country desires to wage war on large business so long as it is honest business; but whether the Sherman Act embodies a proper economic policy, it is the law, and as long as it is the law it should be obeyed, and those who will not obey the law ought to have no benefit from tariff duties. This amendment has been offered in the best of faith. I believe in the principle thereof, and I am no less a believer in the protective tariff theory-a tariff that will equalize conditions between this country and competing countries abroad, and no Business ought to be satisfied with such a tariff and ought to be willing to enter into competition behind such tariff wall. If, however, business is not willing so to do, but prefers to go into combinations in violation of law, then it should take its chances with the competition of the world.

Mr. President, I have approached the debates upon this bill with an open mind, looking for light. The light, it is true, at times has been rather dim, but after the completion of the debate and after all the light has been shed upon it that is possible, I propose to be governed in my vote by the one test whether or not this bill is better for the hundred million people of this country than is the present tariff law. If in the last analysis I shall feel compelled to vote against the bill, it would not indicate that I was opposed to the income tax and a very large number of other features of the bill. The income tax is the fairest form of taxation; it places the burden of taxation upon those most able to bear it. In my judgment the rates on the higher incomes should be increased and increased to such proportion that the great fortunes of this country may bear a large part of the burden of an enlarged Navy for this Nation, which must come just as certain as the sunset. This Nation which must come just as certain as the sunset. must increase its Navy.

It is idle to talk about enforcing the Monroe doctrine without a powerful Navy. The American people demand an adequate Navy. We may as well give up the Monroe doctrine as to try and enforce it without a powerful Navy. An income tax, properly graduated so as to reach the great fortunes of the country, together with an inheritance tax, would assist in providing ample funds for the building and maintenance of a great Navy.

I hope this bill may be amended in some respects. I trust, among other amendments, a provision will be adopted for a tariff commission—a real commission, not a makeshift—also a provision for an inheritance tax.

I indulge the hope, Mr. President, that some day partisan-ship may be set aside and the tariff cease to become a political football; that through the instrumentality of a nonpartisan commission the tariff question may be taken out of politics and we may have a tariff bill formed on the theory of the difference in the cost of production at home and abroad, with some intelligent basis to act on from the investigation and findings of such a commission.

That may be an iridescent dream. Dreams sometimes come true. I trust this one will.

Mr. STONE. Mr. President, a number of paragraphs in Schedule C were passed over at the request of different Sena-I desire to make an effort to dispose of some of them this afternoon.

Paragraph 106 was passed over, but I do not wish now to

take it up; also paragraph 116.

Mr. OLIVER. I will ask the Senator what was the number of the paragraph to which he first alluded?

Mr. STONE. Paragraph 106. That was passed over for further consideration by the committee on suggestions made here. Paragraph 116 was also passed over in the same way.

not desire to take it up now.

Paragraph 126 was passed over at the instance of the senior Senator from Massachusetts [Mr. Lodge]. I understand from the Senator from Utah [Mr. Smoot] that the Senator from Massachusetts will be here on Monday.

Mr. SMOOT. I expect him here Monday, Mr. President; also the junior Senator from Massachusetts, who is interested in

the same schedule.

Mr. STONE. It is desired by the Senator from Utah that the paragraph shall remain as it is until the Senator from Massachusetts is present on Monday.

I will ask the Senator from North Carolina about paragraph

127. It was passed over at the instance of the senior Senator

from Arkansas [Mr. CLARKE].

Mr. SIMMONS. The senior Senator from Arkansas is not here at this moment. If there is to be any controversy about that paragraph, I think it had better go over.

Mr. SUTHERLAND. It is impossible for us to hear what is

being said.

Mr. SIMMONS. Paragraph 127 was passed over at the instance of the senior Senator from Arkansas [Mr. CLARKE]. He is not in the Chamber this afternoon. If there is to be any controversy about it, I should prefer that it go over until he is

Very well; let that be passed over.

Paragraph 130 relates to penknives and cutlery of different kinds. That seems to have been passed over at the instance of the Senator from Ohio [Mr. BURTON].

Mr. BURTON. I am ready to take it up now, if agreeable to

the Senator from Missouri.

Mr. STONE. Yes; I should like to dispose of it, if possible. It was passed over at the instance of the Senator from Ohio and the Senators from Connecticut.

Mr. BURTON. The Senators from Connecticut, I believe,

are here.

The object of the amendment which I proposed was to impose upon scissors and shears the same duty as upon penknives and The amendment was offered as long ago as May 26. I have here a copy of the section, with erasures and interlineations, which I will ask the Secretary to read, to show what is proposed.

The VICE PRESIDENT. The Secretary will read as requested.

The Secretary. In paragraph 130, page 38, line 13, after the word "razors" and the comma, the Senator from Ohio proposes to insert "scissors and shears, and blades for the same"; also, in line 18, after the word "razors" and the comma, it is proposed to insert "shears, scissors"; and in line 19, after the word "razors," at the end of the line, it is proposed to insert "shears, scissors"; and in lines 20, 21, and 22 to strike out the words "scissors and shears, and blades for the same, finished or unfinished, 30 per cent ad valorem," so that, if amended, the paragraph will read:

paragraph will read:

130. Penknives, pocketknives, clasp knives, pruning knives, budding knives, erasers, manicure knives, and all knives by whatever name known, including such as are denominatively mentioned in this section, which have folding or other than fixed blades or attachments, and razors, scissors and shears, and blades for the same; all the foregoing, whether assembled but not fully finished or finished; valued at not more than \$1 per dozen, 35 per cent ad valorem; valued at more than \$1 per dozen, 55 per cent ad valorem: Provided, That blades, handles, or other parts of any of the foregoing knives, razors, shears, scissors, or erasers shall be dutiable at not less than the rate herein imposed upon the knives, razors, shears, scissors, and erasers, of which they are parts: Provided further—

And so forth.

Mr. BURTON. Mr. President, the object of this amendment is to include scissors and shears in the same classification with penknives and other kindred articles, in lines 9 and 10, the first and second lines of paragraph 130, and with razors. For that there are two or three principal reasons. Indeed, when the facts are given, the case for a maximum duty is stronger for scissors and shears than for knives and razors.

In the first place, when you take all classes of scissors and shears into account, the proportion of labor involved in their manufacture is greater. It is especially greater than in the case of penknives. The cost of material for penknives, as compared with shears, is about as 4 to 1. The labor cost of scissors and

shears is very large.

In the second place, in certain varieties of scissors and shears there is a comparatively new industry which has started in the last two or three years. The work upon this variety, both at home and abroad, is almost exclusively handwork. Certain factories have been started here, making the finest quality, such

as is manufactured in the city of Solingen, in Germany. That city is one in which this industry has been established for a very long time, and on certain grades it has held a monopoly until perhaps within the last three years. Now factories have been started in the United States and are making fair progress.

A third reason, which is really a repetition of the first, is that the proportion of labor contained in them is even greater than

in the great majority of the other articles.

I really think this paragraph ought to go back to the Committee on Finance for further consideration. I think I can conjecture the reason why the distinction was made between the two and a lower duty imposed upon scissors and shears. The difference existed under the Payne-Aldrich bill. But on all classes-penknives, razors, scissors, and shears-the duty was not only ample but large, so that it was sufficient for scissors and shears. But there is now and was then no reason why the last-named articles-scissors and shears-should carry a lower duty than the others. I think they should be classified

Mr. STONE. They do carry a lower rate in the Payne-Aldrich

bill.

Mr. BURTON. They do; yes. I fancy that is the reason why the Finance Committee made a distinction in this case.

Mr. STONE. It was the action of the House Ways and Means

Committee, not of the Finance Committee.

Mr. BURTON. Yes. I shall be entirely satisfied if the committee will pass over this paragraph or amendment for further

consideration.

Mr. STONE. Mr. President, of course, if the Senator asks to have the paragraph passed over, under our practice here it will be passed over; but I was taking up the paragraphs which had been passed over heretofore with the hope of disposing of them, if possible,

Mr. BURTON. I recognize the wish of the Senator from Missouri to finish as much as possible of the bill at this time.

Mr. STONE. And I understood the Senator to say he was ready to proceed.

Mr. BURTON. I am ready. I have made my statement in regard to it.

Mr. STONE.

I should prefer to have it disposed of now, unless the Senator insists on passing over it.

Mr. BURTON. The matter can be considered by the committee, I take it, between now and the time when it comes up in the Senate.

Mr. STONE. Of course, the committee can consider it in any event; but I should like to dispose of it now, if the Senator pleases.

Mr. BURTON. If there are any reasons why the classification should not be the same, I should like to hear them.

Mr. STONE. I can not spend much time in discussing these amendments; but in the book I have here, being a report of merchandise entered for consumption in the United States in 1911, and so forth, I find that knives and penknives were under a different classification.

Mr. BURTON. Yes; that is true in the present law. Mr. STONE. It reads as follows:

Valued at not more than 40 cents per dozen, 40 per cent ad valorem; valued at more than 40 cents per dozen and not exceeding 50 cents per dozen, 1 cent per piece and 40 per cent ad valorem; valued at more than 50 cents per dozen and not exceeding \$1.25 per dozen, 5 cents per piece and 40 per cent ad valorem; valued at more than \$1.25 per dozen and not exceeding \$1 per dozen, 10 cents per piece and 40 per cent ad valorem; valued at more than \$1.25 per dozen and not exceeding \$1 per dozen, 10 cents per piece and 40 per cent ad valorem; valued at more than \$3 per dozen, 20 cents per piece and 40 per cent ad valorem.

Then, if you go down to scissors, it appears that the value of the blades is very much lower than in the case of knives. the case of those valued at not more than 50 cents per dozen, the duty was 15 cents per dozen plus 15 per cent ad valorem. The equivalent of 15 cents per dozen is 11 cents per piece. In the case of those valued at more than 50 cents and not more than \$1.75 per dozen the duty was 50 cents per dozen plus 15 per cent. That is equivalent to 4 cents per piece plus 15 per cent. In the case of those valued at more than \$1.75 per dozen the duty was 75 cents per dozen plus 25 per cent, equivalent to 6 cents per piece plus 25 per cent. The average on knives was 77.62, as against 52.55 on scissors. So the value was much lower.

It strikes me that the committees of former Congresses properly classified these articles, and I feel that the Ways and Means Committee of the present Congress has not gone far from

the mark of a proper classification.

Mr. BURTON. Mr. President, I am thoroughly familiar with the facts relating to the duty in the existing law; but, as I have already stated, the duties were all of them ample. When you come to reduce them, while a sufficient duty, in my judgment, is retained on razors, the duty is quite insufficient on shears and scissors, partly because of the very large element

of labor that enters into their manufacture and partly because some forms of scissors and shears are now made which were

not formerly made in this country.

I should like very much, Mr. President, to have the committee give this further consideration. I do not wish to make any undue demand upon their time. I understand the Senator from Connecticut [Mr. Brandegee] also desires to be heard on this question.

Mr. STONE. I will say to the Senator that the committee will give further consideration to it. The Senator offers an

amendment?

Mr. BURTON. I offer an amendment to make them all the same rate of duty.

Mr. STONE. I would be glad to have a vote on it, unless the

Senator from Connecticut desires to be heard.

Mr. BRANDEGEE. Mr. President, this is one of those instances in the bill where it means a great damage to a considerable number of people without much of any benefit, if any at all, to anyone. There are certain industries-not large industries at all-engaged in the manufacture of shears. I have received communications from three or four of them which are located in Connecticut. I will briefly give the Senate an idea of what they say their situation is. Here is one from the Acme Shear Co., of Bridgeport, Conn., stating:

Referring to our formal letter inclosed, we ask you to note that the manufacture of cast-iron shears is peculiarly a Connecticut industry. The high-priced shears (laid steel) are not made in Connecticut, but in various parts of the country, particularly New Jersey and Ohio.

We appeal to you as a Connecticut Congressman to consider carefully the facts given. Our company has been in business in Bridgeport since 1882, and you may be sure of our integrity and sincerity of purpose.

If you do agree with us that our request for a tax of at least 45 per cent on shears careful.

purpose.

If you do agree with us that our request for a tax of at least 45 per cent on shears costing 75 cents per dozen or less is a logical and urgent necessity borne out by facts, will not you do whatever you can to have our request granted? Unless such protection is given to our low-priced shears it will mean a greatly reduced production or materially reduced wages for our workmen.

Again they state:

There are two classes of shears and scissors manufactured in the United States.
First. "Laid-steel" shears, which retail at from 65 cents to \$2 per

First. "Laid-steel" shears, which retail at from 65 cents to \$2 per pair.

Second. "Cast-iron" shears, which retail at from 5 cents to 25 cents per pair.

The manufacturers of cast-iron shears in the United States are:
The Acme Shear Co., Bridgeport, Conn.
The Atlas Shear Co., Bridgeport, Conn.
The Bridgeport Hardware Manufacturing Corporations, Bridgeport, Conn.

Conn.

Conn.
Clayton Bros. (Inc.), Bristol, Conn.
The Ansonia Novelty Co., Ansonia, Conn.
We submit the following figures as substantially correct for the
manufacture of cast-iron shears and scissors in the United States, viz:

Number of employees	933
Pay roll for the year 1912 \$	570, 167. 00
Average weekly wages (59½ hours)	\$11.75
	160, 000. 00
	824, 380. 00
	\$74, 160, 00
Percentage of profit on sales Percentage of profit on investment	9. 0

Eighty-nine per cent of all cast-iron shears manufactured in the United States in 1912 were sold for consumption in the United States, and 11 per cent were exported.

Of the quantity used in the United States over 80 per cent were sold to 5-and-10-cent stores, the other 20 per cent being sold to hardware and department stores, retailing at from 10 cents to 25 cents neer pair.

sold to 5-and-10-cent stores, the other 20 per cent being sold to hardware and department stores, retailing at from 10 cents to 25 cents per pair.

Of the quantity exported not one pair was sold in Germany, and but few in England and continental Europe. Most of the cast-iron shears exported were shipped into Canada and Mexico, where quickness of delivery offset to some degree the lower prices of German competition. The prices for export and domestic trade were and still are equal. Practically all the competition to American cast shears and scissors is from German factories in the Solingen district. According to the British Board of Trade reports, the wages of cutlery workers in Solingen ranges from \$5.10 to \$8.64 per week, or an averaging \$11.75 per week. The wages of American cast-shear workmen averaging \$11.75 per week are over 70 per cent higher than the wages paid in Solingen. The cost of manufacturing American cast shears is proportioned 24 per cent material and 76 per cent labor, as every operation in their manufacture has to be performed by hand.

Bearing in mind the 70 per cent higher wages paid American workmen and the 76 percentage of labor cost, it is shown that the German factories have an advantage of 53 per cent over American factories.

Shears and scissors to the value of over \$570,000 were imported into the United States during 1912, this being a greater amount than in any previous year, and an amount nearly as large as the combined yearly sales of American cast-shear factories.

Believing that the broad aim of tariff revision is to lessen the cost of articles and materials to the American consumer, we wish to strongly emphasize the fact that over 71 per cent of all American cast-iron shears and scissors are retailed in the United States at 5 cents and 10 cents per pair. The proposed duty of 30 per cent on scissors (Schedule C) in place of the present average of 53.77 per cent (specific and ad valorem) will simply mean a greater profit to importers and retailers, as the prices of 5 cents and 10

Mr. President, I will not read more of these communications. They are along the same line. One of them writes me that he will have to go out of business if this rate is imposed. What advantage is it going to be to drive out of business these small manufacturers who are employing American skilled labor in a product that is made entirely by hand labor at good wages in this country? They are paying their taxes, owning their houses, and they are settled in their communities. What is the good of transferring that industry to Germany and Great Britain, throwing these men out of employment, on the chances that the importer, the jobber, and the retailer will be able some way or other to sell possibly a pair of scissors a quarter of a cent or half a cent cheaper when they now sell for 5 cents and 10 cents

a pair?
What I view as one of the strongest reasons for not going at every schedule with a reduction without knowing much about the facts and taking the chances is this: The accumulated effect of all these reductions is going to make a lot of discontented people in this country, who will have lost their employment, and the work they have done is turned over to foreigners. It is upon the guess of this committee that this is done. They are not able to guarantee that the goods imported

will be sold any cheaper.

These people, who I think know what they are about and know the condition of their own business, say that they can not produce these articles cheaper without lowering wages. I do not think it will be a good thing for anybody to experiment

along this line.

As I said, here are five or six factories, whose names I have read, in my own State. They say they sell 89 per cent of the product in this country. They export the rest. They do not sell cheaper abroad than they do at home. They are in no trust or combination. It seems to me, if there is anything which can come within the definition of the leaders of the party in power that they do not want to harm a legitimate industry it is the case of these little New England factories, manufacturing notions and tools and things of this kind, located some in the cities, but some in the smaller towns of New England.

Mr. THOMAS. Mr. President—

The VICE PRESIDENT. Does the Senator from Connecticut

yield to the Senator from Colorado? Mr. BRANDEGEE. Certainly.

Mr. THOMAS. Did I understand the Senator correctly in saying that the manufacturers of shears and scissors export a part of their product?

Mr. BRANDEGEE. Oh, yes. The Senator's attention was probably diverted. The letter that I read stated that of the total product of scissors made in this country 89 per cent were used in the country and the remaining 11 per cent were exported.

Mr. THOMAS. Can the Senator inform me what foreign

countries receive the exports?

Mr. BRANDEGEE. The letter stated that they went to Canada and to Mexico, and that they went there because they had to have them immediately and it was quicker dispatch, and they imported some from this country rather than to get them cheaper from Europe by waiting.

Mr. THOMAS. I beg the Senator's pardon; my attention

was diverted.

Mr. BRANDEGEE. If I wanted to encumber the RECORDwhich I am very reluctant to do, and I shall not do it in this case with these letters-it would appear that in many instances penknives, pocketknives, clasp knives, pruning knives, budding knives, manicure knives, and razors are all made in the same factory that make scissors. Scissors are just as much trouble to make as knives and the blades of razors. They are made of different material, but they are made by the same people in the same factory. Now, I say they are just as much entitled to protection if any of them are entitled to protection.

Whether the committee are bent upon reducing the duty upon razors and these other things or not, I can not see why they should discriminate between these different classes of knives, for that is all the scissor is. It is just two knife blades hitched

together.

Mr. McLEAN. Mr. President, I suggest to my colleague that the reason given by the senior Senator from Missouri [Mr. STONE], as I understood him, was because the unit of product in the shears is cheaper than the unit of product in the knives. That is as I understand the Senator. I may have been mistaken. Am I correct in so understanding him?

Mr. STONE. The unit of product of shears is less than that

of knives.

Mr. McLEAN. It is cheaper than the unit of product in the

Mr. STONE. I so stated.

Mr. McLEAN. It will be difficult, I think, to explain, when ad valorem duties are applied, why the price of the unit of the product should be considered. For instance, an article that costs 10 cents, it seems to me, is entitled to the same ad valorem duty as an article that costs 20 cents.

Mr. BRANDEGEE. Now, upon scissors they have proposed a rate of 30 per cent ad valorem, and upon pocketknives, and so forth, 35 per cent ad valorem. These constituents of mine think they ought to have 45 per cent upon scissors, but whether the committee could give them that or not, I certainly hope that they will allow scissors, made in the same factories in many cases, to come under the same classification as the other goods. I think no harm would be done to anybody by it. I was about to say that I trust the theory upon which the paragraph was formed will not be invaded or invalidated. I hope the committee will take this into consideration and that the amendment of the Senator from Ohio [Mr. Burron] may be allowed to prevail.

Mr. STONE. Let us have a vote on the amendment. Mr. SIMMONS. Before the vote is taken, I wish to call the attention of the Senator from Connecticut to a statement made before the Finance Committee of the Senate by Alfred Field &

Co., of New York, in which they say:

Co., of New York, in which they say:

From 1864 to 1890 the rate on scissors and shears was 35 per cent, from 1890 to 1894 the rate on scissors and shears was 45 per cent, and since then the Dingley and Payne mixed rates. So you will see that scissors and shears never paid a higher rate than 35 per cent until the McKinley bill, and under this rate of 35 per cent the American manufacturers completely captured the market on shears and large quantities are exported, some domestic manufacturers having their own agents and places of business abroad for the sale of their goods.

I just wanted to ask the Senator, if he has knowledge of that industry, whether it is a fact that this industry before 1890 and when the duty was only 35 per cent had, as a matter of fact, as stated here, captured the American market and was exporting scissors and shears in large quantities?

Mr. BRANDEGEE. I have not seen the statement of the gentlemen. Who were the gentlemen who made the statement?

Mr. SIMMONS. Alfred Field & Co. Mr. BRANDEGEE. What was their business?

Mr. SIMMONS. I do not know. It is not stated here.

Mr. BRANDEGEE. Do they state whether they were steel shears or iron shears?

Mr. SIMMONS. No; they do not. They just say scissors and shears, like the language of the bill.

Mr. BRANDEGEE. Of course the statement is by a party unknown to me, and, in reference to a class of goods that is not stated, I could not say anything about it from any knowledge of the business that I have. I have no knowledge of it other than what the Senator has had by the benefit of the letters which I have read. If the American manufacturers, owing to the protective duty of 35 per cent, did get the market, I myself think it was a good thing.

Mr. SIMMONS. If they could capture the market in the early days of the industry, when the rate was only 35 per cent, how does it happen that they can not hold it now at the same rate since the industry has been built up and established?

Mr. BRANDEGEE. The statement of the gentlemen, whose

names I do not remember, which the Senator read states that large amounts were exported. I have read what the exports were last year, and it appears that my figures were right. Eighty-nine per cent were marketed in this country, and the rest of it, which would be 11 per cent, was exported to Canada and Mexico. If those constitute large quantities exported abroad, then I take a different view of what a large percentage would be from what the Senator does.

Mr. BURTON. Mr. President, I should like to inquire where a report of the hearings is to be found? It is well for us to

know whether the statement is that of an importer.

Mr. SIMMONS. I will take great pleasure in giving the reference to the Senator. It is the "Hearings and statements filed with the Senate Committee on Finance on House bill 3321."

Mr. BURTON. I do not find it in the index of the copy I have.

Mr. SIMMONS. The Senator will find the statement on page 422

Mr. BURTON. According to the copy that I have, the matter on that page is something on an entirely different subject. I have a copy of the hearings before me.

Mr. SIMMONS. I will state to the Senator that this is volume 1, containing the hearings from Schedule A to Schedule H. I will send the book to the Senator, if he desires it.

Mr. BURTON. I do not seem to have it.
Mr. President, I am convinced that if this provision goes through in this form an injustice will be done to the manufacturers of these articles-scissors and shears. Those with whose business I am familiar manufacture the better grade, the more

expensive grade, and they are not exporters at all. They are sesking to maintain, however, a foothold in the domestic market. The proportion of labor in the manufacture of these articles is very large, reaching as high, perhaps, as 70 per cent of the total cost of the product. To say to these manufacturers, "You shall have less support by the tariff than is given to the manufacturer of all these different grades of penknives which can be made in the same factory," is to virtually tell them, We will place you at a disadvantage, and we are indifferent whether you are put out of business or not."

Mr. President, one word more about this. These gentlemen, I take it, are without doubt importers. They come from 93 Chambers Street and 75 Reed Street, New York City. That is a locality where there are no factories of which I know. On the other hand, it is a locality where persons are engaged in the import trade. I should question very much the statement made that from 1864 to 1890 the domestic manufacturers had the

trade.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Ohio [Mr. Burron]. [Putting the question.] By the sound, the noes appear to have it.

Mr. BRANDEGEE. Let us have the yeas and nays, Mr. President.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. JAMES (when Mr. Bradley's name was called). I announce the absence of the senior Senator from Kentucky [Mr. Bradley] on account of illness. I wish also to say that he is paired with the Senator from Indiana [Mr. KERN]. I shall let

this announcement stand for the day. Mr. CHILTON (when his name was called). I transfer my pair with the junior Senator from Maryland [Mr. Jackson] to the senior Senator from Tennessee [Mr. Lea] and vote. I

Mr. SHEPPARD (when Mr. Culberson's name was called).
My colleague the senior Senator from Texas [Mr. Culberson] is unavoidably absent. He is paired with the Senator from Delaware [Mr. DU PONT].

Mr. JAMES (when his name was called). I transfer the pair which I have with the junior Senator from Massachusetts [Mr. Weeks] to the junior Senator from Louisiana [Mr. Rans-DELL] and vote. I vote "nay."

Mr. KERN (when his name was called). I have a general pair with the senior Senator from Kentucky [Mr. Bradley]. I transfer that pair to the senior Senator from Nebraska [Mr. HITCHCOCK] and vote. I vote "nay."

Mr. OVERMAN (when his name was called). I have a general pair with the senior Senator from California [Mr. Perkins], and as he is not present I withhold my vote. I should vote "nay" if I were at liberty to vote.

Mr. SAULSBURY (when his name was called). pair with the junior Senator from Rhode Island [Mr. Colt].

therefore withhold my vote.

Mr. SMITH of Georgia (when his name was called). fer my pair with the senior Senator from Massachusetts [Mr. Lodge] to the senior Senator from Maryland [Mr. Smith] and vote. I vote "nay."

Mr. STONE (when his name was called). I have a general pair with the Senator from Wyoming [Mr. CLARK]. In his ab-

sence, I withhold my vote.

Mr. SUTHERLAND (when his name was called). count of the absence of the Senator from Arkansas [Mr. CLARKE], with whom I have a pair, I will withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. Root]. I transfer that pair to the Senator from Oklahoma [Mr. Gore] and vote. I vote "nay."

Mr. ASHURST (when Mr. VARDAMAN's name was called). have been requested to announce that the junior Senator from Mississippi [Mr. Vardaman] is absent on account of business of the Senate, and that he is paired with the junior Senator

from Idaho [Mr. Brady].

Mr. WILLIAMS (when his name was called). I have a pair with the senior Senator from Pennsylvania [Mr. Penrose] and

withhold my vote.

The roll call was concluded.

Mr. SUTHERLAND. I will transfer my pair with the Senator from Arkansas [Mr. CLARKE] to the Senator from Rhode Island [Mr. LIPPITT] and vote. I vote "yea."

Mr. BRYAN. I am paired with the junior Senator from Michigan [Mr. Townsend], and therefore withhold my vote.

Mr. GRONNA. I wish to announce that my colleague [Mr. McCumber] is necessarily absent on account of illness in his family. He is paired with the senior Senator from Nevada [Mr.]

NEWLANDS]. I wish this announcement to stand for the remainder of the day.

Mr. JONES. I desire to announce that the junior Senator from Michigan [Mr. Townsend] is detained from the Chamber on important business, and, as already announced, he is paired with the Senator from Florida [Mr. BRYAN].

Mr. GALLINGER. I have been requested to announce that the Senator from Maine [Mr. BURLEIGH] is paired with the Senator from Tennessee [Mr. Shields]; the Senator from New Mexico [Mr. CATRON] with the Senator from Maine [Mr. Johnson]; the Senator from West Virginia [Mr. Goff] with the Senator from Alabama [Mr. BANKHEAD]; the Senator from Wisconsin [Mr. Stephenson] with the Senator from Louisiana [Mr. THORNTON]; and the Senator from Wyoming [Mr. WAR-REN] with the Senator from Florida [Mr. FLETCHER].

Mr. LEWIS. I wish to announce that the junior Senator from Tennessee [Mr. Shields] has been called from the Chamber by a calamity which has occurred in his household whereby

he has been compelled to leave the city.

The result was announced-yeas 11, nays 38, as follows:

Control of the Contro	1.1.	A5-11.

So Mr. Burton's amendment was rejected.

paragraph, I desire to call the attention of the Senate to an amendment which I desire to offer, and I hope the Senator having the bill in charge will accept it. After the word "ad valorem," in paragraph 130, page 38, line 17, I move to insert surgical and dental instruments, or parts thereof, 40 per cent ad valorem."

Mr. President, I offer this amendment for the reason that to-day surgical and dental instruments, or parts thereof, fall into the basket clause and are dutiable at 45 per cent. They are a highly finished product, and under the 45 per cent duty 80 per cent of the consumption of those items in the United States is imported, so certainly 45 per cent is a competitive rate. I now offer this amendment to make the rate 40 per cent instead of 45 per cent, as the present law provides. Under the pending bill these articles will fall under the basket clause at cent. Mr. President, I believe that the Senator from Misscuri himself will acknowledge that that would be detrimental at least to the manufacturers of the 20 per cent of these goods that are made in the United States. I ask if the Senator will not accept the amendment?

Mr. SHIVELY. Mr. President, am I correct in understanding the Senator to say that, notwithstanding the 45 per cent duty, 80 per cent of these instruments are imported and only 20

per cent produced in this country?

Mr. SMOOT. That is the information furnished me by the

makers of surgical instruments.

Mr. SHIVELY. Does the Senator mean to say that as useful instruments as these should be laid under a duty of 45 per cent when 80 per cent of them are now imported?

Mr. SMOOT. Mr. President, they could all be made in this country if it were possible under the present law, but the Senator knows that surgical instruments and dental instruments are among the most technical and highly finished articles of manufacture.

Mr. SHIVELY. I agree to that.

Mr. SMOOT. Mr. President, as I have said, under the present rate of 45 per cent, I am informed by the makers of this class of goods that the importations amount to 80 per cent of the consumption of this country. It does seem to me that these articles

should be made in this country. In case of war what would be our position? We would be entirely at the mercy of a foreign country for this most essential class of goods. If this rate of 20 per cent is adopted, that is exactly the position in which we will be placed.

Mr. SHIVELY. Mr. President, that is all based on the theory that we would have no access to such goods in case of war. What the Senator has just said would indicate that this industry is purely statutory; that it is parliamentary in this I can hardly believe that; and, on reflection, I can hardly believe that the Senator will insist on laying the medical profession in this country and their patients under a 45 per cent contribution on this article.

Mr. SMOOT. Mr. President, of course I do not know personally that 80 per cent of these goods are imported, but I have the statement from at least half a dozen manufacturers in this country that to-day, under the 45 per cent rate, there is an importation of 80 per cent of the consumption in this country. I believe that statement, and so I have offered an amendment in paragraph 130 inserting after the words "ad valorem," on page 38, line 17, the words:

Surgical and dental instruments, or parts thereof, 40 per cent ad

Mr. STONE. I will say to the Senator that I should like to have a vote on the amendment, but I have made a little note in my book on the proposed amendment, and the committee will look into it.

Mr. JONES. I desire to ask the Senator from Utah how long has the 45 per cent rate been in force?

Mr. SMOOT. Since 1909.

Mr. JONES. What was the rate before that?

Mr. SMOOT. The same rate of 45 per cent prevailed under the Dingley law.

Mr. JONES. And they have only developed 20 per cent of

the industry under that duty?

Mr. SMOOT. That is all they are able to hold; in fact, they are not making as large a quantity under the 45 per cent duty as they did a few years ago, I suppose on account of the exceedingly sharp competition in this line of business

Mr. LA FOLLETTE. Can the Senator state how many factories there are in this country manufacturing these instru-

Mr. SMOOT. There are about 200 manufactories in the industry to-day, and, of course, there are many skilled mechanics employed. The letter which I have does not give the number of employees, but it does state that they are of the highest class of skilled mechanics, as necessarily they would have to be to make that class of instruments.

The VICE PRESIDENT. The question is on the amendment

proposed by the Senator from Utah.

Mr. WILLIAMS. Mr. President, I should like to ask the Senator from Utah what is the duty proposed by him?

Mr. SMOOT. Forty per cent.

Mr. WILLIAMS. On surgical instruments?

Mr. SMOOT. On surgical and dental instruments.
Mr. WILLIAMS. Mr. President, this is an illustration of Mr. WILLIAMS. Mr. President, this is an illustration of the consequences of the theory underlying Republican doctrines. Here are thousands of poor men and poor women lying in hospitals, awaiting surgical operations. Of course the Senator from Utah knows that in the long run the surgeons do not pay this duty. Their patients do pay it. If there is any time in a man's life when he needs human charity and help, and can not submit to taxation, it is when he is lying between life and death in a hospital somewhere, being operated upon. Yet the Senator wants to tax the disabled people in the hospitals in order to protect a domestic industry.

Mr. GALLINGER and Mr. SMOOT addressed the Chair.

Mr. WILLIAMS. I yield to the Senator from New Hamp-

shire.

Mr. GALLINGER. Does the Senator from Mississippi really believe that a surgeon would charge more for an operation if his instrument cost \$5 than if it cost \$4? Does he think he

would charge up the difference to the patient?

Mr. WILLIAMS. I not only believe, but I know, that a lawyer must make up the cost of his law library, that a railroad must make up the cost of its expenditures in operation, and that a surgeon must, somehow, make up the cost of all the charges that he must endure in order to exercise his profession. know as well as I know the name of the Senator from New Hampshire, and he knows as well as he knows his own name, that any man engaged in a business of any sort must pay the cost of his business before he calculates his profit, and that if you tax the entire surgical fraternity in the United States 10 per cent, 25 per cent, or 45 per cent duty—it makes no difference what—they must, somehow or other, take care of the

profit and loss account on their ledgers before they even begin

to calculate what they can charge their patients.

Mr. GALLINGER. If the Senator will permit me, I know that surgeons nowadays do not calculate their charges on the basis of adding 25 or 50 or 75 cents or a dollar so as to pay for their instruments. They have a schedule of rates that they charge for various operations.

Mr. WILLIAMS. Oh, yes; that is true, and so have the lawyers, so have the physicians, so have the plumbers. All of them, however, in making up their schedules of rates consider

what it will cost them to perform their service.

Mr. SMOOT. Mr. President, I want to say to the Senator from Mississippi that his pathetic appeal falls on rather deaf

Mr. WILLIAMS. It is not pathetic at all.

Mr. SMOOT. While I have never had the experience of a surgeon operating upon me, I have had the experience of paying bills for surgeons operating upon members of my family. first operation cost me \$500, and I do not believe the instrument the surgeon used cost him \$5. The next one was a plain case

of appendicitis, and I received a bill for \$150.

Mr. OVERMAN. The Senator got off mighty easily.

Mr. SMOOT. I think so myself. I do not think the instru-

ment the surgeon used cost him \$4.

I want to say to the Senator now that it is a mighty weak appeal for anybody to say here that because of a 40 per cent ad valorem duty on a \$3 instrument, amounting to \$1.20, the surgeon is going to charge the patient more for an operation.

Mr. GALLINGER. And, if the Senator from Utah will per-

mit me, the same instrument is used in 20, 30, 40, or 50 cases.

Mr. SMOOT. In fact, in many, many more than that, I sup-

Mr. STONE. This is very interesting, Mr. President, but I should like to have a vote on the amendment.

Mr. WILLIAMS. Wait a minute, now; do not be too impatient. The Senator has been pretty patient with Members on the other side of the Chamber. I am beginning to suspect

his Democracy. Mr. President, it is absolutely absurd to put forward the general idea that the cost of carrying on a business has nothing to do with the prices charged by that business. I do not believe that in private conference between the Senator from Utah and the Senator from New Hampshire, where nobody was present

except those two and God, they would undertake to say to one another that they thought the cost of carrying on a business had nothing to do with the prices charged in the business. Of course, I understand that surgeons frequently charge for

an operation in accordance with the ability of the patent to pay. I remember once reading in a newspaper where a millionaire in America paid a thousand dollars for a certain operation. Not long after that I went to the hospital in Louisville, Ky., and paid \$300 for the same operation. Not very long after that, when I began to get well, a friend of mine from Sunflower County, Miss., sent for me, and he was languishing in another bed in the same hospital, and he had paid only \$50 for the

But the fact that surgeons charge different rates in accordance with the ability of men to pay for operations does not disturb the fundamental principle that in fixing the classification, as I might call it, to use a tariff-bill phrase, they are guided by several things—the cost of the surgeon's education, the cost of his maintenance, the cost of his instruments, the rent of his office, the amount of business he has, the number of millionaires like the Senator from Utah he can strike with very large fees now and then, and so forth. By the way, in saying "millionaires" I am not quite certain that I am right.

Mr. SMOOT. The Senator is about as near right in that as he is in a great many other statements he has made about me on the floor. I will say to him, for his own information, that I

am nowhere near a millionaire.

Mr. WILLIAMS. I was about to correct that statement. I was about to say that the Senator is at least in a class of men that surgeons regard as legitimate prey. He has accumulated a great deal out in Utah, and his friends and his colleagues there have accumulated a great deal, and they all belong to a class of men that surgeons regard as their legitimate prey

But when you come down to real poor folks, like the Senator from New Hampshire and myself, we all know the surgeon does begin to calculate, and he says: "Here, on one side, is my phil-anthropy." He never thinks of his philanthropy when he is dealing with the Senator from Utah, of course. "Here, on one

Oh, pshaw, Mr. President! Neither one of the Senators will seriously contend anywhere in the world, except upon the floor of the Senate, that the cost of surgical instruments has no relationship to the poor and suffering in the hospitals. Neither

one of them will contend that.

Mr. GALLINGER. Mr. President, I do make that contention; and I can show the Senator from Mississippi a scalpel that was used for 25 years—unfortunately it was purchased abroad originally-and it is in good condition now. To say that its cost influenced the surgeon or the physician who used it during those 25 years in the matter of his fees is too absurd to be discussed.

Mr. STONE. Now, let us have a vote, Mr. President.
Mr. SMOOT. I am not going to pay any attention to what
the Senator from Mississippi said, but I want to call attention

to the paragraph.

In this very paragraph Senators will notice that on penknives, pocketknives, clasp knives, and all other knives valued at more than \$1 a dozen, there is a duty of 55 per cent ad valorem. I have only asked that there may be a duty of 40 per cent on these highly finished instruments. I do that because I think they belong here, instead of in the paragraph where steam rollers are provided for. There is no comparison between the making of steam rollers and surgical instruments. Of course, if the amendment is voted down I shall then hope that the Senator from Missouri will take it under consideration, as he has already said he would do.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Utah [Mr. Smoot].

The amendment was rejected.

Mr. STONE. Mr. President, the next paragraph passed over is 136.

The Secretary. Paragraph 136, at the top of page 40, to which a committee amendment is pending.

Mr. SMOOT. All there was in this paragraph 136 was the striking out of the words "any of the above" in the committee amendment.

Mr. THOMAS. We agreed to take that back and examine into the merits of the suggestion of the Senator from Utah as

to changing the phraseology.

Mr. STONE. Does the Senator desire to pass over it at this

time?

Mr. THOMAS. Yes.

Mr. STONE. Very well; let it be passed over.
The Secretary. Paragraph 138, on the same page, was passed over.

Mr. SMOOT. That is in relation to fishhooks.

Mr. STONE. Let that be passed over, too. The Senator from Utah desires to have that done.

The Secretary. Paragraph 143, at the foot of page 41, regarding umbrella and parasol ribs and stretchers, was passed

Mr. SMOOT. The Senator from Pennsylvania [Mr. Penrose] is not in the city to-day.

Mr. STONE. That paragraph was passed over at the instance of the senior Senator from Pennsylvania.

Mr. OLIVER. My colleague is not here to-day. I should like to have the paragraph passed over.

Mr. STONE. Very well.

The Secretary. Paragraph 145, on page 42, relating to aluminum, was passed over, with two amendments pending.

Mr. KENYON. Does the Senator desire a vote on this para-

graph to-night?

Mr. SHIVELY. We might as well dispose of the committee amendments this evening, I think. Do I understand that the junior Senator from Iowa has an amendment pending, or did he simply suggest that at some time in the consideration of the bill he would offer an amendment?

Mr. KENYON. I have an amendment pending which I introduced early in the session.

Mr. SHIVELY. Let the amendment submitted by the Senator from Iowa be stated.

Mr. KENYON. I should like to have that paragraph go over until Monday, unless there is some serious objection, when there will be a larger representation here on this side of the Chamber.

I ask to have it go over.

Mr. STONE. I understand the amendment of the Senator from Iowa proposes to transfer this product to the free list. Is that correct?

Mr. KENYON. That is correct; but I thought I might desire to call for a yea-and-nay vote.

Mr. STONE. Meanwhile, it seems to me the proper parlia-

mentary course is to perfect the text of the paragraph.

Mr. KENYON. The only question in my mind was as to Mr. WILLIAMS. It is in respon calling for a yea-and-nay vote. If I do that, I should like to the President of the United States.

have a larger representation present on this side. I ask that the paragraph go over. Of course, the Senate can do as it pleases about it.

Mr. STONE. I suppose the Senator from Iowa does not object to having the Senate pass upon the amendments proposed

by the Senate committee?

Mr. KENYON. No; I think not.

Mr. STONE. Then the Senator's amendment would be in order.

Mr. KENYON. Then I will ask for a vote on my amendment on Monday, with the understanding that the paragraph will go over until then.

The VICE PRESIDENT. The Chair is of opinion, upon examining the amendment proposed by the Senator from Iowa, that the committee has a right first to perfect the text by having its amendments passed upon. They come first in order.

Mr. KENYON. That would not preclude my amendment in

any way?

The VICE PRESIDENT. That would not preclude the consideration of the amendment offered by the Senator from Iowa. The Secretary will state the committee amendment.

The Secretary. The first committee amendment is, in paragraph 145, page 42, line 17, after the word "form" and the comma, to insert "2 cents per pound" and a semicolon.

The amendment was agreed to.

The Secretary. Also, on the same page, line 18, after the word "rods," it is proposed to insert a comma and the words 34 cents per pound.

The amendment was agreed to.

Mr. STONE. Now the amendment offered by the Senator from Iowa is pending.

The VICE PRESIDENT. Yes; it is pending.

Mr. STONE. And that can go over until Monday, as he desires

Mr. KENYON. That is satisfactory.

The VICE PRESIDENT. The Secretary will state the amendment of the Senator from Iowa.

The Secretary. In paragraph 145, page 42, line 20, after the words "chief value" and the comma, it is proposed to strike out the remainder of the paragraph, or the words "25 per cent ad valorem," and to insert in lieu thereof the words "shall be exempt from duty.

Mr. STONE. Mr. President, there is no need of consuming time in looking over the paragraphs passed over. I see they were all passed over at the instance of Senators who are absent, except one, paragraph 154, which was passed over at the instance of the Senator from Utah [Mr. SUTHERLAND], and I suppose he would prefer that it should go over, too.

Mr. SUTHERLAND. I think it would be hardly worth while to take it up to-night. I should wish to speak in regard to it

for 10 or 15 minutes, at any rate.

BUST OF WILLIAM PITT, LORD CHATHAM.

Mr. WILLIAMS. Mr. President, I desire to make a favorable report on a joint resolution from the Committee on Foreign Relations. I ask that the joint resolution be read.

The joint resolution (S. J. Res. 64) authorizing the President

of the United States to accept, in the name of the United States, a bust of William Pitt, Lord Chatham, was read the first time by its title and the second time at length, as follows:

Dy its little and the second time at length, as follows:

Resolved, etc., That the President of the United States is hereby authorized to accept, in the name of the United States, a bust of William Pitt, Lord Chatham, the friend and champion of American liberties, as the gift of certain American women, married and resident in England, who desire to show their love for their native land and to honor by appropriate ceremonies a great and patriotic English statesman, who was a friend and defender of English liberties and of the American Colonies.

Mr. WILLIAMS. I ask immediate consideration of the joint resolution, Mr. President. It is a favorable report from the Committee on Foreign Relations.

The VICE PRESIDENT. Is there any objection? The Chair hears none.

Mr. GALLINGER. Is it a joint resolution, Mr. President? The VICE PRESIDENT. It is.

Mr. BACON. Mr. President, if I understand correctly, the joint resolution has just been introduced, and it has been introduced by the Senator from Mississippi by direction of the committee.

Mr. SMOOT. No: I understand the Senator from Mississippi reported it from the committee.

Mr. WILLIAMS. I was directed by the Committee on Foreign Relations this morning to draw up the joint resolution and report it to the Senate.

Mr. BACON. To introduce it.
Mr. WILLIAMS. It is in response to a special message from

Mr. BACON. The Senator from Mississippi was instructed to introduce it, which he now does.

Then, the Senator asks now to introduce the Mr. SMOOT.

joint resolution?

Mr. WILLIAMS. If the chairman of the Foreign Relations Committee says I was instructed to introduce the joint resolution, I now introduce it, and recommend that it be referred to the Foreign Relations Committee, and wash my hands of it. I was instructed this morning-

Mr. JAMES. The Senator from Mississippi has already obtained unanimous consent for the consideration of the joint resolution, and it is entirely too late now for him to wash his

hands of it.

Mr. GALLINGER. I think the Senator is wrong, because pending that I made an inquiry as to whether or not it is a joint resolution. Unanimous consent had not been given.

Mr. JAMES. I think the Record will show that unanimous consent was given. It was clearly put by the Chair and agreed

to. It was after that that the Senator made the inquiry.

The VICE PRESIDENT. Is there now any objection? There being no objection, the joint resolution was considered

as in Committee of the Whole.

Mr. O'GORMAN. May I ask to have the joint resolution read?

The VICE PRESIDENT. The Secretary will read it again. The Secretary again read the joint resolution, and it was reported to the Senate without amendment.

Mr. O'GORMAN. I do not see the necessity of inserting the words "by appropriate ceremonies." I do not know whether it was intended to have those words inserted. There is no ceremony contemplated. The honor is done in presenting it.

Mr. WILLIAMS. I was instructed by the Committee on Foreign Relations to word the proposition in response to the President's special message, and I have worded it as I thought we meant. I take it for granted that when the President of the United States accepts a bust at the hands of certain ladies there will be certain appropriate ceremonies, even if they amount to nothing except their offering the bust and the President accepting it in a few words. As to what ceremonies shall be appropriate or shall not be appropriate, of course that is left in the discretion of the President.

The joint resolution was ordered to be engressed for a third reading, read the third time, and passed.

Mr. STONE. I move that the Senate adjourn.

The motion was agreed to; and (at 6 o'clock and 2 minutes p. m.) the Senate adjourned until Monday, August 11, 1913, at 12 o'clock meridian.

SENATE.

Monday, August 11, 1913.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. The Journal of the proceedings of Saturday last was read and

PETITIONS.

Mr. BRYAN presented petitions signed by sundry citizens of Bristol, Southington, Forestville, and Hartford, all in the State of Connecticut, favoring the adoption of a proposed plan, submitted by Henry P. Lason, of De Funiak Springs, Fla., for the passage of a paper-money coinage law, which were referred to the Committee on Banking and Currency.

Mr. PAGE presented a petition of the Equal Franchise League of St. Albans, Vt., praying for the adoption of an amendment to the Constitution granting the right of suffrage to women, which was referred to the Committee on Woman Suffrage.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GALLINGER:

A bill (S. 2916) granting an increase of pension to Mary A. V. Sanger (with accompanying paper); to the Committee on Pensions.

By Mr. CRAWFORD:

A bill (S. 2917) granting an increase of pension to John O'Hara (with accompanying paper); to the Committee on Pen-

A bill (S. 2918) granting a pension to Mary D. Lauder (with accompanying papers); to the Committee on Pensions.

AMENDMENTS TO THE TARIFF BILL.

Mr. POINDEXTER submitted two amendments intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for | Co. and the Standard Oil Co.

other purposes, which were ordered to lie on the table and be printed

THE CURRENCY (S. DOC. 161).

Mr. GALLINGER. Mr. President, I have here a paper on the currency question by Charles G. Dawes, former Comptroller of the Currency, which will be of interest in the near future. I ask that it may be printed as a Senate document. It is a brief

The VICE PRESIDENT. Is there objection? The Chair hears none, and that action will be taken.

THE TARIFF.

Mr. SIMMONS. I ask unanimous consent that the Senate proceed to the consideration of House bill 3321.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government,

and for other purposes.

Mr. HOLLIS. Mr. President, as a Democratic Senator from
New England, born and reared in a hotbed of protectionism, I take my stand squarely upon the Democratic national platform. I decline to separate New England's tariff interests from the interests of the Nation. The platform that won the confidence of the great West and the solid South is good enough for New England—just as the successful ticket of the Democratic Party was good enough for Maine, New Hampshire, Massachusetts, Rhode Island, and Connecticut on last election day.

THE TARIFF A NATIONAL ISSUE.

My constituents as a whole have no sympathy with the provincial doctrine that New England must be coddled or tected" at the expense of the South and West. When her public men in years past have begged for special tariff privileges at the Nation's Capital she has been misrepresented. She bids me say, Mr. President, that what is best for the country at large is best for her. She recognizes the doctrine that the tariff is indeed a national issue, and the Congress has no right to tax all the people for the benefit of a few.

By the national Democratic platform this administration is committed to certain definite doctrines and pledges touching the tariff. I desire at the outset to show in a general way how the pending tariff bill conforms to those doctrines and pledges, and then to discuss more in detail Schedule I, dealing with

manufactures of cotton.

DEMOCRATIC PARTY PLEDGED TO DOWNWARD REVISION.

All agree that the Democratic Party is pledged to an immediate downward revision of the tariff's established by the Payne-Aldrich law. All agree that this pledge has been redeemed, generally speaking, in the pending bill, which carries an average ad valorem duty of 26.67 per cent, whereas the Payne bill carries an average rate of 36.86 per cent. No one will debate the question whether this revision is upward or downward. It is downward, and it is substantially downward.

MATERIAL REDUCTION ON NECESSARIES.

The Democratic platform contains a further pledge that there shall be material reductions upon the necessaries of life-upon what we eat and wear and upon what gives us shelter. And so what we eat and wear and upon what gives us sheiter. And so we find in the pending bill that meat, fish, eggs, milk, corn, wheat, flour, potatoes, sugar, wool, flax, cheap woolen blankets, raw furs, leather, boots and shoes, lumber, cement, nails, spikes, and a great variety of articles of everyday use are upon the free list, while the duties on other necessaries of life, like fruits, butter, cheese, oatmeal, rice, cotton cloth, woolens, hose, dressed lumber, household furniture, and paper have been largely re-duced. Here, again, no one will doubt that the Democratic pledge has been fulfilled.

FARMERS' FREE LIST.

To compensate the farmer for any loss that may come to him from placing his agricultural products upon the free list, the pending bill removes the duty from most of the things essential to his vocation, such as plows, harvesters, reapers, horse rakes, wagons, mowing machines, and other agricultural implements, animals for breeding purposes, harness, bagging, binding twine, fertilizers, cream separators, and the like, making up the "farmers' free list." The farmer also shares with the other consumers in the lower duties on the necessaries of

TRUST-MADE ARTICLES.

In response to another pledge in the Democratic platforn, articles entering into competition with trust-controlled products, and articles of American manufacture sold abroad more cheaply than at home, are placed upon the free list. are steel rails, sewing machines, cash registers, typewriters, shoe machinery, and the products of the American Harvester

In the case of aluminum, which was so clearly brought before the Senate last Saturday by the Senator from Iowa [Mr. KEN-YON], it is clear that it is controlled by a trust. But the trust is world-wide, and the prices in this country are fixed exactly where the trust wishes to fix them, irrespective of the duty. We are able to raise a revenue of some half million dollars by placing a duty on aluminum, and for that reason, as I understand the Democratic theory, in order to raise revenue a duty is placed upon this trust-controlled product.

FREE RAW MATERIALS.

In accordance with long-established Democratic doctrine, raw materials, such as wool, lumber, and iron ore, are placed so far as practicable upon the free list.

INCOME TAX.

The relief granted to the consumer by these various reductions in duty is made possible by the provision for an income tax which places a large part of the governmental burden upon wealth, where it is least felt. A part of the decrease in revenue is made up also by an increased tax on luxuries, such as diamonds, jewelry, ivory, and perfumery, and by an increased tax on noncompetitive articles, as will presently be explained.

TARIFF FOR REVENUE ONLY.

Throughout these many items of reduced tariffs may be clearly traced the influence of the underlying, basic, Democratic doctrine, which declares that the Government has no right or power, under the Constitution, to impose or collect tariff duties, except for the purpose of revenue. In other words, the Republican doctrine of protection is flatly opposed on principle.

It is not my purpose to discuss the general merits of "tariff for revenue only," as opposed to the doctrine of "protection to American industries." If the election of 1912 meant anything beyond a shifting of public officials, it meant that the Democratic tariff policy was indorsed. The problem now pressing for solution is the more practical one, whether the pending bill conforms to the promises and pledges of the Democratic

PENDING BILL PROTECTIVE.

It is evident at a glance that this bill is protective in certain features. And this failure to conform to the traditional Democratic doctrine requires explanation. For a revenue tariff is preferably laid on articles which are not produced in the home country, for two reasons: (1) Because the entire tax then finds its way into the public treasury; and (2) industry is not disturbed by stimulation when it becomes necessary to increase revenues, nor by starvation when less revenue is required for governmental needs. Thus, ivory, spices, opium, and tropical fruits and woods are proper subjects for a revenue tariff, and so would tea and coffee be if they were not now considered necessaries. Next in order of preference for revenue purposes are articles of luxury, such as diamonds, laces, wines, and perfumeries.

NO INJURY TO EXISTING INDUSTRY.

But in the pending bill we find tariffs laid on many prime necessities, such as cotton cloth, woolen clothing, cutlery, crockery, and the like, with the inevitable result that home products of this class are protected from competition. The reasons for this departure from the Democratic theory are two: (1) Because articles of luxury and noncompeting articles will not by themselves produce enough revenue and (2) because we are further pledged in our platform not to injure or destroy any legitimate industry.

In other words, we find that expediency and fair dealing block the way to an immediate resumption of a constitutional tariff, for we are confronted with the need of raising an enormous revenue and by a host of helpless, hothoused, abnormal industries, nourished by a highly protective tariff, and which would be utterly destroyed by the immediate withdrawal of all governmental pap.

A COMPETITIVE TARIFF.

To this extent we are handicapped in establishing a tariff for revenue only; but, while we leave on the statute books a reasonable measure of protection to existing industries, we do not undertake in any sense to guarantee to any industry a reasonable profit. We insist that home industries shall compete with foreign producers for the home market. We are placing duties at a point where we shall stimulate effective competition without destroying any legitimate industry. As our home industries respond to the stimulus of competition we shall tend toward a revenue tariff, with no heed to incidental protection; we expect to achieve this end by establishing and maintaining what may be fairly called a "competitive tariff."

The protection which is thus afforded by a competitive tariff is confined to those industries which give evidence of some day reaching a position of self-dependence. They are given a chance to demonstrate their virility. Such industries fairly come under the head of "legitimate," and among them I class the cotton and woolen industries of New England. Our boot and shoe industry has already demonstrated its fitness to stand on its own feet, as has the iron and steel industry of Pennsylvania.

SUGAR INDUSTRY NOT LEGITIMATE.

The sugar industry of the South, after a century of protection, has failed to establish a reasonable assurance of attaining self-support within a reasonable time, and it can not therefore be classed as a "legitimate" industry within the meaning of our platform. It is no longer expedient, even for the purpose of raising revenue, to tax the American consumers \$115,000,000 yearly in order to help our southern and western sugar planters produce sugar to the value of \$72,000,000, upon which their profits at 20 per cent would be less than \$15,000,000.

TARIFF ADJUSTMENT COMPLEX.

It is thus apparent that the problem of tariff adjustment is complex, that the fixing of any one item must be a composite of the declarations and pledges contained in the Democratic platform plus the traditional attitude of the Democratic Party along certain lines plus the conditions of industry and the needs of the Government.

The problem may be illustrated by a table with a ring upon its surface. Attach to one end of the table rubber bands representing the influences which tend to lower tariff duties. Attach to the other end of the table bands which represent tendencies to raise duties. Proportion these bands in length and size so that they fairly represent the relative strength and importance of the various influences. Now, attach the other ends of the bands to the ring, and the point at which it comes to rest will illustrate the position of that particular tariff on the general scale. Increase or decrease the tension on any band and the position of the ring will change.

REPUBLICAN METHOD TOO SIMPLE.

In his able and instructive speech on the textile schedules last Wednesday the senior Senator from Rhode Island stated that the Democratic theory of tariff revision is so complex that it is hard to understand. It is indeed more complex than the Republican method of calling the protected manufacturers to Washington and giving them just what they want. The heroic simplicity of this method was thoroughly understood by the American people, and it was repudiated by them last November. They desire now that all factors and parties interested be considered, including the consumer.

We may fairly divide the considerations which influence the schedules in a Democratic tariff bill into two classes—(II) those which tend to raise or resist a downward tendency of particular tariffs, and (2) those which tend to lower or resist an upward tendency of particular tariffs.

INFLUENCES TENDING TO RAISE TARIFFS. In the first class are found the following:

1. Increasing needs of the Government.

Forbearance to existing legitimate industries.

3. Suitability for revenue purposes of (a) noncompeting articles and (b) articles of luxury.

INFLUENCES TENDING TO LOWER TARIFFS.

And in the second class are these:

- 1. Hostility to all protective tariffs.
- General policy of downward revision. 3. Material reductions on necessaries.
- Discouragement of trust-made articles.
- 5. Farmers' free list.
- 6. Free raw materials.

And so each Democratic tariff bill will depend upon the importance and number and tension of the various considerations that press upon our attention. Alter any factor and the result will be altered. I incline to the belief that the upward factor which lifts most at present is the promise not to injure or destroy any legitimate industry. If it were not for the reluctance of the Democratic Party to destroy going concerns the taxes on necessaries would be still further reduced. And the test of what shall be the present limit of reduction is the "competitive tariff.'

As long as there is healthy competition home industries can not be seriously impaired, nor can they be highly protected. The competitive test meets the requirements in the most satisfactory way.

COMPETITIVE TARIFF IS BEST SOLUTION,

It has been the custom of the Republican leaders of this body in times past to look carefully after the producer and to express solicitude for the workmen engaged in a particular industry. The Democratic Party, on the other hand, has been more tender to the consumer, paying less attention to the producer. Upon the competitive basis both the producer and the consumer are served—the producer by enough tariff to place him upon even terms with the foreigner and the consumer with the tariff low enough to invite substantial foreign importations.

PENDING BILL AN HONEST ATTEMPT,

The consideration of these various tendencies involves patient research and intelligent discrimination. It must inevitably result in some uncertainties and approximations. I believe this bill is an honest, fair, and enlightened attempt to solve the problem of tariff reduction. Any claim that the solution is perfect must go the way of all claims to infallibility.

Upon my election as United States Senator I affirmed my belief in a tariff for revenue only and my utter hostility to the principles of protectionism. My views on this subject were well

known in New Hampshire.

NEW ENGLAND FAIRLY TREATED.

I declared further that a downward revision of the tariff was inevitable, and I pledged my best efforts to securing for New England fair treatment in that revision and an equitable adjustment among New England industries. My efforts have been in that direction, and I believe the bill treats New England

fairly.

That is, I am convinced that the placing upon the free list of New England products, such as boots and shoes, shoe machinery, lumber, fish, newspaper stock, plows, wagons, harness, and the like, is fully met by the free listing of southern and western products like wool, sugar, leather, cattle, meat, flour, coal, and iron ore. And I reach the same conclusion regarding the relative reduction of duties where the free list is not reached and the equality of the reductions as regards different industries and different sections of New England If there is discrimination in favor of any section or any industry or against any section or any industry, it is not so marked as to have caught my notice.

COTTON INDUSTRY IMPORTANT.

We can not apply the Democratic method of tariff revision to any schedule better than to Schedule I, and we shall find that our result, under present conditions, will agree substantially with a Republican revision of this schedule, honestly carried

out. Please mark the words "honestly carried out."

The Senator from Rhode Island [Mr Lippitt] stated last Wednesday in the Senate that all the textile schedules in the pending bill were wrong, including cotton, silk, and woolen, but that the cotton schedule was the worst of all. If, then, we can show that the cotton schedule is right, we may rest assured that the silk and woolen schedules are right. I shall therefore devote myself to a discussion of the cotton schedule, which is most important in my State and in New England. It is important also in the South, and there are charges that this bill favors the South at the expense of New England. I believe this charge is false, as I shall presently demonstrate.

REDUCTION IN COTTON SCHEDULE SUFFICIENT.

Certain Republican Senators, notably from the West, claim that the cotton industry receives too much protection under this bill; but let these Senators remember that we are now taking merely a first step toward a revenue tariff. After we have seen the result of this first step we shall be in position to take a second. I very much fear that if we should make that first step so long that the cotton industry should receive a severe blow we might not be in a position, politically, to take the second step at an early date.

But even as a first step we have made a reduction on the whole cotton schedule from 45.6 per cent ad valorem to 29.4 per cent ad valorem, a reduction of 35 per cent. Two more steps like the first would leave the cotton industry of America

entirely without protection.

That an average reduction of 35 per cent will insure a competitive basis on manufactures of cotton may be safely inferred from the fact that under the present rates imports now average over \$64,000,000 yearly. The industry is already largely upon a competitive basis.

Speaking as one who is utterly opposed to the principle of protection, and as one who is utterly opposed by the protected interests of my State, I do not hesitate to assert that no complaint of an insufficient reduction in the cotton schedule is well

REDUCTION NOT TOO DRASTIC.

Let us now inquire whether the reduction is too drastic. Are we warranted in cutting the tariffs on cotton manufactures substantially 35 per cent? Our protectionist friends insist that we are not warranted. They declare that such a tremendous re-

duction in cotton duties will close mills, open soup kitchens, and place a blight upon the cotton industry of New England. Let us assume for the moment that they are right, and let us inquire whether there is any peculiarity of these cotton manufacturers which entitles them to "protection" under the National Government in order that they may live.

PROTECTION TO INFANT INDUSTRIES.

This part of the argument is plain. Our protectionist friends say that the Government should impose a tariff on cotton goods, not primarily for revenue, but in order to prevent foreign competition, so that the makers of cotton goods may compel the rest of us to pay more than we otherwise should for cotton cloth. In other words, the rest of us must contribute money to the cotton manufacturers so that they may sell their goods at a higher price. I must pay into the pocket of my neighbor who owns a cotton mill a few cents on the shirt I wear on my back.

This is a pretty raw proposition for me, even when I know and esteem my cotton-mill friend. But if he happens to be a political enemy, or if I am a miner in Utah, it is even worse. There must have been a very plausible excuse to permit even the Republican Party to impose such a system on the American people. I never understood the reasoning very well, but as nearly as my inferior Democratic intellect can compass it, the

following is the explanation:

We are instructed to pay this tax to our cotton-mill friend and look pleasant, because a protective tariff enables him to establish new industries in our Nation and thus increase our wealth and give employment to countless workmen. We continue to look pleasant and begin to look forward to the time when the industries will be so firmly established that we need not contribute further.

PROTECTION TO AMERICAN LABOR.

Years pass and we see our cotton and woolen industries increase to mammoth proportions, producing goods valued at hundreds of millions of dollars annually. We see their great mills covering acres upon acres. We observe how prosperous their owners have become, what beautiful houses they live in, how prominent they are in the social, business, and political life of our part of the Nation. We mildly inquire if it is not about time to let up on us a bit and see if they can not rub along without taxing us for the shirts we wear. We inquire if the

infant industries have not come of age.

We are met with a benevolent and patronizing smile and are assured that we must look pleasant some more and continue to pay a tax, no longer for the benefit of the manufacturer, who is rich enough already, but so that he may pay good wages to his thousands of workmen. In other words, the Republican Party has been clever enough to see that the American public would no longer be hoaxed by the plea of "infant industries"; that they would no longer consent to be taxed so that cotton millionaires might wax richer at their expense, but in the generosity of their hearts they might be persuaded to tax themselves for the benefit of wage earners, possibly less fortunate than themselves. Anyone who might protest was blasted by the query, "Do you want American workmen reduced to the level of the pauper labor of Europe?" Naturally no one did, and the question passed for a valid argument worth 100 cents on the dollar.

CONFIDENCE SHAKEN BY LAWRENCE STRIKE,

We are a benevolent and a good-natured race. We are accustomed to pay direct local taxes for the benefit of unfortunates who can not support themselves; but we support them as paupers—there are no disguises about it. We have proceeded as a Nation to contribute millions upon millions of indirect taxes under the impression that we were helping to support countless mill hands so that they might not be reduced to the level of paupers. But our confidence that our benevolence had trickled through the treasuries of the cotton and woolen mills to the pay envelopes of the operatives received a severe jolt from the disclosures that followed close on the heels of the Lawrence (Mass.) strike in 1912.

WAGES FIXED BY SUPPLY AND DEMAND.

It has now come to be pretty thoroughly understood by day laborers, as well as by students of economics, that wages are regulated by the law of supply and demand. As was stated in the Senate recently by the Senator from Mississippi, "What makes high wages is two jobs looking for one man; what makes low wages is two men looking for one job." No matter how much money a cotton manufacturer is making, he will not be so benevolent as to pay his hands more than the going price. The price he has to pay depends on how many are available for the work. The labor strike cuts off the supply, and when the price offered is raised high enough to overcome the objections of the workmen the supply flows back.

I was pleased recently to hear the Senator from Utah combat the statement contained in a letter from Providence to the effect that miners worked in Utah for \$1.71 a day. The distinguished Senator replied, in substance, that the labor organizations would not permit a miner to work for such wages, thereby admitting that supply and demand, not the protective tariff, controls

ARE COTTON MANUFACTURERS WORTHY?

Before we pursue the wage question further let us see how great the advantages are which spring from our benevolent tariff "protection," outside of increased wages; let us inquire how grateful its beneficiaries are, how much they do for their communities, how generous and high-minded the cotton-mill owners are. Possibly they are so superior to the rest of us that we can afford to maintain them by taxing ourselves.

In the first place, we should expect these favored gentlemen, who fear so much that their workmen may be reduced to the level of the pauper labor of Europe, to conduct their industries on humane lines, to create an example for the rest of the country to follow.

STATUTORY REQULATIONS.

On the contrary, it is actually necessary to compel these men by law to conduct their business on decent lines. We have to provide factory inspectors to police their mills and see that sanitary laws are complied with. We have to curb their greed by passing child labor laws, and laws forbidding women and children to work in factories more than a certain number of hours per week. The limit has been reduced from 60 to 58, to 56, to 55, and to 54 hours a week in Massachusetts, and to 55 hours a week in New Hampshire. Each reduction has come grudgingly and after a hard fight against the determined resistance of a legislative lobby maintained by the manufacturers. We have reduced it to 55 hours a week in my State. The Committee on the District of Columbia has recently reported favorably to the Senate a bill fixing the hours of labor for women and children in factories in the District of Columbia at 48 hours per week.

RESTRAINED LIKE DRAMSHOPS.

Out of the many hundred textile manufacturers in New England you might expect to find a few benevolent souls who would voluntarily reduce the hours of labor on humane principles, even at the expense of some decrease in dividends. But not one has been known to rise to this height. Their hours of opening and closing must be regulated by law, like the saloon and the dramshop.

INTERFERE WITH LEGISLATION.

But these protected manufacturers do not tamely submit to wholesome regulations of this sort. They seek to control the Government in an effort to prevent labor legislation, to escape just taxes, to control the police and the inferior courts, and to secure military aid for the suppression of strikes. A few years ago they all rode on free passes-being men of influence-but they are now compelled by law to pay their fare like the rest

SECURE FAVORS FROM RAILROADS.

They secure for their corporations the benefits of interlocking directorates with railroads, with the result that their raw materials and products get the benefit of special commodity rates at low prices. The treasurer of the largest mill in New Engand is a director of the Boston & Maine Railroad. It appeared in evidence in a recent hearing that this railroad furnished to this mill to do its shifting in its private yard a shifter and shifting crew free of charge, and the crew was idle half the time.

ESCAPE JUST TAXES.

The influence of these mills extends into local politics, to keep down public expenditures, and to keep down their own tax valuations. It is notorious throughout New England that the great textile concerns escape their fair share of the taxes by controlling local boards of assessors.

CONTROL LOCAL OFFICIALS.

The cotton and woolen manufacturers also extend their influence to State politics, and they and their attorneys are very conspicuous about the legislature and at political conventions, making sure that their particular interests are cared for, even as they have been cared for in years past at Washington. They influence the nomination and election of governors and other State officials, and through these they get local judges, police commissioners, and truant officers appointed who will do their bidding. When mill workers of a New England city hired a hall during the Lawrence strike to consider whether they should themselves go out on strike, the local police prevented the use of the hall, and when the operatives tried to hold meetings in

the street some of them were arrested. This was accomplished by the mill owners through the chief of police, who was controlled by the police commissioners, who were appointed by the governor at the direction of the mill owners.

No strike was inaugurated in that city, but better a thousand

times the evils and perils of a strike than such an impudent denial of constitutional rights.

CONTROL LOCAL COURTS.

At one time the State authorities were trying to enforce the child-labor law. Children under 14 were not allowed to work without a certificate from the truant officer. Special counsel was hired because the State attorney in that county was controlled by the mill owners. The truant officer kept his records in such shape that no one else could tell to whom certificates were issued. The State put the truant officer on the stand and asked him if a certificate had been granted to a certain child. He smilingly took from his pocket the certificate, which he had failed to show to the prosecuting officer on request. This was a joke on the State.

The next case was proved beyond a doubt, but the police court

judge, appointed under the same influences as the police and the truant officer, discharged the respondent because "he had not intended to violate the law." The State's counsel called the attention of the judge to his delinquencies and threatened to call the matter to the attention of the Attorney General. The next week convictions were secured, and the children were thereafter sent to school under the law.

INTERFERE IN SENATORIAL CONTEST.

In a recent contest in New England for United States Senator certain Democratic members of the legislature chanced to be employees of a certain great textile corporation. These Democrats were waited upon at their homes and were "requested" by their employer not to vote for the candidate of the Democratic caucus. They were told that they might vote for anyone else. They were not threatened with discharge in so many words if they continued to vote for their party candidate, but the implication was very plain. What sort of claim have men like this to special favors at the hands of a Democratic Con-

OFPOSE LABOR LAWS.

In 1903 a bill was pending in the New Hampshire Legislature for a 58-hour law for women and children in manufacturing establishments. A hearing was held before the Labor Committee. A leading mill agent testified that the mills must run 60 hours a week in order to make money. On cross-examina-tion this agent was forced to admit that his corporation had paid dividends amounting to 46 per cent the year previous.

HIGH DIVIDENDS.

It is difficult to get at the actual dividends paid in these industries, for the stock is frequently watered, the earnings are divided in some cases in the guise of salaries, and the principal stockholders are frequently the controlling factors in selling agencies which dispose of the product at fancy commissions,

But investigations made by the Senator from Oklahoma a few years ago, which resulted in a speech in the Senate, con-vinced the entire country that the dividends paid by many of the cotton mills of New England were enormous. The subject was reviewed by the Hon. Henry T. Rainey, of Illinois, in a The subject speech delivered at the present session, April 28, 1913 (Con-GRESSIONAL RECORD, p. 648). The most ardent protectionist ad-mits that the cotton industry can fairly yield something from its recent profits.

I have lately received from a firm of Boston investment bankers the July number of a circular which calls particular attention to several cotton-manufacturing stocks as an attractive investment, which have paid an average of from 15 per cent to 20 per cent in dividends for many years past. It speaks approvingly of "substantial extra dividends."

This is what this July number says:

The policy of paying regular fixed dividends and adding annually to surplus is always indicative of a well-managed and growing business. Net profits each year should exceed several times dividend requirements, and the available working capital should always be ample to meet the demands of the business.

OVERCAPITALIZATION.

These extra net profits, "several times the dividend requirements," find their way into extra stock, and it is these capitalized earnings with which the American public is confronted when the demand is made for a protective tariff which will maintain a "reasonable profit."

INDUSTRY NOT ALARMED.

Of the tariff this firm says:

The new Congress, true to its promise, has made good progress on the tariff bill, and it is now confidently believed it will pass the Senate,

without any material change, before the summer is ended. Ample oppor-tunity has been afforded for a careful study of the new schedules and their operation on the various industries affected. This means that practically all interests concerned have accomplished much in adjusting themselves to the pending changes.

A search through the entire pamphlet discloses no fear or the slightest alarm over the reduction in the cotton schedule.

ONE-SIDED DEVELOPMENT.

There can be no doubt that the enormous stimulus to the cotton industry in New England has resulted in a one-sided The glittering attractions of the textile cities and larger towns have drawn thousands of young men and women from the farms, who would have been of more service to themselves and to the State if they had remained in the smaller communities.

And it is a subject for anxious thought whether a State is better off for possessing many cities of this character. In the early days of the textile industries the best American citizens worked in the mills side by side with the sons and daughters of the mill owners. In those days Lowell, Mass., boasted of Lucy Larcom, the mill-girl poet. In those days the owners lived close by the mills, knew the operatives personally, and took a personal interest in their welfare.

OWNERS DWELL ELSEWHERE.

fo-day many of the operatives are foreigners, speaking 20 different languages, huddled into reeking tenements, with a standard of living far below the American standard. Instead standard of living far below the American standard. of close relations with their employers, they are confronted with 10-foot, spiked iron fences to keep them away from the mills out of working hours. The owners of the mills live in Boston, New York, London, or Paris, while the managers and superintendents live in an adjacent suburb, away from the offensive sights, noises, and smells of the mill cities themselves.

THEIR PROSPERITY DESIRED.

I am well aware, Mr. President, that I shall be charged with a desire to drive these textile mills out of business. It will be stated in the press of New England, which these cotton men largely control, that I have advocated in the United States Senate the destruction and demolition of their mills. Nothing of the sort. I hope for their prosperity. I hope they will make money enough so that they may pay better wages. I shall presently show that this Democratic bill gives them all the protection they ought fairly to have. But I have felt it my duty to disclose to my colleagues the facts in the case, so that they may judge for themselves whether these gentlemen are entitled to any special consideration in a Democratic tariff bill.

So far from wishing these gentlemen any harm, I have every reason for wishing them to prosper. My relatives and my friends have their money invested in these mills. And it may readily be seen that if any considerable number of them cease running after the passage of this bill, under such circumstances that it may be said that they were put out of business because a fair amount of protection was denied them, it will injure the Democratic administration and the Democratic Party in New Hampshire and in New England.

PAY STARVATION WAGES,

But I can not refrain from improving this opportunity to demonstrate that the money the American people have yielded in the shape of taxes for the benefit of the workingmen in New England's cotton mills has been diverted from its purpose and stolen for the stockholders. For it is an established fact that while these mills pay enormous dividends to their stockholders

they pay starvation wages to their operatives.

After the strike at Lawrence, Mass., in 1912, an investigation was conducted under a Republican administration by a Republican official, Mr. Charles P. Neill, Labor Commissioner.

Mr. Neill made an elaborate report, in which he says (p. 20):

It is obvious from the figures of earnings that the full-time earnings of a large number of adult employees are entirely inadequate to maintain a family. Thus the full-time earnings of 7,275 employees, or about one-third of the total covered in this investigation, are less than \$7 a week. Of the 7,275 earning less than \$7 a week, 5,294 were 18 years of age or over, and 36.5 per cent of the 5,294 were males. These wages, however, are not peculiar to Lawrence. The wages of textile workers in that city are not lower than in most other textile towns.

CAN NOT SUPPORT FAMILY.

According to a statement by the junior Senator from Massachusetts [Mr. Weeks], made in the Senate July 24, last (Con-GRESSIONAL RECORD, p. 2697, the average weekly family expense for food alone in certain trades is \$8.03. If this is a fair average (and I do not doubt it), how is it possible for a man earning \$7 a week to maintain a family, when food alone would cost \$8.03? How about rent, clothing, and doctor's bills?

I have been told within a month by the agent of one of the largest textile mills in New England that they do not expect to pay a man enough to support a family; the women and children

must also work.

HIGH DEATH RATE.

And it is true that the women and children do work. result is exactly what one would expect. The women are sickly and the children are stunted. The death rate for children under 5 years of age in all the United States is highest in the textile cities of New England-in one of the most healthful climates in The reason is that mothers must do double duty as housewives and day laborers; children are neglected; mothers are overworked. Pregnant women must work long hours for a bare living in a stifling atmosphere amid clattering machinery; and after the child is born the mother has little strength and little time to bestow upon her offspring.

LOW STANDARD OF LIVING.
The Labor Commissioner's report, already referred to, shows that the Lawrence operatives were shockingly overcrowded. 15, 16, and 17 people occupying a five-room apartment.

It further appeared at a hearing before the House Committee on Rules that whole families lived without ever tasting meat, and the conditions before the strike were far below what our Republican friends proudly call "the American standard of living." What more can be expected with weekly wages of \$7 and \$8 and a rent of \$3 a week for a four-room apartment?

It will be understood that what is said of low wages and poor conditions of living in the cotton industry also applies to the other textile industries of New England. The hands live in the same or neighboring communities and transfer freely from one industry to another.

TARIFF DOES NOT AFFECT WAGES.

It is not pleasant to hold up the textile cities of New England in their true light, but I can not be a party to the mon-strous fraud that has been perpetrated upon the American public by the Republican Party. To represent that a high protective tariff is desired by the cotton manufacturers of New England so that they may pay fair wages to their operatives is brazen effrontery. No matter how high the tariff, no matter how large their dividends, they will continue to get their work done at the lowest possible rate. A high tariff encourages and does not relieve the conditions disclosed at Lawrence.

It seems fairly certain, on the showing made, that these cotton manufacturers are not entitled to any special favors at the hands of this Congress. I now purpose to demonstrate that the pending bill gives them more than their best friends consider

necessary.

TARIFF BOARD REPORT.

It will be remembered, Mr. President, that the Tariff Board appointed by President Taft made a report on the cotton schedule, and this report was transmitted to Congress with a message from President Taft on March 26, 1912. It occurred to me that this report might throw some light on the pending bill, and if the Democratic schedules should receive even partial support from the report it would be most gratifying.

HILL COTTON BILL.

In my researches I came across a bill offered in the House by the Hon. Ebenezer J. Hill, of Connecticut, on August 2, 1912, as a substitute for the majority bill to reduce the duties on manufactures of cotton. In the speech made by Mr. Hill in support of his substitute he stated that his bill was based upon the report of the Tariff Board, and he referred to the report freely and quoted from it in the course of his speech.

Mr. Hill was then, and had been for nine years, a Republican member of the Ways and Means Committee of the House. He was then, or had previously been, a director and the vice president of a textile mill, of which his son was treasurer. He was wedded to the doctrine of protection, and it will not be claimed that he was not intelligent enough or honest enough to draft a sound bill, based on the Tariff Board report, which should be sufficiently favorable to the protected cotton manufacturers of New England.

CONNECTICUT DISAGREES WITH RHODE ISLAND,

Examining Mr. Hill's speech we are interested to note at the very outset that he disagrees with the views of the Senator from Rhode Island on the subject of specific and ad valorem The learned Senator used his strongest against the ad valorem cotton rates in the pending bill, so that those of us who know his reputation as a tariff expert were rendered somewhat uneasy. It is very pleasant, therefore, to find that Mr. Hill, of Connecticut, is utterly opposed to the Senator's view on this subject, and accepts the view of the Tariff Board that ad valorem duties are preferable to specific duties. He comments on the Tariff Board report on this subject as follows: ADVOCATES AD VALOREM BATES.

On pages 65 to 75 of the cotton report (Tariff Board report) this question is exhaustively discussed, and the consensus of the argument is overwhelming in favor of ad valorem rates as against the present law system (the Payne bill).

On page 73 the board says:

"So far as the motive for undervaluation is concerned, it is more powerful under the scheme adopted in the present (Payne) law than it would be under a straight ad valorem tariff."

On page 74 they say:

"A system which puts a specific rate on an ad valorem basis seems to combine the evils of both systems." (CONGRESSIONAL RECORD, Aug. 2, 1912, p. 10828.)

It will be reassuring to the manufacturers of New England to hear the Democratic ad valorem system so warmly indersed by Mr. Hill and the Republican Tariff Board after the caustic criticism of the Senator from Rhode Island.

RATES SUBSTANTIALLY AGREE.

Coming now to the different items recommended by this leading protectionist, we find that they agree to a surprising extent with the rates established in the pending Underwood bill.

COTTON AND COTTON WASTE.

Cotton and cotton waste or flocks are left by Mr. Hill on the free list as under the Payne law (par. 548). We find the same in the pending Underwood bill.

In the first paragraph of the Hill substitute we find cotton card laps, sliver, roving, or roping carrying a rate of 5 per cent ad valorem. Mr. Underwood gives them precisely the same rate (par. 255).

In paragraph 2 Mr. Hill assigns a rate of 10 per cent to manufactured cotton waste and flocks. The Underwood rate is 5 per cent (par. 255). This item is unimportant because these goods were free, with small importations, under the Dingley Act, while at 20 per cent under the Payne law the amount of imports was only \$2,629, and under the pending law the revenues are estimated at only \$500. The difference between Mr. Hill and Mr. UNDERWOOD here is purely nominal.

COTTON YARN.

In paragraph 3, dealing with cotton yarn, Mr. Hill makes three classes, those not exceeding No. 40 to pay 7½ per cent; between No. 40 and No. 80 to pay 10 per cent; and exceeding No. 80, 15 per cent; an average of 10.8 per cent. The classification under the pending bill (par. 255) is more detailed, but the average below No. 40 is the same as Mr. Hill provides— 7½ per cent—while the Underwood average is 15.8 per cent, exactly 5 per cent higher than Mr. Hill's average of 10.8 per

This comparison hardly bears out the charge of our Republican friends that this bill favors the South by granting comparatively high rates on the coarse goods produced in that section, for the Underwood bill gives the coarse grades the same protection as Mr. Hill's substitute, while on the fine grades produced in New England Mr. Underwood is far more liberal than New England's protectionist champion.

This difference partly disappears in twisted and cable-laid yarns, which are given 5 per cent additional by Mr. Hill; but even with this addition the highest duty imposed by Mr. Hill on yarns is 20 per cent, while the finer yarns under the Underwood bill go to 20 per cent, 22½ per cent, and even 25 per cent. Mr. Hill fails also to impose a differential for yarns "combed, bleached, dyed, mercerized, or colored," which are given an

additional 21 per cent in the pending bill (par. 255). Here again the interests of New England are better taken care of by the Democrats than by their New England friend, Mr. Hill.

In paragraph 4 Mr. Hill provides for spool thread of cotton

at the same rate as the single yarn from which they are made. The average is 10.8 per cent, which compares unfavorably from the New England standpoint with the 15 per cent provided by Mr. Underwood (par. 256).

COTTON CLOTH,

Coming to cotton cloth, we find the Hill substitute providing three classes, based on weight, with 5 per cent, 10 per cent, and 15 per cent rates, an average of 10 per cent. In the Underwood bill (par. 257) there are eight classes, running from 71 per cent to 27½ per cent, with an average of 17.8 per cent. might be claimed that the coarser products are favored by a minimum of 71 per cent in the Underwood bill, as compared with the 5 per cent provided in the Hill substitute, we find the finer New England goods enjoying a distinct advantage over the Hill bill as soon as No. 20 is reached, while all over No. 49 enjoy greater protection than the finest plain cloth under the Hill substitute. The southern argument is effectually disposed of when we realize that the coarser fabrics are not imported into this country to any appreciable extent.

WEIGHT AND THREAD COUNT.

And here again we find the Senator from Rhode Island differing from the gentleman from Connecticut in his idea of the proper system. The protectionist Senator insists that "thread count" is the only proper method, while the protectionist Congressman classifies cotton cloths by weight, and

makes only three classes. The Democratic bill adopts the plan fixed by Mr. Hill for classifying thread and then carries along the same distinction of fineness of thread by adding 21 per cent for the single process of weaving and 21 per cent extra for fancy weaving (par. 257).

Cotton cloth of fancy weave and fancy patterns is given a flat rate by Mr. Hill of 20 per cent (par. 6), while the Underwood bill (par. 257) gives from 10 per cent to 30 per cent, according to fineness of yarn, an average of 20.3 per cent, with a differential favoring New England's finer product.

COTTON TABLE DAMASK.

In paragraph 7 also the Hill substitute grants a special rate of 25 per cent on cotton table damask and on manufactures of which cotton table damask is the component of chief value. The Underwood bill adopts the same classification and precisely the same rate (par. 268).

Cotton table damask is one of the horrible examples selected by the Senator from Rhode Island [Mr. Lippitt] to hold up before the Senate as a target for his assaults. He says that this class of goods is singled out and placed by itself for the benefit of the South, a selfish preference imposed by the dominant southern majority for their own advantage. And he says further that the rate is too low. Both his statements are flatly contradicted by Mr. Hill, of Connecticut, who makes precisely the same classification and grants precisely the same rate, 25 per cent. Can it be possible that the Connecticut Congressman was in league with these unprincipled gentlemen from the South?

OTHER COUNTABLE CLOTHS.

It is also asserted by the Senator from Rhode Island [Mr. LIPPITT] that cotton table damask is the only "countable cotton cloth" which is given a special flat rate. But flat rates are given to cloths composed of cotton and silk of which cotton is the component material of chief value (par. 259); also to cotton cloths filled or coated and waterproof cloths (par. 259); also to handkerchiefs hemmed and handkerchiefs unhemmed (par. 260); also to curtains and table covers (par. 263), underwear (par. 266), and ready-made clothing (par. 261)

COTTON AND SILK GOODS.

Cloths composed of cotton and silk, of which cotton is the component material of chief value, carry a graded duty averaging 22.8 per cent in the Hill substitute (par. 8). Under the pending bill they carry a flat rate of 30 per cent (par. 259).

Cotton cloths, filled or coated, including oilcloth, and waterproof cloths are given rates of 20 per cent by Mr. Hill (par. 9) and of 25 per cent by Mr. Underwood (par. 259).

COTTON HANDKERCHIEFS.

Under paragraph 10 of the Hill bill cotton handkerchiefs are given 5 per cent additional over gray cloths, an average of 22.8 per cent. Under paragraph 260 of the pending measure handkerchiefs not hemmed are placed at 25 per cent; hemmed or hemstitched, 30 per cent.

PLUSHES AND VELVETS.

Plushes, velvets, velveteens, corduroys, and pile fabrics, uncut, are given a rate of 15 per cent by Mr. Hill (par. 11); cut goods of this character are given 40 per cent. The Underwood bill provides 40 per cent for goods of this nature, cut or uncut (par. 262).

OTHER ITEMS.

And so we may go through the rest of the Hill substitute, comparing the rates with the Underwood bill and getting similar results:

	Hi	IL.	Under	rwood.
	Para- graph.	Per cent.	Para- graph.	Per cent.
Curtains, table covers, etc.	12	40	263	35
Cotton reps, Jacquard tapestries, and up- holstery goods	12	40	263	35
frames	13	20	264	20
Stockings. full-fashioned	14	{ 50 60	265	30 and 50
Underwear, etc. Men's and boys' gloves Tire fabric Bone casings, garters, etc. Spindle banding, wicking, etc. Belting for machinery, made of cotton and	15 16 17 18 18	33.7 50 25 30 30	266 265 267 267 267 267	30 45 30 30 25
india rubber	18 19 20	20 30 30	267 261 271	15 36 30

The friends of the cotton manufacturers of New England will be immensely relieved to learn that the seal of their good friend Hill was put upon the cotton schedule of the Underwood tariff bill precisely one year in advance. They might, however, prefer that the fact should not be so widely advertised so far in advance of the passage of the bill.

IDENTICAL RATES.

We have seen that in the six important paragraphs which include the staples-cotton card laps, cotton table damask, cheap stockings, bone casings, garters and suspenders, ready-made clothing, and the basket clause-the rates under the Hill substitute and the Underwood bill are identical. With this agreement in the staples, we should not expect much variation in the other rates, and so it proves.

SOME HILL RATES HIGHER.

The paragraphs which include cotton waste, curtains, table covers, gloves, lamp wicks, shoe lacings, labels, and beltings are at a rate less by just 5 per cent in the Underwood bill than in the Hill bill. Jacquard woven fabrics are 4.7 per cent less and expensive stockings 15 per cent less than in the Hill bill. OTHER HILL RATES LESS.

Cotton yarns; spool thread; cotton cloth, fancy woven and fancy colored; oilcloth and waterproof cloth; handkerchiefs; underwear; and tire fabric are placed at a higher rate by Mr. Underwood than by Mr. Hill by from 0.3 to 5 per cent. Cloth made of cotton and silk is 7.2 per cent higher, plain cotton cloth is 7.5 per cent higher, and plushes and velvets are 12.5 per cent higher in the Underwood bill than in the Hill substitute.

UNDERWOOD RATES AVERAGE HIGHER, Summarizing, we find 6 rates in the 2 bills identical, 7 rates higher in the Hill bill by an average of 6.4 per cent, and 10 rates higher in the Underwood bill by an average of 5.5 per cent. The net result is that the average rate in the Underwood bill is actually higher than in the Hill substitute. AD VALOREM RATES REFLECT DIFFERENCES.

The Senator from Rhode Island was courteously charitable toward the "lawyers" who composed the Senate subcommittee dealing with the cotton schedule; he admitted their fairness, but he doubted the accuracy of their information. But even an expert like the accomplished Senator could not tell the labor cost of the very fabrics he used for samples nor did he hazard an estimate of what the tariff on such elaborate goods should be. He merely showed that they cost more to make than the plain cloth. We must assume, therefore, that they sell for a much greater price than plain goods and the ad valorem duty is proportionately higher. This is one great advantage of the ad valorem system. Schedules embracing an infinite variety of goods divide naturally into general groups, and the smallest variations in manufacturing cost are reflected in the resulting

duty, based upon a certain percentage of value.

It is interesting to note that the "lawyers" of this subcommittee agree much better with Mr. Hill, of Connecticut, than does the expert Senator from Rhode Island.

Would it be discourteous to suggest that a statesman of the protectionist school expresses very different views when he is criticizing an opponent and when constructing a schedule for himself?

HILL RATES NOT REVOLUTIONARY.

Congressman Hill, of Connecticut, was defeated in the catastrophe which swept so many protectionists out of office in New England last November. Sitting at his breakfast table last Thursday morning he must have smiled when he read in his morning paper that his good friend from Rhode Island [Mr. Lippitt] had characterized the cotton schedule in the Underwood bill as "revolutionary." And his amusement was bound to increase when he reflected that these "revolutionary" items were practically identical with those of the substitute drawn by himself just one year ago.

INDORSEMENT BY MR. HILL.

Our New England protectionist friends will be further comforted to know that this substitute offered by Mr. Hill, of Connecticut, carrying a somewhat smaller rate than the cotton schedule of the Underwood bill, came on for a vote in the House on August 2, 1912, and it commanded the support, among others, of such stalwart protectionists as Payne, of New York; Mann, of Illinois; Hill, of Connecticut; Gardner, of Massachusetts; Roberts, of Massachusetts; Longworth, of Ohio; Mondell, of Wyoming; and Sulloway, of New Hampshire.

In the face of this bill, put forward by a protectionist, based

upon a report from a tariff board appointed by a protectionist President, supported by the leading protectionists of the House, how can our friends on the Republican side profess anxiety for the cotton industry of New England?

It is rumored that the New England banks are calling loans from the cotton manufacturers of New England, seeking to give

the impression that they fear the results under the cotton schedule of the pending bill. Now that we know that the pending bill gives as much protection as was asked by ultra-protectionists just one year ago, we may judge what the motives of

these New England bankers are.

In view of the facts now in our possession, I should not be surprised if some of the Progressive Republicans from the great West should insist that the rates in the Underwood cotton schedule are too high. Personally I believe that some of them are too high, and that experience will prove them to be so; but with a downward revision entailing a direct cut of 35.5 per cent, I believe we have fulfilled our promise of a material reduction and have approached as closely to a revenue basis as we safely may upon present information. We have made substantial reductions, and if we should cut deeper we might run the risk of injuring the cotton industry of New England.

Mr. GALLINGER. Mr. President, I have listened with interest and surprise to my Democratic colleague, who gravely tells the Senate that he is commissioned to speak for New England on the question of tariff duties. I did not interrupt my colleague to call his attention to various statements he made to which I take open and unqualified exception, and which at

the proper time will be presented to the Senate.

So far as New Hampshire is concerned, the tariff question has seldom been made a square issue in our politics, but it is safe to say that in view of my colleague's declarations to-day it will not be overlooked in the future, the result of which will, in my opinion, amply demonstrate that New Hampshire repudiates my colleague's free-trade views and his astounding attack upon the cotton-manufacturing industry of New England. It will be found, when the contest comes, that New Hampshire is not in favor of legislating for foreign nations as against our own interests, but stands firmly and unflinchingly for the wellestablished Republican doctrine of ample protection to the products of American farms, American mills, and American

The PRESIDING OFFICER (Mr. ROBINSON in the chair). The pending question is on the amendment offered by the Senator from Iowa [Mr. KENYON] to paragraph 145.

Mr. LA FOLLETTE. Mr. President, I suggest the absence

of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names

	CHARLE SALESSES !		
Ashurst Bacon Borah Brandegee Bryan Burton Chilton Cummins Dillingham Fall Gallinger Hollis Jackson	Jones Kenyon Kern La Follette Lea Lewis McLean Martin, Va. Martine, N. J. Nelson O'Gorman Oliver Overman Owen	Page Perkins Pittman Ransdell Reed Robinson Saulsbury Shafroth Sheppard Sherman Shively Simmons Smith, Ariz.	Smith, Mich, Smith, S. C. Smoot Stone Sutherland Swanson Thomas Thompson Tillman Walsh Williams

Mr. SHEPPARD. My colleague [Mr. Culberson] is unavoidably absent. He is paired with the Senator from Delaware [Mr. DU PONT]. I will let this announcement stand for the day.

Mr. BRYAN. The senior Senator from Florida [Mr. Fletcher] is absent on business of the Senate. He is paired with the junior Senator from Wyoming [Mr. WARREN]. I make this announcement for the day.

Mr. RANSDELL. I desire to announce that my colleague

[Mr. Thornton] is absent on business of the Senate.

Mr. ASHURST. I have been requested to announce that the Senator from Mississippi [Mr. Vardaman] is absent on business of the Senate.

Mr. LEWIS. I desire to announce the absence of the Senator from Kentucky [Mr. JAMES] from the Chamber, caused by official business.

VICE PRESIDENT. Fifty-three Senators have answered to their names. There is a quorum present. The question is on the amendment offered by the Senator from Iowa [Mr. KENYON] to paragraph 145.
Mr. KENYON. Mr. President, I should like to inquire if the

amendment which I have proposed is at the desk?

The VICE PRESIDENT. The Secretary will state the amendment proposed by the Senator from Iowa.

Mr. KENYON. I want to see if the amendment is in har-

mony with the one I hold in my hand.

The Secretary. In paragraph 145, page 42, line 20, after the word "value," it is proposed to strike out "25 per cent ad valorem" and to insert "shall be exempt from duty."

Mr. KENYON. Mr. President, that is not exactly the amendment that I desire to offer. I propose to offer an amendment to

paragraph 145, and I ask that it go over until the committee amendments are passed upon. There will be some amendments which we shall return to, and I should like to have this passed over until that time.

The VICE PRESIDENT. The amendment as now proposed

by the Senator from Iowa will be stated.

The Secretary. On page 42, line 15, beginning with the word "aluminum," strike out all down to the word "barium," on line 18, and insert:

That aluminum, aluminum scrap, aluminum in plates, sheets, bars, strips, and rods, shall be admitted to this country free of duty.

Mr. STONE, Mr. President, the Chair has several times correctly ruled, I think, that committee amendments shall be first disposed of with a view of perfecting the different paragraphs as we go along. If the Senator from Iowa desires to pass this over for the time being, I have no objection.

Mr. KENYON. The committee amendments have been passed

over in two paragraphs.

Mr. STONE. But the Senator can call up his amendment at any time.

Mr. KENYON. I should like to do that. Mr. OLIVER. Mr. President, I should like to ask the Senator from Iowa when he expects action on this matter. I should like to be here when this question is taken up for action, and I have made arrangements to be away for at least a week. I would not like the subject to be disposed of in my absence. I had expected it to be taken up to-day.

Mr. KENYON. I will say to the Senator from Pennsylvania that it will not be taken up in his absence. I will notify him at least a day in advance, if that is satisfactory.

Mr. OLIVER. If that is satisfactory to the Senator, it will be satisfactory to me.

Mr. STONE. I did not understand what the Senator from

Iowa said.

Mr. KENYON. I said I would not ask to take the matter up in the absence of the Senator from Pennsylvania [Mr. OLIVER], and that I would notify him a day in advance of it being taken

Mr. STONE. Mr. President, I am disposed to accommodate both Senators so far as possible.

Mr. KENYON. The Senator from Pennsylvania says he will

be away for a week.

Mr. OLIVER. I will state, Mr. President, that I have been waiting until the metal schedule-

Mr. STONE. When does the Senator from Pennsylvania expect to go away?

Mr. OLIVER. I expect to go away to-night. Mr. STONE. To be gone a week?

Mr. OLIVER. To be gone a week.

Mr. SUTHERLAND. The Senator will probably be back in

Mr. KENYON. Will there be a vote on this matter before a week, does the Senator from Missouri think? Mr. President, if it can go over without inconvenience, I should like to have it do so. If it can not, we may go on with it now.

All I feel at liberty to say is-

Mr. CUMMINS rose.

STONE. Does the senior Senator from Iowa wish to speak?

Mr. CUMMINS. I was about to suggest, Mr. President, that whenever it is convenient to the Senate and whenever the proper time has come, I intend to offer a substitute for the metal schedule. I desire to consider the paragraph relating to aluminum, and I should like very much to make such observations as I have to make upon that paragraph before I vote upon the amendment offered by my colleague [Mr. KENYON].

Mr. STONE. Mr. President, would it be satisfactory to all Senators if the committee in charge of the bill should state that we will proceed with the paragraphs that have been passed over, following the one now being spoken of, and dispose of them so far as we can? There are, however, some of those that I understand will have to be passed over until to-morrow at least; the point I have in mind being that when we have, so far as we can to-day, completed the paragraphs, the senior Senator from Iowa [Mr. Cummins] will offer his substitute.

Mr. CUMMINS. Originally I suggested that, at the conclusion of the consideration of this schedule paragraph by paragraph, I would offer my substitute; but I hold myself, of course, largely at the pleasure of the Senator from Missouri. I want to do the thing that will speed the bill, for I desire, as I am sure the Senator does, an early disposition of the whole matter. I am ready to offer my substitute, and I am ready to submit to the Senate my argument for it; but I will do whatever the Senator from Missouri thinks best.

Mr. STONE. May I ask the Senator from Iowa if he is willing to offer his substitute now?

Mr. CUMMINS. I am.

Mr. STONE. Very well. Mr. BRANDEGEE. Mr. President, will the Senator from Missouri allow me to ask him how could the substitute proposed by the Senator from Iowa [Mr. CUMMINS] be voted upon until the different paragraphs of the schedule have been acted upon so as to perfect this schedule? In other words, the other day. when a colloquy occurred about this matter, as I remember, it was stated that a substitute for the schedule could not be voted upon until the schedule itself had been perfected. If certain paragraphs are to be left in abeyance, I wondered how we could vote upon the substitute now? If the substitute were adopted. it would preclude going back to the paragraph in dispute.

Mr. STONE. Mr. President, we are wasting time. I will agree, for the time being, to pass the paragraph in which the junior Senator from Iowa [Mr. KENYON] is concerned and to go on with the others and dispose of them so far as we can to-day. I think it will not take long. The Senator from Utah [Mr. SUTHERLAND] has an amendment pending to paragraph 155.

Mr. SUTHERLAND. Yes.

Mr. STONE. We can dispose of that and perhaps of some others. Then there will be only one or two paragraphs to be considered after that, so far as the Senate bill is concerned. Then the Senator from Iowa [Mr. CUMMINS] can to-day propose his substitute, and we can proceed with that. As to the amendment offered by the junior Senator from Iowa [Mr. KENYON] to the aluminum paragraph, I am a little embarrassed in reaching an agreement because of what the Senator from Pennsylvania [Mr. OLIVER] has said, that he wished to be present when it is considered and that he will be absent for a week. I myself am not disposed to postpone the consideration of the matter for a week.

Mr. BRANDEGEE. Mr. President, let me ask the Senator from Missouri whether it is his intention, for instance, to take up paragraph 163 to-day, which, if I am correctly informed, was passed over upon the suggestion of the senior Senator from Massachusetts [Mr. Lodge], who does not seem to be here to-day?

Mr. STONE. I can say as to that that I heard from the Senator from Massachusetts this morning requesting that the paragraph in which he was concerned might be passed over until to-morrow morning, and that he would be here to-morrow morn-

ing. I feel that I can consent to that.

Mr. SMOOT. Mr. President, so that the Senator from Missouri may be informed as to paragraph 155, I will say that the junior Senator from Idaho [Mr. BRADY], who is now with a committee taking the dead body of the late Senator Johnston. of Alabama, to his home, told me that he desired to speak upon this paragraph. I really do not know how soon he will return, though I think perhaps to-morrow. Does the Senator from Missouri think that we had better pass on that paragraph under those conditions?

Mr. STONE. Well, the Senator from Utah understands the difficulty of the situation.

Mr. SMOOT. I do.

Mr. STONE. First one Senator and then another asks to pass matters over, while the committee is anxious to press them to some conclusion.

Mr. SMOOT. Of course, Mr. President, I do not want to insist, but the junior Senator from Idaho [Mr. BRADY] told me that he was going to speak upon that subject. He is now away from the city by appointment of the Senate, and I thought perhaps that it would be just as well to let the paragraph go over.

Mr. SIMMONS. Permit me to ask the Senator from Utah if

the Senator from Idaho will not be back to-morrow? Mr. SMOOT. I think he will.

Mr. SIMMONS. Then we could go on with the discussion on the substitute offered by the Senator from Iowa [Mr. Cum-We will probably not finish that to-day. MINS].

Mr. SMOOT. That is what I thought.

I think we had better proceed with the bill Mr. STONE. and dispose of it so far as we can.

Mr. GALLINGER. I rise to say that I deeply sympathize with the Senator from Missouri in his desire to make progress. It is unfortunate that so many Senators find it their duty to absent themselves and to ask for delay. I think the Senator from Missouri is exercising a great deal of forbearance and good nature, and I do hope that, so far as possible, Senators will permit the paragraphs to be considered as they are reached.

As to the paragraph concerning aluminum or aluminium, it will not delay anything if it goes over for a week, for the reason that we will be here a week from to-day and two or three Senators are deeply interested in that paragraph. Personally, I

should be very glad to have it considered to-day; but if the Senator from Pennsylvania [Mr. OLIVER] is to be gone a week, I believe we ought to agree to let that go over and proceed with the other paragraphs and, if possible, other schedules of the bill.

Mr. STONE. Well, we will see what we can do.

Mr. GALLINGER. I am somewhat fearful, the way things are going, that there will not be any time to consider currency legislation this summer.

Mr. STONE. Oh, yes; we will have an abundance of time

for that.

Mr. OLIVER. If the Senator will allow me, I will ask the Senator from Iowa [Mr. KENYON], in order to expedite the orderly disposition of the schedules, if it would be satisfactory to him for the Senate to go right along and allow him to offer his amendment after the bill shall have been reported to the

Mr. KENYON. I would prefer, I think, to have my amendment voted on when the bill is being considered as in Committee

of the Whole.

Mr. OLIVER. I am extremely anxious to be here when it is acted upon; but if the Senator from Iowa desires the paragraph to go over, I do not like to interfere in the matter. I am ready to act now, but I want to be here when it is passed

Mr. STONE. Mr. President, for the present I will ask that the amendment of the junior Senator from Iowa [Mr. Kenyon] may be passed over with the paragraph, the committee amendments having been already agreed to, and I will ask the Secretary to read the next paragraph passed over.

The VICE PRESIDENT. Paragraph 145 will go over with the amendment of the Senator from Iowa [Mr. Kenyon]

pending.

Mr. STONE. Paragraph 143 has not been acted upon. was passed over on Saturday with the understanding that it would be taken up to-day. It was passed over originally at the request of the senior Senator from Pennsylvania [Mr. Pen-ROSE]; but, Mr. President, we can not continue to pass over these paragraphs indefinitely. Is there any reason why we should not now dispose of paragraph 143?

Mr. OLIVER. I did not hear the Senator.

Mr. STONE. I am speaking of paragraph 143. Mr. GALLINGER. That is the paragraph relating to umbrella and parasol ribs, and so forth.

Mr. OLIVER. My colleague [Mr. Penrose] asked that that paragraph be passed over. I expected him here this morning.

Mr. STONE. I have not heard anything from the senior Senator from Pennsylvania on the subject. We passed it over on Saturday with the understanding that it would be taken up to-day.

Mr. OLIVER. Mr. President, I would suggest that the paragraph be acted on, with the understanding that if my colleague comes back and insists upon it he can take up with the committee the matter of reconsidering it.

Mr. STONE. Very well. He can take it up with the com-

mittee or with the Senate.

Mr. OLIVER. There is no committee amendment pending to the paragraph.

Mr. STONE. Well, that paragraph may be considered as disposed of.

Mr. CUMMINS. Mr. President, the paragraphs concerning which no amendments have been offered require, as I understand, no action by the Senate at all, and no action has been taken on any of them.

Mr. STONE. I think they do require a kind of pro forma action. They are read and are agreed to, unless there are amendments offered to them.

Mr. CUMMINS. I understood the Chair on a former date to announce a contrary rule. Parliamentarily the law does not recognize a paragraph; it recognizes only the bill. reading the bill, and as amendments are reached they are voted upon; otherwise no action of the Senate at all is taken.

Mr. STONE. Mr. President, paragraph 143 was passed over

at the request of the Senator from Pennsylvania.

Mr. CUMMINS. I know that.

And now I am asking that it be tentatively, at Mr. STONE. least in a pro forma way, disposed of, and that we may proceed.

Mr. GALLINGER. It is disposed of. Mr. STONE. Mr. President, paragraph 153 is the next one after the aluminum paragraph, and to that paragraph the junior Senator from Iowa [Mr. Kenyon] has offered an amendment. Paragraph 153 was passed over at the request of the Senator from Massachusetts [Mr. Lodge], and likewise paragraph 163 and paragraph 169. Those three paragraphs, without objection, will be passed over by the request of the com-

mittee until to-morrow morning, when, the Senator from Massachusetts sends word, he will be here and desires to be heard upon them before they are acted upon. That will leave paragraph 154 and paragraph 155, and I think we might now take up those and dispose of them.

The VICE PRESIDENT. The Secretary will state the amend-

ment to paragraph 154.

The Secretary. In paragraph 154, page 44, line 25, it is proposed to strike out "\frac{1}{2}" and in lieu thereof to insert "\frac{3}{4}," so as to read:

154. Lead-bearing ores of all kinds containing more than 3 per cent of lead, three-fourths cent per pound on the lead contained therein.

Mr. SUTHERLAND. Mr. President, I move to amend the committee amendment by striking out "three-fourths cent" and inserting "11 cents," so that it will read "11 cents per pound on the lead contained therein."

Mr. BORAH. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Idaho?

Mr. SUTHERLAND. I do.

Mr. BORAH. I certainly do not desire to delay this bill; but in-view of the statement of the Senator from Utah [Mr. Smoot] I feel that I ought to say that, if it be convenient, this paragraph ought to go over. My colleague [Mr. Brady] is away on business of the Senate, and I am told that he is prepared to address the Senate on the subject; so I have felt that I ought at least to bring the matter to the attention of the Senator who has the schedule in charge.

Mr. STONE. Mr. President, of course the junior Senator from Idaho [Mr. Brady] being absent by appointment on the committee attending the funeral of the late Senator Johnston, should not feel disposed to press the matter to the extent of disposing of it finally until he can be heard to-morrow morning. I am quite sure that he will return by to-morrow morning; but the Senator from Utah [Mr. SUTHERLAND], if agreeable to him, might proceed with his amendment, and whatever is to be said about it might as well be said now as later.

Mr. SUTHERLAND. I am quite willing to do as the Senator from Missouri desires about that. I wish to occupy the atten-

tion of the Senate for only a few minutes.

Mr. STONE. What is the pleasure of the Senator? What does he wish done? Mr. SUTHERLAND. I have no choice in the matter. I am

willing to go ahead.

Mr. STONE. Then let us proceed now.

Mr. SUTHERLAND. Mr. President, I have not the slightest hope of changing the mind of any member of the committee or any Senator upon the other side of the Chamber. I think it is pretty well understood that this bill is going to be passed by the votes of the majority in the form in which it is now before the Senate. But the particular article embraced within this section of the schedule is one in which the people of my own State, as well as the people of the various Rocky Mountain States, are vitally interested. While, as I say, I have no hope that anything I may say will result in a change in the schedule, I still feel it my duty to present, very briefly, some facts bearing upon the question.

Under the McKinley bill the duty upon the lead content of lead-bearing ores was 11 cents per pound. Under the Wilson bill that was reduced to three-quarters of a cent per pound. The Dingley bill restored the original rate of 11 cents per pound, and that rate was carried forward by the Payne-Aldrich bill, so that that is the amount of duty which is now imposed

upon this article.

I know from personal observation and experience the effect of the reduction of the duty on lead under the Wilson bill, and I know that the result was disastrous to the industry in the entire West. Prior to the passage of the Wilson bill the lead-mining industry of my own State was in a fairly satisfactory condition. I think something like 2,500 or 3,000 miners were employed in the lead-producing mines of the State, and of course that meant the support of four or five times that number of people. The farmers of the State were benefited by that condition.

Mr. GALLINGER. What was the rate of duty at that time? Mr. SUTHERLAND. The rate of duty at that time was 11 cents per pound. The farmers of the State were interested in the matter, because in the camps where lead is mined there are, of course, no farms. The valleys near the mining camps depend upon the market furnished by the mines for the sale of

their products.

After the Wilson bill was adopted the price of lead immediately declined; and the result was that at least one-half of all the lead-producing mines of the State closed down. more than that closed down, but at least one-half did so. result, of course, was to throw out of employment half of the miners. The result of that was to take away from the farmers the market which before had been afforded by these miners and those dependent upon them. The mines which had been in operation of course deteriorated while they were closed. Some of them were flooded with water; the timbers rotted and deteriorated; various openings in the mines caved in; so that when the mines were reopened it required a vast expenditure of money to put them in working condition again.

What happened in Utah happened in the other States of the West. My State is now the third State in the Union in the point of production of lead. The State of Missouri comes first, the State of Idaho comes second, and the State of Utah third

in the matter of production.

There is one very essential and important difference between the lead mines of Missouri and the lead mines of the Rocky Mountain region, in that in the mines of the far West—the Rocky Mountain region-lead is associated with the precious metals. All of the lead-bearing ores in Utah, in Idaho, and in Colorado carry a certain percentage of silver and of gold. So whenever the mines of that region are closed down you have not only curtailed the production of lead in the United States, but you have likewise curtailed the production of gold and

silver, and very appreciably curtailed it.

The matter of lead mining, I think, illustrates the benefits of the protective system as well as any article embraced within the whole list. During the years 1853 to 1862, a 10-year period, the production of lead in the United States was 188,600 tons. The consumption in the United States was 422,359 tons. So we produced during those years less than one-half of our consumption, namely, 44.5 per cent. The average price of lead in New York during that period of time was 6.13 cents per pound. The average London price during the same period was 4.93 cents

per pound.

During the next decennial period, 1863 to 1872, the production in the United States increased slightly while the consumption increased materially; so that the ratio of production to consumption in the United States fell from 44 per cent to 36 per cent and the price of lead rose from 6.13 cents to 6.49 cents per pound. It would seem to be clear that what brought that about was the relatively decreased production in the United States

was the relatively decreased production in the United States as compared with the consumption. The London price during the same period was 4.31 cents per pound.

In the period between 1883 and 1892, during which time there was a substantial duty upon lead, the production in the United States rose to 1,505,042 tons. In other words, it increased from the production during the first period I have mentioned, 188,600 tons, to 1,505,042 tons. We consumed during that decennial period 1,538,994 tons. So that the ratio of production in the United States rose to 97.7 per cent of our consumption, and the price fell in the United States to 4.24 cents per pound, the London price during the corresponding period being 2.74 cents per pound.

Between 1893 and 1902, during a portion of which time the Wilson law was in operation, and therefore during which time the duty was three-fourths of a cent per pound, while during the other portion, under the Dingley law, the duty was 11 cents per pound, we produced 2,175,357 tons, the ratio of production as compared with the consumption being 95.6 per cent.

From 1903 to 1912, the last decennial period, the production of lead in the United States was 3,459,473 tons and the consumption 3,525,420 tons. During that period we produced 98.2 per cent of all the lead we consumed. The average New York price during the period was 4.6 cents, while the London price

during the same period was 3.22 cents.

I call attention to these figures for the purpose of showing that under the protective policy which has been in operation at the substantial rate of 1½ cents per pound with the exception of three or four years when the Wilson bill was in force the production of lead in the United States has steadily increased until we are producing the vast quantity of nearly 3,500,000 tons for the 10-year period; and instead of considerably less than one-half of what we consume we are producing nearly all we consume, while the price has gone down from 6.13 cents per pound to 4.6 cents per pound.

If the rate proposed by this bill goes into operation, I have not the slightest doubt that the same result will follow that followed before, namely, that many of the mines will be closed. Nobody can predict what proportion, but many of them will be closed. I say that because, as I shall show in a moment, it is utterly impossible for the mines of the Rocky Mountain section to produce lead and compete in price with the product of Mexico, Canada, Spain, or the other lead-producing countries.

I call attention to a table which is made up from the experience of the State board of equalization of the State of per day.

Utah which shows the cost of producing lead in that State. Under the laws of that State the net proceeds of all mines are taxed, so that it is necessary that the board of equalization, which has control of the subject matter, shall ascertain what are the net proceeds. Based upon this official ascertainment the net cost per pound of lead produced in that State is a trifle

over 4 cents—approximately 4 cents—per pound.

That cost is made up in this way: First, the wages of men and salaries of superintendents, foremen, and so forth, at mines and mills aggregate, per pound of lead produced, 2.6 cents; taxes and miscellaneous expenses, 0.3 of 1 cent; fuel, timber, supplies, and so forth, 0.8 of 1 cent; freight and sampling ores and concentrates, 0.7 of 1 cent; smelting, 2.7 cents; freight on bullion and refining, 1 cent; redemption of original investment for development and equipment, 0.5 of 1 cent. The total of these percentages is 8.6 cents. So that, if we had to consider the lead alone, every pound of lead produced in the State of Utah would cost, to produce it, 8.6 cents per pound.

As I have already stated, however, all of the lead-bearing ores in that State carry associated with them silver and gold; and when we credit the amount of gold and silver which runs with each pound of lead it amounts to 4.6 cents. Without allowing any part of the cost to the production of the gold and silver, that brings down the cost of the lead, as I stated, to 4

cents per pound.

I think it is utterly impossible in that State to produce lead at a less price per pound than that; and I think what is true of that State is true of the other States of the Rocky Mountain region. I am speaking of the producing mines. There are more nonproducing mines in every State than there are those which produce. I suppose that of the mines which are in actual operation in every one of the Rocky Mountain States to-day three of them are being worked at a loss where one of them is being worked at a profit. This computation includes only those which are being worked at a profit, and leaves entirely out of consideration the nonproducing properties.

I have a statement here with reference to that subject:

An analysis of the reports made to the State Board of Equalization of Utah shows that out of 141 gold-silver-lead mines 12 of them realized net proceeds, because their output was essentially precious metals; 18 mines had net proceeds derived from the combination of gold, silver, and lead, and the remaining 111 mines had no net proceeds at all.

When we come to the countries which are producing lead in competition with us, the situation is altogether different. Our greatest competitor has been Mexico. I think it is quite true that for a little while during the disturbed conditions in Mexico our mines may be able to run along, because, while the conditions in Mexico continue as they are now, the production of lead in Mexico will be very much curtailed. But the moment peace is restored, the moment normal conditions return to the Republic of Mexico and the mines resume their normal operations, then at once Mexico becomes an important competitor, and the most important competitor, as it has been in the past.

Now, I wish to call attention to the conditions under which lead is produced in that Republic. In central Mexico an ordinary miner gets 37½ cents to 50 cents per day, except in some of the larger camps. That statement is taken from an article entitled "Efficiency of Mexican labor," printed in the Engineering and Mining Journal for October, 1908. That means 37½ to

50 cents in gold, not in Mexican money.

From the report of Vice Consul C. M. Leonard, of Chihuahua, of date February 3, 1911, on Mexican mining labor, I take this

statement:

The following wages per day of 10 hours are paid in one of the largest mining camps in Mexico, 20 miles from Chihuahua, the wages being reduced to United States currency: Miners, \$1: carmen, 75 cents to \$1: * * * timbermen, \$1.50; * * * top laborers, 75 cents. * * * * The above wages apply practically to all mines in the northern tier of States, but decrease somewhat as one goes south.

From another article appearing in the Transactions of the American Institute of Mining Engineers, November, 1901, I take the statement of Mr. James W. Malcolmson, which is as follows:

Labor for the mines is fairly abundant. The Sierra Mojada miner earns usually \$1.50 Mexican, or \$0.75 United States currency, per day. He is industrious and intelligent, and will mine and timber in the heaviest ground with skill and confidence.

From the report of Consul Albert W. Brickend, jr., to the Department of Commerce and Labor, March 13, 1911, I take the following:

The thickly settled districts adjacent to Comitan and San Cristobal supply all the hands necessary in the agricultural sections, as well as the mining laborers, at a daily wage of 50 cents to \$1 (Mexican) per day.

Which would be 25 cents to 50 cents United States money

Mr. BORAH. Mr. President-

Mr. SUTHERLAND. I will yield in a moment. So it is seen that the wages paid to the Mexican miners in Mexico range from 25 cents a day up to \$1, the highest that are paid, while in the State of Utah the miners are paid from \$3 to \$3.50 per day, and I think in Idaho the wages are that much, if not more. I yield to the Senator from Idaho.

Mr. BORAH. I was simply going to ask the Senator to give in connection with the wages in Mexico the wages in Utah and

Idaho, which he has done.

Mr. SUTHERLAND. The wages in Utah and Idaho are from

\$3 to \$3.50 per day.

Mr. President, as it seems to me, if this lead-mining industry is worth preserving at all, it is a monstrous proposition to ask the people of this country, who pay their miners \$3 to \$3.50 per day, to compete with a country where the miners are paid from 25 cents to \$1 a day. It simply means that if that is attempted to be done these mines must close to a very large degree. the mines that are producing ore of exceedingly high grade, or where the associated precious metals are in large quantity, can possibly afford to operate. The low-grade lead mines, the mines which produce ores that carry only a small quantity of silver or lead, must inevitably close, with all the results that follow from that, directly and indirectly.

I shall call attention very briefly to the question of associated metals. Before I come to that, however, I wish to speak of the condition in Canada, where the production of lead has been increasing during the last few years. In Canada the miners are paid substantially the same that miners are paid in this country. I think there is very little difference. To the extent that there is a difference the wages are higher in this country than they are there. But Canada pays a bounty for every pound of lead which is produced. Upon that subject I read from the article contributed by C. E. Siebenthal, on the subject of lead and smelter products in the Mineral Resources of the United States in

the issue of 1911, in which he says:

The bounty paid by the Dominion of Canada to lead producers amounts to 75 cents per hundred pounds lead content of Canadian ore delivered to Canadian smelters, when the London price of lead does not exceed £14 10s. per long ton (3.15 cents per pound). With increase in the price of lead the bounty decreases at the same ratio, ceasing altogether when lead is about £18 per long ton (3.91 cents per pound). The result of the bounty is to maintain to the producers a steady value for lead, under the present arrangement, of £18 per long ton.

There has been appropriated for the payment of that bounty in Canada during the last few years, I think, nearly \$2,000,000.

The same writer continues:

The following figures, submitted to the meeting of the Western Branch of the Canadian Mining Institute, show the amounts paid during several periods to July 1, 1911, and the balance unexpended at that date of the \$2,500,000 originally voted by the Dominion House of Commons for the payment of bounty on lead mined in Canada:

Expenditure under Canadian lead-bounty act.

\$700, 390, 04 274, 447, 50

That would be a little less than a year-Paid during fiscal year ended Mar. 31, 1910_____

343, 099, 08 which would be the full 12 months-

_ 1, 746, 595. 00 Total amount paid as bounty on lead ___

Or, as I said in the beginning, nearly \$2,000,000. That is the way in which the lead mining industry in Canada is encouraged. The amount of bounty paid by the Canadian Government for the production of every pound of lead is as great as the amount of duty which is proposed by this bill.

I am not advised as to what the amount of duty imposed by

the Canadian laws upon the importation of lead is, but whatever that may be, it must be added to this bounty to arrive at the

aggregate protection which that industry receives.

So we find upon our northern border a country which produces in competition with us a great quantity of lead, and which is put on more favorable terms of competition with us by the payment of a bounty for every pound of lead produced; and we find upon the southern border our greatest competitor, a country where the wages paid are so little in comparison with our own as to make competition on anything like equal terms an absolute impossibility.

Mr. President, I call attention to the fact that the gold pro-

duction of the world has evidently reached its high point in the matter of production. Certainly it has reached its high point

thousand dollars; in 1911 it was ninety-six million and some odd thousand dollars; and in 1912 it was reduced to \$91,685,168.

I have already called attention to the fact that a very large production of these lead-bearing ores carry associated with them gold. Anything that we may do to discourage the production of lead, of course, still further discourages the production of gold. I think no one will disagree with me when I say. that it is exceedingly important to this country to produce all the gold it can. It is the basic money not only of our own country, but practically of the entire world.

Out of the \$91,000,000 produced in 1912, as shown by the smelter returns, 22 per cent came from lead ores, which would make out of the \$91,000,000 twenty million and some odd dollars for that year. Of course, I do not mean to say that to curtail the production of lead in the United States would result in cutting down our production of gold \$20,000,000 per annum, but I do mean to say that it would cut it down to a very large extent.

I venture to state that under the Wilson Act, where the duty was three-fourths of a cent a pound, at least one-third of the gold and silver in value came from those mines which were forced to close down. I mean one-third of the 22 per cent, not of the entire production. So if we should have the same result under this law, in addition to cutting our lead supply it would result in cutting off more than \$6,000,000 per annum from our production of gold and \$6,000,000 from our production of silver.

Of course, there can be no monopoly in this industry. Miners are going out all over the country prospecting, discovering lands which carry lead ores and ores carrying the other metals, and as long as that condition of affairs exists it is an utter impossibility that there should be any monopoly of it.

The men engaged in this industry are receiving a meager

return upon the investment which they have made.

Now, there is one other feature of this subject to which I wish to call attention, and then I will be through. It is said that this is a revenue bill; that the prime object of it is the production of revenue. When you cut down the duty upon the lead contents of ores one-half, of course to produce the same amount of revenue you must double your importations.

It is estimated that under the pending bill this duty will produce \$60,000 per annum upon lead ores, \$400,000 per annum upon bullion, lead in pigs, and so forth, and \$1,250 upon lead in sheets, and so forth. If that estimate is correct, then the entire revenue which would be produced from the importation of lead in all conditions will be \$461.250. But under the Dingley Act and the Payne-Aldrich Act, which carries the same rate of duty, namely, 11 cents a pound, the average duties paid during the last 10 years have been \$734,000. So you will not only succeed by this reduction in delivering a staggering blow to this great and important industry, but you will receive far less revenue than has been received under the 11 cents a pound duty and less than would be received if that duty were continued. It is the difference between \$734,000 per annum, produced under the existing law, and \$461,250, which is estimated will be produced under the proposed bill.

Mr. President, I have said all that I have to say upon this subject, and I conclude as I began by saying that I have not the slightest hope that I have made any impression upon my friends on the other side. But I thought I owed it to the people of my own State who are to be vitally affected by this reduc-tion and to the people of the West to say this much.

Mr. THOMAS. Mr. President, I have not, up to this time, taken a very prominent part in the discussion of the various paragraphs of this measure and perhaps I should not at the present time do so; I would not do so but for the fact that of all the various industries which are covered by the pending measure, this paragraph and paragraphs 155 and 164 affect the only industries in which I have personally the slightest interest. Having that interest I have not voted and I do not propose to vote upon this particular paragraph; but believing, as I do, that: no duty whatever is necessary either for the protection and promotion or for the existence of this industry, and that the duty which the bill provides is at best a revenue measure, whether it be for a great or a small amount, I have determined to call attention to a few facts which, in my judgment, lead to that conclusion.

I wish to say at the outset that the closing of the mines of the Rocky Mountain region in the early nineties was not due to the lowering of the tariff upon lead or to any legislative measure other than the act which repealed the purchasing clause of the Sherman law. If my memory serves me rightly, in the United States. Since the year 1909 the production of gold has been steadily decreasing. We produced during the year 1909 nearly \$100,000,000 of gold in the United States—\$99,763,400. In 1910 that fell to ninety-six million and some odd the States adjoining mine, were closed down. That was caused by the sudden drop in the price of silver from 90 cents to about 60 cents, in consequence of which the various smelters were too much alarmed about existing and future conditions to invest

money in the purchase of argentiferous ores.

So I may say that, although there may be some exceptions, all the lead-producing mines of the Rocky Mountain region, and particularly those in the State which I in part represent here, are mines which are worked for their other metallic contents, the lead being in the nature of a by-product, or wherever they are worked for lead as a principal product, the existence of byproducts, such as silver and gold, makes it possible to work them at a profit.

I may say also at this juncture that lead ores are an essential to the reduction of the gold and silver ores, particularly when they are refractory, silver ores perhaps more generally than gold, and that without lead ores as a flux, their treatment would be largely curtailed, if not diminished practically to zero.

These mines did not resume work immediately after the crushing blow which was delivered to the silver industry in 1893, but they gradually opened up here and there, until in the course of time practically all of them which produced sufficient, either directly or as a by-product of other metals, to make it an object for them to do so. Of course a great many other mines, so called, were being operated in the hope of profit, which sometimes was and sometimes was not disappointed.

Now, there was not as much lead produced from argentiferous ores during the existence and operation of the Wilson Act as before or since that time. But it is a fact, Mr. President, that the average annual production of lead in this country continued uninterruptedly during the operation of that law, as shown by

the statistics of the Government.

I call attention to page 162 of the tariff hearings, which give the production under all the acts of the United States imposing a tariff upon lead either in pigs and bars or in ores, or both, beginning with the act of March 3, 1883, and ending with the year 1912. From the statistics it appears that during the operation of the Wilson Act for the three years 1895, 1896, and 1897, 170,000, 188,000, and 211,000 tons, respectively, were produced, the two last figures being an amount in excess of any year of lead production under the operation of the McKinley law.

Mr. BORAH. Mr. President—
The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Idaho?

Mr. THOMAS. Certainly.
Mr. BORAH. What is the price of silver at the present time as compared with silver during the years in which the Wilson

Act was operative?

Mr. THOMAS. The price of silver at the present time and the price of silver at the time covered by the Senator's question I can not give with accuracy. The present price is somewhere in the neighborhood of 60 cents an ounce, and my impression is that it was below that price during the pendency of the Wilson Act: but as to that I am not certain.

Now, Mr. President, prior to the

Mr. SMOOT. Before the Senator leaves that point will he yield to me?

Mr. THOMAS. Certainly.

Mr. SMOOT. I may have misunderstood the Senator, but I thought I heard him say that he did not believe any duty was

required upon lead.

Mr. THOMAS. Yes; I so stated; that is, not for the purpose of protection.

Mr. SMOOT. Well, for any purpose?

Mr. THOMAS. Oh, well, I believe in a revenue tariff myself, and upon that basis I think the tariff upon lead is proper.

Mr. SMOOT. This is what I wish to invite the Senator's attention to in that connection: We will take for the year 1910 the London price of lead, which was \$2.83. The Senator knows that when all smelters in our part of the country pay the miner or the producer of lead for the lead contained in his ore they

give him the New York price less \$1.50.

Mr. THOMAS. No; I do not know that. I know that they use the New York price as a basis of their contracts, but they do not give him the New York price by any means. The Senator

knows that.

Mr. SMOOT. The Senator may have misunderstood me. said that they paid him the New York price on the day of settlement less 1½ cents a pound.

Mr. THOMAS. No.

Mr. SMOOT. That is what they pay us in Utah.

Mr. THOMAS. The mode of settlement is probably universal,

because there is virtually only one purchaser.

Mr. SMOOT. What does the Senator say it is?

Mr. THOMAS. I say that the New York price is used as a basis of settlement. A miner gets so much a unit based upon the number of units in his ore, his total consideration being very much less than the New York price.

Mr. SMOOT. Mr. President, I know what the ore sold for in all the smelters of Utah, and we have some of the largest there are in the United States. They pay us the New York price on the day of settlement and deduct 1½ cents a pound from it. That is how the statements are made there; and if it be the case that the New York price was the same as the London price, with free lead, namely, \$2.83 a hundred pounds, and deducting \$1.50 a hundred from that, it would be \$1.33 a hundred pounds. The Senator certainly knows that such a price as that would close all of the lead-producing mines in the intermountain country.

Mr. THOMAS. Mr. President, the Senator from Utah and I certainly can not agree upon the price which is paid to the miner, the owner of the ore, for the lead contents in that ore, assuming the statement which he has made to be his under-

standing of the matter.

I call attention in that connection to the fact that the difference between the New York and the London prices for 1910, 1911, and 1912 varied from \$1.64 to 59 cents, which, to my mind, would of itself indicate that the American Smelting & Refining Co., which is the only purchaser of these ores, would certainly not pursue so absurd a method as that for the purpose of set-

tling with those who produce the ores which they must have.

Mr. SMOOT. Mr. President, when the present law was under consideration the question that I have just spoken of was discussed in this Chamber, and there was some doubt expressed as to whether the producer of lead was paid 11/2 cents less a pound than the New York quotations. I immediately telegraphed home to at least a dozen of the different mining companies in Utah and had them send me the statement sheets on which they receive their pay for the ore there. Every one of them was given the price of lead as quoted in New York on the day of settlement, with 11 cents deducted therefrom, the smelters claiming that they had to pay freight upon the lead to New York, that that was where all the lead had to go, and therefore the producer in the western country was taxed $1\frac{1}{2}$ cents upon all the lead contained in the ore.

Mr. THOMAS. Mr. President, I am aware of the fact that the smelter which buys the lead ores of the miner always makes a deduction for what is called the "freight rate to New York," notwithstanding the fact that a very large proportion of the ore never gets any farther east than the Mississippi River. going to refer in another connection to that; but, owing to the Senator's inquiry, I will refer now to a letter which I received some time ago from a man who has spent his life in the business of purchasing and treating ores. I will not use his name, because he does not desire me to do so, but he is a man who is thoroughly competent to judge of matters of this sort. By way of digression, I will read an extract from that letter. He says:

of digression, I will read an extract from that letter. He says:

You know and I snow that \$25 to \$30 a ton for the freight, smelting, refining, and metallurgical losses on lead and zinc ores would afford an ample and legitimate profit on a legitimate capitalization, but with lead from \$4.25 up to \$6 per hundred, and with zinc from \$5.25 to \$7.50 per hundred, the lead and zinc manufacturers or smelters and refineries demand and receive from the producer (more particularly in Colorado, where they receive a lower price for these metals than in any other metal-producing State) a margin of profit ranging from \$40 to \$100 per ton on spelter and lead in order that they may pay dividends on the water or excess capitalization. This is very simple and susceptible of proof. They, of course, will tell you that they buy their lead, based on lead quotations in New York of \$4, and buy their zinc on the St. Louis or New York quotation of \$5, but they will only allow a price of 12 cents to 2 cents per pound on this \$4 and \$5 basis, and 1 cent per unit or per cent for each advance of 5 cents per hundred, thus absorbing four-fifths of the advance and the same pro rata on the zinc. Do you understand this, and is it clear to you?

He also says:

To boll the lead and zinc situation down to a more concrete proposition: If the buyers can be forced to accept even a large profit, they can afford to pay the producer a profitable price even if there is no tariff.

Mr. President, the lead in silver-bearing ores was admitted free of duty to this country up to the time of the enactment of the McKinley law. Those ores were a very desirable importation, because they were needed for the fluxing or treating of ores carrying other metals. It stands to reason that whatever will reduce the cost of smelting will increase the range of low-grade ores which can be worked commercially. In proportion as the material entering into the matter of smelting or reduction becomes abundant and cheap, just in that proportion, industries being normal, will the cost of the treatment of ores fall, and just in proportion as they fall will the area of the market for low-grade ores be increased.

I mention that because, while it is an acknowledged fact, one of the laws of commercial development in all industries, the interesting fact is that in 1802 I was employed by those who for a number of years have had control of the American Smelting & Mining Co. to make that argument before the Senate Finance Committee here in Washington, the idea and the purpose then being to secure a removal of these duties upon argentiferous lead-bearing ores to the end that the area of law-producing ores, or low-grade ores, as we call them, could be extended in this country. While I have not the statistics, my recollection is that the lead-mining industry prospered just as much as, if not more greatly, prior to the enactment of the McKinley law than it has prospered since that time.

Mr. President, if it be true that the mines in the Rocky Mountain region are largely worked with lead as a by-product, then it must necessarily follow that any change in tariff regula-

tions will only incidentally, if at all, affect that industry.

The Senator from Utah read statistics some moments age in support of the proposition-and I do not question their authority-that it costs something over 8 cents a pound to produce ore in the State of Utah, and he premised his statement with the assertion that the statistics to which he referred were those of profitable mines, yet, with lead selling at \$4 or \$5 or \$6 per hundred, it is, of course, a self-evident fact that, if lead costs 8 cents a pound to produce, it could only be produced at a loss, all of which means that it is not the lead that is the basis of the operation of mining, but that it is the fact that since these ores contain other metals, the miner can afford to operate his mines and to develop them without reference, perhaps, to the question of the extent to which the cost of the production of lead may go.

Mr. SUTHERLAND. Mr. President—
The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Utah?

Mr. THOMAS. I do.

Mr. SUTHERLAND. Mr. President, the Senator from Colorado has probably just stated what I intended to call his attention to, namely, that it was only possible to produce lead at a cost of 4 cents a pound when you credit against the cost of producing it the value of these metals.

Mr. THOMAS. I understood the Senator's argument, and I am not questioning his facts. I am simply calling attention to a condition that is bound to go on, whether or not you reduce the tariff upon the lead in ores, and, in my judgment, if the Sena-tor's conclusions are correct, it ought to reduce the price of smelting the ores which contain the gold and silver in such small quantities as at present to be below the point of being

commercially profitable.

Another reason, Mr. President, for my contention that the change in the duty upon the lead in ores and upon the lead itself is not going to produce the consequences which are so gloomily prophesied here is that such contentions and predictions were made away back, I think, in 1890, when the duty was removed from copper and copper ore. We were then told by those interested in the industry that protection was an absolute essential to their existence in the United States, and that with the removal of the duty the mines producing copper would be closed, that the raw material of the copper manufacturers would be furnished by the mines of foreign countries, and that ultimately they would be absolutely at the mercy of those

Mr. SUTHERLAND. Mr. President, will the Senator permit

me to interrupt him?

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Utah?

Mr. THOMAS. Certainly.

Mr. SUTHERLAND. The Senator from Colorado, I think, will remember that in 1890 and for some years after that the price of copper was around about 6, 7, or 8 cents a pound, because there was then no such great demand for it as there now is. Now, the uses of copper have been so multiplied and the demand is so great that the price is around 12 or 13 or 14 cents, and has been as high as 17 and 18 cents a pound.

Mr. THOMAS. Why, Mr. President, there is always an explanation for the miscarriage of a prophecy. Something unforeseen occurs somewhere, perhaps a chain of circumstances; a demand which I concede has been abnormal, perhaps, in the copper industry has caused its development, notwithstanding the absence of a duty. I think it was Grattan who said, can not argue with a prophet; you can only disbelieve him." I think I am justified in saying—at least I have quite as much basis for my assertion-that something somewhere will take place in the lead industry after the passage of this bill that will continue it and perhaps make it more profitable than before; and I hope it will, so that my friend, the Senator from Utah,

may on some future occasion be able to explain why his prediction of the effect of this measure upon his industry was not what he sincerely, in the good year of our Lord 1913, supposed it would be.

Mr. President, I propose to take very little time in a discussion of the question of labor cost. Of course, no argument which opposes the reduction of tariff duties is complete without calling attention to the disparity between wages paid in the United States and wages paid in other countries. The Senator has adverted to the low wage rate in the lead mines of Mexico. and the conclusion is that if brought into direct and deadly competition with such wages, as contrasted and compared with the wages paid in this country, ruin, as the result of the loss of profit, must necessarily attend the operation of mines producing lead in this country.

My experience has been somewhat limited in the matter of wages, not alone in this but in a great many other industries, and, perhaps, in all of them; but, so far as it goes, it teaches me that a 20-cent laborer will always bring forth a 20-cent product, and that a half-starved and ill-fed laborer will prove in the end far more expensive than a well-fed and well-paid laborer. The history of mining is a demonstration, Mr. President, of the

truth of that fact.

It is true that the per diem wage in Mexico is relatively small, but the labor cost is enormous. When mining engineers calculate upon the question of profit or loss of a given mine in Mexico, the factor of labor, the kind of labor, is of the very greatest importance. If Mexican labor is to be used the labor cost per ton is very much higher, as I think the consensus of the engineering world will demonstrate, than if the labor is to be white, and particularly if that white labor is American.

I have here some figures upon that subject, given me by an engineer of good standing in the United States, who tells me that he took them from Hoover's Cost of Mining. He says:

Hon. C. S. Thomas, United States Senate, Washington, D. C.

DEAR SIR: The following is some data regarding the labor cost for mining a ton of ore under similar mining conditions but different classes of labor:

		Numbe	r men en	ployed.	Tons	Labor cost per ton.	Average wage per day,
Mines.	Tons mined.	Na- tives.	Whites.	Super- intend- ents, white.	per man per an- num.		
4 Kolar, India, mines. 6 Australian mines 3 South African mines 5 United States mines	963,950 1,027,718 2,962,640 1,089,500	13,611 113,560	1,534 1,524	302	69.3 669.9 195.5 713.0	\$3.85 2.47 2.68 1.92	\$0,20 3,00 2,48 3,50

¹ Two-fifths Kaffirs, three-fifths Chinamen.

Then this gentleman says:

You will notice from this that the American labor brings the highest price per day, but that the labor cost per ton is the lowest of any of these. The highest labor cost per ton is the cheapest labor, namely, the Indian.

Mr. President, another fact is that there is no danger that the wage rate will fall in the mines of this country-that is, in the mines of the West and the section where I live-because they are kept up by the men themselves and not by any protection whatsoever. Silver has no protection; its birthright has been taken away; it has been outlawed, degraded among the metals of the world; but the wages of a silver miner, like the wages of a gold miner or of a lead miner or of a zinc miner or of a copper miner, which is unprotected, is practically the same, all because of the organization of the men themselves, who demand and receive good pay and who give the very best and therefore the cheapest consideration for it.

Mr. SMOOT. Mr. President-The VICE PRESIDENT. Do

Does the Senator from Colorado yield to the Senator from Utah?

Mr. THOMAS. I yield.

Mr. SMOOT. Mr. President, I was quite surprised at the statement made by the Senator that the cost per ton to produce lead in Mexico is greater than the cost per ton to produce it in the United States.

Mr. THOMAS. Of course it is; that is, where it is produced

by native labor.

Mr. SMOOT. Well, Mr. President, I thought I had with me the report from the former Department of Commerce and Labor, showing the comparison in lead mining, but I have not. How-ever, I have such a comparison in reference to zinc, and the same statement that applies to zinc applies to lead. The Department of Commerce and Labor reports, Mr. President, that out of 11 companies producing zinc ore in Mexican mines-

² Including board.

and I can give the Senator the names of the companies, if he

Mr. THOMAS. I do not desire them. Mr. SMOOT. The total cost of producing zinc ore is \$13.97 a ton, while taking nine of the producing mines of the United States in the Joplin district the cost of producing one ton of ore-and I can give the names and places, if the Senator wants them—the average cost of producing ore in the nine mines in the Joplin district-for mining cost, transportation to railroads, and freight to Kansas and Oklahoma smelters-is \$39.61 per ton, as compared with \$13.97 per ton in Mexico.

Mr. THOMAS. Mr. President, all the statistics in the world

will fail to establish the opposite of the proposition that the well-paid man is the productive man; the well-fed man is the productive man. The peon, who lives upon nothing and who receives nothing, gives nothing in return.

Mr. SMOOT. Mr. President, no one disputes the fact that the well-fed man is the productive man; there is no question about that; but when one man is paid only about one-seventh or oneeighth of what another man is paid and will produce even onefourth of what the well-fed man produces, the ultimate unit of cost will be only one-half of what it will be on the product

produced by the well-fed man.

Mr. THOMAS. Mr. President, now that we are on the subject of zinc, let me call attention to another thing by way of It was not until 1908 that any duty at all was digression. placed upon zinc ore, and yet the disparity to which the Senator calls my attention must have been quite as apparent then as now. The industry throve; it was profitable, just as it has been profitable since, and just as it will continue to be profitable.

But, Mr. President, my real purpose in rising was to call attention to the fact that what the lead-mine owner of the West needs protection from is not the production of foreign countries; he needs protection from the American Smelting & Refining Co., the only customer he has for his ores, the concern to which the ores must be sold if they are sold at all, and which therefore pays, generally speaking, what it must pay in order to obtain the ore, giving a small bonus by way of profit for the sake of keeping the mines going, and themselves reaping an enormous and stupendous profit upon \$100,000,000 of so-called capital.

Mr. BORAH. Mr. President-

Does the Senator from Colorado The VICE PRESIDENT. yield to the Senator from Idaho?

Mr. THOMAS. I yield.

Mr. BORAH. I agree with the Senator that the protection which the lead producers of this country need is against the combination or trust to which the Senator has referred; but never since I have been in Congress, in six years, have I come in contact with those people except when they were advocating

free lead.

Mr. THOMAS. Mr. President, I referred to the fact that I came in contact with some of them at one time when they were advocating free lead in ores; but I recall very distinctly that in the month of March, 1908, when the then senior Senator from my State visited the city of Denver for the purpose of mending his fences and securing a square, straight, flat-footed Taft Republican delegation from Colorado he submitted himself to an interview in the Denver Post, in which he declared that Democratic success menaced the lead and zinc industry, inasmuch as Democratic success meant tariff reduction, and that tariff reduction upon lead and zinc would practically encompass the disastrous consequences so eloquently depicted just now by the Senator from Utah. If, therefore, they stand for free lead, one of their conspicuous stockholders, at one time, and, perhaps at a critical time, certainly failed to voice the desires, the objects, and the wishes of his associates, but advocated the contrary

doctrine with all his might.

Mr. BORAH. Mr. President, I did not understand to whom
the Senator referred when he said "the then senior Senator

from Colorado."

Mr. THOMAS. I referred to former Senator Guggenheim. I

think I have here a copy of his interview.

Mr. BORAH. I do not know what his interview was in public, but I know that when he was here in the Senate he was the least concerned of all the western Senators in maintaining a lead duty

Mr. THOMAS. That may be, but I have no doubt, Mr. President, of the fact that the same things prevail in lead with the American Smelting & Refining Co. that prevail in aluminum, a condition which was so eloquently and, to my mind, convincingly depicted here last Saturday by the junior Senator from Iowa [Mr. KENYON].

Mr. SMOOT. I should like to ask the Senator if when he was asked by the American Smelting and Refining Co. as an

attorney to advocate free lead ore it was not a fact that that smelting company at that particular time had purchased lead mines in Mexico and was interested perhaps more heavily in

Mexico than it was in the United States?

Mr. THOMAS. Oh, those gentlemen had silver-bearing or

argentiferous lead-bearing ores in Mexico.

Mr. SMOOT. And lead mines.
Mr. THOMAS. And they also had a number of smelters down there. There is no doubt about that. In other words, their interest then was somewhat different from what it is now, although they were also interested heavily in the United States. They were something like the Ohio constituent of a Representative in Congress of whom I heard some time ago. He was a great tariff-for-revenue man as to everything except wool, and he kept in constant communication with his Representative, urging him, whatever else might occur, to see to it that the duty was kept upon wool. About the time the bill was to be voted upon the Representative received a dispatch from his friend which rend, "Have sold my sheep; act according to the dictates of your conscience." Those gentlemen were at that time, Mr. President, engaged on both sides of the line; but does this question depend upon the interest of the advocate that it changes in character like the chameleon whenever the interest itself undergoes a change. I assert that an argument is an argument, whether the interest of the person putting it forward is one thing or another. We are none of us consistent, perhaps; I know that my own somewhat inglorious career is full of inconsistencies; but we can borrow from the instances of history and light our lamps by the experiences of the past in judging of the effect and operation of a given policy in the future.

I shall detain the Senate only a very short time longer. My own opinion is, though I can not prove it-those things are difficult of proof in the absence of judicial investigation—that this huge concern practically dominates the lead industry of the world. I know that on December 18, 1908, in a report that was made by the American Smelting & Refining Co. at that time, its president said:

As regards the lead-smelting business of the American Smelting & Refining Co., fully 90 per cent of all the lead ores of the United States and in the Republic of Mexico are now controlled by ownership of mines and by long-time contracts. These ores are either controlled by the American Smelting & Refining Co. or by its present competitors. And I wish to state further that the earnings of the smelting company at the present time, as well as of the securities company, are considerably in excess of the dividends that are being paid.

And he might have added with perfect truth that every plant the company has could be duplicated for less than 50 per cent of the capitalization of the concern.

By way of digression for a moment I will answer the question of the Senator from Idaho [Mr. Boxar] by giving him the figures that have been kindly furnished me by the Senator from North Carolina [Mr. SIMMONS] with reference to the price per ounce of silver.

In 1892 the price was 87.8 cents; in 1893, 78 cents; in 1894, 63.4 cents—I suppose these are average prices—in 1895, 65.5 cents; in 1896, 71 cents; in 1897, 60 cents; in 1898, 59 cents; in 1899, 59 cents. Of course, it has gone lower than that, and at

present it is perhaps a little above 59.

This company is very fortunately circumstanced, in that it not only buys from the producer but it sells to the consumer, practically controlling the market in both directions. fore, in my judgment, it is able to fix the market price, or, at least, largely to control the market price, as its interests may direct. This is apparent from the nature of its more recent contracts.

Nearly all contracts between men for the delivery of goods contain at least two essential elements, one of which is the time of delivery and the other is the contract price. But these gentlemen in their sales of lead leave both of these elements

to be determined in the future.

I read an extract from their contracts on this subject:

Delivery—for shipment from the West within 30 days, or as soon thereafter as possible.

Under the caption of "Price" appears the following:

The price to be that of the American Smelting & Refining Co. on date of shipment, or, in some cases:

"The price to be that of the American Smelting & Refining Co. on date of delivery."

The settlements for the lead with the man who produces the ore from the ground, and who must sell to this concern or not sell at all, are made upon the basis of the New York quotation on the date of settlement, which, of course, is subject to such manipulations as are within the power of any huge aggregation that virtually controls a business.

I think the Senator from Idaho will bear me out in the statement that perhaps 75 to 80 per cent of the lead mines of his State are controlled, directly or indirectly, by this concern. At least, that is my information, and I have no doubt it is true. The remaining 20 or 25 per cent, perhaps, belong to gentlemen who believe, and honestly believe, that they will be in danger unless the duty is kept at the present rate.

Mr. BORAH. Mr. President, I believe that a percentage of the lead mines in Idaho are controlled as the Senator from Colorado states. I am not informed as to the exact percentage.

But some, in my opinion, are.

Mr. THOMAS. It is the policy of the concern to take within its many constituent companies, by virtue of its control of the market for the product, the ownership of the mines themselves. I am not in favor of giving even a revenue duty, to any greater extent than is absolutely necessary for the welfare of the Government, to any concern that monopolizes a great necessity of life such as lead is, entering into nearly all of the necessary manufactured articles with which we come in contact day by day in our course through life.

Mr. SMOOT. Mr. President, that may be the case in Idaho and in Colorado and some of the other Western States; but I do not know of a single mine in my State in which the American

Smelting & Refining Co. owns a dollar of interest. Mr. BORAH. Mr. President, as the Senator is discussing matters in which my State seems to be named, I wish he would

speak a little louder.

Mr. SMOOT. I say, I do not know as to whether the American Smelting & Refining Co. owns a direct interest in the mines in Colorado or in Idaho, but I do know that they do not own any direct interest in the mines in my State.

Mr. BORAH. Mr. President, I did not state that they owned a direct interest. I do not know that they do. I said they controlled some of the mines in my State to some extent.

Mr. THOMAS. Ninety per cent in the State of Idaho.
Mr. SMOOT. I understood the Senator to state that they
owned controlling interests in the mines.

Mr. THOMAS. Yes; either directly or through some of their

constituent companies.

Mr. SMOOT. That is what I understood the Senator to say. I want to say that while that may be the case in Colorado or in Idaho, I know it is not the case in the State of Utah. I know that the United States Smelter Co. owns a direct interest in one of the largest mines in the State; but the American Smelting & Refining Co. does not, nor is its policy to own any interest in the mines

Mr. THOMAS. Mr. President, the State of Utah is one of the greatest, and to me one of the most attractive, States in the

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Kansas?

Mr. THOMAS. I do. Mr. BRISTOW. If it will not disturb the Senator, I should

like to make an inquiry.

I see that the imports of lead-bearing ores for 1912 were very much less than those for 1910, and also that the imports for 1910 were very much less than those for 1905. Does the Senator know why there has been a gradual decrease in the importa-

Mr. THOMAS. I think it is due to the political conditions in Mexico.

Mr. BRISTOW. Did they start back before 1910 to such an extent as to have an effect on the importations?

Mr. THOMAS. Before 1910? I am unable, Mr. President, to explain the drop from 14,000,000 pounds in 1905 to 6,000,000 pounds in 1910, although I think it is largely to be ascribed to

Mr. BRISTOW. If the Senator will observe the figures, it appears that there was also a drop in the domestic production from 1905 to 1910.

Mr. THOMAS. Yes; I have observed that as well. Mr. BRISTOW. I was just interested in the fact.

Mr. THOMAS. And I may say that I think the production of lead, for natural reasons, is limited in the United States, and is becoming more so.

I was about to take my seat when interrupted by the Senator from Utah. Let me say, as I started to say, that the State of Utah is one of the greatest, and I hope one of the most prosperous, States in the Union. I am delighted to know that the owners of lead mines in that State have not yet fallen within the clutches of the American Smelting & Refining Co. It may be that they never will. My prediction is, however, that whenever the company wants their property, when it becomes essential to the carrying out of its affairs and its purposes and its plans, and it proposes to take it over, it will do so, just as it has done and just as it has the power to do elsewhere. But the

fact remains that it is the great, dominating, influential factor in the lead industry of this continent, and is constantly becoming more and more so. It is levying its tribute upon this necessity of life largely through the existence of a tariff, which of course finds expression in the added cost to the consumer of this vast multitude of articles so essential to our civilization and into which lead enters as a constituent element.

Mr. BRISTOW. Mr. President-The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Kansas?

Mr. THOMAS. Certainly.

Mr. BRISTOW. I think the views of the Senator from Colorado and my own views in regard to the desire to control a monopoly of any product are very much the same. What I fear is that the effort to control a monopoly through a tariff bill will be utterly ineffective and that there is danger of doing more harm than good.

I am just as much against the monopolizing of any of our great commodities as anybody could be, and I shall do anything I can to prevent it. But it seems to me that when we undertake to control or to regulate a monopoly through tariff legislation we are undertaking to control it in a way that will

be utterly ineffective.

Mr. THOMAS. Mr. President, I am not going to enter into any discussion of the trust question. I largely agree with the Senator from Kansas. My belief is, however, that this is a step in the right direction. If I understand the policy to which the Democratic Party is committed, and which the people expect it to perform, it is that we shall through a revision of the tariff downward, and very much downward, through currency legislation, and through trust legislation together, curb and control these huge aggregations, and by that means give relief to the public from their exactions, for these three great policies are parts of a composite whole, the accomplishment of the object requiring legislation upon each and every one of them.

Mr. BRISTOW rose.

Mr. STONE. Mr. President, I beg Senators not to start a somewhat endless discussion of the trust question.
Mr. THOMAS. The Senator need not fear, I am sure. So

far as I am concerned, I was going to yield the floor, but I certainly must extend to the Senator from Kansas the courtesy of

an answer to his question.

Mr. BRISTOW. I should like to say to the Senator that I do not intend to enter upon an elaborate discussion of the trust question, but when the advocates of this tariff bill allege as one of its merits that it is going to break up trusts and cure the evils that grow out of great industrial combinations, as an opponent of the bill I think I have a perfect right to suggest that I think the position taken is erroneous, that you can not break up a trust by undertaking to regulate it through tariff legisla-

If the Democratic Party, which is now responsible for the legislation of Congress, had manifested a greater desire to break up trusts than I think it has, by taking hold of the trust question in a manner that promised to accomplish such results, it would have reached those results much quicker than by taking the roundabout and ineffective and indirect way of tinkering with the tariff or the currency.

I think the trust question is bigger and broader than the tariff and currency questions combined. Instead of undertaking to cure by tariff legislation or currency legislation this great, gigantic evil that has forced itself into the modern business affairs of the world, it would have been more effective to have dealt directly with the question of trusts and combinations.

Mr. THOMAS. As the Senator has made a statement instead of asking a question, of course there is nothing for me to reply

to at this time.

Mr. THOMAS subsequently said: Mr. President, I omitted asking the privilege of printing the wage rate in the lead mines of St. Francois County, Mo., as shown in the hearings before the Ways and Means Committee.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Wages paid, coal cost, and price received for lead by a company of St. Francois County, Mo., 1890 to 1908.

Labor (wages per day, Jan. 1).	1890	1891	1892	1893	1894	1895	1898

Mr. BORAH. Mr. President, I shall detain the Senate for only a moment.

I have no doubt that this duty, as reported by the Finance Committee and sustained by the majority, represents the mature judgment of the committee and of the majority, and therefore that there is not likely to be any change in the duty. I am more interested, therefore, in sustaining the duty as it is reported than in trying to get a duty which I do not hope to get. While I do not think the duty as reported is sufficient from my standpoint as to what should constitute a duty. I hope this increase has not been put in here to be lost in conference. I am not permitted to hope for a protective duty, and shall not consume time in asking for that which is, under the circumstances, impossible. The only possible protection here is incidental protection. I am forced to be content, therefore, with the best possible to be had under this bill.

With a view of suggesting to the majority the great necessity of retaining even this much duty and thereby such incidental protection as it gives, I wish to make a suggestion or two.

It has been said by the Senator from Colorado, and very properly, I think, that a man who is paid a small wage will not be so productive in his labor or so efficient as a man who is paid a higher wage. That is true in all the different industries and fields of employment, and it is undoubtedly true with reference to the particular industry we are now discussing. But there is no such disparity between the amount of production upon the part of individual employees as there is between the wages in the respective countries.

The wage in Spain, where they have very large lead mines, is from 75 cents to \$1 and, at the outside, \$1.25 per day. It is more often 75 cents than anything above that figure. The wage in Mexico is from 75 cents to \$1.25. The wage in my State, under an eight-hour law—for we have an eight-hour law in that State—is as follows: Miners, from \$3.50 to \$4 per day; muckers, from \$3 to \$3.50 per day; laborers, from \$3 to \$3.50 per day; timbermen, from \$3.50 to \$4 per day; pump men, \$4; boiler men, \$3.50; engineers, from \$4.50 to \$5 per day; shift bosses, from \$5 to \$6 per day; track and pipe men, from \$3.50 to \$4 per day; blacksmith's helpers, from \$3.50 to \$4 per day; machinists, from \$3.50 to \$5 per day; millmen, from \$3.50 to \$4 per day.

I doubt if there is another mining camp in the world that pays a higher rate of wage than that. In fact, it has been often stated by those familiar with the matter that there is no other

camp where there is paid so high a wage, generally speaking, on an average, as in the Coeur d'Alene mining region.

While undoubtedly the laborer in Mexico can not produce so much, and his labor will not be so effective in production as the laborer in Idaho at this wage for an eight-hour day, yet there is no such difference between the two as is represented by the difference of wage. I have talked to a great many men who have mines in Mexico and with men who have traveled in Spain and have made investigations of conditions there for the specific purpose of informing themselves; and while they recognize the principle stated by the Senator from Colorado, it does not have the effect of balancing the wages between the two countries. A miner in Mexico will not produce less than one-half what the miner in Idaho does, and the same would be true in Spain.

Mr. President, it is true, as the Senator says, that you can not answer a prophecy, and therefore I am not going to indulge in prophecy. But we can reflect a little upon an actual historic fact, namely, that under the Wilson-Gorman bill the mines in my State closed down. Conceding the argument so ingeniously and effectively made by the Senator from Colorado as to the effect of the price of silver upon this matter, yet if we take the price of silver now and the price of silver then we are not aided in arriving at the conclusion that the result will be favorable in this instance. I do not see myself how it will be possible for the mine owner in my State to operate against the mine owner just across the line in Mexico, with that difference of wage, when there is nothing in the ingredients aside from lead which is sufficient to bring up the price to the difference.

So far as the Smelter Trust is concerned, I have no doubt that it has a very large and effective sway in my State. I know it had a few years ago, when I was engaged in the practice of law and knew more about it than I do now. But I have no reason to suppose that with its abundant appetite it has decreased its holdings or decreased its power. There are several independent mines in Idaho, however, one of which is very large. If there is anything that the Smelting Trust desires above all other things it is that only its mines, or those over which it has control, shall be in operation, or that it may bring about such a condition of affairs that it may own and control the balance.

Let us suppose, for the sake of argument, that this change in duty would affect the independent mines; that it would work a hardship upon them by reason of the disparity in wage, and so forth, who would benefit by reason of that fact? No one so much as the trust, because it can close down its mines and close down its operation or its control in the State of Idaho and operate exclusively its smelters in Mexico and its mines in Mexico and do that which the independent mine owner can not do—wait until such conditions are brought about that it can afford again to operate in the State of Idaho.

In other words, if the Smelter Trust owned every mine in my State, and owned and controlled every lead mine in Colorado and Utah and Missouri, I should still be perfectly justified in standing here and insisting that a larger duty be levied, if for no other reason, as a revenue duty. If a monopoly is operating exclusively in this country, there may be a sound argument for removing even a revenue duty, but here is a trust ready to ship here from abroad. I do not see why it should not pay a firm revenue duty for that privilege.

A duty of 1 cent a pound, under the figures we have here with reference to importations, and so forth, would still be a revenue duty, and certainly it would not be to our interest to take off the revenue duty if the Smelter Trust were importing lead from Mexico and Spain. That is precisely the reason why the Smelter Trust, so far as I know, has always been very friendly to the proposition of free lead. It can employ its wage earners in Mexico and Spain at 75 cents and a dollar a day, while it must pay them \$3.50 a day in Idaho. Depend upon it that the Smelter Trust will take the chance of getting the labor out of its 75-cent and \$1 man in preference to paying, say, \$3.50. In addition to that, the freight rate from my State or from Utah to New York is almost twice what it is from Mexcio to New York, by reason of the fact that Mexico has water transportation. So we can not, in this instance, affect the Lead Trust by reducing the duty.

While I do not expect that a protective duty will be placed upon this article in this bill, while I have no right to assume that the majority will yield upon that proposition, I earnestly insist that not only is the duty here a revenue duty, but that a duty of 1 cent a pound would produce more revenue than the one which is levied here.

Therefore, Mr. President, while we have no reason to hope that there will be any increase in the duty, I do hope that this

duty of three-fourths of a cent upon lead has not been placed

here for the purpose of losing it in conference.

Mr. President, I desire to call the attention Mr. SMOOT. of the Senator from Kansas [Mr. Bristow] to the world's production of lead, and also the United States percentage of the world's production, and show that that and the act of placing a duty of three-fourths of a cent a pound in the Wilson bill account for the decrease in the importation of lead ores into this

If the Senator will notice, in 1896, the Wilson bill then being in operation, and the duty of three-fourths of a cent being the same that is provided for in the pending measure, the importations were 43,336,000 pounds. After the passage of the Dingley bill the rate was 1½ cents a pound, and in 1908 the United States produced 310,000 tons; in 1909 they produced 363,000 tons; in 1910 they produced 389,000 tons; in 1911 they produced 405,000 tens. So there was a steadily increasing domestic production. In other words, in 1908 the United States percentage of the world's production was 27 per cent; in 1909 it was 30 per cent; in 1910 it was 31 per cent; and in 1911 it was 33 per cent.

Mr. BRISTOW. If the Senator will observe the figures in the Handbook which we have here, the figures to which I referred were those of the importations for 1905 and 1910. They are given in pounds here. In 1905 our domestic production was 783,000,000 pounds, in round numbers, while five years later, in 1910, according to these figures, it was 708,000,000 pounds, a

decrease of 75,000,000 pounds.

Mr. SMOOT. If the Senator will notice, in 1905 the importation was 14,000,000 pounds. That would be a little over 7,000 tons. In 1910 it was only about 3,000 tons. The total home production is more than that difference between the years named. In other words, in 1910 the domestic production was 389,000 tons, whereas in 1906 it was only 350,000 tons, which is more than the difference in pounds, as shown in the table from which the Senator has read,

Mr. BRISTOW. And what about 1905 and 1910?

Mr. SMOOT. I have not the 1905 table here. I have only the Geological Survey value to 1906. I have not the table between 1893 and 1906. There is one year missing. But I will say to the Senator since the passage of the law of 1909 there has been a gradual increase in the domestic production.

Mr. BRISTOW. These figures indicate to the contrary.

Mr. STONE. Mr. President, the junior Senator from Idaho [Mr. Brady], as has been stated, desires to be heard on the amendment to-morrow morning. He is absent on Senate business, and I do not feel warranted in asking to have the amendment voted upon. He will be here to-morrow, and I ask that it be passed over until to-morrow.

I think, Mr. President, that that will conclude anything we can do with this part of the bill for the present except the paragraphs passed over until to-morrow. If the Senator from Iowa will proceed now with his substitute, we might dispose of it.

Mr. CUMMINS. Is the Senator from Missouri addressing my colleague?

Mr. STONE. No; I am speaking to the senior Senator from

Mr. CUMMINS. I want to be governed largely by the desire of the Senator in charge of this schedule, but inasmuch as there are several paragraphs passed over, I would prefer, I think, if the Senate were now to pass to the next schedule and allow me to present my substitute at a later time. I will not, however, of course, interrupt the progress of the bill by insisting upon that. It would seem to me to be the more logical procedure, and no time would be lost.

Mr. SIMMONS. Except, I will say to the Senator from Iowa, the next schedule is the sugar schedule, and probably we will not be able to take that up on account of the illness of the Senator from Louislana [Mr. RANSDELL]. The next that will provoke any discussion at all is the agricultural schedule. The chairman of the subcommittee having that schedule in charge did not expect it to be taken up to-day. I think if the Senator from Iowa can go on with his argument this evening I would prefer that course. Of course if the Senator wishes time before that is done we might take up the agricultural schedule.

Mr. CUMMINS. Before I turn to the matter, may I ask, so far as my own position is concerned, what is the parliamentary If I were to offer the substitute, which I expect to situation? offer and debate upon it were concluded, could we vote upon it, or is there some intervening amendment that would first have to be disposed of?

The VICE PRESIDENT. The Chair has been uniformly ruling that the committee amendments must first be passed upon.

Mr. STONE. The committee amendments to these paragraphs have been passed upon—
Mr. SIMMONS. Except as to cast-iron pipes.

Mr. STONE. Except as to cast-iron pipes, so far as I recall. There are some independent amendments offered to the paragraphs. The senior Senator from Iowa [Mr. CUMMINS] has one of those, and there is at least the amendment offered by his colleague [Mr. Kenyon]. The Senator expressed a desire that that paragraph should not be acted upon until he had offered his amendment and addressed himself to it.

Mr. CUMMINS. That is true, but what was in my mind, Mr. President, was that when we came to the amendment offered by my colleague I should prefer then to submit my observations upon the entire schedule before the vote is taken. But I do not want, if I can help it, to discuss the schedule and then have the vote upon it delayed for days and days after

I have made my argument.

As it looks to me now, if I were to offer my substitute and say what I have to say upon it, at the conclusion of my argument the vote upon my substitute would necessarily be delayed until all the other amendments, or some of the other amendments, at least, were voted upon; and that might not occur for several days. That would be hardly fair to my amendment,

and I want to avoid that.

I appreciate the fact that the amendment offered by my colleague would have to be voted upon under the parliamentary situation, as I have understood it, before a vote on my substitute, even before the substitute could be offered formally; but I hope to be able to make my argument upon the substitute and then have the amendment offered by my colleague voted upon, and then immediately following that to have a vote on my substitute.

The VICE PRESIDENT. There is also an amendment pend-

ing, offered by the Senator from Utah.

Mr. GALLINGER. And in addition to that, under the rule, any amendment offered from the floor will take precedence of

the motion to substitute.

The VICE PRESIDENT. That has been the ruling of the

Chair, unless the Senate desires to decide otherwise.

Mr. KENYON. Mr. President—

Mr. CUMMINS. I yield to my colleague.

Mr. KENYON. The suggestion of my colleague that the amendment I offered be voted on first, and that then the vote be taken on his substitute raises the question of the presence of the Senator from Pennsylvania.

Mr. SIMMONS. Will the Senator please speak louder?
Mr. KENYON. The time of the vote might be when the Senator from Pennsylvania was absent. Consequently both the substitute of my colleague and my amendment would have to go over until the Senator from Pennsylvania was here. I do not want to be in any position of obstruction at all. If we are going to get into any trouble with the parliamentary situation, I shall be willing to go ahead and have the vote taken on my amendment this afternoon rather than have any embarrassment as to the substitute of my colleague and my amendment.

Mr. SIMMONS. That would not help out the situation if the Chair holds, as I understand the Chair to hold, that the substitute would not be in order until after all pending amendments

had been disposed of.

The VICE PRESIDENT. Now, that has been the ruling of the Chair, but the Chair desires to state to the Senate precisely that they can take that ruling away from the Chair at any time they choose. Senators know that without the Chair stating it. But it has been the invariable ruling that the committee first has the right to perfect a paragraph before other amendments or substitutes are offered. That has been the invariable ruling from the beginning of the consideration of the bill.

Mr. SIMMONS. I think the Chair is entirely right about

The VICE PRESIDENT. If the Senate desires to adopt any other rule, it is immaterial to the Chair. Mr. STONE. I am sure the Senate does not desire to adopt

any other rule. Mr. KENYON. I believe on reflection it would expedite mat-

ters to vote on my amendment this afternoon.

Mr. SIMMONS. Very well.

Mr. KENYON. I am perfectly willing that that shall be I understand that my colleague desires to speak on the question before the vote is taken. Otherwise, I am willing to vote now

Mr. STONE. Mr. President, this shows how unwise it is not to proceed regularly. It creates confusion.

I ask the Senate to take up paragraph 127.

The VICE PRESIDENT. The amendment of the committee in paragraph 127 will be read.

The Secretary. In paragraph 127, page 37, the committee proposes, after the numerals 127, in line 9, to strike out "castiron pipe of every description, 12 per cent ad valorem; castiron" and to insert "Castiron," spelled with a capital C, so as to make the paragraph read:

Cast-iron andirons, plates, stove plates, sadirons, tailor's irons, hatter's irons, and castings and vessels wholly of cast-iron, including all castings of iron or cast-iron plates which have been chiseled, drilled, machined, or otherwise advanced in condition by processes or operations subsequent to the casting process but not made up into articles or finished machine parts; castings of malleable iron not specially provided for in this section; cast hollow ware, coated, glazed, or tinned, 10 nor cent ad valorem 10 per cent ad valorem.

Mr. CLARKE of Arkansas. Mr. President, the effect of the adoption of the proposed amendment is to put cast-iron pipe upon the free list. That product has been largely controlled and distributed by combinations in this country.

The manufacture of this particular product can be carried on in a plant of moderate size. It does not require so large an equipment as is ordinarily employed in the manufacture of other fabrications of iron. Its manufacture is one of the cheapest and least complicated of the processes of iron manufacture.

In the celebrated case of the Addyston Pipe Co. against the United States, reported in the One hundred and seventy-fifth United States Supreme Court Reports, a complete history of the business up to the time that case was decided was put into the record in authentic form, the evidence covering every feature being given under oath, with the right of cross-examination, with the right upon the part of the United States Government as an adversary party to confront the witnesses for the company with others equally familiar with the trade.

The system uncovered in that particular case was that a number of concerns called shops entered into a combination by which a pool was formed. The purpose of it was to destroy competition within a very large area of this country. tem was one where the concern was to be chosen to be the successful bidder which could furnish pipe at the lowest price to the pool. Straw bidding was then arranged by which the contract was to be let to the concern thus selected at an exhorbitant price. The difference between the price at which the pipe was sold to the pool and that received at the competitive letting was the sum divided among the members of the pool.

It might be well to say here that cast-iron pipe is employed in

the distribution of water and gas, and that pure water and better water has become a great issue in the municipalities of the country, and any undue tax upon it is a tax upon the health, convenience, and welfare of the many communities where this necessity exists.

The same may be said in lesser degree in connection with the distribution of gas. I have discovered no reason why anything beyond fair treatment should be extended to this particular industry. Whenever there is to be a supply of pipe purchased it is generally a large one, and usually by large corporations or by municipalities, so that free and actual competition is of the very first importance.

In connection with the pending amendments I want to call attention again to the Addyston Pipe case. This group of companies proceeded against in that case adopted a plan by which they held preliminary to a final bid upon any public contract a letting of their own. The different parties to the combination, letting of their own. after having looked the field over, determined which member would furnish the pipes to the pool at the lowest price. That was what price the bidder received from the pool plus his share of the profits between the price at which he thus furnished the pipe to the pool and the price at which he furnished it to the public as the result of the nominally competitive letting. Straw opposition bids were arranged, to give the public letting the appearance of a bona fide transaction. For instance, the proof in the Addyston Pipe case shows that pipe was furnished at \$14 a ton to the pool and the same pipe was furnished at \$27 a ton to the municipality, and the difference between \$14 and \$27 constituted the profit of the pool, which was divided upon a certain basis among all the parties to it. The parties to this particular combine were all so-called independents. The business was generally at that time carried on by independents.

As I said a while ago, it is not a business that requires a very large plant. The establishments at which it is manufactured are not even called foundries; they are called shops.

It was found as a fact by the court in that case that the pipe could be furnished at that time from the shop at Chattanooga, Tenn., to St. Louis at between \$17 and \$19 a ton at a profit, but the biddings were generally in the neighborhood of \$25 and \$27. Of course that combination was held to be in restraint of trade. As it has been some time since that decision was rendered, it would be unfair now to undertake to say that that is the present condition of the business. But the record in the case is a valuable contribution to the history of the business up to that time, as it disclosed the difficulties which surrounded the distribution and a variety of other things that are important to be known wherever it is necessary to obtain reliable information in order to intelligently do what is right and to know that you are doing so.

There has been some increase in the cost of producing pipe since that time. Pig iron, out of which it is made, has gone up some in price. The labor cost has been increased somewhat. The pipe can now be produced at about \$16 a ton. One of the dealers told me that he could produce it for \$14 a ton.

Mr. SMITH of South Carolina. And furnish it at that price? Mr. CLARKE of Arkansas. He said that they could produce it for that sum. It is sold for whatever they demand for it. Really there is some difficulty about the distribution of it. This is a feature of the industry that can not be justly disposed of by generalizing too broadly. It is more of a railroad or transportation proposition than a manufacturing one in some of its aspects. In transporting it upon the railroads the shippers are charged carload rates; that is, according to the theoretical capacity of the car; but in view of the large spaces required in the larger shapes of pipes, you can not get a carload on a car; that is to say, if the theoretical capacity of a car is 60.000, you can probably get 40,000 pounds of that kind of pipe on it. Yet they are compelled to pay for the 60,000 pounds, that being what is known in railroad phrases as a carload.

Difficulties of that kind are undoubtedly to be encountered. But they are not to be compensated at the expense of the consumer in an increased tariff large enough to make the manufacturer indifferent to the unreasonable classification and charge made by the railroads. That matter ought to be looked into by another branch of the Government with a view of determining whether or not that system of charging for the mere matter of transportation is a fair one.

Under the existing tariff foreign competition is merely negligible. It is not a serious proposition at all. There were about 200 tons of pipe imported into this country last year at an average import value of about \$30 a ton. Being the smaller size pipe, most of it was imported by the shops, as I have been informed, though I have no knowledge of it otherwise. of the dealers told me that the greater part of the importation had been made by the shops themselves because they could pay the Payne-Aldrich tariff on it of about \$5 a ton and sell it to their customers at a profit, because it requires more skill and a different sort of plant to make that particular size of pipe at a profit in this country. I have not at this time the dimensions of the pipe that was imported, but I understand it to be 2inch pipe almost entirely. I will not be responsible for that statement any further than to say that it came to me from what seemed to be a reliable source.

Mr. BRISTOW. Mr. President The VICE PRESIDENT. Does the Senator from Arkansas yield to the Senator from Kansas?

Mr. CLARKE of Arkansas. Very gladiy.

Mr. BRISTOW. I was interested in the statement which the Senator has just made, that the importations were made by the manufacturers themselves.

Mr. CLARKE of Arkansas. Yes, sir.

Mr. BRISTOW. I am in hearty accord with the idea of putting a product that is controlled by a trust on the free list if we can accomplish the desired result of breaking up the trust, but is there any assurance that this combination will not import practically more pipe and continue to keep intact the organization which they now have, and simply make the difference?

Mr. CLARKE of Arkansas. I am not prepared to say that there is a combination at this time. I do not know. I can not state whether or not that is true. I only know what was found in the Addyston Pipe cases, reported in One hundred and sev-

m the Addystolf Appeters of the Addystolf Ap

Mr. CLARKE of Arkansas. Yes, sir. Mr. CUMMINS. I think the Senator from Arkansas is in error, if I understood him correctly, in saying that the present duty is \$3.60.

Mr. CLARKE of Arkansas. Probably I am not correct.

Mr. CUMMINS. The present duty is \$5, one-fourth of a cent pound.

Mr. CLARKE of Arkansas. I think the Senator is right about that. I will make that correction when I come to deal with it. But that does not alter the case very materially. The price of the imported pipe was around \$30 per ton. It was exidently the most expensive kind of pipe that was made; that

is, the 2-inch pipe—the smaller sizes. But it is a fact that the pipe can be made in this country now at a cost of \$15 or \$17 a ton, and that the pipe can not be made in any European market for any less than that, unless it be the smaller sizes, for which the present shops are not equipped. They do not find it necessary to equip themselves, because operating behind this tariff wall they can import the pipe and sell it at an additional profit to the customers with whom they must deal. They do this to fill an order, for instance, to equip a city with enough pipe to install a system for the distribution of either gas or water, which requires many sizes to accomplish the purpose. It is a fact that it is exceedingly difficult to get pipe in some parts of the country. For instance, there are two Senators upon this floor who were formerly mayors of two of the large cities of the country, one of Kansas City, Mo., and the other of Portland, Oreg.

During the administration of the one as mayor of Portland, Oreg., it became necessary to have 5 or 6 miles of pipe. It could not be obtained. They had to supply their wants with steel pipe, which is very much less valuable for the particular purpose than the cast-iron pipe would be. There was some sort of arrangement in the trade by which that better form of pipe could not be obtained, and the other form was installed from necessity. Substantially the same condition was presented in Kansas City. I recall a case in my State, the town of Conway, where it became necessary recently to install water-The obstacles of transportation and sale in connection with that particular commodity was such that they absolutely had to put in wooden pipe. A firm in St. Louis makes a wooden pipe that is sometimes used as a substituted means of distribution when the better pipe can not be obtained on fair terms. This industry is one which is evidently controlled by somebody or something to such an extent that it is not a free article of commerce in the sense that anybody can buy it who is willing to pay a fair price for it.

The contention is made by those who have shops upon the watercourses of the country that because of the difficulties in transporting pipe inland on the railroads they constitute a group of independent dealers and serve a certain trade that will be disadvantageously affected by foreign importations. They state that the shops located in the interior of the country do not need any tariff because the railroad freight charges for carrying pipe gives them all the protection they want, and that they thus fear competition from no one.

I am inclined to dispute that statement somewhat, because on looking over some of the bids made in some of the interior localities, I found that bids were presented by all the shops indifferently, regardless of location, whether upon the seacoast or in the interior.

The profit they have received under present conditions is such that there is not any justification for adding another imposition in the form of a tariff tax. It is a commodity that ought to be freely brought into this country, if it can be. I am not prepared to say that it can. The only instance where we have an opportunity to test it is from the actual importations. The price of the particular pipe introduced in this country in 1912 was between \$30 and \$31 a ton, whereas the domestic pipe is sold at about \$27 in the case of many of the bids that I have examined.

Of course, the smaller pipe is sometimes used in connection with supplying the full equipment of pipe for a particular job. All the pipe required in any complete installation is not of the same size. Therefore when the shops make a bid on the whole lot required they may answer their own financial purposes by supplying a part of the order from pipe imported by themselves.

The fact struck the committee, it strikes many of us on this side, that this is one of the articles that is so buttressed by trade or transportation conditions that whatever competition can be invited from any source is legitimately invited by putting it upon the free list. We do not feel that injustice has been done to anybody and we believe that it is going to be more completely justified the more thoroughly it is investigated.

The hearings in connection with legislation with reference to it show that the labor cost is variously stated. One of the gentle-men most particularly interested in it, or at least most energetically interested in resisting the action now proposed, said to me recently that the labor cost is from \$4 to \$6 a ton, an average of about \$5 a ton. The cost of conversion—overhead charges, and everything else outside of the pig iron out of which it is made—is about \$8, and the price of pig iron is about \$10 a ton. The average probably in some localities is less than that, and in other localities something more. The course of legislation on the subject has been to constantly reduce the tariff because actual experience demonstrates the fact that such an imposition was doing nothing more than increasing the price |

to the local consumer; that the local plants are amply able to take care of the market if they will do it; and that it is an unfair exercise of the taxing power to put an imposition upon that particular commodity which is so absolutely necessary to the health and welfare of the different communities.

These, in a general way, are some of the reasons which induced the committee to take the position which it did in putting this commodity on the free list.

Mr. OLIVER. Mr. President, if the Senator from Arkansas thinks that by placing this east-iron pipe upon the free list, the people of the municipalities in Arkansas, or of any other State in the interior of the country, will obtain it one cent cheaper than they will by allowing a small duty to stand upon it, he is very much mistaken. The Addyston litigation, to which the Senator referred, was quite a good many years ago; I think certainly about 10 years ago.

Mr. CLARKE of Arkansas. Twelve years ago.
Mr. OLIVER. Twelve years ago; that is my recollection.
The result of that litigation dissolved anything in the shape of a pool or an agreement in that business, but it was followed by a combination or a trust. That trust exists to-day in the shape of the United States Cast Iron Pipe Co., which operates throughout the country 12 plants. All of those plants, with one exception, are located west of the Allegheny Mountains. They have one plant, I believe, in the State of New Jersey, at Burlington. All of the others are located in the interior.

As the Senator from Arkansas says, the freight is a very important item in this commodity because of the great difficulty The pieces are very heavy; they have to be handled on cranes or by machinery, and but a small tonnage can be placed in a car. Consequently that commodity has to pay a very high rate of freight. In consequence of this the foundries near the point of consumption have a decided ad-

The United States Cast Iron Pipe Co., with its foundries in the interior of the country, will be protected by the fact that shipments from abroad can not penetrate the interior of the country, and that company will still continue to maintain its trade. On the other hand, the independent manufacturers are, to a very great extent, located near the seaboard. There is one manufactory at Detroit, Mich.; one at Birmingham, Ala.; one at New Comerstown, Ohio; one at New Philadelphia, Ohio; one at Pueblo, Colo.; one at Emaus, Pa.—that is in the eastern part of Pennsylvania; two at Lynchburg, Va.; one at Radford, Va.; one at Massilon, Ohio; one at Bristol, Tenn.; one at Utica, N. Y.; one at Phillipsburg, N. J.; another at Florence, N. J.; and another at Camden, N. J.

It is these independent manufacturers who will be hurt by the removal of the duty upon this article. So by legislating in this way Congress will simply be legislating in favor of the trust and against the independent manufacturers.

Mr. JONES. Mr. President-The VICE PRESIDENT. Does the Senator from Pennsylvania yield to the Senator from Washington?

Mr. OLIVER. I do. Mr. JONES. I want to ask the Senator from Pennsylvania if all those manufacturers he has just named are independent of the trust?

Mr. OLIVER. As I understand, Mr. President, they are absolutely independent; they have no understanding with each other or with the trust in any way; they are working in open competition; and I really think that—

Mr. CLARKE of Arkansas. Mr. President—

The VICE PRESIDENT. Does the Senator from Pennsyl-

vania yield to the Senator from Arkansas?

Mr. OLIVER, I do.

Mr. CLARKE of Arkansas. The Senator from Pennsylvania gave us a list of the independents. Has the Senator a list of the cast-iron pipe makers that are in the trust?
Mr. OLIVER. I read that list first.

Mr. CLARKE of Arkansas. Those which are identified with the trust?

Mr. OLIVER. That are in the trust; yes.
Mr. CLARKE of Arkansas. The Senator from Pennsylvania read another list which shows those not identified with the trust?

Mr. OLIVER. The last list shows these not identified with the trust.

Now, I will read, Mr. President, the proportionate tonnage of these two classes of manufacturers. The Pipe Trust in the these two classes of manufacturers. The Pipe Trust in the interior tonnage has a capacity of 440,000 tons; the coast tonnage has a capacity of 60,000 tons. On the other hand, the independents have an interior tonnage of 180,000 tons, while they have a coast tonnage of 390,000 tons.

Mr. President, I really think that Congress will be defeating the very object at which they aim by adopting the amendment proposed by the committee.

Mr. CLARKE of Arkansas. Let me ask the Senator from Pennsylvania a question before he takes his seat. these so-called independents independent of, and in what way do they manifest their independence?

Mr. OLIVER. By openly bidding in the open market on con-

Mr. President, I have not an acquaintance with a single one of these manufacturers, but this is what is represented to me by one of them, a citizen of my State, who came to my office the other day to present his claims to me.

Mr. CLARKE of Arkansas. Do the independents sell pipe

any cheaper than do the so-called trusts?

Mr. OLIVER. I think that they sell it in open competition with them. The market for this product, as I understand, is generally let out in contracts in big jobs. I am assured by Mr. Wood, of the firm of R. D. Wood & Co., who have their factory in New Jersey and their office in Pennsylvania, that there is no sort of understanding amongst them in any way, and that they are all competing for business. That is all I know about the matter.

Mr. CLARKE of Arkansas. Mr. President, whenever a tariff bill or an antitrust bill is under discussion we hear a great deal about the "independents." I have been trying to find out what they are independent of; who they are independent of; how they manifest their independence; and how the public get the benefit of their independence, but I have never yet been able to find anybody who could point out a tangible distinction between a trust and an independent.

Mr. OLIVER. Mr. President, I rather think it is up to the Senator from Arkansas to point out the contrary.

Mr. CLARKE of Arkansas. I think not. Mr. OLIVER. I rather think the burden is on him.

Mr. CLARKE of Arkansas. It is not the mere relation of parties to one another, but the effect upon the consumer, the effect upon the market, with which we have a right to deal. If the effect is the same, it is of no consequence whether it is produced by a so-called independent or a so-called trust; if the territory is divided up by natural causes, for instance, with railroad transportation to one point and water transportation to another, and those in the field served by water transportation have that set aside to them, and it is not invaded by those who can ship their pipe over railroads to a distant market, it is just as complete a trust by the division of territory, which is one of the established methods of mulcting the consumer, as any other recognized by law. Then why should we not give heed to that when the effect is the same as if they were in combination and were made so by stipulation instead of having it the result of natural conditions?

Mr. OLIVER. Mr. President, the Senator from Arkansas is talking about combinations, and yet he has not given us a single instance of an agreement or of a combination among these men to maintain prices or anything of the kind. I submit that it is not fair to make such a charge against a set of business men, simply because of an assumption of wrongdoing, without giving some one instance of such act, and the Senator has not even intimated that such is the case, except that he assumes it.

Mr. CLARKE of Arkansas. I complimented the Senator from Pennsylvania by assuming that the information he gave to the Senate to the effect that 12 of those companies were in a com-

bination was reliable.

Mr. OLIVER. I beg pardon, Mr. President. If the Senator thought I said that, he misunderstood me. I said that the 12 plants were owned by one concern, and that the others that I mentioned were independent of that concern and of each othernot that 12 of the companies were in a combination, but that 12 of the plants were owned by one corporation. I think that is quite a different thing from the way the Senator from Arkansas puts it.

Mr. BORAH. Mr. President-

The VICE PRESIDENT. Does the Senator from Arkansas yield to the Senator from Idaho?

Mr. CLARKE of Arkansas. I shall be glad to do so.

I understand that the Senator from Arkansas Mr. BORAH. contends that this commodity is controlled by a combination, although that combination may be composed of what are called independent parties, and that they control the situation by an agreement among themselves with reference to bidding.

Mr. CLARKE of Arkansas. I would not say that, because I have not any evidence of it. I say that, according to their present contention, the country is divided up between them-that is to say, the interior plants do not compete with the waterpresent contention, the country is divided up between them—that is to say, the interior plants do not compete with the waterfront plants, and the water-front plants do not compete for parties had been heretofore defined.

the interior business. The result is that the country is practically divided between them because of this transportation

Mr. BORAH. The result of it all is that the purchasers of this pipe are in the same position as if there were a complete

trust?

Mr. CLARKE of Arkansas. They are, according to my under-

Mr. BORAH. And the Senator from Arkansas is in favor of putting the article on the free list because of that condition of

Mr. CLARKE of Arkansas. Not altogether. I think the prices at which they are selling the article are excessive; that the commodity can be made here as cheaply as it can be made anywhere in the world; that it is an article of prime necessity in modern municipal life; and that there is no reason why these should be made to bear a burden in the way of a tariff tax. It takes its place among the necessities of the day.

Mr. BORAH. That is the reason why the Senator believes in

placing it upon the free list?

Mr. CLARKE of Arkansas. Yes, sir. I stated a moment ago that there were 200 tons imported into this country last year. I should have said there were 130 tons imported during 1912, and that the revenue collected at \$5 a ton amounted to \$650. The discussion has not in the slightest degree convinced me that what was done by the committee was not highly commendable.

Mr. OLIVER. Mr. President, I wish simply to say that I did

not expect it to have any such effect.

Mr. CLARKE of Arkansas. The Senator from Pennsylvania can have as much effect as anybody else when the facts that he brings to the attention of the Senate deserve recognition. I do not believe there is any intention on the part of any Senator on this side to do anything but what, according to the light before him, is proper. We pursued this course of putting necessities upon the free list where there was justification for it, and we selected this one because, upon investigation, it turned out that it was a product that could be manufactured cheaper here than it could be manufactured anywhere else. That was demonstrated by the fact that the import price was fixed at \$30 a ton, while the same product can be manufactured here from \$15 to \$18 a ton.

Mr. GALLINGER. Will the Senator from Arkansas permit

me to interrupt him?

The VICE PRESIDENT. Does the Senator from Arkansas yield to the Senator from New Hampshire?

Mr. CLARKE of Arkansas. Certainly; I shall be glad to

do so.

Mr. GALLINGER. Mr. President, I am interested in this plan to punish trusts by putting their products on the free list. I have very grave doubt as to the success of it; but I want to ask the Senator from Arkansas whether he or other Senators on the other side of the Chamber have taken into consideration the propriety of putting a higher duty upon the products of trusts in foreign countries?

England has great manufacturing trusts as well as we have, and yet, unless some counter legislation is adopted, the product of the trusts of Great Britain and other European countries come in here without any punishment being inflicted. If we punish our people by putting their product on the free list, why should we not punish the foreigner by putting an increased duty

on his product?

Mr. CLARKE of Arkansas. There is a great deal of plausi-bility in the question the Senator asks, but I do not think that the implications correctly state our position. This particular commodity is not being put upon the free list to punish anybody, but to afford our own people, our own consumers, an opportunity to buy an article which can be furnished to them by American manufacturers at fair prices, if they will do it, and, if they will not do it, then we have a right to invite the foreign manufacturers to trade in our market.

I have never absolutely committed myself to the project of using a tariff law, or the absence of a tariff law, to punish trusts. I believe there is a more direct and effective way of accomplishing the result. I am not altogether willing to be classed among the free traders of this country, and I am never likely to be until the conditions of this country, which must hereafter arise, seem to warrant it. I have not entirely committed myself to the proposition that the doctrine of a tariff for revenue only confines investigation to that point. I will look beyond and see what the effect of the legislation is to be upon the interests of this country. I take each item in each schedule and dispose of it according to my judgment of what is proper and right, with-

I used to think that I was in a moderate way a protectionist; but when I came to see what other people regarded as a tariff for revenue only, I found that I was gravitating very decidedly in the direction of free trade. My own notion is that there are very few interests, if any, in this country that can not survive with 25 per cent as a revenue tariff, or a 25 per cent differential, considered as a tariff for any other purpose; and whenever you get beyond that point, you have, in my opinion, invaded the territory of the high protectionist. Still I would deal with each article according to its merits, with reference to the demands and rights of the public, and I have dealt with this

article in that way.

Mr. CUMMINS. Mr. President, inasmuch as the amendment which I shall presently offer attaches a duty of \$3 a ton to the commodity under discussion, I feel that I ought not to allow a vote to be taken upon the pending question without saying enough, at any rate, to outline my position respecting the sub-

I feel that no one can justly accuse me of being unfriendly to the trusts, so called, or to monopoly. What I have said here in days gone by and what I have attempted to do in a committee that is especially commissioned to deal with the subject ought to relieve me of any such suspicion. We are in danger of becoming too impulsive upon this particular question; we are in danger of accepting mere assertions for proof.

I do not believe that there is a monopoly in the business of manufacturing cast-iron pipe. I am quite familiar with the decision to which the Senator from Arkansas [Mr. Clarke] has referred; and it is only necessary to say that out of that trust or combination there grew what is now known as the United States Cast Iron Pipe Co. That company became the absolute owner of a large number of plants "hat were involved in that litigation. The United States Cast Iron Pipe Co. undoubtedly attempts to exercise the power of monopoly so far as it can do so; but there are many independent plants making cast-iron pipe in the United States; and, as the Senator from Arkansas has said, many of them are small plants, for it does not require a large capital to enter this business.

There is no word of testimony before the Senate, and, so far as I know, the charge has never been made before, that the smaller plants throughout the country have any relation whatever to the Cast Iron Pipe Co., or any relation to each other except one of competition. We ought not to assume that 10, 15, or 20-I do not remember just how many there are-of these smaller industries have entered into any combination with each other, or have sustained or now sustain any relation to what is ordinarily known as the Cast Iron Pipe Trust. I do not know what their business practices may be; I do not know the details of their rivalry with each other, but there is no proof anywhere, and I never before heard the charge made, that there exists between them any concert of action whatever. believe the truth to be that they are in competition with each other; each one, of course, securing the highest price it can secure for the commodity it sells, but transacting business in entire obedience to the laws of the United States, which prohibit agreements or arrangements in restraint of trade or commerce. We will do a very great wrong if we pass a tariff law upon the assumption that the companies which make cast-iron pipe in the United States are in conspiracy with each other, or that there is any monopoly in the business.

I know something about it; I have maintained a certain familiarity with the iron and steel business, inasmuch as I have given a good deal of study to it, and I do not believe that there is any monopoly at all. The records show that these companies which appear to be independent of each other do a larger business, on the whole, throughout the United States than does the Cast Iron Pipe Co., which undoubtedly attempted at one time to do in this business just exactly what the United States Steel Corporation did in its business.

There are certain natural obstacles in the way of the independents, if I may call them so, doing business in a large part of the territory controlled by the United States Cast Iron Pipe The Cast Iron Pipe Co. has its home and principal scene of its operations in the interior. I have no doubt that it does control prices in the interior, and there are but few independents in the interior. The reason I assume that there are not more of them lies in the fact that they can not compete with the Cast Iron Pipe Co. in that region in which it has established itself.

The smaller enterprises do their business mainly along the coast, and, whatever may be the policy of the Senate with regard to putting commodities that may be controlled by a single corporation upon the free list, that policy can not be adopted in this instance, because the facts upon which it is

based do not exist. Therefore it seems to me that we ought to determine this question entirely apart from the just feeling that we all have against monopoly. The standard that we ought to apply in this instance is the standard that every protectionist will apply to every commodity, namely, the difference in the cost of production here and abroad, together with whatever modification the precaution against dumping may introduce into that policy.

It is obvious to anyone who knows anything about the business, or to one who does not if he will reflect a moment, that the matter of a duty on cast-iron pipe in any territory more than a hundred miles from the seacoast is entirely immaterial. Even if we had free cast-iron pipe, it would be utterly impossible for the manufacturers of England or any other country to bring a single pound of such pipe into any part of the interior of the United States, because the cost of transportation furnishes more than an adequate protection to the manufacturers of the interior. The only thing that we need to concern ourselves about, as it seems to me, is the strip of territory lying along the seashore which can be invaded by the foreign manufacturer, if it costs more to produce the article here than it costs abroad.

My only reason for suggesting a duty of \$3 a ton-which is a reduction of 60 per cent as compared with the existing law-is this, that, in the first place, the manufacturer along the seacoast is handicapped because he must pay more for pig iron than his competitor in the interior; and, second, because it costs something more for the manufacturer in this country to turn his pig iron into cast-iron pipe than it costs abroad.

In the last census report giving the statistics of manufactures, iron and steel pipe are embraced in the same classification, and therefore I must deal with them both in what I am about to say. The entire product in this country in 1909, that being the last year covered by the census report, was of the value of \$30,-886,000. Of that the amount paid in wages was \$3,963,000; the amount paid in salaries \$657,000. It appears from these figures, excluding salaries, that the labor cost of converting pig iron into cast-iron pipe was between 11 and 12 per cent of the entire value of the product.

No one doubts that the wages paid abroad are much less than the wages paid here. Without entering at this moment into the efficiency of the laborer abroad as compared with the laborer here, it is true, as every man who has examined the subject knows, that the men who take the pig iron and turn it into castiron pipe are paid in this country twice as much-and, if you compare it with Germany, a little more than twice as much-as the men engaged in the same occupation abroad.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Kansas?

Mr. CUMMINS. I do. Mr. BRISTOW. The Senator has given us the percentage of labor in the cost of production of this product here. Has the Senator the percentage of labor in the cost of production of this product in countries which compete with us?

Mr. CUMMINS. I have not. That investigation, unfor-

tunately, never has been made, so far as I know, with relation to this particular product. We have to deal with our general information upon it; at least, I have so to deal with it. I have assumed, and I think I may do so with a good deal of certainty, that the proportion of labor cost abroad is substantially the same as the proportion of labor cost here.

Mr. BRISTOW. The reason I asked the question was that the Senator from Arkansas [Mr. CLARKE] said positively that this article did not cost any more to produce here than abroad.

Mr. CUMMINS. I do not believe the Senator from Arkansas

said that upon an investigation of the particular facts. I think he said it upon the general idea that we can produce any article of iron or steel here as cheaply as it can be produced abroad.

Mr. CLARKE of Arkansas. The testimony given before the Ways and Means Committee by Mr. Warren gave the labor cost of producing a ton of cast-iron pipe at from \$5 to \$5.50. He told me that the cost was from \$4 to \$6, according to the size of the particular pipe. The entire labor cost, therefore, of producing a ton of pipe sold in this country at about \$27 is in the neighborhood of \$5. I have no data as to the cost abroad.

Mr. CUMMINS. But, Mr. President, as the Senator from

Arkansas said, cast-iron pipe is of various kinds, and undoubt-edly there are kinds of cast-iron pipe that cost \$27 per ton to make; but the larger cast-iron pipe does not cost anything like that sum. It is selling in this country now at about \$20 or \$21 or \$22 a ton. I am sure that it is not selling at to exceed \$22

Mr. CLARKE of Arkansas. Mr. President, I have not any price list. That is regulated by public lettings, and each particular sale governs in each particular case.

Mr. CUMMINS. Oh. yes.
Mr. CLARKE of Arkansas. I have not been able to find any where any considerable quantity was furnished recently for less than \$27

Mr. CUMMINS. I think that is entirely true, if the Senator from Arkansas confines his examination to the interior part of the country, where prices are really controlled by the Cast Iron But, if he will go into the territory in which the independents, the smaller enterprises, actually do business and sell their pipe, he will find that there have been a good many sales in recent times for a price not to exceed \$22 a ton.

Mr. OLIVER. Mr. President, will the Senator allow me for a

moment?

Mr. CUMMINS. Certainly.
Mr. OLIVER. I think, also, that in mentioning the price of \$27 the Senator from Arkansas is talking of the price delivered at the point where the pipe is to be used, and it includes a very large amount of freight charges.

Mr. CUMMINS. That may be. I think you can buy cast-iron pipe at all prices from \$20 to \$40 a ton. I do not know but that there may be some that will command even more than

\$40 a ton.

To come back to my proposition, however, assuming that the labor cost abroad is substantially the same proportion of the entire value that the domestic labor cost is of the entire value in this country, I believe that in the absence of any other and more specific knowledge we ought to put a duty upon an article of this sort that is based upon the assumption that the labor cost abroad is substantially one-half the labor cost here. There are a great many things of which we know that is not true. There are a great many things of which we know it is less than the truth. But as to this commodity, the best information I can get, and the best conclusion I can reach is that the difference in the labor cost is substantially two or two and a half dollars per ton.

I have added to my amendment a very small amount for other differences in the cost of production. I am not willing to assume that it costs substantially more here for the basic material, the pig iron, than it costs abroad. But there are other costs of production that are unquestionably more in our country than in our competing countries. It has therefore seemed to me that a duty of \$3 per ton, which is only three-fifths of the present duty, is a reasonable, fair, protective duty upon cast-

iron pipe

Mr. REED. Mr. President-

The VICE PRESIDENT. Does the Senator from Jowa yield to the Senator from Missouri?

Mr. CUMMINS. I do.

Mr. REED. Has the Senator from Iowa examined into the question of ocean freight rates upon cast-iron pipe?

Mr. CUMMINS. I know about what the ocean freight rate is. Mr. REED. Does not the ocean freight rate practically make up any difference there is in the labor cost in this country and in England?

Mr. CUMMINS. The ocean freight rate on this commodity varies from \$1.50 to \$2.50 per ton, depending entirely upon the

business that the steamships are doing.

Mr. REED. If the Senator will pardon me, I do not claim an intimate knowledge regarding this item; but the statement has been made to me, by a man who is largely engaged in the production of cast-iron pipe, that the ocean freight rate will practically make up the difference between the labor cost in this country and the labor cost in England. The Senator from Iowa rather confirms me in that view, because he states that the freight rate runs from \$1.50 to \$2.50 a ton. that that in itself would offer a pretty good protection.

But I want to proceed to another matter. I understand there is some competition between what we call the Pipe Trust, which is located largely in the interior of the country, and independent concerns operating near the Atlantic seaboard. But does the Senator know of any company competing with the trust in the great West, or, speaking broadly, nearly all of the country lying west of the Missouri River?

Mr. CUMMINS. Practically none.

Mr. REED. The point of interest to me is this, and I want to state it fairly: It is claimed that the competition from abroad would injure the independent factories because they are located along the Atlantic seaboard and in a territory which they now have practically to themselves, because the trust is barred to some extent by freight rates from that part of the country, they in turn being barred by freight rates from the territory where the trust has its plants. It is claimed by these

gentlemen that if we were to have free trade in cast-iron pipe the competition would affect only the independent factories upon the Atlantic coast.

Conceding that to be true, for the moment, what has the Senator to say upon this question? I really should like to get his views upon it. Here is a trust that is said to control all of the interior parts of the country where its factories are now located, and it alone is able to serve the great West. If we put a tariff on cast-iron pipe, would it not simply enable the trust to maintain its grip upon the great West and to charge extortionate prices there? How can we escape from that?

Mr. CUMMINS. The Senator from Missouri probably was not in the Chamber when I spoke on that subject.

Mr. REED. I was not here, I will not ask the Senator to go over it.

Mr. CUMMINS. I will do so very gladly.

I do not think a duty will affect the interior of this country at all. I do not think free trade in cast-iron pipe would affect the interior of this country. If the Government were to offer a bounty of \$2 per ton on cast-iron pipe, I think the foreigner still could not get into a large part of this country—the part to which the Senator from Missouri refers. When you remember that the manufacturer in England, in order to reach Chicago or Cincinnati or St. Louis, would be compelled to pay a rate of transportation that just from memory, I think, is not less than \$7 a ton, or possibly \$6 a ton, it is obvious that that part of the country can not be affected by a duty upon pipe.

Mr. LANE. Mr. President, will the Senator from Iowa par-

don an interruption?

Mr. CUMMINS. Certainly.

Mr. LANE. As a matter of fact, the factories making castiron pipe of large sizes, located in Birmingham, Ala., do ship trainloads of cast-iron pipe to the Pacific coast and have been so doing for many years.

Mr. CUMMINS. I have no doubt of that. The Pacific coast

has no other place to get it.

Mr. LANE. It seems to me that it could be shipped as easily

one way as the other, the distance being no greater.

Mr. CUMMINS. That depends entirely on the accessibility of the Pacific coast to the foreign manufacturer. There is now a duty of only \$5 a ton upon east-iron pipe. I do not know the freight rate from Birmingham to the western coast, but probably it is not less than \$12 or possibly \$14 a ton. I might very well ask the Senator from Oregon why, under a duty of \$5 a ton, the foreign manufacturer does not supply Portland and Seattle and other ports upon the western coast?

Mr. LANE. If it were free now, ships going out of the Pacific coast ports laden with wheat could return with large sizes of cast-iron pipe instead of ballast, which many of them carry

Mr. CUMMINS. If a foreign manufacturer could reach the western coast without any duty and could not reach it upon a duty of \$3 a ton, then undoubtedly it would give the domestic manufacturer the benefit of \$3 per ton; but I do not believe there is any such case.

I merely wish to call the attention of the Senator Mr. LANE. to the fact that the product does undergo long-distance transportation, which I understood him to say it would not bear.

Mr. CUMMINS. I am speaking, and have been speaking, of the interior of the country. I know it could not affect the business in the great interior of the United States, on account of the cost of transportation. If we put cast-iron pipe upon the free list, then we ought to put every product of iron and steel on the There is no more reason for putting this commodity on the free list than for putting on the free list every other commodity of iron and steel, at least of the larger forms, costing up to \$40 per ton.

Mr. REED. Does the Senator base that statement on the ground that all steel products are now controlled by a trust?

Mr. CUMMINS. I have attempted to say that this product is not controlled by the trust. The territory that this duty is designed to assist is not controlled by the trust, if by "the trust" the Senator means the United States Cast Iron Pipe Co. There are a great many of the smaller enterprises that are doing business, as I think, under conditions of severe competition. If the business of the whole country were controlled by the Cast Iron Pipe Co., then there would arise the question suggested by the Senator from Missouri, namely, whether we ought to put upon the free list every article that is manufactured by a socalled trust

Mr. REED. I do not believe I made myself plain to the Senator a little while ago. I do not want to interrupt his speech, but I really want to get his views on this question.

My information is that there is competition between the in-

dependent companies and the Cast Iron Pipe Trust, as it is com-

monly termed, on the eastern coast and for some distance into the interior from the East; but I am asking the Senator, What about the West? The central part of the country is now absolutely in the grip of this one concern. There is no competition there. The Senator and I agree upon that. Neither is there any competition with the trust in all the country that lies west of its factories, which, generally speaking, are located in the Central States. There can be no competition there from the independent companies along the Atlantic coast, because they have to ship through the territory of the trust. The trust can beat them on every contract and make a large profit in addition. But there lies that great body of land, embracing one-half of the territory of the United States, all of it west of the factories of the trust, all of it now the trust's territory because the trust controls the nearest productive plant.

If you keep a tariff on pipe, you deny to all the great West any pipe which otherwise might come in from the Pacific coast

ports. How do we get past that difficulty?

Mr. CUMMINS. Mr. President, we can not adjust all the difficulties that arise out of combinations in this country through the tariff law. I believe that to put cast-iron pipe upon the free list would not help in the least degree the vast majority of the people of the United States in the interior, and I believe that to put it upon the free list would be to deny to a certain territory the protection which at least the Republican doctrine requires.

Of course, if I were making up a tariff law without regard to the doctrine of protection, I would not put anything on the dutiable list. I would have everything free. As I said the other day, the very moment I abandon the doctrine of protection my political philosophy leads me into absolute free trade. But if we adhere at all to the principle to which my party heretofore has been devoted, I think a duty of 10 per cent or 8 per cent upon this commodity is necessary as a protective duty. think that is the duty which the House put upon it. The House was just as intent on carrying out the Democratic principle as the Senate can be, and it believed there should be a duty of 8 or 10 per cent, I have forgotten which, upon cast-iron pipe. I think that is a protective duty; and affecting only a strip of territory contiguous to the Atlantic coast, I believe it ought to be retained. I think the present duty is altogether too high and much more than covers the difference in the cost of production here and abroad. But I think a duty of \$3 a ton will not more than measure the difference in the cost of making cast-iron pipe in England and in Philadelphia.

In the first place, the manufacturer in Philadelphia pays a little more for his pig iron than does the manufacturer in England. While pig iron can be made in this country as cheaply as it can be made abroad, it can not be brought to Philadelphia and delivered there as cheaply as it can be bought and used in You must remember that the great seat for the manu-England. facture of pig iron is not the Atlantic coast, but is west of the Allegheny Mountains, and the cheap pig iron of the country is manufactured west of the Allegheny Mountains. The man who takes pig iron in Philadelphia will pay more for it than the man who takes it in Cincinnati or in Chicago. Therefore I believe this very moderate duty, which, indeed, represents one of those cases in which a revenue duty becomes synonymous with a protective duty, should be retained.

The Senator from Arkansas [Mr. CLARKE] has the right theory about this matter. If you adhere to the revenue doctrine there will be a great number of instances, and they will be constantly increasing as time goes on, in which the revenue demand will be quite as great as the protective demand. In some cases, I have no doubt, it will be necessary in order to get an adequate revenue to put on a higher duty than would be necessary to measure the difference between the cost of production here and abroad.

Mr. President, I have said so much about the merits of the matter. I have an opinion with regard to the general proposition that has been announced here of putting upon the free list the products of a monopoly. I intend to defer a discussion of that proposition until I reach my own amendment. But lest I be misunderstood by being silent at this moment, I desire to say that I believe the consumer has a better right to competition than the producer has to protection. I had the honor to use those words in a speech that I made upon the tariff in Boston in 1903 or 1904, and they have been made the text for many an I adhere to the assault upon my soundness as a protectionist. proposition. If I must choose between competition for the consumer and protection for the producer, I unhesitatingly choose the former.

ing or reaching that result. I do not believe in putting upon the free list in a tariff bill every product which it is asserted here is the subject of a monopoly. I do not believe that that is the way to deal with it, because when it is so established in a tariff law it becomes permanent until Congress again intervenes, and it destroys the opportunity for that very competition which

we all so much desire.

When the tariff bill of 1909 was before Congress I offered an amendment upon this subject, the substance of which was that if at any time any citizen of the United States believed that competition—substantial competition—had ceased to exist with regard to the sale of any product, he might file in a court of competent jurisdiction a petition or application declaring the fact, and that thereupon the producer of the commodity should be summoned into court and a trial should ensue; and if the court found that substantial competition had ceased to exist it should then certify the decree to the Secretary of the Treasury, and thereafter the commodity should be placed upon the free list. But if thereafter conditions should change, and if competition appeared, then upon similar application the former decree might be set aside or modified and the article should take its place upon the dutiable list as theretofore. That presents a plan in which the principle can be carried out and through which the principle is not made to destroy itself.

I intend to offer the same amendment to this bill. I long ago presented it, and it is now printed, and when the time comes I intend to urge it upon the Senate. I am not solicitous about that particular method, but I want some method adopted that will enable competition to come into existence, and when it does come, then I want the ordinary rule of protection to apply.

That is the reason why, even if cast-iron pipe were manufactured by only a single concern, if it had accomplished a monopoly, I would still be opposed to putting it upon the free That is the reason why I am opposed to putting aluminum on the free list, for however complete the monopoly may be at this time I have great hope that competition may appear in the United States. I confidently believe that it will appear if those who might interest themselves in such an enterprise knew that when they came to offer their product in the markets of America in competition with the former monopoly they would receive the advantage of the Republican doctrine of protection. Any other plan, as it seems to me, involves perpetual monopoly.

I, however, will enlarge upon that and give my ideas fully with regard to it when I come to my amendment. At this time I have said what I have said simply because I believe that castiron pipe is not monopolized in this country in that sense, and because I believe that it ought to bear the small duty I have

proposed in my amendment.

Mr. CLARKE of Arkansas. Before the Senator from Iowa takes his seat I desire to ask him a question. How far into the interior does the Senator think the foreign pipe would be introduced in the event it was put upon the free list?

Mr. CUMMINS. There may be exceptions to every rule. can imagine a condition in which it might go clear across the continent, but ordinarily it could not get 100 miles from the

seacoast.

Mr. CLARKE of Arkansas. Then we would have 100 miles

of competition that does not now exist.

Mr. President, I desire to put into the Record quotations made from The Iron Age, a recognized publication in the iron trade, of July 3, 1913, giving prices on cast-iron pipe under various conditions and at various points. I read from page 39 of the trade report of Chicago:

Cast-iron pipe.—The award of 2,000 tons of pipe at Circinnati, Ohio, has not yet been made, but it is expected that the United States Cast Iron Pipe & Foundry Co., the low bidder, will furnish the pipe. The contract for 2,500 tons of pipe at Springfield, Ohio, is still unplaced. We quote as follows, per net ton, Chicago: Water pipe, 4 inch, \$28,50; 6 to 12 inch, \$26,50; 16 inch and up, \$25,50, with \$1 extra for gas

I read again from the trade report from Birmingham, on page 41:

Cast-iron pipe.—Manufacturers continue to receive a fair consignment of orders for extensions and repairs, and the Bessemer plant of the United States Cast Iron Pipe & Foundry Co. booked an order of 800 tons for San Diego. The southern producers are expecting to land some of the Buenos Aires and West Indies business, but no contracts are reported. Production is still at a lower ebb than usual and prices are \$22 for 4 inch and \$20 for 6 inch and upward f. o. b. pipe yards, with \$1 added for gas pipe.

We thus see that the same character of pipe is quoted in the same conditions of trade, because in both instances the plants that furnish the pipe belong to the United States Cast Iron & Foundry Co., at \$28.50 in Chicago, as against \$22 in Birmingham, Ala., for the same identical pipe.

I read again on page 45 of the report from New York:

The only difference between myself and those who have discussed the question here relates to the method of accomplish- to \$24 per net ton, tidewater, New York.

The same pipe that sells in Birmingham for shipments to San Diego and South American towns at \$22 is sold at tidewater in New York at \$23 and \$24. The same grade of pipe in Chicago is sold for \$28.50, and at a lower price for larger sizes.

Mr. CUMMINS. I am very glad my friend from Arkansas has referred to that. It confirms exactly what I said. I looked at the prices quoted a week ago in Philadelphia. They were \$22 In the West, in the region of the cast-iron pipe company, they charge anything they please.

Mr. CLARKE of Arkansas. The Birmingham, Ala., is in the West, and it belongs to the so-called trust. The United States Cast Iron Pipe & Foundry Co. furnish pipe for San Diego, Cal., and Buenos Aires and the West Indies at \$22 for 4-inch pipe and \$20 for 6-inch pipe, showing that the prices are absolutely arbitrarily fixed without reference to cost of production.

Mr. CUMMINS. Of course, they are arbitrary within certain limits. If they were \$100 a ton, I fancy they would not find many purchasers. There is a certain limit within which they can operate and do operate, and I have no doubt the prices are arbitrarily fixed.

Mr. REED. Mr. President, I intend to take but a moment on this question.

It seems to be admitted that the great interior of this country, so far as cast-iron pipe is concerned, is in the grip of one cor poration which controls a number of plants, and that within that territory it charges almost arbitrary prices; that lying west of that immediate territory there is a vast stretch of country extending to the Pacific Ocean, and the trade within that vast territory is completely in the control of the same combination. So this combination or trust, as we term it, has for its trade territory all the interior of the country and all that lies west of the interior. It seems to be conceded that along the Atlantic seaboard there are a few independent cast-iron pipe factories, and that within that particular territory there is sharp competition between the trust and the independent com-

Mr. President, whenever I find a trust in this country that can control in two-thirds of the United States or in seveneighths of the United States, as has been suggested by the Senator from Mississippi, then I think that trust is big enough, powerful enough, and dangerous enough so that we can afford to curtail its power and field of operation by every means within our ability

It must be manifest that a duty of five dollars and a half a ton or three dollars and a half a ton curtails competition with that trust in two places at least, namely, at the southern ports of our country and the western ports, because every dollar you add by way of a tariff to the price of pipe shipped into the western or southern ports of necessity curtails the amount which will be shipped in, and those desiring to purchase pipe must to that extent be limited to the one concern that can furnish it, namely, the Cast Iron Trust, that now has complete control in the central portion of the United States.

Mr. President, it seems to me perfectly patent under these conditions that there is no competition in the western parts of the country and the extreme South; that just as long as we maintain a tariff we assist the trust to hold that great portion of our country in its grasp and to exercise a complete and dominant control in that vast part of our country; and that a tariff levied. so far as the part of the country I am now referring to is concerned, is only a tariff for the benefit of the trust. that one institution, and it injures every consumer in that vast

Mr. BRISTOW. Mr. President-

With such a condition, it would seem to be our duty, as there is no competition in this country, to give to those people the benefit of some competition from abroad.

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Kansas?

Mr. REED. Certainly.

Mr. BRISTOW. I understood the Senator from Missouri to say that there was competition on the Atlantic coast.

Mr. REED. That is to say, I am informed there is. I think it is a fact that there is.

Mr. BRISTOW. It seems to me to be conceded that, duty or no duty, the same monopoly which controls the interior of the country will continue to control it. I do not want to vote for any duty that will aid in perpetuating a trust anywhere. It seems to me that free trade in cast-iron pipe is not reaching the real trust, but it is reaching the weak competitors it now has.

I am coming to a discussion of the New England Mr. REED. or the Atlantic side in a moment. I am speaking now of the interior and the West.

Mr. BRISTOW. I shall be glad to listen to the Senator on that point.

Mr. CUMMINS. Mr. President-

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Iowa?

Mr. REED. Certainly.

Mr. CUMMINS. I do not want to be misunderstood. While devoted my argument to the Atlantic seaboard largely, because there is the seat of operation of most of the smaller enterprises, of course the Senator knows that there is an independent plant in the interior farther west than any plant owned by the United States Cast Iron Pipe Co., namely, the one at Pueblo,

Mr. REED. That is knowledge I did not have. I will say very frankly the principal knowledge I have in regard to the places of manufacture of pipe came to me from a gentleman who claims to be an independent manufacturer. He did not indicate to me any such institution, but it may nevertheless be true.

Mr. CUMMINS. I may be wrong about it, Mr. President.

Mr. REED. I am not disputing it.

Mr. CUMMINS. But the little examination I have made of the general subject left the impression upon my memory that there is a plant in Pueblo, Colo., manufacturing cast-iron pipe, and that it does not belong to the United States Cast Iron

Mr. MARTINE of New Jersey. Mr. President, let me say that there are a few individual plants on the Delaware River in Pennsylvania, and some in New Jersey. I think there are three plants independent from the trust.

Mr. SMOOT. Mr. President-

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Utah?

Mr. REED. Certainly.

Mr. SMOOT. The independents have a plant at Pueblo, They also have a plant at Detroit, Mich., and they have three plants in the State of Ohio. The trusts have also three plants in the State of Ohio and one at Duluth, Minn. They have one at Buffalo, N. Y.; one at Scottdale, Pa.; and one at Burlington, N. J.

Mr. REED. There may be a plant at Pueblo; but if there be an independent plant at Pueblo it is perfectly manifest that it is not able to supply the country of the great West, a fact which seems to me to be conclusively shown by the statement here that pipe is shipped from Birmingham to the extreme West.

Now, I want just for a moment to adhere to what I was saying with reference to the western portion of the country. If there is a trust in the interior portion practically dominating that territory and extending its control clear to the western coast, then if the tariff were taken off, so that pipe came in free, it would seem that pipe could be brought in ballast in ships to the western coast, and that it could supply the western coast and invade the interior until freight rates became prohibitive. If you put some tariff upon pipe, it still might possibly come in to the western coast, but its ability to proceed into the interior and invade that country would be limited just as the tariff was raised to higher points and limited by the tariff.

If it is true that that vast portion of our country is practically in the grip of this great organization, every consideration demands that we should give to those people a competition from

abroad strong enough to relieve them.

Now I come to the plea that is made on behalf of the few concerns near the Atlantic seaboard. There are only a few, some six or seven, I believe, all told. Those concerns are not infant manufactories; many of them have existed a great many years; they are thoroughly established; but the claim is made that if you subject them to competition from abroad, they will be destroyed between the competition of the trust upon the one hand and the competition from abroad on the other; and that, therefore, by the destruction of the independents you will, in fact, strengthen the trust. That is the argument advanced.

It seems to me that you can not claim you are strengthening the trusts-and I deal with that for a moment-because if the competition from abroad becomes keen enough to destroy the independent factories of the eastern coast, then it must be that the pipe from abroad can be furnished cheaper than those factories can possibly make it. If it can be furnished from abroad cheaper than those factories can possibly make it, then that must increase the competition with the trust and cut down the trust's power to dominate the market and control prices.

That brings us to the question of whether these concerns along the coast-and it seems to me to be the only remaining question-would be destroyed by foreign competition. I do not believe they would be; and I might say that if they would be, if it be true that after 100 years of establishment they yet can not make pipe as cheaply as it can be made abroad, it to me that they have about reached a condition of infantile paralysis that no longer calls for medicine or wet-nurse coddling by the people of the United States; but I do not believe they will be destroyed.

To begin with, it is only claimed that there is a difference of \$3 between the cost production in England and in this country-not quite that, about \$2.50. A part of that will be taken away by the fact that pig iron is put upon the free list, and a number of other articles, perhaps small, but yet cutting some figure, will have the tariff reduced upon them.

The next proposition I make is this: The Senator from Iowa [Mr. Cummins] furnishes me with corroboration of that which I had already been told, namely, that it costs on the average about \$2 a ton to haul English pipe across the ocean. That freight rate substantially represents the total difference that is claimed to exist between the labor cost in England and the labor cost in this country, so that the Atlantic Ocean lies there to afford a protection, which, if it does not quite come up to the rule which the Senator from Iowa has invoked so often and so elequently and so forcibly in this Chamber, it comes so near reaching that rule that it seems to me no one need worry very much about those concerns.

On top of that comes the advantage that every concern must have of being located in this country, of being acquainted with our trade conditions, of being able constantly to push its business better than can the foreigner.

Now, I want to say a word about my old friend, the Cast Iron Pipe Trust. I have had some experience with it. I happened at one time to have the misfortune-or, rather, the city in which I lived had the misfortune to have me for its mayor. During that period we were substantially rebuilding, to a large extent, our waterworks plant. I found then that there was but one bidder for cast-iron pipe; that all other bids that were offered were bids that were so high that they could not be considered; and that we had one concern to buy from, and only one. I found, in addition to that, that this concern had grown so arrogant, so monstrous in its methods, so bold and so barefaced in its buccaneering, that it did not hesitate to serve notice upon the city authorities that they must buy pipe by a certain day, and if they did not buy it by that day the price would be advanced 10, 15, or 20 per cent to them; that this happened repeatedly; and that, although every kind of effort was made to find some other place where pipe could be bought, that great city found itself absolutely in a helpless condition; and if it did not buy at the demand of this concern, it was compelled to pay the additional price.

Mr. President, what was true of my city, with its 250,000 people, with its ample credit, with its splendid advancement and vigor and courage, was true to a greater or less extent of other cities in the great Central West; and I say that when a thing of that kind exists it is time to quit talking about affording it any protection. If there is a competition in this country that is so weak, so senile, and so useless that it can not afford protection against a concern of that kind through four-fifths of the entire United States, it is time Congress should withdraw its protection from an institution that has thus outraged all law, all decency, and all morals.

Mr. BRISTOW. Mr. President, suppose that we put this castiron pipe on the free list; how much will it affect the control of this corporation which the Senator from Missouri denounces with such commendable vigor; that is, how much is it going to hurt this trust to put this pipe on the free list? Does it help Kansas City? Does it help the interior? Will not that trust, with this article on the free list, be just as potent within that territory as it is to-day?

Mr. REED. I do not say that competiton will benefit every part of the United States, but I do say that if you can benefit one-third of the United States you ought to do so; if you can benefit four-fifths you ought to do it; and just as you bring competition in from either side of this concern's special territory you circumscribe that territory. It would seem to me to follow that if you reduce the prices of these necessities upon both sides necessarily it would have to drop its prices in that interior territory or there would be some competition flow in: and yet its natural advantage may continue to give it a special power within a special territory.

Mr. WILLIAMS. But probably at a less price.

Mr. REED. But probably at a less price.
Mr. BRISTOW. The situation that seems to confront us, Mr. BRISTOW. The situation that seems to confront us, judging from the discussion, is that on the border, on the Atlantic coast, there has existed, or does exist, some competition. After we get into the interior that competition ceases. move the duty will put the competition which the trust now has in competition with the foreign manufacturer. In that struggle he may survive or he may not; time will have to determine; but if he does not survive, if he should go out of business, the foreign competitor will take his place, and then there will come a

division point between the foreign competitor and the trust. The interior, however—our part of the country—will remain in the grip of the same combination it is to-day.

It seems to me this situation illustrates the futility of undertaking to control the trust question by a tariff duty. You may affect it slightly here and there; and wherever it can be affected I am disposed to take off the duty, even though it should hurt the independent manufacturer, although it seems to me that it is a cruel thing to do, because the great evil against which the Senator from Missouri, as well as myself, have been complaining will remain practically unhurt.

Mr. STONE. Mr. President, we have spent about two hours and a half on this item, and unless some other Senator desires

to be heard. I should like to have a vote.

Mr. BURTON. Mr. President, I desire to say a few words on this subject. The point which impresses me in this proposal is the glaring inconsistency between paragraphs 127 and 129. The amendment in paragraph 127 proposes to place cast-iron pipe on the free list, while paragraph 129, which covers wroughtfrom pipe and steel pipe, provides for those commodities a duty of 20 per cent. If there should be any distinction between the two, if either should have a larger duty, it is cast-iron pipe. Cast-iron pipe is made by a foundry process; wrought-iron pipe by a rolling-mill process. The amount of labor involved in the foundry work in the making of cast-iron pipe is greater than in the making of wrought-iron pipe. Predominantly cast-iron pipe is used below ground, it is thicker, it is larger; while the wrought-iron pipe is more expensive, is lighter, and is used where there is less danger of corrosion. It is more used above ground.

There are half a dozen establishments in my State engaged in the manufacture of cast-iron pipe. Three of them are branches of the so-called United States Cast Iron Pipe & Foundry Co., as I believe it is called. They are located at the three leading cities in Ohio-Cleveland, Columbus, and Cincinnati—while there are three independent concerns located in the smaller cities of New Comerstown, New Philadelphia, and Massillon. I do not believe the question of duty or no duty is of importance to any of them. I have heard from none of them, and I certainly can speak without any bias because of local interest; but it is not merely incongruous, it is unjust to place cast-iron pipe on the free list while wrought iron and steel pipe are made subject to a duty.

It is hardly correct to say that there is no competition west of the Alleghenys or in the interior. The total amount made by the united companies in the interior is about 440,000 tons, while the independent companies manufacture 180,000 tons. There are not only the independent establishments in Ohio which I have mentioned, there is one in Michigan, I think one in Alabama, and certainly one in Colorado. They at least have a restraining influence upon the so-called trust, and I do not see in what possible way you could relieve this business from monopolistic tendencies by taking off the duty so far as regards

that portion west of the Allegheny Mountains.

In the portion east of the Allegheny Mountains it would be a very serious matter. There the total quantity made by the independents is, I believe, about 390,000 tons, and by the combined organization, or trust, 60,000 tons. The price of pig iron, as has already been stated, is higher there, and if you throw open that market without duty, you diminish their opportunities; you may put them out of business.

There has been some discussion here to the effect that there is a difference of only \$2.50 or \$3 between the price in England or in Germany and that in the United States, and then account is made of the freight of \$2, and it is said that the establishments on the Atlantic seaboard have the protection of the That, Mr. President, only takes in a part of Atlantic Ocean. the problem. The prices are not uniform from year to year; sales are not always made abroad according to quoted figures. The cartels of Germany, as well as the organization of English iron founders, could temporarily lower the price and could maintain that lowered price until the time when the independents on the Atlantic seaboard found it unprofitable to continue the business. Then the foreign manufacturers could raise their prices so as to recoup themselves for the losses sustained by cutting below the market price.

I at one time saw a statement made by the harbor board of the city of Manchester. They were utilizing the canal and dock facilities, and it was bluntly stated in the circular that rates for export were adjusted on a lower basis-that is, made to conform to the conditions in any foreign country-so that they

could obtain the market.

The German cartels also combine all branches of this business and most other branches of the iron trade, and, taking into account that, with larger production, they can sell at somewhat cheaper prices, they could unload on our market cast-iron pipe until the time when the domestic production in the easterly portion of the country would be rendered entirely unprofitable. It was to guard against anything of that kind that the House committee put in a so-called antidumping clause, which was adopted by the House.

In view of all these circumstances, Mr. President, it seems to me there should be uniformity, and that the article into which enters the largest labor cost should not be free from the duty while the other article is made dutiable at 20 per cent.

Mr. STONE. Let us have a vote now, Mr. President.

Mr. CUMMINS. Mr. President, just one word in reply to the Senator from Missouri [Mr. Reed]. I think I would reach precisely the conclusion he does if I were making up a tariff bill ignoring the doctrine of protection, but I can not understand why he finds it necessary to put cast-iron pipe on the free list, because a large part of the business is controlled by one concern, when he allows other products of iron and steel to be placed upon the dutiable list, although the United States Steel Corporation controls a larger part of the business in which it is engaged than does the United States Cast Iron Co. of the business in which it is engaged. The latter company controls, we will say, about 45 per cent of the business. The former company controls quite 50 per cent of the business. It seems to me the same argument that would lead to free castiron pipe must necessarily lead to free iron and steel, at least in the field occupied by the United States Steel Corporation.

Mr. REED. Is not the Senator wrong? Does not the Cast Iron Pipe Trust of this country control about 75 per cent?
Mr. CUMMINS. It does not if the figures I have are correct. It does not sell more than 45 per cent of the entire product.

Mr. REED. I can answer the Senator by saying that I have been voting to take the tariff off all trust-made articles just as fast as I could do it; and I intend to keep on voting that way.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the committee.

Mr. BURTON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. KERN (when his name was called). I transfer my general pair with the senior Senator from Kentucky [Mr. Bradley] to the senior Senator from Nebraska [Mr. Hitchcock] and will vote. I vote "yea."

Mr. McLEAN (when his name was called). I wish to announce that the senior Senator from North Dakota [Mr. Mc-CUMBER] is necessarily absent on account of sickness in his family. He is paired with the senior Senator from Nevada [Mr. Newlands]. I wish this announcement to stand for the remainder of the day.

Mr. SMITH of Georgia (when his name was called). I transfer my pair with the senior Senator from Massachusetts [Mr. LODGE] to the senior Senator from Maryland [Mr. SMITH] and

will vote. I vote "yea."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from New York [Mr. Root.] I transfer that pair to the junior Senator from Oklahoma [Mr. Gore] and will vote. I vote "yea."

Mr. WILLIAMS (when his name was called). general pair with the senior Senator from Pennsylvania [Mr. Penrosel. He is absent, and I therefore withhold my vote. Were he present, I should vote "yea."

The roll call was concluded.

Mr. JAMES (after having voted in the affirmative). to announce that the senior Senator from Kentucky [Mr. Brad-LEY] is absent by reason of illness. He has a general pair with the junior Senator from Indiana [Mr. Kern].

I should like to know if the junior Senator from Massachusetts [Mr. Weeks] has voted.

The VICE PRESIDENT. He has not.

Mr. JAMES. I desire to withdraw my vote. I have a general pair with that Senator. If he were present, I should vote yea.'

Mr. LEWIS. I desire to announce the absence of the junior Senator from Louisiana [Mr. Ransdell] because of illness.

Mr. STONE. I have a general pair with the senior Senator from Wyoming [Mr. CLARK]. The Senator being absent, I transfer my pair to the junior Senator from Louisiana [Mr. RANSDELL] and will vote. I vote "yea."

Mr. BRYAN (after having voted in the affirmative). Inasmuch as the junior Senator from Michigan [Mr. Townsend] has not voted, I withdraw my vote. I have a pair with that Senator.

Mr. JONES. I desire to announce that the junior Senator from Michigan [Mr. Townsend] is absent on important busi-

Mr. GALLINGER. I have been requested to announce that the junior Senator from Idaho [Mr. Brady] is paired with the junior Senator from Mississippi [Mr. VARDAMAN]; the junior Senator from Maine [Mr. Burleigh] is paired with the junior Senator from Tennessee [Mr. Shields]; the junior Senator from New Mexico [Mr. Catron] is paired with the senior Senator from Maine [Mr. Johnson]; the junior Senator from Rhode Island [Mr. Colt] is paired with the junior Senator from Delaware [Mr. Saulsbury]; the senior Senator from Delaware [Mr. DU PONT] is paired with the senior Senator from Texas [Mr. Culberson]; the junior Senator from West Virginia [Mr. Goff] is paired with the Senator from Alabama [Mr. Bankhead]; the junior Senator from Wisconsin [Mr. Stephenson] is paired with the senior Senator from Louisiana [Mr. Thornton]; and the junior Senator from Wyoming [Mr. Warren] is paired with the senior Senator from Florida [Mr. Fletcher].

The result was announced—yeas 41, nays 17, as follows:

YEAS-41.

Owen Pittman Poindexter Pomerene Smith, Ga. Smith, S. C. Stone Kenvon Bacon Borah Bristow Chamberlain Chilton Kern La Follette Lane Swanson Lea Lewis Martin, Va. Martine, N. J. Reed Rebinson Shafroth Sheppard Shively Simmons Smith, Ariz. Thomas Thompson Tillman Walsh Clapp Clarke, Ark. Crawford Hollis Myers O'Gorman Overman Hughes NAYS-17. Colt Culberson du Pont Goff Gore Hitchcock Root Saulsbury Shields Smith, Md. Smith, Mich. Stephenson James Johnson Lippitt Williams Works Lodge McCumber du Pont

So the amendment of the committee was agreed to. Mr. SIMMONS. Mr. President, I desire to move that the hour of daily meeting of the Senate be 11 o'clock a. m. until otherwise ordered by the Senate.

Mr. STONE. Mr. President, before the vote is taken I de-

sire to say just a word.

Schedule C, which we are now considering, was practically concluded on Saturday. Several paragraphs were passed over upon the request of Senators, to be taken up to-day. The committee confidently hoped, and with good reason expected, that the paragraphs as reported by the committee would be considered and their consideration ended to-day. early to-day, about half past twelve. Now it is practically 6 o'clock, and we have made little progress.

The committee has felt every disposition to accommodate the wishes of Senators. Paragraphs have been passed over from time to time, and a time fixed for their consideration. We have

now been a week on this one schedule.

I think Senators ought to display some reciprocal regard for the committee in charge of the bill. It is intolerable, as I view it, that a whole day should be taken up in the discussion of about two paragraphs of the bill. This criticism applies to one side of the Chamber as well as the other. The appeal 1 am making applies to one side as well as the other, that Senators will be a little more considerate of the situation and of the necessity of more rapid progress in the consideration of this measure.

I make this appeal, and I hope it will find favorable lodgment in the minds of Senators on both sides of the Chamber.

Mr. GALLINGER. Mr. President, as I suggested at an earlier hour to-day, I do not wonder that the Senator from Missouri is somewhat impatient. We are making very slow I am warmly in favor of commencing our meetings progress. at 11 o'clock.

I will ask the Senator from North Carolina, however, if he will not change his motion to a request for unanimous consent. think it will appear better.

Mr. SIMMONS. Yes; I shall be glad to do that.
Mr. GALLINGER. Of course, if unanimous consent is denied, the Senator can make the motion,

Mr. SIMMONS. Then I will withdraw the motion, and request unanimous consent that until otherwise ordered the daily meetings of the Senate shall be at 11 c'clock a m

meetings of the Senate shall be at 11 o'clock a. m.

The VICE PRESIDENT. The Senator from North Carolina asks unanimous consent that until otherwise ordered the daily sessions of the Senate shall begin at 11 o'clock a. m. The Chair hears no objection, and it is unanimously agreed to.

EXECUTIVE SESSION.

Mr. BACON. I move that the Senate proceed to the con-

sideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 10 minutes spent in executive session the doors were reopened, and (at 6 o'clock and 5 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, August 12, 1913, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate August 11, 1913.

SECRETARY OF LEGATION.

William P. Cresson, of Nevada, now second secretary of the embassy at London, to be secretary of the legation of the United States of America at Quito, Ecuador, vice Rutherfurd Bingham.

SPECIAL EXAMINER OF DRUGS, MEDICINES, AND CHEMICALS.

Joseph L. Murray, of Pennsylvania, to be special examiner of drugs, medicines, and chemicals in the district of Philadelphia, in the State of Pennsylvania, in place of Frederick W. Heyl, resigned.

COLLECTOR OF INTERNAL REVENUE.

James J. Walsh, of Connecticut, to be collector of internal revenue for the district of Connecticut, in place of Robert O. Eaton, superseded.

ASSISTANT APPRAISER OF MERCHANDISE.

Campbell Whitthorne, of California, to be assistant appraiser of merchandise in the district of San Francisco, in the State of California, in place of Jacob Shaen, resigned.

APPOINTMENTS IN THE ARMY.

MEDICAL RESERVE CORPS.

To be first lieutenants with rank from August 8, 1913.

Frederic Victor Beitler, of Maryland.
John Jordan Boaz, of Indiana.
Paul Eugene Bowers, of I diana.
Carl Raimund Hiller, of Ohio.
Peter McCall Keating, of Pennsylvania.
Harvey Adams Moore, of Indiana.
Firmadge King Nichols, of Maryland.
Blanchard Beecher Pettijohn, of Indiana.
Palmer Augustus Potter, of New Jersey.
Llewellyn Powell, of Virginia.
James Albert Robertson, of Kentucky.
Edward Percy Simpson, of Maryland.
Frederick Albert Tucker, of Indiana.

APPOINTMENTS AND PROMOTIONS IN THE NAVY.

The following-named citizens to be assistant surgeons in the Medical Reserve Corps of the Navy from the 4th day of August, 1913:

Frederick Ceres, a citizen of New Jersey, and Robert L. Crawford, a citizen of Florida.

Civil Engineer Adolfo J. Menocal, with rank of commander, to be a civil engineer in the Navy with rank of captain from the 8th day of August, 1913.

Civil Engineer Charles W. Parks, with rank of lieutenant commander, to be a civil engineer in the Navy with rank of commander from the 8th day of August, 1913.

CONFIRMATIONS.

Executive nominations confirmed by the Senate August 11, 1913.

APPOINTMENT IN THE ARMY.

CORPS OF ENGINEERS.

Col. William T. Rossell to be Chief of Engineers, with the rank of brigadier general.

PROMOTIONS AND APPOINTMENT IN THE NAVY.

Lieut. Raymond S. Keyes to be a lieutenant commander.

Asst. Surg. Walter A. Bloedorn to be a passed assistant surgeon.

Robert H. Foster to be an assistant surgeon in the Medical Reserve Corps.

REGISTER OF THE TREASURY.

Gabe E. Parker to be Register of the Treasury.

ASSAYER OF THE MINT.

Frank E. Wheeler to be assayer of the mint at Denver, Colo.

SUPERINTENDENT OF THE MINT.

Thomas Annear to be superintendent of the mint at Denver.

lo.

ASSISTANT APPRAISERS OF MERCHANDISE.

Harry Nichols to be assistant appraiser of merchandise in the district of Philadelphia, Pa.

Frederick Kuenzli to be assistant appraiser of merchandise in the district of New York, N. Y.

COMMISSIONER OF LABOR STATISTICS.

Royal Meeker to be commissioner of labor statistics, Department of Labor.

POSTMASTERS.

CALIFORNIA.

Francis F. Wrenn, Newcastle.

PENNSYLVANIA.

John Adams, Vandergrift.

WITHDRAWAL.

Executive nomination withdrawn August 11, 1913.

POSTMASTER.

August E. Harken to be postmaster at Peotone, Ill.

SENATE.

Tuesday, August 12, 1913.

The Senate met at 11 o'clock a. m.

Rev. C. A. Thomas, of the city of Washington, offered the

following prayer:

Almighty God, Father of all, giver of all good gifts, grant Thy blessing upon this Senate here assembled, and grant that their deliberations may be to Thy honor, to Thy glory, to the extension of Thy kingdom, to the peace and welfare of all peoples. And grant them in their deliberations such calm judgment and right spirit that all things may tend to Thy glory, to the blessing of this Nation, and to the unity of all peoples through Christ our Lord, who taught us in His words to pray: Our Father, who art in heaven, hallowed be Thy name. Thy kingdom come. Thy will be done on earth as it is in heaven. Give us this day our daily bread; and forgive us our trespasses as we forgive those who trespass against us. And lead us not into temptation; but deliver us from evil. For thine is the kingdom, the power, and the glory, for ever and ever. Amen.

The Journal of yesterday's proceedings was read and approved.

MESSAGE FROM THE HOUSE.

A message from the House, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the enrolled joint resolution (H. J. Res. 118) making appropriations for certain expenses incident to the first session of the Sixty-third Congress, and it was thereupon signed by the Vice President.

PETITIONS.

Mr. McLEAN presented a petition of Central Pomona Grange, No. 1, Patrons of Husbandry, of Plainville, Conn., praying for the retention of the administrative features of the parcel-post law, which was referred to the Committee on Post Offices and Post Roads.

Mr. GRONNA presented a petition of the Commercial Club of Larimore, N. Dak., praying for the adoption of a 1-cent letter postage, which was referred to the Committee on Post Offices and

Post Roads.

Mr. HUGHES presented a petition of the Cedar Grove Democratic Club, of New Jersey, praying for the enactment of currency legislation at the present session of Congress, which was referred to the Committee on Banking and Currency.

DWIGHT MISSION SCHOOL, OKLAHOMA.

Mr. OWEN, from the Committee on Indian Affairs, to which was referred the bill (S. 2725) authorizing the sale of certain land to the Dwight Mission School, on Sallisaw Creek, Okla., reported it with an amendment and submitted a report (No. 100) thereon.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McLEAN:

A bill (S. 2919) to provide for the establishment of a reserve association, furnishing an elastic currency, affording means

of rediscounting commercial paper, and to establish a more effective supervision of banking in the United States, and for

Mr. McLEAN. I wish to state that the Hon. E. J. ex-Congressman from Connecticut, is the author of this bill. introduce it at his request. I move that the bill be referred to the Committee on Banking and Currency.

The motion was agreed to.

By Mr. HUGHES:

A bill (S. 2920) granting a pension to Laura M. Clayton; to the Committee on Pensions.

By Mr. ROBINSON: A bill (S. 2921) for the relief of Thomas J. Estes; to the Committee on Military Affairs.

A bill (S. 2922) for the relief of H. C. Chase; to the Committee on Post Offices and Post Roads.

A bill (S. 2923) for the relief of the heirs of H. S. Young; A bill (S. 2924) for the relief of William M. West

A bill (S. 2925) for the relief of the heirs of Wesley W. Wallace:

A bill (S. 2926) for the relief of the heirs of the late Hugh Rowen:

A bill (S. 2927) for the relief of the heirs of J. A. Patillo; A bill (S. 2928) for the relief of the heirs of Dr. J. S. Morton, deceased:

A bill (S. 2929) for the relief of W. J. Massey;

A bill (S. 2930) for the relief of the heirs of Azraih Mitchell; A bill (S. 2931) for the relief of Lizzie E. McCord, administratrix of Moses S. McCord, deceased;

A bill (S. 2932) for the relief of the heirs of Eliza Ann Ash-

A bill (S. 2933) for the relief of the heirs of John H. Austin, deceased:

A bill (S. 2934) for the relief of the heirs of George Sink;

A bill (S. 2935) for the relief of the estate of Amanda E. Buck, deceased:

A bill (S. 2936) for the relief of the trustees of the Methodist Episcopal Church South, of Pine Bluff, Ark.;
A bill (S. 2937) for the relief of the estate of Moses S. Mc-

A bill (S. 2938) for the relief of Annie H. Rainey and heirs of William S. Rainey;

A bill (S. 2939) for the relief of the widow and the heirs of William S. Rainey, deceased;
A bill (S. 2940) for the relief of the heirs of Thomas E.

Roberson, deceased;

A bill (S. 2941) for the relief of the estate of James Scull:

A bill (S. 2942) for the relief of the heirs of Miles Knowlton; A bill (S. 2943) for the relief of the heirs of John Kirk;

A bill (S. 2944) for the relief of the heirs of Levander Jenkins, deceased;

A bill (S. 2945) for the relief of the heirs of John J. Johnson, deceased;

A bill (S. 2946) for the relief of the heirs of Samuel J. Jones, deceased:

A bill (S. 2947) to carry into effect the findings of the Court of Claims in the case of Virginia A. Jones, administratrix of Samuel J. Jones, deceased;

A bill (S. 2948) for the relief of the heirs of John W. Graves

A bill (S. 2949) for the relief of the heirs of John G. Freeman, deceased:

A bill (S. 2950) to carry into effect the findings of the Court of Claims in the case of heirs of Thaddeus N. Ferrell, deceased;

A bill (S. 2951) to carry into effect the findings of the Court of Claims in case of William E. Floyd, administrator of Asa Crow, deceased;

A bill (S. 2952) for the relief of legal representatives of Dr. W. D. Barnett, deceased, late of Cleveland County, Ark.;

A bill (S. 2953) for the relief of the heirs of G. W. Morris; A bill (S. 2954) for the relief of the heirs of Susan McCurley, deceased:

A bill (S. 2955) for the relief of the estate of J. H. Moseby, deceased

A bill (S. 2956) for the relief of the heirs of David R. Lamb;

A bill (S. 2957) for the relief of heirs or estate of Jesse E. Lacey, deceased; to the Committee on Claims.

A bill (S. 2958) granting an increase of pension to B. E. Benton:

A bill (S. 2959) granting an increase of pension to Albert Mc-Connell;

A bill (S. 2960) granting an increase of pension to J. B. Megehan:

A bill (S. 2961) granting a pension to Rhoda L. Hendricks: A bill (S. 2962) granting an increase of pension to Oliver Ayers

A bill (S. 2963) granting a pension to Albert I. Merrill;

A bill (S. 2964) granting a pension to A. G. Hamilton, alias Garland Hammond;

A bill (S. 2965) granting a pension to Minnie Bryant:

A bill (S. 2966) granting a pension to Phoebe A. Montgomery :

A bill (S. 2967) granting an increase of pension to Samuel P.

A bill (S. 2968) granting an increase of pension to Henry E. Everts:

A bill (S. 2969) granting a pension to Albert Moore;

A bill (S. 2970) granting a pension to John B. Clarke;

A bill (S. 2971) granting a pension to Thomas H. Hicks; A bill (S. 2972) granting a pension to Nancy E. Williams; A bill (S. 2973) granting a pension to Charles Woolston;

A bill (S. 2974) granting a pension to the Misses M. E. and

S. J. Gladney:

A bill (S. 2975) granting a pension to Julius C. Parrott; A bill (S. 2976) granting a pension to Anne E. Preddy;

A bill (S. 2977) granting a pension to Sarah L. Peters; and A bill (S. 2978) granting a pension to Rosina Freer; to the Committee on Pensions.

By Mr. SMITH of Michigan:

A bill (S. 2979) providing for the deportation of aliens temporarily or permanently residing in the United States; to the Committee on Foreign Relations.

AMENDMENT TO THE TARIFF BILL.

Mr. BRANDEGEE submitted an amendment intended to be proposed by him to the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

FUNERAL EXPENSES OF THE LATE SENATOR JOHNSTON.

Mr. WILLIAMS submitted the following resolution (S. Res. 160), which was read and referred to the Committee to Audit and Control the Contingent Expenses of the Senate:

Resolved, That the Secretary of the Senate be, and he hereby is, authorized and directed to pay from the miscellaneous items of the contingent fund of the Senate the actual and necessary expenses incurred by the committee appointed by the President of the Senate in arranging for and attending the funeral of the late Senator JOSEPH F. JOHNSTON, from the State of Alabama, vouchers for the same to be approved by the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. WILLIAMS, subsequently, from the Committee to Audit and Control the Contingent Expenses of the Senate, to which was referred the foregoing resolution, reported it favorably without amendment, and it was considered by unanimous consent and agreed to.

THE TARIFF.

The VICE PRESIDENT. The morning business is closed. Mr. STONE. I ask unanimous consent that House bill 3321 be proceeded with.

Will the Senator permit me to offer an Mr. PENROSE. amendment to the tariff bill before that is done?

Mr. STONE. Before the bill is laid before the Senate?

Mr. PENROSE. Either afterwards or before. Let the bill be laid before the Senate, and then I will offer my amendment and have it lie on the table.

Mr. STONE. I ask unanimous consent that the bill be laid before the Senate.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 3321) to reduce tariff duties and to provide revenue for the Government, and for other purposes.

Mr. PENROSE. At the request of the Civil Service Reform Association of Pennsylvania, a communication from which association I have in my hand and which I ask to have printed in the RECORD, I submit an amendment to be printed and lie on the table applying the civil-service rules and regulations to the very large number of Treasury Department employees that will be created in connection with the income tax

Mr. STONE. May I ask what is the paper the Senator asks to have printed in the RECORD?

Mr. PENROSE. I ask to have it read. It is a short communication.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

CIVIL SERVICE REFORM ASSOCIATION OF PENNSYLVANIA, Philadelphia, July 31, 1913.

Hon. Boies Penrose,

United States Senate, Washington, D. C.

Dear Sir: On behalf of the Pennsylvania Civil Service Reform Association, I wish to enter a protest against the provisions in the Simmons-Underwood tariff bill, H. R. No. 3321, which provides for the employment for a period of two years of a large force of agents, inspectors, deputy collectors, etc., without complying with the provisions of the civil-service law. This is amendment O, pages 207, 208, and 209. There appears to be no reason why this large force should not be taken from the eligible lists provided under the civil-service law.

The character of the position to be filled is properly one that should be in the classified service and under the regulations covering that service, and the commission is amply provided with lists from which certifications could be made to fill the positions created under the new law. We believe that the argument of emergency can not properly be advanced, and that certainly the result of the amendment in its present form will seriously affect the efficiency of the force appointed and will act prejudicially upon the whole civil service.

Yours, very truly,

T. Henry Walnut.

T HENRY WALNUT.

The VICE PRESIDENT. The amendment submitted by the Senator from Pennsylvania will lie on the table and be printed. Mr. McLEAN. Mr. President, on Monday of last week the senior Senator from Missouri [Mr. Stone] had read to the Senate a letter from Mr. R. K. Bogan, of Scitico, Conn., for the purpose, as stated by the Senator, of counteracting some statements which I had made in regard to the condition of the woolen industry in Connecticut. This letter purported to speak for Mr. George E. Keeney, president of the Somersville Manufacturing Co. I have here a letter signed by Mr. Keeney, and facturing Co. I have here a letter signed by Mr. Keeney, and I ask unanimous consent to have it read, that it may indicate to the senior Senator from Missouri the danger of relying upon statements from unknown sources.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the Secretary will read as requested.

The Secretary read as follows:

Somersville Manufacturing Co., Somersville, Conn., August 7, 1913.

Hop. George P. McLean, United States Senate, Washington, D. C.

My Dear Senator. I have received your letter and also the Congressional Record of August 4, which you sent me, containing a letter from Richard K. Bogan, of Scitico, Conn., to Senator Stone. The statement made in Mr. Bogan's letter, as published in the Congressional Record, is absolutely false in so far as the statement that I have in the past been opposed to any change in Schedule K or that I threatened the night before election to close down the mills of this company if our employees helped in any way to bring about Democratic victory. The Somersville Manufacturing Co. has been operated by its present officers and managers for more than 40 years, and in no instance has any officer of this company threatened our employees; neither have we attempted to influence their action in regard to voting, or on any other matters, except by fair and public argument.

As you will remember, I wrote you a letter soon after you became a Member of the Senate, and stated in that letter that I believed a mistake had been made by the Republicans in Congress in connection with the Payne-Aldrich tariff bill, in that they did not make a reduction of at least 25 per cent in that bill on all articles that have previously carried a duty.

In a meeting held in this town the night before election I made a

the Payne-Aldrich tariff bill, in that they did not make a reduction of at least 25 per cent in that bill on all articles that have previously carried a duty.

In a meeting held in this town the night before election I made a statement showing the conditions that the Somersville Manufacturing Co. passed through during the time of the Wilson tariff bill. This statement showed that the machinery of this company was operated not to exceed 50 per cent of its capacity during the time that that bill was in existence, and the pay roll of the company was correspondingly decreased. In 1896 the company began running its machinery in full, and from that time down to the present time there has never been a loom stopped in our works because of a lack of work. With the exception mentioned herein, our mills have for the last 30 years always run full, and, as I distinctly stated at the meeting referred to in Bogan's letter, they will continue to do so, regardless of what the tariff situation may be, so long as any customers will buy our goods and pay us a reasonable profit for making them. I have repeatedly made the latter statement in public during the agitation of the present tariff bill. We believe the bill will do great injury to our industry, and our belief is based largely on the conditions which have existed in Canada during the past 10 years, which is the best comparative condition that we can find. The manufacture of woolens there has been reduced at least 50 per cent from what it was in 1898, and it is entirely due to the reduction of the tariff on goods imported into that country. As the present Canadian tariff is practically the same as the proposed Underwood bill, we can only hope that we are better prepared to meet this radical reduction in the tariff on wool and woolens than our neighbors across the line have proved to be.

We had hoped that a less radical reduction would be made in the tariff on Schedule K than is made in the proposed bill and were justified in this position by the statements which President Wi

company whose seasons begin and end as they do in our business. The mills of this company and of others who are on this quality of goods are running full and are plentifully supplied with orders.

The mills on higher grades of goods, as, for instance, those in Rockville, which make fine worsteds or fine woolens, are extremely dull, and only a part of the machinery in that city is in operation, and that part which is in operation is running 40 hours per week, or two-thirds of their regular time. Not more than 50 per cent of the entire machinery on this class of goods is at present in operation. This is true not only of our own State, but it is true of nearly all the mills on this character of goods in this country. We who are manufacturing the medium class of goods are better situated, and we most sincerely hope and trust that the favorable conditions which have existed in our business for the last two years will continue in the future, and so far as the Somersville Manufacturing Co. is concerned it will run its mills and make and produce every yard of cloth that it can sell at cost with a reasonable profit added.

The statement Mr. Bogan made in regard to the Hartford Carpet Corporation, of Thompsonville, is, to say the least, misleading. The present season with the Hartford Carpet Co. closes in September of this year, and the superintendent of that company has stated that he preferred to have the tariff settled at once in some manner, as if he had to enter another season with the present uncertainty in connection with the tariff it would be very disastrous for them. He takes the same position that all other live manufacturers are taking in this matter, and that is that he will make every effort to run his mills in a profitable manner, believing that if the present tariff bill does not give us conditions that will allow the continuance of our present prosperity in manufacturing and other business that a change will be made in the near future that will allow the continuance of our present prosperity in manufactu

GEO. E. KEENEY.

Mr. STONE. Mr. President, I hope we will not at this time get into any general discussion, but proceed with the bill. ask now

Mr. CUMMINS. Mr. President, I feel that at this time I ought to say to the Senator from Missouri that I appreciate the very great courtesy he has extended to me with respect to the parliamentary situation of yesterday, and that upon reflection I have determined to relieve him, so far as I am concerned, by saying that I will not offer the substitute which I have in mind for the metal schedule until the bill passes from the Committee of the Whole into the Senate. Therefore the Senator from Missouri can proceed in the way that he thinks best, and without any regard to that subject at the present time. expect to offer it when we reach the consideration of the bill in the Senate.

Mr. STONE. Very well, Mr. President; that, of course, is a matter within the discretion of the Senator. I ask now that the amendment to paragraph 138 may be disposed of.

Mr. SUTHERLAND. Before that is done I should like to inquire what is the status of the amendment which I offered

on yesterday to paragraph 154?

Mr. STONE. If it is just as satisfactory to the Senator from Utah, I should like to proceed in regular order with these

amendments and now take them up.

Mr. SUTHERLAND. There is no objection to that, so long as my amendment is not lost sight of in any way.

Mr. STONE. The amendment will not be lost sight of; it

will be pending.
The VICE PRESIDENT. The Secretary will state the next amendment.

The reading of the bill was resumed.

The next amendment of the Committee on Finance was, in paragraph 138, page 40, line 20, after the words "ad valorem," to insert the following proviso:

Provided, That no article of fishing tackle herein named shall be imported having attached thereto any of the feathers the importation of which is prohibited by this act.

Mr. SMOOT. Mr. President, I asked that that paragraph go over, but I have no objection whatever to action upon it at this time, with the understanding, of course, that if the feather paragraph, so called-

Mr. STONE. Which is paragraph 357.

Mr. SMOOT. Paragraph 357-is amended in conformity with the provisions agreed to by the House, then we will return to this paragraph.

Mr. STONE. I think that will be necessary.

The VICE PRESIDENT. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

Mr. STONE. Mr. President, that having been disposed of, the next paragraph to be considered is paragraph 145, relating to aluminum, and I ask that that may now be disposed of. to aluminum, and I ask that that may now be disposed of. I understand there is an amendment offered by the junior Senator from Iowa [Mr. Kenyon], which, I suppose, is pending. If not, and he desires to offer the amendment, I should like to have him do so, in order that the matter may be disposed of.

Mr. KENYON. Is the Senator referring to paragraph 145?

My attention was diverted for a moment.

Mr. STONE. I am referring to paragraph 145.

Mr. KENYON. Mr. President, I am perfectly willing to proceed with it at any time; but the only difficulty I have is that the Senator from Pennsylvania [Mr. OLIVER] wanted it to come up when he was here, and I said on yesterday I would not bring it up until he was present. Later in the day, however, when he was present, I asked for a vote. I do not want to do anything that would prevent his being heard. I leave it en-

tirely to the Senator from Missouri.

Mr. STONE. Mr. President, I have not been requested by the Senator from Pennsylvania to allow this paragraph to go over. All I know about the matter is that he said yesterday that he should want to be present when it was considered, but that he was going to be away, and that he would be absent for a week, and possibly longer. I think we might dispose of it now; and if the Senator from Pennsylvania desires to take some action with reference to it, he will have ample opportunity to offer any amendment he chooses or take such other action as he may desire, the purpose I have being to get along with the

as he may desire, the purpose I have something about this matter, though I am not directly authorsomething about this matter, though I am not directly authorsomething about this matter. He did not ask me to say it, and what I am about to say is

purely voluntary on my part.

As the Senator from Pennsylvania left the Chamber yester day afternoon to leave the country-he has to be in Canada for a week or 10 days-he told me that he did not expect this paragraph to be brought up. When I remarked to him that there was no definite arrangement that it would not be brought up, he replied he had no doubt that the Senator from Missouri would leave it unacted upon in his absence, inasmuch as he had given notice that he was obliged to be away for a week or 10 I simply infer from that statement that he does not expect the paragraph to be acted upon. That is all I have to say.

Mr. JAMES. Mr. President, it was agreed on Saturday, however, that this paragraph was to be taken up on Monday and be voted on. That was the agreement made with the Senator from Iowa at the time the matter was considered.

Mr. BRANDEGEE. I am not aware of that agreement, if such a one was made, and evidently the Senator from Pennsylvania was not aware of it or he would not have expressed the hope to me that he did.

Mr. JAMES. That was the agreement, I will state to the Senator, which was entered into by reason of the statement of the Senator from Iowa that he desired a larger attendance when

his amendment was voted upon.

Mr. BRANDEGEE. I remember the Senator from Iowa said something of that kind.

The VICE PRESIDENT. The Secretary will read from the RECORD a statement made concerning this matter. The Chair thinks that will clear the situation.

The Secretary read as follows:

Mr. Kenyon. I would prefer, I think, to have my amendment voted on when the bill is being considered as in Committee of the Whole.

Mr. Oliver. I am extremely anxious to be here when it is acted upon; but if the Senator from Iowa desires the paragraph to go over, I do not like to interfere in the matter. I am ready to act now, but I want to be here when it is passed upon.

Mr. STONE. Of course, the Senator from Iowa can offer his amendment now or offer it when he pleases, but if the amendment is pending I should like to have it disposed of. later the Senator from Pennsylvania wishes to offer some other amendment, he will have the same opportunity that the Senator from Iowa would have if he did not offer his amendment now. If the Senator from Pennsylvania favors the amendment proposed by the Senator from Iowa, I think he can have no particular objection to having it disposed of; if he is against it, then I assume he is paired on the vote.

I am very anxious to be accommodating in every way, and I have shown every disposition, I think, to that end; but if Senators go away summering for 10 days or 2 weeks I can not think they have a right to expect that paragraphs and schedules will be held up for their accommodation. It is hardly fair to the committee charged with pressing this legislation to a

Mr. KENYON. Mr. President-

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Iowa?

Mr. STONE. Certainly, I yield.

Mr. KENYON. Mr. President, the exact situation is just this: There was some parliamentary embarrassment yesterday, as the Senator from Missouri knows. I asked that this paragraph go over. The Senator from Pennsylvania, as the Record shows, said he expected it to come up on yesterday, and he was then prepared to go ahead; but he said if the Senator from Iowa desired it to go over that he would make no objection.

Later in the day, when the parliamentary embarrassment arose, I suggested, in order to relieve the parliamentary embarrassment, that we go ahead and vote on my amendment at that time, and the Senator from Pennsylvania was then present; but I do think that he has it in his mind that this amendment will not be taken up until he is present. I shall not ask to take it up, but I do feel relieved from the apparent understanding with the Senator-

Mr. STONE. The Senator's colleague, the senior Senator from Iowa [Mr. Cummins], asked that this vote might be postponed until his substitute had been offered and he had had an opportunity to present his views on this paragraph. Now the senior Senator from Iowa informs the Senate that he will not offer his substitute until the bill reaches the Senate proper; so that situation is relieved. Of course the junior Senator from Iowa can offer his amendment if he wishes.

Mr. KENYON. I offered it yesterday and asked for a vote

on it.

Mr. STONE. All the committee amendments to the paragraph have been agreed to, and the only thing pending or that can be pending would be the amendment of the Senator from Iowa or

some other outside amendment.

Mr. KENYON. The only thing, Mr. President, that I care about is that the Senator from Pennsylvania may not be misled by any suggestion that I made on yesterday.

Mr. STONE. I do not think he has any right to be misled

by anything that I said.

Mr. BRANDEGEE. Mr. President, the situation as to this matter, as I remember it, is this: The Senator from Pennsylvania was here all day Saturday and, as the Senator from Iowa has said, was willing to have this paragraph acted upon at that time. The debate was so protracted that the Senate did not get to the point of taking a vote upon the amendment proposed until nearly 6 o'clock, when the attendance was very slim; whereupon the Senator from Iowa suggested that the matter go over until this week, because he wanted a fuller attendance when his amendment was acted upon.

Mr. SIMMONS. Mr. President-

Mr. BRANDEGEE. Just a moment, and I will yield. understand, the pending amendment of the Senator from Iowa provides that this product shall be put on the free list. The Senator from Pennsylvania stated to the Senate that his constituents were so much interested in this particular product that he had appeared before the Ways and Means Committee of the House in their behalf. He has some remarks, as I understand, that he wishes to make to the Senate upon the very amendment proposed by the Senator from Iowa.

I apprehend that if the amendment proposed by the Senator from Iowa should be voted upon and should prevail, the posttion of the Senator from Pennsylvania and the remarks he proposes to make to the Senate thereon would be foreclosed. so to speak, and he would have to move to reconsider in order to furnish to the Senate the information which ought to be in their possession, if it is of any use at all, before the vote is taken.

Mr. SIMMONS. Mr. President, I interrupted the Senator to see if there is anything before the Senate. I want to inquire of the junior Senator from Iowa whether he now offers his amendment?

Mr. BRANDEGEE. The amendment was offered yesterday, and is now pending.

Mr. SIMMONS. The amendment has been introduced; but

I am asking the junior Senator from Iowa if he now offers his amendment.

Mr. KENYON. The amendment was offered yesterday.

Mr. SIMMONS. Does the Senator withdraw it?

Mr. KENYON. I do not withdraw it. I do not urge it in the absence of the Senator from Pennsylvania.

Mr. BRANDEGEE. Mr. President, the amendment is now pending. That is the regular order, and that is what a vote will be taken upon if debate upon it is closed.

Before the vote is taken, in view of what the Senator from Pennsylvania previously stated to the Senate upon two occasions, that he was obliged to be away for a week, and has left the country, and in view of his statement to me that he had no doubt the matter would be deferred until his return, I am appealing to the other side of the Senate that it may be deferred.

It is not a question of wasting any time. I would not ask the Senate to waste a minute. We can just as well go on to something else and use the time, recurring to this as we are to recur to other amendments which have been passed over

There are amendments in other schedules which have been passed over at the request of various Senators, and the Senate has not seen fit to go back to them, and has not thought it has lost any time as long as we keep working on some schedule.

Of course, it is within the power of the Senator from Missouri to demand a vote and to force a vote if the Senators who are present do not care to discuss the matter any further. I have said all I can say. I have no request to make, and I know that whatever the Senator from Missouri decides upon will be done.

Mr. KENYON. Mr. President, I only desire to have the

RECORD absolutely correct—
Mr. STONE. Mr. President, I can end all this. After conference with my colleagues, we consent to let the matter be passed over until the Senator from Pennsylvania returns.

I now ask that paragraph 153 be taken up. There is a Senate committee amendment pending. That paragraph was passed over at the instance of the Senator from Massachusetts.

Mr. LODGE. Mr. President, I suppose that paragraph was passed over at the request of my colleague. At all events, I am perfectly willing to go on with it now. I shall take only a very

few moments in speaking about it.

The industry about which I wish to speak, which is included in this paragraph, is that of the manufacture of snap fasteners and clasps by whatever name known. Those were formerly included in sundries, in paragraph 427 of the act of 1909, and carried a duty of 50 per cent. At that rate of duty there has been a very strong competition from abroad, and the industry has been only slowly built up. It has become quite a large industry, and there are factories in my own State and in the State of Connecticut.

I merely wish to call attention to the enormous reduction that has been made on the product of this industry, from 50 to 15 per cent. It is very much heavier than most of the reductions, and it is made in an industry in which, while I have not the figures before me at this moment, there is a large foreign competition.

It seems to me that snap fasteners or clasps or parts thereof ought to be replaced in the classification of sundries, as they were before. While I do not hope to secure the duty which they now have, and which I think is no more than sufficient, they certainly ought to be given a better duty than 15 per cent. They are put here in a paragraph where they never have been before, and are subjected to this enormous reduction. I shall ask leave to file with my remarks a brief, only a page in length, giving some facts in regard to the industry, and the comparative rates

I move to strike out "snap fasteners and clasps by whatever name known." If that motion should prevail, I should then, of course, move to insert them in Schedule N, "Sundries." The first motion, however, will be to strike them from this paragraph.

I do not wish to take the time of the Senate by going into any great detail in regard to this matter.

great detail in regard to this matter. I do wish to emphasize the enormous reduction that is made on these particular articles by changing their classification, taking them from a schedule where they always have been and putting them under this paragraph.

I move to strike out the words "snap fasteners and clasps by

whatever name known."

The VICE PRESIDENT. The amendment offered by the

Senator from Massachusetts will be stated.

The Secretary. In paragraph 153, page 44, lines 18 and 19, it is proposed to strike out "snap fasteners and clasps by whatever name known."

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Massachusetts.

The amendment was rejected.

Mr. LODGE. I ask leave to add to what I have said the brief which I send to the desk.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

Brief submitted on behalf of United States Fastener Co., 95 Milk Street, Boston, Mass.

To the honorable members of the Ways and Means Committee of the House of Representatives:

As manufacturers of snap fasteners, clasps, and parts thereof, we respectfully submit that—
"Snap fasteners or clasps or parts of" are now provided for in Schedule N, sundries, paragraph 427, act of 1909, which reads as fol-

Schedule N, sundries, paragraph 427, act of 1309, which reads as forlows:

"Snap fasteners or clasps or parts of, 50 per cent." And we respectfully ask this committee that this item be not changed and that
the rate of duty be allowed to stand as it now is on this class of manufacture.

The use of snap fasteners, clasps, and parts thereof is constantly inreasing in this country, and their manufacture in the United States is
fast becoming an industry of no mean proportion; the present rate of
duty affords the manufacturers of these articles scarcely any protection,
and the competition with articles of a like nature made abroad and
imported into this country is most keen. "Snap fasteners or clasps or
parts of" are to-day manufactured in Germany and are being shipped

to this country in larger and larger quantities, and after payment of the present duty, which is 50 per cent ad valorem, together with all charges for ocean carriage or otherwise, are sold at a price less than that at which we can possibly compete if we are to continue to pay the same rate of wage as now paid by us. This, of course, means death to the above industry, which now employs thousands of operatives and in which a large amount of capital is invested.

For the information of the committee we append hereto a schedule of the wages paid in Germany and those paid by ourselves in like branches of manufacture for comparison.

Respectfully submitted.

United States Fasterer Co.

United States Fastener Co. W. S. RICHARDSON, Treasurer.

SCHEDULE N, SUNDRIES—SNAP FASTENERS, OR CLASPS, OR PARTS OF, PARAGRAPH 427, ACT OF 1909.

Comparison of prices paid per hour for labor in Germany and the United States.

	Germany.	United States.
Working foreman on presses. Machinists, die makers, etc., average. Lathe hand for presses. Helpers on presses, average. Carpenters Platers Platers Fireman, porter, etc. Packing girls.	14 10 61 121 16	Cents. 55] 39] 28 19 18 55] 25

The Secretary proceeded to read paragraph 153.

The next amendment of the Committee on Finance was, in paragraph 153, page 44, line 19, after the word "known," to insert "belt buckles," so as to make the paragraph read:

153. Hooks and eyes, metallic, snap fasteners and clasps by whatever name known, belt buckles, trousers buckles, and waistcoat buckles made wholly or partly of iron or steel, steel trousers buttons and metal buttons not specially provided for in this section, all the foregoing and parts thereof, 15 per cent ad valorem.

Mr. BRANDEGEE. The question being on the amendment, I assume, I wish to state that one of my constituents is in the business of making these belt buckles-the American Buckle Co., of West Haven, Conn. I read from a letter from that company:

There are in this country three concerns making wire buckles for overalls whose business will be severely injured and possibly ruined if the proposed reduction of tariff is enacted by Congress.

Those three concerns have invested in this line about \$150,000, on which their combined earnings are less than \$15,000 per annum.

They employ about 125 hands at wages from three to five times greater than paid for the same work in foreign countries.

The present tariff on these buckles is 5 cents per 100 and 15 per cent ad valorem, which it is proposed to reduce to 15 per cent ad valorem only.

cent ad valorem, which it is proposed to reduce to 15 per cent ad valorem only.

This reduction would no doubt allow foreign buckles to be sold in this country for less than they could be made here and force us to close our shops, as our special machinery for making these goods could not be used for any other purpose.

The concerns I have reference to are entirely independent of each other, and there exists between them the strongest competition for trade that is possible.

We wish to inquire of you if there is any possible way of having the proposed tariff increased; and if so, what steps it will be necessary to take?

This, of course, is another instance where, without any special complaint by anybody of the price of the goods, with no combination, with no large capitalization, a little industry that is able to employ 125 men in this country is to be put out of business and the business turned over to the foreigners.

I trust the amendment proposed by the committee will not prevail. There must be some kind of business in this country which it is desirable to preserve. There must be some type of business which is legitimate. I do not understand how it is expected that these businesses will survive if they can not produce their products as cheaply as foreign countries can produce them and put them in competition with them here without reducing the wages of their employees.

I trust the committee amendment will not prevail.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.
